

## Part 1. In-Text Citations

Purpose of the in-text citation: Directs the reader to the matching citation from the Works Cited page so that the reader can examine and look up that source.

Usually, all you need is the author’s last name and the page number. If there is no author, use the title of the source followed by the page number (see last example below).

## Part 2. Citations for Works Cited Page

For every in-text citation included in your paper, you must have a corresponding **bibliographic citation** in the Works Cited page.

Your **Works Cited** page should appear as the last page(s) of your essay or research paper.

When composing your Works Cited page, be sure that 1) it is **double-spaced**, 2) your citations are in **alphabetical order**, and 3) any citation that goes over two or more lines has a half-inch **hanging indent**.

The following are the formats and examples of common citations. Use these as guidelines to help you cite your own sources.
