### IMPORTANT INFORMATION

- All coursework used for IGETC must be completed with a "C" or better, and each course must have a minimum value of 3 semester/4 quarter units.
- IGETC may not be appropriate for all majors. It is highly recommended that students meet with a counselor and/or consult with individual campuses prior to selecting courses.
- Courses may be counted for one GE area only, with the exception of Area 6: Language other than English requirement.
- Courses on this list are approved for the academic year 2019-2020 which is valid beginning Fall 2019 through Summer 2020. For a complete listing of courses and their approval dates, please visit [www.assist.org](http://www.assist.org).

### IGETC Considerations

Students with substantial coursework from institutions outside of the United States should consult with a counselor to determine whether they should complete IGETC or the lower-division breadth/general education requirements at the campus they plan to attend.

**Berkeley** | IGETC is not accepted by the Haas School of Business nor the College of Engineering. IGETC does not fully satisfy lower-division breadth requirements for majors in the College of Chemistry and the College of Natural Resources.

**Davis** | Bachelor of Science degrees and high-unit majors often have many lower-division major preparation courses. In these cases, IGETC is not recommended and the UC Davis GE pattern is the better choice.

**Irvine** | All schools accept IGETC. However, selection by the campus is based on demonstrated academic achievement and preparation for the intended major.

**Los Angeles** | All schools accept IGETC. However, completion of IGETC is not recommended for students applying to the School of Engineering.

**Merced** | IGETC is not recommended but is accepted by the School of Engineering.

**Riverside** | IGETC is recommended for the College of Humanities, Arts, and Social Sciences. The School of Business Administration requires IGETC. IGETC is acceptable for the College of Natural and Agricultural Sciences and the Marlan and Rosemary Bourns College of Engineering; some additional coursework may be required after enrollment.

**San Diego** | IGETC clears all lower-division GE requirements for John Muir, Earl Warren, Eleanor Roosevelt, Thurgood Marshall, and Sixth Colleges; some upper-division courses will be required after enrollment. For Revelle College, IGETC does not clear all lower-division GE requirements; students with IGETC are required to complete 3 courses in mathematics and 5 courses in natural science before transfer or while enrolled at UCSD.

**Santa Barbara** | College of Letters and Science and College of Creative Studies: IGETC is acceptable. College of Engineering: Students are encouraged to focus on major preparation rather than general education, but may use IGETC to substitute for most general education requirements. Students planning to transfer to UCSB into a major in biological or physical sciences, economics, engineering, computer science, mathematics, statistics, or psychology are advised to complete lower-division major preparation courses to ensure competitiveness and make timely progress through the major.

**Santa Cruz** | For majors in engineering and the physical and biological sciences: IGETC is not recommended. Students should ensure completion of lower-division courses for their intended major as indicated in the UCSC Catalog and on [assist.org](http://assist.org).
