Catalog Course Description:

HMLD 105 is an introduction to mitigation; one of the four core phases of emergency management. This course will cover the hazard planning process to assist students in mitigating or eliminating hazards from an all hazard approach to emergency management. The student will also learn about the national framework used in the public-private sector of the homeland security enterprise; inclusive of governmental agencies and regulatory and legal sources responsible for hazard mitigation. Application of the concepts learned will be applied to risk assessments and development of strategies at the local, state, national and international levels of government.

Student Learning Outcomes:

SLO 1: Demonstrate a broad range of federal policies and procedures enacted since the events of September 11, 2001 and Hurricane Katrina in 2005 that deal with hazard mitigation.

SLO 2: Demonstrate organizations involved in hazard mitigation.

SLO 3: Demonstrate how to analyze, evaluate and mitigate potential hazards to America, its people and infrastructures.

SLO 4: Demonstrate how to identify natural or manmade hazards which threaten the safety and security of the United States.
