Annual Unit Plan

Through the annual planning process Rio Hondo College demonstrates the relationship between the long-term strategic plan of the college and the work of programs on campus. It’s a process that allows staff, faculty, and administrators a way to explain their contributions to the institution’s progress and how their contributions will continue throughout the next year. The data generated provides a basis for assessment of institutional progress and allows the college to make informed decisions about the allocation of resources.

Each unit on campus is asked to complete an annual plan each year. The unit plan reflects the program(s) within it, as indicated by the planning structure managed by the Institutional Research & Planning department.

The following information is requested in the annual unit plan.

**Unit Description**

The unit’s mission statement, approximate budget, estimated number of faculty and staff, location, services, and target audience. The unit’s involvement with, and the impact of, professional development activities, local projects, and statewide initiatives. Progress made towards the unit’s objectives stated in previous unit plans over the last year and the status of unit’s resource requests.

**Outcomes**

Instructional units report on course-level outcomes within the unit, for example, where programs are in collecting data, assessing data, and acting on the finding from data analysis.

Non-instructional units report on the program outcomes findings within the unit, for example, where programs are in collecting data, assessing data, and acting on the finding from data analysis.

**Data Analysis**

Instructional units review and analyze enrollment trends, student achievement, and equity gaps in order to identify strengths and opportunities and to inform objectives and resource requests.

Non-Instructional units provide program data with analysis of trends in order to identify strengths and opportunities and to inform objectives and resource requests.

**Objectives & Resource Requests**

Units identify what objectives the unit will work on the following academic year and request resources needed by programs, or the unit, that are needed to accomplish the objectives.

4. Data Analysis

The purpose of this section is to identify unit strengths, find opportunities for unit improvement, and identify resource needs.

4.1. Data Analysis

Instructions

Instructional Units:

Review and analyze planning data for your unit. Include analysis of the following:

a. **Enrollment trends** such as FTES, fill rates, sections offered, and efficiency (FTES/FTEF)

b. **Student achievement** outcomes such as course success and retention and course success and retention by modality particularly as it concerns distance education,

c. **Equity gaps** in student achievement outcomes such as course success and retention.

In looking at enrollment and achievement data, historical comparisons can be made as well as comparisons to like disciplines in your unit, the unit overall, and to the college overall.

Non-Instructional Units:

Provide data relevant to outcomes within your unit, primary functions, and other significant topics. Include analysis of data trends and reasons for these trends.

Student Services units offering courses should also provide data and analysis related to enrollment, student achievement, and equity gaps, as detailed above for instructional units.
