INSTITUTIONAL RESEARCH AND PLANNING

STUDENT LEARNING OUTCOMES / SERVICE AREA OUTCOMES

Academic Programs:

1. Indicate whether or not student learning outcomes (SLOs) are associated with each active course in your program. Do not list the individual outcomes.
2. How frequently are course SLOs in your programs assessed (i.e. each semester, annually, or a combination of both)?
3. Does your program offer any degrees and/or certificates? If so, are SLOs associated with each, and how regularly are these assessed? (Note that the development of Degree and Certificate SLOs will commence in Spring, 2010 so it is unlikely that these will be in place in many programs for the 2010-11 planning cycle.)
4. Do your assessment results indicate a specific need for additional resources in this program? If so, briefly summarize these needs here, and specifically address each need as an objective to meet a goal in the “Resources” section of this plan.

Student Services Programs:

1. Indicate whether student learning outcomes (SLOs) have been developed for your program. Are these outcomes consistent with the mission statement for your program?
2. How frequently are SLOs in your programs assessed (i.e. each semester, annually, or on some other time scale)?
3. Have service area outcomes (SAOs) been developed for your program? If so, list them here and indicate how frequently these are assessed.
4. Do your assessment results (SLOs and/or SAOs) indicate a specific need for additional resources in this program? If so, briefly summarize these needs here, and specifically address each need as an objective to meet a goal in the “Resources” section of this plan.

All Other Programs:

1. Indicate whether service area outcomes (SAOs) have been developed for your program. List these outcomes here. Are these outcomes consistent with the mission statement for your program and the mission of the College as a whole?
2. How frequently are SAOs in your programs assessed (i.e. each semester, annually, or on some other time scale)?
3. Do your assessment results indicate a specific need for additional resources in this program? If so, briefly summarize these needs here, and specifically address each need as an objective to meet a goal in the “Resources” section of this plan.
