

[Show help](#)

**Goal:** Create a specific goal that will accomplish the mission of the unit. A proper goal is a statement that includes what you will accomplish with a specific measurable action and a date that it will be completed. Each unit goal should be associated with one of the Institutional Goals and Objectives. ***Please indicate which Institutional Goal best fits the Unit Goal.***

*Questions to consider in development of the goal: what does the unit aim to accomplish; who will work toward the goal; what is the focus of the goal (students, committee members, staff, employees, physical object, situation, event, condition, etc); what change or outcome (e.g. increase, decrease, or improvement) is predicted to occur; what is the time frame in which to accomplish the goal; to what degree will the goal be accomplished.*

**Evaluation:** Describe how you will evaluate the success of the goal. What will be different in the unit as a result of accomplishing the goal? How will you evaluate and know when you have achieved the goal? What evidence will show whether the goal has been accomplished?

***Please click here for more information about [How to Develop Goals, Evaluation, Objectives and Resources](#)***

***Please indicate which Institutional Goal the unit Goal falls under.*** Please click [here](#) to review the 2013-2014 Institutional Goals and Objectives.
