ANIM 101 Intro to Digital 3D Animation Outcome Set

Outcome

Outcome	Mapping
<p>Given a template students will construct a 3D model through accurate and efficient construction techniques. Given a set of orthographic template drawings of an object, students will construct a virtual 3D model by correctly visualizing its shape, accurately dimensioning its proportions and using efficient construction techniques.</p>	<p>Animation program outcomes: Successful students will competently create a project appropriate for a portfolio in the entertainment industry., Institutional level Outcomes (ILO): I. B. Demonstrate an understanding of course material., I. E. Apply various problem-solving approaches., II. C. Utilize various media formats., IV. A. Research, analyze, evaluate, and utilize relevant information., IV. B. Effectively use appropriate research or technology tools or sources.</p>
<p>Successful students will be able to correctly create and accurately apply the appropriate the shading network to a 3D asset. Given a specific type of material the student will be able to correctly create and accurately apply the appropriate the shading network to a 3D asset.</p>	<p>Animation program outcomes: Successful students will competently create a project appropriate for a portfolio in the entertainment industry., Institutional level Outcomes (ILO): I. A. Apply theory to data., I. B. Demonstrate an understanding of course material., II. C. Utilize various media formats., II. D. Recognize, interpret, and actualize creative expression.</p>
<p>Given a virtual 3-D model of a character or a man made object, the student should choose the appropriate approach to UV mapping. Given a virtual 3-D model of a character or a man made object, the student should choose the appropriate approach to projecting an accurate and efficient UV layout.</p>	<p>Animation program outcomes: Successful students will competently create a project appropriate for a portfolio in the entertainment industry., Institutional level Outcomes (ILO): I. B. Demonstrate an understanding of course material., I. E. Apply various problem-solving approaches., II. C. Utilize various media formats., II. D. Recognize, interpret, and actualize creative expression.</p>

CIT 155 Introduction to E-Commerce

Course Outcomes

Create & Map Course Outcomes**CIT 155 Introduction to E-Commerce Outcome Set****Outcome**

Outcome	Mapping
Student will be able to demonstrate an understanding of the foundations and importance of E-commerce.	Business Management Program Outcomes: Students will demonstrate how to analyze business problems and prescribe solutions to solve these problems., Institutional level Outcomes (ILO): I. B. Demonstrate an understanding of course material.
Student will be able to describe the key features of Internet, Intranets and Extranets and explain how they relate to each other.	Business Management Program Outcomes: Students will demonstrate how to analyze business problems and prescribe solutions to solve these problems., Institutional level Outcomes (ILO): I. B. Demonstrate an understanding of course material.

VN 061L Basic Fundamentals of Nursing Clinical Outcome Set

Outcome

Outcome	Mapping
<p>PCC-Students will utilize the nursing process to guide care of patients in the clinical area.</p>	<p>Institutional level Outcomes (ILO): I. A. Apply theory to data., I. B. Demonstrate an understanding of course material., II. A. Communicate effectively in written or spoken forms., II. B. Comprehend and interpret various types of written information., III. A. Demonstrate an understanding of diversity in culture, ethnicity, religion, sexuality, political background, and other areas., IV. A. Research, analyze, evaluate, and utilize relevant information., Licensed Vocational Nursing - Associate Degree: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas., Vocational Nursing - Certificate: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas.</p>
<p>T/C-Students will demonstrate the role of the LVN on the healthcare team.</p>	<p>Institutional level Outcomes (ILO): I. A. Apply theory to data., I. B. Demonstrate an understanding of course material., II. A. Communicate effectively in written or spoken forms., III. A. Demonstrate an understanding of diversity in culture, ethnicity, religion, sexuality, political background, and other areas., Licensed Vocational Nursing - Associate Degree: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas., Vocational Nursing - Certificate: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas.</p>
<p>EPB-Students will identify the practice of the LVN as identified in the practice</p>	<p>Institutional level Outcomes (ILO): I. A. Apply theory to data., I. B. Demonstrate an understanding of course material.,</p>

act.	<p>Licensed Vocational Nursing - Associate Degree: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas.,</p> <p>Vocational Nursing - Certificate: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas.</p>
<p>QI-Students will participate in the delivery of quality patient care.</p>	<p>Institutional level Outcomes (ILO): I. A. Apply theory to data., I. B. Demonstrate an understanding of course material., II. A. Communicate effectively in written or spoken forms., III. A. Demonstrate an understanding of diversity in culture, ethnicity, religion, sexuality, political background, and other areas.,</p> <p>Licensed Vocational Nursing - Associate Degree: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas.,</p> <p>Vocational Nursing - Certificate: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas.</p>
<p>Safety-Students will be able to maintain a safe care environment.</p>	<p>Institutional level Outcomes (ILO): I. A. Apply theory to data., I. B. Demonstrate an understanding of course material., II. B. Comprehend and interpret various types of written information., III. A. Demonstrate an understanding of diversity in culture, ethnicity, religion, sexuality, political background, and other areas., IV. A. Research, analyze, evaluate, and utilize relevant information.,</p> <p>Licensed Vocational Nursing - Associate Degree: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas.,</p> <p>Vocational Nursing - Certificate: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas.</p>
<p>IT-Students will use the electronic health record to obtain patient information.</p>	<p>Institutional level Outcomes (ILO): II. A. Communicate effectively in written or spoken forms., II. B. Comprehend and interpret various types of written information., II. C. Utilize various media formats., III. A. Demonstrate an understanding of diversity in culture, ethnicity, religion, sexuality, political background, and other areas., IV. A. Research, analyze, evaluate, and utilize relevant information.,</p>

Licensed Vocational Nursing - Associate Degree:

Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas.,

Vocational Nursing - Certificate: Graduates will incorporate the medical model utilizing all aspects of the nursing process., The student will integrate the simulated clinical experience to enhance clinical performance in all clinical areas.
