Mission Statement Reinforcement

The College Mission, Vision, and Values Statements are prominently displayed in all public meeting rooms in framed posters and posted on the College website. In addition, the Office of Institutional Research and Planning (IRP) assists in reminding and informing the College about updated/revised institutional documents via email. These guiding principles are also incorporated into and acknowledged in annual program planning/review. As planning teams discuss their program mission statements, analyze their programs, and formulate goals and more discrete objectives, they are prompted through PlanBuilder to link their individual guiding principles to corresponding institutional ones. In fact, each program, unit, and area goal must explicitly correspond to an institutional goal. This overt process emphasizes the importance of coordinated and concerted efforts in accomplishing the College’s common goal—student success.
