Online Tutoring (Spring2021):

Tutoring is offered remotely through Zoom this semester. Click the blue Zoom icon below this paragraph to join us live, during business hours. The MSC asks that before you meet with a tutor online, you attempt to do your assignments first. Our tutors will assist/discuss a similar problem or a few homework problems with you, but they will not do your homework/test/quiz for you. We can only supplement your instructor's lectures; a peer tutor is not an instructor. You can schedule a session as short as 30 minutes, or as long as one hour. Walk-ins are also welcome. **limit of one session per day, per subject.**

Monday – Thursday 9a-8p & Saturdays 9a-2p

Closed Fridays, Sundays, and Holidays

Math Workshops:

Our math workshops provide students the opportunity to master course material with the help of a facilitator. The students will be actively challenged in each session to work together to solve problems. The topics covered will foster conversation on key elements that have historically given students difficulty and has impeded the learning process. These workshops are designed as an enhancement, not a supplement to lecture. Workshops will be conducted online through our Zoom. Click on the Zoom icon above to join us at workshop start times. Days, topics and times, are found in the workshop schedules below.
