

**METHODS:**

- 1) Course-level outcome data entered by faculty was exported from Taskstream.
- 2) Courses mapped to program-level outcomes, with data, were selected.
- 3) Overall proficiency for each program-level outcome was calculated with this formula:  
$$\text{Student Proficient} / \text{Students Enrolled} = \text{Overall Proficiency}$$

**NOTES:**

- a) Courses for which data were pulled are listed on the Methods tab.
- b) Calculations were based on data and mapping entered by faculty.
- c) Data entry was reviewed and data entry errors were resolved where possible.
- d) In cases where inaccurate or incomplete data was provided, and the proficiency could not be calculated, the section-level data was removed from analysis.
- e) Analysis includes all data entered into Taskstream, according to the information above.

**INSTRUCTIONS:**

Review the methods, course-level data, and estimated program outcome proficiency (listed above each PLO - row2). Enter your findings into the Program Review template in Taskstream. Each PLO should have an entry in 3.2 Program Outcomes Assessment and 3.3 Program Outcomes Assessment Findings.

**3.2 ASSESSMENT (EXAMPLE from History)**

**Measure Title:** Overall Proficiency Rate for Course-level outcomes mapped to this Program Level Outcome.

**Details/Description:** Selected outcomes from HISTORY 101, 102, 122, 131, 143, 144, 156, 157, 158, 167, 170, 299, 325 were mapped to this Program Outcome. Course level data from 2017-2020 was included in this analysis.

**Acceptable standard:** 70% of students will be able to perform tasks that are meaningful, personalized, and culturally relevant or appropriate in the target language.

**Ideal Standard:** 90% of students will be able to perform tasks that are meaningful, personalized, and culturally relevant or appropriate in the target language.

**3.3 FINDINGS (EXAMPLE from Languages)**

**Summary of Findings:** 84.6% of the students were found to be proficient in the course-level outcomes mapped to this program outcome. The range of proficiency for sections ranged from 46% to 100%.

**Recommendations:** Several of the course sections with low proficiency rates were from ASL 101 and 102. The instructor indicated that students needed more access to appropriate video software to complete tasks. It was also noted that additional access was needed to students to attend ASL social events in the community.
