

DISABLED STUDENTS PROGRAM & SERVICES (DSP&S)

The DSP&S program is designed to provide students with verified disabilities instructional and student support services that serve to facilitate student equal access to a college program of study. The program provides a wide variety of classroom accommodations, adaptive hardware and software, counseling, disability assessment and student advocacy and intervention assistance. Student participation in DSP&S is voluntary and while not all students with disabilities elect to participate in the program they still retain the right to have their disability related needs addressed in an educational setting. The program office is located in room S-205 and welcomes inquiries and the cooperation of college staff and faculty as we work in consortium to address the needs of our diverse disabled student populations. Please stop by or call our office at extension 3420 and speak to one of the DSP&S staff members. Thank you for your continued support.
