MEMORANDUM OF AGREEMENT  
BETWEEN THE RIO HONDO COLLEGE DISTRICT  
And the  
CALIFORNIA SCHOOL EMPLOYEES ASSOCIATION  
CHAPTER 477  
August 27, 2020  

The District and CSEA want to address the impacts and effects of the pandemic associated with the novel coronavirus. Because distance learning will be the system that begins the year and on campus work will be limited to essential workers and those exempted by waiver, some of the provisions may not immediately have widespread application. Except as specifically modified below, the District and CSEA agree to the continuation of our collective bargaining agreement (CBA):

1) Reporting Unsafe Conditions  
   In the interest of protecting community and workplace health, any employee may report, in writing, any unsafe condition in the working environment to the immediate supervisor. The supervisor shall respond verbally and in writing to the employee, with simultaneous copy to CSEA president, stating what has (or will) be done to make the condition safe or, if no action will be taken, the reason(s) why.

2) Safety Protocols  
   The District and CSEA incorporate here the requirements of Protocols for Institutes of Higher Learning by the Los Angeles County Department of Public Health (LACDPH) for the 2020-2021 year  
   http://publichealth.lacounty.gov/media/Coronavirus/docs/protocols/Reopening_HigherEducation.pdf  
   (attachment #1). By way of summary the safety protocols address the options available to the District conditioned upon our counties’ success in containing the spread of the virus.

   The District agrees to temporarily close and thoroughly clean an infected area upon learning an infected person was present. No classified employees shall be required to enter an infected area within 24 hours after learning an infected person was present.

   In accordance with the requirements outlined in Cal/OSHA, until classified staff are equipped with the necessary equipment and training to disinfect an area where a case of COVID-19 was confirmed, an outside agency will be responsible for any deep cleaning.

3) Flexible Assignment Patterns  
   The DISTRICT and CSEA acknowledge that California Education Code §88001 requires that all classified positions have set duties. However, due to the current unforeseen and
unprecedented nature for the current conditions CSEA and the DISTRICT recognize that some CSEA bargaining unit positions may be asked to perform duties not currently contained within their current job descriptions, provided the work is necessary and reasonably accomplished by the employee. The parties agree any necessary training will be provided prior to new duties being assigned. The DISTRICT and CSEA agree this is a temporary solution to a current need and shall not be considered a waiver of CSEA’s rights to negotiate the transfer of duties as required by law. This also shall not be considered precedent setting for either party. All temporary transfer of duties will end with the expiration of this agreement.

4) Distance Based Learning
CSEA bargaining unit positions whose primary function during the reopening is to facilitate distant learning will receive special consideration for assignment if the unit member belongs to populations deemed by the State as uniquely vulnerable to effects of the virus. It is not intended that the vulnerability is a reasonable accommodation and is not precedential beyond the date of this agreement.

5) Reimbursement of Expenses
Education Code section 87032 provides that “the governing board of any community college district shall provide for the payment of actual and necessary expenses [...] of any employee of the district incurred in the course of performing services for the district.” The District will reimburse employees for authorized expenditures in accordance with established District procedures. As the pandemic has continued, there is more time to contact supervisors for the approval of necessary expenditures, and no expenditures will be reimbursed without prior supervisory approval.

6) Leaves H.R.6201 - Families First Coronavirus Response Act (FFCRA)
Leaves are available as set out more completely in our CBA. An employee will be allowed to apply any of their accrued leaves with the 2/3 paid sick leave under the FFCRA in order to remain whole in salary and benefits. Additionally, unit members are eligible for FFCRA when they are:
1) Subject to a Federal, State, or local quarantine or isolation order related to COVID-19;
2) Employee has been advised by a health care provider to self-quarantine related to COVID-19;
3) Employee is experiencing COVID-19 symptoms and is seeking a medical diagnosis;
4) Employee is caring for an individual subject to an order described in (1) or self-quarantine as described in (2);
5) Employee is caring for a child whose school or place of care is closed (or child-care provider is unavailable) for reasons related to COVID-19.
6) Employee is experiencing any other substantially similar condition as specified by the Secretary of Health and Human Services, in consultation with the Secretaries of Labor and Treasury.
If an employee is ordered to quarantine beyond the leaves provided for in the
FFCRA, they may utilize quarantine leave in accordance with 12.11 of the CBA.

7) **Dealing with Unit Members with Enhanced Risk from COVID-19**
   The District agrees to address individual concerns about enhanced risk by addressing
   possible options for assignment including but not limited to working remotely if that is
   feasible, eliminating or reducing non-essential job functions, providing additional PPE,
   modifying workspaces. If a unit member’s needs cannot be accommodated, the unit
   member is entitled to leaves within our CBA.

8) **Worker’s Compensation**
   Unit members who can establish that the COVID-19 virus was contracted at work are
   entitled to the health benefits of workers compensation as set out in Governor’s
   Executive Order N-62-20. Workers’ compensation insurance provides five basic benefits:
   - Medical care: Reasonable and necessary medical treatment paid for by your employer
     to help you recover from an injury or illness caused by work.
   - Temporary disability benefits: Payments if you lose wages because your injury
     prevents you from doing your usual job while recovering.
   - Permanent disability benefits: Payments if you don't recover completely.
   - Supplemental job displacement benefits: Vouchers to help pay for retraining or skill
     enhancement if you don't recover completely and don't return to work for your
     employer.
   - Death benefits: Payments to your spouse, children, or other dependents if you die
     from a job injury or illness.

9) This agreement shall be subject to the grievance procedure outlined in Article 16 of the
   collective bargaining agreement.

10) **Duration of this Agreement**
    This portion of our overall agreement shall expire on June 30, 2021 or when the
    Governor and public health agencies remove the emergency orders (whichever comes
    first).

For District:

Jackson Parham, AALRR 9/3/2020
Laura Ramirez 9/3/2020

For CSEA:

Andy Ritchie 9/8/2020
Sandra Hernandez 9/8/2020
Attachment 1:

Los Angeles County Department of Public Health (LACDPH)

Protocols for Institutes of Higher Learning

Note:

Language in **Blue** is required by the LACDPH.

Language in **red** is agreed to by both parties.

Language in **yellow highlight** is recommended by the LACDPH (but not required).

Language with **strike-through** does not apply to RHC.
The Los Angeles County Department of Public Health is adhering to guidance from the California Department of Public Health, which recommends that counties with high levels of community transmission of COVID-19 limit the reopening of colleges and universities.

Colleges and universities in Los Angeles County will not be able to resume all in-person academic instruction, at this time. Institutions may continue to offer in person training and instruction for essential workforce for required activities that cannot be accomplished through virtual learning. All other academic instruction must continue to be done via distance-learning.

Faculty and other staff may come to campus for the purpose of providing distance learning, and other activities related to the purposes above, as well as maintaining minimum basic operations. The institution must comply with all relevant portions of this protocol to maximize safety for all employees.

Colleges and universities should also limit their on-campus student residency but may continue to provide housing for students who have no alternative housing options. For students enrolled in programs providing training and instruction for essential workforce, on campus housing should be offered only to students who must participate in in-person instruction in order to complete their training and who do not have alternative local housing options. For student athletes who are participating in on campus sports, campus housing should be offered in the small training cohorts as recommended by the state guidance.

Collegiate sports may only proceed in compliance with all the California Department of Public Health Specific Interim Guidance for Collegiate Athletics.

**Protocols for Institutes of Higher Education**

The County of Los Angeles Department of Public Health is adopting a staged approach, supported by science and public health expertise, to limit activities permitted at Institutes of Higher Education (IHE) until circumstances permit safe opening. The requirements below are specific to IHE. In addition to the conditions imposed on IHE by the State Public Health Officer, Institutes of Higher Education in Los Angeles County must also be in compliance with this Checklist for Institutes of Higher Education.

As noted in the summary box above, permitted activities are the following:

- On campus housing for students with no alternative residential option;
- Education, training and other support for essential workforce activities;
- Activities required for faculty to carry out distance-learning and other remote activities;
- Activities required to maintain minimum basic operations;
- Any activities carried out as part of State or County COVID-19 response;
- Collegiate sports in compliance with CDPH guidance (see link above).

Note that IHEs may additionally be expected to comply with other DPH or CDPH protocols, including but not limited to:

- DPH retail establishment protocols
- DPH public health protocols for gyms and fitness centers
DPH protocols for restaurants
DPH protocols for office-based worksites
DPH protocols for places of worship
CDPH guidance for collegiate athletics.

Note that on-campus events remain prohibited with the exception of events related to constitutionally protected freedoms such as public protests and in-person faith-based services conducted by places of worship.

Please note: This document may be updated as additional information and resources become available so be sure to check the LA County website http://www.ph.lacounty.gov/media/Coronavirus/ regularly for any updates to this document.

This checklist covers:

(1) Workplace policies and practices to protect employee health
(2) Policies to protect the health of students
(3) Measures to ensure physical distancing
(4) Measures to ensure infection control
(5) Communication with employees and the public
(6) Measures to ensure equitable access to critical services.

These five key areas must be addressed as your facility develops any reopening protocols.

Institutes of Higher Education must implement all applicable measures listed below and be prepared to explain why any measure that is not implemented is not applicable to the institution.

Institution name: Rio Hondo College
Address: 3600 Workman Mill Rd., Whittier, CA 90601

A. WORKPLACE POLICIES AND PRACTICES TO PROTECT EMPLOYEES (CHECK ALL THAT APPLY)

☐ For the purposes of this protocol, the term “employees” includes but is not limited to paid, full-time and part-time faculty and staff, employees of companies that contract with the IHE for purposes of activities permitted above, student employees, interns and volunteers.

☐ Vulnerable employees (those above age 65, those who are pregnant, and those with chronic health conditions) should discuss any concerns with their healthcare provider or occupational health services to make appropriate decisions on returning to the workplace and if requested, should be assigned work that can be done from home whenever feasible.

☐ Work processes are reconfigured to the extent feasible to increase opportunities for employees to work from home.
☐ In compliance with wage and hour regulations, alternate, staggered or shift schedules have been instituted to maximize physical distancing.

☐ All employees continuing to work on campus during this period, have been told not to come to work if sick, or if they are exposed to a person who has COVID-19. Employees understand to follow DPH guidance for self-isolation and quarantine, if applicable. Workplace leave policies have been reviewed and modified to ensure that employees are not penalized when they stay home due to illness.

☐ Employees are provided information on employer or government-sponsored leave benefits the employee may be entitled to receive that would make it financially easier to stay at home. See additional information on government programs supporting sick leave and worker’s compensation for COVID-19, including employee’s sick leave rights under the Families First Coronavirus Response Act and employee’s rights to workers’ compensation benefits and presumption of the work-relatedness of COVID-19 pursuant to the Governor’s Executive Order N-62-20.

☐ The IHE has a COVID-19 Containment, Response and Control Plan that describes the IHE’s comprehensive approach to preventing and containing the spread of COVID-19 on campus. The Plan includes, but is not limited to the following elements:

☐ A designated COVID-19 Compliance Task Force that is responsible for establishing and enforcing all COVID-19 safety protocols and ensuring that staff and students receive education about COVID-19. A designated COVID-19 Compliance Officer who serves as a liaison to DPH in the event of an outbreak on campus.

☐ An IHE Exposure Management Plan consistent with DPH guidance that outlines the process for IHE instruction to known COVID-19 case(s) to isolate themselves at home; identification of persons that had an exposure to the case(s) on campus; requiring the immediate self-quarantine of all employees or students that had an exposure; and, for all quarantined individuals to have access to or be tested for COVID-19 to understand the extent of spread on campus to inform additional COVID-19 control measures. See public health guidance on responding to COVID-19 in the workplace.

☐ In the event that a cluster of 3 or more cases are identified on campus that are epidemiologically linked (e.g., overlapping time and space during the infectious period) within a span of 14 days, a plan or protocol to report this cluster to the DPH via email at ACDC-Education@ph.lacounty.gov or via telephone at (888) 397-3993 or (213) 240-7821. DPH will work with the site to determine if the cluster meets the outbreak criteria for IHE. If the outbreak criteria has been met, DPH will initiate an outbreak response which includes providing infection control guidance and recommendations, technical support and site-specific control measures. A public health case manager will be assigned to the outbreak investigation to help guide the campus response.

☐ The identification of an adequate supply of housing for students and/or staff who reside in on-campus congregate housing for purposes of isolation and quarantine.

☐ A plan to ensure support for quarantined students, including meals, remote coursework, health services, transportation and monitoring/tracking affected students to promote compliance.

☐ A plan to provide options for remote online education, including asynchronous delivery to accommodate ill or quarantined students, as well as those with technology or travel constraints.

☐ A robust communication plan and associated communication tools to ensure timely and accurate delivery of information to employees, students, and as appropriate, students’ families and the broader community.

☐ Employee screenings are conducted before employees may enter the workspace. Screening must include a check-in concerning cough, shortness of breath, difficulty breathing and fever or chills and if the employee has had contact with a person known to be infected COVID-19 in the last 14 days. These checks can be done remotely or in person upon the employees’ arrival. A temperature check should also be done at the worksite if feasible.
Employees who have contact with others in the course of their employment (e.g., the public, students, or other employees) are offered, at no cost, an appropriate face covering that covers the nose and mouth, unless Cal/OSHA standards require further respiratory protection. The covering is to be worn by the employee at all times while on campus when in contact or likely to come into contact with others. Employees who are faculty members, teachers or lecturers may wear face shields with a cloth drape attached to the bottom of the shield and tucked into the shirt, instead of face coverings when lecturing, provided that such employees remain 10 feet from the nearest student or other employee. Employees need not wear a cloth face covering when the employee is alone in a private office or booth or a walled cubicle with a solid partition that exceeds the height of the employee when standing.

Employees are instructed to wear their face coverings properly and to properly wash, replace, or sanitize their face covering frequently.

All individual workstations, or individuals working in the same areas as part of a team are separated by at least six feet.

In compliance with wage and hour regulations, breaks are staggered to ensure that physical distancing can be maintained in break rooms.

All employees, vendors and delivery personnel have been provided instructions regarding maintaining physical distancing and the use face coverings when around others.

The IHE shall require or strongly recommend that all staff be immunized each autumn against influenza unless contraindicated by personal medical conditions.

Break rooms, restrooms, classrooms, and other common areas are disinfected frequently, on the following schedule:

- Break rooms: At least once daily
- Restrooms: At least twice daily
- Classrooms: At least once daily
- Other: 

Disinfectant and related supplies are available to employees at the following location(s): Each building will have a supply of disinfectant and related supplies available by request.

Hand sanitizer effective against COVID-19 is available to all employees at the following location(s): Each building will have a supply of disinfectant and related supplies available by request.

Soap and water are available to all employees at the following location(s): All restrooms have soap and water available for use.

Employees are allowed frequent breaks to wash their hands.

Each employee is assigned their own tools, equipment and defined workspace consistent with health and safety standards. Sharing of workspaces and held items is minimized or eliminated, consistent with health and safety standards.

Employees are provided time during their shifts to implement cleaning practices. Cleaning assignments should be assigned during working hours as part of the employee’s job duties.

All policies described in this checklist other than those related to terms of employment are applied to staff of delivery and any other companies who may be on the premises as third parties.

This Protocol has been made available to all employees.
Optional—Describe other measures:

B. POLICIES TO PROTECT THE HEALTH OF STUDENTS (CHECK ALL THAT APPLY)

The provisions below apply for the limited activities permitted on campus.

☐ All students who have reason to be on campus to conduct one of the permitted activities listed above are required to wear a face covering anywhere on campus or participating in any IHE sponsored activity where there are or may be other people. They are not required to wear the face covering when on campus in their own personal living space.

☐ Vulnerable students (those above age 65, those who are pregnant, and those with chronic health conditions) are able to complete their classwork from home whenever feasible and should discuss any concerns with their healthcare provider to make appropriate decisions about returning to campus.

☐ All students who have reason to be on campus to conduct one of the permitted activities listed above have been told to remain home or in their campus residence if they are feeling sick and to report their illness to the appropriate contact (e.g., student health services) within the IHE.

☐ Symptom checks are conducted before any permitted activity that may require students to be on campus. Students living in on-campus housing have been instructed to carry out daily screening, including a check-in concerning cough, shortness of breath or fever and any other symptoms the student may be experiencing. A temperature check should be done if feasible.

☐ The IHE has instructed all students who have reason to be on campus to conduct a permitted activity that immunization against influenza is required.

☐ The IHE has provided students with educational materials about the IHE’s approach to preventing transmission of COVID-19 on campus, including, but not limited to:

☐ Proper respiratory etiquette;
☐ Hand hygiene;
☐ Required use of cloth face coverings unless Cal/OSHA standards require respiratory protection when in contact with other students or employees on campus;
☐ Appropriate use of cloth face coverings, including the need to launder cloth face coverings regularly;
☐ What to do if they are feeling sick; and
☐ How to access health care services on campus.

☐ IHEs provide students with easily accessible alcohol-based hand sanitizer, tissues, and, if feasible, contactless trash cans in all common areas.

☐ The IHE maintains a supply of cloth face coverings to provide to students who are required to be on campus to conduct a permitted activity and are unable to obtain their own.

C. MEASURES TO ENSURE PHYSICAL DISTANCING (CHECK ALL THAT APPLY)

☐ The number of people in any indoor room on campus (e.g., labs or other specialized classrooms, staff meeting rooms, offices) is limited at any given time, such that all people in the room can easily maintain at least a six-foot distance from one another at all practicable times.
On-campus housing (e.g., residence halls, dormitory style housing, on-campus apartments):

- Occupancy of on-campus housing is limited to students who have no other feasible residential option.
- Total occupancy of on-campus housing is limited to no more than one student per bedroom.
- To the extent feasible, the number of students sharing a given bathroom facility is reduced. Impermeable barriers (such as Plexiglas) are installed between sinks and other fixtures if it is not possible to maintain at least six feet distance during use. When sinks are closer than six feet, disable every other sink to create more distance. Students are educated about the infection risk associated with bathrooms and are discouraged from placing toothbrushes or other personal care items directly on the bathroom sink or counter. Encourage students to consistently use the same bathroom and shower facilities to contain any possible transmission to within that cohort.
- To the extent feasible, students have been instructed to stay in their individual rooms while in their on-campus housing.
- Students have been instructed to maintain at least six feet distance from each other when in on-campus housing; students may momentarily come closer when passing in hallways or stairwells, riding elevators, when in restrooms, or as otherwise necessary.
- Common areas (e.g., kitchenettes, community rooms, lobbies, lounges, study areas) have been closed.
- No social events or activities are permitted as per current local and state health officer orders.
- Building access is limited to residents only; non-residents, including outside guests, non-residential staff, and others is prohibited, except for essential visitors, such as personal care attendants for students with disabilities.
- Elevator capacity is limited to the number of people that can be accommodated while maintaining a 6-foot physical distance between riders; this number can be adjusted to a maximum number of 4 riders at a time for any elevator that does not allow for 6-foot physical distance between riders. All riders are required to wear cloth face coverings and are directed to refrain from talking. Consider elevator sizes, number of building floors, and daily number of employees and visitors to establish physical distancing guidelines appropriate for elevator riders.
- To ease elevator traffic, encourage stairwells to be used for “up” and “down” traffic, if feasible, with increased cleaning of stairwells.

Dining halls: Other directives below notwithstanding, dining hall operations at this time are limited to outdoor dining and takeout activities only.

- IHE dining halls offer meal pick-up for all students that have a meal plan.
- Self-service buffets are prohibited. To the extent feasible, meal times are staggered so as to reduce the number of students and employees in line for meal pick up or waiting to be seated for outside dining. Consider scheduled meal times or meal pick-up times.
- Physical distance between tables/chairs in outdoor dining areas has been increased to support at least 6 feet of physical distancing. Effective July 3, 2020 and until further notice, indoor dining is prohibited per order of the Los Angeles County Health Officer.
- Steps are taken to limit contact between dining hall staff, employees and students. Physical barriers such as partitions or Plexiglas are installed at registers, host stands, ordering counters, etc., where maintaining physical distance of six feet is difficult.
- Operations have been redesigned, where feasible, to achieve physical distancing between employees. (e.g., Kitchen and other back of house area’s floors are marked to reinforce physical distancing requirements.)
Additional measures to ensure physical distancing are recommended, including one-way lines for pick-up, entrance, and exit, no self-serve buffets, floor markings, and signage.

Instructional settings (classrooms, lecture halls, laboratories), in person campus instruction is limited at this time to activities required for training of essential workforce. Provisions below apply only to training of essential workers that cannot be carried out via distance learning under the terms of current state directives. Indoor education is only permitted for coursework or training that is essential for completing certification, licensure, or educational requirements for essential workforce which requires specialized indoor settings (e.g. laboratories) and cannot be provided virtually or outdoors specialized.

In-person classes for essential workers should be held outdoors whenever possible, weather permitting, and IHEs may utilize a canopy, or other sun shelter, but only if the sides of the canopy or sun shelter are not closed and there is sufficient outdoor air movement. Outdoor classroom occupancy is limited to a maximum of 50% of total occupancy for the space, provided 6 feet of distance can be maintained between students at all times.

To the extent feasible, students who are on campus to conduct permitted activities are cohorted in groups of fewer than 30 to reduce the risk of widespread exposure among students.

Administrative office buildings:

Employees and students have been instructed to maintain at least six feet distance from each other and anyone else encountered on campus in course of conducting permitted activities; employees may momentarily come closer when necessary to accept deliveries, to accept payments, or as otherwise necessary.

Elevator capacity is limited to the number of people that can be accommodated while maintaining a 6-foot physical distance between riders; this number can be adjusted to a maximum number of 4 riders at a time for any elevator that does not allow for 6-foot physical distance between riders. All riders are required to wear cloth face coverings and are directed to refrain from talking.

To avert elevator crowding above the levels noted above, use of stairs is encouraged. Stairwells are designated to be used for “up” or “down” traffic, if feasible, with increased cleaning of stairwells.

Measures are implemented to ensure physical distancing of at least six feet between employees and other individuals on campus. This can include use of physical partitions or visual cues (e.g., floor markings, colored tape, or signs to indicate where workers and/or employees should stand.)

Furniture in areas that may need to be open for public use (e.g., building lobbies, reception areas, or waiting areas) has been eliminated or greatly reduced to support physical distancing. If removal of furniture is not feasible, signage has been added to encourage physical distancing.

Customer service windows or counters have been closed to the extent feasible. When open, users are required to maintain a distance of 6 feet from service personnel.

Employees and students are discouraged from congregating in any area, but especially common areas or high traffic areas such as bathrooms, hallways and stairwells.

To the extent feasible, flow of traffic within the workplace is modified to minimize contacts (e.g., doors for entry or exit only; directional hallways or passageways have been established for foot traffic in a way that prevents employees from passing by one another).
In-person meetings are strongly discouraged in favor of virtual meetings. If in-person meetings are essential, in the course of conducting permitted activities, they are limited such that all participants in the room can easily maintain at least six-foot distance from one another at all practicable times and all participants must wear cloth face coverings and meetings are held in rooms large enough to maintain physical distancing.

On-campus transport vehicles:
- Use of on-campus transport vehicles (e.g., buses, shuttle vans, etc.) is limited such that all riders are able to maintain a physical distance of at least 6 feet from one another if feasible. Consider removing or spacing seats to support physical distancing or use of colored tape to mark seats that riders are allowed to use. Where possible, additional transport vehicles are available to support excess capacity on busy routes. If it is not feasible to maintain physical distance, then impermeable barriers have been installed to limit contact between riders.
- Where feasible, impermeable barriers have been installed to protect the driver from passengers that are boarding and exiting the vehicle.
- A passenger entry and exit plan has been developed to minimize physical contact and crowding with other passengers during entry and exit of the transport vehicle.
- All riders are required to wear cloth face coverings.
- Vehicle windows are opened, when practicable, to increase outdoor air flow.

D. MEASURES TO ENSURE INFECTION CONTROL (CHECK ALL THAT APPLY TO THE FACILITY)

- The HVAC system in all campus buildings is in good, working order; to the maximum extent feasible, ventilation has been increased in all buildings, consistent with the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) standards. To the extent feasible, portable high-efficiency air cleaners are installed, the building’s air filters are upgraded to the highest efficiency possible, windows and doors are opened, and other modifications have been made to increase the quantity of outside air and ventilation in offices and other spaces. Mechanical ventilation systems in buildings must be operated continuously when persons are in the building.
- To minimize the risk of Legionnaires’ disease and other diseases associated with water, take steps to ensure that all water systems and features are safe to use after a prolonged facility shutdown.
- Use of drinking fountains is prohibited. Faculty, staff and students are encouraged to carry their own water and to use water refilling stations where available for personal water bottles. Water refilling stations should be cleaned and disinfected regularly. Post signs at refilling stations that encourage users to wash or sanitize their hands after refilling.
- Enhanced cleaning of all campus buildings is completed on a regular basis by a professional cleaning service or trained custodial staff.
- To the extent feasible, doors, light switches, trash cans, etc. are contactless.
- Common areas and frequently touched objects such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, elevator switches and buttons, touch screens, printers/copiers, grab bars, and handrails are disinfected at least daily or more frequently depending on use, using EPA approved disinfectants and following the manufacturer’s instructions for use.
- Sharing of materials or objects (e.g., staplers, three-hole punches, pens, coffee mugs, etc.) has been eliminated, to the greatest extent feasible. Where items must be shared, they are disinfected between shifts or uses, whichever is more frequent, including the following: shared office equipment such as copiers, fax machines, printers, telephones, keyboards, staplers, surfaces in reception
areas, shared work stations, etc. with a cleaner appropriate for the surface.

☐ All classroom or meeting room AV equipment that must be shared (computers, projectors, microphones, remotes, clickers) is sanitized between uses.

☐ At all times while on campus to conduct permitted activities, employees, students and visitors to campus are instructed that they must wear cloth face coverings unless Cal/OSHA standards require respiratory protection. This applies to all adults and to children age of 2 and older. Only individuals who have been instructed not to wear a face covering by their medical provider are exempt from wearing one. Students or employees alone in closed offices, or walled cubicles, or when students are within their own dormitory rooms, residential suites, and apartments are not required to wear cloth face coverings. Students may also remove cloth face coverings when eating in the dining halls or when wearing a cloth face covering is otherwise impracticable (e.g., while showering, brushing teeth, etc.).

☐ To the greatest extent permitted by law, campus access for non-essential visitors or volunteers is limited. In-person activities or meetings involving external groups, especially with individuals who are not from the local geographic area (for example, community, town, city or county) are not allowed at this time. Visitors to campus buildings are by appointment only and are pre-registered in a visitor log that includes a visitor’s name, phone number and email address. Visitors are instructed to come to their appointments alone. If a visitor must be accompanied by another person (e.g., for translation assistance, or because the visitor is a minor, or has minor children) their information is captured in the visitor log, if feasible. To the extent feasible, movement of any visitors while on campus is limited to designated areas such as the reception or lobby area, customer service area, conference or meeting rooms, and public rest rooms.

☐ Disinfectant and related supplies are available to all employees at the following location(s): Each building will have a supply of disinfectant and related supplies available by request.

☐ Disinfectant and related supplies are available to students at the following location(s): Each building will have a supply of disinfectant and related supplies available by request.

☐ If feasible, all reception areas where physical distancing is difficult to achieve have barriers (e.g., Plexiglas barriers) installed to limit contact between employees and students or visitors.

☐ Visitors to campus buildings are by appointment only and are pre-registered in a visitor log that includes a visitor’s name, phone number and email address. Visitors are instructed to come to their appointments alone. If a visitor must be accompanied by another person (e.g., for translation assistance, or because the visitor is a minor, or has minor children) their information is captured in the visitor log, if feasible.

☐ Screening is conducted before visitors may enter campus buildings. Checks must include a check-in concerning fever, cough, shortness of breath, difficulty breathing and fever or chills, and whether the person has had contact with a person known or suspected to be infected with the Novel Coronavirus (COVID-19) within the last 14 days. These checks can be done in person or through alternative methods such as on-line check in systems or through signage posted at the entrance to the facility stating that visitors with these symptoms should not enter the premises.

☐ Visitors arriving at the campus with children must ensure that their children stay next to a parent while inside buildings or in courtyards, avoid touching any other person or any item that does not belong to them, and are masked if age permits.

☐ Hand sanitizer, soap and water, tissues and trash cans are made conveniently available to the public within all buildings.
Restrooms, lobbies, break rooms, and lounges and other common areas are being disinfected frequently, on the following schedule:

- **Restrooms:** At least twice daily.
- **Lobbies:** At least once daily.
- **Break rooms:** At least once daily.
- **Waiting areas:** At least once daily.
- **Other:**

Building infrastructure that supports bike commuting is open and capacity for bike storage increased if feasible.

Optional—Describe other measures:

---

E. MEASURES THAT COMMUNICATE TO THE CAMPUS COMMUNITY AND THE PUBLIC

- A copy of this protocol is posted at all public entrances to the facility, provided that for large institutions, a sign with a QR code or link to the IHE’s website that posts a copy of the protocol is sufficient to meet this requirement.

- Signage has been posted to provide clear guidance to the public about how to maintain safety within the facility (e.g., maintaining physical distance, wear face covering, etc.).

- Signage is posted at each primary public entrance of each campus building to inform all employees, students, and visitors that they should: Avoid entering the building if they have a cough or fever.

- IHE has a communication plan for campus closure that includes outreach to students, employees and the community.

- Online outlets of the workplace (website, social media, etc.) provide clear information about required use of face coverings, policies in regard to making appointments, and other relevant issues.

- This protocol is shared with any organizations affiliated with the IHE, such as off-campus clubs, Greek organizations, etc., and the IHE ensures that these organizations are in compliance. Develop systems to enforce and hold affiliated organizations accountable for adhering to this protocol.

F. MEASURES THAT ENSURE EQUITABLE ACCESS TO CRITICAL SERVICES

- Measures are instituted to assure access to online or specialized in-person educational services for vulnerable students.

- Administrative services or operations that can be offered remotely (e.g., class registration, form submission, assignment submission, etc.) have been moved on-line.

- Measures are instituted to assure access to goods and services for students and visitors who have mobility limitations and/or are at high risk in public spaces.
Any additional measures not included above should be listed on separate pages, which the business should attach to this document.

You may contact the following person with any questions or comments about this protocol:

Protocol for COVID-19 Exposure Management in Institutes of Higher Education

NOTE: This protocol document has been developed without the benefit of forthcoming CDPH guidance specific to Institutes of Higher Education. Once CDPH guidance is available, this document may need to be changed to ensure consistency between state and county.

A targeted public health response to contain COVID-19 exposures at a community-level can help maximize the impact of the Los Angeles County Department of Public Health (DPH) COVID-19 response.

IHE are trusted community partners that can help DPH improve the timeliness and impact of the Public Health response through rapid initiation of an IHE COVID-19 Exposure Management Plan (EMP) when notified of COVID-19 cases and clusters on campus. Immediate implementation of an EMP when a single case of COVID-19 is identified at an IHE can accelerate the ability to contain the spread of infection and prevent outbreaks from occurring on campus.

The steps for managing exposures to 1, 2, and 3 or more COVID-19 cases on campus are described below and summarized in Appendix A. Because IHE will vary in the level of resources available for COVID-19 exposure management, required steps are the minimum elements that must be included in the EMP. Recommended steps include optional elements for exposure management where IHE resources are sufficient.

The term “campus” in this document refers to non-residential settings on the IHE property and residential congregate settings that house or employ large groups of IHE students and employees, both on- and off-campus.

Exposure Management Planning Prior to Identifying 1 COVID-19 Case at IHE Setting

☐ Required: A designated IHE COVID-19 Compliance Task Force that is responsible for establishing and enforcing all COVID-19 safety protocols and ensuring that staff and students receive education about COVID-19. A designated COVID-19 Compliance Officer who serves as a liaison to DPH in the event of a COVID-19 cluster or outbreak at an IHE setting.

☐ Required: Adequate supply of housing for students and faculty living on campus to safely isolate or quarantine when needed.

☐ Required: A plan for all students and employees who have symptoms consistent with COVID-19 infection or are quarantined because of exposure to case(s) on campus to have access to testing or be tested for COVID-19 infection.

Exposure Management for 1 COVID-19 Case at IHE Setting

☐ Required: After identifying 1 laboratory confirmed COVID-19 case (student or employee), IHE Compliance Task Force instructs the case to follow Home Isolation Instructions for COVID-19 (www.publichealth.lacounty.gov/acd/nco2019/covidisolation/).
☐ **Required:** IHE Compliance Task Force informs the case that DPH will contact the case directly through the DPH Case and Contact Investigation Program to collect additional information and issue the Health Officer Order for Case Isolation.

☐ **Required:** IHE Compliance Task Force works with the case to generate a list of students and/or employees with exposure to the case while infectious. IHE Compliance Officer submits this information to DPH using the COVID-19 Case and Contact Line List for the Educational Sector within 1 business day of notification of a confirmed case. If needed, additional time may be requested. For technical assistance on how to complete the line list contact: ACDC-Education@ph.lacounty.gov.

- A case is considered to be infectious from 2 days before their symptoms first appeared until they are no longer required to be isolated (i.e., no fever for at least 24 hours without the use of medicine that reduces fever AND other symptoms have improved AND at least 10 days have passed since symptoms first appeared). A person with a positive COVID-19 test but no symptoms is considered to be infectious from 2 days before their test was taken until 10 days after their test.
- A person is considered to have been exposed if they are one of the following:
  - An individual who was within 6 feet of the infected person for more than 15 minutes, even if a non-medical face covering was worn;
  - An individual who had unprotected contact with the infected person’s body fluids and/or secretions of a person with confirmed or suspected COVID-19 (e.g., being coughed or sneezed on, sharing utensils or saliva, or providing care without using appropriate protective equipment).

☐ **Required:** Students and employees that are identified to have had an exposure to the case are notified by the IHE Compliance Task Force through a letter or other communication strategies. A Campus Exposure Notification letter template is available at: COVID-19 Template Notification Letters for Education Settings. The notification of exposure should include the following messages:

- Students and employees with exposure to a campus case should test for COVID-19, whether or not they have symptoms, and inform IHE of test results. This will determine the extent of disease spread on campus and serve as a basis for further control measures. Testing resources include: Employee Health Services or Occupational Health Services, Student Health Center, Personal Healthcare Providers, Community Testing Sites: covid19.lacounty.gov/testing. Individuals who need assistance finding a medical provider can call the LA County Information line 2-1-1, which is available 24/7.
- Exposed students and employees should quarantine for 14 days since last exposure to the case while infectious (as defined above), even if they receive a negative test result during their quarantine period. A person who tests negative may subsequently develop disease, with or without symptoms, if tested during the incubation period (i.e. time period between exposure and disease onset). Home Quarantine Guidance for COVID-19 is available at: www.publichealth.lacounty.gov/acd/nocorona_2019/covidquarantine/.
- IHE will assist with identifying housing for students and faculty living on campus to safely isolate or quarantine when needed.
- DPH will contact exposed students and employees directly though the Case and Contact Investigation Program to collect additional information and issue the Health Officer Order for Quarantine.
☐ **Recommended:** IHE Compliance Task Force will determine whether additional notification is needed to inform the wider campus community about the exposure and precautions being taken to prevent spread of COVID-19. A general notification letter template is available at: COVID-19 Template Notification Letters for Education Settings.

### Exposure Management for 2 COVID-19 Cases within a 14-day Period at IHE Setting

☐ **Required:** After identifying 2 laboratory confirmed cases (students and/or employees) within a 14-day period, IHE follows *required* steps for 1 confirmed case.

☐ **Recommended:** IHE Compliance Task Force assesses whether the 2 cases are epidemiologically linked, meaning that the two affected individuals were both present at some point in the same setting and same time while either or both were infectious.*

*A case is considered to be infectious from 2 days before symptoms first appeared until they are no longer required to be isolated (i.e., no fever for at least 24 hours without the use of medicine that reduces fever AND other symptoms have improved AND at least 10 days have passed since symptoms first appeared). A person with a positive COVID-19 test but no symptoms is considered to be infectious from 2 days before their test was taken until 10 days after their test.*

- Determination of epidemiological links between cases may require further investigation to understand exposure history and identify all possible locations and persons that may have been exposed to the case while infectious. A tool is available to assist in the assessment of epidemiological links at: COVID-19 Exposure Investigation Worksheet for the Education Sector. For technical assistance on how to assess epidemiological links, please contact ACDC-Education@ph.lacounty.gov.
- If epidemiological links do not exist, IHE continues with routine exposure management.
- If epidemiological links exist, IHE reinforces messages to students and employees on precautions to take to prevent spread on campuses, including implementation of site-specific interventions.

### Exposure Management for ≥ 3 COVID-19 Cases within a 14-day Period at IHE Setting

☐ **Required:** If IHE identifies a cluster of 3 or more laboratory confirmed cases (students and/or employees) within a 14-day period, IHE should proceed with the following steps:

- Report the cluster to DPH Acute Communicable Disease Control (ACDC) Education Sector Team within 1 business day via email at: ACDC-Education@ph.lacounty.gov or by calling (888) 397-3993 or (213) 240-7821.
- Compete the Line List for Cases and Contacts, available at: COVID-19 Case and Contact Line List for the Educational Sector and submit to ACDC-Education@ph.lacounty.gov. For technical assistance on how to complete the line list contact ACDC-Education@ph.lacounty.gov.
- The ACDC Education Sector Team will review the Line List for Cases and Contacts to determine whether the outbreak criteria have been met. The ACDC team will contact IHE within 1 business day to advise on next steps.
If outbreak criteria are not met, IHE continues with routine exposure management.
If outbreak criteria are met, DPH Outbreak Management Branch (OMB) is activated.
An OMB public health investigator is assigned to coordinate with the IHE on outbreak management for the duration of the outbreak investigation.
IHE Compliance Task Force will submit requested information, including updates to the Line List for Cases and Contacts to the OMB Investigator until the outbreak is resolved (i.e., at least 14 days since the last confirmed case).

☐ Recommended: Prior to reporting cluster to the DPH ACDC Education Sector Team, IHE Compliance Task Force will determine whether at least 3 cases in the cluster have epidemiological links. A tool is available to assist in the assessment of epidemiological links at: COVID-19 Exposure Investigation Worksheet for the Education Sector. For technical assistance on how to assess epidemiological links, please contact ACDC-Education@ph.lacounty.gov.

- If epidemiological links do not exist between at least 3 cases in the cluster, IHE continues with routine exposure management.
- If epidemiological links exist between at least 3 cases in the cluster, IHE reports the cluster to the DPH ACDC Education Sector Team at ACDC-Education@ph.lacounty.gov or by calling (888) 397-3993 or (213) 240-7821.

COVID-19 Outbreak Criteria for Institutes of Higher Education

IHE Non-residential Setting: At least 3 laboratory-confirmed cases with symptomatic or asymptomatic COVID-19 over a 14-day period within an IHE group that is epidemiologically linked.*

*IHE groups include persons that share a common membership (e.g., Greek or other social organization, athletic teams, sports and recreation clubs, academic cohort, workplace on campus). Epidemiological links require the infected persons to have been present at some point in the same setting during the same time period while infectious.

IHE Residential Setting*: At least 3 laboratory-confirmed cases with symptomatic or asymptomatic COVID-19 over a 14-day period within the same or multiple dwellings that share a common area.

*IHE Residential Settings include on- and off-campus residential housing facilities where groups of IHE students and/or employees congregate and/or reside (e.g., on-campus residences, on- or off-campus Greek housing).
**Appendix A: Steps for managing exposures to 1, 2, and ≥ 3 confirmed COVID-19 cases in non-residential or residential congregate settings associated with IHE**

| 1 Case | 1) **Required**: IHE instructs the case to follow Home Isolation Instructions (a).  
2) **Required**: IHE informs case that the DPH will contact the case directly to collect additional information and issue Health Officer Order for Isolation (a).  
3) **Required**: IHE works with the case to identify IHE contacts with exposure.  
4) **Required**: IHE notifies* identified contacts of exposure and instructs them to quarantine at home and test for COVID-19.  
5) **Required**: IHE informs contacts that DPH will contact them directly to collect additional information and issue Health Officer Order for Quarantine (b).  
6) **Required**: IHE submits contact information for case and IHE contacts using the COVID-19 Case and Contact Line List for the Educational Sector and sends to DPH by emailing: ACDC-Education@ph.lacounty.gov.  
7) **Recommended**: IHE sends general notification* to inform the wider campus community of the exposure and precautions being taken to prevent spread.  
*Templates for exposure notification and general notification are available at: COVID-19 Template Notification Letters for Education Settings. |
|---|---|
| 2 Cases | 1) **Required**: Follow steps for 1 confirmed case.  
2) **Recommended**: If the 2 cases occurred within 14 days of each other, IHE determines whether the cases have epidemiological (epi) links.* A COVID-19 Exposure Investigation Worksheet for the Education Sector tool is available to help assess for epi links.  
*Epi links do not exist: IHE continues with routine exposure management.  
*Epi links exist: IHE implements additional infection control measures. |
| 3+ Cases | 1) **Required**: If a cluster of 3 or more cases occurred within 14 days of each other, IHE report this to DPH at: ACDC-Education@ph.lacounty.gov.  
2) **Recommended**: Prior to notifying ACDC Team of cluster, IHE determines whether epi links exist for at least 3 cases. If epi links do not exist, continue with routine exposure management.  
3) **Required**: DPH requests that the COVID-19 Case and Contact Line List for the Educational Sector be completed by IHE to determine if outbreak criteria have been met.*  
*Outbreak criteria not met: IHE continues with routine exposure management.  
*Outbreak criteria met: DPH Outbreak Management Branch (OMB) activated.  
4) **Required**: IHE provides updates to OMB investigator until outbreak is resolved (at least 14 days since last confirmed case). |

(a) Health Officer Order, cases directed to self-isolate until no fever for at least 24 hours (without the use of medicine that reduces fever) AND other symptoms have improved AND at least 10 days have passed since symptoms first appeared OR, if case has no symptoms, until 10 days have passed after their positive test was taken. IHE will provide isolation assistance to students/faculty if needed.  
(b) Health Officer Order, contacts directed to quarantine for 14 days since last exposure date to the case while infectious. IHE will provide quarantine assistance to students/faculty if needed.
