I. CONTINUATION OF AGENDA FROM NOVEMBER 20, 2019

II. ACTION ITEMS

A) Approval of Consent Agenda:

B) Second Readings:

Item 1920-180
Credit Course Revision
AET 120 Introduction to Alternative Energy Technology
Units 3.0
Description
This course is an introductory course to provide students with working knowledge of present day energy systems, which will include an in-depth analysis of the design and installation of alternate energy systems. Topics will include: solar electrical systems, wind electrical systems, solar water heating systems, wind mechanical systems, small hydro-electrical systems, geothermal energy, fuel cells, biomass, energy storage and microgrids. Students will develop skills to construct an alternative energy system. This course is intended for students that are contemplating a career in the alternative energy industry.

Item 1920-181
New Credit Course
AUTO 143 Alternative Fuels Technician
Units 4.0
Description
This course covers gaseous alternative fuels as they pertain to use in modern vehicles. Various alternative fuels will be compared, such as compressed natural gas (CNG), liquefied natural gas (LNG), hydrogen, bio-fuel, LPG, etc. The theory of operation, system components, and the safe handling of these fuels are included. Students will develop skills in the area of vehicle preparation, system component identification, and repair procedures related to vehicles using alternative fuels. This course is designed for students and technicians working on stationary power engines, transportation and clean fuels seeking to improve skills related to the maintenance and repair of gaseous fuels. This course provides students with ASE F1 or H1 test prep information.

Item 1920-182
New Credit Course
BIOT 130 Fermentation Technology I
Units 5.0
Description
An introduction to fermentation technologies with an emphasis on batch yeast fermentations, especially those associated with the brewing of beer. The course will cover the history, development and current status of beer brewing, the biology and genetics of yeast, and the influence of raw materials on the final outcome of the brewing process. There will be an emphasis placed on the current technologies involved in modern small scale brewing. In addition, the use of yeast as a general agent of biological change will be discussed. The laboratory part of this course will emphasize the design, formulation and execution of a
specific product in a hands-on environment, to simulate current industry standards and practices. Field trips of industrial fermentation sites will be included.

**Item 1920-183**  
New Credit Course  
BIOT 230 Fermentation Technology 2  
Units 5.0  
Description  
A continuation course of Fermentation Tech 1, with an emphasis on bacterial fermentations in a laboratory setting. The course will emphasize the biological and genetic aspects of bacteria and their role in the production of modern biotechnologies. Technologies particular to both batch and continuous fermentation processes, as well as product identification and recovery will be explored. Students will be placed in a production styled laboratory setting to produce and purify a particular bacterial product following current industry standards and protocols. Field trips to local industrial installations will be used to solidify real-world applications.

**Item 1920-184**  
Credit Course Revision  
CHST 101 Introduction to Chicana/o/x Studies  
Units 3.0  
Description  
This is an introductory course that examines the cultural, economic, educational and political issues as they impact Chicana/o/x people in the U.S. Topics include Chicana/o/x identity, ethnic/racial paradigms, gender, language, race, educational attainment, immigration, labor, and poverty. Students interested in this course may include individuals with familial or personal connections to the Chicana/o/x (Mexican-American) community and/or those intending to work in environments with high concentrations of this population.

**Item 1920-185**  
Credit Course Revision  
CHST 150 Chicana/o/x Politics  
Units 3.0  
Description  
This course examines U.S. history and political issues relevant to the Chicana/o/x and Latina/o/x community. The course provides an overview of demographic changes in the U.S., examines political activism and political leadership. Students interested in this course may include individuals with familial or personal connections to the Chicana/o/x (Mexican-American) community and/or those intending to work in environments with high concentrations of this population.

**Item 1920-186**  
Credit Course Revision  
CIT 160 Introduction to Operating Systems  
Units 3.0  
Description  
This course provides an introduction of the operating systems that are currently used in a business infrastructure. Operating systems discussed include Windows (desktop and server), Unix, Linux, and Mac OS X and their use in the industry. Students will learn desktop virtualization and networking basics and information involving how to create mixed environments.

**Item 1920-187**  
Credit Course Revision  
CIT 171 Network +  
Units 3.0  
Description
This course provides an overview of the architecture, structure, functions, components, and models of the Internet and other computer networks. The principles and structure of Internet Protocol (IP) addressing and the fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for further study of computer networks. The Open Systems Interconnection (OSI) and Transmission Control Protocol (TCP) layered models will be used to examine the nature and roles of protocols and services at the application, network, data link, and physical layers. This course provides preparation for the CompTIA Network+ certification exam.

Item 1920-188
Credit Course Revision
CIV 210 Concrete Technology and Testing
Units 2.0
Description
This course is an introduction into the use of concrete as a common construction material. The course is intended for individuals who intend to pursue careers in construction and students who wish to progress into construction management as a civil engineering sub-discipline. The material includes focus on the components of concrete, physical properties, mix design, quality control, and placing and testing of concrete. The course includes classroom lectures and assignments as well as lab projects with direct experience in working with and testing concrete.

Item 1920-189
Credit Course Revision
CIV 245 Civil Engineering Design and Modeling
Units 3.0
Description
This course is for students interested in the career field of civil engineering design drafting and civil engineering. Civil Design and Modeling is an advanced level class which includes design, analysis, and the preparation of drawings used in the civil engineering field. The student will use civil engineering software, such as Bentley's OpenRoads or AutoCAD's Civil 3D to complete projects relating to transportation and site development including grading, drainage, and road alignment plans and details. Specific areas of focus include the use of the software for modeling and editing of terrain, surfaces, profiles, and cross-sections as well as earthwork computations and site planning design.

Item 1920-190
New Credit Course
CORR 060 Corrections Basic Academy
Units 23.111
Description
This course is designed for the California Department of Corrections and Rehabilitation (CDCR) cadet who has successfully passed and completed the employment requirements established for a position as a state correctional officer. This course covers relevant topics required by the Commission of Correctional Peace Officer Standards and Training (CPOST) per California Penal Code Sections 13600 through 13603.

Item 1920-191
Credit Course Revision
CORR 134 Introduction to Interviewing and Counseling Skills for Correctional Officers
Units 3.0
Description
This course provides students with an introduction to and overview of the interviewing techniques and counseling skills employed by correctional officers. An overview of the interviewing and counseling techniques used by entry level practitioners employed in a correctional setting will be provided with an emphasis on the development of positive relationships between the inmate client and support personnel.
Item 1920-192
Credit Course Revision
CORR 235 Conflict Resolution for the Correctional Officer
Units 3.0
Description
This course provides students with an understanding of the types of conflict situations that may be encountered while working in a correctional facility. The following topics may be discussed as they pertain to the correctional experience: anxiety, fear, frustration, hostility, aggression, motivation and manipulation roles, racial and cultural segregation, crowd and mob interaction, alcohol, drugs, sexual problems, character, neurotic and psychotic disorders, youthful offenders, stress of incarceration, and brain disorders.

Item 1920-193
Credit Course Revision
ET 120 Introduction to Alternative Energy Technology
Units 3.0
Description
This course is an introductory course to provide students with working knowledge of present day energy systems, which will include an in-depth analysis of the design and installation of alternate energy systems. Topics will include: solar electrical systems, wind electrical systems, solar water heating systems, wind mechanical systems, small hydro-electrical systems, geothermal energy, fuel cells, biomass, energy storage and microgrids. Students will develop skills to construct an alternative energy system. This course is intended for students that are contemplating a career in the alternative energy industry.

Item 1920-194
Credit Course Revision
JOUR 147 Broadcast News
Units 3.0
Description
This course is for students interested in broadcasting for television. Students will learn the principles and techniques of broadcast news with special reference to the gathering and writing of news for television, script writing, interviewing, and the procedures and techniques of presenting the news for broadcast. This course will cover law and ethics, producing news packages, live to tape packages, live shots including SOT/VO, producing, and directing. Students will have the opportunity to produce the Rio News weekly segments for El Paisano digital newspaper.

Item 1920-195
Credit Course Revision
JOUR 220 Advanced Reporting and Writing
Units 3.0
Description
This course provides students with an advanced instruction in explanatory and investigative journalism, covering public affairs, police, courts, school boards, and city boards. Students will study methods of preparing material intended for publication in print and online editions of newspapers. It will incorporate the study of editing principles, style and design to meet expectations in the journalism industry.

Item 1920-196
Credit Course Revision
JOUR 241 Newspaper Production I
Units 4.0
Description
This course is for students wanting to learn production and management techniques for a college newspaper. Students will participate in every facet of developing a newspaper for the college community by serving as staff writers, staff photographers, editors, and layout personnel. Students will publish the college
newspaper, El Paisano, during the semester by having weekly assignments for different sections of the paper such as: News, Features, Arts and Entertainment, Opinion, Advertising and Sports. In addition, students may be tasked with taking photographs for special Focus pages. Editors will be responsible for designing their sections of the newspaper on days designated by deadline of the publication by using Quark Express and Photoshop. An additional 108 lab hours (6.5 hours per week during the fall and spring terms, schedule to be arranged) are required in addition to scheduled lecture hours.

**Item 1920-197**  
Credit Course Revision  
JOUR 242 Newspaper Production I  
Units 4.0  
Description  
This course is for students wanting to learn the production and management techniques of the college newspaper El Paisano as an online publication. Students will participate in every facet of developing and gathering the news for the online edition of El Paisano during the semester by having daily and weekly assignments for different sections of the newspaper such as: News, Features, Arts and Entertainment, Opinion, Advertising, and Sports. In addition, students may be tasked with taking photographs for special slide shows online, developing and producing Radio Podcasts online, and developing and producing Video News and Feature programs online. Editors will be appointed and will give out assignments to staff personnel during the semester and help with the development of each member of the class to produce viable online news. An additional 108 lab hours (6.5 hours per week during the fall and spring terms, schedule to be arranged) are required in addition to scheduled lecture hours.

**Item 1920-198**  
Credit Course Revision  
JOUR 243 Newspaper Production II  
Units 4.0  
Description  
This course is for students to continue working on the production of El Paisano, the campus newspaper, and earn their degree in either journalism and/or mass communications with a specialization in print media. Students will write, produce, layout pages, copy edit, and sell advertisements. They will also design pages and advertisements using InDesign, Photoshop, and other editing software. Students will also acquire production skills in formatting and file conversions for print media. Students will be expected to serve in leadership roles and cover on and off campus news. An additional 108 lab hours (6.5 hours per week during the fall and spring terms, schedule to be arranged) are required in addition to scheduled lecture hours.

**Item 1920-199**  
Credit Course Revision  
JOUR 244 Newspaper Production II  
Units 4.0  
Description  
This course is for students with an interest in furthering their career into the digital realm. Students will work hands-on with the multitude of media platforms digital news production II brings via El Paisano Online, www.elpaisanoonline.com. Students will produce content for all online aspects of the digital newspaper, such as, podcasting, broadcasting, news segments, and writing for the masses while implementing the video component to all stories. At the conclusion of the course, students will have the concept of immediacy for online news while keeping the reader engaged. An additional 108 lab hours (6.5 hours per week during the fall and spring terms, schedule to be arranged) are required in addition to scheduled lecture hours.
Item 1920-201
Credit Course Revision
MATH 150 Survey of Mathematics
Units 3.0
Description
In this course students will learn to read and understand quantitative information, solve practical problems, and make sound decisions using numbers. Topics include consumer applications, logic, probability, statistics, algebra, and geometry. This course is for students who need a quantitative reasoning course for graduation or transfer.

Item 1920-204
New Credit Course
MUST 191A Music and Integrated Technology Capstone
Units 2.0
Description
This course is for students in the Music and Integrated Technology program to learn hands-on skills. This class will focus on collaborative projects with the students performing the professional roles of recording engineer and assistant engineer. This class will prepare students for the highly collaborative music and media industries. Additionally, this class will help the student build a professional portfolio with which to apply for entry-level jobs.

Item 1920-205
New Credit Course
MUST 191B Music and Integrated Technology Capstone
Units 2.0
Description
This course is for students in the Music and Integrated Technology program to learn hands-on skills. This class will focus on collaborative projects with the students performing the professional role of music producer. This class will prepare students for the highly collaborative music and media industries. Additionally, this class will help the student build a professional portfolio with which to apply for entry-level jobs.

Item 1920-213
GE Request
GIS 120 Introduction to Geographic Information Systems and Spatial Analysis
RHC GE Area 2 & 8B
CSU GE Area B4 – Math

C) First Readings:

Item 1920-200
Credit Course Revision
JOUR 299 Directed Study: Journalism
Units 1.0 to 3.0
Description
This course is for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent
Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of four (4) units within a discipline, and may not accumulate more than a total of twelve (12) units college wide.

Item 1920-202
Credit Course Revision
MSCM 103 Survey of Motion Picture, Radio, and Television
Units 3.0
Description
This course provides an overview of the history, theory, and aesthetic principles of radio, television, and motion pictures and examines their social impacts and effects on society. The changing nature of consumer information will be explored, along with the evolution of these three mediums in the traditional and non-traditional aspects of listening, writing, and viewing. The social, political, regulatory, ethical, and occupational impacts of the electronic media are also studied.

Item 1920-203
Credit Course Revision
MSCM 134 Documentary Film
Units 3.0
Description
This course serves as an introduction to documentary film. It provides an overview of key historical and critical concepts regarding film, including vocabulary for storyboard and scene analysis. Students will analyze films in relation to mise-en-scene, editing, sound, narrative, cinematography, screenplay, and meaning.

Item 1920-206
Credit Course Revision
RDIO 104 Radio Broadcasting
Units 3.0
Description
This course provides an introduction to the field of broadcasting and other electronic media. Emphasis is placed on the history, development, and current status of broadcasting and related industries. Students will explore the broadcasting industry and develop "on-air" skills for a variety of radio formats. Upon completion, students should be able to demonstrate knowledge of regulations, organizational structure, revenue sources, historical development, and on-going operation of broadcasting and related industries.

Item 1920-207
Credit Course Revision
RDIO 136 Radio Production
Units 4.0
Description
This course is intended as an introductory course in theory and application of audio production techniques for radio broadcasting. Students will learn audio equipment for both live and pre-recorded (live to tape) broadcasting. This includes learning broadcast writing, radio program formats, announcing skills, how to use recording equipment, mixers, and digital audio production. An additional 108 lab hours (6.5 hours per week
during the fall and spring terms, schedule to be arranged) are required in addition to scheduled lecture hours.

**Item 1920-208**  
Credit Course Revision  
RDIO 236 Radio Production  
Units 4.0  
Description  
This course is an opportunity for advanced study for students wanting to learn production and management techniques utilized in radio broadcasting. Students will be shown proper announcing and on-air presentation techniques through lecture, demonstration, and taped examples. Students will have an opportunity to air their programs over the campus Internet radio station KRHC. An additional 108 lab hours (6.5 hours per week during the fall and spring terms, schedule to be arranged) are required in addition to scheduled lecture hours.

New Certificate of Achievement  
Fitness and Sport Management  
Units 18.0  
Description  
The fitness and sport fields have become dynamic growth industries and are recognized as multi-billion dollar global enterprises. The Fitness and Sport Management Certificate is designed to prepare individuals to apply business, coaching, and physical education principles to the organization, administration, and management of athletic programs and teams, fitness/rehabilitation facilities and health clubs, sport recreation services, and related services. The program includes instruction in program planning and development; business and financial management principles; sales, marketing and recruitment; event promotion, scheduling and management; facilities management; public relations; the psychology of sport and exercise, and legal aspects of sports. Depending on their specific interests, professionals in this field can do anything from managing a local gym, fitness studio, or sports camp. They may work in a college or professional sport venue and manage facilities, operations, and assist with marketing and social media. It is possible to complete this certificate in one calendar year. The curriculum has been designed to equip the student with the background, both theoretical and practical, to pursue an entry-level job managing and promoting both fitness and sport organizations.
III. **PUBLIC COMMENT:** Although the Curriculum Committee always welcomes the participation of guests in any discussion, this agenda item is provided to allow a member of the public to speak to an item not on the agenda.
