Matters brought before the Planning and Fiscal Council that are not on the agenda may, at PFC’s discretion, be placed on the next agenda.
- V. **ASRHC Report** – No report.
- VI. **Guided Pathways** – The Guided Pathways Steering (GPS) Committee is working in individualized workgroups to come up with various activities and other connections on campus outside of the committee itself in order to fulfill the goals of the four pillars. The intention is to broaden the constituencies involved in the Guided Pathways implementation.
- VII. **Co-Chair’s Report** – Michelle Bean mentioned that at the last Board meeting, Felicia Johnson (Facilities Director) reported that Facilities staff are trying to be proactive rather than reactive related to work orders. They are focusing on power washing, gum removal, and deep bacteria cleaning, and are making a concerted effort to use less toxic chemicals. Michelle would like to give accolades to Felicia Johnson and her staff for their hard work.

There was also a guest speaker at the last Board meeting that spoke about the 2020 Census and the need to educate and communicate to our students that the census is coming; it is important that the students take back this information to their families and encourage them to be counted. Jill Pfeiffer suggested a student forum might be beneficial. Families might not understand how to report, so there have been millions of people not counted, especially young people. Census data has the potential to affect all types of allocations, including PELL grant funding, etc. Students interested in becoming a paid enumerator (aka census taker) are encouraged to visit www.2020census.gov/jobs to apply.

Dr. Ramirez reminded the group that per the PFC Guidebook (page 22), quorum is not required.

IX. New Business –

- ### A. Program Review Update
- Marie Eckstrom, Program Review Coordinator, discussed categorized institutional-level recommendations and general trends in each category.

Campus Environment – Focus on general upkeep of the campus. There were strong recommendations that certain areas need repainting, etc. Also, some academic disciplines feel

that they don't have enough lab time and there are space constraints, leading to recommendations that the College look at how to use classroom space more efficiently or create more classroom space.

Technology – Maintenance of that technology needs to be attended to more regularly. All courses do not have Canvas course shells, and students may not have access to their most up-to-date grades throughout the term. One recommendation is that all courses should be enhanced at minimum to have students' grades available to them at any given time.

Staffing – Each academic division should have their own dedicated, full-time counselor.

Research – IRP will work with academic and operational programs to learn how to gather useful qualitative and quantitative data to help us analyze the way we operate and make improvements. Many non-instructional units need assistance with program review.

Other – Recommendations include focusing on what we are going to be doing to provide supplemental instruction, tutoring, drop in services, etc. Also, there is a need for training and staff development for all academic and non-academic staff related to students' mental health needs.

Institutional Level Standards – There is high degree of variation and a continuum of quality in terms of what people actually submit. IRP is trying to provide feedback for what they are really looking for and what they're hoping to accomplish. They will work to identify targeted areas that may need additional assistance with regards to establishing standards.
