

Degrees/Certificates SLOs

Arts & Cultural Programs Division

Degrees/Certificate	SLOs
Animation, AS Degree	<p>Successful students will be able to develop and communicate a concept design that is original and engaging by using both digital and traditional methods such as quick sketching, perspective drawing and digital sculpture.</p> <p>Animating digital character or man-made object successful students will exhibit a knowledge and understanding of the principals of animation.</p> <p>Using the latest digital visualization tools and given a concept design describing an environment, character or man-made object, successful students will competently create a project appropriate for a portfolio in the entertainment industry.</p>
Art, AA Degree	<p>Students will describe and discuss the fundamental or "formal properties" of art: line, positive/negative space, shade/tone, texture, color, etc.</p> <p>Students will be able to identify, analyze and evaluate basic techniques of "process" in a variety of media: drawing, painting, sculpture, printmaking, computer graphics, photography, ceramics, etc.</p> <p>Students will be able to produce carefully considered art works to final completion there by demonstrating their "practice" of art.</p>
Art History, AA-T (new)	<p>Express an understanding of the roles and functions of art in society.</p> <p>Discuss works of art representative of diverse cultures and regions within a historical and social context.</p> <p>Explain how works of art communicate visual meaning.</p> <p>Describe the principles and formal elements of visual art.</p> <p>Apply art historical terminology and methodology in analyzing and interpreting works of art.</p>
Commercial Art, AS Degree	<p>Given a specific subject matter, students will use the professional design software to produce creative design solutions appropriate for commercial printing or other commercial uses, print and present a portfolio.</p>
Music, AS Degree	<p>All Rio Hondo music majors will be able to identify the major musical forms</p>

	<p>and the manner in which these forms define the style characteristics of the major musical periods: Baroque, Classical, Romantic, and Contemporary eras.</p> <p>Students will be able to identify and construct Major and the three forms of Minor scales in all 12 keys.</p> <p>All Music majors will be able to analyze a given four part choral.</p>
Photography, AS Degree	<p>Students create photographs that demonstrate effective control of aperture, shutter speed, and exposure.</p> <p>Given a specific thematic assignment, students create photographic images that demonstrate a working understanding of principles of photographic composition and framing.</p>
Theater Arts, AS Degree	<p>All Rio Hondo College Theatre Arts majors will be able to identify the difference between comedy and drama according the Aristotle's six elements of drama. Students will be able to identify plot, character, theme, music, diction, and spectacle.</p>

Degrees/Certificates SLOs

Behavioral & Social Science Division

Degree/Certificate	SLOs
Chicano Studies, AA Degree	A student who successfully completes the AA Degree requirements for Chicana/o Studies should be able to (1) define and explain the basic terms and concepts with the field of Chicana/o Studies and (2) identify and analyze at minimum two contemporary issues affecting the Chicano/Latino community.
Child Development, AS Degree	Student will explain and demonstrate the principles of developmentally appropriate practice while planning for and interacting with children in the early childhood classroom.
Child Development, Certificate	Student will explain and demonstrate the principles of developmentally appropriate practice while planning for and interacting with children in the early childhood classroom.
Drug Studies, AS Degree	<p>Upon completion of the Drug Studies degree students will demonstrate an understanding of concepts, theories and techniques that are foundational to the practice of addiction treatment.</p> <p>Upon completion of the Drug Studies degree students will demonstrate an understanding of assessment methods, treatment planning and case management.</p> <p>Upon completion of the Drug Studies degree students will demonstrate an understanding of recovery oriented behavior in addiction treatment management.</p> <p>Upon completion of the Drug Studies degree students will demonstrate an understanding of ethical practices in addiction treatment.</p>
Drug Studies, Certificate	<p>Upon completion of the Drug Studies certificate students will demonstrate an understanding of concepts, theories and techniques that are foundational to the practice of addiction treatment</p> <p>Upon completion of the Drug Studies certificate students will demonstrate an understanding of assessment methods, treatment planning and case management.</p> <p>Upon completion of the Drug Studies certificate students will demonstrate an understanding of recovery oriented behavior in</p>

	<p>addiction treatment management.</p> <p>Upon completion of the Drug Studies certificate students will demonstrate an understanding of ethical practices in addiction treatment.</p>
General Studies: Social Behavior & Self-Development, AA Degree	Students should have the ability to think critically in order to understand social issues
General Studies: Social Sciences, AA Degree	<p>Students should have the ability to think critically in order to understand social issues</p> <p>Students will recognize the basic vocabulary and concepts of at least one social or behavioral science discipline verbally or in writing.</p>
History, AA-T Degree	<p>Students who successfully complete an AA in History will demonstrate command of historical chronology and basic literacy of key events associated with the study of the past.</p> <p>Students who successfully complete an AA in History will accurately identify historical sources and then apply appropriate historical methods to explain what the source reveals about its historical context.</p> <p>Students who successfully complete an AA in History will accurately describe, compare, and evaluate historical interpretations (secondary sources), analyzing them for their relative quality, accuracy, and persuasiveness.</p>
Philosophy, AA Degree	<p>Given prior instruction on a topic of philosophical interest, the student will demonstrate the ability to formulate and defend a philosophical position by clearly articulating a thesis statement, and providing supporting points.</p> <p>The student will demonstrate an ability to read and comprehend philosophical texts by accurately identifying the main point and some key supporting points.</p> <p>The student will demonstrate proficiency with the main terms, concepts, and definitions that pertain to the different branches of philosophy.</p> <p>The student will develop a critical understanding of the work of central thinkers in the Western philosophical tradition and demonstrate this understanding by means of a competent paraphrase of their main ideas.</p> <p>The student will demonstrate an ability to defend a philosophical position or argument.</p>

	<p>The student will demonstrate the ability to evaluate the validity of a deductive argument.</p> <p>The student will demonstrate the ability to evaluate the strength of an inductive argument.</p>
Preschool Teacher, Certificate	Student will explain and demonstrate the principles of developmentally appropriate practice while planning for and interacting with children in the early childhood classroom.
Psychology, AA Degree for Transfer	<p>Given research findings and theories in psychology, describe and/or evaluate the role that both genetics and environment play in different behaviors.</p> <p>Students will compare and contrast the experimental method to other types of inquiry.</p> <p>Students will identify the important historical figures in psychology and explain their key contributions to the field.</p>
Sociology, AA Degree for Transfer	<p>Upon completion of the Associate of Arts degree in Sociology for Transfer the student should understand the foundations of Sociology as a discipline.</p> <p>Upon completion of the Associate of Arts degree in Sociology for Transfer the student should have a broad understanding society and social behavior.</p> <p>Upon completion of the Associate of Arts degree in Sociology for Transfer, students should be able to understand the importance of social and historical contexts.</p> <p>Upon completion of the Associate of Arts degree in Sociology for Transfer, students should have the ability to demonstrate basic social analysis skills.</p>

Degrees/Certificates SLOs

Business Division

Degree/Certificate	SLOs
Accounting, A.S. degree	<p>Students are able to demonstrate an understanding of basic accounting principles and procedures, as well as the role of accounting and bookkeeping within various business organizations.</p> <p>Students are able to apply critical thinking skills derived from knowledge of accounting theory, to financial analysis and management decision making.</p> <p>Students are able to recognize and understand the importance of ethics and social responsibility in the accounting profession.</p> <p>Students are able to analyze, process, and report financial information in accordance with Generally Accepted Accounting Principles within established normal and computerized protocols.</p> <p>Students are able to relate material from completed courses to their current and future professional needs, even if these needs fall into a different discipline.</p>
Accounting, Certificate	<p>Students are able to demonstrate an understanding of basic accounting principles and procedures, as well as the role of accounting and bookkeeping within various business organizations.</p> <p>Students are able to apply critical thinking skills derived from knowledge of accounting theory, to financial analysis and management decision making.</p> <p>Students are able to recognize and understand the importance of ethics and social responsibility in the accounting profession.</p> <p>Students are able to analyze, process, and report financial information in accordance with Generally Accepted Accounting Principles within established normal and computerized protocols.</p>
Business Administration, AA Degree	Evaluate the use of financial budgeting concepts to make sound decisions in managing business finances through the preparation of financial

	<p>statements, recording and posting journal entries, and transforming data into information.</p> <p>Demonstrate an understanding of economic principles by differentiating between micro and macro economies, explaining supply and demand, and applying economic principles to make business decisions.</p> <p>Use statistical and mathematical expressions to make general statements about populations of customers and make numeric business decisions</p>
<p>Computer Information Technology: Computer Systems, AS Degree</p>	<p>Students will demonstrate basic computer literacy including input/output devices and MS Office Suite of applications.</p> <p>Students will be able to apply critical thinking and problem solving skills required by employers and four year universities in the computer information systems field.</p> <p>Students will be able to analyze a problem, and identify and define the computing requirements appropriate to its solution.</p> <p>Students will be able to design and write usable and effective computer programs that can be integrated into the user environment using modern high level languages.</p> <p>Students will be able to communicate effectively and efficiently with clients, users and peers using both verbal and written communication tools.</p> <p>Students will be able to demonstrate a working knowledge of computer hardware, operating systems and application software.</p> <p>Students will be able to identify the tasks of systems analysis and database design and use current technology necessary for computing practice.</p>
<p>Computer Information Technology: Computer Systems, Certificate</p>	<p>Demonstrate basic computer literacy including input/output devices and MS Office Suite of applications.</p> <p>Students will be able to apply critical thinking and problem solving skills required by employers and four year universities in the computer information systems field.</p> <p>Students will be able to analyze a problem, and identify and define the computing requirements appropriate to its solution.</p> <p>Students will be able to design and write usable and effective computer programs that can be integrated into the user environment using modern</p>

<p>Computer Information Technology: Microcomputer Specialist, AS Degree and Certificate</p>	<p>Students will demonstrate basic computer literacy including input/output devices and MS Office Suite of applications.</p> <p>Students will demonstrate advanced knowledge of spreadsheet and word processing applications as utilized in the business environment.</p> <p>Student will be able to apply critical thinking and problem solving skills required by employers and four year universities in a professional office environment.</p>
<p>Computer Information Technology: Microcomputer Specialist, Certificate</p>	<p>Demonstrate basic computer literacy including input/output devices and MS Office Suite of applications.</p> <p>Students will demonstrate advanced knowledge of spreadsheet and word processing applications as utilized in the business environment</p> <p>Student will be able to apply critical thinking and problem solving skills required by employers and four year universities in a professional office environment.</p>
<p>Int'l Business Degree and Certificate</p>	<p>Students will strengthen their skills to present a thorough review of the potential benefits, costs, and risks of doing business abroad and how the political, economic, and legal systems of the countries vary.</p> <p>Students must be able to analyze management ethical issues and cultural sensitivities in the global business.</p> <p>Students are able to apply integrated marketing strategies with customers, partners and regulators in the global marketplace.</p> <p>Students are able to describe international trade processes and the functions of the foreign exchange market.</p>

Logistics, AS Degree	<p>After completing the courses in this degree, the student should know the role and historical development of supply chain management and integrated logistics functions.</p> <p>The student should know the relationship between operations, warehousing, distribution centers, and materials management.</p> <p>The student should know the importance of sound inventory management principles.</p> <p>The student should be able to contribute to process improvement projects.</p>
Logistics, Certificate	<p>After completing the courses in this degree, the student should know the role and historical development of supply chain management and integrated logistics functions.</p> <p>The student should know the relationship between operations, warehousing, distribution centers, and materials management.</p> <p>The student should know the importance of sound inventory management principles.</p> <p>The student should be able to contribute to process improvement projects.</p>
Management & Supervision, AS Degree	<p>Students are able to identify the concepts of organizational design and behavior of organizations in the supervisory level.</p> <p>Students are able to describe how technology and globalization affect the supervisor's job.</p> <p>Students are able to describe the term 360-degree appraisal and apply the appropriate methods of motivation in an organizational setting.</p> <p>Students are able to explain the effect of workforce diversity on motivating employees.</p>
Management & Supervision, Certificate	<p>Students are able to identify the concepts of organizational design and behavior of organizations in the supervisory level.</p> <p>Students are able to describe how technology and globalization affect the supervisor's job.</p>

	<p>Students are able to describe the term 360-degree appraisal and apply the appropriate methods of motivation in an organizational setting.</p> <p>Students are able to explain the effect of workforce diversity on motivating employees.</p>
Marketing Degree and Certificate:	<p>Analyze a business situation by conducting a SWOT analysis (strengths, weaknesses, opportunities and threats) and utilize the outcomes to make business decisions.</p> <p>Create a marketing plan that explains the marketing mix and defines the appropriate target market.</p> <p>Given a business marketing situation, identify the most profitable segments of the market, define the logical target market, and describe how the business of product will be positioned.</p>
Retail Management (WAFC), Certificate	<p>Students will explain the challenges and opportunities of managing a diverse workforce in a retail environment through their understanding of leadership and management models, motivation and reward theory, and conflict resolution techniques.</p> <p>Students will demonstrate their knowledge of financial management and budgeting by applying basic math skills to calculate retail math equations, to make business decisions using these calculations, and to prepare pro-forma financial statements.</p> <p>Students will demonstrate proper communication and critical thinking skills through written and oral assignments. Skill sets demonstrated will include document editing, preparation of business reports, and proper use of the communication process.</p>
Small Business/Entrepreneurialism, AS Degree	<p>Students should develop an effective business plan by using guerrilla marketing strategies and basic financial statements.</p> <p>Students must be able to distinguish between the debt vs. equity finance options.</p> <p>Students be able to explain the essential importance of cash flow planning for the small business operations.</p> <p>Students are able to use breakeven analysis to evaluate marketing plan.</p>
Small Business/Entrepreneurialism, Certificate	<p>Students should develop an effective business plan by using guerrilla marketing strategies and basic financial statements.</p> <p>Students must be able to distinguish between the debt vs. equity finance</p>

	<p>options.</p> <p>Students be able to explain the essential importance of cash flow planning for the small business operations.</p> <p>Students are able to use breakeven analysis to evaluate marketing plan.</p>

Degrees/Certificates SLOs

Career & Technical Education Division

Degree/Certificate	SLOs
Alternative Energy Technology, AS Degree	<p>The skills developed during classes will enhance the student's ability to complete the (NABCEP) North American Board of Certified Energy Practitioners and to become a specialist in the Solar Photovoltaic industry.</p> <p>The Degree is designed to prepare an individual for transfer and/or entry-level employment as an Alternative Energy Technician within the renewable energy/green technology field.</p> <p>Upon completion of this program an individual will have the knowledge and skills necessary to install residential and commercial solar and wind power systems.</p> <p>The individual will know and understand Green Building Design principles and also have the skills to successfully perform residential and commercial/industrial energy audits.</p>
Alternative Energy Technology, Certificate	<p>The skills developed during classes will enhance the student's ability to complete the (NABCEP) North American Board of Certified Energy Practitioners and to become a specialist in the Solar Photovoltaic industry.</p> <p>The Certificate is designed to prepare an individual for entry-level employment as an Alternative Energy Technician within the renewable energy/green technology field.</p> <p>Upon completion of this program an individual will have the knowledge and skills necessary to install residential and commercial solar and wind power systems.</p>
Alternative Fuel and Advanced Transportation Technology, AS Degree	<p>Students will be able to access legal rules and regulations from a variety of resources (state and federal) providing the opportunity to acquire the knowledge and hand skills demanded of modern transportation specialists.</p> <p>Upon successful completion of this course, students will be able to describe and demonstrate, simulated on-the-job conditions regarding the congressional nine alternative fuel sources.</p>

	<p>Upon successful completion of this course, students whom complete the career path cartographically examine and assemble information for a target audience of who would use the Alternative Fuel types.</p> <p>Regardless of career path, Private, Government or Fleet the Alternative Fuels A.S Degree or COA student obtains transferable credit to a university and points towards qualifying as a certified CSA Fuel Tank Inspector</p> <p>Upon successful completion of this course, students will be able to pass the safety requirements with complete knowledge of NFPA, CSA, CGA 6.4, and OSHA standards</p> <p>Upon successful completion of this course, students will be able to access legal rules and regulations from a variety of resources (state and federal) providing the opportunity to acquire the knowledge and hand skills demanded of modern transportation specialists.</p>
<p>Alternative Fuel and Advanced Transportation Technology, Certificate</p>	<p>Upon successful completion of this course, students who complete the career path cartographically examine and assemble information for a target audience who would use the Alternative Fuel types.</p> <p>Regardless of career path, Private, Government or Fleet the Alternative Fuels A.S Degree or COA student obtains transferable credit to a university and points towards qualifying as a certified CSA Fuel Tank Inspector.</p> <p>Upon successful completion of this course, students are capable of describing applications in all nine Alternative Fuel areas, Compressed, Liquid, generated electrical and Bio diesel.</p> <p>Students will be able to access legal rules and regulations from a variety of resources (state and federal) providing the opportunity to acquire the knowledge and hand skills demanded of modern transportation specialists.</p> <p>Upon successful completion of this course, students will be able to pass the safety requirements with complete knowledge of NFPA, CSA, CGA 6.4, and OSHA standards</p>
<p>Architecture Design and Drawing , AS Degree</p>	<p>Given various visual communication technologies such as traditional drafting, CADD and BIM (Building Information Modeling) with industry standards such as AIA and AEC</p>

	<p>(Architectural, Engineering and Construction), Graphic Standards and the Building Code, successful students will be able to effectively communicate graphically and understand and interpret design concepts and criteria for various disciplines related to the AEC industry.</p> <p>Upon completion of the program successful students are prepared for industry employment and advancement within a variety of related AEC professions.</p> <p>Further, students are prepared to transfer to advanced fields of study in related occupations</p>
<p>Architecture Design and Drawing , Certificate</p>	<p>Given various visual communication technologies such as traditional drafting, CADD and BIM (Building Information Modeling) with industry standards such as AIA and AEC (Architectural, Engineering and Construction), Graphic Standards and the Building Code, successful students will be able to effectively communicate graphically and understand and interpret design concepts and criteria for various disciplines related to the AEC industry.</p> <p>Upon completion of the certificate successful students are prepared for industry employment and advancement within a variety of related AEC professions.</p>
<p>Architecture, AS Degree</p>	<p>Given various visual communication technologies such as traditional drafting, sketching, CADD, BIM (Building Information Modeling) perspective drawing and three dimensional model development, with industry standards such as AIA and AEC (Architectural, Engineering and Construction), Graphic Standards and the Building Code, successful students will be able to effectively understand, communicate and interpret design concepts and criteria for various disciplines related to the AEC industry.</p> <p>Upon completion of the program successful students are prepared to transfer to advanced fields of study in Architecture related occupations.</p>
<p>Automotive Technology, Heavy Equipment Maintenance Specialist, AS Degree</p>	<p>While obtaining and earning the degree, the student will be able to work safely and identify safety and health hazards in a heavy equipment service and repair facility.</p> <p>While obtaining and earning the degree, the student will be able to communicate effectively, both verbally and through the written word, in a heavy equipment service and repair</p>

	<p>environment.</p> <p>While obtaining and earning the degree, the student will be able to properly use and care for heavy equipment service and repair tools and equipment.</p> <p>While obtaining and earning the degree, the student will be able to research, read, and use heavy equipment service and repair literature, both in print and in electronic format.</p> <p>While obtaining and earning the degree, the student will be able to identify, analyze, and evaluate general heavy equipment service and repair issues to determine concern, cause, and correction.</p>
<p>Automotive Technology, Heavy Equipment Maintenance Specialist, Certificate</p>	<p>While obtaining and earning the Certificate of Achievement, the student will be able to work safely and identify safety and health hazards in a heavy equipment service and repair facility.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to communicate effectively, both verbally and through the written word, in a heavy equipment service and repair environment.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to properly use and care for heavy equipment service and repair tools and equipment.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to research, read, and use heavy equipment service and repair literature, both in print and in electronic format.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to identify, analyze, and evaluate general heavy equipment service and repair issues to determine concern, cause, and correction.</p>
<p>Automotive Technology, AS Degree</p>	<p>While obtaining and earning the degree, the student will be able to work safely and identify safety and health hazards in an automotive service and repair facility.</p> <p>While obtaining and earning the degree, the student will be able to communicate effectively, both verbally and through the written word, in an automotive service and repair environment.</p> <p>While obtaining and earning the degree, the student will be</p>

	<p>able to properly use and care for automotive service and repair tools and equipment.</p> <p>While obtaining and earning the degree, the student will be able to research, read, and use automotive service and repair literature, both in print and in electronic format.</p> <p>While obtaining and earning the degree, the student will be able to identify, analyze, and evaluate specific automotive service and repair issues to determine concern, cause, and correction.</p>
<p>Automotive Technology; General Service Technician Certificate</p>	<p>While obtaining and earning the Certificate of Achievement, the student will be able to work safely and identify safety and health hazards in an automotive service and repair facility.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to communicate effectively, both verbally and through the written word, in an automotive service and repair environment.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to properly use and care for automotive service and repair tools and equipment.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to research, read, and use automotive service and repair literature, both in print and in electronic format.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to identify, analyze, and evaluate general automotive service and repair issues to determine concern, cause, and correction.</p>
<p>Civil Design & Drawing, Certificate</p>	<p>Given various visual communication technologies such as traditional drafting and CADD, with industry standards, such as AEC Graphic Standards, successful students will be able to effectively communicate, understand and interpret design concepts and criteria for the civil engineering field.</p> <p>Upon completion of the program, successful students are prepared for industry employment and advancement within a variety of related professions such as civil engineering, construction engineering, structural engineering, transportation engineering, and geotechnical engineering.</p>
<p>Civil Design Technology, AS Degree</p>	<p>Given various visual communication technologies such as traditional drafting and CADD, with industry standards, such as</p>

	<p>AEC Graphic Standards, successful students will be able to effectively communicate, understand and interpret design concepts and criteria for the civil engineering field.</p> <p>Upon completion of the program, successful students are prepared for industry employment and advancement within a variety of related professions such as civil engineering, construction engineering, structural engineering, transportation engineering, and geotechnical engineering.</p> <p>Further, students are prepared to transfer to advanced fields of study in related occupations.</p>
Civil Design Technology, Certificate	<p>Given various visual communication technologies such as traditional drafting and CADD, with industry standards, such as AEC Graphic Standards, successful students will be able to effectively communicate, understand and interpret design concepts and criteria for the civil engineering field.</p> <p>Upon completion of the program, successful students are prepared for industry employment and advancement within a variety of related professions such as civil engineering, construction engineering, structural engineering, transportation engineering, and geotechnical engineering.</p>
Electronic Technology, AS Degree	<p>The knowledge and skills developed during classes will enhance the student's ability to become a specialist in the applied electronics industry.</p> <p>The Degree is designed to prepare a student for transfer and/or entry-level employment as an Electronics Technician.</p>
Electronic Technology, Certificate	<p>This program is designed to prepare students and incumbent workers as Electronics Technicians. Training is in theory and practical skills.</p> <p>The program will provide the student the opportunity to acquire the knowledge and hands on skills that is demanded of modern Electronics Technicians.</p> <p>Upon completion of this program an individual will have the knowledge and skills necessary to gain entry-level employment in the applied electronics industry.</p>
Engineering Design Drafting Technician, Certificate	<p>Given various visual communication technologies such as traditional drafting and CADD, with industry standards such as ANSI / ASME and ISO, successful students will be able to effectively communicate, understand and interpret design concepts and criteria for industries that design, engineer and manufacture products.</p> <p>Upon completion of the program, successful students are prepared for industry employment and advancement within a</p>

	<p>variety of related professions.</p>
Engineering Design Drafting AS Degree	<p>Given various visual communication technologies such as traditional drafting and CADD, with industry standards such as ANSI / ASME and ISO, successful students will be able to effectively communicate, understand and interpret design concepts and criteria for industries that design, engineer and manufacture products.</p> <p>Upon completion of the program, successful students are prepared for industry employment and advancement within a variety of related professions.</p> <p>Further, students are prepared to transfer to advanced fields of study in related occupations.</p>
Geographic Information System, Certificate	<p>Student can describe and discuss the applications of geographic information systems (GIS) in their respective field. Student can use GIS to analyze and uncover spatial patterns and trends, to model environmental conditions and to predict future scenarios such as post fire conditions or to model suitable locations for a new housing or wind farm development.</p> <p>Student can evaluate relevance of information for GIS project, and contribute new data from variety of sources including Global Positioning Systems (GPS).</p> <p>Student can cartographically examine and assemble information for a target audience.</p>
Honda Prof. Career Training Program Specialization (PACT), AS Degree	<p>The skills developed during classes will enhance the student's ability to complete the (ASE) Automotive Service Excellence Certification Tests A-1 through A-8, Automotive Technician and to become a specialist for Honda/Acura vehicles.</p> <p>The Degree is designed to prepare an individual for transfer and/or entry-level employment as an Automotive Technician within a Honda/ Acura Dealer.</p>
Surveying, Mapping,& Drawing, Certificate	<p>Given instruction in the both the theory and practice of land surveying as well as instruction in various visual communication technologies such as traditional drafting and CADD, with industry standards, successful students will be able to effectively collect, develop, map, communicate, understand and interpret geospatial data.</p> <p>Upon completion of the program, successful students are prepared for industry employment and advancement within a variety of related professions such as land surveyor, civil engineering, construction engineering, transportation engineering, and geotechnical engineering.</p>

<p>Welding Technology, Certificate</p>	<p>While obtaining and earning the Certificate of Achievement, the student will be able to work safely and identify safety and health hazards in the workplace.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to communicate effectively, both verbally and through the written word, in a welding environment.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to properly use, operate, and care for welding materials, tools, and equipment.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to research, read, and use welding material build sheets, blueprints, and other welding-related literature, both in print and in electronic format.</p> <p>While obtaining and earning the Certificate of Achievement, the student will be able to identify, analyze, evaluate, and demonstrate different welding operations and processes.</p>

Degrees/Certificates SLOs
Health Sciences & Nursing Division

Degree/Certificate	SLOs
Associate Degree Nursing, AS Degree	<p>Upon completion of the Rio Hondo College Associate Degree in Nursing, the graduate will be aligned in a position to transition into a Bachelor's of Science in Nursing program.</p> <p>The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas</p>
Vocational Nursing, AS Degree	<p>Graduates will incorporate the medical model utilizing all aspects of the nursing process with successful completion of all theory objectives and clinical objectives in all courses of the vocational nursing program</p> <p>Graduates will be prepared and have successful pass rate on national vocational nursing exam.</p> <p>Graduates will complete all general education (GE) requirements for AS degree, in vocational nursing.</p> <p>The student will integrate the simulated clinical experience to enhance clinical performance in all clinical area</p>
Vocational Nursing, Certificate	<p>The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas</p> <p>Graduates will be prepared and have successful pass rate on national vocational nursing exam.</p> <p>Graduates will incorporate the medical model utilizing all aspects of the nursing process with successful completion of all theory objectives and clinical objectives in all courses of the vocational nursing program</p>

Degree/Certificate SLOs

Kinesiology, Dance, & Athletics Division

Certificate/Degree	SLOs
Fitness Specialist, Certificate	<p>Analyze individual health and fitness levels and create individual exercise programs.</p> <p>Apply and demonstrate exercise testing skills and techniques to real world situations, such as individual client fitness assessments.</p> <p>Adapt to diverse populations and fitness levels and have an awareness of special needs individuals.</p> <p>The student will be able to: Apply fitness concepts, definitions and principles to personal training, group fitness instructions, or health and fitness settings.</p> <p>Upon completion of the certificate, have a career in the personal training or fitness instructor field. (Assessment: Student gets a job in a related career, or transfer to a 4-year institution within 3 years).</p>
Kinesiology, AA-T Degree	<p>Students will understand different types of exercise programs and diets and their relationship to their fitness and wellness.</p> <p>Students will explain methods and techniques used to promote cardiovascular fitness.</p> <p>Students will understand the role of diet and exercise in controlling chronic health problems.</p>
Kinesiology, Athletic Trainers Aide, Certificate	<p>Students will conduct a primary & secondary survey following an injury, and make emergency treatment decisions based on results.</p> <p>Students will treat a variety of open wounds as a</p>

	<p>first responder, recognizing the use of personal protective equipment.</p> <p>Students will apply the appropriate splinting and taping techniques for a variety of injuries, using a variety of medical supplies.</p> <p>Students will identify the indications, contraindications and application techniques for the use of several therapeutic modalities.</p>

Degrees/Certificates SLOs

Math & Science Division

Degree/ Certificate	SLOs
Biology, AS Degree	<p>Students develop the ability to evaluate scientific information critically, using analytical reasoning and quantitative skills.</p> <p>Students strengthen their skills in reading, writing, oral communication, and critical thinking.</p> <p>Students demonstrate knowledge in three major sub-disciplines of biology: cellular and molecular biology, organismal biology, and ecology and evolution</p> <p>Students will understand and use scientific methodology.</p>
Environmental Science, AS Degree	<p>Students will apply environmental science concepts and analytical procedures in various fields.</p> <p>Students have the ability to economic principles to analyze environmental problems.</p> <p>Students have the ability to work as a member of an interdisciplinary team to solve environmental problems.</p> <p>Students strengthen their skills in reading, writing, oral communication, and critical thinking.</p>
Environmental Technology, AS Degree	<p>Given the variety of types of environmental, health and safety hazards that may be encountered in the environmental field, students will identify the types of hazards.</p>
Environmental Technology, Certificate	<p>Given the variety of types of environmental, health and safety hazards that may be encountered in the environmental field, students will identify the types of hazards.</p>
General Studies: Science & Mathematics, AA Degree	<p>Students critique and interpret data presented in appropriate graphical and/or verbal formats.</p> <p>Students evaluate the strengths and limitations of scientific models employed to describe a particular phenomenon.</p>
Mathematics, AS Degree	<p>Given the description of real-world problem, students construct</p>

	correct equations and/or inequalities to represent the problem and determine the correct solution or set of solutions.

Degrees/Certificates SLOs

Public Safety Division

Degree/Certificate	SLOs
Administration of Justice, AA/AS Degrees	<p>Apply legal definitions, concepts, and principles to law enforcement, courts, or correctional settings.</p> <p>Communicate information in a clear and organized manner.</p> <p>Analyze ethical dilemmas encountered in the law enforcement and/or corrections fields and decide on the correct ethical choice.</p> <p>Apply constitutional, statutory, procedural, and case law to real-life criminal justice situations</p> <p>Adapt to the diverse and multicultural nature of American society in the criminal justice setting.</p> <p>Use the degree or certificate as a platform for a career in the criminal justice field or further study at a 4-year institution</p>
Corrections, AA Degree	<p>Apply legal definitions, concepts, and principles to law enforcement, courts, or correctional settings.</p> <p>Communicate information in a clear and organized manner.</p> <p>Analyze ethical dilemmas encountered in the law enforcement and/or corrections fields and decide on the correct ethical choice.</p> <p>Apply constitutional, statutory, procedural, and case law to real-life criminal justice situations.</p> <p>Adapt to the diverse and multicultural nature of American society in the criminal justice setting.</p> <p>Use the degree or certificate as a platform for a career in the criminal justice field or further study at a 4-year institution.</p>
Emergency Medical Technician, Certificate	<p>Apply concepts related to the entire spectrum of EMS care including: Airway, Ventilation, Oxygenation; Trauma; Cardiology; Medical; and EMS Operations</p> <p>Competently perform Patient Assessment (Medical and Trauma)</p>

	<p>psychomotor skills.</p> <p>Competently perform Upper Airway Adjuncts and Suctioning psychomotor skills.</p> <p>Competently perform Oxygen and Bag-Valve-Mask (apneic patient) psychomotor skills.</p> <p>Competently perform Cardiac Arrest Management and AED psychomotor skills.</p> <p>Competently perform Bleeding Control and Shock psychomotor skills.</p> <p>Competently perform Spinal Immobilization psychomotor skills.</p> <p>Competently perform Fracture and Dislocation Immobilization psychomotor skills</p> <p>Competently perform Pre-hospital Childbirth psychomotor skills.</p>
<p>Fire Technology, AA Degree</p>	<p>Identify minimum qualifications and entry-level skills for firefighter hiring; describe the following elements: application process, written exam process, physical agility exam, oral interview, chief's interview, background investigation, and firefighter probationary process; identify fire service history, culture, and diversity.</p> <p>Identify and comprehend laws, regulations, codes, and standards that influence fire department operations and identify regulatory and advisory organizations that create and mandate them, especially in the areas of fire prevention, building codes and ordinances, and firefighter health and safety.</p> <p>Analyze the causes of fire, determine extinguishing agents and methods, differentiate the stages of the fire and fire development, and compare methods of heat transfer.</p> <p>Calculate flow requirements for fire apparatus, diagram a pump and plumbing schematic for fire apparatus, and apply mathematic formulae to hydraulics problems.</p> <p>Identify and describe the apparatus used in the fire service and the equipment and maintenance of fire apparatus and equipment. (Elective)</p> <p>Identify and describe common types of building construction and conditions associated with structural collapse and firefighter safety.</p>

	<p>Differentiate between fire detection and fire suppression systems; design and diagram a wet and dry fire protection system; identify alarm system components and their operations.</p> <p>Demonstrate the ability to analyze, appraise, and evaluate fire and emergency incidents and identify components of emergency management and firefighter safety, including: size-up, report-on conditions, Incident Command System, RECEO, 10 Standard Firefighting Orders, 18 situations that shout "Watch Out," and common factors associated with injuries and line-of-duty deaths.</p>
<p>Fire Technology Certificate</p>	<p>Identify minimum qualifications and entry-level skills for firefighter hiring; describe the following elements: application process, written exam process, physical agility exam, oral interview, chief's interview, background investigation, and firefighter probationary process; identify fire service history, culture, and diversity.</p> <p>Identify and comprehend laws, regulations, codes, and standards that influence fire department operations and identify regulatory and advisory organizations that create and mandate them, especially in the areas of fire prevention, building codes and ordinances, and firefighter health and safety.</p> <p>Analyze the causes of fire, determine extinguishing agents and methods, differentiate the stages of the fire and fire development, and compare methods of heat transfer.</p> <p>Calculate flow requirements for fire apparatus, diagram a pump and plumbing schematic for fire apparatus, and apply mathematic formulae to hydraulics problems.</p> <p>Identify and describe the apparatus used in the fire service and the equipment and maintenance of fire apparatus and equipment. (Elective)</p> <p>Identify and describe common types of Fire Suppression Systems (4 basic types).</p> <p>Demonstrate the ability to analyze, appraise, and evaluate fire and emergency incidents and identify components of emergency management and firefighter safety, including: size-up, report-on conditions, Incident Command System, RECEO, 10 Standard Firefighting Orders, 18 situations that shout "Watch Out," and common factors associated with injuries and line-of-duty deaths.</p>
<p>Forensic Identification, Certificate</p>	<p>Apply legal definitions, concepts, and principles to law enforcement, courts, or correctional settings.</p> <p>Communicate information in a clear and organized manner.</p>

	<p>Analyze ethical dilemmas encountered in the law enforcement and/or corrections fields and decide on the correct ethical choice.</p> <p>Apply constitutional, statutory, procedural, and case law to real-life criminal justice situations.</p> <p>Apply appropriate investigative and forensic techniques to analyzing crime scenes, collecting and preserving evidence, and preparing evidence and testimony for laboratory analysis and prosecution.</p> <p>Use the degree or certificate as a platform for a career in the criminal justice field or further study at a 4-year institution.</p>
<p>Police Academy, Certificate</p>	<p>Apply the definitions, concepts, statutes, and constitutional principles covered in the POST Learning Domains to law enforcement work.</p> <p>Given scripted scenarios, demonstrate proficiency in handling situations involving a variety of law enforcement related incidents.</p> <p>Analyze ethical dilemmas encountered in law enforcement and decide on the correct ethical choice.</p> <p>Demonstrate self-defense skills in a safe and proficient manner.</p> <p>Demonstrate firearms skills in a safe and proficient manner.</p> <p>Demonstrate emergency vehicle operations in a safe and proficient manner.</p> <p>Prepare an accurate and complete arrest report that meets the requirements of law enforcement agencies.</p> <p>Use the certificate as a platform for a career as a peace officer.</p>
<p>Wild land Fire Technology, AS Degree</p>	<p>Assess impacts of fuel, weather, and topography on wild land fire behavior.</p> <p>Recognize and avoid the four common denominators of wild land fire fatalities.</p> <p>Given a wild land fire scenario, prepare an incident briefing based on factors of fuel, weather, topography, and man-made hazards.</p> <p>Demonstrate the three components of wild land fire prevention, including education, engineering, and enforcement.</p>

	<p>Make an operation shift plan that includes the following information: the people in charge, the operational objectives, resources, supplies necessary to meet the objectives, area map, weather forecasting, and safety briefing using standardized ICS forms.</p>
<p>Wild land Fire Technology, Certificate</p>	<p>Safely manipulate wild land fire tools, including shovel, Pulaski, and McLeod.</p> <p>Recall the 10 Standard Firefighting Orders.</p> <p>Deploy a fire shelter.</p> <p>Demonstrate proper use of the following tools and equipment: back pump, fuses, and backfire torch.</p> <p>Safely function within an Incident Command System environment.</p> <p>Assess impacts of fuel, weather, and topography on wild land fire behavior.</p>
