Bid No. 2058
Hot Water Supply and Return Lines Leak Repair Project
Statement of Work

A. Scope:

Contractor shall do the following:

1. Supply tools, equipment and labor necessary to remove concrete encasement around the SUPPLY and RETURN hot water lines located at corner radius directly in front of Central Plant and Maintenance Yard.
2. Expose pipe leaks.
3. Cut out 8 – 9 feet of 8” SUPPLY and RETURN pipe that is leaking and replace with new.
4. Cut out 2” elbow/piping that is leaking and replace with new.
5. Clean work area.

NOTES:

i. Work to be performed in a slow and cautious, controlled manner so as to not penetrate or disturb existing fiberglass piping.

B. Deductive Alternate(s):

1. Furnish and install slurry mix to encase the newly repaired piping and cover the hole.
2. Restore surface soil to grade using adjacent stockpiled materials.

C. Duration of Work:

Ten (10) calendar days

D. Liquidated Damages:

$300 for every day of delay

E. Target Period of Work:
