Become an Electrician

- Interested in Becoming an Electrician?
- Need to know electrical basics?
- Ride the current to a new career!
- Advance Your Career, Get the skills to get in the door for Electrician
- Build and Prepare for a Better Future
- $23.96 per hour / $49,840 per year
- Prepares you for your State's Contractors License Exam!
- Certification within 1-2 weeks! 41 hour time-on-task no-credit course

Workforce Development Career Institute now offers The Basic Electricity certification course, introduces you to the basic nature and functionality of electricity. You will explore the basic properties of electrical circuit, voltage, current, resistance and power. In addition, you will learn to utilize Ohm’s Law to determine electrical properties in a series and parallel circuits and apply Watt’s Law to simple circuits.

At the end of this course, you will be able to:
- Identify basic electricity components and their schematic symbols
- Know basic DC circuit properties – voltage, current, resistance and power
- Analyze voltage sources
- Determine resistor values using the resistor color code
- Calculate parallel resistors
- Learn basics of using a digital multimeter

Flexibility
Class times that fit your schedule
Fully online and completely self-paced
Lesson assessments to gauge comprehension and retention

Quality
Course that prepares you to sit for certification exam

Partnership
Skills in demand in your area, now
Better job opportunities or workplace advancement

Let Workforce Development Career Institute be your partner in building a better future.
