✓ A+ is Globally Recognized
✓ It Gives you a Competitive Edge
✓ You’ll Get More Opportunities
✓ Your Skills Will be Universal
✓ Careers in: Technical Support Specialist
✓ IT Technician, IT Administrator, IT Specialist
✓ Computer Repair/Troubleshooting and more!

Workforce Development Career Institute now offers Computer Technician Certifications for the CompTIA A+, NETWORK+, and the SECURITY+ programs. The certifications provide you with the basic knowledge and skills necessary for a career in PC support, IT network practitioner, and IT Security Professional. Course topics include installation, configuration, preventative maintenance of PC hardware components, and the basics of networking, security, and diagnostic and troubleshooting processes for various types of technical issues. Completely self-paced.

At the end of this course, you will be able to:
• Describe the common features of PC hardware found on desktop and laptop computers as well as the features of common mobile devices.
• Explain network hardware, protocols, and how to build a network
• Describe the printing process, installation, and maintenance of the most common printer types, including laser and inkjet printers
• Explain the features, tools, and installation options of different versions of Windows Operating Systems, including Windows 7
• Describe common security threats, security-breach prevention methods, and best practices
• Explain the network setup, security, and synchronization of mobile devices
