Pre-Statistics

Spring 2020

Math Excellence Workshops

provide an opportunity for students to master course material with the help of a facilitator. Students will be actively challenged in each session to work together to solve problems. The topics covered will foster debate on key elements that have historically given students difficulty and impeded the learning process. These workshops are designed as an enhancement not a supplement to lecture. You may visit the Math & Science Center for more information. You will find the dates and times of our workshops to your right.
