Accreditation

Río Hondo College is accredited by the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges, (428 J Street, Suite 400, Sacramento, CA 95814 phone: (415) 506-0234, email accjc@accjc.org, an institutional accrediting body recognized by the U.S. Department of Education and the Council for Higher Education Accreditation (CHEA).

An additional list of Accreditations and Certifications can be found in Chapter 1.

Statement of Policy

The policy of this district is that, unless specifically exempted by statute or regulation, every course, course section, or class, reported for state aid, wherever offered and maintained by the district, shall be fully open to enrollment and participation by any person who has been admitted to the colleges and who meets such prerequisites as may be established pursuant to section 55003 of division 6 of title 5 of the California Code of Regulations.

The College catalog represents official policies of the Río Hondo Community College District Board of Trustees.

By virtue of Statute, authority is vested in the Río Hondo Community College District Board of Trustees to add, amend, or repeal any of its regulations, rules, and procedures in whole or in part at such time as it may elect.

The Río Hondo College staff has worked to assure the accuracy of all information in the catalog. Students are advised, however, that such information **may be subject to change without notice**. Since the catalog is prepared in advance of the academic year, changes in some programs and rules might occur. An addendum to the catalog is published in the Fall. The catalog and accompanying addendum are the final authority in regard to classes and programs offered. The catalog and addenda are also posted on the web site at: www.riohondo.edu/college-catalog/. Students are advised to consult a counselor whenever questions or problems pertaining to academic programs arise.

This document is available in alternate formats upon request. Please contact Disabled Students Program and Services at (562) 908-3420.

Welcome

PRESIDENT'S MESSAGE

Welcome and Bienvenidos to Río Hondo College where we take pride in our academic excellence and commitment to advancing social justice and equity. As stated in our mission statement, "Río Hondo College is an educational and community partner committed to advancing social justice and equity as an anti-racist institution that collectively invests in all students' academic and career pathways that lead to attainment of degree, certificate, transfer, and lifelong-learning goals."

Río Hondo College offers numerous career and academic pathways and support services for all students. We take pride in our ability to ensure that we meet your needs and will work together with you to identify your area of interest and ensure your success in a welcoming and supportive learning environment.

Whether you are a student on campus or online, Río Hondo College provides a rigorous and robust course of study for those planning to transfer to four-year universities, seeking career advancement, and exploring new skills.

We offer 67 local associate degrees, and 33 associate degrees for transfer that guarantee transfer to California State Universities, and 188 certificate programs of study. We are one of the few community colleges in California that offers a Bachelor of Science degree, a Pathway to Law School program, and nationally recognized academies in policing and firefighting. We are also known for our programs in nursing and alternative automotive technology. The College fields 14 intercollegiate athletic teams and is home to an active student government organization that supports a vibrant college environment and sponsors an eclectic assortment of clubs and interest groups.

We offer a rich array of services and resources for students who struggle with food insecurity, housing insecure, and other potential barriers to achieving their goals – another element of our commitment to ensuring success for all members of our community. Río Hondo College faculty, staff and administrators invite you to explore all that your community college, Río Hondo College, has to offer.

Commencement: Friday, May 23

1 General Information

About Río Hondo College

History

The Río Hondo Community College District was established by election in October 1960, but first classes were not held until 1963-1964. Since the district's boundaries at that time were identical to those of the Whittier Union High School District, administration of the district was by the high school district Board of Trustees. Creation of the El Rancho Unified School District in 1962 required that Río Hondo College establish its own Board of Trustees, and an election for that purpose was held in April 1962.

The new Board of Trustees appointed Dr. Phil Putnam as the founding Superintendent-President in February 1963. In May 1963, the Board chose Río Hondo as the name for the college. The name, long associated with the area surrounding the Río Hondo River, means "deep river."

College classes were offered for the first time in the late afternoons and evenings in September 1963 at Sierra and El Rancho High Schools. Following selection of the present campus site, a \$12 million bond issue to build the college was approved by 80.1 percent of the district voters in October 1963. During 1964 and 1965, Río Hondo College conducted classes for a limited enrollment at the former Little Lake School in Santa Fe Springs.

The present campus opened in the fall of 1966 with an enrollment of 3,363 day and 2,682 evening students. Measure A, a \$245 million bond passed by voters in 2004, now provides new buildings and facilities upgrades campus-wide as well as new off-site educational centers in South Whittier and El Monte. Today, Río Hondo enrolls approximately 20,000 students per semester.

Río Hondo College is an open-access California community college that contains nine cities, in whole or part, four distinct unincorporated communities, and a portion of one other unincorporated community of Los Angeles County within our district boundaries. The cities include El Monte, South El Monte, Pico Rivera, Santa Fe Springs, and Whittier. The District also encompasses portions of Norwalk, Downey, La Mirada, and the City of Industry. The unincorporated communities within our District include Los Nietos, East Whittier, South Whittier, West Whittier, and a portion of Avocado Heights.

School districts within the college boundaries are the Whittier Union High School District, El Rancho Unified School District, and the El Monte Union High School District. Students come to Río Hondo seeking a variety of educational experiences. Río Hondo's educational program includes courses for transfer to four-year colleges and universities, general education courses for greater understanding of individual and community life, vocational

training in certain areas, and courses for improving academic performance necessary for studying at a higher level.

The Río Hondo College Foundation was established in 1992. The Foundation assists the college in meeting the needs of its students. The Foundation's focus is to secure financial and community resources to support Río Hondo College students and student scholarships. The Foundation also supports innovative educational projects, teaching, and training support.

Mission Statement

Río Hondo College is an educational and community partner committed to advancing social justice and equity as an antiracist institution that collectively invests in all students' academic and career pathways that lead to attainment of degree, certificate, transfer, and lifelong-learning goals.

Vision Statement

Río Hondo College aspires to be an evolving community-focused institution that embraces diversity, equity, inclusion, and accessibility as a means to achieve personal, professional, and educational goals in an environment of academic excellence and caring.

Values Statement

Río Hondo College is guided by its Core Values:

Quality Teaching and Learning: *a dynamic, student-centered learning environment that embraces equity-minded principles,*

Student Access and Success: *a welcoming and inclusive environment that provides our community with the knowledge, wisdom, and skills that facilitate upward social and economic mobility,*

Diversity, Equity and Inclusion: *a commitment to advancing educational justice, equity, and opportunity,*

Integrity and Fiscal Responsibility: *a College engaged in ethical practices and responsible use of resources for the optimum benefit of its students, community, and staff.*

Goals Statement

Río Hondo College recognizes the following institutional goals as important to our collective success:

- To increase student completion and employment.
- To increase access, FTES, and enrollment efficiency.

- To increase faculty and staff understanding of institutional effectiveness and implementation of equity-minded/culturally-responsive practices.
- To improve physical spaces and increase sustainability, energy conservation, and safety.
- To increase productivity and efficiency through state-of-the-art information systems and platforms.

Institutional Code of Ethics (BP 3050)

I. The employees of Río Hondo Community College District are committed to providing a high quality learning environment to help our students successfully achieve their educational goals and objectives. Accordingly, employees have an interest and commitment to ethical behavior. Ethical persons are those who abide by principles and exemplify virtues as understood within a given moral framework. Many believe that virtue is intrinsically rewarding. At the very least, that one be perceived as ethical is instrumental in establishing credibility and trust.

II. To support Río Hondo's commitment to ethical behavior, college employees adhere to standards of ethical and professional behavior related to their duties, and have responsibilities to the institution and to individuals they serve. Although one cannot "legislate morality" in the sense of mandating virtuous intentions, we can, and do, establish general expectations of conduct.

III. There are many sources of ethical inspiration and guidance. All employees of Río Hondo College are subject to official College policies and procedures; applicable regulatory agency requirements; local, state, and federal laws; and professional standards (when applicable). This includes policies such as the Río Hondo College Policy on Sexual Harassment (BP 3430), its Policy on Nondiscrimination (BP 3410), and its Policy on Academic Freedom (BP 4030).

IV. In addition, the Board of Trustees is subject to its own Code of Ethics (BP 2715), and most of our employees are members of professional organizations with their own established codes of ethics, such as the CTA, CSEA, and ACCCA. Employees are encouraged to consult their own organizations, when applicable, for further guidance. As constituents of Río Hondo College, students are likewise encouraged to maintain high Standards of Conduct (BP 5500).

V. As a further demonstration of commitment to high ethical standards, employees of Río Hondo College aspire to be guided by the following values statements. These are guidelines and aspirations to be used for educational and not disciplinary purposes, with our own conscience as the first and most salient means of evaluation:

- The College values open communication, honesty, and truthfulness, and aspires to an "open door" philosophy.
- The College values open inquiry and honors academic freedom.
- The College strives to protect human dignity and individual freedom.
- The College values clear roles and responsibilities, teamwork, and cooperation (as outlined in AB1725), and therefore aspires to develop a climate of trust and mutual support.

- The College is committed to providing excellent educational opportunities to the community, and the instructional faculty seeks to evaluate students by honest appraisal of student performance against faculty standards.

Institutional Philosophy

Recognizing the individual worth and potential of every human being, Río Hondo College offers an open access, comprehensive educational program to residents of the college district.

The college is dedicated to excellence in instruction and student services to develop the intellectual and personal competence of each individual.

At Río Hondo College, students will have an opportunity to develop ethical values, learn the rights and responsibilities of citizenship, develop career skills, and understand the scientific, artistic, and social achievements of various cultures.

Institutional Affiliation

Río Hondo College is a member of the Western Association of Schools and Colleges, the American Association of Community Colleges, and the California Association of Community Colleges. The college is also a member of the San Gabriel/Foothill Association of Community Colleges (SanFACC).

Accreditations & Certifications

Río Hondo College is accredited by the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges and is authorized by the California Community College Board of Governors to offer courses which parallel the lower-division courses of four-year institutions and qualify the student for junior classification at the university level. College transfer courses are accepted at most colleges and universities throughout the United States.

- Police Academy – California Commission on Peace Officers Standards and Training (POST) (Certified)
- Fire Academy – California State Fire Marshal; Accredited Local Processing for "State Fire Training Certifications"-California State Fire Marshals office (Accredited)
- Regional Homeland Security Training Center - Certified by California State Fire Marshal and California Emergency Management Agency (Cal EMA) and certified as a UASI homeland security regional training center in Los Angeles County.
- Emergency Medical Technician (EMT) – Los Angeles County Health Services EMT/Paramedic Program Approval Section (Accredited)
- Wildland Fire Program – U.S. Forest Service (Certified)
- First Aid and CPR – American Heart Association & American Red Cross (Certified)
- Expanded Scope Practice for EMT's – LA County Department of Health Services (Certified)
- Drug Studies Program – Accredited by the Addiction Counselor Certification Board of California/California Association for Drug/Alcohol Educators (ACCBC/CAADE) and the California Association of DUI Treatment Programs (CADTP).
- ADN Nursing Program – Approved by the Board of Registered Nursing (BRN), State of California; candidate for

Accreditation Commission for Education in Nursing (ACEN) accreditation.

- CNA Programs – Approved through the Department of Public Health Services State of California.
- LVN Program – Approved by the Board of Vocational Nursing and Psychiatric Technicians (BVNPT), State of California.
- Automotive Programs: The Association of Technology, Management, and Applied Engineering (ATMAE) (Certified); National Automotive Technicians Education Foundation (NATEF) (Certified); California Automotive Business Coalition Automotive Technician Training Standards (ATTS) (Certified); California Bureau of Automotive Repair (BAR) Smog Check Technician Training Institution (Certified).

Facilities

Art Gallery

The Río Hondo College Art Gallery is located inside the Business Building on the first floor and is open to students and the community during the academic year. The gallery provides an intimate setting for exhibits showing both student and professional artists representing a variety of artistic disciplines. Used also as a teaching gallery, many of the exhibits are displayed and created by students enrolled in Art courses. The gallery is open to the public and exhibits are advertised in the College's Cultural Events brochure available from the Division of Arts & Cultural Programs and online at: <http://www.riohondo.edu/arts>. Call (562) 908-3471 for more information.

Black Box Theater

The Black Box Theater has been temporarily moved to Modular Classroom 6 (in Lot 3) while the original location is undergoing construction to improve the facility. With seating for approximately 40 guests, the Black Box provides a more intimate setting for student and visiting performers. The performances are open to the public and are advertised in the College's Cultural Events brochure from the Division of Arts & Cultural Programs. Call (562) 908-3471 for more information.

Bookstore

The Río Hondo College Bookstore is located on the first floor of the Administration Building. The bookstore carries new, used, digital and rental textbooks required for each class as well as school supplies, RHC clothing, gifts and technology products. The textbook rental program can save students 65% or more on select textbooks. Physical non-rental textbooks can be sold back to the bookstore for up to 50% of the purchase price (exclusions apply). Our online website www.riohondoshop.com offers students the convenience of ordering online and choosing free in-store pickup; orders can be shipped at an extra cost. As an authorized Apple reseller, the bookstore offers a selection of Apple products in the store and online. The bookstore works with various departments to make some financial aid and scholarship funds available to use at the bookstore. As a campus partner, ninety percent of the commissions received from the bookstore go to the Auxiliary Service Fund for student activities. For more store information visit us online at www.riohondoshop.com.

Child Development Center/Pre-School Laboratory

The Child Development Center/Pre-School Laboratory, accredited by the National Association for Education of Young Children (NAEYC), provides quality pre-school services to the children of Río Hondo students, staff, and community. Children must be between the ages of 2 and 5 years old and are not required to be toilet trained. The Center is supported by state and federal funds along with parent fees. Families on the waiting list are ranked by eligibility factors for subsidized care provided by the California Department of Education (CDE) Early Education Division and the Department of Social Services (CDSS) Child Care and Development Division.

Río Hondo student parents are the highest priority as they can receive wrap-around services and up to 90% free tuition for their preschool age children through the Federal Child Care Access Means Parents In School (CCAMPIS) grant. Eligibility for state subsidized funding is determined by a combination of family size and income. Some families may pay fees based on a sliding scale. Hours of operation are 7:30 A.M. to 5:00 P.M., Monday through Friday. Holidays and breaks are observed in accordance with the RHC academic calendar. For more information, please call (562) 908-3494 or visit the Río Hondo website (click on www.riohondo.edu/cdc). Río Hondo College students from the Child Development/Education Department, the Behavioral and Social Science Division and Nursing Department utilize the Pre-School Laboratory to observe the development and behavior of pre-school children and to apply the knowledge that they gained in their courses working directly with children.

El Monte Educational Center (EMEC)

The El Monte Educational Center (EMEC) is one of Río Hondo College's off-campus educational centers. It is located at 3017 Tyler Avenue, El Monte, CA 91731. There are classrooms and a computer resource lab. For more information about classes and services at EMEC, please call (626) 443-8932. Fax: (626) 443-8997.

Fitness & Wellness Center

Río Hondo College's state-of-the-art Fitness & Wellness Center is located in the Kinesiology Department (room 150). Access is available by enrolling in KINA 130, a one-unit Kinesiology Activity Class. Additional information is listed in the Class Schedule and on the Fitness & Wellness Center web page.

Observatory

Río Hondo College is one of only 10 California Community Colleges to possess an observatory. The Gordon D. Crowell Astrophysical Observatory has been serving the students of the college and residents of the community for almost 50 years. The Observatory houses a 16-inch reflecting telescope that is the largest telescope available to the public in the Los Angeles area. We are open to the public, year round, no fee, from 8:00 p.m. to 10:00 p.m. PDT and 7:00 p.m. to 9:00 p.m. PST on selected clear Friday evenings. Visitors are asked to park in Lot C and walk up the observatory road to the Observatory. Please wear comfortable walking shoes, dress warmly, and bring a flashlight. Visitors are also advised that we do not have rest room facilities at the observatory. Call (562) 908-3444 for more information, or

visit www.riohondo.edu/mathematicsand-sciences/astronomy/observatory-nights.

Parking: Permits and Fees

Parking at the main RHC campus requires a parking permit. Other educational centers off the main campus do not need a parking permit.

Students can purchase [parking permits online](#). These permits are tied to your vehicle's license plate number and do not require a physical sticker.

Semester Parking Permit Fees

	Fall & Spring	Summer
Automobile:	\$40.00	\$20.00
Motorcycle:	\$10.50	\$5.50

Parking Permit Grace Period

Students have two weeks from the first day of classes to obtain their parking permit during Fall and Spring semesters, one week during Summer semester. During the first two weeks of the Fall and Spring semesters and one week during Summer semester, students may park only in student lots without a permit and will not be cited. After the grace period has expired, all students are expected to have their permits; any vehicles not registered with a valid semester permit may be cited.

Day Permit & Visitor Parking

Temporary parking permits for visitors are available at the Parking Information Booth located off College Drive, to the left at Parking Lot 2 of the lower level parking stalls.

Day parking permit dispensers are available in the following locations:

- Parking Lot A, near the bridge
- Parking Lot 1, near AJ building
- Parking Lot 6, near the stairs
- Parking Lot C corner of Central & 5 Minute Parking Zone

One (1) day parking permit fee is \$3.00. The dispenser accepts one-dollar bills, credit cards, and coins (including dollar coins). The dispenser does not give change for bills or coins. A five-minute parking stall is located alongside the dispenser for temporary parking while you purchase your permit.

Parking Information Booth Hours:

Open 24/7, but permits are sold as early as 5:30 a.m. until 9:00 p.m. Monday through Thursdays, and 5:30 a.m. to 2:00 p.m. on Fridays and Saturdays.

Contesting Parking Citations

To appeal a parking citation, visit [Contest Parking Citation Online](#)

To view parking violation codes & fine amounts, visit [Parking Violation Codes](#)

Parking Rules & Responsibilities

Persons operating vehicles on campus are expected to abide by all California vehicle codes as well as posted regulations. Citations will be issued by campus security officers for violations of such codes or failure to abide by college parking or vehicle regulations. Everyone is required to pay all fines in connection with such violations. Unpaid fines will be referred to the Department of Motor Vehicles (DMV) and a hold will be placed on your vehicle registration.

Persons using the parking facilities at the college do so at their own risk. The college assumes no liability for the use of parking facilities.

Río Café

The Río Café, located on the first floor of the Student Union, is your go-to place for a quick snack or meal. With a spacious 300-seat dining room, it's also a great spot to enjoy a leisurely breakfast, lunch, or dinner with friends. The café offers a diverse menu of healthy dining options, a grill with a live sandwich station, an International Cuisine, a Panini Grill, and a Premium Waffle station. We have a wide selection of beverages and a variety of sweet and savory fresh-baked pastries. You can also get your favorite Starbucks Lattes, cappuccino®, Blended Beverages, Coffees, and Teas at our Starbucks Coffee Bar. We accept Cash, Credit, EBT, and Apple Pay for your convenience. Our operating hours are Monday through Thursday, 7:00 am to 8:00 pm; Friday, 7:00 am to 2:00 pm; Saturday, 7:00 am to 1:00 pm. Breakfast is served from 7 am to 10 am; the hot grill is open from 10 am to 6 pm (Monday to Thursday). On Fridays, breakfast is from 7 am to 10 am; hot grill is from 10 am to 1:30 pm. You can easily order online at RIOCAFETOGO.COM or by phone at 562-463-7221.

Catering is available at email: riocafe@riohondo.edu.

Río Hondo Educational Center at Pico Rivera

The Río Hondo Educational Center at Pico Rivera is one of Río Hondo College's off-campus educational centers. It is located at 9426 Marjorie Street, Pico Rivera, CA 90660. There are classrooms, a computer resource lab, and a study hall. Regular college credit courses are offered at the Educational Center at Pico Rivera, including basic skills, general education courses for graduation and transfer to a university. Continuing Education also offers noncredit courses. For more information about classes and services at the Pico Rivera Educational Center, please call (562) 222-1482.

Santa Fe Springs Training Center

The Río Hondo College Fire Technology program is located at the Santa Fe Springs Regional Training Center at 11400 Greenstone Ave., Santa Fe Springs. The Training Center houses the equipment and facilities for the College's Fire Academy, Homeland Security Training Center, Emergency Medical Technician (EMT) program, Biddle (Fire) Physical Abilities Testing, and Advanced Fire Marshal Training Programs. Some Fire Technology classes are also held on the main campus at the new Administration of Justice Building. The Wildland Fire Technology

program and the Wildland Fire Academy are located at the AJ building on the main campus. Please see Schedule of Classes for more information. Phone: (562) 941-4082 extensions 21,22, or 23

South Whittier Educational Center (SWEC)

The South Whittier Educational Center (SWEC) is located at 14307 East Telegraph Road, Whittier, CA 90604. This site serves as a instructional site for Administration of Justice and Fire Technology career programs. There are classrooms and a Public Safety lab. For more information about classes and services at SWEC, please call (562) 463-7748.

State Smog Center

Río Hondo College's State Smog Center is a state-contracted test facility that provides certain Smog Check services for motorists. Working with Automotive Technology departments at the community colleges, the Consumer Assistance Referee Centers provide motorists the opportunity to receive independent smog checks on their vehicles. Visit the web site

www.smogcheck.ca.gov for the eligibility conditions necessary to utilize a referee station. Depending on the State's schedule of operation, the Center is open Monday through Friday from 8:00 a.m. to 5:00 p.m. by appointment only. Closed on State-determined holidays. Call (800) 622-7733 for hours of operation and an appointment.

Wray Theater

The Wray Theater is currently under construction to improve the facility. The college will be using other indoor and outdoor venues to showcase a variety of student and professional performances in the areas of theatre, dance, music, film, and guest lectures. The performances are open to the public and are advertised in the College's Cultural Events brochure available from the Division of Arts & Cultural Programs. For more information, call (562) 908- 3471 or visit our web site at: <http://www.riohondo.edu/arts>.

2 College Policies & Procedures

Current Río Hondo College Board Policies (BP) and Administrative Procedures (AP) can be found on the web site: <https://go.boarddocs.com/ca/riohondo/Board.nsf/vpublic?open>

Academic Freedom

Philosophy

The maintenance of freedom of speech, publication, religion, and assembly (each of which is a component of intellectual freedom) is the breath of life in a democratic society. The need is greatest in fields and institutions of higher learning, where the use of reason and the cultivation of the highest forms of human expression are the basic methods for maintaining those freedoms. Society has come to rely upon colleges and universities as a principal means of acquiring new knowledge and new techniques, of conveying the fruits of past and present learning to the community, and of transmitting these results to generations to come. Without freedom to explore, to criticize existing institutions, to exchange ideas, and to advocate solutions to human problems, faculty members, staff and students cannot perform their work and cannot maintain their self-respect. Society suffers correspondingly. The liberty that is needed requires a freedom of thought and expression within colleges and universities, freedom to carry the results of honest inquiry to the outside, and a freedom to influence human affairs in the same manner as other informed persons do. Nor is the value of freedom lessened because error at times arises from its exercise. Learning, intellectual development, and social and scientific progress takes place on a trial-and-error basis, and even the unsound cause or hypothesis may call forth the truth that displaces it. (Board Policy 4030).

Access to Student Records

All currently enrolled or former students have the right to view any records relating to them and maintained by the College. Students may inspect and review records during regular business hours in the Office of Admissions and Records. Requests to view records will be granted no later than five working days following date of request. Qualified personnel will be present to interpret records for students.

College personnel may also permit access to student's records to any person for whom the student has executed written consent specifying the records to be released and identifying the party to whom the records may be released. College personnel will notify the recipient of such records that the transmission of information to third parties is prohibited. (Administrative Procedure 5040)

Student Records

Privacy Act - All student records at Río Hondo College are kept in accordance with the provisions of the Family Educational Rights and Privacy Act of 1974. Students may request access to those campus records that personally identify the student; the student may challenge the accuracy of the record or the appropriateness

of its retention in the campus records. Student consent is needed for the release of records covered by the Act to outside parties (e.g., prospective employers) except for those agencies entitled to access under the provisions of the Act (e.g., campus officials, other schools, federal educational and auditing officers and requests in connection with the application of receipt of financial aid). Any currently enrolled or former student of the Río Hondo Community College District has a right of access to all student records relating to them maintained by the district except under exclusions contained in Board Policy 5035. (Board Policy 5040)

These provisions apply to records received and used after November 1, 1974. A student may request a report summarizing the number of records he/she has requested or given consent to be released.

If you believe your rights have been violated under the Family Educational Rights and Privacy Act (FERPA) or the Protection of Pupil Rights Amendment (PPRA), you may file a complaint with the U.S. Department of Education.

U.S. Department of Education
Student Privacy Policy Office
400 Maryland Ave, SW
Washington, D.C. 20202-8520

More information can be found at: <https://studentprivacy.ed.gov/file-a-complaint>

Children on Campus

Except when children are enrolled in the Child Development Center, other instructional programs in the District, and/or attending public events under the supervision of a parent or guardian, bringing children on campus while attending classes is not permitted. Parents and guardians must be aware that the ultimate responsibility for the safety of the children in their care rests with them and no liability can be accepted by the District nor any of its agents or staff for the consequences of children being on campus.

Computer Usage

Each computer user is responsible for the use of computing resources in an effective, efficient, and lawful manner. Computing resources and equipment are college property, and the college retains the right to monitor systems and limit access. Users of computing resources must abide by the rules/ policies established by the department responsible for the supervision of the equipment. Each user must understand and acknowledge that his/her freedom to access and display information is limited to authorized academic and administrative uses. No person may use

computer resources for any illegal act, including the possession or use of programs, files, or instructions for violating system security or violation of copyright law. Computer resources may not be used to intimidate or create an atmosphere of harassment based upon any protected class/category (gender, race, religion, ethnic origin, creed, sexual orientation, or other categories as applicable). (Administrative Procedure 3720)

Student Complaints/Grievance Procedures

The District provides a prompt and equitable means of resolving student grievances and complaints. A grievance is an alleged wrongful act by a Río Hondo College staff or faculty member which has an adverse effect upon a student's academic or personal status right or privileges as a student at Río Hondo College. Students are protected against capricious, arbitrary, unreasonable, unlawful, false, malicious or professionally inappropriate evaluations or behavior by a faculty member, a staff member, an administrator or an official of the College or another student. Student complaints may be classified as grievances and fall into one of two categories: Academic, or Non-Academic. Students are encouraged to follow the Río Hondo College Complaint and Grievance process. Issues that are not resolved at the campus level may be presented to the State Chancellor's Office using their complaint process. (Administrative Procedure 5530)

This procedure does not apply to any matters for which a specified method of complaint resolution is provided by law or by District policy, such as: Student disciplinary actions, which are covered under separate Board Policies and Administrative Procedures (BP 5500, AP 5500); Police citations (i.e. "tickets"); complaints about citations must be directed to the County Courthouse in the same way as any traffic violation; or Complaints of discrimination, harassment, or retaliation, including grade grievances based on this type of allegation. These types of complaints are covered under separate Administrative Procedures (AP 3435) and can be filed with the Office of Human Resources, L Tower, 3rd Floor or (562) 908-3405.

For more information regarding student complaints and grievance procedures, please contact the Office of Student Support Services located in SS104 or visit: <https://www.riohondo.edu/student-support-services/>

Directory Information

This is to serve as public notice that the following information is regarded by Río Hondo Community College District as Directory Information, and may be released for distribution unless a stop action is initiated by a student on the Río Hondo College Directory Information Denial of Release form available in the Admissions and Records Office. A new form must be completed each year. Directory information includes: a student's name, whether or not they are currently enrolled, participation in officially recognized activities and sports, weight and height of members of athletic teams, degrees and awards received. (Board Policy 5040)

A request for directory information will be denied to any parties, not otherwise entitled to the information by law, if the college determines that such release is not in the best interest of the student. Further information may be obtained from the Admissions & Records Office. (Board Policy and Administrative Procedure 5040)

Non-Discrimination Policy

Río Hondo Community College District complies with all federal and state rules and regulations and does not discriminate on the basis of national origin, immigratio status, religion, age, gender,

gender identity, gender expression, race, ethnicity, color, medical condition, genetic information, ancestry, sexual orientation, marital status, physical or mental disability, pregnancy, or military and veteran status, or because they are perceived to have one or more of the foregoing characteristics, or based on association with a person or group with one or more of these actual or perceived characteristics. (Board Policy 3410) Inquiries regarding non-discrimination may be directed to Vice President of Human Resources, L Tower 3rd Floor, (562) 908-3405.

Río Hondo Community College District recognizes its obligation to provide program accessibility for all persons with disabilities in a manner that does not discriminate in the delivery of those services. The College makes reasonable accommodation for students, employees and members of the community who may be participating in campus activities. (Administrative Procedure 3410)

Inquiries regarding federal laws and regulations concerning nondiscrimination in education or the District's compliance with those provisions may also be directed to:

Office for Civil Rights

Registered Sex Offender Information

Sex offenders are required to register with the police in the jurisdiction in which they reside and at institutions of higher learning if they are students there or if they work there as employees, contractors, or volunteers. Sex offenders are required to register with the Los Angeles County Sheriff's Department, Pico Rivera Office, 6631 Passons Blvd., Pico Rivera, CA 90660, 562-949-2421, Santa Fe Springs Regional Public Safety, Whittier Police Department, 11576 Telegraph Road, Santa Fe Springs, Ca 90670, 562-409-1850. prior to applying to Río Hondo College.

Once registered, the offender is required to meet with the Dean of Students Affairs with appropriate documentation from the Sheriff's Department.

Information concerning registered sex offenders can be obtained from the Dean of Student Affairs (562) 908-3498, Los Angeles County Sheriff's Department, Pico Rivera Office, 6631 Passons Blvd., Pico Rivera, CA 90660, 562-949-2421, Santa Fe Springs Regional Public Safety, Whittier Police Department, 11576 Telegraph Road, Santa Fe Springs, Ca 90670, 562-409-1850. (Administrative Procedure 3516)

Sexual Harassment

All forms of sexual harassment are contrary to basic standards of conduct between individuals. State and federal law and this policy prohibit sexual harassment and the Río Hondo Community College District will not tolerate sexual harassment. The District is committed to providing an academic and work environment that respects the dignity of individuals and groups. The District shall be free of sexual harassment and all forms of sexual intimidation and exploitation including acts of sexual violence.

The District seeks to foster an environment in which all employees, students, applicants for employment, and applicants for admission feel free to report incidents of sexual harassment in violation of this policy and Title IX, without fear of retaliation or reprisal. Therefore, the District also strictly prohibits retaliation against any individual for filing a complaint of sexual harassment in violation of this policy and Title IX or for participating or refusing to participate, in a sexual harassment investigation.

The District will investigate all allegations of Title IX retaliation swiftly and thoroughly. If the District determines that someone has retaliated, it will take reasonable steps within its power to stop such conduct. Individuals who engage in Title IX retaliatory conduct are subject to disciplinary action, up to and including termination or expulsion. (Board Policy 3433)

Definition – Sexual harassment consists of unwelcome sexual advances, requests for sexual favors, and other conduct of a sexual nature when:

1. Submission to the conduct is made a term or condition of an individual's employment, academic status, or progress;
2. Submission to, or rejection of, the conduct by the individual is used as a basis of employment or academic decisions affecting the individual;
3. The conduct has the purpose or effect of having a negative impact on the individual's work or academic performance, or of creating an intimidating, hostile or offensive work or educational environment; or
4. Submission to, or rejection of, the conduct by the individual is used as the basis for any decision affecting the individual regarding benefits and services, honors, programs, or activities available at or through the community college.

This definition encompasses the following kinds of sexual harassment.

1. Quid pro quo sexual harassment occurs when a person in a position of authority makes educational or employment benefits conditional upon an individual's willingness to engage in or tolerate unwanted sexual conduct.
2. Hostile environment sexual harassment occurs when unwelcome conduct based on sex is sufficiently severe or pervasive so as to alter the conditions of an individual's learning or work environment, unreasonably interfere with an individual's academic or work performance, or create an intimidating, hostile, or abusive learning or work environment. The victim must subjectively perceive the environment as hostile, and the harassment must be such that a reasonable person of the same gender would perceive the environment as hostile. A single or isolated incident of sexual harassment may be sufficient to create a hostile environment if it is severe, i.e. a sexual assault.
3. Sexually harassing conduct can occur between people of the same or different genders. The standard for determining whether conduct constitutes sexual harassment is whether a reasonable person of the same gender as the victim would perceive the conduct as harassment based on sex.

Sexual harassment can consist of virtually any form or combination of verbal, physical, visual or environmental conduct. It need not be explicit, nor even specifically directed at the victim. (Administrative Procedure 3430)

Any employee, student, applicant for employment, or applicant for admission who believes they have been harassed or retaliated against in violation of this policy should immediately report such incidents by following the procedures described in AP 3434 Responding to Harassment Based on Sex under Title IX. The District requires supervisors to report all incidents of harassment and retaliation that come to their attention.

Questions concerning Title IX may be referred to the District Title IX Coordinator:

Vice President of Human Resources
3600 Workman Mill Road, L Tower, 3rd Floor
Whittier, CA 90601
(562) 908-3405

Individuals may also file a complaint at the following link:
<https://www.riohondo.edu/hr/title-ix-reporting-options>

Acoso Sexual

Todas las formas de acoso sexual son contrarias a las normas básicas de conducta entre personas. Las leyes estatales y federales y los reglamentos del colegio de Rio Hondo prohíben el acoso sexual y el Distrito de Colegios Comunitarios de Rio Hondo no tolerará el acoso sexual. El Distrito está comprometido a proporcionar un ambiente académico y laboral que respete la dignidad de individuos y grupos. El Distrito estará libre de acoso sexual y de toda forma de intimidación y explotación sexual, incluidos actos de violencia sexual.

El Distrito fomentará un entorno en el que todos los empleados, estudiantes, solicitantes de empleo y solicitantes de admisión se sientan libres de denunciar incidentes de acoso sexual en violación de los reglamentos del colegio de Rio Hondo y del Título IX, sin temor a represalias. Por lo tanto, el Distrito también prohíbe estrictamente las represalias contra cualquier individuo por presentar una denuncia de acoso sexual en violación de los reglamentos del colegio de Rio Hondo y el Título IX o por participar o negarse a participar en una investigación de acoso sexual.

El Distrito investigará todas las acusaciones de represalias del Título IX de manera rápida y exhaustiva. Si el Distrito determina que alguien ha tomado represalias, tomará medidas razonables a su alcance para detener dicha conducta. Las personas que participan en conductas de represalia según el Título IX están sujetas a medidas disciplinarias, que pueden incluir el despido o la expulsión. (Normas del Colegio de Rio Hondo BP 3433)

Definición – El acoso sexual puede ser acoso sexual mal recibido, solicitudes de favores sexuales, y otro comportamiento implícitamente sexual con tal que:

1. Sometimiento al comportamiento se presenta como requisito o condición del empleo del individuo, de la categoría o estado académico del individuo o de adelantamiento del individuo;
2. Sometimiento al comportamiento, o rechazo del comportamiento, del hostigador se presenta como criterio de empleo o de decisiones académicas en cuanto al individuo;
3. El comportamiento tiene el intento de resultar en impacto negativo en el trabajo del individuo o en los estudios académicos del individuo, o tiene el intento de crear un ambiente de intimidación y hostilidad en el empleo o en los estudios; o
4. Sometimiento al comportamiento, o rechazo del comportamiento, del hostigador se usa como criterio de cualquier decisión en cuanto al individuo y los beneficios o servicios, honor del colegio, programas, o actividades que se presentan en o por el colegio.

Esta definición incluye las siguientes clases de acoso sexual.

1. El acoso sexual *Quid pro quo* ocurre cuando una persona con puesto de autoridad presenta beneficios educativos o de empleo como dependientes del sometimiento del individuo a participar en o tolerar comportamiento sexual mal recibido.
2. El acoso sexual de Ambiente hostil ocurre cuando el comportamiento mal recibido, implícitamente o explícitamente sexual, es bastante severo o intruso para que se cambien las condiciones del ambiente de empleo, o de estudios, del individuo, o para que se impida excesivamente el trabajo del individuo o los estudios del individuo, o para que se crea un ambiente, de empleo o educativo, de intimidación, hostilidad y abuso. El individuo como víctima tiene que percibir personalmente el ambiente como hostil, y el hostigamiento tiene que ser de tal manera que una

persona razonable del mismo sexo percibiría el comportamiento como hostigamiento sexual. Un incidente único o aislado de acoso sexual puede ser suficiente para crear un ambiente hostil si es grave, es decir, una agresión sexual.

3. El hostigamiento sexual puede ocurrir entre personas del mismo sexo o de diferentes sexos. El criterio para determinar si el comportamiento es hostigamiento sexual es si una persona razonable del mismo sexo percibiría el comportamiento como hostigamiento sexual. El hostigamiento sexual incluye cualquier combinación de comportamiento verbal, físico, o visual, o de control a través del ambiente de empleo o educativo. El hostigamiento sexual no tiene que ser explícito, ni tiene que ser específicamente dirigido al víctima. (Reglamentos del Colegio de Rio Hondo AP 3430)

Cualquier empleado, estudiante, solicitante de empleo o solicitante de admisión que crea que ha sido acosado o tomado represalias en contra de esta política debe informar inmediatamente dichos incidentes siguiendo los procedimientos descritos en AP 3434 Respondiendo al acoso basado en el sexo bajo el Título IX. El Distrito requiere que los supervisores informen todos los incidentes de acoso y represalias que lleguen a su conocimiento.

Las preguntas sobre el Título IX pueden remitirse al Coordinador del Título IX del Distrito:

Vicepresident de Recursos Humanos
3600 Workman Mill Road, L Tower, 3rd Floor
Whittier, CA 90601
(562) 908-3405

Los particulares también pueden presentar una denuncia en el siguiente enlace:

<https://www.riohondo.edu/hr/title-ix-reporting-options>

Sexual Misconduct Information and Title IX Compliance

OTHER MISCONDUCT OFFENSES

(Will fall under TITLE IX when gender-based)

- Threatening or causing physical harm, extreme verbal abuse, or other conduct which threatens or endangers the health or safety of any person;
- Discrimination, defined as actions that deprive other members of the community of educational or employment access, benefits or opportunities on the basis of gender;
- Intimidation, defined as implied threats or acts that cause an unreasonable fear of harm in another;
- Bullying, defined as repeated and/ or severe aggressive behavior likely to intimidate or intentionally hurt, control or diminish another person, physically or mentally (that is not speech or conduct otherwise protected by the 1st Amendment).
- Violence between those in an intimate relationship to each other;
- Stalking, defined as repetitive and/ or menacing pursuit, following, harassment and/or interference with the peace and/or safety of a member of the community; or the safety of any of the immediate family of members of the community.

PRIVACY AND REPORTING:

The District Title IX Compliance Officer is responsible for the purposes of initiating notice and/or investigation of sexual

misconduct. The District Title IX Officer may assign deputy investigators, who are members of the investigative team, to investigate allegations of gender based discrimination and/or sexual misconduct. The deputy investigators will use discretion on how they act in response to notice of gender-based discrimination. Understanding that different people on campus have different reporting responsibilities and varied abilities to maintain confidentiality, the District Title IX Officer will assign deputy investigators depending on the situation and the parties involved.

To Report Gender-Based Discrimination, sexual harassment, non-consensual sexual contact, nonconsensual sexual intercourse, or sexual exploitation, please contact:

Tina Kuperman, J.D.
Vice President, Human Resources
tkuperman@rioondo.edu

CONFIDENTIAL REPORTING:

If you want the details of the incident be kept confidential, you should speak with on-campus professional staff in the Student Health and Psychological Services Office, campus confidential advocate in the office of Student Life, or off-campus rape crisis resources who can maintain confidentiality. To connect with our local rape crisis center for free confidential services, email: help@elawc.org.

Reporting to those who can maintain the privacy of what you share—You can seek advice from certain individuals who are not required to tell anyone else your private, personally identifiable information unless there is cause for fear for your safety, or the safety of others. These are individuals who the college has not specifically designated as “responsible employees” for purposes of putting the institution on notice and for whom mandatory reporting is required, other than in the stated limited circumstances. If you are unsure of someone’s duties and ability to maintain your privacy, ask them before you talk to them.

NON-CONFIDENTIAL REPORTING OPTIONS:

You are encouraged to speak to officials of the institution to make formal reports of incidents (deans, vice presidents, or other administrators with supervisory responsibilities, campus security, and human resources). The College considers these people to be “responsible employees.” Notice to them is official notice to the institution. You have the right and can expect to have incidents of sexual misconduct to be taken seriously by the institution when formally reported, and to have those incidents investigated and properly resolved through administrative procedures. Formal reporting means that only people who need to know will be informed of the report, and information will be shared only as necessary with investigators, witnesses, and the accused individual.

Federal Statistical Reporting Obligations: Certain campus officials have a duty to report sexual misconduct for federal statistical reporting purposes (Clery Act). All personally identifiable information is kept confidential, but statistical information must be passed along to campus law enforcement regarding the type of incident and its general location (on or off-campus, in the surrounding area, but no addresses are given) for publication in the annual Campus Security Report. This report helps to provide the community with a clear picture of the extent and nature of campus crime, to ensure greater community safety. Mandated federal reporters include: student/conduct affairs, campus law enforcement, coaches, athletic directors, student activities staff, human resources staff, advisors to student organizations and any other official with significant responsibility for student and campus activities. The information to be shared includes the date, the location of the incident (using Clery

location categories) and the Clery crime category. This reporting protects the identity of the victim and may be done anonymously.

Federal Timely Warning Reporting Obligations: Victims of sexual misconduct should also be aware that college administrators must issue immediate timely warnings for incidents reported to them that are confirmed to pose a substantial threat of bodily harm or danger to members of the campus community. The College will make every effort to ensure that a victim’s name and other identifying information is not disclosed, while still providing enough information for community members to make safety decisions in light of the danger. The reporters for timely warning purposes are exactly the same as detailed above.

Standards of Student Conduct

The Río Hondo College campus is an academic community dedicated to teaching and learning. In order that teaching and learning may take place in an atmosphere of respect for one another and for each other’s ideas and beliefs, Río Hondo College has guaranteed certain fundamental rights to its students and faculty.

Río Hondo College students are part of a community in which ideas will be explored in a mature spirit of understanding and mutual respect. Only in this mature spirit can the college meet its obligations to those it serves.

All students are required to abide by the Standards of Conduct (Board Policy and Administrative Procedure 5500) and failure to do so may result in disciplinary action such as a verbal or written reprimand, probation, suspension and/or expulsion. The following conduct shall constitute good cause for discipline, including but not limited to the removal, suspension or expulsion of a student.

- A. Fighting, causing, attempting to cause, or threatening to cause physical injury to another person.
- B. Possession, sale or otherwise furnishing any firearm, knife, explosive other dangerous object, including but not limited to any facsimile firearm, knife or explosive. (Administrative Procedure 3530)
- C. Unlawful possession, use, sale, offer to sell, furnishing, or being under the influence of any controlled substance listed in California Health and Safety Code Section 11053 et seq., an alcoholic beverage, or an intoxicant of any kind; or unlawful possession of, or offering, arranging or negotiating the sale of any drug paraphernalia, as defined in California Health and Safety Code Section 11014.5.
- D. Drinking, possessing, or being under the influence of alcoholic beverages on campus or at any college sponsored event.
- E. Committing or attempting to commit robbery or extortion.
- F. Causing or attempting to cause damage to District property or to private property on campus.
- G. Stealing or attempting to steal District property or private property on campus, or knowingly receiving stolen District property or private property on campus.
- H. Willful or persistent smoking in any area where smoking has been prohibited by law or by regulation of the college or posting of a District.
- I. Committing sexual harassment as defined by law or by District policies and procedures.
- J. Engaging in harassing or discriminatory behavior based on disability, gender, gender identity, gender expression, nationality, race or ethnicity, religion, age, national origin, disability, sexual orientation or any other status protected by law.
- K. Engaging in intimidating conduct or bullying against another student through words or actions, including direct physical

contact; verbal assaults, such as teasing or name-calling; social isolation or manipulation; and cyber bullying.

- L. Hazing, as defined as any method of initiation or pre-initiation into a student organization or student body, whether or not the organization or body is officially recognized by the college, which is likely to cause serious bodily danger, or personal degradation, or disgrace, resulting in physical or mental harm.
- M. Willful misconduct that results in injury or death to a student or to District personnel or which results in cutting, defacing, or other injury to any real or personal property owned by the District or on campus.
- N. Disruptive behavior, willful disobedience, habitual profanity or vulgarity, or the open and persistent defiance of the authority of, or persistent abuse of, college personnel.
- O. Cheating, plagiarism (including plagiarism in a student publication), or engaging in other academic dishonesty.
- P. Dishonesty; forgery; alteration or misuse of District documents, records or identification; or knowingly furnishing false information to the District.
- Q. Unauthorized entry upon or use of District facilities.
- R. Lewd, indecent or obscene conduct on District-owned or controlled property, or at District sponsored or supervised functions.
- S. Engaging in expression which is obscene, libelous or slanderous, or which so incites students as to create a clear and present danger of the commission of unlawful acts on College premises, the violation of lawful District administrative procedures, or the substantial disruption of the orderly operation of the District.
- T. Persistent, serious misconduct where other means of correction have failed to bring about proper conduct.
- U. Unauthorized preparation, giving, selling, transfer, distribution, or publication, for any commercial purpose of any contemporaneous recording of an academic presentation in a classroom or equivalent site of instruction, including but not limited to handwritten or typewritten class notes, except as permitted by any district policy or administrative procedure.
- V. Knowingly accessing and without permission altering, damaging, deleting, destroying, or otherwise using any data, computer system or computer network in order to either (a) devise or execute any scheme or artifice to defraud, deceive or extort, or (b) wrongfully control or obtain money, property or data.
- W. Knowingly accessing and without permission taking, copying or making use of any data from a computer, computer system, or computer network, or taking or copying any supporting documentation, whether existing or residing internal or external to a computer, computer system or computer network.
- X. Knowingly and without permission using or causing the use of computer services.
- Y. Knowingly accessing and without permission adding, altering, damaging, deleting or destroying any data, computer software, or computer programs which reside or exist internal or external to a computer, computer system or computer network.
- Z. Knowingly and without permission disrupting or causing the disruption of computer services or denying or causing the denial of computer services to an authorized user of a computer system or computer network.
- AA. Knowingly and without permission providing or assisting in providing a means of accessing a computer, computer system or computer network in violation of this section.
- AB. Knowingly and without permission accessing or causing to be accessed any computer, computer system, or computer network.

- AC. Knowingly introducing any computer contaminant, commonly called viruses or worms, into any computer, computer system, or computer network.
- AD. Sexual assault on any District personnel, District vendor, District visitor or student, upon off-campus grounds or facilities maintained by the District, or upon grounds or facility maintained by affiliated student organizations.
- AE. The obstruction or disruption, on or off-campus, of the District's educational or administrative process or any other District function.
- AF. The violation of any previous order issued by the District president that is not inconsistent with any of the other provisions of this policy. This order may be given by its publication in the student newspaper or by notice on an official bulletin board designated for this purpose.
- AG. Attempting to perform any previously identified act that constitutes a cause for disciplinary action.
- AH. Violation of District policies or regulations including those concerning the formation and registration of student organizations, the use of college facilities, or the time, place and manner of public expression.
- AI. Failure to comply with directions of District officials acting in the performance of their duties.
- AJ. Soliciting or assisting another to do any act which would subject a student to expulsion, suspension, probation, or other discipline pursuant to this policy.
- AK. Any other cause not previously listed which is identified as a good cause by the College or the Hearing Panel.
- AL. Engaging in intimidating conduct or bullying against another student through words or actions, including direct physical contact; verbal assault, such as teasing or name-calling; special isolation or manipulation; and cyber bullying.

Students who engage in any of the above are subject to the Student Conduct Procedures outlined in AP 5520.

Mental Health Clearance

A student who is removed from campus as a result of erratic, dangerous and/or threatening behavior described in the Standards of Student Conduct (AP 5500); and/ or determination by a public safety officer that the student poses a threat to himself/herself or the general public may be required, before the student is readmitted to campus, to provide documentation from a licensed mental health professional* stating that the student will no longer engage in the behavior which gave rise to the student's removal from campus and that the student's continued presence on campus is not a threat to himself/ herself or others before the student is readmitted to campus.

The mental health professional must be licensed by the State of California and credentialed to render a professional opinion on matters of this nature. The student is responsible for any expenses related to obtaining this mental health clearance.

*The documentation for re-admittance shall be provided to the Dean of Student Affairs by a non-Río Hondo College District California licensed mental health professional.

Río Hondo College's Drug Free Environment and Drug Prevention Program

The Río Hondo Community College District is committed to providing its employees and students with a drug-free workplace and campus environment. It emphasizes prevention and intervention through education.

The unlawful manufacture, distribution, dispensing, possession or use of alcohol or any controlled substance is prohibited on District

property, during District sponsored field trips, activities or workshops, and in any facility or vehicle operated by the District.

Violation of this prohibition will result in appropriate action up to and including termination of employment, expulsion, and referral for prosecution, or, as permitted by law, may require satisfactory program participation in an alcohol or drug abuse assistance or rehabilitation program.

If you want help . . .

Río Hondo College has some resources to assist you in breaking out of drug and alcohol abuse.

- Student Health and Psychological Services, Rm SS230, (562) 908-3438

This information is provided to all students per requirements of the Drug Free School and Communities Act Amendments of 1989. (P.L. 101-226). Board Policy and Administrative Procedure 3550.

3 Admission, Registration & Educational Costs

Admissions: Becoming a Río Hondo Student

Students who are high school graduates, or individuals 18 years of age or over who show evidence that they can benefit from instruction, may apply and will be admitted to Río Hondo College. All classes are open to those who meet the necessary prerequisites. No person shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any educational program or activity sponsored by Río Hondo College. See Non-Discrimination Policy in Chapter 2 and Administrative Procedure 3410.

Who May Apply

You may be eligible for admission to Río Hondo College if you are:

- A high school graduate or GED recipient, or holds a recognized equivalency.
- Not a high school graduate but over 18 years of age
- A current high school student who is recommended by the school principal or designee for advanced academic or vocational classes, has the approval of the student's parent(s), and meets the college's special admissions criteria. (High school students may apply, but are LIMITED to 11 UNITS of nonremedial coursework per session.)
- A current K-8 student who is recommended by the school principal via a letter recommendation listing the course/s they are requesting to register for college-level courses which include advanced academic or vocational classes, has the approval of the student's parent(s), and meets the college's special admissions criteria. (K-8 students may apply, but are LIMITED to one college-level/non-remedial course per session.)

Student Classification

Students are classified according to the following classifications for the purpose of registration:

New Student: A student who has never enrolled in a credit course at any college, including Río Hondo, or has only enrolled as a K-12 Special Admit Student.

Returning Student: A returning student is a student who did not register the previous semester but has registered in the past. Students who are returning after an absence of two or more semesters (not including summer) must submit a new application for admission online.

Continuing Student: A continuing student is a student who attended the previous semester. To be classified as a continuing student with registration priority privileges, a student must maintain continuous enrollment (enrolled in at least one course each semester, not including summer).

Special Admit Student: An enrichment student is a student who is currently enrolled in grades K-12 or is homeschooled.

• Permission

A Dual Enrollment Petition must be submitted to the college. The petition must be signed by an approved designee by the school or district; the parent(s)/guardian of the student; and the student. A school or district must submit a designee letter to the Río Hondo College Admissions Office that lists the names of the individuals who are authorized to sign the petition, and must be signed by the Principal.

• Parameters

Students in K-12 may enroll in classes for college credit. Permission to enroll must be obtained in advance from their school and a parent or guardian.

- High School Students: Are limited to 11 units of non-remedial college-level coursework each term.
- K-8: Are limited to one course of non-remedial college-level coursework each term.

Interested K-12 students may obtain information at <https://www.riohondo.edu/get-started/high-school-student/>. Additional information may be obtained by calling or visiting the Admissions and Records Office.

Residency Classification for Tuition Purposes

California residency classification is determined for each student, except students seeking to enroll in noncredit courses only, at the time applications for admission and whenever a student has not been in attendance for more than one primary semester (Fall/Spring). This classification is for tuition purposes. If there are one or more indicators that a student has not established California as their state of residence, or if further documentation is needed to make this determination, a student will pay nonresident fees until approved for reclassification.

If asked, a student must provide proof of California residency (or in some cases, parent residency) for the past 12-24 consecutive months. If the student is unable to document proof of California residency, he/she may still enroll but must pay nonresident fees. To establish residency, a student must be able to prove eligibility, through physical presence and intent to make California their state of residency for one (1) year and one (1) day prior to the first day of the term. Federal law precludes some visa types from establishing residency. Selected exemptions from nonresident fees are provided in law: such as certificated public school employees, agricultural workers, military personnel and their dependents. If you feel that you might qualify for an exemption

or have questions about residency, please contact the Admissions and Records Office.

Nonresident Students – Legal Requirements-Education Code Section 76140 requires that tuition be charged to students who are not residents of the State of California and who attend public community colleges within the state.

The nonresident/international student fee of \$332.00 per unit (subject to change) plus a per unit enrollment fee is charged each semester/ summer session. Tuition charges must be paid at the time of registration.

The Admissions and Records Office should be consulted concerning the determination of residence.

AB540 Students

On October 12, 2001, Governor Davis signed into law Assembly Bill 540 which added a section to the California Educational Code, section 68130.5. Section 68130.5 created an exemption from payment of nonresident tuition for certain nonresident students who have attended high school in California and received a high school diploma or its equivalent.

1. The laws do not grant California residency.
2. Students exempt from paying nonresident tuition pursuant to section 68130.5 do not become residents and may not be eligible for state-funded programs which require residency.
3. Students who meet the exemption requirements and who are unlawful immigrants are not eligible for any federal financial aid programs. Many private sources have created scholarships specific to students not eligible for traditional financial aid programs.
4. Students exempted from paying nonresident tuition pursuant to section 68130.5 are not eligible for the Governor's Merit Scholar Programs because these scholarships are only available for California residents.
5. Students must meet all requirements in section 68130.5 (a) (1) – (4) to be eligible for the exemption.
 - a. The student must have graduated from a California high school which he/she attended for three or more years. There are no provisions for partial attendance (e.g. two years and 7 months). The law does not require consecutive attendance nor require that the student attend the last three years in California (in the case of four-year high schools).
 - b. Such attendance could be at multiple California high schools.
 - c. The law does not distinguish between public and private high schools. There is no time limit on how far in the past the student might have attended a California high school.
 - d. The student must have graduated from a California high school or attained the equivalent thereof (e.g., a GED or a high school proficiency exam).
 - e. Except for nonimmigrant aliens, any nonresident student who meets the first two requirements shall be exempted from nonresident tuition even if he or she is a US citizen or lawful immigrant.
 - f. If the student has filed an application with the INS to legalize status, the student may already be eligible for resident fee status if the student has resided in California for more than one year and one day since the time of INS application. (See Title 5 Section 54045.)
6. Students who are nonimmigrant aliens (the most common being the F series student visas and B series visitor visas) are not eligible for this exemption. (A full description of nonimmigrant alien classifications may be found in

paragraph 15 of subsection (a) of Section 1101 of Title 8 of the U.S. Code.) People who entered the country as nonimmigrant aliens but subsequently have gone out of status are not eligible for this exemption until they apply to INS to change their status to something other than nonimmigrant.

The following Assembly Bills allow undocumented students to qualify for in-state tuition at California Community College and the California State University campuses:

Assembly Bill 540 (AB 540), passed in 2001, grants students meeting certain criteria an exemption from paying nonresident tuition at California Community Colleges.

Assembly Bill 2000 (AB 2000) passed in 2014. This is an expansion of AB540. It increases the scope of student eligibility for students who graduated early from a California High School with the equivalent of three or more years of credits. If a student graduates early, they must have attended CA elementary or secondary schools for a cumulative total of 3 or more years. It allows students meeting the criteria below to pay in-state tuition, the same as resident students.

Senate Bill 68 (SB 68) passed in 2017. This public postsecondary education exemption from nonresident tuition was approved by the governor and filed with the Secretary of State on October 5, 2017. This legislation amended Education Code, section 68130.5, changing the criteria for students eligible for a nonresident tuition exemption, as previously defined in Assembly Bill 540 (2001). Senate Bill 68 expands the requirements of AB 540/AB 2000 to include attendance at California Community Colleges and attainment of an associate's degree.

The California Dream Act (Assembly Bills 130 and 131) were signed into law in 2011. Together these bills compose the California Dream Act and give AB 540/AB 2000 students the right to apply for state financial aid, including Cal Grant A & B Entitlement awards, Cal Grant C awards, institutional grants and community college fee waivers.

International Students

Students from outside the United States are welcome to pursue higher education at Río Hondo College. The college values the presence of students from diverse cultures on the college campus. Río Hondo College is a Student & Exchange Visitor Information System (SEVIS) approved institution to admit F-1 students. The International Student Program admits new and transfer students every semester who meet the requirements. All F-1 visa students must be accepted by the International Student Specialist before registering.

After being accepted to the college, all students must take an assessment test to determine level of English, Math and Reading. Each student is expected to register and complete 12 units in both the Spring and Fall semester with an overall grade point average of 2.0.

International students pay out of state fees which are subject to change without prior notice. Financial Aid is not available; students are expected to be financially independent. It is mandatory that all international students provide proof of health insurance coverage, by an approved insurance company, while attending Río Hondo College.

A Counselor is available to help students with a variety of issues; educational planning, choosing a major, graduation requirements, transfer requirements to 4-year colleges and Universities, tutoring and communication with a professor.

For information regarding the International Students Program, please visit the website at www.riohondo.edu/admissions/international-students/ or call (562) 463-7643.

Admissions Requirements for Overseas Students

- International Student Application
- Application processing fee of \$40.00 (nonrefundable)
- Copy of Passport
- English Proficiency must be met by one of the following methods
 - English is the students primary language
 - TOEFL 45iBT
 - IELTS 5
 - iTep 3
- Bank Certification (original bank statement or a letter from a bank, on bank letterhead, signed by a bank official, showing a minimum \$20,000 USD available to the student)
- 18 years of age by the time the semester begins

Admissions Requirements for Transfer Students

- International Student Application
- Application processing fee of \$40.00 (nonrefundable)
- Copy of Passport, Student Visa, I-94 and I-20 form
- English Proficiency must be met by one of the following methods:
 - College Level English Completed (official college transcripts must be submitted)
 - TOEFL 45iBT
 - IELTS 5
 - iTep 3
 - Completion of appropriate level of English at an approved Language School (see list of institutions and minimum level required www.riohondo.edu/international-students)
- Bank Certification (original bank statement or a letter from a bank, on bank letterhead, signed by a bank official, showing a minimum \$20,000 USD available to the student)
- 18 years of age by the time the semester begins

Open Enrollment Policy

The policy of this district is that, unless specifically exempted by statute or regulation, every course, course selection, or class, reported for state aid, whenever offered or maintained by the district, shall be fully open to enrollment and participation by any person who has been admitted to the college and who meets such prerequisites as may be established pursuant to regulations contained in Title 5.

Unit Limitations

Students are limited to 18 units per session (15 units for summer and 7 units for winter) unless they receive approval from a counselor for additional units. Students must meet with a counselor and complete a Unit Overload form. High School students are limited to 11 UNITS of non-remedial college-level coursework. K-8 students are limited to one non-remedial college-level course.

Adding/Dropping Classes

Adding Classes: Students may add classes (including a change of section of the same course) during or after the assigned registration time, prior to the semester/course start. See the Admissions page on our website for more information on important dates and deadlines. The class add must be processed

via AccessRio, and students who complete this process are officially enrolled in the class.

If the class and wait list are full, the student must attend class on the first day of instruction and request an add code from the instructor. If the instructor provides an add code, the student can then use the add code to register for the class via AccessRio by the published deadline.

Dropping Classes: It is the student's responsibility to officially withdraw (drop) from classes prior to the drop deadline. Students must drop before the "Last day to Drop with a Refund" to avoid fees or drop before the "Last day to Drop With a "W" to avoid receiving a failing grade.

Student-Initiated Withdrawal: While it is the student's responsibility to withdraw by the deadline, an instructor may drop a student with poor attendance. To find the drop deadlines for a particular course consult the online Class Schedule and click on the CRN number of the course. There students will find information on critical dates for the specific course, including drop dates.

The student must withdraw from the class via Access Rio by the established deadline. Failure to follow through with the drop procedure may result in the student receiving a failing grade. Students may contact the Admissions and Records Office if they need assistance in withdrawing from class(es).

Instructor-Initiated Withdrawal: A student may be withdrawn before the drop deadline (75% of course length) by the instructor of the course if the student is no longer participating in the course. Definitions of non-participation shall include, but are not limited to, excessive unexcused absences. While an instructor may drop a student from class for poor attendance, it is the student's responsibility to withdraw if the student is no longer attending the class.

There are five types of course withdrawal notations:

1. **Withdrawal with a refund** – A student who withdraws from a course before the published deadline to drop with a refund (10% of the course) will not be responsible for the fees for the course and no notation will be on their student record (transcript) for the dropped course.

2. **Withdrawal without receiving a "W"** – A student who withdraws from a course after the refund deadline and before the published deadline to drop without a "W" (30% of course length) will receive no notation on their student record (transcript) for the dropped course. A student is still responsible for enrollment fees. A student who withdraws from all classes prior to the "drop without a "W" deadline will no longer be classified as a continuing student for priority registration purposes.

3. **Withdrawal with a "W"** – A student who withdraws from class between 30% to 75% of the course length (after the drop without a "W" but before the drop deadline) will receive a "W" notation on their student record (transcript). The "W" is not used to calculate a student's grade point average (GPA) but may affect academic progress and result in progress probation/dismissal.

4. **Military Withdrawal "MW"** – A student serving as an active or reserve U.S. military serviceperson who receives orders compelling a withdrawal from courses may request a military withdrawal. Upon submission and verification of such orders, a student can petition to withdraw from classes with a "MW" notation on the student's transcript. Military withdrawals are not counted in progress probation and dismissal calculations. Military withdrawal petitions are available in the Admissions and Records Office. A Military Withdrawal is eligible for a full refund.

5. Excused Withdrawal "EW" – A student may submit a petition to withdraw from a course(s) due to specific events beyond their control which affects their ability to complete a course(s). These events may include a job transfer outside the geographical region, an illness in the family where the student is primary caregiver, the student is subject to immigration action, or other extenuating circumstances. The excused withdrawal "EW" notation is not counted in progress probation and dismissal calculations. An Excused Withdrawal is not eligible for a refund.

Evaluation of Transcripts

All students enrolled at Río Hondo College should have official transcripts from their high school on file.

Students with previous coursework from a regionally accredited college/university should have official transcripts from all colleges attended sent directly to Río Hondo College. Hand carried transcripts are not accepted. These transcripts can verify completion of prerequisite courses and assist the counselors in working with the student. Official transcripts from all regionally accredited colleges are required for evaluation towards a certificate, associate degree, or meeting general education requirements for transfer.

Transcripts from foreign universities must be evaluated by an approved credential evaluation service.

All transcripts must be sent directly to the Admissions and Records Office. Transcripts become the property of the college and cannot be returned to the student, copied, or forwarded to another institution.

Student Equity and Achievement Program

In 2018, the SEA Program was established and merged funding for three initiatives: the Student Success and Support Program; the Basic Skills Initiative; and Student Equity. Integrating these efforts into a single program advances our goal of demolishing once and for all the achievement gaps for students from traditionally underrepresented populations.

The SEA Program requires the implementation of a Guided Pathways framework offering a clear path to a stated goal, to provide all students with an education plan based on that goal, and provide access to transfer-level English and math. Students identified as matriculating are referred to core services: placement, orientation, and counseling.

Non-matriculating students are exempt from participating in core services, but they are advised to access these services if they decide to pursue a degree or certificate. A student is expected to participate in these services unless the student requests an exemption from a particular service. Exemption forms may be obtained in the Counseling Department. All students are strongly encouraged to participate in the process.

Military Veteran students must participate in all matriculation components as required by the Veterans Administration (VA).

Five Steps to Becoming a Río Hondo College Student

Included in the following section are the Five Steps to becoming a Río Hondo College student.

Non-Exempt Students: All new non-exempt students ("non-exempt" refers to students seeking an AA-T/AS-T degree, a certificate or transfer) are required to complete the following Placement, Orientation, and Educational Plan (prior to registration for classes). Students who do not complete their Placement,

Orientation and Educational Plan will receive an immediate hold on their registration.

Step 1: Application

Río Hondo College uses Open CCC for application processing. To submit an application for admissions log on to www.riohondo.edu and click the "Apply Now" button.

Step 2: Orientation

Orientation to the college is an important part of the matriculation process and should be completed prior to the first semester of coursework. It provides students with information on college services, registration procedures, course placement, and recommended courses to register for in the first semester. Students can complete the online orientation through the AccessRío student portal.

Step 3: Placement

All students will have the opportunity to enroll in transferlevel English and Math. Students are asked to complete the Placement Tool which can be obtained through the AccessRío student portal.

In order to successfully complete the Placement Tool students will need their high school grade point average, highest level high school English course completed, as well as highest level of high school math course completed.

Depending on the results and information that is submitted through the Placement Tool students may be placed into a support class for both English and math, as an added support course. Students meet with a Counselor after completing the Placement Tool to gather more information about the student's academic history and educational goals. Counselors will consider factors such as student's English skills, coursework taken at another college, study skills, or the need for special services. As a result of the meeting with the Counselor, the initial placement, based only on default placement rules, may change. Taking into consideration both high school achievement information and other factors revealed in the counseling meeting, the Counselor will determine the final course placement.

Students are encouraged to take the highest level course that they feel comfortable with. If needed, a student can also complete the placement process by meeting with a counselor for placement.

In accordance with AB 705, Río Hondo College no longer administers an assessment for placement. For K-8 Placement: students must obtain clearance from the academic Dean that oversees the course they wish to enroll. A completed K-8 petition form, and letter of recommendation from the student's Principal will be reviewed by the respective academic Dean prior to student course placement. For information, please contact the Río Success Lab at (562) 463-7226 or visit LR-141.

Step 4: Educational Plan

The Educational Plan process is designed to support students with the finest academic advisement and counseling possible. Placement information assists the counselor in outlining a useful and clear educational plan for the student's educational goals. Students can schedule an appointment throughout each semester and during the summer. For more information, please contact the Counseling Center at 562-908-3402 or the Student Success Center at 562-463-6650.

Step 5: Registration

Upon completing steps 1-4, a student can register online on dates specified online under the admissions and records link.

Registration Appointments – The appointment time established for each student is the date and time the student can

begin using the AccessRio online registration system for a given semester.

Students can find their registration appointment times by logging into their AccessRio account under Student, Registration and then clicking on Registration Status.

All new students are encouraged to participate in the components of admission, orientation, placement, and educational planning. However, exemptions for these components may be granted if certain criteria are met. (See Matriculation Exemptions.) Rio Hondo College administers a priority enrollment system for students who qualify based on program participation and/or to meet legislative requirements.

College Responsibilities

The college has certain responsibilities to support student success and agrees to provide the following:

- Processing applications for admission
- Placement
- Orientation to college programs and services
- Counseling/advising to provide assistance in developing an educational plan
- Follow-up and referral to services

Student Responsibilities

The student also has certain responsibilities. The student, to support their own success:

- Express a broad educational intent upon admission
- Complete the Placement Tool or meet with a counselor and provide information to support placement
- Declare a specific educational goal by the time 12 semester units are completed
- Meet with a counselor to develop an educational plan within the same semester
- Participate in counseling/advisement
- Attend class, complete assignments, and maintain progress toward a defined goal
- Drop classes he/she no longer wishes to attend

Student Rights

In accordance with the matriculation agreement, the student has the right to:

- Challenge placement decisions and any prerequisite or corequisite by completing the appropriate form, which can be obtained from the Counseling Department.
- You may file a complaint of unlawful discrimination with the Dean of Student Support Services.

Matriculation Exemptions

Students who meet one of the following exemption criteria for any of the matriculation components, may obtain an exemption form from the Counseling Department. Military students must participate in all matriculation components as required by the VA.

A. Placement, Orientation, and Counseling

All students are encouraged to participate in these components; an exemption may be granted according to one of the following criteria:

- Students who are enrolled only in activity, skill building, or personal growth classes (e.g., acting, physical fitness, ceramics) or job skills training (e.g., computer literacy, accounting, brake service), or
- Students who have already completed an AA/ AS degree or higher. Military students must participate in all matriculation components as required by the VA.

B. Placement

Further placement exemption may be granted according to one of the following criteria:

- Students who have successfully completed the equivalent of ENGL 101 at another community college or university do not have to complete the Placement Tool for English, however this does not exempt them from Math.
- Students who have successfully completed the equivalent of transfer-level math at another community college or university are exempt from completing the Placement Tool for Math, however, this does not exempt them from English.

C. Orientation

All students must complete the online orientation; an exemption may be granted according to one of the following criteria:

- Students who are concurrently enrolled at a four-year college or university, or
- Students who have previously participated in a Rio Hondo College orientation.

RHC Prerequisite/Corequisite/Advisory Definitions

The college requires students to meet prerequisite/corequisite requirements before taking the course in question.

Prerequisites – A course prerequisite indicates that the preparation or previous coursework is considered necessary for success in the desired course. In order for a prerequisite requirement to be met, the prerequisite course must be passed with at least a satisfactory grade. If a prerequisite course is taken at Rio Hondo College, the grade of "P" or a minimum grade of "C" is required.

Corequisites – A course corequisite indicates another course that must be taken concurrently (at the same time) with the desired course.

Prerequisites/corequisites that are listed in the college catalog include:

- Courses for which specific prerequisites/corequisites have been validated,
- Sequential coursework in a degree-applicable program, and
- Courses in which a prerequisite/corequisite is necessary for transfer to a four-year college.

Questions about prerequisites/corequisites are best resolved with a counselor or instructor prior to the first day of class. If students are attempting to meet a prerequisite/corequisite through the placement process, they may appeal (challenge) their placement results.

Advisories – A course advisory indicates that if students have the designated preparation or previous coursework, they are likely to perform better academically in the course or program in question because of that experience or preparation. Unlike prerequisites or

corequisites, advisories do not require that students have the suggested preparation; rather, it is strongly recommended.

Clearing a Prerequisite

If a student believes they have met a prerequisite at another institution, they can see a counselor for a prerequisite clearance. Students must provide evidence of meeting the prerequisite using documentation such as an academic transcript. Contact Counseling Center for details (562) 908-3410.

Prerequisite/Corequisite Challenge Procedure

All students have the right to challenge any prerequisite or corequisite. A prerequisite or corequisite challenge requires written documentation that should include an explanation of alternative coursework and/or background or abilities that adequately prepares the student for the course. A Prerequisite/Corequisite Challenge form can be obtained from the Counseling Department, division offices or at www.riohondo.edu under Academic divisions, Career & Technical Education, Counseling.

Reasons for challenging a prerequisite may include one or more of the following:

1. A prerequisite/corequisite is not reasonably available (must be made prior to the first week of the semester) or the student believes the prerequisite/corequisite is not valid or necessary for success in the course or which it is required, or
2. The student believes the prerequisite/corequisite is discriminatory or being applied in a discriminatory manner, or
3. The student has the documented knowledge or ability to succeed in the course without meeting the prerequisite/corequisite.

Upon filing the Prerequisite/Corequisite Challenge form, the student may enroll in the challenged class. If the challenge is not upheld, the student will be required to drop the class. The district will ensure that the challenge process is finished, and the student is notified in writing within five (5) working days. Students wishing to appeal this decision should contact the Dean of Instructional Operations.

Educational Costs

Enrollment Fee – Students who have established legal residence in California must pay the enrollment fee established under state law and subject to change without notice. These fees will be waived at the time of enrollment if the student can demonstrate he/she qualifies under the exempt criteria specified by the State of California. Out-of-state and international students must pay nonresident tuition fees of \$406.00 per unit for Fall/Spring terms and \$342.00 per unit for Summer term, plus the \$46.00 a unit fee as required under state law (fees subject to change).

College Services Fee – The Associated Students of Río Hondo College is funded through the college services fee. The fee is \$7.00 for day, evening, and off-campus students during the fall and spring semesters and \$4.00 for summer sessions. The fee is automatically assessed at the time of registration. A waiver form is available in the Admissions and Records Office.

GO RIO Fee – This fee was approved by the Associated Students of Río Hondo College to subsidize costs of the GO RIO

bus program. The fee is \$11.00 for Spring and Fall terms only. A waiver form is available in the Office of Government and Community Relations. Students must meet eligibility criteria to qualify for the GO RIO fee waiver.

Student Parking Fee – Under provision of Education Code 72247, a Student Parking Fee program has been established. This fee provides for the use of student parking lots, better traffic flow during peak hours, parking lot security, and use of the tram service.

The student vehicle parking fee for day and evening students during the Fall/Spring semesters is \$40.00. The fee for vehicle parking during Summer term session is \$20.00. Motorcycle parking is \$10.50 for Fall/Spring semesters; \$5.50 for Summer term session. There is a daily \$3.00 parking fee and a \$0.25 meter parking fee for 15 minutes, with a one hour maximum.

Per Río Hondo College Administrative Procedure (AP) 6750, all vehicles parked on campus must obtain a valid parking permit.

All vehicles must have a valid permit registered with [Rio Hondo \(thepermitstore.com\)](http://RioHondo.thepermitstore.com). To simplify the purchase and registration process, purchasing a permit and registering your vehicle is done online.

Once the online process is completed, your parking permit will be activated.

All information on the parking permit must be kept current. If you need to add or change any information, please update your information online at [Rio Hondo \(thepermitstore.com\)](http://RioHondo.thepermitstore.com). Only registered vehicles may use a permit.

Grace Period

Students have two weeks from the first day of classes to obtain their parking permit during Fall and Spring semesters, one week during Summer semester. During the first two weeks of the Fall and Spring semesters and one week during Summer semester, students may park only in student lots without a permit and will not be cited. After the grace period has expired, all students are expected to have their permits; any vehicles not registered with a valid semester permit may be cited.

PERMIT VALIDITY

- a. Semester parking permits are valid from the first day of instruction through the last day of the semester.
- b. Daily parking permits are valid for the day of purchase only.
- c. Parking permits are virtual, however daily passes can be purchased at parking lot flowbirds dispensers and parking booth if the online is not available.
- d. Per California Vehicle Code 21113, No overnight parking on District property.

Student Health Fee – Río Hondo College provides a health services program, as approved by the Board of Trustees, for students who formally register at Río Hondo College, are currently enrolled, and pay a \$23 health fee (\$20.00 for summer). Antibiotic medication and women's wellness laboratory tests are available for a nominal fee. Fee-exempted students include those who document religious reasons. A full refund will be made only if requested in writing prior to the semester refund deadline.

Student Representation Fee – This \$2.00 fee provides support for students or representatives who may be stating their

positions and viewpoints before city, county, and district government, and before offices and agencies of the state and federal government. Students may refuse to pay this fee on religious, political, or moral grounds by submitting a refusal in writing to the Office of Student Life and Leadership prior to registration.

Books – Students are required to purchase all books and supplies needed for their courses. Book costs will vary from semester to semester. Often purchasing used books can reduce this amount.

Scholarships

A variety of scholarships are available to Río Hondo College students. For more information, contact the Río Hondo College Foundation at (562) 908-3476 or go online to www.riohondo.edu/foundation to view scholarship opportunities.

Enrollment/Fees Refunds

Resident Students

Resident students who drop by 10% of the course will receive a refund. Refunds are automatic and do not require any paperwork to be submitted. Please check the Río Hondo web site, under the Admissions Important Dates and Deadlines, link for specific deadline dates. Any enrollment fee refund is subject to a once-per-semester service charge of \$10.00. Last day to drop with a

refund deadline may vary. Please visit the online Class Schedule and click on the course CRN for specific dates for each course.

Out-of-State/Nonresident Students

Nonresident students who drop by 10% of the course section will receive a refund. Refunds are automatic and do not require any paperwork to be submitted. Any enrollment fee refund request is subject to a once-persemester service charge of \$10.00. Last day to drop with a refund deadline may vary according to the course begin and end dates. See Important Dates and Deadlines on the Admissions and Records webpage for specific dates.

The nonresident student will receive a 50% refund of out-of-state fees if the request for a refund is received in Admissions and Records during the third or fourth week of the fall/spring semester or during the second week of the summer session. No refunds will be granted after the fourth week of the fall/spring semester or after the second week of the summer session. Please check the Admissions webpage under Fees & Refunds www.riohondo.edu/admissions/feerefunds/ for specific deadline dates.

In the event that law mandates other fees and law does not prescribe the refund policy, the refund of such fees shall be in the same manner as the refund of health, college services, and parking fees.

4 Support Services and Special Academic Programs

Academic Advisement

Assistance in developing an educational plan to obtain a certificate, degree, or to transfer to a university is available through contact with the counselor who advises in the student's major field or any general counselor in the Counseling Department.

All regular instructors maintain office hours each week to interact with students. Faculty members are valuable contacts in providing personal information related to a student's career or college choice.

Black Scholars Program

The Black Scholars Program (BSP) is a mentorship-based learning community for Black students at Rio Hondo College. BSP is committed to empowering Black students and helping them achieve their academic and career goals. We seek to cultivate a sense of belonging among Black students by building a community on campus, uplifting their voices, and removing barriers. BSP is here to help you throughout your academic journey! For more information, please visit us in LRC-130, or email us at blackscholars@riohondo.edu.

CalWORKs Program

The California Work Opportunity and Responsibility to Kids (CalWORKs) program helps student-parents that are CalWORKs recipients in the state of California. We are here to help students achieve their educational goals while preparing them to re-enter the workforce and become self-sufficient. The CalWORKs program provides the following free resources/services:

- Academic and career advising
- Assistance with county social services departments (Los Angeles, Orange, San Bernardino, Etc.) compliance and paperwork
- Assistance with purchasing books and school supplies
- Assistance with purchasing laptops, calculators, internet hotspots
- Childcare referrals for class and study time
- Job development and preparation
- Meal Vouchers for on-campus vendors
- Priority Registration status
- Transportation assistance
- Work study opportunities on and off campus

Students must be considered a CalWORKs recipient with their local county and be enrolled in any credit or non-credit courses at Rio Hondo College. For more information, please visit our office in the Student Services building, Room SS220, contact our office at (562) 463-7311, or visit our website at <http://www.riohondo.edu/calworks/>.

Center for Career &

Re-entry Services

Career Services

The mission of the Center for Career & Re-Entry Services (CCRS) is to assist individuals in making informed career and life decisions by providing a clear pathway through extensive career and educational counseling services, and engaging activities. The CCRS is also dedicated to helping adult learners succeed through the provision of comprehensive educational, counseling, and support services.

- Career & General Counseling
- Online counseling
- Career assessments and interpretation
- Services/resources for adult learners
- Career and job preparation
- Résumé and cover letter development
- Assistance with choosing or changing a major
- Access to job board

Re-entry Services

The CCRS offers resources to non-traditional/adult students (at least 23 years old) new to college or who are returning after a prolonged absence. Adult Re-Entry students receive the following additional support services:

- Counselors available to assist in navigating all Río Hondo College resources
- Individualized career counseling services including career-related workshops and information sessions specifically designed for Adult Re-Entry students
- Online counseling services that allow Adult Re-Entry students to experience a face-to-face counseling session in an online environment
- Assistance in creating an educational plan, schedule, and registering for classes
- Use of computer lab (with free printing)
- FREE career assessments and interpretations
- A monthly newsletter highlighting campus events
- Annual Adult Re-Entry Success Conference
- Access online job portal

For more information, visit the CCRS located in SS350, contact our staff at (562) 908-3407, or visit our website at <http://www.riohondo.edu/career-center/>.

Child Development Center/ Pre-School Laboratory

The Child Development Center/Pre-School Laboratory, accredited by the National Association for Education of Young Children (NAEYC), operates a high-quality early childhood program for preschool children between the ages of 2 and 5 years old and are not required to be toilet trained. The Center is supported by state and federal funds as well as parent fees. Enrollment is available for Río Hondo student parents, staff and faculty and the local community. Río Hondo student parents are the highest priority as they can receive wrap-around services and up to 90% free tuition for their preschool age children through the Federal Child Care Access Means Parents In School (CCAMPIS) grant. Eligibility for state-subsidized funding is determined by a combination of family size and income. Some families may pay fees based on a sliding scale. Hours of operation are 7:30 A.M. to 5:00 P.M., Monday through Friday. Holidays and breaks are observed in accordance with the RHC academic calendar. For more information, please call (562) 908-3494 or visit the Río Hondo website (click on www.riohondo.edu/cdc). Río Hondo College students from the Child Development/Education Department, the Behavioral and Social Science Division and Nursing utilize the Pre-School Laboratory to observe the development and behavior of pre-school children and to apply the knowledge that they gained in their courses working directly with children.

The program implements the California Preschool Learning Foundations and Curriculum Frameworks, which prepares children for Kindergarten and the child development field's agreed upon developmentally appropriate practices.

Teachers prepare the learning environment and plan activities to challenge each child's developing skills and understanding while focusing on their interests. Each child's entry skill level and developmental progress is tracked and documented utilizing the California Desired Results Developmental Profile (DRDP).

Computer Resources

Río Hondo offers computer access to students at various locations. Visit the Computer Resources web page for more information.

- Center for Career & Re-entry Services (SS350)
- Disabled Students Programs and Services (SS330)
- El Monte Educational Center
- Learning Assistance Center (LR118)
- Library (Learning Resource Center 2nd Floor)
- Math, Science, and Engineering Center (LR114)
- Río Hondo Educational Center at Pico Rivera
- Santa Fe Springs Regional Training Center
- South Whittier Educational Center
- Student Services Building (1st Floor)
- Student Success Center (LR101)
- Transfer Center (SS250)
- TRIO SSS Program (SS106)

Continuing, Contract & Noncredit Education

The Continuing Education mission is to enrich and support the lives of non-traditional college students by providing lifelong learning opportunities through many academic pathways. The high-quality instructional programs are a combination of fee-based and noncredit courses directly reflecting the needs of the community. The courses provide students with an opportunity for language acquisition, career advancement, college preparedness, and life enrichment through good health and personal fulfillment. While the College offers many of the same opportunities, the

Continuing Education department focuses on the personal and professional development of the diverse nontraditional students.

The Continuing Education department brings customized Professional Development business and short-term training to the community and local businesses. Training programs are designed to meet specific needs of the organization. Professional development courses and workshops are offered on campus, in the community, online, and are available to community members and employees of area businesses. Programs include computer applications, small business workshops, career development, supervision, international business, environmental technology, pharmacy technician, personal development and more. Contract Training can be conducted at a company site or at the college training facilities. Bilingual training programs are also provided.

For information, please refer to the Continuing Education Class Schedule, or our web page: <http://www.riohondo.edu/continuing-education/> or call (562) 463-4606.

Counseling

The Counseling Center provides support to Río Hondo students, faculty, and the campus community. Counselors strive to respect individuality, to encourage personal development and to foster a climate in which academic growth will occur. Therefore, counselors and students work together in establishing, clarifying, and pursuing personal, educational, and career goals.

The Counseling discipline offers courses (COUN 100, 101, 102, 103, 104, 105, and 151) which are designed to aid students in acquiring the skills, information, and personal awareness needed for college and career success.

Counselors can assist students with a variety of issues: program planning, choosing a major, graduation requirements, transfer requirements to 4-year colleges and universities, personal problems, scholarships and financial aid programs, tutoring referrals, and communication with a professor. Students should make an appointment well in advance of registration to meet with a counselor. More information is available on the Counseling web page or by calling (562) 908-3410. The Counseling Department is located in the Student Services Building, room SS160.

Disabled Students Programs & Services (DSPS)

Río Hondo College offers both classroom instruction and student support services for students with disabilities. Expert staff are available to students who need disability-related accommodations and support services. A variety of support services are available to eligible students with a disability. Students with a disability, including but not limited to students with a physical, learning or psychological disability, students with a visual impairment, acquired brain injury, Attention Deficit Hyperactivity Disorder (ADHD), an Autism Spectrum Disorder, or Intellectual Disability may be eligible for services.

Services include test-taking assistance, sign language interpreters and real-time captioners, Braille and non-Braille transcription services, and disability-related specialized counseling services. Other services include registration assistance, priority enrollment and a variety of assistive computer technologies which promote equal access to college instructional programs and activities for students with disabilities.

For complete information on our programs please contact Disabled Students Programs & Services at (562) 908-3420, via video phone at (562) 364-8433 or visit our web page. The DSPS office is located in the Student Services Building, Room SS330.

Distance Education: Online Courses

Río Hondo College offers a variety of online courses to support student learning and success. Our variety of online courses support students in fulfilling 27 general education, certificate, degree, and transfer requirements for the University of California, California State Universities, and other private universities. Río Hondo college uses the *Canvas* Learning Management system to deliver its online courses and has a team within the Office of Distance Education dedicated to supporting students taking online courses. In addition, the college has online registration, counseling, tutoring, and library support services available for anyone that needs assistance with enrolling into and taking online courses. Online courses are subject to the requirements that may be set by the Americans with Disabilities Act (42 U.S.C. §12100 et seq.) and section 508 of the Rehabilitation Act of 1973, as amended, (29 U.S.C. §794d). For more information about online course offerings, please see the Schedule of Classes. For general questions about taking online classes at Río Hondo College, visit the Office of Distance Education website, or call (562) 463-3218.

The Dreamers' Resource Center (DRC)

The Dreamers Resource Center (DRC) is committed to assisting undocumented student by creating a safe space on campus and providing educational support services. Through partnerships, the DRC offers legal referrals, and helps with applying to the CA Dream Act and submitting the CA Non-Resident Tuition Exemption form, among other services. In 2017, Río Hondo College introduced the UndocuScholars Program to further support undocumented students.

UndocuScholars Program

The UndocuScholars Program is a mentorship-based learning community for undocumented students at Río Hondo College. The program offers academic counseling, peer-to-peer mentorship, and additional resources to help students achieve their academic and career goals. We seek to cultivate a sense of belonging among undocumented students by uplifting their stories and removing barriers.

The DRC and UndocuScholars are here to help you throughout your academic journey! For more information, please visit us in LRC-105, or email us at dreamers@riohondo.edu.

Educational Talent Search Program (ETS)

ETS prepares eligible high school students attending El Rancho, Whittier and Pioneer High Schools to be able to apply and attend college. The program provides:

- Educational counseling and advisement
- College and financial aid application assistance
- Tutoring
- College Tours and STEM Field Trips
- Academic Enrichment Workshops
- Dual Enrollment Student Support Services

Extended Opportunity Programs & Services (EOP&S/CARE)

Extended Opportunity Programs & Services is a state funded program that provides "over and above" services to students from economically and educationally disadvantaged backgrounds. The program supports the enrollment, retention, and transfer of students and helps facilitate the successful completion of their educational goals. EOP&S services include:

- Counseling Services/Educational Planning

- Priority Registration
- Academic Probation Interventions
- Textbook Services
- Educational Supplies
- Cap & Gown for Graduates
- Meal Vouchers

Cooperative Agencies Resources for Education (CARE): is a supplemental component of (EOP&S) that specifically assists students who are single head of households with children, by offering supportive services so they can acquire the education, training and marketable skills needed to transition from welfare-dependency to employment and eventual self-sufficiency for their families. In addition to EOP&S services, CARE students may also receive:

- Motivational & informational Workshops
- CARE Grants
- Meal Vouchers
- Gas Cards
- Agency & County Referrals
- Single Parent Conferences
- Case Management and Advocacy
- Family Holiday Events

To find out how to qualify for EOP&S/CARE or to get more information, please contact our office at (562) 908-3423 or come visit us in the Student Services Building, room SS240 or visit our website: www.riohondo.edu/eops

Financial Aid Services

Río Hondo College participates in a variety of Federal and State financial aid programs. These programs are designed to assist students with tuition, fees, books, supplies, transportation and room and board.

Most financial aid programs require a student to be enrolled at least half-time in a financial aid eligible degree, certificate, or transfer program. Federal aid eligibility is also limited to students who are U.S. citizens, permanent residents, or other eligible non-citizens. Additional eligibility requirements apply to each program and may be obtained from the Financial Aid Office.

To apply, students must complete a Free Application for Federal Student Aid (FAFSA) at <https://studentaid.gov> or a California Dream Act Application at <https://dream.csac.ca.gov>. The Río Hondo College Federal School Code is 001269. The priority deadline to apply is March 2 to be eligible for all available aid. However, you may still apply after March 2, although funding may be limited. Visit the Financial Aid Office for further information located in the Student Services Building, room SS130 or visit the Financial Aid web page at <https://www.riohondo.edu/financial-aid/>.

Federal Financial Aid Programs

The federal government offers a variety of financial aid programs for students.

Federal Pell Grant - This grant is available to all eligible applicants.

Federal Supplemental Educational Opportunity Grant (FSEOG) – A limited number of grants are available. Priority is given to students who apply by the priority deadline, have Federal Pell Grant eligibility, and exceptional financial need.

Federal Work Study - Provides part-time jobs to students with financial need. Students generally work up to 20 hours per week and must be enrolled in at least 6 units.

Federal Direct Loan Program (FDLP) - Students may apply for a Subsidized or Unsubsidized loan from the federal government. Loan workshops, Loan Entrance Counseling, and a loan application are required for all students applying for a student loan. Students must be enrolled in at least 6 units. Federal student loans must be repaid with interest.

Return to Title IV Funds

In accordance with the Federal Regulations HEA, Section 4848, 34 CFR 668.22, Rio Hondo College will apply a refund policy to all eligible students under the Return to Title IV funds requirements. Students who receive federal financial aid and withdraw from classes prior to completing at least 60% of the semester will have their financial aid eligibility recalculated and may have to repay any "unearned" portion of financial aid received.

Loans (Emergency Loans from ASRHC)

The Associated Students of RHC offer a 60-day, interest-free loan to students to assist them in emergency situations and for the purpose of buying books and supplies. Students who have no outstanding debt to the college, are enrolled in a minimum of 6 units, have a GPA of 2.0 or above, paid the College Service Fee for the current semester, and no academic, disciplinary, or progress probation may apply at the Student Life & Leadership Department in the Student Union, during the first 2 weeks of the fall and spring semesters only. Loans are on a first-come, first-served basis.

Scholarships (Institutional Financial Aid Programs)

There are numerous scholarships available to Rio Hondo College students. These scholarships are funded and sponsored by a variety of on and off campus resources. To view or apply for available scholarships please visit: www.riohondo.edu/scholarships/

State Financial Aid Programs

The State of California offers a variety of grants for students. The California Dream Act of 2011 is the result of two assembly bills (AB130 and AB131). Together these bills allow undocumented and documented students who meet certain provisions of AB540 law to apply for and receive private scholarships funneled through public universities, state administered financial aid, university grants and community college fee waivers. To apply, students must complete a free California Dream Act application with the California Student Aid Commission each year by March 2nd for priority filing.

Cal Grants – The California Student Aid Commission awards Cal grants. Students must be legal residents of California and have financial need or qualify for AB540 status. To be considered, students must complete a Free Application for Federal Student Aid (FAFSA) at www.studentaid.gov or California Dream Act Application at www.csac.ca.gov and submit a GPA Verification form by the March 2 deadline. (September 2 is an additional deadline for FAFSA filers attending California Community Colleges only.)

- **Cal Grant A** - If awarded, the award will be held in reserve up to two academic years until the student transfers to a tuition charging institution, unless the student qualifies for the Student with Dependent Children Access Award or Foster Youth Access Award.
- **Cal Grant B** - This grant helps students with living expenses, books, supplies, transportation and other non-direct educational expenses.

- **Cal Grant C** - Assists with the cost of a technical or career education. Provides assistance for books, tools and equipment.
- **Student Success Completion Grant (SSCG)** - The Student Success Completion Grant (SSCG) is a financial aid program for Cal Grant B and C recipients attending a California Community College full-time (12 units or more). The purpose of the Student Success Completion Grant is to provide students with additional financial aid to help offset the total cost of community college attendance, and to encourage full-time attendance and successful on-time completion. On top of the Cal Grant B or C award paid at community colleges, the Student Success Completion Grant pays full-time Cal Grant B or C recipients \$1,298 per semester (a maximum of \$2,596 annually) for eligible students who enroll and attend 12 through 14.99 units per term and \$4,000 per semester (a maximum of \$8,000 annually) for eligible students who enroll and attend 15 units or more per term and be enrolled in 30 units per aid year. Senate Bill 117 – Higher Education Trailer Bill (2023-24) updated California Education Code (CEC) §88931 and increased the SSCG award amount for current and former foster youth as defined in CEC § 69433.6. Effective for the Fall 2023 term, former foster youth, who enroll in 12 or more units and meet all other eligibility requirements (see below) are eligible for \$5,250 per semester. To be eligible for the Student Success Completion Grant (SSCG), a student must: be a Cal Grant B or C recipient; be enrolled full-time (12 units or more); be meeting Satisfactory Academic Progress (SAP) standards and; have unmet need to receive the SSCG.
- **California College Promise Grant** (formerly known as the Board of Governors Fee Waiver) - Offers two years free tuition to eligible first-year college students who are California residents, permanent residents or qualify for the California Dream Act. Eligible students must complete either the Free Application for Federal Student Aid (FAFSA) or the California Dream Act Application.

Loss of Eligibility for California College Promise Grant

A student shall become ineligible for a California College Promise Grant if the student is placed on academic or progress probation, or any combination thereof, for two consecutive primary terms.

Loss of California College Promise Grant eligibility shall become effective at the first registration opportunity after such determination is made. Foster Youth shall not be subject to loss of eligibility due to placement on academic or progress probation. This exemption for Foster Youth is effective until the date specified in Education Code section 66025.9(c).

Appeal Loss of Board of California College Promise Grant

A student may appeal the loss of a California College Promise Grant due to extenuating circumstances or where a student with a disability applied for but did not receive a reasonable accommodation in a timely manner. Extenuating circumstances are verified cases of accidents, illnesses, or other circumstances that might include documented changes in the student's economic situation or evidence the student was unable to obtain essential student support services. Extenuating circumstances also includes special consideration of the specific factors associated with Veterans, CalWORKs, EOPS, and DSPS student status. Additionally, a student may appeal to regain California College Promise Grant eligibility by demonstrating significant academic improvement (i.e., minimum 2.0 GPA and completing more than 50% of attempted units) or by sitting out for two consecutive primary terms.

Satisfactory Academic Progress Policy (SAP)

The federal government mandates aid recipients to make satisfactory academic progress (SAP) towards a degree or certificate to maintain financial aid eligibility. To determine continued eligibility, the Financial Aid Office reviews each student's academic progress at the end of every semester, including summer.

Satisfactory Academic Progress is evaluated in three areas:

1. **Grade Point Average Requirement** - Student's pursuing a course of study leading to an A.A degree, A.S degree, Baccalaureate degree, certificate, or transfer program must maintain at least a 2.00 cumulative GPA average.
2. **Unit Requirement/Pace of Progression** - Students are required to successfully complete a minimum of 67% of units attempted each semester. Classes with grades of A, B, C, D, or P are considered units successfully completed. Classes with grades of F, I, NP, IP, W, or EW will count as attempted units, but not as successfully completed units.
3. **Maximum Time Frame Requirement** - Students enrolled in a degree or certificate program may receive financial aid for a maximum of 150% of the length of that program. Degree programs at Río Hondo College typically require a 60 unit length for completion. Thus, students may receive financial aid for up to 105 attempted units (70 units x 150% = 105 units). Students pursuing a Baccalaureate degree from Río Hondo College may receive financial aid for up to 180 attempted units. Once unit maximum is reached, students are ineligible to receive further financial aid. Grades of F, I, NP, IP, W, or EW are considered attempted units and included in Maximum Time Frame unit calculation.

Students not meeting any of the minimum SAP requirements outlined above will be placed on financial aid warning for one academic semester with the exception of students who drop or fail all their courses their first semester enrolled. Those students will be placed on automatic suspension (students exceeding maximum time frame are not placed on financial aid warning). Students on financial aid warning may continue to receive financial aid during this period.

Students not meeting minimum SAP requirements for two consecutive semesters will be suspended from receiving financial aid (federal and state, with the exception of the California College Promise Grant). Any financial aid awarded when a student becomes ineligible will be withdrawn.

Satisfactory Academic Progress Appeals

Students suspended from receiving financial aid can regain financial aid eligibility by meeting minimum SAP requirements (2.0 GPA, completing 67% of attempted units, not exceed 105 units).

SAP appeals are reviewed by the SAP Appeals Committee, for approval or denial, based upon the student's individual circumstances. The remaining ineligible students must submit a SAP appeal. For more information about the sap appeal process visit <https://www.riohondo.edu/financial-aid/sap-appeal-process/>

Gainful Employment

The final program integrity regulations published in the Federal Register on October 31, 2014, and a correction published in the Federal Register on December 4, 2014 [79 FR 64890 and 79 FR 71957] require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective and current students certain information about the institution's Gainful Employment (GE) Programs. The information

disclosed includes but is not limited to, total costs (tuition/fees as well as books and supplies), completion rates, graduate earnings, and debt and repayment rates.

Generally, GE Programs include:

- At public and private not-for-profit institutions: Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- At for-profit institutions: All Title-IV eligible instructional programs, degree and non-degree.

Gainful Employment Disclosures are currently available for the following Río Hondo College programs:

Accounting
Business Marketing
Child Development
Civil Design & Drawing
Civil Design Technology Program
Computer Information Technology: Computer Systems
Electronics Technology
Engineering Design Drafting Technician
Environmental Technology
Fire Technology
Geographic Information Systems
Heat & Frost Insulating
International Business
Logistics Management
Retail Management
Small Business Management
Vocational Nursing Program

Honors Transfer Program

Río Hondo's College Honors Transfer Program is designed to challenge, enrich and prepare academically talented and highly motivated community college students seeking transfer to a four-year university. The curriculum emphasizes critical thinking, research synthesis and college-level writing proficiency. In addition, the program is designed to create a community of like-minded scholars and promotes opportunities for student engagement beyond the classroom experience.

Río Hondo College has honors transfer admission agreements with UCLA, UC Irvine, and many other public and private universities. To fulfill the Honors Transfer Program requirements, students must successfully complete five honors courses, achieve at least a 3.2 grade point average for all transferable college courses taken, complete the required general education courses as well as prerequisite work for their major. In addition, honors students must meet with the honors counselor a minimum of once per semester. For more information about the program, visit the Honors Transfer Program website <http://www.riohondo.edu/honors/>.

Hope Scholars

HOPE Scholars is a program, funded by the Dept of Education, that supports unhoused and transitionally homeless students. Students are eligible for services under AB 801. Additionally, Hope provides specialized counseling, case management, mentoring, educational workshops, and support with textbook and educational supplies. For more information, visit the Hope Scholars web page: <https://www.riohondo.edu/student-life/scholars-hub/hope-scholars/>

Labs

Labs provide an environment for students to practice and develop their skills in a variety of courses and often with the assistance of Instructors, Instructional Assistants, or Tutors.

Math, Science, and Engineering Center (MSEC)

The Math, Science, and Engineering Center, located in the Learning Resource Center (LRC) building, room LR114, provides computers, mathematics interactive software, and multi-media study aids. An assigned instructor, instructional assistants, and tutors are available to assist students. Hours are listed on the MSC web page: www.riohondo.edu/mathematics-and-sciences/math-science-center.

Nursing Simulation Center

The Simulation Center is a "safe" place for students to practice their skills in a simulated hospital environment. It was created in order to support and supplement the clinical component of the nursing program. With the use of high-fidelity patient simulators and clinical scenarios, students are able to practice and experience situations that might not arise in the clinical setting, thus adding to their clinical expertise. The Simulation Center uses the following types of simulators: 2 adult, 1 birthing, 1 newborn and 1 pediatric, thus offering learning activities covering the full nursing curricula. Our Center is located in S 103. For more information, visit the Health Science & Nursing web page.

Pre-School Laboratory

Río Hondo Students from the Child Development/ Education Department, the Behavioral and Social Science Division and Nursing Department utilize the Pre-school Laboratory to observe the development and behavior of pre-school children to apply the knowledge that they gained in their courses working directly with children. To schedule an observation appointment call 562-908-3494.

Writing Center

The Writing Center is located on the first floor of the Learning Resource Center in LR124. It is available for students enrolled in English composition courses. Students should check their class schedule for their registered lab day and time.

Writers' Resource Center

The WRC is located in LR118 and is open to any Río Hondo student who needs instructional assistance in English. Activities include specialized English tutoring, workshops, and one-on-one writing assistance from an English instructor for any subject.

LEGACIE+

The Latinos Empowered and Cultivated in Education (LEGACIE+) is a Male Success Initiative for traditional and non-traditional students who identify as Latino, other Men of Color (MOC), or those who self-identify as men. Students who join LEGACIE+ will benefit from counselor support, transfer assistance, mentorship, networking opportunities, field trips, and conferences. For more information, please visit us in LRC-101, or email us at: LegacieScholars@riohondo.edu.

Library

Río Hondo College Library is the research center of the College. Occupying the second floor of the Learning Resource Center (LRC), the library offers a full range of print and electronic books, print and electronic periodicals, online databases, and streaming videos in support of the curriculum, as well as for general enrichment. Computer workstations, ADA-compliant computers, wireless access, charging stations for mobile devices, circulating laptops, graphing calculators, a limited number of mobile hotspots, and a self-service copy/print center are also available.

Individual study carrels, group tables, and informal seating areas allow for quiet study. For students who prefer to work together on class assignments, there are seven, AV-enabled group study rooms that can be reserved for two hours at a time.

Circulation Services

The Circulation Desk at the entrance to the Library serves as the first point of student service. Library staff help:

- Activate your RHC Library privileges.
- Check out books, technology equipment (e.g., Chromebooks and laptops, mobile hotspots, graphing calculators, headphones), and select high-demand course textbooks.
- Loan audiovisual equipment to faculty and staff, and fill requests for campus signage.

Reference Services

Because of the ever-expanding variety and range of information, students today must learn the critical thinking and information literacy skills required to use research resources appropriately. Librarian faculty at the Reference Desk teach these skills through:

- Individualized assistance with research queries
- Extended consultation by appointment with students and faculty
- Instruction in conducting effective research, in collaboration with teaching faculty on campus and at the educational centers
- Drop-in research workshops

For more information about RHC Library services, including the online catalog and research guides, please contact a reference librarian at (562) 908-3484 or connect with a librarian via text, chat, or Zoom on the Library's website at: www.riohondo.edu/library.

Math Engineering Science Achievement (MESA) and TRIO Student Support Services STEM

The MESA Community College and TRIO SSS STEM Programs support students who plan to graduate from Río Hondo College with an Associate's degree and/or transfer to four-year institutions in science, technology, engineering, and mathematics (STEM).

Program Objectives:

- Increase college retention and transfer rates to four-year institutions for STEM majors.
- Increase the number of low income and first generation students who graduate with degrees in STEM majors.
- Provide academic and personal support for STEM majors

Program Components

- MESA Center for tutoring and group study in S205
- Academic Excellence Workshops designed to reinforce concepts and topics learned in chemistry, mathematics, and physics courses
- Academic advisement and educational plans through transfer
- Assistance with study skills and time management
- Support with application and transfer to four-year institutions
- Exposure to information about internships, research opportunities, and other enrichment programs
- Information about financial aid, scholarships, and money management
- Mentoring with peers, professors, and professionals

- Leadership training
- Professional and academic conferences
- Networking opportunities
- Career information
- MESA Counselor

For complete program information about the MESA|TRIO SSS STEM Programs, please contact us in room S205 (562)-463-3221 or visit www.riohondo.edu/mesa. Program eligibility requirements apply.

NextUp/Guardian Scholars Program (GSP)

NextUp/Guardian Scholars Program (GSP) provides holistic support services that meet the unique personal and academic needs of former foster youth* at Rio Hondo College to successfully transition into adulthood, obtain a degree/certificate and/or transfer to a four-year university.

* Students who have experienced the foster care system at any age or length of time

The NextUp/Guardian Scholars Program provides the following services to eligible students:

- Priority Registration
- Counseling Services/Educational Planning
- Case Management & Advocacy
- Textbook & Emergency Funding
- Educational Supplies
- Laptop & Calculator Loans
- Academic/Life Skills Workshops/Social and Community Events/Field Trips
- On Campus Meal Vouchers
- Cap & Gown with Stole for Graduates
- Partnerships with County ILP Services/Transitional Coordinators
- Referrals to on and off campus resources
- Access to Computer & Printer on Campus

NextUp Requirements:

- Current or former foster youth in California whose dependency was established or continued by the court on or after the student's 13th birthday.
- Be younger than 26 years of age at the beginning of the academic school year.

For more information, please visit the NextUp/Guardian Scholars Program office located in the Student Services Building, room SS307 or call (562) 908-3435. <https://www.riohondo.edu/guardian-scholars/>

Orientation

Orientation familiarizes and acquaints students with important college policies and expectations, as well as the range of services and programs available. The "My Online Orientation" is available via the AccessRio portal. The completion of Orientation is mandatory for all New Students. In compliance with SSI statewide regulations, New Students who do not complete an Online or In-person Orientation may have a hold placed on their registration. New and Continuing Students may access their "My Online Orientation" by logging onto AccessRio.>> Click on the My Online Orientation button.

Pathway to Law School

Rio Hondo College Pathway to Law School, in partnership with California LAW Pathways, is for underrepresented college students interested in pursuing a career in law. This program works with California Community Colleges and various law schools in the state to help students achieve their goals. Students can major in any subject while also achieving their California LAW Pathways Certificate. The program offers the following services and resources:

- Individualized academic counseling
- Field trips and workshops hosted by various law schools
- Networking and learning opportunities with attorneys, lawyers, and judges
- Mentorship program and internship opportunities
- Membership to the Rio Hondo College Pre-Law Society
- Priority admissions review at participating law schools
- Law school application fee waivers

Please visit the Pathway to Law School web page for more information: www.riohondo.edu/law-school/.

Pride Scholars

Pride Scholars is a safe space for LGBTQIA+ identifying students to seek assistance in accomplishing their academic and personal goals by receiving assistance without judgement to these identities. Students have specialized counseling, mentoring, and social and cultural events. For more information, visit the Pride Scholars in A 119.

Puente Project

The Puente Project is a national-award winning program that has helped tens of thousands of educationally underrepresented students to enroll in four-year colleges and universities, earn degrees, and return to the community as leaders and mentors to future generations. Puente is a one-year program that combines instruction in English, intensive academic counseling, and mentoring. For more information, visit the Puente web page <http://www.riohondo.edu/puente/>.

Río Hondo College Promise (RHCP)

The Río Hondo College Promise program is an all-encompassing initiative designed to foster student success, elevate college enrollment, and enhance completion rates among community college students. By providing comprehensive support, the program aims to ensure that students not only enter college but also thrive throughout their academic journey.

One of the significant benefits of the Rio Hondo College Promise Program is the opportunity for eligible students to receive up to two years of free tuition for the fall and spring semesters. To be considered for the tuition assistance, students must be enrolled in 12 units, unless they are part of DSPS. This financial support aims to alleviate the burden of tuition fees, enabling students to focus on their studies and achieve their educational goals.

The funding for the Rio Hondo College Promise Program is made possible through a combination of state, federal, and local funding resources. For further details and inquiries about the Rio Hondo College Promise Program, we encourage you to reach out to the Student Success Center at 562-463-6650. You can also visit the program's official website: <https://www.riohondo.edu/riopromise/> for more comprehensive information.

RíoSource Room

The RíoSource Room provides a centralized support service for students facing basic needs insecurities. This is accomplished through access to on and off campus resources, community collaborations, and advocacy that ensures a student's educational success. As a proud partner with the LA Food Bank, students can shop for groceries, stop in for a meal or snack, and receive support with CalFresh. Students facing housing insecurity can also meet with staff or housing peer navigator to be referred to housing providers. The RíoSource Room is located in Student Services, room SS305.

RISE Scholars

The RISE Scholars Program (RISE) is an educational justice learning community for students that have been previously incarcerated, detained as youth, or directly impacted by the justice-carceral system. RISE is committed to educating and empowering formerly incarcerated students and helping them achieve their academic and career goals. We seek to cultivate a sense of belonging among RISE students by providing intentional and meaningful support, uplifting their voices, and removing barriers. RISE is here to help you throughout your academic journey! For more information, please visit us in LRC 130, or email us at risescholars@rioehondo.edu.

Student Health and Psychological Services

Student Health and Psychological Services helps keep students physically and emotionally healthy so they can perform at their best. Professionals available include a physician, a psychologist, psychology interns, nurses, EMTs, and clerical support staff. The licensed professionals evaluate and treat minor, temporary physical and emotional conditions that require short-term care. If more intensive treatment is needed, referrals to outside resources are provided.

Health Services include:

- First Aid care for accidents and other emergencies
- Appointments with a Registered Nurse
- TB Tests
- Flu Shots
- Pregnancy Tests
- Vision Test
- Hearing Tests
- Sick room available if needed
- Over-the-counter medications for minor illnesses available in the vending machine for a nominal fee. Located on the 2nd floor, SS bldg.
- Blood pressure checks, height and weight measurement
- Blood Tests
- HIV Testing
- Resources, assessments, and referrals to low cost services in the community

Psychological Services include:

Short-term counseling for students who are struggling with issues such as family and social relationships, romantic relationships, life transitions, identity, grief, stress, trauma, anxiety, or depression. The following confidential services are available to students who are experiencing personal problems:

- Individual Counseling
- Group Counseling
- Crisis Intervention
- Stress Management

- Consultations and referrals

Student Health and Psychological Services is located in the Student Services Building, room SS230.

For more information, visit the Student Health and Psychological Services web page at www.rioehondo.edu/student-healthservices.

Student Success Center

The Student Success Center is a place to enhance the academic success of all students at Río Hondo College through a network of remote and in-person student support services. Students can meet with Counselors and Success Coaches to receive the following services:

- Development of Educational Plan
- Assistance with navigating ACCESSRIO
- Class registration assistance
- Financial Aid application assistance
- Rio Promise support
- Assistance navigating Canvas
- Workshops related to academic and personal growth

The center is located in room LR101, inside the Learning Resource Center. For more information, please call us at 562-463-6650 or visit <https://www.rioehondo.edu/ssdc/>.

Study Abroad

Students study in London, England and, during the spring, in Spain. Students enroll in classes, receive transferable general education units and can apply for financial aid and scholarships to help with the costs. Program courses and activities are geared toward taking advantage of the international location, and students gain invaluable multicultural experience by living and learning outside of the United States. For more information, visit the Study Abroad web page at <http://www.rioehondo.edu/study-abroad/>.

Transfer Center

The Transfer Center was established to strengthen the transfer function and to increase the number of Río Hondo College students prepared for transfer to baccalaureate level institutions through the coordination of the college transfer efforts. Further, the Transfer Center incorporates the identification, development, and implementation of strategies designed to enhance the transfer of diverse population including, low-income, disabled, and first-generation college students.

The Transfer Center provides up-to-date information about transferring to public, private colleges and out-of-state universities. The Transfer Center assists students, counseling faculty and staff, with the transfer process of as well as coordinates various activities, resources, and services that support the transfer process. For more information visit the Transfer Center in the Student Services Building, room SS250, call (562) 463-4619 or visit the Transfer Center web page for remote options.

TRIO Pre-College Programs

The TRIO Pre-College Programs (Educational Talent Search & Upward Bound) services first-generation and/or low-income high school students in the El Monte, Whittier and Pico Rivera service areas. The programs are federally funded grants that are administered and implemented by the United States Department of Education. Our goal is to empower and create a college going

culture by providing on site student support services at the target high schools.

The TRIO Pre-College Programs are located at the Río Hondo College: El Monte Educational Center, 3017 Tyler Ave., El Monte, CA 91731. For more information, please call (626) 443-8932.

TRIO Student Support Services Program

The TRIO Student Support Services (SSS) Program serves first-generation, low-income and/or students with disabilities. Our goal is to serve and empower TRIO SSS participants as they journey toward their goal of graduating and/or earning a certificate and/or transferring to a four-year university. As part of the TRIO SSS Program, participants receive:

- Educational counseling and advisement
- Priority Registration
- Student Success Workshops
- Transfer Counseling and Campus Visits
- Financial and Economic Literacy Workshops
- FAFSA Assistance
- TRIO Lab use with free printing

The TRIO SSS Program is located in the Student Services Building, Room SS 140. For more information, please call (562) 908-3473.

Tutoring Support

Tutoring services are available free to Río Hondo College students at three locations on campus, the Learning Assistance Center, the Writers' Resource Center, and the Math, Science and Engineering Center. Tutoring is also available to students enrolled in specialized programs. For more information, visit the Tutoring web page www.riohondo.edu/tutoring/.

Learning Assistance Center (LAC)

The Learning Assistance Center provides one-to-one tutoring, organized study groups, and workshops to assist students in reviewing and reinforcing course-related concepts through a variety of instructional aids and materials. LAC services are available to all Río Hondo College students at no charge. Students may schedule tutoring appointments or study group sessions at the LAC desk in Room LR118 in the Learning Resource Center. Hours are listed on the LAC web page.

Math, Science, and Engineering Center (MSEC)

The Math, Science, and Engineering Center, located in room LR114 in the Learning Resource Center, provides free math and sciences tutoring for all Río Hondo College students. Other resources available to MSEC students include computers, interactive math software, and multimedia study aids. An assigned instructor, instructional assistants, and tutors are available to assist students. Hours are listed each semester on the MSEC web page: <https://www.riohondo.edu/mathematics-and-sciences/math-science-center/>.

Writers' Resource Center (WRC)

The Writers' Resource Center is located in LR118 of the Learning Resource Center and is open to any Río Hondo student who needs instructional assistance in English. Activities include specialized English tutoring, workshops, and one-on-one writing assistance from an English instructor for any subject. For more information, visit the WRC website: <https://www.riohondo.edu/communications-and-languages/writers-resource-center/>.

Upward Bound Program (UB)

UB prepares eligible high school students attending El Monte, South El Monte and Mountain View High Schools to be able to apply and attend college. The program provides:

- Educational counseling and advisement
- College and financial aid application assistance
- Tutoring
- College Tours and Cultural Field Trips
- Academic & Student Success Enrichment Workshops
- Dual Enrollment Student Support Services
- 6 - week summer program focused on academic enrichment and Dual Enrollment

Veterans Services

Veterans and Veteran Dependents are encouraged to take advantage of the counseling services and educational programs offered by Río Hondo College. The Veterans Service Center (VSC) is a one-stop center that offers veteran's counseling, certifications, financial aid advising, tutoring, and other valuable resources. Río Hondo College cooperates with the Veterans Administration and with the California State Bureau of Vocational Rehabilitation in helping veterans and their dependents to obtain the education necessary to realize their academic and vocational goals. Río Hondo College has been approved for the training of veterans and eligible dependents. Veterans and dependents are required to comply with Veteran Regulations Sections 21.4135, 21.4235 and 21.4277 in regard to required attendance and progress that the student-veteran or dependent must meet in order to receive educational benefits under Title 38, United States Code.

The Veterans Administration requires all entering students to be formally evaluated in writing for possible award of credit for previous training and experience. This applies to all students, full-time and part-time, degree and nondegree candidates. To prevent possible future interruption of educational benefits, it is essential that an official copy of all previous coursework (college or service) be on file at Río Hondo College Admissions & Records office and in the Río Hondo College Veterans Service Center located on the first floor of the Student Services Building.

Satisfactory academic progress of veterans or eligible dependents is measured by the successful completion of the number of units enrolled. Non-punitive grades (W NP or NC) are not considered making satisfactory progress. Benefits will be retroactively terminated effective the first day of the semester for any non-punitive grade received. If the veteran submits to the VA mitigating circumstances, overpayments may or may not be waived. Should a veteran fail to make satisfactory progress for two semesters, cumulative GPA of 2.0 or better, benefits will be terminated. The veteran must contact the RHC Veterans Service Center to set up an appointment for his/her case to be reviewed by a Veterans counselor. The Veterans counselor will recommend a suitable course of study. Upon satisfactory completion of one semester of approved courses, where the cumulative GPA reaches a minimum of a 2.0, benefits will be reinstated.

The veteran or dependent has the responsibility to adhere to these standards of attendance and progress and to notify the Río Hondo College Veterans Service Center of any change in status that would affect the collecting of veteran's benefits. Monthly attendance reporting is required of veterans and dependents.

Additions, drops, withdrawals and last day of attendance MUST BE REPORTED AT ONCE.

Please visit the Río Hondo College Veterans Service Center, in the Student Services Building, Rm SS150 for details and application forms. Information is also available on the Río Hondo College Veterans Service Center web page.

Weekend College

The Weekend College is designed for working adults who wish to take classes towards a degree, transfer, or personal enrichment

and improvement. Friday, Saturday, and occasional Sunday classes are scheduled each semester. Refer to the online Class Schedule for further information.

The Evening and Weekend College Office is located in the Administration Building, room A117 and by phone at (562) 908-3437.

5 Student Life & Leadership

How to Get Involved In Campus Activities

Getting involved in activities at the college enriches the college experience for students. Río Hondo College has a variety of ways in which a student may get involved, including student government, athletics, and clubs.

Student Government

The Associated Students of Río Hondo College (ASRHC) is a self-sustaining student government organization. The ASRHC officers serve as student representatives at campuswide committees, impacting decision-making that will ultimately enhance the student experience at RHC.

Student Clubs

Students may pursue a special interest through participation in one of the campus clubs or organizations. Those who choose to participate in this aspect of college life may derive valuable social and educational experiences. Each club has individual service projects and traditions, and is sponsored by one or more members of the permanent faculty or staff. Contact the Student Life & Leadership Department at (562) 908-3427 for more information.

ASRHC Sponsored Events

The Associated Students of Río Hondo College sponsors a variety of activities that fall within the Student Life and Leadership Guiding Values: Student Success and Degree Completion, Cultural Diversity, Social Responsibility, and Leadership Development. The ASRHC collaborates with various campus departments and clubs to ensure that events and activities reach all students across campus.

Student Leadership Institute

The Student Leadership Institute (SLI) at Río Hondo College is a leadership program where students who participate acquire and develop the skills and awareness necessary to become an effective leader on campus, in the community, and in their future career. They learn the value of networking, gain effective communication skills, enhance their confidence, define their leadership style, and engage in co-curricular activities that augment their academic learning. Students who successfully complete the program earn a leadership certificate, a very marketable tool on a resume and on transfer applications. Contact the Student Life & Leadership Department at (562) 908-3427 for more information.

College Services Fee

When a student enrolls in the college they pay a college service fee. This fee entitles students to the following:

- ASRHC Emergency Loans
- Access to the Library Textbook Reserve
- Free photo I.D. Card for first I.D. only. (Additional or replacement I.D.'s cost \$5.00 each.)
- Various campus activities and events

- Free admission to some athletic events and theatre productions
- Discount tickets to AMC Theaters, some amusement parks and more!
- Membership in campus clubs and organizations
- Opportunities to be elected to student senate.

Student Media

El Paisano Media (EPM) provides students with training and filming opportunities in mass communications, media, journalism, broadcast, television, radio, print media, digital media, including social media, public relations and film with theory and hands-on production skills. EPM consists of its print and digital publications El Paisano Newspaper and La Cima Magazine, El Paisano TV, broadcasting/podcasting, and its film component. El Paisano newspaper is a weekly student-produced award-winning publication that has attained Congressional recognition for its excellence in print, digital, radio, and television broadcast journalism. La Cima is the college's magazine that is produced every summer. Students interested can view student work at the following feeds:

Website: www.elpaisanoonline.com

Instagram: @elpaimedia

Twitter: @elpaisanonews

Tik Tok: @elpaimedia

YouTube: @elpaisanobroadcast

Spotify: @elpaisanomedianetwork

Don't hesitate to get in touch with us at:

elpaisano@riohondo.edu

Athletics – Men's & Women's Intercollegiate Sports

Río Hondo College is a member of an athletic conference formed by the California Community College Athletic Association (CCCCAA).

Conference competition is scheduled in the following sports for men: baseball, basketball, water polo, swimming and diving, soccer and wrestling; and for women: soccer, softball, basketball, beach volleyball, volleyball, tennis, water polo, and swimming and diving.

Male or female students who wish to become members of a team should check the class schedule online at: www.riohondo.edu for the current offerings for both men and women's intercollegiate athletic teams; contact the coach of that team in the Athletic Department for details; and enroll in that class during registration. Prior to registration, students should see the Athletic Academic Counselor. Appointments can be made by contacting the Athletic Department at (562) 908-3409. Additional information is also available on the Athletics web page.

Athletic Eligibility for California Community College Intercollegiate Teams

Male and female students may represent the college in athletic contests upon verification of their status as amateur athletes in the sports in which they wish to compete. In order to be eligible to participate, a student athlete **MUST** be continuously/actively be enrolled in a minimum of 12 units at his/her community college during the competition in the sport. Of the 12 units, 9 must be in academic subjects, and 3 units may be Kinesiology activity courses.

Current Returning Student Athletes:

To be eligible for the second season of a sport, the student athlete **MUST COMPLETE and PASS 24 SEMESTER UNITS AT A MINIMUM GPA OF 2.0 BETWEEN SEASONS OF COMPETITION.** Of these units, 18 must be in academic classes and 6 units may be Kinesiology activity courses. These units must be completed **PRIOR** to the beginning of the semester of the second season of sport. Units completed and passed during the first season of sport shall be included in the calculation of the 24-semester unit requirement.

Entering Freshman beginning Fall of 2015:

ACADEMIC ELIGIBILITY: In order to be eligible and remain eligible to represent an institution in intercollegiate athletics competition a student athlete has to successfully complete at least 6 units (semester or quarter) during the preceding academic term in which the student is enrolled as a full-time student at the certifying institution with a cumulative 2.0 GPA beginning with and including the units taken during the first semester/quarter of competition. Institutional verification for eligibility for continuing competition will be completed within one week of the posting of grades for the academic term by the institution.

A student transferring to Río Hondo College who has previously **PARTICIPATED** in intercollegiate athletics at another California community college **MUST COMPLETE 12 units at Río Hondo College PRIOR** to the beginning of the semester of competition.

Students are **NOT ALLOWED** more than **TWO SEASONS** of athletic competition in any one sport. Students who have questions concerning athletic eligibility should check with the Athletic Director by calling the Kinesiology, Dance, and Athletics Department at (562) 908-3409. All student athletes are expected to comply with the Decorum policy in the State Constitution for Athletics.

Student Conduct at College-Sponsored Events

A. Basic Responsibilities at Conferences:

1. Participants, students and advisors shall be fully informed concerning their responsibilities for proper conduct during a trip and at the conference.
2. Students will be directly responsible to the advisor.
3. Rules established by the host school on location must be observed.
4. Prior to the conference, student participants and advisors shall read the code of conduct.
5. Attendance at all meetings including meals is considered part of the participant's responsibility while at a conference unless first excused by the advisors.
6. Students may not represent Río Hondo College at any event away from the campus without an advisor unless they are given special permission to do so by the college administration.

B. Regulation of Conduct

1. It is contrary to California State Law to possess, serve, or consume alcoholic beverages or marijuana at any college function including regional or state conferences, regardless of the age of those participating. Anyone who appears under the influence of alcoholic beverages or marijuana shall be subject to disciplinary action by the conference and Río Hondo College.
2. All participants at conferences or on trips are expected to show proper consideration for the rights and welfare of others. Undue noise and disturbances shall be considered violations of this regulation.
3. No firearms will be permitted on any trip. Collegeapproved pistol and rifle matches are excepted.

C. Social Functions

1. The college must sponsor any club or organization recruiting Río Hondo College students.
2. All social functions on campus must be cleared through the Student Life and Leadership Department.
3. Students attending social functions on campus are under the jurisdiction of the college and must assume individual responsibility for the accepted standards of behavior.
4. Guests of Río Hondo College students shall be the responsibility of the student. Guests are expected to behave as students and, as such, abide by college regulations.
5. Students shall be responsible for all property damage incurred by guests during any activity sponsored on campus.

6 Academic Guidelines

Attendance/Absences

It is the students' responsibility to officially register for a course prior to the "last day to add" deadline. It is also the students' responsibility to withdraw from a course prior to the drop deadlines to ensure their record is clear.

All registered students should be present at the first meeting of the class unless other arrangements have been made with the instructor, prior to the first class meeting. The instructor may drop students who are not present by the end of the first class. However, **it is the students' responsibility to officially drop any class that they no longer wish to attend** to ensure their record is clear.

Students are expected to attend all meetings of each course in which they are enrolled. The instructor of each class determines the attendance policy. After an absence, it is the responsibility of the student to check with their instructor to obtain missed materials or information on completion of all missed assignments.

Academic Dishonesty

Academic dishonesty is defined as cheating, plagiarism, or obtaining or attempting to obtain credit for work by the use of any dishonest, deceptive, fraudulent, or unauthorized means or helping someone else to commit an act of academic dishonesty.

Definition of Cheating

Cheating is the act of obtaining or attempting to obtain credit for academic work through the use of dishonest, deceptive, fraudulent, or unauthorized means. Helping someone commit an act of academic dishonesty is also considered cheating. The following are only some of the many forms cheating may take:

- Copying another's work on an exam, paper, or project; any behavior that defeats the intent of an exam
- Possessing or using unauthorized materials during an exam; or collaborating on a project, homework, or other assignment to be turned in for credit where the instructor expressly forbids such collaboration
- Communicating with fellow students during an exam, taking an exam for another student, purposely allowing another student to copy during an exam, or providing coursework for another student to turn in as his or her own effort
- Fabricating, falsifying or misrepresenting data or results from experiments, interviews, or surveys
- Submitting the same work in more than one class for credit without permission from the instructor
- Knowingly furnishing false information to the college including forgery, altering of campus documents or records, tampering with grading procedures, fabricating lab assignments, or altering medical excuses

Definition of Plagiarism

Plagiarism is defined as representing the words, ideas, or work of another as one's own in any academic exercise. Plagiarism consists of taking the words or substance of another work and

either copying or paraphrasing without giving credit to the source whether that material is paraphrased or copied verbatim or near verbatim form. Plagiarism is applicable to written, oral, and artistic work. The following examples are only some of the many forms plagiarism may take:

- Word-for-word copying of work written by someone else
- Failure to give proper credit for ideas, statements of facts, or conclusions derived by another, including undocumented web source usage
- Failure to use quotation marks when quoting directly from another, whether a paragraph, sentence, or phrase
- Close and extended paraphrasing of another work without acknowledging the source
- Submitting a paper purchased from a research or term paper service, including the internet

Other Specific Examples of Academic Dishonesty

- Purposely allowing another student to copy from your paper during a test
- Giving homework, term paper or other academic work to another student to plagiarize
- Having another person submit any work in your name
- Lying to an instructor or college official to improve your grade
- Altering graded work after it has been returned, then submitting the work for re-grading
- Stealing tests
- Forging signatures on college documents altering campus documents or records, tampering with grading procedures, fabricating assignments, or altering medical excuses
- Collaboration without permission of instructor
- Gaining unlawful or unauthorized access to college or district computers or servers

Academic Dishonesty and its Consequences

- Faculty members have the right to choose whether or not to pursue suspected cases of plagiarism and cheating.
- When addressing plagiarism or cheating with reasonable evidence, the faculty member should meet with the student to discuss the concern. The student shall have the opportunity to share their side of the story and explain their behavior.
- Faculty members may consult with their Division Dean or Dean of Student Affairs when determining whether academic dishonesty has occurred.
- In situations where cheating or plagiarism has occurred, the faculty member is to determine the academic consequence in compliance with Education Code, and board policy and procedures, which prohibit dropping a student from a course for engaging in academic dishonesty. Faculty members shall inform students of the grade penalty that will be assessed. The consequences may be any of the following options:
 - Receiving a "0" on that assignment

- Being referred to the Dean of Student Affairs for further disciplinary action
- In situations where academic dishonesty has occurred, the faculty should also notify their Division Dean, and report the violation to the Dean of Student Affairs. All pertinent information such as exams, plagiarized sources, and/or other possible evidence should be attached and submitted with the form.
- Students will meet with the Dean of Student Affairs and receive due process; students have the right to grieve an action they feel violates their student rights.
- The Dean of Student Affairs will address the behavior reasonably through the procedures outlined in AP 5520.
- The Student Affairs Office will maintain records related to violations of academic dishonesty and other violations of the college Standards of Conduct policy.

Academic Honors

Dean's List – Dean's List certificates are awarded in the fall and spring semesters to all students whose semester gradepoint average is 3.5 or higher in 12 or more graded units completed.

Alpha Gamma Sigma – Alpha Gamma Sigma – Alpha Gamma Sigma (AGS) is the California Community College Scholastic Honor Society. The purpose of this organization is to foster, promote, maintain, and recognize scholarship while engaging the students in service to the college and community.

Any student completing 12 semester units of recognized college work in a maximum of 2 semesters with a minimum grade-point average of 3.0 may apply for AGS.

Eligible applicants must be a current RHC student and registered for RHC credit courses during the semester that they are eligible and wish to apply.

Honors Transfer Program/Honors Scholar – Honors Scholars are students who have completed the requirements for the Honors Transfer Program. Those include the completion of the required lower division general education and major prerequisite transfer requirements, successful completion of 5 Honors classes (all honors courses have an "H" designation) and a transferable grade-point average of 3.2 or above. Please see Chapter 4 of the catalog for more program information.

Academic Standards

Units – The conventional unit of measurement of college work is called the semester hour or unit of credit. A unit consists of 18 lecture hours of class time per semester (together with 36 hours of study outside of class per semester). Laboratory work is ordinarily valued at one unit for 54 hours of class time per semester. Twelve units or more is considered a full-time load. No student will be permitted to carry more than 18 units without special permission of a counselor. In the case of probationary students, the maximum load is 12 units.

Grades and Grade Changes – The instructor of the course shall determine the grade to be recorded for each student. The determination of the student's grade by the instructor is final in the absence of mistake, fraud, bad faith, or incompetence. The removal or change of an incorrect grade from a student's record shall only be done upon authorization by the instructor of the course. A student has one year from the end of the term in question to request a grade change. In the case of fraud, bad faith, clerical error, incompetence, or unavailability of instructor or death of instructor, the final determination concerning removal or change of grade will be made by the Vice President of Academic Affairs with the appropriate involvement of faculty from

the discipline and the Academic Senate. All returned work must be retained by the student as documented evidence in order to pursue a request for a grade change. (RHC AP 4231)

Grades from a grading scale shall be averaged on the basis of the point equivalencies to determine a student's grade point average (GPA). The highest grade shall receive four points, and the lowest grade shall receive 0 points, using only the following evaluative symbols:

Symbol	Definition	Credit Granted	Grade Point
A	Excellent	Yes	4
B	Above Average	Yes	3
C	Average	Yes	2
D	Below Average	Yes	1
F	Failure	No	0

To calculate a grade point average (GPA), divide the total grade points by the total GPA units.

The following evaluative symbols are not used in calculating GPA:

Symbol	Definition	Credit Granted
P	Pass (satisfactory)	Yes
NP	No Pass (less than satisfactory)	No
SP	Satisfactory Progress (SP is used for noncredit courses only.)	No

The following non-evaluative symbols are used to indicate course status:

Symbol	Definition
I*	Incomplete ("I*" indicates the default letter grade to be received by the student if the incomplete is not completed within one year)
IPP	Incomplete Pass
INP	Incomplete No Pass
IP	In Progress
RD	Report Delayed
W	Withdrawal
MW	Military Withdrawal
EW	Excused Withdrawal

P/NP: Pass/No Pass

In addition to courses in which all students are evaluated on a Pass/No Pass basis, students may enroll in one course each semester on a "P/NP" basis. Unless otherwise specified, a student may elect at registration through the last day of instruction (the last day of finals week), whether the basis of evaluation is to be "P/NP" or a letter grade. A "P" (Pass) is defined as "C" grade or better. If a course is taken as P/NP, it is not factored into the GPA, but credit is awarded when a P is earned.

All units (credits) earned on a Pass/No Pass basis in U.S. regionally accredited institutions of higher education shall be

counted in satisfaction of community college curriculum requirements.

IMPORTANT: Students will not be allowed to request a letter grade after the dates listed on the RHC website (www.riohondo.edu/admissions/important-dates-and-deadlines); nor to request a letter grade for previously completed courses in which they earned a Pass "P."

I : Incomplete – An incomplete grade, "I," may be assigned for academic work not completed for unforeseeable emergencies and justifiable reasons at the end of the term. The condition for removal of the "I" shall be stated by the instructor in a written record. This record shall contain the conditions for removal of the "I" and the grade assigned in lieu of its removal (**IA, IB, IC, ID, IF, IPP, INP**). This record must be given to the student with a copy on file with the registrar until the "I" is made up or the time limit has passed. A final grade shall be assigned when the work stipulated has been completed and evaluated or when the time limit for completing the work has passed.

The "I" may be made up no later than one year following the end of the term in which it was assigned. Under unusual circumstances, a student may petition for an extension of the one-year period.

IP: In Progress – An in-progress grade, "IP," shall be used to denote that the class extends beyond the normal end of an academic term. It indicates that work is in progress but that assignment of a substantive grade must await completion of the course. The "IP" symbol shall remain on the student's permanent record in order to satisfy enrollment documentation. The appropriate evaluative grade and unit of credit shall be assigned and appear on the student's record for the term in which the course is completed.

RD: Report Delayed – The report delayed grade, "RD," may be assigned by the registrar only. It is to be used when there is a delay in reporting the grade of a student due to circumstances beyond the control of the student. It is a temporary notation to be replaced by a permanent symbol as soon as possible.

W: Withdrawal – A withdrawal or drop between 20% and 60% of the term courses length will result in a "W" notation on a student's permanent record. See section 3 for specific withdrawal information.

MW: Military Withdrawal – A military withdrawal grade, "MW," occurs when a student who is a member of an active or reserve United States Military Service receives orders compelling a withdrawal from courses and petitions to receive a "MW." See section 3 for specific military withdrawal information.

EW: Excused Withdrawal – The EW symbol is used to denote withdrawal in accordance with Title 5 Section 55024. A student may submit a petition to withdraw from a course(s) due to specific events beyond their control which affects their ability to complete a course(s). These events may include a job transfer outside the geographical region, an illness in the family where the student is primary caregiver, student is subject to immigration action, or other extenuating circumstances. The excused withdrawal "EW" notation is not counted in progress probation and dismissal calculations, nor will it be counted toward the permitted number of withdrawals or counted as an enrollment attempt.

Grade Report – Grades will be issued at the end of each session.

Auditing

Students are not permitted to audit courses and may not attend classes in which they are not officially enrolled.

Basic Skills Enrollment

The California Education Code limits students to no more than 30 semester units of pre-collegiate basic skills units. Basic skills courses are defined as courses "in reading, writing, computation, and English As A New Language which are designated by the community college district as non-degree credit courses pursuant to Section 55002(d) of Title 5."

Río Hondo College defines basic skill courses as courses in reading, writing, computation and English As A New Language with a course number less than 40. ENLA and learning disabled students are exempted. Students who feel they would benefit by taking more than 30 semester units of pre-collegiate basic skills courses should see the Director of Admissions & Records.

Classification of Students

Freshman: 0 to 29 units completed

Sophomore: 30 to 59 units completed

Full-time: Students enrolled for 12 or more units in fall and spring (4 or more units in summer)

Part-time: Students enrolled for less than 12 units in fall and spring (less than 4 units in summer).

Challenge of Educational Records – Education Code 76232 allows a student to challenge the contents of a student's educational record to correct or remove information that the student alleges to be: (1) inaccurate; (2) an unsubstantiated personal conclusion or inference; (3) a conclusion or inference outside the observer's area of competence; or (4) not based on the personal observation of a named person with the time and place of the observation. See the Director of Admissions & Records for more information.

Academic Renewal Guidelines – The academic renewal procedure permits the alleviation of a student's previously recorded substandard academic performance that is not reflective of a student's present demonstrated ability and level of performance. Academic renewal may gain for students the benefits of their current level of ability and performance and not permanently penalize them for poor performance in the past. Therefore, within the regulations listed, Río Hondo College may disregard particular, previously recorded substandard work from a student's cumulative grade-point average.

1. The student may petition through the Admissions and Records Office to remove previous substandard work (any course in which a grade below 2.00 has been recorded) taken at Río Hondo College. The district superintendent or designee may grant permission.
2. Up to 30 units may be alleviated.
3. A student's current demonstrated ability may be the basis for alleviating previous substandard work.
4. In order to qualify, the student must meet one of the following criteria:
 - a. Earn 30 consecutive units with a minimum of a 2.0 grade-point average (GPA) from any regionally accredited college or university, following the completion of the most recent substandard work to be alleviated, and two (2) years must have elapsed since the most recent work to be alleviated.
 - b. Earn 15 consecutive units with a minimum of a 2.5 grade-point average (GPA) from any regionally accredited college or university, following the completion of the most recent substandard work to be alleviated, and one (1) year must have elapsed since the most work to be alleviated.
5. The student's academic record will be appropriately marked indicating those courses that have been alleviated.

When academic work is alleviated, grades are not removed; they are noted and subtracted from the grade point average. All entries remain legible so that a true and complete record is maintained. There is no assurance that alleviated courses will be treated similarly by other educational institutions outside the district.

Final Examinations

Final examinations will be given in all courses during the last week of each semester. The final exam schedule for spring and fall is listed on the RHC website (<https://www.riohondo.edu/admissions/final-exam-schedule/>) and may vary from regular class hours.

Course-Level/Student Learning Outcomes (CLOs/SLOs) and Program Level Outcomes (PLOs)

Course-level or student learning outcomes (CLOs/SLOs), and program-level outcomes (PLOs) are developed by faculty and assessed on a cyclical basis in order to improve teaching and student learning. All course-level outcomes are listed in course syllabi so students are aware of them at the beginning of each term. PLOs for all degrees and certificates are available in Chapter 11. The Outcomes Committee meets monthly to review all matters relating to instructional outcomes. The Committee also oversees institutional-level outcomes. More information about outcomes can be found at <https://outcomes.riohondo.edu/>

Probation Standards

Disciplinary Probation - A student may be placed on disciplinary probation for infraction of state law, education code, board policy, student government regulations, or behavior unbecoming a student at Rio Hondo College.

Students on disciplinary probation may not represent the college in any activity, conference, or field trip, nor can they hold office in the Associated Student government or in any student body sponsored club.

Academic Probation - A student who has attempted at least 12 semester units as shown by the official academic record shall be placed on academic probation if the student has earned a grade-point average below 2.0 in all units which were graded on the basis of the grading scale described in the section Academic Standards-Grades. If a student is placed on academic probation for two consecutive semesters, the student must receive approval by a counselor prior to registering for classes in the following semester.

Removal from Academic Probation - A student on academic probation for a grade-point deficiency shall be removed from probation when the student's accumulated grade-point average is 2.0 or higher.

Progress Probation - A student who has enrolled in a total of at least 12 semester units as shown by the official academic record shall be placed on progress probation when the number of all units in which a student has enrolled and for which entries of "W" and "NP" are recorded reaches or exceeds the number of units with other grades. If a student is placed on progress probation, the student must receive approval by a counselor prior to registering for classes in the following semester.

A student on progress probation because of an excess of units for which entries of "W" and "NP" are recorded shall be removed from probation when the total number of units in this category drops below the number of those with other grades.

Dismissal - A student shall be dismissed from the college for a period of one semester (excluding summer session) when his/her grade-point average in three consecutive semesters is less than 2.00 in all units attempted or when 50% or more of all units attempted have entries of "W" and "NP." Before reinstatement to the college, the student must meet with a counselor.

Notice - Students will be notified by e-mail if they are on academic probation or progress probation and will also be notified that they need to meet with a counselor prior to reinstatement to the college. Probation and dismissal status may be appealed to the Dean of Counseling.

Repetition of Courses Guidelines

Course repetition occurs when a student who has previously received an evaluative symbol (A, B, C, D, F, P/NP, W) in a credit course, re-enrolls in the course and receives an evaluative symbol. Students may be permitted to enroll more than one time in the same credit course if they or the course meets certain criteria. Students will not be permitted to enroll in the same credit course more than three times, except in special circumstances or when the course is designated as repeatable and allows a greater number of repetitions as established in Title 5. All attempts to take a course that result in the student earning an evaluative symbol (A, B, C, D, F, P/NP, W) on their record will be counted for the purposes of calculating the total number of times a student has enrolled in a course. Students are limited to four (4) enrollments in courses that are related in content for the following courses types: Physical education courses, visual arts courses, performing arts courses, and intercollegiate academic and vocational courses designated as repeatable pursuant to section 55041.

Course repetition may occur under the following circumstances:

I. The course is designated as a "repeatable course" consistent with the requirements of Title 5 §55041:

Courses that may be repeated without a petition are identified as such in the college catalog and fall within the following categories:

- a. The course repetition is necessary to meet the major requirements of CSU or UC for completion of a bachelor's degree.
- b. The course is designated as intercollegiate athletics.
- c. The course is designated as intercollegiate academic or vocational competition.

II. To alleviate substandard work: A course in which a student grade of "D" or "F" or "NP" has been recorded may be repeated twice. Students must complete a "Petition for Grade Alleviation With Course Repetition" form available in Admissions and Records in order to remove the effects of the grade from the GPA. When a student repeats a class to alleviate substandard academic work, the previous grade and credit shall remain legible, however, it will be disregarded in the computation of grade point averages. Students may use coursework from any U.S. regionally accredited college to replace Rio Hondo College coursework in which a "D" or "F" or "NP" was recorded provided the courses are deemed comparable.

III. To enroll in a class from which a student has previously withdrawn: Students may repeat courses that result in withdrawal with a "W" symbol being assigned. Students may have a maximum of two withdrawals from a course prior to receiving a grade, excluding military withdrawals and withdrawals due to extenuating circumstances. The "W" shall not be used in

calculating a student's GPA, but must be used in determining probation and dismissal.

IV. Student meets the criteria for special circumstances:

- a. **Extenuating circumstances:** A student may repeat a course when they demonstrate that the previous grade was due to extenuating circumstances. Extenuating circumstances are verified cases of illness, accidents or other circumstances beyond the control of the student. Students wishing to repeat a course due to extenuating circumstances must complete a "Course Repetition" form available in Admissions and Records and submit it with documentation of the extenuating circumstances and appropriate signatures and approvals to Admissions and Records. A course repeated due to extenuating circumstances may only be repeated once, but the previous grade and credit may be disregarded in computing the student's GPA.
- b. **Significant lapse of time:** Students may repeat a course in which they previously received a satisfactory grade due to a significant lapse of time, comprised of no less than 36 months or as required by specific program mandates AND the course is required by the district as a properly established recency prerequisite; or another institution of higher education to which the student is seeking to transfer requires the student to have taken the course more recently than the student's last enrollment.
- c. **Variable unit, open-entry/open-exit courses:** Student may enroll in a variable unit open-entry/ open-exit course as many times as necessary to complete the entire curriculum of the course.
- d. **Work Experience Education:** Students may enroll more than once, even if the student received a satisfactory grade, in work experience education course. Enrollment is limited to 16 credit hours of work experience education (WEE).
- e. **Legally mandated training:** Students may re-enroll in courses that are required by statute or regulation as a condition of paid or volunteer employment. Students must certify or document that the course repetition is legally mandated.
- f. **Special courses for student with disabilities:** Students with a disability and part of the Disabled Students Programs & Services (DSPS) department may enroll multiple times in a class designated as "Educational Development (EDEV)," if it is determined by a DSPS counselor/specialist that such repetition is required for that student as a disability related accommodation.
- g. **Significant change in industry or licensure standards:** Students may petition to repeat a course as a result of a significant change in industry or licensure standards such that repetition of the course is necessary for employment or licensure. Students must certify or document that there has been a significant change in industry or licensure standards necessitating course repetition.

A student's permanent academic record will indicate any courses repeated using an appropriate symbol and will be annotated in such a manner that all work remains legible, ensuring a true and complete academic history.

Transcripts

Upon written application, the Admissions and Records Office will issue a document verifying grades or enrollment. The first two copies requested are issued free. Thereafter, a fee of \$3.00 for each record is charged. Forms are available in the Admissions and Records Office or online.

Transcripts may also be ordered online via AccessRio or directly on the Credentials website. Transcripts will usually be processed within three (3) working days. An emergency/ rush transcript request is available online for an additional cost. Rush order will be processed within one (1) working day. Details are provided on the Admissions and Records web page.

Work Hours/Class Guidelines

For each hour spent in a lecture class, a student should plan to spend about two hours a week in study and homework. Thus, a load of 15 units plus study time may require 45 hours a week—more than a full-time work week. Following are suggested work hours versus class load guidelines:

Working Hours/Week	Units
None	12-16
10	10-11
20	7-9
30	3-6
30+	1-3

In order to maintain an academic balance, the following information should be considered:

1. Students can expect to spend at least three hours (one in class and two outside of class) each week for every unit taken. A student with 12 units will need 24 hours of study time for a total of 36 hours needed for school each week.
2. Employment time and college time combined should not exceed 60 hours weekly.
3. Students should distribute study time appropriately for each class; often preparation for a lecture class differs from preparation for a laboratory class.
4. Students should consult frequently with their instructors; their office hours are designed for that purpose.
5. To assist in their academic success, students should use the tutoring services, the library, counselors, and other support services.

Credit for Prior Learning

The Río Hondo Community College District shall grant appropriate semester unit credit to any student through any of the approved alternative methods for awarding credit listed below:

- Achievement of a satisfactory score on an Advanced Placement (AP) examination
- Achievement of a satisfactory score on a high-level International Baccalaureate (IB) examination
- Achievement of a satisfactory score on the College Level Examination Program (CLEP)
- Evaluation of military service/training
- Achievement of a satisfactory score on an examination administered by other agencies approved by the District
- Evaluation of industry recognized credential documentation
- Evaluation of student-created portfolios
- Satisfactory completion of an institutional examination, known as Credit by Examination, administered by the College in lieu of completion of an active course listed in the current College catalog.

Individual departments and/or specialty areas may elect to grant course credit to enable students, who can demonstrate proficiency in bodies of subject matter, to plan a relevant

educational program that will exclude courses in which essential levels of mastery of subject matter material in accordance with policies and procedures approved by the curriculum committee have been previously attained.

Eligibility for Credit for Prior Learning

To challenge a course and receive credit for prior learning:

- The student must be registered in the College and be in good standing.
- The course(s) must be listed in the College catalog.
- The student must have an education plan on file.
- The student must have previously earned credit or noncredit from the College or be currently enrolled in a class at the College.

Students may be exempt from this if they are requesting to challenge and receive credit by assessment for a high school / Regional Occupational Program (ROP) and Career Technical Education (CTE) articulated pathway. Students may not be enrolled in the course for which they may want to challenge and receive credit for prior learning; students may receive credit by completing courses in high school ROP, CTE, and articulated programs. For Credit by Examination, the student cannot be currently enrolled in nor have received credit for a more advanced course in the same subject (may be waived by department). Credits acquired using the methods in the section above are not applicable to meeting of such unit load requirements as Selective Service deferment, Veterans, or Social Security benefits. Credits acquired using the methods in the section above shall not be counted in determining the 12 semester hours of credit in residence required for a degree.

Credit for Prior Learning Grading Policy

Grading shall be according to the regular grading system in accordance with Administrative Procedure 4230 – Grading and Academic Record Symbols. Students shall be offered a “Pass/No Pass” grading option, if that option is ordinarily available for the course. Students shall be given the opportunity to accept, decline, or appeal the grade assigned by the faculty, except in cases of Credit by Examination, pursuant to AP 4230 – Grading and Academic Record Symbols and AP 4231 – Grade Changes.

Limits on Credit by Examination

Students shall be given course credit to a limit of twelve Río Hondo College units upon the successful completion of assessment(s), which may be applied to an Associate degree. Once the student has completed an upper division course at Río Hondo College, the student is eligible for an additional four units of course credit through credit by assessment. These courses shall not count as units in residence. Upon completion of six upper division units at Río Hondo College, students shall be given course credit to a limit of twelve upper division Río Hondo College units upon the successful completion of assessment(s), which may be applied to a Bachelor's degree. These courses shall not count as units in residence.

Each department identifies courses that are eligible for challenge. Students will receive a grade for each course challenged based on the written guidelines developed by the individual department. To challenge a course and receive Credit by Examination, a student must be registered in the college and be in good standing. Course(s) must be listed in the college catalog. A request form must be completed and returned to the Admissions and Records Office.

After completing twelve units in residence, a student will be awarded credit by external assessment with passing scores from the CLEP, IB, and AP assessments. Specific course credit and/or general education credit will be granted toward the Associate

degree and/ or transfer. Details on scores and how credit is applied can be found in the Río Hondo College catalog. Official score reports from AP, IB, and CLEP must be on file with Admissions and Records.

Academic Records

The student's academic record will clearly indicate that the credit(s) have been earned by assessment of prior learning.

Credit for Military Service/Training

Students interested in Credit for Prior Learning using Joint Services Transcripts (JST) shall receive credit as recommended by the American Council on Education (ACE) Directory and approved by the appropriate discipline faculty of the College under the following circumstances:

- The student shall complete the Credit for Prior Learning petition.
- Official transcripts must be on file with Admissions and Records. These may include JST, DANTES/ USAFI, Defense Language Institute Foreign Language Transcripts (DLIFLC), Defense Manpower Data Center (DMDC), DLPT Examinee Results, DA Form 330 – Language Proficiency Questionnaire, or verified copies of DD214 or DD295 military records.
- Credit course equivalency shall be determined by the faculty of the appropriate discipline.

Industry Recognized Credential(s)

Students interested in credit for prior learning using industry recognized credential(s) shall receive credit as recommended by the appropriate discipline faculty of the College under the following circumstances:

- The student shall complete the Credit for Prior Learning petition.
- Admissions and Records shall grant credit for industry recognized credential(s) that have been evaluated and approved by the appropriate discipline faculty.
- If an industry recognized credential(s) has not yet been evaluated and approved by the appropriate discipline faculty, the student meets with the discipline faculty member to receive further instructions for how the industry recognized credential(s) will be assessed.
- The student submits all industry recognized credential(s) documents to the discipline faculty member for assessment of prior learning.
- If the discipline faculty member determines that the industry certification adequately measures mastery of the course content as set forth in the Course Outline of Record, the discipline faculty shall sign the petition with the recorded grade, attach the industry recognized credential(s), and forward the completed petition and supporting documents to Admissions and Records to be kept on file and recorded on the student transcript.

Student-Created Portfolio Assessment

Students interested in credit for prior learning using a student-created portfolio shall receive credit as recommended by the discipline faculty under the following circumstances:

- A department-approved portfolio assessment rubric for the course is on file.
- The student shall complete the Credit for Prior Learning assessment petition.
- The student meets with the discipline faculty member to receive further instructions for student-created portfolio assessment.
- The student submits all portfolio documents to the discipline faculty member for assessment of prior learning.

- If the discipline faculty member determines that the student-created portfolio adequately measures mastery of the course content as set forth in the Course Outline of Record, the appropriate faculty shall sign the petition with the appropriate grade and forward it to Admissions and Records to be kept on file and recorded on the student transcript.

Non-Collegiate Registered Nursing Training Credit

Credit may be granted to a student who has a valid California RN license for nursing courses taken at an accredited non-collegiate RN nursing program toward the Associate of Science Degree in Nursing. Credit granted may not exceed the total number of nursing units required for the Associate Degree in Nursing at Río Hondo College.

Upper-Division Credit

Upper-division credit from U.S. regionally accredited institutions may be used to fulfill Río Hondo requirements. Please see a counselor for more information.

Work Experience Education

Work Experience Education is a three-way relationship between the student, the college, and the employer. It is an academic program that offers an opportunity to combine classroom learning with on-the-job experience - the purpose of which is to help the student choose a career or find the "right" job and to achieve success based on the choice. It also provides opportunities for the student who is already employed or who is seeking employment in a particular field of study. The student learns to establish short-and long-range career objectives and to recognize their progress through establishing measurable learning objectives.

Supervision, evaluation, and suggestions for improvement are provided.

Cooperative Education benefits for the student:

- College credit
- Career guidance in a realistic setting
- An opportunity to apply classroom learning on the job
- Networking and job contacts
- An opportunity to experience socialization in the workplace
- Transferable college units

Directed Study

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.

Credit By External Examination:

College credit for Advanced Placement (AP) tests: students must have the College Board send AP exam results to the Office of Admissions and Records (hand-carried copies will NOT be accepted) for use toward the A.A./A.S. or GE patterns. Course credit and units granted at Río Hondo College may differ from course credit and units granted by a transfer institution. Students may earn credit for Advanced Placement (AP) Tests with scores of 3, 4, or 5 unless otherwise noted. AP credit can be used to meet IGETC, CSU GE and A.A./A.S. general education (GE) and/or major requirements.

For most AP subjects, results indicate that AP Exam scores of 5 are equivalent to A+ and A grades in the corresponding college course. AP Exam scores of 4 are equivalent to grades of A-, B+, and B in college. AP Exam scores of 3 are equivalent to grades of B-, C+, and C in college. More information on the reliability and validity of AP scores is available online at: www.collegeboard.org.

Exam	RHC AA/AS (MAJOR AND/OR GE) Score of 3 or better for subject area unless otherwise indicated	CSU GE	CSU - UNITS EARNED TOWARD TRANSFER	IGETC	UC - UNITS EARNED TOWARD TRANSFER

Credit by External Examination College Level Examination Program (CLEP)

Río Hondo College will award CLEP credit toward the Associate Degree and transfer to the CSU system accordingly. UC does not accept CLEP exams. Course credit cannot be granted if it duplicates coursework completed. Official CLEP scores must be sent directly to Río Hondo's Office of Admissions and Records. A student must be actively enrolled and have completed 12 units in residence at Río Hondo College when applying for credit by CLEP exam. CLEP credit may not be used to meet any residency requirement.

*Students may complete the laboratory requirement by enrolling in one of the following laboratory courses: BIOL 105L, BIOL 111L, or BIOL 120L. Please see a counselor to obtain clearance to enroll in one of these lab courses.

RHC: Students will get specific course credit only where a Río Hondo equivalent course has been designated. A student who receives CLEP credit and then takes the equivalent RHC course will have the unit credit for such duplication deducted prior to being awarded the Associate degree.

CSU: All CSU campuses will accept the minimum units shown and apply them toward fulfillment of the designated CSU GE area if the examination is included as part of a full or subject-area certification. Please note that individual CSU campuses may choose to grant more units than specified toward completion of the CSU General Education-Breadth requirements.

IGETC: CLEP exams cannot be used to certify for IGETC.

Please see a counselor for assistance in determining CLEP credit for graduation and/or transfer.

7 Degree & Certificate Guidelines

Degree Programs

Río Hondo College offers a variety of two-year programs leading to the Associate of Arts (A.A.), Associate of Science (A.S.), Associate in Arts for Transfer (AA-T), and Associate in Science for Transfer (AS-T) degrees. See this catalog for a listing of degree programs available.

The A.A. or A.S. Degree Concept

Central to an associate degree, coursework is designed to introduce students to the variety of means through which people comprehend the modern world. This coursework is referred to as the general education requirement of the degree. It reflects the conviction of the college that those who receive these degrees must possess in common certain basic principles, concepts and methodologies both unique to and shared by the various disciplines. College educated persons should be able to use this knowledge when evaluating and appreciating the physical environment, the culture, and the society in which they live. Most importantly, these degrees should lead to better self-understanding. In addition to the general education coursework, courses within an area of specialization, called a major, are required for an associate degree. The area of specialization will appear on the face of all diplomas.

Students should meet with a counselor and create an education plan in order to ensure fulfillment of requirements of an associate degree.

General Education Exceptions – Those students who have been awarded a bachelor's degree from a United States regionally accredited college or university will be considered as having fulfilled the Río Hondo College general education and proficiency requirements should they pursue an associate degree at this institution. Please see a counselor for additional information.

Course Substitutions – A request for a Course Substitution form must be completed and returned to the Admissions and Records Office in order to substitute one course for another or to waive part of a requirement. The course substitution request will be reviewed by a faculty representative, Dean of the discipline involved, and/or the Articulation Officer. Río Hondo College may accept extension and continuing education courses after taking into consideration whether they are comparable to Río Hondo courses, are from a United States regionally accredited institution, are taken for credit or a letter grade, and are degree-applicable at the originating institution.

The A.A. or A.S. Degree Requirements

Both the Associate of Arts and the Associate of Science degrees require a minimum of 60 units with a 2.0 or better grade-point average (GPA). At least 12 units must be in residence at Río Hondo College. Non-degree applicable coursework will not be included in the total number of units earned toward a degree.

The degree of Associate of Arts or Associate of Science will be conferred upon any student satisfactorily completing a minimum of 60 degree applicable units, with a cumulative 2.0 grade-point average (GPA) or better, and at least twelve (12) units in residence, and which will include a major consisting of a minimum of eighteen (18) units with a grade of "C" or better in each course, and satisfactory completion of any one (1) of the following general education patterns:

- California State University General Education Breadth (CSU GE)
- Intersegmental General Education Transfer Curriculum (IGETC)
- Río Hondo College General Education and Proficiency requirements.

A listing of all majors can be found in the degree listing in the college catalog. Effective Fall 2008, courses can be used to meet a General Education area and Major requirement.

Associate in Arts for Transfer (AA-T) or Associate in Science for Transfer (AS-T) Requirements

The Student Transfer Achievement Reform Act (Senate Bill 1440, now codified in California Education Code sections 66746-66749) guarantees admission to the California State University (CSU) system for any community college student who completes an Associate Degree for Transfer (ADT). The Associate in Arts for Transfer (AA-T) or the Associate in Science for Transfer (AS-T) is intended for students who plan to complete a bachelor's degree in a similar major at a CSU campus. Certain private institutions that are part of the Association of Independent California Colleges and Universities (AICCU) or are partner Historically Black Colleges and Universities (HBCU) also offer guaranteed admission to students earning an ADT (please visit aiccu.edu/transfer and extranet.cccco.edu/HBCUTransfer/Agreements for more information and a list of participating institutions).

Students completing these degrees (AA-T or AS-T) are guaranteed admission to the CSU system but not to a particular campus or major. In order to earn one of these degrees, students must complete 60 semester units of CSU-transferable coursework with a minimum overall GPA of 2.0. A minimum of 18 semester units in the major must be completed with a grade of "C" or better in each course (or with a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or higher). Students are required to complete either the CSU GE pattern or IGETC pattern along with 12 units in residence at the college. There are no additional graduation requirements for an AA-T or AS-T degree.

Students transferring to a CSU campus that deems the AA-T or AS-T as similar to the transfer major will be required to complete

no more than 60 units after transfer to earn a bachelor's degree. This degree may not be the best option for students intending to transfer to a particular CSU campus or other institution that is not part of the CSU system. Students should consult with a counselor when planning to complete the degree for more information on university admission and transfer requirements.

Associate in Science Degree for Transfer (AS-T)

AS-T subject areas include:

- Administration of Justice
- Biology
- Business Administration
- Chemistry
- Computer Science
- Early Childhood Education
- Environmental Science
- Film, Television, and Electronic Media
- Geology
- Hospitality Management
- Mathematics
- Nutrition and Dietetics
- Physics

Associate in Arts Degree for Transfer (AA-T)

AA-T subject areas include:

- Anthropology
- Art History
- Communication Studies
- Economics
- Elementary Teacher Education
- English
- History
- Journalism
- Kinesiology
- Music
- Philosophy
- Political Science
- Psychology
- Social Justice: LGBTQ Studies
- Social Justice Studies
- Social Work and Human Services
- Sociology
- Spanish
- Studio Arts
- Theatre Arts

Associate Degree for Transfer - Reciprocity Policy

Students who have fulfilled a specific course requirement or entire area of an AA-T/AS-T degree at a California Community College will be considered to have met those requirements at Río Hondo College for the same degree. Students must initiate the review process with a counselor and must have official transcripts sent to the RHC Admissions and Records Office.

University of California Transfer Pathways (UCTP) Degrees

Students completing one of these Associate in Science for UC Transfer Degrees are considered to have completed the lower division preparation in the major. Please note that earning this degree alone does not guarantee admission to the UC system. UCTP subject areas include:

- Chemistry
- Physics

Río Hondo College General Education and Proficiency Requirements

The Río Hondo General Education & Proficiency requirements can be used to fulfill only the general education requirements of an Associate of Arts or Associate of Science degree.

1. Competence in reading and written expression may be met by one of the following:

- a. Credit earned in ENGL 101 with a grade of "C" or better.
- b. A satisfactory score on the CSU English. Equivalency Exam (to be determined by the Division of Communications and Languages)
- c. Students earning a "C" or better in freshman composition courses (3 or more semester/4 or more quarter units) from United States regionally accredited colleges and universities.
- d. Advanced Placement examination scores of 3, 4, or 5 on either of the following exams: AP English Language & Composition or English Literature & Composition.
- e. CLEP examination scores of 50 or higher on one of the following exams: College Comp, College Comp Modular, English Comp (if taken prior to July 2010).

2. Competence in mathematics may be met by one of the following:

- a. Credit ("C" grade or better) in MATH 060 (Geometry), MATH 062 (Pre-Statistics), MATH 070 (Intermediate Algebra), MATH 070CD (Intermediate Algebra: Part II), MATH 072 (The Mathematics of Money), MATH 073 (B-STEM Intermediate Algebra, formerly titled Fast-Track Intermediate Algebra), MATH 073B (B-STEM Intermediate Algebra B), or a higher level quantitative reasoning course.
- b. Demonstrate proficiency by a satisfactory score on the Río Hondo College Math Proficiency Exam.
- c. Advanced Placement examination scores of 3, 4 or 5 on one of the following exams: AP Precalculus, AP Calculus AB, AP Calculus BC, or AP Statistics.
- d. CLEP examination scores of 50 or higher on one of the following exams: Calculus, College Algebra, College Algebra-Trig, or Trigonometry.

3. Physical Education-Minimum 2 classes.

Any two physical education or dance activity courses. (Exemption may be granted to those students physically unable to complete this requirement. Exemption forms are available in the Student Health and Psychological Services Office.) Students who have completed a Fire, Police, Wildland Fire, or Corrections Academy from an accredited institution are automatically waived from this requirement. Students with honorable discharge DD214 paperwork will be waived from this requirement.

4. American Institutions Requirement*-Minimum of one course:

HIST 143, 143H, 144, 144H, 156, 157, 158, 159, 159H, 170,
 POLS 110 or 110H

5. Natural Sciences with Lab (a lab must be included)-Minimum 3 units:

ANTH 101, 101H, & 101L
 ASTR 110, 110H, 112, & 137
 BIOL 101, 105 & 105L, 111 & 111L, 112, 120 & 120L
 BIOT 100
 CHEM 110, 120, 130
 GEOG 101 & 101L
 GEOL 150 & 151, 152 & 152L
 PHY 120, 150, 160, 211, 212, 213

6. Social and Behavioral Sciences - Minimum 3 units:

AJ 101
 ANTH 102, 102H, 103, 104, 110, 115, 125
 CD 106, 208
 CHST 101, 146, 148, 148H, 150
 ECON 101, 101H, 102, 102H, 106, 135
 EGSS 110, 120, 130
 GEOG 102, 103
 HIST 101, 102, 122, 131, 143, 143H, 144, 144H, 156, 157, 158, 159, 159H, 167, 170
 HUM 110, 111, 125, 125H, 130
 KIN 170, 190, 195
 MSCM 103, 128
 PHIL 128, 128H, 135
 POLS 110, 110H, 115, 125, 128, 128H, 130, 135, 140, 150
 PSY 101, 101H, 112, 114, 180, 200
 SOC 101, 101H, 102, 105, 110, 114, 116, 120, 127, 130
 SPCH 150

7. Humanities

A. Fine Arts – Minimum 3 units:

ARCH 103
 ART 101, 104, 105, 105H, 106, 106H, 107, 108, 109, 110, 112, 113, 115, 117, 120, 130, 135, 140
 DANC 179, 179H, 199, 199H
 GDSN 110
 MUS 101, 129, 130, 131, 132, 133, 135, 136
 MUST 151, 152
 PHTO 110, 130
 THTR 101, 105, 105H, 110, 150

B. Humanities – Minimum 3 units:

ANTH 104
 ASL 101, 124, 201, 202
 CHIN 101, 102
 CHST 101, 146, 148, 148H, 150
 EGSS 130

**Any course taken to meet the American Institutions requirement may not be used to meet another general education requirement.*

Courses may be used to fulfill only one G.E. area.

(It is the student's responsibility to provide verification to the Admissions and Records Office if any of the above requirements are met at another college or university.)

Multiple Majors/Second Associate Degrees

A student may be eligible for more than one major within a degree providing that all required courses and units for each major are completed. It is possible for a student to be awarded more than one degree providing that all residency, unit, general education, and major requirements are met for the additional degree.

Catalog Rights

A student may elect to meet the graduation requirements in effect at the time of entrance, at the time of graduation, or any time in between, provided that he/she/they maintain continuous enrollment.

Continuous Enrollment

Continuous enrollment is defined as being enrolled in at least one course each semester and receiving an A, B, C, D, F, P, NP, I or W at Río Hondo College or any other campus within the California community college or university system. If there is a break in enrollment for more than three consecutive semesters, the student will be held to the new requirements listed in the catalog at the time of re-enrollment. Absence from a summer session is not considered a break in enrollment. In extenuating circumstances, a student may submit a request for an exception to the Director of Admissions and Records for consideration.

Graduation

Students planning to graduate should file a "petition for graduation" during the semester in which they plan to graduate. Petitions are available online through students' AccessRio portal under Academics. Deadlines for filing graduation petitions are available on the Río Hondo website, under the Admissions/ Graduation Information link. Please note that Río Hondo College hosts a commencement ceremony in the spring semester of each year.

Certificate Programs

Certificate programs are designed for students interested in developing advanced levels of proficiency in special occupational

subject areas. A student may elect to meet the Certificate of Achievement, Certificate of Skill Proficiency, or Career Certificate requirements in effect at the time of entrance or at the time of graduation provided that they maintain continuous enrollment (see Catalog Rights – Continuous Enrollment).

Certificates are awarded upon successful completion of the courses indicated in a designated subject area. Consult each program area for specific requirements. A candidate must maintain a minimum of a “C” average in the certificate program and complete at least one required course for the certificate at Río Hondo College.

Certificate of Achievement

The Certificate of Achievement is designed to recognize a specific academic accomplishment or to prepare students for entry-level employment in a vocational area. This certificate is awarded through Admissions and Records and will be posted on the student's transcripts. Upon completion of required Certificate of Achievement courses, students must file an application with the Admissions and Records Office. Deadlines for filing a Certificate of Achievement application are available on the Río Hondo College website.

Certificate of Skill Proficiency

The Certificate of Skill Proficiency provides the student with skills designed to enhance their job marketability and mobility. This certificate is awarded through the designated Division Office and will not be posted on the student's transcript.

Career Certificate

The Career Certificate prepares students for specific job opportunities. This certificate is awarded through the designated Division Office and will not be posted on the student's transcript.

Exceptions to Graduation/Certificate of Achievement Requirements

Request for a Course Substitution form must be completed and returned to the Admissions and Records Office in order to substitute one course for another or to waive part of a requirement in the event of discontinued courses. The course substitution request will be reviewed by a faculty representative, dean of the discipline involved and/or by the Articulation Officer.

8 Transfer

Transfer Programs

Students whose goal is to transfer to a four-year institution should identify the following:

- Major/Career
- Preferred four-year institutions of choice
- General education courses to meet transfer requirements for admission and timely graduation
- Major preparation courses for the major

Students are strongly encouraged to meet with a counselor to discuss the development of their education plan and discuss academic, career, and personal topics that may influence their education goal. Academic faculty members are valuable contacts in providing information related to a student's career or college choice.

The Transfer Center is another valuable resource for students interested in transferring. The following services are available in the Transfer Center: Transfer Counseling, Application Workshops, Appointments with University Representatives, University Campus Tours, Transfer Fairs, Transfer Workshops, Resource Materials, Library of College Admission Materials, and Computer Resource Lab.

Río Hondo College offers courses similar to courses in the lower division (i.e., first two years) of four-year universities. Course requirements for graduation vary from one institution to another. It is to a student's advantage to choose their transfer university as early as possible. Students are advised to complete the courses at Río Hondo College that best satisfy the lower-division course requirements of their particular transfer institution. Lower division course requirements typically include a set of general education courses and a sequence of courses in the student's chosen major.

Educational Planning for Transfer

Each four-year institution has its own basic pattern of lower-division requirements regarding both general education and specific majors. These requirements vary from college to college and often change from year to year. Río Hondo College has articulated courses with the California State University and University of California campuses as well as some out-of-state and private/ independent colleges and universities.

The Transfer Center has a listing of requirements for completing the Intersegmental General Education Transfer Curriculum (IGETC), CSU General Education Breadth, and other general education patterns. In addition, there are computers for student use to access information on the Internet regarding the college of their choice.

Students may also utilize ASSIST, the statewide repository of articulation information offering easy access to a single computerized database of student transfer information (www.ASSIST.org). The database includes IGETC and CSU GE Breadth lists as well as articulation agreements for many California public post-secondary institutions (community colleges, CSUs and UCs).

Students who plan to transfer to one of the California four-year colleges or universities should complete their comprehensive educational plan with a counselor.

Transferring to California State University (CSU)

The California State University system consists of 23 campuses located throughout the state. Admission representatives from local CSU campuses visit the Río Hondo College Transfer Center on a regular basis. Please check with the Transfer Center for more detailed information.

Each California State University (CSU) campus has its own general education and major requirements. Therefore, students should work with a counselor to first select a particular CSU campus and then formulate a strategy for completing that campus' general education, major, and admission requirements.

Courses transferable to CSU campuses are identified in the course description in this Catalog and in the Class Schedule. Courses identified as meeting major preparation are listed in the ASSIST articulation database, which can be viewed at www.ASSIST.org.

Students who have completed 60 transferable semester units (90 quarter units) with a 2.0 grade point average (2.4 for non-resident students) by the time of entry to a CSU are considered upper division applicants. Upper division applicants are eligible for admission to a CSU if they:

1. Are in good standing at the last college or university attended AND
2. Have completed, or will complete prior to transfer at least 30 semester units of general education requirements. The 30 semester units must include one course in written communication, one course in oral communication, one course in critical thinking, and one course in mathematics/quantitative reasoning. These four courses must be completed with a grade of "C-" or better.
3. The remaining units to reach 60 transferable semester units can be acquired through completion of lower division major preparation and/or CSU transferable elective units.

A maximum of 70 semester units earned at a community college may be transferred to the CSU; however, courses in excess of 70 semester units will receive subject credit and will be applied to satisfy content requirements as appropriate. No upper-division credit is allowed for courses taken at a community college.

CSU Impaction

When a program or level (upper-division transfer) or campus receives more applications from eligible applicants during the initial application filing period than can be accommodated given the available resources, that campus or program is considered to be impacted.

CSU Local Definition

Each CSU campus determines how they define "local." Río Hondo College's local campus is California State University, Los Angeles.

Transfer applicants who are transferring directly from Río Hondo College are considered 'local' if Río Hondo College is the last institution attended and the majority of transferable units were completed at Río Hondo College. Students who earn an Associate Degree for Transfer (AA-T/AS-T) in a major deemed 'similar' to the Cal State LA major are also considered "local."

CSU Redirection Process

This is a process that ensures that applicants eligible for admission who cannot be accommodated at their first choice campus(es) are redirected to another CSU campus without having to complete another application for admission.

CSU Certification

Certification means that Río Hondo College has verified that a student has completed the lower-division general education requirements for the CSU. For full certification, students must complete 39 units from Categories A through E of the CSU General Education Requirements.

Certification from a community college is important because without it, students will be held to the general education requirements specific to the CSU campus to which they are transferring. Once the student is certified, the CSU campus will identify the student as having completed the lower-division general education requirements. (Please note that 9 units of upper-division general education courses must be completed at the CSU after transfer.) Courses in Area A and Area B4 must be completed with a "C-" or better.

It is the student's responsibility to request certification. To obtain the certification, students must file a Transcript Request Form with the Office of Admissions and Records. The final transcript and general education certification will then be sent to the CSU.

Because the requirements for a particular major may differ from one CSU campus to another, and because requirements may change yearly, students must consult regularly with a counselor when selecting courses.

CSU Application

Applications for admission to the CSU system are available online at www.calstate.edu/apply. Applications to impacted programs must be filed during the priority-filing period. Applications should be filed as early as possible to ensure priority consideration.

CSU Application Filing Periods

Students are encouraged to attend a Transfer Center application workshop before beginning the application process. Remember that applications are submitted one year prior to transferring.

The priority filing periods are:

- Fall Semester: October 1 - November 30
- Spring Semester: August 1-31

CSU General Education Breadth Course Requirements

The CSU GE Breadth is an agreement between Río Hondo and the CSU campuses regarding general education requirements. This list of courses is updated annually. Students can complete these courses to fulfill their lower-division general education requirements at a community college before they transfer to a CSU campus. The CSUGE Breadth is just one way to fulfill the lower-division general education requirements for the CSU. Students may also use IGETC to fulfill lower-division general

education requirements at the CSU (see in this catalog.) Courses taken by students for CSU GE Certification must be selected from the following list:

AREA A: English Language Communication and Critical Thinking:

Choose one course from each group. (9 units minimum)

A1: Oral Communication

SPCH 100, 101, 101H, 120, 140

A2: Written Communication

ENGL 101

A3: Critical Thinking

ENGL 201, 201H
PHIL 110, 110H, 112, 112H, 115
READ 101
SPCH 140

AREA B: Scientific Inquiry and Quantitative Reasoning:

Choose one course from each group; one of the science courses must include a laboratory (indicated by *). (9 units minimum)

B1: Physical Sciences

ASTR 110, 110H, 112*, 137*
CHEM 110*, 120*, 130*, 140*, 230*, 231*
GEOG 101, 101L*
GEOL 150, 151*, 152, 152L*

 SOC 101, 101H, 102, 105, 110, 114, 116, 120, 127, 130
 SPCH 150

HIGHLY RECOMMENDED: All CSU campuses have a graduation requirement in U.S. History, Constitution and American Ideals. Students may be certified as having completed this requirement at Río Hondo College by taking POLS 110 or 110H and one of the following U.S. history courses: HIST 143, 143H, 144, 144H, 156, 157, 158, 159, 159H, 170. These courses may be used to partially satisfy area C and/or D of the CSU GE Breadth.

AREA E: Lifelong Learning and Self-Development:

Choose one course (3 units minimum) from the following:

ANTH 110
 CD 106
 COUN 101, 104, 151
 DD 214 (see counselor for details)
 EDEV 101, 151
 EGSS 130
 HUSR 123
 KIN 159, 170, 190, 191, 192, 196
 NUTR 110
 PHIL 122

PSY 112, 121
 SOC 105, 110

AREA F: Ethnic Studies:

Choose one course (3 units minimum) from the following:

CHST 101
 EGSS 110

Students who begin and maintain continuous enrollment at Río Hondo College prior to Fall 2021 will not be required to complete a course in Area F. Instead, these students will complete 9 units from at least two disciplines in Area D. New students starting at Río Hondo College beginning Fall 2021 or later and returning students who have not maintained continuous enrollment will be required to complete a course in Area F in addition to completing two courses (6 units) in Area D from any discipline or disciplines. Please see a counselor for details.

NOTE: Courses may be used to fulfill only one General Education area.

For a complete listing of courses and their approval dates, students may log on to www.assist.org.

Transferring to University of California (UC)

The University of California (UC) has 9 campuses located throughout the state. Admission representatives from local UC campuses visit the Río Hondo College Transfer Center on a regular basis. Please check with the Transfer Center for more detailed information.

Course requirements vary from one UC campus to another. Therefore, it is advised that students work with a counselor to first select a particular UC campus and then formulate a strategy for completing that campus's general education requirements, major requirements, and admissions requirements. At most UC campuses, admission is competitive and a grade point average (GPA) higher than the 2.4 minimum is required. Some UC campuses require that students complete specific coursework in a major before transfer, and some majors require a higher grade point average than designated for general admission. See a Río Hondo counselor for further explanation and planning materials.

Courses transferable to UC campuses are identified in the course description in this Catalog and in the Class Schedule. Courses identified as meeting major preparation are listed in the ASSIST articulation database, which can be viewed at www.assist.org.

Transfer Admission Requirements

To be eligible for admission to a UC as a transfer student, a student must fulfill the following criteria:

- Complete 60 UC transferable semester units (90 quarter units) with a minimum GPA of 2.4 (2.8 for nonresidents); AND
- Complete the following course requirements, earning a grade of "C" or better in each course: two transferable college courses in English composition; one transferable college course in mathematical concepts and quantitative reasoning; four transferable college courses chosen from at least two of the following subject areas: arts and humanities, social and behavioral sciences, and physical and biological sciences.

NOTE: The IGETC (Intersegmental General Education Transfer Curriculum) Pattern will meet these course requirements. However, some students, depending on the transfer major and university, may not be well served by following IGETC; AND

- C. Complete as many major preparation courses as possible. Major preparation may be viewed at www.assist.org. NOTE: Selective majors require certain courses to be completed before transfer with a higher grade point average.

The UC allows up to 70 UC transferable units from a community college. Students who complete more than 70 units at the community college may still complete courses to fulfill course requirements but will not be able to transfer more than the 70 units of credit.

IMPORTANT! To be considered for fall admission at most campuses, students must plan to complete all courses required for admission no later than the spring semester preceding the fall they wish to enter the university.

Community College Transfer Priority Admission

UC campuses give priority consideration for admission to California community college students. A California community college student applying for admission to the University of California in advance standing will be given priority admission over all other applicants if:

1. The student was enrolled at one or more California community college for at least two terms (excluding summer sessions); AND
2. The last college attended before admission to a UC campus was a California community college (excluding summer sessions); AND
3. The student has completed at least 30 semester (45 quarter) UC transferable units at one or more California community college.

IGETC General Education Certification

Certification means that the last community college attended prior to transfer will verify that the student has completed the entire IGETC pattern. Students must apply for the IGETC certification at the community college they attended. Coursework taken at other community colleges will be certified at the discretion of the community college where the IGETC will be completed. Río Hondo College will certify for IGETC after completion of all courses required. It is the student's responsibility to request certification. To obtain the certification, students must file a Transcript Request Form with the Office of Admissions and Records. The final transcript and general education certification will then be sent to the UC.

Transfer Admission Guarantee (TAG)

The Transfer Admission Guarantee (TAG) program offers guaranteed admission to the students who complete a core set of courses at Río Hondo College a full term prior to transferring. Students in the TAG program can receive early review of their academic records, early admission notification, and specific guidance on major preparation and general education coursework. Río Hondo College has agreements with six UC campuses (UC Davis, UC Irvine, UC Merced, UC Riverside, UC San Diego, UC Santa Barbara, and UC Santa Cruz). TAG requirements vary by UC campus. The application filing period is typically September 1-30th of the year prior to transfer for Fall admission and May 1-31st for Winter/Spring. For further information, meet with a counselor in the Transfer Center.

The following are steps necessary for a student to be on pace for TAG to the University of California:

- Create a TAP account
- Consider IGETC as a general education pattern
- Complete major preparation courses
- TAG one campus
- Apply to UC
- Visit the Transfer Center in Room SS250 for more information.

UC Application

Applications for admission to the UC system are available online at www.universityofcalifornia.edu/apply.

NOTE: The UCs require applicants to respond to personal insight questions. Visit the Transfer Center for more information.

UC Application Filing Periods

Students are encouraged to attend a Transfer Center application workshop before beginning the application process. Remember that applications are submitted one year prior to transferring.

The priority filing periods are:

Fall Semester: October 1- November 30

Winter/Spring Semester: July 1 - July 31

All UC campuses accept applicants for fall admission. To determine which UC campuses accept applicants for winter and/or spring, call the specific campus or visit the Transfer Center.

Intersegmental General Education Transfer Curriculum (IGETC) For CSU & UC

The IGETC is an agreement between Río Hondo and the CSU and UC campuses regarding general education requirements. The IGETC list of courses was developed first in 1991 and is updated annually. Students can complete these courses to fulfill their lower-division general education requirements at a community college before they transfer to a CSU or UC campus. The IGETC is just one way to fulfill the lower-division general education requirements of a CSU or UC campus; it is not recommended for certain majors and colleges.

Completion of all the requirements in the IGETC will permit a student to transfer from a community college to a campus in either the California State University or University of California system without the need to take additional lower-division general education courses. Transfer students will receive certification for all of their lower division general education requirements only after completing all of the subject areas listed below with a "C" grade or better in each course.

Area 1: ENGLISH COMMUNICATION

CSU: 3 courses required, one from each group below

UC: 2 courses required, one each from 1A and 1B

1A – English Composition

One course of 3 semester/4 quarter units

ENGL 101

1B –Critical Thinking and Composition

One course of 3 semester/4 quarter units

ENGL 201 or 201H, PHIL 110, 110H

1C –Oral Communications: (CSU REQUIREMENT ONLY)

One course of 3 semesters/4 quarter units.

SPCH 100, 101, 101H, 120,140

Area 2: MATHEMATICAL CONCEPTS & QUANTITATIVE REASONING

One course: 3 semester/4 quarter units

MATH 130+, 130H+, 150, 160+, 170+, 180+,
190+, 190H, 191, 250, 251, 260, 270
PSY 190+

+ Indicates that UC course credit may be limited.
Please consult a counselor for additional
information.

Area 3: ARTS & HUMANITIES

At least 3 courses with at least one course from Arts and one
course from Humanities - 9 semester/12 quarter units.

3A: ARTS (3 units minimum):

ARCH 103
ART 104, 105, 105H, 106, 106H, 107, 108, 109,

Area 5: PHYSICAL & BIOLOGICAL SCIENCES

At least 2 courses are required, one from 5A and 5B. One course
must include a corresponding laboratory from 5A or 5B.

Laboratory courses (5C) are noted with * symbol (7-9 semester/
9-11 quarter units.)

5A: PHYSICAL SCIENCES (One course minimum):

ASTR 110, 110H, 112*, 137*
CHEM 110*, 120*, 130*, 140*, 230*, 231*
GEOG 101, 101L*
GEOL 150, 151*, 152, 152L*
PHY 120*+, 150*+, 160*+, 211*+, 212*+,
213+*

5B: BIOLOGICAL SCIENCES (One course minimum):

ANTH 101, 101H, 101L*
BIOL 101*, 105, 105L*, 111, 111L*, 120, 120L*,
200*, 201*, 206, 222*, 226*
PSY 210, 210H

5C: LABORATORY ACTIVITY: This requirement may
be met by completing a lab course that corresponds to a
lecture course found above in 5A or 5B with *symbol. +
Indicates that UC course credit may be limited. Please
consult the catalog course description for additional
information.

Area 6: LANGUAGE OTHER THAN ENGLISH (UC REQUIREMENT ONLY)

Proficiency equivalent to two years of high school study in the
same language or at least 1 course from:

ASL 101, 102, 201
CHIN 101, 102
FR 101, 102, 201, 202
JAPN 101, 102
SPAN 101, 101S, 102, 102S, 201, 201H, 202

*(If using high school courses to fulfill this area, grades of "C-" are
acceptable. Official transcripts must be on file in the Admissions
and Records Office)*

Area 7: ETHNIC STUDIES

One course: 3 semester/4 quarter units

CHST 101
EGSS 110

Students who start and maintain continuous enrollment at Río
Hondo College prior to Fall 2023 will not be required to complete
a course in Area 7. Instead, these students will complete 9 units
from at least two different disciplines in Area 4. New students
starting at Río Hondo College beginning Fall 2023 or later and
returning students who have not maintained continuous
enrollment will be required to complete a course in Area 7 in
addition to completing two courses (6 units) in Area 4 from two
different disciplines. Please see a counselor for details.

AMERICAN INSTITUTIONS REQUIREMENT

CSU has an American Institutions graduation requirement that
can be fulfilled by taking the following: 6 units: Choose one
course from group 1 and one course from group 2.

1. POLS 110, 110H
2. HIST 143, 143H, 144, 144H, 156, 157, 158, 159, 159H, 170

CERTIFICATION – Río Hondo College will certify general
education courses for the UC and CSU systems. Request for
IGETC certification can be made on the Transcript Request Form

with Admissions and Records. Only courses taken at U.S. regionally accredited institutions that meet the IGETC Standards will be certified in the appropriate areas. Official transcripts must be on file in the Admissions and Records Office. Courses taken at foreign institutions are not acceptable except for certification of proficiency in a language other than English. Partial Certification is permitted if the student has completed all but two courses in the pattern.

For a complete listing of courses and their approval dates, students may [visit www.assist.org](http://www.assist.org).

Transferring to Independent Colleges & Universities

For information regarding all transfer deadlines, students should consult with Río Hondo College counselors or the Transfer Center.

Although admission requirements vary and are listed in the catalogs of the various universities and colleges, students who transfer to independent colleges and universities are given credit for most, if not all, of their community college work. Most colleges and universities give full credit for general education courses and for most other courses designated by the community college as transferable.

Río Hondo College has developed articulation agreements with many private, independent, and out-of-state colleges and universities. Transfer students who plan to attend a private college or university are encouraged to consult with a counselor to create their education plan. For information regarding deadlines and articulation agreements, students should visit the Transfer Center.

Transfer Web Sites

Below are listed some of the web sites available to help students who wish to transfer.

ACCOUNTING

Associate of Science Degree

Description

The **Associate of Science Degree in Accounting** prepares students for employment and advancement opportunities in business and industry such as financial institutions, hospitals, manufacturing and construction companies, wholesale and retail companies, transportation, utilities, educational institutions, all levels of government, and the military. Entry-level employment opportunities include positions in general bookkeeping, accounts receivable/payable, payroll, income tax preparation, cost accounting, and auditing. Accounting majors intending to obtain a bachelor's degree in accounting are advised to refer to the Business Administration transfer curriculum.

To acquire the **Associate of Science Degree in Accounting**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 29.0-29.5
ACCT 101	Financial Accounting	4.0

MGMT 208	Business Communications*	3.0
OR		
ENGL 101	College Composition and Research*	3.5
ACCT 106	Computerized Accounting	3.0
ACCT 103	Payroll Accounting	3.0

Total: 16.0-16.5

ACCOUNTING/INCOME TAX AND PAYROLL Certificate of Achievement

Description

The **Income Tax and Payroll Certificate of Achievement** is intended for students desiring to enter the tax preparation and/or payroll field with a minimum of course requirements. Students will be able to gain the knowledge and analytical tools necessary to use financial data effectively in preparing a variety of tax returns with specialized training in payroll. Common duties performed include payroll tax reporting, payroll accounting systems maintenance, and posting payroll transactions for journals/ledgers.

To acquire the **Certificate of Achievement in Income Tax and Payroll**, it is necessary to complete the following courses:

Required Courses		Units: 16.0
ACCT 101	Financial Accounting	4.0
OR		4.0
ACCT 101H	Financial Accounting Honors*	4.0

ACCT 103	Payroll Accounting	3.0
ACCT 105	Income Tax Accounting	4.0
ACCT 106	Computerized Accounting	3.0
ACCT 108	Volunteer Income Tax Assistance Program I	2.0
ACCT 109	Volunteer Income Tax Assistance Program II*	1.0
*Prerequisite		

Total: 16.0

ACCOUNTING/INCOME TAX PREPARER Certificate of Skill Proficiency

Description

This certificate is designed for individuals desiring to enter the tax preparation field with a minimum of course requirements. Upon successful completion of this certificate, students will possess the knowledge and practical experience necessary to prepare personal income taxes effectively. By completing the tax course, students will receive the qualifying education required by the California Tax Education Council to become a California Registered Tax Preparer.

Required Courses		Units: 6.0
ACCT 105	Income Tax Accounting	4.0
ACCT 108	Volunteer Income Tax Assistance Program I	1.0
ACCT 109	Volunteer Income Tax Assistance Program II*	1.0
*Prerequisite		

Total: 6.0

ADMINISTRATION OF JUSTICE Associate in Science for Transfer

Description

The **Associate in Science in Administration of Justice for Transfer (AS-T) Degree** is intended to meet the lower division requirements for Criminal Justice majors (or similar majors) at a CSU campus that offers a Criminal Justice baccalaureate degree.

This degree is designed for students interested in an introduction to the field of Administration of Justice and for students looking to further their understanding of the criminal justice system in America (police, courts, and corrections) and familiarize students with academic, career and volunteer opportunities in the field. These courses will provide students with a solid foundation in Administration of Justice that will serve them for either transferring or in the workplace.

In addition to the courses listed below, the following requirements must be met for completion of the AS-T Degree in Administration of Justice:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for courses accepted into the Administration of Justice major at the CSU where they seek transfer.

Required Courses		Units: 6.0
AJ 101	Introduction to Administration of Justice	3.0
AJ 106	Criminal Law I*	3.0
Choose two courses from the following list:		Units: 6.0
AJ 102	Criminal Procedures	3.0
AJ 104	Legal Aspects of Evidence	3.0
AJ 105	Community Relations/Multicultural Issues Within Public Service	3.0
AJ 207	Juvenile Law and Procedure	3.0
AJ 208	Principles of Investigation	3.0

Choose two courses from the following list: (Any course not used above)		Units: 6.0-7.0
AJ 107	Criminal Law II*	3.0
AJ 275	Introduction to Forensic Science	3.0
CORR 101	Introduction to Corrections	3.0
		4.0

OR		
SOC 101H	Introduction to Sociology Honors*	3.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

*Prerequisite

Total: 18.0-19.0

ADMINISTRATION OF JUSTICE

Associate of Science Degree

Description

Students desiring careers in law enforcement may elect a program from Administration of Justice. This program is designed to be transferable or job-oriented, depending on student need. Students seeking careers in corrections, probation and parole should specialize in the corrections option. Some of these areas require a four-year degree. Students seeking employment with a local, state or federal law enforcement agency should specialize in Administration of Justice. Every student should seek counseling with the assigned member of the Counseling staff in order to develop a comprehensive course of study within his/her career choice. It is highly recommended that the Administration of Justice student take Introduction to Administration of Justice before advancing to the next courses. This provides a foundation of basic understanding of the Criminal Justice System. The student is now prepared for a study of courses in the Administration of Justice.

To acquire the **Associate of Science Degree in Administration of Justice**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 18.0
AJ 101	Introduction to Administration of Justice	3.0
AJ 102	Criminal Procedures	3.0
AJ 104	Legal Aspects of Evidence	3.0
AJ 105	Community Relations/Multicultural Issues Within Public Service	3.0
AJ 106	Criminal Law I*	3.0
AJ 107	Criminal Law II*	3.0

*Prerequisite

Plus 6 units from the following courses:		Units: 6.0
GIS 281	Crime Mapping and Analysis	4.0
Administration of Justice Courses (Subject Titles & Units will vary)		

Corrections Courses (Subject Titles & Units will vary)

Police Academy Courses (Subject Titles & Units will vary)

Total: 24.0

ADMINISTRATION OF JUSTICE Certificate of Achievement

Description

The **Administration of Justice Certificate of Achievement** is designed to prepare students to meet the needs of entry level positions in the broad field of law enforcement and security career fields. The curriculum will prepare students with a foundation in Administration of Justice/Law Enforcement and provide them with the knowledge to enter varied career areas. The skills developed during class will enhance the student's knowledge in the area of the criminal justice system as well as an in-depth understanding of law enforcement, criminal law and procedures, forensic evidence examination and the judicial process.

To acquire the **Certificate of Achievement in Administration of Justice**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
AJ 101	Introduction to Administration of Justice	3.0
AJ 102	Criminal Procedures	3.0
AJ 104	Legal Aspects of Evidence	3.0
AJ 105	Community Relations/Multicultural Issues Within Public Service	3.0
Total: 12.0		

ADMINISTRATION OF JUSTICE/INVESTIGATIONS Certificate of Achievement

Description

The **Administration of Justice Certificate of Achievement in Investigations** is designed to prepare students to meet the needs of entry-level positions in the broad fields of law enforcement and security. The curriculum prepares students with a foundation in administration of justice/law enforcement and provides them with the knowledge to enter varied career areas. The skills developed in class will enhance the students' knowledge in the area of the criminal justice system and provide an in-depth understanding of law enforcement, criminal law and procedures, investigations, forensic evidence examination, and the judicial process.

To acquire the **Certificate of Achievement in Investigations**, it is necessary to complete the following courses:

Required Course		Units: 12.0
AJ 102	Criminal Procedures	3.0
AJ 104	Legal Aspects of Evidence	3.0
AJ 208	Principles of Investigation	3.0
AJ 275	Introduction to Forensic Science	3.0
Total: 12.0		

ADMINISTRATION OF JUSTICE/PAROLE Certificate of Achievement

Description

The **Administration of Justice Certificate of Achievement in Parole** is designed to prepare students to meet the needs of entry-level positions in the fields of corrections and parole. The curriculum prepares students with a foundation in administration of justice/law enforcement and provides them with the knowledge to enter various career areas. The skills developed in classes enhance students' knowledge in the area of the criminal justice parole system.

To acquire the **Certificate of Achievement in Parole**, it is necessary to complete the following courses:

Required courses		Units: 12.0
AJ 041	Effective Written Communication for Public Service Personnel	3.0
AJ 104	Legal Aspects of Evidence	3.0
AJ 105	Community Relations/Multicultural Issues Within Public Service	3.0
AJ 208	Principles of Investigation	3.0
Total: 12.0		

ALTERNATIVE ENERGY TECHNOLOGY

Associate of Science Degree

Description

The courses listed in the Associate of Science Degree are designed to prepare an individual for entry-level employment within the alternative energy industry as an integrator, designer, or as a maintenance or repair worker. This Degree is designed to increase the number of students earning an Associate degree from Rio Hondo and to guide students along a path to transfer and promotion that is both efficient and sufficient for their continued academic success.

To acquire the **Associate of Science Degree in Alternative Energy Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 34.0
AET 120	Introduction to Alternative Energy Technology	3.0
OR		
ET 120	Introduction to Alternative Energy Technology	3.0
		3.0
AET 121	Photovoltaic Systems Design and Installation	3.0
OR		
ET 121	Photovoltaic Systems Design and Installation	3.0
		3.0
AET 122	Advanced Photovoltaic Systems Design and Installation*	3.0
OR		
ET 122	Advanced Photovoltaic Systems Design and Installation*	3.0
		3.0
AET 123	Wind Energy Systems Design and Installation	3.0
OR		
ET 123	Wind Energy Systems Design and Installation	3.0
		3.0
AET 124	Advanced Wind Energy Systems Design and Installation*	3.0
OR		
ET 124	Advanced Wind Energy Systems Design and Installation*	3.0
		3.0
AET 181	Home Energy Management and Auditing	3.0
OR		
ET 181	Home Energy Management and Auditing	3.0
OR		
AET 182	Industrial Energy Management and Auditing	3.0
OR		
ET 182	Industrial Energy Management and Auditing	3.0
		3.0
AET 280	Green Building Design Principles	3.0
OR		
ET 280	Green Building Design Principles	3.0
ARCH 110	Construction Document Reading and Estimating	3.0
ELEC 050	Introduction to the Electrical Industry	2.0
GIS 120	Introduction to Geographic Information Systems and Spatial Analysis	4.0
TCED 054	OSHA Workplace Safety II	4.0
*Prerequisite		
		Total: 34.0

ALTERNATIVE ENERGY TECHNOLOGY Certificate of Achievement

Description

The courses listed in this certificate compile a comprehensive list of job-related skills needed to acquire Alternative Energy technical skills. The skills acquired during class will prepare an individual for entry-level employment as an Alternative Energy Technician that may find employment as an installer, designer or as a maintenance and/or repair worker.

To acquire the **Certificate of Achievement in Alternative Energy Technology**, it is necessary to complete the following courses:

Required Courses		Units: 16.0
AET 120	Introduction to Alternative Energy Technology	3.0
OR		
ET 120	Introduction to Alternative Energy Technology	3.0
		3.0
AET 121	Photovoltaic Systems Design and Installation	3.0
OR		
ET 121	Photovoltaic Systems Design and Installation	3.0
		3.0
AET 122	Advanced Photovoltaic Systems Design and Installation*	3.0
OR		
ET 122	Advanced Photovoltaic Systems Design and Installation*	3.0
		3.0
AET 123	Wind Energy Systems Design and Installation	3.0
OR		
ET 123	Wind Energy Systems Design and Installation	3.0
		3.0
ET 124	Advanced Wind Energy Systems Design and Installation *	3.0
OR		
ET 124	Advanced Wind Energy Systems Design and Installation *	3.0
		3.0
TCED 044	OSHA 10 for the Workplace	1.0
*Prerequisite		
		Total: 16.0

AMERICAN SIGN LANGUAGE Certificate of Achievement

Description

The **Certificate of Achievement in American Sign Language** is designed to provide students with a strong foundation in communication through American Sign Language (ASL). This certificate is intended for students pursuing other degrees of careers not directly related to Deaf people or ASL but who still want to learn the language. With this certificate, the student can petition their employer for any benefits that may be available for those who have skills in ASL.

Students who successfully complete the certificate will be able to communicate competently in ASL on topics related to their profession. While students will not be able to act as an interpreter, they will be able to communicate directly with clients, customers, coworkers, or community members without the need for interpretation. Students will also have spent time within the Deaf community and will be familiar with where and how to locate social events related to the Deaf community and Deaf culture.

To acquire the **Certificate of Achievement in American Sign Language**, it is necessary to complete the following courses:

Required Courses		Units: 18.0
ASL 101	American Sign Language I	4.5
ASL 102	American Sign Language II*	4.5
ASL 201	American Sign Language III*	4.5
ASL 202	American Sign Language IV*	4.5
*Prerequisite		
		Total: 18.0

AMERICAN SIGN LANGUAGE/DEAF STUDIES

Associate of Arts Degree

Description

The **Associate of Arts Degree in Deaf Studies** is a foundational degree for those wishing to obtain mastery of American Sign Language (ASL). By completion of specific General Education courses, this program fulfills many of the requirements and foundation courses for transfer to baccalaureate Deaf Studies majors.

American Sign Language skills can be applied immediately to career choices in the fields of education, nursing, counseling, film, or any other area Deaf people live and work. Students can further their careers by pursuing degrees in Deaf education to be credentialed teachers to Deaf and Hard of Hearing (DHH) students. Students may also pursue a career in ASL pedagogy, to teach ASL in a secondary or post-secondary educational setting.

To acquire the **Associate of Arts Degree in Deaf Studies**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 32.0
ASL 101	American Sign Language I	4.5
ASL 102	American Sign Language II*	4.5
ASL 201	American Sign Language III*	4.5
ASL 202	American Sign Language IV*	4.5
ASL 120	Introduction to Deaf Studies*	3.0
ASL 124	Deaf Culture*	3.0
ASL 250	ASL Linguistics*	3.0
ASL 270	ASL Literature*	3.0
ASL 280	ASL Storytelling*	2.0
*Prerequisite		
		Total: 32.0

AMERICAN SIGN LANGUAGE/FOUNDATIONS OF INTERPRETING

Associate of Arts Degree

Description

The **Associate of Arts Degree in Foundations of Interpreting** will prepare students interested in laying a foundation for further study and for a baccalaureate degree in American Sign Language (ASL) Interpreting from a four-year college or university.

With a degree in interpreting, students will be prepared for employment anywhere Deaf people are present. This includes a range of possibilities from potentially interpreting for the President of the United States of America to guiding a kindergarten student on coloring inside the lines. In addition to acquiring entry level skills in the process of interpreting, students will learn important business and ethical practices. By completion of specific General Education courses, this program fulfills many of the requirements and foundation courses for transfer to baccalaureate in Sign Language Interpreting majors.

To acquire the **Associate of Arts Degree in Foundations of Interpreting**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 32.0
ASL 101	American Sign Language I	4.5
ASL 102	American Sign Language II*	4.5
ASL 201	American Sign Language III*	4.5
ASL 202	American Sign Language IV*	4.5
ASL 124	Deaf Culture*	3.0
ASL 211	Beginning Interpreting + Ethics 1*	3.0
ASL 212	Beginning Interpreting + Ethics 2*	3.0
ASL 220	Pathways to Interpreting Careers*	2.0
		3.0
ENGL 127	Language Structure and Language Use: Introduction to Linguistics*	3.0
OR		
ENGL 127H	Language Structure and Language Use: Introduction to Linguistics Honors*	3.0
*Prerequisite		
		Total: 32.0

ANIMATION Associate of Arts Degree

Description

This Degree is recommended for those who are interested in the field of Entertainment Art and Animation. Students are advised to check with the Counseling Department for the courses accepted into the Animation major at the four-year institutions where they seek transfer.

To acquire the **Associate of Arts Degree in Animation**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 23.0
ANIM 101	Introduction to Digital 3-D Animation	4.0
ANIM 105	Principles of 3-D Digital Animation	4.0
		3.0
ART 105	Survey of Western Art: Prehistory through the Middle Ages	3.0
OR		
ART 105H	Survey of Western Art: Prehistory through the Middle Ages Honors*	3.0
		3.0
ART 106	Survey of Western Art: Renaissance to Contemporary	3.0
OR		
ART 106H	Survey of Western Art: Renaissance to Contemporary Honors*	3.0
		3.0
ART 120	Two-Dimensional Design	3.0
ART 121	Three-Dimensional Design	3.0
ART 130	Freehand Drawing I	3.0
Choose one course from the list below		Units: 3.0-4.0
ANIM 110	Digital Character Animation	4.0
ANIM 120	Lighting and Rendering	4.0
ANIM 130	Modeling for Games	4.0
ART 170	Introduction to Digital Painting	3.0
ART 260	Figure Drawing for Animators*	3.0
*Prerequisite		
		Total: 26.0-27.0

ANIMATION/ENTERTAINMENT ART-DIGITAL CHARACTERS Certificate of Achievement

Description

Entertainment Art students work in a collaborative environment on project based assignments that revolve around creativity and innovation. Students are taught the skills they will need in order to create amazing artwork using the latest digital tools. The curriculum centers on the current production techniques used in designing the visual components found in games, apps, feature films and the web. From the fundamentals of 2D visual development through the pipeline for creating a finished 3D piece, students are guided by industry professionals. Entertainment Art students finish their training with portfolios full of intriguing and elaborate digital characters.

To acquire the **Certificate of Achievement in Entertainment Art-Digital Characters**, it is necessary to complete the following courses:

Required Courses		Units: 22.0
ANIM 110	Digital Character Animation	4.0
ANIM 130	Modeling for Games	4.0
ANIM 133	Character Design	4.0
ANIM 140	Entertainment Art Portfolio*	4.0
ART 170	Introduction to Digital Painting*	3.0
ART 260	Figure Drawing for Animators*	3.0
*Prerequisite		
		Total: 22.0

ANIMATION/ENTERTAINMENT ART-DIGITAL ENVIRONMENTS

Certificate of Achievement

Description

Entertainment Art students work in a collaborative environment on project based assignments that revolve around creativity and innovation. Students are taught the skills they will need in order to create amazing artwork using the latest digital tools. The curriculum centers on the current production techniques used in designing the visual components found in games, apps, feature films and the web. From the fundamentals of 2D visual development through the pipeline for creating a finished 3D piece students are guided by industry professionals. Entertainment Art students finish their training with portfolios full of captivating digital environments, vehicles and props.

To acquire the **Certificate of Achievement in Entertainment Art-Digital Environments**, it is necessary to complete the following courses:

Required Courses		Units: 19.0
ANIM 130	Modeling for Games	4.0
ANIM 134	Mech and Vehicle Design	4.0
ANIM 135	Environment Design	4.0
ANIM 140	Entertainment Art Portfolio*	4.0
ART 170	Introduction to Digital Painting*	3.0
*Prerequisite		
		Total: 19.0

ANTHROPOLOGY

Associate in Arts for Transfer

Description

The **Associate in Arts in Anthropology for Transfer (AA-T) Degree** is intended to meet the lower division requirements for Anthropology majors (or similar majors) at a CSU campus that offers an Anthropology baccalaureate degree. This degree focuses on the critical analysis of human beings from both a cultural and biological perspective. The diversity of humans is investigated through a time cross-culturally in terms of their behavioral adaptations as well as using the framework of evolution to understand biological adaptation. Students will gain a basic understanding of the various fields and sub-fields of the discipline of Anthropology through their elective choices.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Anthropology:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for courses accepted into the Anthropology major at the CSU where they seek transfer.

Required Courses		Units: 13.0
ANTH 101	Introduction to Physical Anthropology	3.0
OR		
ANTH 101H	Introduction to Physical Anthropology Honors*	3.0
ANTH 101L	Physical Anthropology Lab*	1.0
		3.0
ANTH 102	Introduction to Cultural Anthropology	3.0
OR		
ANTH 102H	Introduction to Cultural Anthropology Honors*	3.0
ANTH 103	Introduction to Archaeology	3.0

ANTH 104	Introduction to Language and Culture	3.0
Choose one course from the following:		Units: 3.0-4.0
ANTH 110	Gender and Sexuality	3.0
ANTH 125	Religion, Magic, Witchcraft, and the Supernatural	3.0
PSY 200	Research Methods in Psychology*	3.0
GEOL 150	Physical Geology	3.0
		4.0
MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0
OR		
PSY 190	Statistics for the Behavioral Sciences*	4.0
Choose one course from the following		Units: 3.0-4.0
ANTH 110	Gender and Sexuality	3.0
ANTH 115	Medical Anthropology: Culture, Health, and Healing	3.0
ANTH 125	Religion, Magic, Witchcraft, and the Supernatural	3.0
HIST 156	Black American Experience to 1865	3.0
HIST 157	Black American Experience Since 1865	3.0
HIST 158	US Comparative History of American Indians and Black Americans	3.0
		3.0
HIST 159	US Comparative History of Mexican and Asian Americans and Women	3.0
OR		
HIST 159H	US Comparative History of Mexican and Asian Americans and Women Honors *	3.0
GEOG 102	Introduction to Cultural Geography	3.0
		4.0
MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0
OR		
PSY 190	Statistics for the Behavioral Sciences*	4.0
		3.0
SOC 101	Introduction to Sociology	3.0
OR		
SOC 101H	Introduction to Sociology Honors*	3.0
SOC 110	Human Sexuality from a Cross-Cultural Perspective	3.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

*Prerequisite

Total: 19.0-21.0

ARCHITECTURAL DESIGN AND DRAWING

Associate of Science Degree

Description

This major provides a focused course of study for students in preparation for careers as designers of architectural projects and potential licensure as architects. Emphasis is placed on project visualization, industry-standard drawing techniques and conventions, computer-aided drafting (CAD) skills, and the specific preparation of architectural building plans. Additionally, the integral coursework includes a focus on the official code requirements necessary for residential and commercial building projects. The curriculum also includes introductory coursework in the associated fields of project engineering and construction.

As a degree (in contrast to a certificate), this program requires the completion of general education courses; however, if transfer to a university for a baccalaureate or advanced degree is desired, interested students should carefully consider the specific admission and transfer requirements for individual colleges and universities. This program is not designed to fulfill the most common requirements for transfer to a university in architecture; please refer to the Associate of Science Degree in Architecture for such preparation.

To acquire the **Associate of Science Degree in Architectural Design and Drawing**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College general education and proficiency, California State University General Education Breadth (CSU GE-Breadth), or Intersegmental General Education Transfer Curriculum (IGETC) requirements.

Required Courses:		Units: 28.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		3.0
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
ARCH 110	Construction Document Reading and Estimating	3.0
ARCH 115	Introduction to Residential Architecture: Drawing and Design	4.0
ARCH 125	Residential Architecture: Design & Construction*	4.0
ARCH 225	Commercial Architecture: Design and Construction*	4.0
CIV 140	Civil Engineering & Construction Fundamentals	4.0
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0
		4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0
Choose a minimum of 3 units from the following:		Units: 3.0-4.0
ARCH 215	Architectural Perspective and Rendering*	4.0
ARCH 260	Residential Architecture Using Revit and 3D Software*	4.0
		4.0
ARCH 280	Advanced MicroStation for CADD & BIM Applications*	4.0
OR		
ENGT 280	Advanced MicroStation for CADD & BIM Applications*	4.0
ARCH 290	Work Experience Education/Internship for Architecture-Related Fields	1.0-4.0
ARCH 299	Directed Study in Architecture Design & Drawing**	1.0-3.0
ENGT 200	Intermediate CAD Modeling for Design & Production*	4.0
*Prerequisite		
**minimum GPA requirements or instructor approval		
		Total: 31.0-32.0

ARCHITECTURAL DESIGN AND DRAWING TECHNICIAN Certificate of Achievement

Description

This certificate of achievement provides a focused course of study for students in preparation for careers as designers of architectural projects and potential licensure as architects. Emphasis is placed on project visualization, industry-standard drawing techniques and conventions, computer-aided drafting (CAD) skills, and the specific preparation of architectural building plans. Additionally, the integral coursework includes a focus on the official code requirements necessary for residential and commercial building projects. The curriculum also includes introductory coursework in associated fields of project engineering and construction.

To acquire the **Certificate of Achievement in Architectural Design and Drawing Technician**, it is necessary to complete the following courses:

Required Courses:		Units: 28.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		3.0
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
ARCH 110	Construction Document Reading and Estimating	3.0
ARCH 115	Introduction to Residential Architecture: Drawing and Design	4.0
ARCH 125	Residential Architecture: Design & Construction*	4.0
ARCH 225	Commercial Architecture: Design and Construction*	4.0
CIV 140	Civil Engineering & Construction Fundamentals	4.0
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0
		4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0

Choose a minimum of 3 units from the following:		Units: 3.0-4.0
ARCH 215	Architectural Perspective and Rendering *	4.0
ARCH 260	Residential Architecture Using Revit and 3D Software *	4.0
ARCH 280	Advanced MicroStation for CADD & BIM Applications *	4.0
OR		
ENGT 280	Advanced MicroStation for CADD & BIM Applications *	4.0
ARCH 290	Work Experience Education/Internship for Architecture-Related Fields	1.0-4.0
ARCH 299	Directed Study in Architecture Design & Drawing **	1.0-3.0
ENGT 200	Intermediate CAD Modeling for Design & Production *	4.0

*Prerequisite

**minimum GPA requirements or instructor approval

Total: 31.0-32.0

ARCHITECTURAL DRAFTING Certificate of Achievement

Description

This certificate of achievement provides a focused course of study for students in preparation for careers as drafters in support of architectural projects. Emphasis is placed on visualization of three-dimensional objects and the methods and techniques to express buildings and similar objects on two-dimensional media. Drafting basics are addressed, including linework, dimensioning, and symbology in the context of appropriate industry standards. The coursework includes the preparation of architectural building plans as required for project approval and construction. The use of computer-aided drafting (CAD) software and state-of-the-art building modeling software is an integral component to the certificate.

To acquire the **Certificate of Achievement in Architectural Drafting**, it is necessary to complete the following courses:

Required Courses:		Units: 15.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
ARCH 115	Introduction to Residential Architecture: Drawing and Design	4.0
ARCH 260	Residential Architecture Using Revit and 3D Software *	4.0
OR		
ARCH 280	Advanced MicroStation for CADD & BIM Applications *	4.0
OR		
ENGT 280	Advanced MicroStation for CADD & BIM Applications *	4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0
*Prerequisite		
Choose a minimum of 1 unit from the following:		Units: 1.0-4.0
ARCH 290	Work Experience Education/Internship for Architecture-Related Fields	1.0-4.0
ARCH 299	Directed Study in Architecture Design & Drawing ***	1.0-3.0
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0

***minimum GPA requirements or instructor approval

Total: 16.0-19.0

ARCHITECTURAL THEORY AND DESIGN

Certificate of Achievement

Description

This certificate of achievement provides a focused course of study for students in preparation for careers in the field of architecture. Emphasis is placed on the aesthetics of architectural design work along with visualization of three-dimensional objects, and the methods and techniques to express buildings and similar objects on two-dimensional media. Concepts of sketching and perspective as well the use of color, texture, and materials are incorporated into design. Historical styles and the application of styles in design elements are also part of the curriculum. The use of computer-aided drafting (CAD)/modeling software is an integral component to the certificate, alongside traditional tools for artistic expression. Coursework involves the preparation of projects and models accomplished within a design lab environment as experienced in higher levels of architectural education and in common workplace conditions.

To acquire the **Certificate of Achievement in Architectural Theory and Design**, it is necessary to complete the following courses:

Required Courses:		Units: 16.0
ARCH 215	Architectural Perspective and Rendering*	4.0
ARCH 235	Architectural Design Studio*	4.0
ARCH 236	Architectural Design Studio II*	4.0
ENGT 200	Intermediate CAD Modeling for Design & Production*	4.0
*Prerequisite		
		Total: 16.0

ARCHITECTURE

Associate of Science Degree

Description

This program leads to the **Associate of Science Degree in Architecture** for advanced technical preparation placement as well as employment in architectural firms, the architectural/engineering/construction (AEC) and design industries, and public works/utilities. The program includes applications such as building information modeling (BIM), computer-assisted design and drafting (CADD), Leadership in Energy and Environmental Design (LEED), 3D printing, and traditional drafting methods and standards. In completing specific General Education courses, this program fulfills many of the requirements and foundational courses for transfer to baccalaureate degree granting institutions and architecture-related majors, but does not fulfill all transfer requirements for specific baccalaureate degree programs.

To acquire the **Associate of Science Degree in Architecture**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 36.0
ARCH 103	History of Architecture: Renaissance to Present	3.0
ARCH 115	Introduction to Residential Architecture: Drawing and Design	4.0
ARCH 125	Residential Architecture: Design & Construction*	4.0
ARCH 215	Architectural Perspective and Rendering*	4.0
ARCH 225	Commercial Architecture: Design and Construction*	4.0
ARCH 235	Architectural Design Studio*	4.0
ARCH 260	Residential Architecture Using Revit and 3D Software*	4.0
		3.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
Select a minimum of 4 units from the following:		Units: 4.0
ARCH 236	Architectural Design Studio II*	4.0
ARCH 261	Commercial Architecture Using Revit with Structural and MEP Applications*	4.0
ENGT 200	Intermediate CAD Modeling for Design & Production*	4.0
*Prerequisite		
		Total: 40.0

ARCHITECTURE: BASIC KNOWLEDGE

Certificate of Achievement

Description

This Certificate of Achievement provides a focus on the basic knowledge courses of study for students in preparation to enter into majors in Architecture. Emphasis is placed on foundational knowledge in the use of architectural document reading and architectural styles. Coursework involves the interpretation of basic architectural documents and projects accomplished within an industry environment, as is common in entry-level workplace conditions.

To acquire the **Certificate of Achievement in Architecture: Basic Knowledge**, it is necessary to complete the following courses:

Required Courses		Units: 8.0
ARCH 103	History of Architecture: Renaissance to Present	3.0
ARCH 110	Construction Document Reading and Estimating	3.0
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0
		Total: 8.0

ARCHITECTURE: BASIC SKILLS

Certificate of Achievement

Description

This Certificate of Achievement provides a focus on the basic skill courses of study for students in preparation to enter into majors in Architecture. Emphasis is placed on foundational skills in the use of architectural document reading and creating, use of industry tools. Coursework involves the preparation of basic Architectural documents and projects accomplished within an industry environment, as is common in entry-level workplace conditions.

To acquire the **Certificate of Achievement in Architecture: Basic Skills**, it is necessary to complete the following courses:

Required courses:		Units: 11.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
ARCH 115	Introduction to Residential Architecture: Drawing and Design	4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
Select one of the following courses:		Units: 2.0-3.0
ARCH 103	History of Architecture: Renaissance to Present	3.0
OR		
ARCH 110	Construction Document Reading and Estimating	3.0
OR		
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0
		Total: 13.0-14.0

ARCHITECTURE/RESIDENTIAL ARCHITECTURE DESIGN

Certificate of Achievement

Description

This certificate of achievement provides a focused course of study for students in preparation for careers as licensed architects or designers, with a focus on single-family homes or duplexes. Emphasis is placed on drafting basics including linework, dimensioning, and symbology in the context of appropriate industry standards, and with the use of computer-aided drafting (CAD) software. Course instruction regarding the requirements of current building codes and how they affect residential design is an integral component to the certificate.

To acquire the **Certificate of Achievement in Residential Architecture Design**, it is necessary to complete the following courses:

Required Courses:		Units: 15.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
ARCH 115	Introduction to Residential Architecture: Drawing and Design	4.0
ARCH 125	Residential Architecture: Design & Construction	4.0
		4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0
*Prerequisite		
Choose a minimum of 1 unit from the following:		Units: 1.0-4.0
ARCH 290	Work Experience Education/Internship for Architecture-Related Fields	1.0-4.0
ARCH 299	Directed Study in Architecture Design & Drawing**	1.0-3.0
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0
**minimum GPA requirements or instructor approval		
		Total: 16.0-19.0

ART HISTORY

Associate in Arts for Transfer

Description

The **Associate in Arts in Art History for Transfer (AA-T) Degree** is intended to meet the lower division requirements for Art History majors or Art majors with a concentration in Art History (or similar majors) at a CSU campus that offers an Art or Art History baccalaureate degree. This degree is designed for students interested in an introduction to the discipline and methodologies of art history. The coursework will provide students with an understanding of the artistic contributions of diverse cultures and regions throughout time, of the relationship between works of art and the contexts in which they were produced, and of the ways in which works of art communicate ideas and meaning visually. Students will examine theories of interpretation and iconography, along with issues of patronage, provenance, and conservation/restoration. Students will gain critical thinking skills and a foundational knowledge of art history that will prepare them for transfer to four-year institutions and for arts and humanities-related careers.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Art History:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for courses accepted into the Art History major at the CSU where they seek transfer.

Required Courses		Units: 9.0
ART 105	Survey of Western Art: Prehistory through the Middle Ages	3.0
OR		3.0
ART 105H	Survey of Western Art: Prehistory through the Middle Ages Honors*	3.0
		3.0
ART 106	Survey of Western Art: Renaissance to Contemporary	3.0
OR		3.0
ART 106H	Survey of Western Art: Renaissance to Contemporary Honors*	3.0
ART 130	Freehand Drawing I	3.0
*Prerequisite		
Choose one non-Western art history course from the following list (3 units)		Units: 3.0
ART 104	Art of the Ancient Americas	3.0
ART 107	The Art of Asia	3.0
ART 108	The Art of Mexico	3.0
Choose one studio art course from the following list (3 units):		Units: 3.0
ART 120	Two-Dimensional Design	3.0
ART 121	Three-Dimensional Design	3.0
ART 135	Beginning Painting	3.0
ART 140	Ceramics I	3.0
ART 230	Beginning Life Drawing*	3.0
PHTO 130	Beginning Photography	3.0
Choose one course from the following list (3 units):		Units: 3.0
ART 109	History of American Art	3.0
ART 112	Visual Art in the Modern Era	3.0
ART 113	The History of Photography	3.0
ART 115	The Art of Film	3.0
ART 120	Two-Dimensional Design	3.0
ART 121	Three-Dimensional Design	3.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

Total: 18.0

ART/STUDIO ARTS Associate in Arts for Transfer

Description

The **Associate in Arts in Studio Arts for Transfer (AA-T) Degree** is intended to meet the lower division requirements for Studio Arts majors (or similar majors) at a CSU campus that offers a Studio Arts baccalaureate degree.

Students who earn an AA-T in Studio Arts demonstrate knowledge and skill in areas including drawing, painting, ceramics, printmaking, photography, or digital media. Foundational skills and knowledge of the studio arts are the springboard for an array of careers including professional artist, illustrator, layout artist, graphic designer, animator, advertising artist, art director, art critic, art educator, art therapist, gallery and museum curator, gallery assistant, and art restorer. The CSU campuses offer a wide range of specialized bachelor's degrees, including each of the studio arts as well as art education, art history, photography, digital arts and multimedia, graphic design, and arts technology.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Studio Arts:

1. Completion of 60 CSU-transferable semester units.

- Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
- Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
- Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Art major at the CSU where they seek transfer.

Required Courses		Units: 12.0
ART 106	Survey of Western Art: Renaissance to Contemporary	3.0
OR		
ART 106H	Survey of Western Art: Renaissance to Contemporary Honors*	3.0
ART 120	Two-Dimensional Design	3.0
ART 121	Three-Dimensional Design	3.0
ART 130	Freehand Drawing I	3.0
Choose one course, 3 units, from the following list:		Units: 3.0
ART 105	Survey of Western Art: Prehistory through the Middle Ages	3.0
OR		
ART 105H	Survey of Western Art: Prehistory through the Middle Ages Honors*	3.0
ART 107	The Art of Asia	3.0
ART 108	The Art of Mexico	3.0
Select one course from any three of the following areas for a total of 9 units:		Units: 9.0
DRAWING		
ART 131	Freehand Drawing II*	3.0
OR		
ART 230	Beginning Life Drawing*	3.0
PAINTING		
ART 135	Beginning Painting	3.0
PRINTMAKING		
ART 150	Beginning Printmaking	3.0
CERAMICS		
ART 140	Ceramics I	3.0
SCULPTURE		
ART 146	Introduction to Sculpture*	3.0
DIGITAL ART		
ART 170	Introduction to Digital Painting	3.0
OR		
GDSN 178	Digital Imaging Design	3.0
PHOTOGRAPHY		
PHTO 110	Introduction to Digital Photography	3.0
OR		
PHTO 130	Beginning Photography	3.0

COLOR

ART 124	Color Theory	3.0
---------	--------------	-----

Other (second semester courses)

		3.0
ART 136	Intermediate Painting*	3.0
OR		
ART 141	Ceramics II*	3.0
OR		
ART 231	Intermediate Life Drawing*	3.0
OR		
ART 260	Figure Drawing for Animators*	3.0

Total: 24.0

ART/STUDIO ARTS Associate of Arts Degree

Description

This curriculum leads to an **Associate in Arts Degree in Studio Arts**. It is designed to prepare students and artists in the development of skills for possible careers in different fields of the Fine Arts, including Painting, Ceramics, Printmaking, Sculpture, and Gallery presentation. This program is good preparation for portfolio development and advancement for transfer to four-year public or private universities and art schools. Students are advised to complete the required studio courses in the order listed, before choosing the additional four electives. Students intending to transfer to a four-year university or art school should check the required courses necessary at each school when choosing from the list of elective courses.

To acquire the **Associate of Arts Degree in Studio Arts**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 18.0
ART 105	Survey of Western Art: Prehistory through the Middle Ages	3.0
OR		3.0
ART 105H	Survey of Western Art: Prehistory through the Middle Ages Honors*	3.0
		3.0
ART 106	Survey of Western Art: Renaissance to Contemporary	3.0
OR		3.0
ART 106H	Survey of Western Art: Renaissance to Contemporary Honors*	3.0
		3.0
ART 120	Two-Dimensional Design	3.0
ART 121	Three-Dimensional Design	3.0
ART 130	Freehand Drawing I	3.0
ART 135	Beginning Painting	3.0
Additional twelve units from the following elective courses (choose 4)		Units: 12.0
ART 124	Color Theory	3.0
ART 131	Freehand Drawing II*	3.0
ART 136	Intermediate Painting*	3.0
ART 140	Ceramics I	3.0
ART 141	Ceramics II*	3.0
ART 142	Introduction to Ceramic Handbuilding	3.0
ART 143	Ceramic Handbuilding II*	3.0
ART 144	Advanced Handbuilding*	3.0
ART 146	Introduction to Sculpture	3.0
ART 150	Beginning Printmaking	3.0

ART 151	Intermediate Printmaking*	3.0
ART 170	Introduction to Digital Painting*	3.0
ART 190	Gallery and Exhibition Design	3.0
ART 230	Beginning Life Drawing*	3.0
ART 231	Intermediate Life Drawing*	3.0
ART 232	Advanced Life Drawing*	3.0
ART 233	Freehand Drawing III*	3.0
ART 234	Watercolor Painting	3.0
ART 235	Advanced Painting I*	3.0
ART 236	Advanced Painting II*	3.0
ART 242	Advanced Ceramics*	3.0
ART 252	Advanced Printmaking*	3.0
ART 260	Figure Drawing for Animators*	3.0

*Prerequisite

Total: 30.0

ASTRONOMY

Associate of Science Degree

Description

The **Associate of Science Degree in Astronomy** will prepare those students interested in laying a foundation for further study and for a bachelor's degree in an Astronomy field from a four-year college or university.

This degree program is for the **Associate of Science Degree in Astronomy** and fulfills many of the requirements and foundation courses for transfer to baccalaureate astronomy-related majors, but does not satisfy all transfer requirements for specific institutions. Students should consult with a counselor for major preparation for specific universities and colleges.

To acquire the **Associate of Science Degree in Astronomy**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE) or Intersegmental General Education Transfer Curriculum (IGETC).

Required Astronomy Courses

Units: 4.0

ASTR 110	General Astronomy	1.0-4.0
OR		3.0
ASTR 110H	General Astronomy Honors*	1.0-4.0
OR		3.0
ASTR 112	Observational Astronomy*	1.0-4.0
OR		1.0
ASTR 137	An Introduction to Cosmology: From the Big Bang to the Multiverse	4.0

Required Physics Courses

Units: 8.0

PHY 211	Physics for Scientists & Engineers - I*	4.0
PHY 213	Physics for Scientists & Engineers - III*	4.0

Required Chemistry Courses

Units: 10.0

CHEM 130	General Chemistry I*	5.0
CHEM 140	General Chemistry II*	5.0

Required Math Courses

Units: 12.0

MATH 190	Calculus I*	4.0
OR		4.0
MATH 190H	Calculus I Honors*	4.0
MATH 191	Calculus II*	4.0
MATH 250	Calculus III*	4.0

Total: 34.0

AUTOMOTIVE EV SPECIALIST

Certificate of Achievement

Description

The courses in this certificate program are designed for technicians interested in the field of electric vehicles (EVs) in the transportation and equipment industry, and cover the general electrician skills needed to understand and diagnose modern EVs. Usage of the digital volt ohm meter (DVOM), inductive meter, megger meter, and oscilloscope are covered. Emphasis is placed on electrical fundamentals, symbols and circuit diagrams, high-voltage batteries, charging systems, heat pumps for cooling and heating, and LED lighting systems. Students learn the proper use of high voltage electrical diagnostic tools and equipment and how to perform vehicle electrical service and maintenance operations safely. Students also have the opportunity to perform minor repair work on hybrid and high voltage vehicles to complete required tasks. The completion of this certificate requires 75 hours of work experience in the electric automotive industry.

To acquire the **Certificate of Achievement in Automotive EV Specialist**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
AUTO 131	Automotive EV Electronics I*	3.0
AUTO 132	Automotive EV Electronics II*	3.0
AUTO 157	Automotive Specialized Electronics Training*	4.0
AUTO 260	Advanced Hybrid/Electric Vehicle*	4.0
AUTO 290	Work Experience Education/Internship for Automotive Technology-Related Fields	1.0

*Prerequisite

Total: 15.0

AUTOMOTIVE TECHNOLOGY

Associate of Science Degree

Description

The courses listed in the Associate of Science Degree are comprised of a comprehensive list of job skills needed to enter the automotive field. The skills developed during class will enhance the student's ability to complete the industry-recognized Automotive Service Excellence (ASE) Certification Tests A-1 through A-8, Automotive Technician. The Degree is designed to prepare an individual for transfer and/or entry-level employment as an Automobile Technician.

To acquire the **Associate of Science Degree in Automotive Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 35.0
AUTO 107	Introduction to Automotive Light Service*	3.0
AUTO 140	Body and Chassis Electrical Systems*	4.0
AUTO 150	Engine Electrical Systems*	4.0
AUTO 160	Upper End Engine Rebuilding and Machining*	4.0
AUTO 200	Suspension, Steering, and Alignment Service*	4.0
AUTO 210	Automotive Brake Systems*	4.0
AUTO 220	Manual Drive Trains and Axles*	4.0
AUTO 230	Automatic Transmission/Transaxle*	4.0
AUTO 240	Heating and Air Conditioning*	4.0

*Prerequisite

Total: 35.0

AUTOMOTIVE/ADVANCED ENGINE PERFORMANCE

Associate of Science Degree

Description

The courses listed in the Associate of Science Degree comprise a comprehensive list of job skills needed to work in the specialized field of automotive advanced engine performance diagnostics. The skills developed during lecture and lab will enhance students' ability to complete the industry-recognized Automotive Service Excellence (ASE) Certification Tests A6 (Electrical/Electronic Systems), A8 (Engine Performance), and L1 (Advanced Engine Performance). The degree is designed to prepare students for transfer and/or entry-level employment as an automotive engine performance diagnostic technician.

To acquire the Associate of Science Degree in Advanced Engine Performance, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 36.0
AUTO 065	Smog Technician Diagnostic and Repair Procedures	3.0
AUTO 101	Introduction to Automotive Service and Repair: Underhood Service	3.0
AUTO 103	Introduction to Automotive Service and Repair: Undercar Service	3.0
AUTO 106	Automotive Electrical Tools and Diagnostic Procedures	3.0
AUTO 107	Introduction to Automotive Light Service*	3.0
AUTO 115	Computerized Engine Controls and Diagnostics *	3.0
AUTO 130	Level-I Smog Technician Training Course: Engine and Emission Control Fundamentals	3.0
AUTO 135	Level-II Smog Technician Training Course: Smog Check Inspection Procedures	3.0
AUTO 150	Engine Electrical Systems*	4.0
AUTO 157	Automotive Specialized Electronics Training*	4.0
AUTO 160	Upper End Engine Rebuilding and Machining*	4.0

*Prerequisite

Total: 36.0

AUTOMOTIVE/ADVANCED ENGINE PERFORMANCE Certificate of Achievement

Description

The courses listed in the certificate of achievement comprise a comprehensive list of job skills needed to work in the specialized field of automotive advanced engine performance diagnostics. The skills developed during lecture and lab will enhance the students' ability to complete the industry-recognized Automotive Service Excellence (ASE) Certification Tests A6 (Electrical/Electronic Systems), A8 (Engine Performance), and L1 (Advanced Engine Performance). The certificate is designed to prepare students for entry-level employment as an automotive engine performance diagnostic technician.

To acquire the **Certificate of Achievement in Advanced Engine Performance**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 36.0
AUTO 065	Smog Technician Diagnostic and Repair Procedures	3.0
AUTO 101	Introduction to Automotive Service and Repair: Underhood Service	3.0
AUTO 103	Introduction to Automotive Service and Repair: Undercar Service	3.0
AUTO 106	Automotive Electrical Tools and Diagnostic Procedures	3.0
AUTO 107	Introduction to Automotive Light Service*	3.0
AUTO 115	Computerized Engine Controls and Diagnostics *	3.0
AUTO 130	Level-I Smog Technician Training Course: Engine and Emission Control Fundamentals	3.0
AUTO 135	Level-II Smog Technician Training Course: Smog Check Inspection Procedures	3.0
AUTO 150	Engine Electrical Systems*	4.0
AUTO 160	Upper End Engine Rebuilding and Machining*	4.0
AUTO 157	Automotive Specialized Electronics Training*	4.0

*Prerequisite

Total: 36.0

AUTOMOTIVE/ADVANCED ENGINE PERFORMANCE TECHNICIAN Certificate of Achievement

Description

This Certificate of Achievement is designed for the experienced Automotive Technician who desires to expand and upgrade his/her skill level to include the ability to complete the industry-recognized Automotive Service Excellence (ASE) Certification Test A6 (Electrical/Electronic Systems), A8 (Engine Performance) and L1 (Advanced Engine Performance) within the California Tune-Up and Driveability and Smog Check Program. The certificate is designed to prepare an individual for entry-level employment as a State Certified Smog Check Technician.

To acquire the **Certificate of Achievement in Advanced Engine Performance Technician**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
AUTO 065	Smog Technician Diagnostic and Repair Procedures	3.0
AUTO 130	Level-I Smog Technician Training Course: Engine and Emission Control Fundamentals	3.0
AUTO 135	Level-II Smog Technician Training Course: Smog Check Inspection Procedures	3.0
AUTO 155	Automotive On-Board Diagnostics Generations One and Two (OBD I and OBD II)*	3.0

*Prerequisite

Total: 12.0

AUTOMOTIVE/ALTERNATIVE FUELS & ADVANCED TRANSPORTATION TECHNOLOGY Associate of Science Degree

Description

This degree prepares students and incumbent employees to be technicians specializing in alternative fuels and advanced transportation technology. Training includes theory as well as practical skills. Directed practical work is given in all fuel areas, compressed and biodiesel, under simulated, on-the-job conditions. The program will provide students with an opportunity to acquire the knowledge and hand skills demanded of modern transportation specialists. The sequence in which courses are taken may be modified to meet individual needs.

To acquire the **Associate of Science Degree in Alternative Fuels and Advanced Transportation Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education–Breadth (CSU GE) pattern, or Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Required Courses		Units: 26.0
AUTO 101	Introduction to Automotive Service and Repair: Underhood Service	3.0
AUTO 103	Introduction to Automotive Service and Repair: Undercar Service	3.0
AUTO 106	Automotive Electrical Tools and Diagnostic Procedures	3.0
AUTO 107	Introduction to Automotive Light Service*	3.0
AUTO 144	Alternative Fuels Technician	3.0
AUTO 147	Introduction to Hybrid and Electric Vehicle Technology*	3.0
AUTO 157	Automotive Specialized Electronics Training*	4.0
AUTO 150	Engine Electrical Systems*	4.0

*Prerequisite

Total: 26.0

AUTOMOTIVE/ALTERNATIVE FUELS & ADVANCED TRANSPORTATION TECHNOLOGY Certificate of Achievement

Description

This certificate of achievement is designed to prepare students and incumbent employees as alternative fuels and advanced transportation technology specialists. Training takes up theory and practical skills. Directed practical work is assigned in all fuel areas, compressed and biodiesel, under simulated on-the-job conditions. The program will provide students an opportunity to acquire the knowledge and hand skills demanded of modern transportation specialists. The sequence in which courses are taken may be modified to meet individual needs.

To acquire the **Certificate of Achievement in Alternative Fuels & Advanced Transportation Technology**, it is necessary to complete the following courses:

Required Courses		Units: 14.0
AUTO 147	Introduction to Hybrid and Electric Vehicle Technology*	3.0
AUTO 150	Engine Electrical Systems*	4.0
AUTO 157	Automotive Specialized Electronics Training*	4.0

AUTO 143 renumbered to AUTO 144 due to unit change from 4 to 3

AUTO 144	Alternative Fuels Technician	3.0
----------	------------------------------	-----

*Prerequisite

Total: 14.0

AUTOMOTIVE/BRAKE AND SUSPENSION SERVICE Certificate of Achievement

Description

The courses listed in this certificate compile a comprehensive list of job-related skills needed to enter the automotive field. The skills acquired during class will help one complete the ASE Certification Test in the areas of A-4 Steering and Suspension and/or A-5 Brakes. The certificate is designed to prepare an individual for entry-level employment as a Suspension and Steering and/or Brakes Service/Repair Technician.

To acquire the **Certificate of Achievement in Brake and Suspension Service**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 18.0
AUTO 103	Introduction to Automotive Service and Repair: Undercar Service	3.0
AUTO 140	Body and Chassis Electrical Systems*	4.0
AUTO 200	Suspension, Steering, and Alignment Service*	4.0
AUTO 210	Automotive Brake Systems*	4.0
AUTO 211	Anti-lock Brakes/Traction Control Systems*	3.0

*Prerequisite

Total: 18.0

AUTOMOTIVE/ENGINE REPAIR Certificate of Achievement

Description

The courses listed in this certificate compile a comprehensive list of job-related skills needed to enter the automotive field. The skills acquired during class will help one complete the ASE Certification Test in the area of A-1 Engine Repair. The certificate is designed to prepare an individual for entry-level employment as an Automotive Engine Repair Technician.

To acquire the **Certificate of Achievement in Engine Repair**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 14.0
AUTO 101	Introduction to Automotive Service and Repair: Underhood Service	3.0
AUTO 160	Upper End Engine Rebuilding and Machining*	4.0
AUTO 170	Lower End Engine Rebuilding and Machining*	4.0
AUTO 190	Engine Blueprinting and Machining	3.0

*Prerequisite

Total: 14.0

AUTOMOTIVE/GENERAL AUTOMOTIVE SERVICE Certificate of Achievement

Description

The courses listed in the Certificate of Achievement are comprised of a comprehensive list of job skills needed to enter the automotive field. The skills developed during class will enhance the student's ability to complete the industry-recognized Automotive Service Excellence (ASE) Certification Tests A-1 through A-8, Automotive Technician. The Certificate is designed to prepare an individual for entry-level employment as an Automobile Technician.

To acquire the **Certificate of Achievement in General Automotive Service**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 35.0
AUTO 107	Introduction to Automotive Light Service*	3.0
AUTO 140	Body and Chassis Electrical Systems*	4.0
AUTO 150	Engine Electrical Systems*	4.0
AUTO 160	Upper End Engine Rebuilding and Machining*	4.0
AUTO 200	Suspension, Steering, and Alignment Service*	4.0
AUTO 210	Automotive Brake Systems*	4.0
AUTO 220	Manual Drive Trains and Axles*	4.0
AUTO 230	Automatic Transmission/Transaxle*	4.0
AUTO 240	Heating and Air Conditioning*	4.0

*Prerequisite

Total: 35.0

AUTOMOTIVE/GENERAL SERVICE TECHNICIAN Certificate of Achievement

Description

The courses required in this certificate compile a comprehensive list of job-related skills needed to acquire general automotive skills. The skills acquired during class will prepare an individual for entry-level employment as a light-duty service technician such as a Lube Technician or positions with a franchised repair facility.

To acquire the **Certificate of Achievement in General Service Technician**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
AUTO 101	Introduction to Automotive Service and Repair: Underhood Service	3.0
AUTO 103	Introduction to Automotive Service and Repair: Undercar Service	3.0
AUTO 106	Automotive Electrical Tools and Diagnostic Procedures	3.0
AUTO 107	Introduction to Automotive Light Service*	3.0
*Prerequisite		
		Total: 12.0

AUTOMOTIVE/SAFETY, COMFORT, AND CONVENIENCE SYSTEMS Certificate of Achievement

Description

The courses listed in this certificate compile a comprehensive list of job-related skills needed to enter the automotive field. The skills acquired during class will help one complete the ASE Certification Test in the areas of A-5 Brakes, A-6 Electrical/Electronic Systems, and A-7 Heating & Air Conditioning. The certificate is designed to prepare an individual for entry-level employment as an Electrical/ Electronic Systems, Brakes Systems, and/or a Heating & Air Conditioning Service/Repair Technician.

To acquire the **Certificate of Achievement in Safety, Comfort, and Convenience Systems**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 14.0
AUTO 140	Body and Chassis Electrical Systems*	4.0
AUTO 148	Vehicle Safety, Comfort and Convenience Systems*	3.0
AUTO 211	Anti-lock Brakes/Traction Control Systems*	3.0
AUTO 240	Heating and Air Conditioning*	4.0
*Prerequisite		
		Total: 14.0

AUTOMOTIVE/TRANSMISSION SERVICE Certificate of Achievement

Description

The courses listed in this certificate compile a comprehensive list of job-related skills needed to enter the automotive field. The skills acquired during class will help one complete the ASE Certification Test in the areas of A-2 Automatic Transmission/ Transaxle and/or A-3 Manual Drive Train and Axles. The certificate is designed to prepare an individual for entry-level employment as an Automatic Transmission and/or Manual Transmission Service/Repair Technician.

To acquire the **Certificate of Achievement in Transmission Service**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 15.0
AUTO 103	Introduction to Automotive Service and Repair: Undercar Service	3.0
HOND 125	Power Train System Service and Transmission Diagnostics (formerly AUTO 125)*	4.0
AUTO 220	Manual Drive Trains and Axles*	4.0
AUTO 230	Automatic Transmission/Transaxle*	4.0
**Prerequisite		
		Total: 15.0

BIOLOGY Associate in Science for Transfer

Description

The **Associate in Science in Biology Transfer (AS-T) Degree** is intended to meet the lower division requirements for Biology majors (or similar majors) at a CSU campus that offers a Biology baccalaureate degree.

This degree provides for the completion of general lower-division preparation associated with the requirements for a bachelor's degree in biology, biochemistry, botany, ecology, forestry, zoology, microbiology, medicine, and other fields. It provides a broad, comprehensive overview of the main areas of biological science. The ability to critically think and use appropriate tools to solve biological questions will be emphasized.

In addition to the courses listed below, the following requirements must be met for completion of the AS-T Degree in Biology:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) for STEM pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) for STEM pattern.

Students are advised to check with the Counseling Department or Transfer Center for courses accepted into the Biology major at the CSU where they seek transfer.

Required Courses		Units: 36.0
BIOL 200	Principles of Biology 1 (Molecular and Cellular Biology)*	5.0
BIOL 201	Principles of Biology 2 (Diversity and Ecology)*	5.0
CHEM 130	General Chemistry I*	5.0
CHEM 140	General Chemistry II*	5.0
		4.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
		4.0
MATH 191	Calculus II*	4.0
		8.0
PHY 150	General Physics I*	4.0
AND		
		4.0
PHY 160	General Physics II*	4.0
OR		
		4.0
PHY 211	Physics for Scientists & Engineers - I*	4.0
OR		
PHY 213	Physics for Scientists & Engineers - III*	4.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

*Prerequisite

Total: 36.0

BIOLOGY

Associate of Science Degree

Description

The **Associate of Science Degree in Biology** prepares students who are intending to transfer to a four-year institution that offers a baccalaureate degree in Biological Sciences. This degree provides for the completion of general lower-division course work associated with the requirements for a bachelor degree in biology, biochemistry, botany, ecology, forestry, zoology, microbiology, medicine, etc. The degree is specifically designed for students intending to transfer to a CSU or UC campus. Students completing the degree will take specific courses in chemistry, biology, physics and mathematics in addition to a general education preparation such as the CSU general education plan or IGETC.

To acquire the **Associate of Science Degree in Biology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 36.0
BIOL 200	Principles of Biology 1 (Molecular and Cellular Biology)*	5.0
BIOL 201	Principles of Biology 2 (Diversity and Ecology)*	5.0

BIOTECHNOLOGY

Certificate of Achievement

Description

This certificate of achievement comprises three foundational courses that give students background and practical experience in the techniques and applications of biotechnology in a contemporary laboratory setting. The certificate is also designed to be a springboard into a wide array of technical and theoretical fields in the natural sciences, including biology, medicine, pharmaceuticals, and agriculture.

To acquire the **Certificate of Achievement in Biotechnology**, it is necessary to complete the following courses:

Required Courses		Units: 13.0
BIOT 100	Introduction to Biotechnology	4.0
BIOT 110	Introduction to Biotechnology Techniques and Applications*	4.0
		5.0

CHEM 110	Chemistry for Allied Health Majors*	5.0
OR		
CHEM 120	Introduction to Chemistry*	5.0

*Prerequisite

Total: 13.0

BUSINESS ADMINISTRATION Associate of Arts Degree

Description

This is a transfer degree which allows students to fulfill lower division pre-business requirements for the California State University System. Students should work closely with counselors to select the appropriate math course and other lower division courses which are required by the four-year college of their choice.

To acquire the **Associate of Arts Degree in Business Administration**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 24.0
ACCT 101	Financial Accounting	4.0
OR		
ACCT 101H	Financial Accounting Honors*	4.0
		4.0
ACCT 102	Managerial Accounting*	4.0
OR		
ACCT 102H	Managerial Accounting Honors*	4.0
BUSL 110	Legal Environment of Business	3.0
CIT 101	Introduction to Computer Information Technology	3.0

ECON 102H	Principles of Microeconomics Honors*	3.0
		4.0
MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0
OR		
MATH 170	Elements of Calculus*	4.0

*Prerequisite

Total: 24.0

BUSINESS ADMINISTRATION 2.0 Associate in Science for Transfer

Description

The **Associate in Science in Business Administration 2.0 for Transfer (AS-T) Degree** is intended to meet the lower division requirements for business majors (or similar majors) at a CSU campus that offers a business baccalaureate degree.

This degree program will help students develop the analytical, communication, and critical thinking skills necessary to succeed as a business major. Business Administration prepares students for careers in accounting, finance, management, marketing, information technologies and many others.

Students should work closely with counselors to select the appropriate math courses and other lower division courses which are required by the four-year college of their choice.

In addition to the courses listed below, the following requirements must be met for completion of the AS-T Degree in Business Administration 2.0:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Business Administration major at the CSU where they seek transfer.

Required Courses		Units: 28.0

BUSINESS MARKETING

Associate of Science Degree

Description

The **Associate of Science Degree in Business Marketing** is designed to prepare students to be successful in the dynamic, creative, and fast-paced field of marketing. Students have the flexibility of choosing elective classes that meet their personal goals in their marketing education.

The degree is a two-year program designed to prepare students to enter the workforce or explore additional education options. This comprehensive program can prepare students to be effective in a variety of marketing careers including: sales and sales management, retail management, advertising, promotion, consumer behavior research, customer service, and small business marketing.

To acquire the **Associate of Science Degree in Business Marketing**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 12.0
BUSL 110	Legal Environment of Business	3.0
MGMT 101	Introduction to Business	3.0
MGMT 150	Principles of Management	3.0
MRKT 170	Principles of Marketing	3.0
Choose one course from the following:		Units: 3.0
MGMT 108	Business Writing	3.0
MGMT 208	Business Communications*	3.0
*Prerequisite		
Choose four courses from the following:		Units: 12.0-13.0
GIS 120	Introduction to Geographic Information Systems and Spatial Analysis	4.0
LOG 101	Supply Chain Management	3.0
MGMT 141	International Marketing	3.0
MRKT 171	Consumer Behavior	3.0
MRKT 172	Advertising and Promotion	3.0
MRKT 173	Principles of Selling	3.0
MRKT 174	Small Business Marketing and Advertising	3.0
MRKT 175	Retail Management	3.0
		Total: 27.0-28.0

BUSINESS MARKETING

Certificate of Achievement

Description

The **Certificate of Achievement in Business Marketing** is designed to prepare students to be successful in the dynamic, creative, and fast-paced field of marketing. Students have the flexibility of choosing elective classes that meet their personal goals in their marketing education.

This certificate of achievement can be used to upgrade marketing skills for professionals already working in marketing positions or to develop new skills for those students wanting to explore marketing careers. This comprehensive program can prepare students to be effective in a variety of marketing careers including: sales and sales management, retail management, advertising, promotion, consumer behavior research, customer service, and small business marketing.

To acquire the **Certificate of Achievement in Business Marketing**, it is necessary to complete the following courses:

Required Courses		Units: 6.0
MGMT 101	Introduction to Business	3.0
MRKT 170	Principles of Marketing	3.0
Choose four courses from the following:		Units: 12.0-13.0
GIS 120	Introduction to Geographic Information Systems and Spatial Analysis	4.0

LOG 101	Supply Chain Management	3.0
MGMT 141	International Marketing	3.0
MRKT 171	Consumer Behavior	3.0
MRKT 172	Advertising and Promotion	3.0
MRKT 173	Principles of Selling	3.0
MRKT 174	Small Business Marketing and Advertising	3.0
MRKT 175	Retail Management	3.0
		Total: 18.0-19.0

BUSINESS/MANAGEMENT AND SUPERVISION

Associate of Science Degree

Description

This curriculum is designed for those students who desire the education and training for a business career at the management level in many of the following areas: production, materials management and handling, marketing, supervision, transportation, and operations management. A general core of knowledge aims to equip students with sound foundations upon which they may develop management and supervision abilities through advanced student and job experience.

To acquire the **Associate of Science Degree in Management and Supervision**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 21.0
BUSL 110	Legal Environment of Business	3.0
MGMT 101	Introduction to Business	3.0
MGMT 105	Elements of Supervision	3.0
MGMT 120	Human Relations in Business	3.0
MGMT 146	Human Resources Management	3.0
MGMT 150	Principles of Management	3.0
MRKT 170	Principles of Marketing	3.0
Choose one of the following:		Units: 3.0
CIT 101	Introduction to Computer Information Technology	3.0
MGMT 125	Managerial Computer Applications	3.0
Choose one of the following:		Units: 3.0
MGMT 108	Business Writing	3.0
MGMT 208	Business Communications*	3.0
*Prerequisite		
		Total: 27.0

BUSINESS/MANAGEMENT AND SUPERVISION

Certificate of Achievement

Description

This Certificate of Achievement is designed for the student interested in management or supervisory positions leading to careers in business management. The Certificate of Achievement can be used to upgrade leadership skills and develop organizational skills which can lead to advancement in areas such as operations management, transportation, marketing, materials management, and related fields.

To acquire the **Certificate of Achievement in Management and Supervision**, it is necessary to complete the following courses:

Required Courses		Units: 21.0
BUSL 110	Legal Environment of Business	3.0
MGMT 101	Introduction to Business	3.0
MGMT 105	Elements of Supervision	3.0
MGMT 120	Human Relations in Business	3.0
MGMT 146	Human Resources Management	3.0
MGMT 150	Principles of Management	3.0
MRKT 170	Principles of Marketing	3.0
Choose one of the following:		Units: 3.0
CIT 101	Introduction to Computer Information Technology	3.0
MGMT 125	Managerial Computer Applications	3.0
Choose one of the following:		Units: 3.0
MGMT 108	Business Writing	3.0
MGMT 208	Business Communications*	3.0
*Prerequisite		

BUSINESS/RETAIL MANAGEMENT Certificate of Achievement

Description

The Retail Management Certificate Program is a comprehensive program designed to prepare students for the fast-paced challenges that exist in the competitive retail industry. This broad program is also intended to help students develop a clear sense of the scope of the retail manager's job and an understanding of the basic requirements for success in the future. This program is endorsed by the Western Association of Food Chains (WAFAC).

To acquire the **Certificate of Achievement in Retail Management**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
MGMT 120	Human Relations in Business	3.0
MGMT 146	Human Resources Management	3.0
MGMT 150	Principles of Management	3.0
MRKT 170	Principles of Marketing	3.0
MRKT 175	Retail Management	3.0
Choose one course:		Units: 3.0-4.0
ACCT 100	Introduction to Accounting	3.0
		4.0
ACCT 101	Financial Accounting	4.0
OR		
ACCT 101H	Financial Accounting Honors*	4.0
Choose one course:		Units: 3.0
CIT 102	Introduction to Microsoft® Office 365	3.0
MGMT 125	Managerial Computer Applications	3.0
Choose on course:		Units: 3.0
MGMT 108	Business Writing	3.0
MGMT 208	Business Communications*	3.0
*Prerequisite		
		Total: 24.0-25.0

BUSINESS/SMALL BUSINESS MANAGEMENT Associate of Science Degree

Description

This curriculum is designed for the student wishing to own their own business. Areas of emphasis will include management, marketing, and operations management for a small business. The student will gain a general core of knowledge about different types of small businesses: service businesses, international businesses, e-commerce businesses and business-to-business ventures through hands-on projects.

To acquire the **Associate of Science Degree in Small Business Management**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 22.0
ACCT 101	Financial Accounting	4.0
OR		
ACCT 101H	Financial Accounting Honors*	4.0
BUSL 110	Legal Environment of Business	3.0
CIT 101	Introduction to Computer Information Technology	3.0
OR		
MGMT 125	Managerial Computer Applications	3.0
MGMT 101	Introduction to Business	3.0
MGMT 108	Business Writing	3.0
OR		
MGMT 208	Business Communications*	3.0

MGMT 130	Small Business Management-Entrepreneurship	3.0
MRKT 170	Principles of Marketing	3.0
*Prerequisite		
Students select two classes from the following list:		Units: 6.0
CIT 155	Introduction to E-Commerce	3.0
LOG 101	Supply Chain Management	3.0
MGMT 120	Human Relations in Business	3.0
MGMT 140	Introduction to International Business	3.0
MGMT 150	Principles of Management	3.0
MRKT 172	Advertising and Promotion	3.0
MRKT 174	Small Business Marketing and Advertising	3.0
MRKT 175	Retail Management	3.0
		Total: 28.0

BUSINESS/SMALL BUSINESS MANAGEMENT Certificate of Achievement

Description

This Certificate of Achievement is designed for the student wishing to own their own business. Areas of emphasis will include management, marketing, and operations management for a small business. The student will gain a general core of knowledge about different types of small businesses: service businesses, international businesses, e-commerce businesses and business-to-business ventures through hands-on projects.

To acquire the **Certificate of Achievement in Small Business Management**, it is necessary to complete the following courses:

Required Courses		Units: 22.0
ACCT 101	Financial Accounting	4.0
OR		
ACCT 101H	Financial Accounting Honors*	4.0
BUSL 110	Legal Environment of Business	3.0
CIT 101	Introduction to Computer Information Technology	3.0
OR		
MGMT 125	Managerial Computer Applications	3.0
MGMT 101	Introduction to Business	3.0

CARPENTRY - CONCRETE FORMING Associate of Science Degree

Description

The **Carpentry - Concrete Forming Associate of Science Degree** is designed to prepare students who are interested in careers in the carpentry industry to meet the needs of indentured apprentices with the State of California (i.e., programs, system, and standards). Students

gain the skills and knowledge necessary to work in the carpentry industry in compliance with governmental regulations, and simultaneously to protect human health and the environment.

To acquire the **Associate of Science Degree in Carpentry - Concrete Forming**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 19.5
CARP 040A	Orientation*	2.0
CARP 040B	Safety & Health Certifications*	2.0
CARP 040R	Tool/Equipment Applications*	1.5
CARP 040F	Wall Forming*	1.5
CARP 040C	Print Reading*	2.0
CARP 050G	Beam and Deck Forming*	1.5
CARP 050H	Gang Forms/Columns*	1.5
CARP 040E	Foundations and Flatwork*	1.5
CARP 040G	Stair and Ramp Forming*	1.5
CARP 050F	Tilt Up Construction*	1.5
CARP 050E	Bridge Construction*	1.5
CARP 050I	Abutments*	1.5
*Prerequisite		
		Total: 19.5

CARPENTRY - CONCRETE FORMING Certificate of Achievement

Description

The **Carpentry - Concrete Forming Certificate of Achievement** is designed to prepare students who are interested in careers in the carpentry industry to meet the needs of indentured apprentices with the State of California (i.e., programs, system, and standards). Students gain the skills and knowledge necessary to work in the carpentry industry in compliance with governmental regulations, and simultaneously to protect human health and the environment.

To acquire the **Certificate of Achievement in Carpentry - Concrete Forming** it is necessary to complete the following courses with a grade of "C" or better:

CERAMIC HANDBUILDING

Certificate of Achievement

Description

This certificate is awarded to students who demonstrate proficiency in hand building ceramics. It is designed for students aspiring to produce work for their portfolios, transfer to a four-year academic institution, or exhibit in galleries.

To acquire the **Certificate of Achievement in Ceramic Handbuilding**, it is necessary to complete the following courses:

Required Course		Units: 9.0
ART 142	Introduction to Ceramic Handbuilding	3.0
ART 143	Ceramic Handbuilding II*	3.0
ART 144	Advanced Handbuilding*	3.0

Total: 9.0

CERAMIC WHEEL THROWING

Certificate of Achievement

Description

This certificate is awarded to students who demonstrate proficiency in wheel thrown ceramics. It is designed for students aspiring to produce work for their portfolios, transfer to a four-year academic institution, or exhibit in galleries.

To acquire the **Certificate of Achievement in Ceramic Wheel Throwing**, it is necessary to complete the following courses:

Required courses		Units: 9.0
ART 140	Ceramics I	3.0
ART 141	Ceramics II*	3.0
ART 242	Advanced Ceramics*	3.0
		Total: 9.0

CERAMICS WITH 3D PRINTING

Certificate of Achievement

Description

This certificate is awarded to students who demonstrate advanced proficiency in the area of ceramics, including 3D printing. It is designed for students aspiring to produce work for their portfolios, transfer to a four-year academic institution, or exhibit in galleries.

To acquire the **Certificate of Achievement in Ceramics with 3D Printing**, it is necessary to complete the following courses:

ART 140	Ceramics I	3.0
ART 141	Ceramics II*	3.0
ART 142	Introduction to Ceramic Handbuilding	3.0
ART 143	Ceramic Handbuilding II*	3.0
ART 147	Ceramic 3D Printing	3.0
		Total: 15.0

ADVANCED CERAMICS WITH CERAMIC HISTORY

Certificate of Achievement

Description

This certificate is awarded to students who demonstrate proficiency in ceramics techniques, including wheel throwing, hand building, and ceramic art history. It is designed for students aspiring to produce work for their portfolios, transfer to a four-year academic institution, or exhibit in galleries.

To acquire the **Certificate of Achievement in Advanced Ceramics with Ceramic Art History**, it is necessary to complete the following courses:

ART 140	Ceramics I	3.0
ART 141	Ceramics II*	3.0
ART 142	Introduction to Ceramic Handbuilding	3.0
ART 143	Ceramic Handbuilding II*	3.0
ART 117	History of World Ceramics	3.0
		Total: 15.0

ADVANCED MASTERY IN CERAMICS FUNDAMENTALS

Certificate of Achievement

Description

This certificate is awarded to students who demonstrate proficiency in all areas of ceramics. It is designed for students aspiring to produce work for their portfolios, transfer to a four-year academic institution, or exhibit in galleries.

To acquire the **Certificate of Achievement in Advanced Mastery in Ceramics Fundamentals**, it is necessary to complete the following courses:

ART 140	Ceramics I	3.0
ART 141	Ceramics II*	3.0
ART 242	Advanced Ceramics*	3.0
ART 142	Introduction to Ceramic Handbuilding	3.0
ART 143	Ceramic Handbuilding II*	3.0
ART 144	Advanced Handbuilding*	3.0
ART 147	Ceramic 3D Printing	3.0
ART 117	History of World Ceramics	3.0
		Total: 24.0

Associate Degree
for Transfer
A Degree with a Guarantee.SM

CHEMISTRY Associate in Science for Transfer

Description

The **Associate in Science in Chemistry for Transfer (AS-T) Degree** is intended to meet the lower division requirements for Chemistry and Chemical Education majors at a CSU campus that offers a Chemistry baccalaureate degree.

This degree provides for the completion of general lower-division preparation associated with the requirements for a bachelor's degree in chemistry, biochemistry, chemical engineering, and other fields. It provides a broad, comprehensive overview of the main areas of chemistry and its' applications. The ability to critically think and use appropriate tools to solve chemical questions will be emphasized.

In addition to the courses listed below, the following requirements must be met for completion of the AS-T Degree in Chemistry:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) for STEM pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) for STEM pattern. (The use of the IGETC for STEM pattern allows for the completion of the degree within 60 units.)

Students are advised to check with the Counseling Department or Transfer Center for courses accepted into the Chemistry major at the CSU where they seek transfer.

Required Courses		Units: 36.0
CHEM 130	General Chemistry I*	5.0
CHEM 140	General Chemistry II*	5.0
CHEM 230	Organic Chemistry I*	5.0
CHEM 231	Organic Chemistry II*	5.0
		4.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
MATH 191	Calculus II*	4.0
PHY 211	Physics for Scientists & Engineers - I*	4.0
PHY 213	Physics for Scientists & Engineers - III*	4.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

*Prerequisite

Total: 36.0

Chemistry - UC TRANSFER PATHWAY Associate in Science Degree

Description

The **Chemistry UC Transfer Pathway Associate in Science Degree** is intended for Rio Hondo College students planning to transfer to the University of California (UC) system as chemistry majors. Along with completing the degree requirements, students must comply with the following in order to be guaranteed admission* to a UC campus participating in the Transfer Admission Guarantee (TAG) program:

1. Complete all of the chemistry major preparation coursework as outlined in this degree with a "C" grade or better in each course.

2. Complete the Intersegmental General Education Transfer Curriculum (IGETC) requirements with the deferment of two courses in Area 3 (Arts and Humanities) and two courses in Area 4 (Social and Behavioral Sciences) of the IGETC. These deferred courses are to be completed at the UC after transfer.
3. Complete a TAG application to a participating UC campus by the deadline set by the UC system.
4. Complete the individual TAG requirements for said UC campus by the deadlines set by the UC system.
5. Maintain or exceed the GPA requirements as outlined in the TAG agreement the student has made at said UC campus for their completed and remaining coursework before transfer.**
6. Complete their application for admission to said UC campus by the deadline set by the UC system.

Students are *highly encouraged* to work with a Rio Hondo College STEM Counselor for assistance in completion of this degree.

*Please note that receiving this degree alone *does not* guarantee admission to the UC system. A student may submit a TAG application to only one UC campus.

**A student may still be awarded this degree by meeting the local GPA requirements at Rio Hondo College.

Required Chemistry Courses		Units: 20.0
CHEM 130	General Chemistry I*	5.0
CHEM 140	General Chemistry II*	5.0
CHEM 230	Organic Chemistry I*	5.0
CHEM 231	Organic Chemistry II*	5.0
Required Physics Courses		Units: 12.0
PHY 211	Physics for Scientists & Engineers - I*	4.0
PHY 212	Physics for Scientists & Engineers - II*	4.0
PHY 213	Physics for Scientists & Engineers - III*	4.0
Required Mathematics Courses		Units: 16.0-17.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
MATH 191	Calculus II*	4.0
MATH 250	Calculus III*	4.0
		4.0-5.0
MATH 251	Linear Algebra and Differential Equations*	5.0
OR		
MATH 270	Differential Equations*	4.0
*Prerequisite		
		Total: 48.0-49.0

CHICANA/O/X STUDIES Associate of Arts Degree

Description

The **Associate of Arts Degree in Chicana/o/x Studies** offers multidisciplinary and interdisciplinary areas of study for students to learn the histories, cultures, and intellectual traditions of Mexican descendants, as well as other Latina/o/x and Indigenous populations within the U.S. and across the Americas. Students will learn and use a diverse set of academic skills to critically examine, creatively problem-solve, and courageously imagine in an increasingly changing society. This degree is intended to prepare students interested in transferring to four-year institutions as Chicana/o/x Studies majors. The Chicana/o/x Studies discipline provides students with career opportunities in the arts, education, social work, marketing, advocacy, journalism, government, and public health.

To acquire the **Associate of Arts Degree in Chicana/o/x Studies**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 9.0
CHST 101	Introduction to Chicana/o/x Studies	3.0
CHST 146	The Mexican American in the History of the United States	3.0
		3.0
CHST 148	La Chicana: Mexican-American Women in Contemporary Society	3.0
OR		
CHST 148H	La Chicana: Mexican-American Women in Contemporary Society Honors*	3.0
Elective Courses: Select three courses from the list below:		Units: 9.0
ART 108	The Art of Mexico	3.0
CHST 150	Chicana/o/x Politics	3.0
EGSS 110	Introduction to Ethnic Studies	3.0

EGSS 130	Introduction to LGBTQ+ Studies	3.0
HIST 122	History of Mexico	3.0
HIST 131	History of the North American Indian	3.0
		3.0
HIST 159	US Comparative History of Mexican and Asian Americans and Women	3.0
OR		
HIST 159H	US Comparative History of Mexican and Asian Americans and Women Honors *	3.0
HIST 167	History of California	3.0
		3.0
HUM 125	Introduction to Mexican Culture	3.0
OR		
HUM 125H	Introduction to Mexican Culture Honors*	3.0
HUM 130	Contemporary Mexican-American Culture	3.0
		3.0
LIT 117	Mexican Literature in Translation*	3.0
OR		
LIT 117H	Mexican Literature in Translation Honors*	3.0
		3.0
LIT 149	Introduction to Chicana/o/x Literature*	3.0
OR		
LIT 149H	Introduction to Chicana/o/x Literature Honors*	3.0
MUS 129	Music in Latin American Culture	3.0
POLS 150	Latinx Politics	3.0
SOC 116	Power, Oppression, and Privilege: Race and Ethnic Relations	3.0
*Prerequisite		

Total: 18.0

CHILD DEVELOPMENT Associate of Science Degree

Description

The following curriculum meets the requirements for an Associate of Science Degree. Students planning to continue towards a Bachelor's Degree in Child Development, Home Economics or Elementary Education should consult the college or university to which they intend to transfer for specific requirements. All courses listed in Child Development electives, regardless of the catalog year or year taken, may be used as Child Development electives for the Associate Degree under any catalog year. The State of California Commission on Teacher Credentialing has several Child Development Permits available to students completing Child Development courses. See www.ctc.ca.gov/credentials/CREDS/child-dev-permits.html for details.

To acquire an **Associate of Science Degree in Child Development**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 18.0
CD 106	Child Growth and Development ^{(DS 1)+}	3.0
CD 110	Principles and Practices of Early Childhood Education ^{(DS 3)+}	3.0
CD 111	Early Childhood Education Curriculum ^{(DS 3)+}	3.0
CD 114	Observation and Assessment ^{(DS 3)+}	3.0
CD 208	Child, Family, and Community ^{(DS 2)+}	3.0
CD 228	Early Childhood Education Practicum**	3.0
Plus nine units selected from the following courses:		Units: 9.0
CD 102	Nutrition, Health and Safety for Children ^{(DS 7)+}	3.0
CD 103	Parenting ^{(DS 2)+}	3.0
CD 115	Creative Art Experiences for Children ^{(DS 3)+}	3.0
CD 118	Development of Science and Math Experiences ^{(DS 3)+}	3.0
CD 119	Music and Movement for Children ^{(DS 3)+}	3.0
CD 120	Experiences in Language Arts ^{(DS 3)+}	3.0
CD 211	Infant and Toddler Development ^{(DS 4)+}	3.0
CD 213	Care and Education for Infants and Toddlers ^{(DS 4)+}	3.0
CD 224	Diversity Issues During Early Childhood, School Age, and Adolescence ^{(DS 3)+}	3.0
CD 226	Introduction to Special Education	3.0
CD 229	Literacy Development for Children ^{(DS 3)+}	3.0
CD 232	Curriculum and Strategies for Children with Special Needs	3.0

+DS indicates Department of Social Services Title 22 classification requirements for teacher training in licensed private preschools and childcare programs.

**3.4 consecutive hours of weekly supervised field experience at the Rio Hondo College Child Development Center are required. Schedule must be established prior to the start of the semester. Beginning times are typically 7:30am, 8:30am, 9:30 am or 1:45 pm. Verification of freedom from tuberculosis and immunizations against influenza, pertussis, and measles are required prior to the semester's start. For more information, contact CDCinfo@riohondo.edu.

Total: 27.0

CHILD DEVELOPMENT Certificate of Achievement

Description

This curriculum is designed to meet the minimum educational requirements of the California Department of Social Services (DSS) to secure employment in state licensed private preschools and childcare centers as Infant/Toddler, Preschool or School-Age Teachers or as Program Director. The curriculum will also meet requirements for acquiring Assistant and Associate Teacher Level Child Development Permits from the California Commission on Teacher Credentialing in order to secure employment in state and federally funded programs for children. All courses listed in Child Development electives, regardless of the catalog year or year taken, may be used as Child Development electives for the Certificate of Achievement under any catalog year. The State of California Commission on Teacher Credentialing has several Child Development Permits available to students completing Child Development courses. See www.ctc.ca.gov/credentials/CREDS/child-dev-permits.html for details.

To acquire a **Certificate of Achievement in Child Development**, it is necessary to complete the following courses:

Required Courses		Units: 18.0
CD 106	Child Growth and Development ^{(DS 1)+}	3.0
CD 110	Principles and Practices of Early Childhood Education ^{(DS 3)+}	3.0
CD 111	Early Childhood Education Curriculum ^{(DS 3)+}	3.0
CD 114	Observation and Assessment ^{(DS 3)+}	3.0
CD 208	Child, Family, and Community ^{(DS 2)+}	3.0
CD 228	Early Childhood Education Practicum**	3.0
Plus nine units selected from the following courses:		Units: 9.0
CD 102	Nutrition, Health and Safety for Children ^{(DS 7)+}	3.0
CD 103	Parenting ^{(DS 2)+}	3.0
CD 115	Creative Art Experiences for Children ^{(DS 3)+}	3.0
CD 118	Development of Science and Math Experiences ^{(DS 3)+}	3.0
CD 119	Music and Movement for Children ^{(DS 3)+}	3.0
CD 120	Experiences in Language Arts ^{(DS 3)+}	3.0
CD 211	Infant and Toddler Development ^{(DS 4)+}	3.0
CD 213	Care and Education for Infants and Toddlers ^{(DS 4)+}	3.0
CD 224	Diversity Issues During Early Childhood, School Age, and Adolescence ^{(DS 3)+}	3.0
CD 226	Introduction to Special Education	3.0
CD 229	Literacy Development for Children ^{(DS 3)+}	3.0
CD 232	Curriculum and Strategies for Children with Special Needs	3.0
ED 110	Introduction to Teaching	3.0

+DS indicates Department of Social Services Title 22 classification requirements for teacher training in licensed private preschools and childcare programs.

**3.4 consecutive hours of weekly supervised field experience at the Rio Hondo College Child Development Center are required. Schedule must be established prior to the start of the semester. Beginning times are typically 7:30 am, 8:30 am, 9:30 am or 1:45 pm. Verification of freedom from tuberculosis and immunizations against influenza, pertussis, and measles are required prior to the semester's start. For more information, contact CDCinfo@riohondo.edu.

CHILD DEVELOPMENT/EARLY CHILDHOOD EDUCATION Associate in Science for Transfer

Description

The **Associate in Science in Early Childhood Education for Transfer (AS-T) Degree** is intended to meet the lower division requirements for Early Childhood Education majors (or similar majors) at a CSU campus that offers an Early Childhood Education baccalaureate degree.

This degree is designed for students interested in gaining the basic concepts and applications of the field of Early Childhood Education and for students looking to meet the state minimum requirements to work in the field. These courses will provide students with a solid foundation in theory, pedagogy, principles and practices that will serve them for either transferring to a four-year college or in the workplace.

In addition to the courses listed below, the following requirements must be met for completion of the AS-T Degree in Early Childhood Education:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for courses accepted into the Early Childhood Education major at the CSU where they seek transfer.

Required Courses		Units: 24.0
CD 102	Nutrition, Health and Safety for Children	3.0
CD 106	Child Growth and Development	3.0
CD 110	Principles and Practices of Early Childhood Education	3.0
CD 111	Early Childhood Education Curriculum	3.0
CD 114	Observation and Assessment	3.0
CD 208	Child, Family, and Community	3.0
CD 224	Diversity Issues During Early Childhood, School Age, and Adolescence	3.0
CD 228	Early Childhood Education Practicum**	3.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

***3.4 consecutive hours of weekly supervised field experience at the Rio Hondo College Child Development Center are required. Schedule must be established prior to the start of the semester. Beginning times are typically 7:30am, 8:30am, 9:30 am or 1:45 pm. Verification of freedom from tuberculosis and immunizations against influenza, pertussis, and measles are required prior to the semester's start. For more information, contact CDCinfo@riohondo.edu.

Total: 24.0

CHILD DEVELOPMENT/INFANT-TODDLER SPECIALIZATION Certificate of Achievement

Description

The following courses will prepare students to work with infants and toddlers by providing developmental information regarding this age group and techniques to facilitate and support the care and education of infants and toddlers.

To acquire the **Certificate of Achievement in Infant/Toddler Specialization**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
CD 106	Child Growth and Development	3.0
CD 110	Principles and Practices of Early Childhood Education	3.0

CD 211	Infant and Toddler Development	3.0
CD 213	Care and Education for Infants and Toddlers	3.0
		Total: 12.0

CHILD DEVELOPMENT/LANGUAGE AND LITERACY SPECIALIZATION

Certificate of Achievement

Description

The following courses will prepare students to effectively facilitate and support the language development of children. It will also provide essential information regarding Emergent Literacy and how it supports the development of effective reading skills in children.

To acquire the **Certificate of Achievement in Language and Literacy Specialization**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
CD 106	Child Growth and Development	3.0
CD 110	Principles and Practices of Early Childhood Education	3.0
CD 120	Experiences in Language Arts	3.0
CD 229	Literacy Development for Children	3.0
		Total: 12.0

CHILD DEVELOPMENT/PRESCHOOL TEACHER

Certificate of Achievement

Description

The following courses meet the minimum educational requirements under Title 22 (Department of Social Services-DSS) to qualify the student to teach in a state licensed preschool or childcare program (private for-profit or private nonprofit). Completion of these courses will also qualify a student to apply for a Child Development Permit at the Assistant level through the California Commission on Teacher Credentialing. The Assistant Level Permit will qualify a student to teach in state or federally funded programs. These courses also meet the unit requirements for the Associate Teacher Level on the Child Development Permit Matrix (work experience is also required for this permit level). The student must have attained a grade of "C" or higher in each course. See www.ctc.ca.gov/credentials/leaflets/c1797.pdf for details.

To acquire the **Certificate of Achievement in Preschool Teacher**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
CD 102	Nutrition, Health and Safety for Children ^{+(DS 7)}	3.0
CD 106	Child Growth and Development ^{+(DS 1)}	3.0
CD 110	Principles and Practices of Early Childhood Education ^{+(DS 3)}	3.0
CD 111	Early Childhood Education Curriculum ^{+(DS 3)}	3.0
CD 208	Child, Family, and Community ^{+(DS 2)}	3.0

+DS indicates Department of Social Services Title 22 classification requirements for teacher training in licensed private preschools and childcare programs.

Total: 15.0

CHILD DEVELOPMENT/SPECIAL EDUCATION SPECIALIZATION

Certificate of Achievement

Description

The following courses will prepare students to work with children with special needs by providing introductory information regarding the types of special needs, statutory requirements for providing educational programming for children with special needs and techniques to facilitate and support the learning of children with special needs.

To acquire the **Certificate of Achievement in Special Education Specialization**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
CD 106	Child Growth and Development	3.0
CD 110	Principles and Practices of Early Childhood Education	3.0
CD 226	Introduction to Special Education	3.0
CD 232	Curriculum and Strategies for Children with Special Needs	3.0
		Total: 12.0

CIVIL DESIGN Associate of Science Degree

Description

This major provides a focused course of study for students in preparation for careers involving the design and construction of civil engineering projects. The curriculum also puts interested students on the path to licensure as civil engineers. The coursework includes exposure to the broad range of subdisciplines within the field of civil engineering, and closely-related fields such as surveying, architecture, geographic information systems (GIS), and construction. Additionally, the integral coursework focuses on the preparation of common civil project drawings using industry-standard drawing techniques and conventions with hand and/or computer-aided drafting (CAD) tools.

As a degree (in contrast to a certificate), this program requires the completion of general education courses; however, if transfer to a university for a baccalaureate or advanced degree is desired, interested students should carefully consider the specific admission and transfer requirements for individual colleges and universities.

To acquire the **Associate of Science Degree in Civil Design**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College general education and proficiency, California State University General Education Breadth (CSU GE-Breadth), or Intersegmental General Education Transfer Curriculum (IGETC) requirements.

Required Courses:		Units: 25.0-26.0
ENGT 100	Introduction to Engineering	2.0
OR		2.0
ENGR 100	Introduction to Engineering	2.0
		3.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		3.0
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		3.0
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
		4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		4.0
ENGT 170	MicroStation for Basic CADD Applications	4.0
		3.0-4.0
ARCH 110	Construction Document Reading and Estimating	3.0
OR		4.0
ARCH 115	Introduction to Residential Architecture: Drawing and Design	4.0
CIV 140	Civil Engineering & Construction Fundamentals	4.0
CIV 142	Introduction to Land Surveying and GPS	4.0
CIV 210	Concrete Technology and Testing	2.0
CIV 241	Civil Engineering Drafting and Design*	3.0
Choose a minimum of 5 units from the following:		Units: 5.0-8.0
CIV 143	Applications to Surveying and GPS*	4.0
CIV 245	Civil Engineering Design and Modeling*	3.0
CIV 290	Work Experience Education/Internship for Civil-Related Fields	1.0-4.0
CIV 299	Directed Study in Civil Design Technology**	1.0-3.0
GIS 120	Introduction to Geographic Information Systems and Spatial Analysis	4.0

*Prerequisite

**minimum GPA requirements or instructor approval

Total: 30.0-34.0

CIVIL DESIGN TECHNICIAN Certificate of Achievement

Description

This major provides a focused course of study for students in preparation for careers involving the design and construction of civil engineering projects. The curriculum also puts interested students on the path to licensure as civil engineers. The coursework includes exposure to the broad range of subdisciplines within the field of civil engineering and closely-related fields such as surveying, architecture, geographic information systems (GIS), and construction. Additionally, the integral coursework focuses on the preparation of common civil project drawings using industry-standard drawing techniques and conventions with hand and/or computer-aided drafting (CAD) tools.

To acquire the **Certificate of Achievement in Civil Design Technician**, it is necessary to complete the following courses:

Required Courses:		Units: 25.0-26.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
		3.0-4.0
ARCH 110	Construction Document Reading and Estimating	3.0
OR		
ARCH 115	Introduction to Residential Architecture: Drawing and Design	4.0
CIV 140	Civil Engineering & Construction Fundamentals	4.0
CIV 142	Introduction to Land Surveying and GPS	4.0
CIV 210	Concrete Technology and Testing	2.0
CIV 241	Civil Engineering Drafting and Design*	3.0
		2.0
ENGR 100	Introduction to Engineering	2.0
OR		
ENGT 100	Introduction to Engineering	2.0
		4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0
Choose a minimum of 5 units from the following:		Units: 5.0-8.0
CIV 143	Applications to Surveying and GPS*	4.0
CIV 245	Civil Engineering Design and Modeling*	3.0
CIV 290	Work Experience Education/Internship for Civil-Related Fields	1.0-4.0
CIV 299	Directed Study in Civil Design Technology**	1.0-3.0
GIS 120	Introduction to Geographic Information Systems and Spatial Analysis	4.0
*Prerequisite		
**minimum GPA requirements or instructor approval		
		Total: 30.0-34.0

CIVIL DESIGN/SURVEYING, MAPPING & DRAWING

Certificate of Achievement

Description

This certificate is designed for surveying careers and leads to employment in civil design applications, public work, utilities and CADD/Drafting-related industries.

To acquire the **Certificate of Achievement in Surveying, Mapping & Drawing**, it is necessary to complete the following courses:

Required Courses		Units: 22.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
CIV 140	Civil Engineering & Construction Fundamentals	4.0
CIV 142	Introduction to Land Surveying and GPS	4.0
ENGT 122	Intermediate Engineering Design: Geometric Dimensioning & Tolerancing	3.0
GIS 120	Introduction to Geographic Information Systems and Spatial Analysis	4.0
GIS 221	Cartography Design and Geographic Information Systems*	4.0
*Prerequisite		
Select one course from the following:		Units: 4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		

Additional Recommended courses: GEOG 101 and MATH 175

Total: 26.0

CIVIL DRAFTING Certificate of Achievement

Description

This program provides a focused course of study to ready students for careers in the preparation of construction documents for Civil Engineering projects. The coursework provides a focus on the preparation of common civil project drawings using industry-standard drawing techniques and conventions with hand and/or computer-aided drafting tools. Additionally, the coursework includes exposure to the broad range of sub-disciplines within the field of Civil Engineering.

To acquire the **Certificate of Achievement in Civil Drafting**, it is necessary to complete the following courses:

Required Courses:		Units: 14.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
		4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0
CIV 140	Civil Engineering & Construction Fundamentals	4.0
CIV 241	Civil Engineering Drafting and Design*	3.0
*Prerequisite		
Choose a minimum of 3 units from the following:		Units: 3.0-4.0
ARCH 110	Construction Document Reading and Estimating	3.0
ARCH 115	Introduction to Residential Architecture: Drawing and Design	4.0
CIV 290	Work Experience Education/Internship for Civil-Related Fields	1.0-4.0
CIV 299	Directed Study in Civil Design Technology*	1.0-3.0
		Total: 17.0-18.0

COMMUNICATION STUDIES 2.0 Associate in Arts for Transfer

Description

The **Associate in Arts in Communication Studies 2.0 for Transfer (AA-T) Degree** is intended to meet the lower division requirements for Communication Studies majors (or similar majors) at a CSU campus that offers a Communication Studies baccalaureate degree.

This degree is designed for students interested in the study and practice of human communication. The Associate in Arts in Communication Studies for Transfer Degree offers students comprehensive knowledge of the nature of communication, including theoretical foundations and applicable skills. Students will develop skills in advocacy, critical thinking, debate, interpersonal communication, oral communication, performance, public speaking, and small group communication. Career opportunities may include: administration, advertising, broadcasting, business communications, consulting, government services, journalism, law, marketing, performance, politics, public relations, sales, teaching, and other professions in which an understanding of and facility with the process of communication is essential.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Communication Studies 2.0:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for courses accepted into the Communication Studies major at the CSU where they seek transfer.

Required Courses (6 units)		Units: 6.0
SPCH 100	Interpersonal Communication	3.0
OR		
SPCH 100H	Interpersonal Communication Honors*	3.0
		3.0
SPCH 101	Public Speaking	3.0
OR		
SPCH 101H	Public Speaking Honors*	3.0
		3.0
*Prerequisite		
List A: Select three courses (9 units) from List A below (a maximum of 3 units in Forensics):		Units: 9.0
SPCH 110	Forensics: Speech & Debate Team	2.0-3.0
SPCH 120	Small Group Communication	3.0
SPCH 130	Oral Interpretation	3.0
SPCH 140	Argumentation and Debate	3.0
SPCH 150	Intercultural Communication	3.0
MSCM 128	Mass Media in Modern Society	3.0
List B: Select one course (3 units). Choose from List B below or one course not yet taken from List A:		Units: 3.0
		3.0
ANTH 102	Introduction to Cultural Anthropology	3.0
OR		
ANTH 102H	Introduction to Cultural Anthropology Honors*	3.0
JOUR 120	Communications Reporting and Writing	3.0
		3.0
LIT 102	Approaches to Literature	3.0
OR		
LIT 102H	Approaches to Literature Honors*	3.0
		3.0
PSY 101	Introductory Psychology	3.0
OR		
PSY 101H	Introductory Psychology Honors*	3.0
		3.0
SOC 101	Introduction to Sociology	3.0
OR		
SOC 101H	Introduction to Sociology Honors*	3.0
SPCH 132	Readers Theatre	3.0
SPCH 240	Argumentation and Discussion*	3.0

CSU or IGETC Pattern (Units will vary)

COMPUTER INFORMATION TECHNOLOGY/CLOUD COMPUTING PRACTITIONER Certificate of Achievement

Description

The Cloud Computing program prepares students to design solutions for Infrastructure as a Service (IaaS) architectures by provisioning computing instances, establishing virtual private networks, managing databases and storage within a secure online environment. Students produce dynamic solutions responsive to information and computing technology workloads with on-demand pay-as-you-go pricing allowing flexibility for small business, entrepreneurship and enterprise adoption. Industry certifications are embedded to prepare for occupations in Cloud Architect, Cloud Support Associate, Cloud Engineer or Cloud Technicians. Some preparation in information technology or computer programming is recommended.

To acquire the **Certificate of Achievement in Computer Information Technology/Cloud Computing Practitioner**, it is necessary to complete the following courses:

Required Courses		Units: 13.0
CIT 114	Introduction to Cloud Computing with DevOps	4.0
CIT 172	Database Essentials in Amazon Web Services*	3.0
CIT 173	Compute Engines in Amazon Web Services*	1.5
CIT 174	Security in Amazon Web Services*	1.5
CIT 175	DevOps Engineering in Amazon Web Services*	3.0
Choose one of the following options:		Units: 3.0-6.0
CIT 139	Linux I*	3.0
OR		
CIT 171	Network + *	3.0
OR		
CIT 200	Systems Analysis and Design*	3.0
OR		
		3.0
CIT 111	Introduction to Programming	3.0
OR		
CIT 127	Python Programming I*	3.0
		Total: 16.0-19.0

COMPUTER INFORMATION TECHNOLOGY/COMPUTER SYSTEMS Associate of Science Degree

Description

This curriculum is designed to prepare students for employment in computer applications with emphasis in programming language C++, Java or Python.

To acquire the **Associate of Science Degree in Computer Information Technology: Computer Systems**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 12.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 111	Introduction to Programming	3.0
CIT 119	Microsoft® Access®	3.0
CIT 200	Systems Analysis and Design*	3.0
Choose one area of specialization below:		Units: 6.0-8.0
C++ Programming Option:		
CIT 125	Introduction to C++ Programming	4.0
CIT 126	Advanced C++ Programming *	4.0
Java Programming Option:		
CIT 135	Introduction to Java Programming	4.0
CIT 136	Advanced Java Programming*	4.0

Python Programming Option:

CIT 127	Python Programming I*	3.0
CIT 128	Python Programming II*	3.0
*Prerequisite		

Total: 18.0-20.0

COMPUTER INFORMATION TECHNOLOGY/COMPUTER SYSTEMS Certificate of Achievement

Description

This certificate program is designed to prepare students for employment in computer applications with emphasis in programming language C++, Java or Python.

To acquire the **Certificate of Achievement in Computer Information Technology: Computer Systems**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 111	Introduction to Programming	3.0
CIT 119	Microsoft® Access®	3.0
CIT 200	Systems Analysis and Design*	3.0

Choose one area of specialization below:**Units: 6.0-8.0****C++ Programming Option:**

CIT 125	Introduction to C++ Programming	4.0
CIT 126	Advanced C++ Programming *	4.0

Java Programming Option:

CIT 135	Introduction to Java Programming	4.0
CIT 136	Advanced Java Programming*	4.0

Python Programming Option:

CIT 127	Python Programming I*	3.0
CIT 128	Python Programming II*	3.0
*Prerequisite		

Total: 18.0-20.0

COMPUTER INFORMATION TECHNOLOGY/CYBERSECURITY Associate of Science Degree

Description

The following curriculum meets the requirement for a degree in Computer Information Technology/Cybersecurity. The courses needed for the degree are designed for those wishing to pursue a career in Computer Information Technology with emphasis in Cybersecurity.

To acquire the **Associate of Science Degree in Computer Information Technology/Cybersecurity**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 10.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 180	PC Maintenance - A+ Certification*	4.0
CIT 221	Ethical Hacking*	3.0
Select one course from the following:		Units: 3.0
CIT 171	Network +*	3.0
CIT 210	Cisco® Networking I*	3.0
Select one course from the following:		Units: 3.0-4.0
CIT 125	Introduction to C++ Programming	4.0
CIT 127	Python Programming I*	3.0
CIT 135	Introduction to Java Programming	4.0

Select two courses from the following:		Units: 6.0
CIT 170	Server +*	3.0
CIT 192	Security +*	3.0
CIT 200	Systems Analysis and Design*	3.0
CIT 214	Cisco Networking II*	3.0
MGMT 208	Business Communications*	3.0
Select one course from the following:		Units: 4.0
PSY 190	Statistics for the Behavioral Sciences*	4.0
		4.0
MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0
		4.0
MATH 170	Elements of Calculus*	4.0
		4.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
		4.0
*Prerequisite		
		Total: 26.0-27.0

COMPUTER INFORMATION TECHNOLOGY/CYBERSECURITY Certificate of Achievement

Description

The following curriculum meets the requirement for a Certificate of Achievement in Computer Information Technology/Cybersecurity. The courses needed for the certificate are designed for those wishing to pursue a career in cybersecurity.

To acquire the **Certificate of Achievement in Computer Information Technology/Cybersecurity**, it is necessary to complete the following courses:

Required Courses		Units: 10.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 127	Python Programming I*	3.0
CIT 180	PC Maintenance - A+ Certification*	4.0
Select one course from the following:		Units: 3.0
CIT 171	Network +*	3.0
CIT 210	Cisco® Networking I*	3.0
Select two courses from the following:		Units: 6.0
CIT 170	Server +*	3.0
CIT 192	Security +*	3.0
CIT 200	Systems Analysis and Design*	3.0
CIT 214	Cisco Networking II*	3.0
CIT 221	Ethical Hacking*	3.0
MGMT 208	Business Communications*	3.0
Select one course from the following:		Units: 4.0
PSY 190	Statistics for the Behavioral Sciences*	4.0
		4.0
MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0
		4.0
MATH 170	Elements of Calculus*	4.0
		4.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
		4.0
*Prerequisite		
		Total: 23.0

COMPUTER INFORMATION TECHNOLOGY/CYBERSECURITY TECHNICIAN Certificate of Achievement

Description

The following curriculum meets the requirement for a **Certificate of Achievement in Computer Information Technology/Cybersecurity Technician**. The courses needed for the certificate are designed for those wishing to pursue a career as a computer support specialist.

To acquire the **Certificate of Achievement in Computer Information Technology/Cybersecurity Technician**, it is necessary to complete the following courses:

Required Courses		Units: 16.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 170	Server + *	3.0
CIT 171	Network + *	3.0
CIT 180	PC Maintenance - A+ Certification *	4.0
CIT 192	Security + *	3.0
*Prerequisite		
		Total: 16.0

COMPUTER INFORMATION TECHNOLOGY/CYBERSECURITY/ETHICAL HACKER Certificate of Achievement

Description

The following curriculum meets the requirement for a **Certificate of Achievement in Computer Information Technology/Ethical Hacker**. The courses needed for the certificate are designed for those wishing to pursue a career in ethical hacking.

To acquire the **Certificate of Achievement in Computer Information Technology/Ethical Hacker**, it is necessary to complete the following courses:

Required Courses		Units: 22.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 127	Python Programming I*	3.0
CIT 170	Server + *	3.0
CIT 171	Network + *	3.0
CIT 180	PC Maintenance - A+ Certification *	4.0
CIT 192	Security + *	3.0
CIT 221	Ethical Hacking*	3.0
*Prerequisite		
		Total: 22.0

COMPUTER INFORMATION TECHNOLOGY/DESKTOP TECHNICIAN Career Certificate

Description

This curriculum is designed to prepare students for employment as entry level Desktop Support Technicians. Students that successfully complete the Desktop Technician certificate will be able to install, operate, upgrade, deploy and troubleshoot personal computers and Windows based workstations. This certificate also prepares students to pass the CompTIA Security+ examination and the Windows Operating System examination.

Required Courses		Units: 13.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 130	Windows Configuration	3.0
CIT 180	PC Maintenance - A+ Certification *	4.0
CIT 192	Security + *	3.0
*Prerequisite		
		Total: 13.0

COMPUTER INFORMATION TECHNOLOGY/ENTRY NETWORK TECHNICIAN Certificate of Achievement

Description

This curriculum is designed to prepare students for employment as entry-level network technicians. Students that successfully complete the Entry Network Technician certificate will be able to install, operate and troubleshoot small enterprise networks and perform basic network security.

To acquire the **Certificate of Achievement in Computer Information Technology/Entry Network Technician**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 192	Security +*	3.0
CIT 210	Cisco® Networking I*	3.0
CIT 214	Cisco Networking II*	3.0

*Prerequisite

Total: 12.0

COMPUTER INFORMATION TECHNOLOGY/INFORMATION SYSTEMS AND TECHNOLOGY Associate of Science Degree

Description

The following curriculum meets the requirement for a Degree in Computer Information Technology/ Information Systems and Technology. The courses needed for the degree are designed for those wishing to pursue a career in cybersecurity.

To acquire the **Associate of Science Degree in Computer Information Technology/Information Systems and Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 22.0
MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 111	Introduction to Programming	3.0
CIT 192	Security +*	3.0
CIT 200	Systems Analysis and Design*	3.0
CIT 210	Cisco® Networking I*	3.0
BUSL 110	Legal Environment of Business	3.0
Select One Course from the following:		Units: 4.0
MATH 160	College Algebra	4.0
MATH 170	Elements of Calculus*	4.0
MATH 180	Pre-Calculus*	4.0
		4.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
Choose One Option from the following:		Units: 6.0-8.0
Cybersecurity Option		
ACCT 101	Financial Accounting	4.0
OR		
ACCT 101H	Financial Accounting Honors*	4.0
		4.0
ACCT 102	Managerial Accounting*	4.0

OR		
ACCT 102H	Managerial Accounting Honors*	4.0

Communications Option

CIT 214	Cisco Networking II*	3.0
MGMT 208	Business Communications*	3.0
		Total: 32.0-34.0

COMPUTER INFORMATION TECHNOLOGY/NETWORK ADMINISTRATOR Associate of Science Degree

Description

The following curriculum meets the requirement for an **Associate of Science Degree in Computer Information Technology/Network Administrator**. The courses needed for the degree are designed for those who wish to pursue a career in Information Technology as a Network Administrator.

To acquire the **Associate of Science Degree in Computer Information Technology/Network Administrator**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 28.0
ACCT 100	Introduction to Accounting	3.0
MGMT 101	Introduction to Business	3.0
MGMT 108	Business Writing	3.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 180	PC Maintenance - A+ Certification*	4.0
CIT 192	Security +*	3.0
CIT 210	Cisco® Networking I*	3.0
CIT 214	Cisco Networking II*	3.0
CIT 215	Cisco Networking III*	3.0
*Prerequisite		
		Total: 28.0

COMPUTER INFORMATION TECHNOLOGY/NETWORK ADMINISTRATOR Certificate of Achievement

Description

The following curriculum meets the requirement for a **Certificate of Achievement in Computer Information Technology/Network Administrator**. The courses needed for the certificate are designed for those who wish to pursue a career in Information Technology as a Network Administrator.

To acquire the **Certificate of Achievement in Computer Information Technology/Network Administrator**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 19.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 180	PC Maintenance - A+ Certification*	4.0
CIT 192	Security +*	3.0
CIT 210	Cisco® Networking I*	3.0
CIT 214	Cisco Networking II*	3.0
CIT 215	Cisco Networking III*	3.0
*Prerequisite		
		Total: 19.0

COMPUTER INFORMATION TECHNOLOGY/NETWORK TECHNICIAN

Certificate of Achievement

Description

The following curriculum meets the requirement for a Certificate of Achievement in Computer Information Technology/Network Technician. The courses needed for the certificate are designed for those who wish to pursue a career in Information Technology as a Network Technician.

To acquire the **Certificate of Achievement in Computer Information Technology/Network Technician** it is necessary to complete the following courses:

Required Courses		Units: 15.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 192	Security +*	3.0
CIT 210	Cisco® Networking I*	3.0
CIT 214	Cisco Networking II*	3.0
CIT 215	Cisco Networking III*	3.0
*Prerequisite		
		Total: 15.0

COMPUTER INFORMATION TECHNOLOGY/PC REPAIR TECHNICIAN

Career Certificate

Description

This curriculum is designed to prepare students for employment as entry level PC Repair Technicians. Students that successfully complete the **PC Repair Technician certificate** will be able to install, operate, upgrade and troubleshoot personal computers. This certificate also prepares students to pass the CompTIA A+ examination.

Required Courses		Units: 10.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 130	Windows Configuration	3.0
CIT 180	PC Maintenance - A+ Certification*	4.0
*Prerequisite		
		Total: 10.0

COMPUTER INFORMATION TECHNOLOGY/SYSTEM ADMINISTRATOR

Associate of Science Degree

Description

The following curriculum meets the requirement for an **Associate of Science Degree in Computer Information Technology/System Administrator**. The courses needed for the degree are designed to prepare students for employment in Computer Information Technology as a System Administrator with the option to focus on Microsoft Server Operating Systems or Linux Server Operating Systems.

To acquire the **Associate of Science Degree in Computer Information Technology/System Administrator**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 25.0
ACCT 100	Introduction to Accounting	3.0
MGMT 101	Introduction to Business	3.0
MGMT 108	Business Writing	3.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 130	Windows Configuration	3.0
CIT 160	Introduction to Operating Systems	3.0
CIT 180	PC Maintenance - A+ Certification*	4.0
CIT 192	Security +*	3.0
*Prerequisite		
Choose MS Windows Server Option or Red Hat Linux Option		Units: 6.0
CIT 131	Windows Server Active Directory	3.0
		3.0

CIT 133	Windows Server Applications Infrastructure	3.0
OR		
CIT 139	Linux I*	3.0
CIT 140	Linux II*	3.0
		Total: 31.0

COMPUTER INFORMATION TECHNOLOGY/SYSTEM ADMINISTRATOR Certificate of Achievement

Description

The following curriculum meets the requirement for a Certificate of Achievement in Computer Information Technology/System Administrator. The courses needed for the certificate are designed to prepare students for employment in Computer Information Technology as a System Administrator with the option to focus on Microsoft Server operating Systems or Linux Server Operating Systems.

To acquire the **Certificate of Achievement in Computer Information Technology/System Administrator**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 16.0
CIT 101	Introduction to Computer Information Technology	3.0
CIT 130	Windows Configuration	3.0
CIT 160	Introduction to Operating Systems	3.0
CIT 180	PC Maintenance - A+ Certification*	4.0
CIT 192	Security +*	3.0
*Prerequisite		
Chooses MS Windows Server Option or Red Hat Linux Option		Units: 6.0
CIT 131	Windows Server Active Directory	3.0
CIT 133	Windows Server Applications Infrastructure	3.0
OR		
CIT 139	Linux I*	3.0
CIT 140	Linux II*	3.0
		Total: 22.0

COMPUTER SCIENCE Associate in Science for Transfer

Description

The **Associate in Science in Computer Science for Transfer (AS-T) Degree** is intended to meet the lower division requirements for Computer Science majors (or similar majors) at a CSU campus that offers a Computer Science baccalaureate degree.

This degree is designed for students interested in an introduction to the field of Computer Science. Computer Science is the study of representational computation, data access methods, programming languages, algorithmic modeling, software design, testing and development. Students in the Computer Science program study and apply their knowledge of mathematics, physics and logic to solve a variety of problems using current technology. Coursework includes programming languages and concepts, systems analysis, mathematics, physics, computer hardware and data structures.

In addition to the courses listed below, the following requirements must be met for completion of the AS-T Degree in Computer Science:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for courses accepted into the Computer Science major at the CSU where they seek transfer.

Required Courses		Units: 24.0
CIT 127	Python Programming I*	3.0
CIT 128	Python Programming II*	3.0
CS 142	Computer Architecture and Organization*	3.0
CS 152	Discrete Structures*	3.0
		4.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
MATH 191	Calculus II*	4.0
PHY 211	Physics for Scientists & Engineers - I*	4.0
Choose one course from the following:		Units: 4.0-5.0
PHY 213	Physics for Scientists & Engineers - III*	4.0
BIOL 200	Principles of Biology 1 (Molecular and Cellular Biology)*	5.0
CHEM 130	General Chemistry I*	5.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

*Prerequisite

Total: 28.0-29.0

CONSTRUCTION MANAGEMENT

Associate of Science Degree

Description

The identified curriculum will prepare students for employment or transfer to university– specifically with respect to construction management. The coursework incorporates concepts and theory of construction as well as practical application of construction management tasks. The degree additionally provides a framework of study that is common in bachelor's-level programs for explicitly this field of study.

To acquire the **Associate of Science Degree in Construction Management**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 37.0
ACCT 101	Financial Accounting	4.0
OR		4.0
ACCT 101H	Financial Accounting Honors*	4.0
ARCH 110	Construction Document Reading and Estimating	3.0
ARCH 125	Residential Architecture: Design & Construction*	4.0
ARCH 225	Commercial Architecture: Design and Construction*	4.0
BUSL 110	Legal Environment of Business	3.0
CIV 140	Civil Engineering & Construction Fundamentals	4.0
CIV 142	Introduction to Land Surveying and GPS	4.0
CIV 210	Concrete Technology and Testing	2.0
		2.0
ENGT 100	Introduction to Engineering	2.0
OR		
ENGR 100	Introduction to Engineering	2.0
ENGR 235	Engineering Mechanics: Statics*	3.0
		4.0
MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0

*Prerequisite

Total: 37.0

CORRECTIONS

Associate of Science Degree

Description

The correctional program is designed to prepare students to enter the field of corrections as competent correctional officers, counselors, probation or parole aides, or paraprofessional volunteers for any correctional agency. The student may elect to transfer to a four-year college or seek entry-level employment in a correctional agency.

The courses will provide an academic as well as a practical training program. This will train persons seeking to enter the field of corrections and will increase the education of persons already employed in corrections and may also be beneficial to update the skills and knowledge of professional workers in the field of corrections.

The Associate of Science Degree requires 24 units in Corrections. This pattern of courses has been endorsed by the Joint Apprenticeship Committee of the California Department of Corrections, California Youth Authority and California Correctional Peace Officers Association as a program which would be of benefit to apprentices.

To acquire the **Associate of Science Degree in Corrections**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE) pattern, or Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Required Courses		Units: 18.0
AJ 041	Effective Written Communication for Public Service Personnel	3.0
CORR 101	Introduction to Corrections	3.0
CORR 104	Control and Supervision in Corrections	3.0
CORR 106	Legal Aspects of Corrections	3.0
CORR 134	Introduction to Interviewing and Counseling Skills for Correctional Officers	3.0
CORR 235	Conflict Resolution for the Correctional Officer	3.0
Plus 6 units selected from the following courses:		Units: 6.0
AJ 101	Introduction to Administration of Justice	3.0
AJ 102	Criminal Procedures	3.0
AJ 104	Legal Aspects of Evidence	3.0
AJ 105	Community Relations/Multicultural Issues Within Public Service	3.0
AJ 106	Criminal Law I*	3.0
AJ 107	Criminal Law II*	3.0
AJ 207	Juvenile Law and Procedure	3.0
AJ 208	Principles of Investigation	3.0
AJ 215	Vice and Narcotics Control	3.0
AJ 228	Police Field Operations	3.0
AJ 250	Contemporary Issues in the Criminal Justice System	3.0
AJ 275	Introduction to Forensic Science	3.0
CORR 190	Public Safety Communications	3.0
CORR 208	Leadership in Corrections	3.0
CORR 209	Case Load Management	3.0
CORR 210	Supervision in Public Safety	3.0
CORR 264	Inmate Discipline in Corrections	3.0
CORR 265	Supervision of Sex Offenders	3.0
*Prerequisite		
		Total: 24.0

CORRECTIONS

Certificate of Achievement

Description

The **Certificate of Achievement in Corrections** is designed to prepare students to meet the needs of entry-level positions in the field of corrections. The curriculum prepares students with a foundation in administration of justice/law enforcement, and provides them with the knowledge to enter varied career areas. The skills developed during class will enhance the student's knowledge in the area of corrections.

To acquire the **Certificate of Achievement in Corrections**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
CORR 101	Introduction to Corrections	3.0
CORR 104	Control and Supervision in Corrections	3.0

CORR 106	Legal Aspects of Corrections	3.0
CORR 134	Introduction to Interviewing and Counseling Skills for Correctional Officers	3.0
		Total: 12.0

CREATIVE WRITING

Certificate of Achievement

Description

The Creative Writing Certificate provides students with the academic preparation and skill set needed to demonstrate their ability to author works in creative writing, including works for personal development and/or professional application. Completion of the required courses formalizes students' creative writing abilities applied across a variety of genres.

To acquire a **Certificate of Achievement in Creative Writing**, it is necessary to complete the following courses:

Required courses:		Units: 12.5
ENGL 101	College Composition and Research*	3.5
ENGL 131	Creative Writing*	3.0
ENGL 231	Advanced Creative Writing*	3.0
		3.0
LIT 102	Approaches to Literature*	3.0
OR		
LIT 102H	Approaches to Literature Honors*	3.0
Select three of the following:		Units: 9.0
LIT 114	Children's and Adolescent Literature*	3.0
OR		
LIT 114H	Children's and Adolescent Literature Honors*	3.0
		3.0
LIT 140	Introduction to the Novel*	3.0
OR		
LIT 140H	Introduction to the Novel Honors*	3.0
		3.0
LIT 141	Introduction to Poetry*	3.0
OR		
LIT 141H	Introduction to Poetry Honors*	3.0
		3.0
LIT 145	Introduction to the Short Story*	3.0
OR		
LIT 145H	Introduction to the Short Story Honors*	3.0
THTR 160	Introductory Playwriting/Screenwriting	3.0
*Prerequisite		
		Total: 21.5

CREATIVE WRITING/NOVEL WRITING

Certificate of Achievement

Description

The Novel Writing Certificate provides students with the academic preparation and skill set needed to demonstrate their ability to author novels, including works for personal development and/or professional application. Completion of the required courses formalizes students' novel writing abilities.

To acquire a **Certificate of Achievement in Novel Writing**, it is necessary to complete the following courses:

Required courses:		Units: 15.5
ENGL 101	College Composition and Research*	3.5
ENGL 131	Creative Writing*	3.0
ENGL 231	Advanced Creative Writing*	3.0
		3.0

LIT 102	Approaches to Literature*	3.0
OR		
LIT 102H	Approaches to Literature Honors*	3.0
		3.0
LIT 140	Introduction to the Novel*	3.0
OR		
LIT 140H	Introduction to the Novel Honors*	3.0

*Prerequisite

Total: 15.5

CREATIVE WRITING/PLAYWRITING AND SCREENWRITING

Certificate of Achievement

Description

The Playwriting and Screenwriting Certificate of Achievement provides students with the academic preparation and skills needed to demonstrate their ability to author scripts, including works for personal development and/or professional application. Completing the required courses formalizes students' script writing abilities.

To acquire a **Certificate of Achievement in Playwriting and Screenwriting**, it is necessary to complete the following courses:

Required courses:		Units: 15.0
ENGL 131	Creative Writing*	3.0
ENGL 231	Advanced Creative Writing*	3.0
FTVE 115	Introduction to Screenwriting	3.0
		3.0
LIT 102	Approaches to Literature*	3.0
OR		
LIT 102H	Approaches to Literature Honors*	3.0
THTR 160	Introductory Playwriting/Screenwriting	3.0
		Total: 15.0

CREATIVE WRITING/POETRY WRITING

Certificate of Achievement

Description

The Poetry Writing Certificate provides students with the academic preparation and skill set needed to demonstrate their ability to author poetry, including works for personal development and/or professional application. Completion of the required courses formalizes students' poetry writing abilities.

To acquire a **Certificate of Achievement in Poetry Writing**, it is necessary to complete the following courses:

Required courses:		Units: 15.5
ENGL 101	College Composition and Research*	3.5
ENGL 131	Creative Writing*	3.0
ENGL 231	Advanced Creative Writing*	3.0
		3.0

CREATIVE WRITING/SHORT STORY WRITING

Certificate of Achievement

Description

The Short Story Writing Certificate provides students with the academic preparation and skill set needed to demonstrate their ability to author short stories, including works for personal development and/or professional application. Completion of the required courses formalizes students' short story writing abilities.

To acquire a **Certificate of Achievement in Short Story Writing**, it is necessary to complete the following courses:

Required Courses		Units: 15.5
ENGL 101	College Composition and Research*	3.5
ENGL 131	Creative Writing*	3.0
ENGL 231	Advanced Creative Writing*	3.0
		3.0
LIT 102	Approaches to Literature*	3.0
OR		
LIT 102H	Approaches to Literature Honors*	3.0
		3.0
LIT 145	Introduction to the Short Story*	3.0
OR		
LIT 145H	Introduction to the Short Story Honors*	3.0
*Prerequisite		
		Total: 15.5

CREATIVE WRITING/WRITING FOR CHILDREN

Certificate of Achievement

Description

The Writing for Children Certificate provides students with the academic preparation and skill set needed to demonstrate their ability to author literature for children, including works for personal development and/or professional application. Completion of the required courses formalizes students' writing abilities as they apply to writing for children and adolescents.

To acquire a **Certificate of Achievement in Writing for Children**, it is necessary to complete the following courses:

Required courses:		Units: 15.5
ENGL 101	College Composition and Research*	3.5
ENGL 131	Creative Writing*	3.0
ENGL 231	Advanced Creative Writing*	3.0
		3.0
LIT 102	Approaches to Literature*	3.0
OR		
LIT 102H	Approaches to Literature Honors*	3.0
		3.0
LIT 114	Children's and Adolescent Literature*	3.0
OR		
LIT 114H	Children's and Adolescent Literature Honors*	3.0
*Prerequisite		
		Total: 15.5

CRIME SCENE INVESTIGATIONS AND FORENSICS

Certificate of Achievement

Description

The Certificate of Achievement in Crime Scene Investigations and Forensics offers instruction in the areas of crime scene processing and documentation, evidence preservation, blood spatter, DNA, fingerprints, photography, report writing, and legal issues relating to physical evidence. The curriculum prepares students with a foundation in crime scene investigations (CSI) and forensics, and is designed to meet the

needs of students seeking an entry-level civilian position working crime scenes or handling evidence, as well as to enhance the credentials of law enforcement officers interested in CSI.

To acquire the **Certificate of Achievement in Crime Scene Investigations and Forensics**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
AJ 135	Crime Scene Investigation I*	3.0
AJ 136	Crime Scene Investigation II*	3.0
AJ 208	Principles of Investigation*	3.0
AJ 275	Introduction to Forensic Science	3.0
*Prerequisite		
		Total: 12.0

CSU GE

Certificate of Achievement

Description

The California State University General Education Breadth (CSU-GE Breadth) pattern is a set of courses designed to fulfill all lower-division general education requirements for California State University campuses, as well as lead to a certificate of achievement at Rio Hondo College.

To acquire the Certificate of Achievement in CSU-GE Breadth, courses must have been approved for the CSU-GE Breadth area during the term in which the course was taken (please verify approval dates on www.ASSIST.org). A grade of "C-" or better is required for courses taken in Areas A1, A2, A3, and B4.

DANCE

Associate of Arts Degree

Description

The **Associate of Arts in Dance** is a comprehensive two-year program promoting both high artistic and technical standards. The degree fulfills the needs of students seeking professions in dance as performers, choreographers, and/or dance educators and provides training for careers and employment in the performing arts, education, choreography, movement therapy, studio and arts management, arts consultancy, dance criticism, fitness, and community dance programs. An integral part of the AA in Dance is to prepare students for matriculation into Bachelor of Arts or Bachelor of Fine Arts program at a four-year college or university. See admission requirements of individual colleges and universities and transfer requirements for specific majors.

To acquire an **Associate of Arts Degree in Dance**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 11.0
DANC 114	Conditioning and Alignment	1.0
OR		1.0
KINA 114	Conditioning and Alignment	1.0
DANC 151	Modern Dance I	1.0
DANC 153	Ballet I	1.0
DANC 251	Modern Dance II*	1.0
DANC 253	Ballet II*	1.0
Dance Theory		
DANC 159	Choreography I	3.0
DANC 179	Dance History	3.0
OR		3.0
DANC 179H	Dance History Honors*	3.0

*Prerequisite

Choose 4 units from the following category:

Dance Performance

DANC 152	Dance Rehearsal and Performance	3.0
DANC 162	Dance Production	3.0
DANC 172	Dance Repertory	3.0
DANC 180	Performance	1.0

Required Subtotal 15 units

DANC 182	Dance Ensemble	3.0
----------	----------------	-----

Required Subtotal 15 units

Choose 4 units from the following categories: (Dance Styles, Body Conditioning, Arts Related Fields, and/or Kinesiology and Exercise Science, - no more than 3 units from and Single category)

Units: 4.0

Note: Only one experience in repeatable dance classes can be used to meet degree requirements.

Dance Styles

DANC 150	Introduction to World Dance	1.0
DANC 154	Jazz Dance I	1.0
DANC 157	Hip-Hop Dance	1.0
DANC 254	Jazz Dance II*	1.0

Body Conditioning

KINA 136	Pilates Mat I	1.0
KINA 139	Cross Training for Fitness	1.0
KINA 148	Strength Training	1.0
KINA 158	Yoga I	1.0
KINA 258	Yoga II*	1.0

Arts Related Fields

		3.0
DANC 199	Dance Appreciation	3.0
OR		
DANC 199H	Dance Appreciation Honors*	3.0
MUS 130	Music History and Literature Before 1750	3.0
MUS 131	Music History and Literature after 1750	3.0
MUS 133	Music Appreciation	3.0
THTR 110	Principles of Acting I	3.0
THTR 111	Principles of Acting II*	3.0
THTR 150	Stagecraft I for Theatre, TV, and Film	3.0
THTR 151	Stagecraft II for Theatre, TV, and Film*	3.0
THTR 152	Stagecraft III for Theatre, TV, and Film*	3.0

Kinesiology and Exercise Science

KIN 122	Nutrition for Sport and Fitness	3.0
KIN 126	Principles of Strength and Conditioning	3.0
KIN 127	Exercise Physiology	3.0
KIN 128	Fitness Testing and Exercise Prescription	3.0
KIN 131	Functional Anatomy of Movement	3.0
KIN 145	Theory and Analysis of Fitness Instruction	2.0
KIN 146	Training Principles for Special Populations	2.0

Total: 19.0

DANCE

Certificate of Achievement

Description

The Dance Certificate Program provides students with a core curriculum in contemporary dance practice and theory and prepares them for careers in dance education and dance performance. It is possible to complete this certificate in one calendar year. The curriculum has been designed to equip the student with a solid foundation so that they may pursue a job in private studios, recreational centers, gyms, colleges, after-school programs, dance companies, television, film, and musical theater.

Courses cover a range of styles and subjects in dance, including ballet, modern, jazz, hip hop, Latin social dance, conditioning and alignment for dance, choreography, performance, dance history, and instructional theory and analysis. The intent of this program is to prepare students for dance auditions, internships, and immediate entry-level employment in the field of dance education and dance performance. All credits may be applied to the Associate in Arts degree in Dance.

To acquire the **Certificate of Achievement in Dance**, it is necessary to complete the following courses:

Required Courses		Units: 18.0
DANC 114	Conditioning and Alignment	1.0
OR		
KINA 114	Conditioning and Alignment	1.0
DANC 151	Modern Dance I	1.0
DANC 251	Modern Dance II*	1.0
DANC 153	Ballet I	1.0
DANC 253	Ballet II*	1.0
DANC 154	Jazz Dance I	1.0
OR		
DANC 157	Hip-Hop Dance	1.0
OR		
DANC 167	Latin Dance for Fitness	1.0
OR		
KINA 167	Latin Dance for Fitness	1.0
DANC 159	Choreography I	3.0
DANC 179	Dance History	3.0
OR		
DANC 179H	Dance History Honors*	3.0
DANC 152	Dance Rehearsal and Performance	3.0
OR		
DANC 162	Dance Production	3.0
OR		
DANC 172	Dance Repertory	3.0
OR		
DANC 182	Dance Ensemble	3.0
DANC 180	Performance	1.0
KIN 145	Theory and Analysis of Fitness Instruction	2.0

*Prerequisite

Total: 18.0

DRAFTING/TECHNICAL DRAWING

Certificate of Achievement

Description

The following Technical Drawing curriculum will lead to the Certificate of Achievement and prepare students for employment as an early entry level technician in the field of Architecture, Civil and Engineering Design Drafting / Drawing. Students will develop skill-based training

techniques and knowledge of technical drawing industry standards that will also prepare them for advanced studies in the pursuit of more advanced certificates or degrees for transfer.

To acquire the **Certificate of Achievement in Technical Drawing**, it is necessary to complete the following courses:

Required Courses		Units: 16.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		3.0
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
ARCH 115	Introduction to Residential Architecture: Drawing and Design	4.0
CIV 140	Civil Engineering & Construction Fundamentals	4.0
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0
ENGT 122	Intermediate Engineering Design: Geometric Dimensioning & Tolerancing	3.0
Choose one course from the following:		Units: 4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0
		Total: 20.0

DRUG STUDIES

Associate of Science Degree

Description

The following curriculum meets the requirement for an **Associate of Science Degree in Drug Studies**. The Drug Studies Program is accredited by the California Association of Alcohol and Drug Educators (CAADE). The courses needed for the degree are designed to serve as preparation for a career in the helping professions. These courses may also serve students who wish to further their education in Human Services or other helping professions.

To acquire the **Associate of Science Degree in Drug Studies**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 36.0-38.0
HUSR 118	Chemical Dependency: Intervention, Treatment & Recovery	3.0
HUSR 122	Introduction to Group Leadership and Process	3.0
HUSR 123	Drug Education and Prevention	3.0
OR		
HUSR 128	Chemical Dependency and Co-Occurring Disorders	3.0
HUSR 124	Introduction to Case Management and Documentation	3.0
HUSR 126	Counseling the Family of the Addicted Person	3.0
HUSR 130	Essential Counseling Skills	3.0
HUSR 135	Law and Ethics in Human Services	3.0
HUSR 136	Diverse Populations in Human Services	3.0
HUSR 199A	Seminar in Human Services*	1.0
HUSR 199B	Work Experience Education/Internship in Human Services-Related Fields*	2.0-3.0
HUSR 230A	Drug Studies Seminar*	1.0
HUSR 230B	Work Experience Education/Internship for Drug Studies-Related Fields*	2.0-3.0
PSY 121	Drugs, Society, and Behavior	3.0
PSY 127	Introduction to the Physiological Effects of Drugs of Abuse	3.0
Choose two courses from the list below:		Units: 6.0
HUSR 111	Human Services in Contemporary Society	3.0
PSY 101	Introductory Psychology	3.0
OR		
PSY 101H	Introductory Psychology Honors*	3.0
PSY 112	Lifespan Development	3.0
PSY 114	Introduction to Abnormal Psychology	3.0
		3.0

SOC 101	Introduction to Sociology	3.0
OR		
SOC 101H	Introduction to Sociology Honors*	3.0

*Prerequisite

Total: 42.0-44.0

DRUG STUDIES

Certificate of Achievement

Description

The Drug Studies Program provides the student with the academic preparation and field experience needed to work with the drug dependent and their families. The Certificate is accredited by the California Association of Alcohol and Drug Educators (CAADE). Completion of the required courses provides the educational component necessary for certification as a Certified Addiction Treatment Specialist through CAADE. The courses that comprise the Certificate are designed for those who are working with or want to work with drug dependent populations, providing a broad base of knowledge regarding approaches to drug education and prevention, treatment issues, counseling skills, ethical issues, and practical knowledge about drugs and their effects.

To acquire the **Certificate of Achievement in Drug Studies**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 36.0-38.0
HUSR 118	Chemical Dependency: Intervention, Treatment & Recovery	3.0
HUSR 122	Introduction to Group Leadership and Process	3.0
HUSR 123	Drug Education and Prevention	3.0
OR		
HUSR 128	Chemical Dependency and Co-Occurring Disorders	3.0
HUSR 124	Introduction to Case Management and Documentation	3.0
HUSR 126	Counseling the Family of the Addicted Person	3.0
HUSR 130	Essential Counseling Skills	3.0
HUSR 135	Law and Ethics in Human Services	3.0
HUSR 136	Diverse Populations in Human Services	3.0
HUSR 199A	Seminar in Human Services*	1.0
HUSR 199B	Work Experience Education/Internship in Human Services-Related Fields*	2.0-3.0
HUSR 230A	Drug Studies Seminar*	1.0
HUSR 230B	Work Experience Education/Internship for Drug Studies-Related Fields*	2.0-3.0
PSY 121	Drugs, Society, and Behavior	3.0
PSY 127	Introduction to the Physiological Effects of Drugs of Abuse	3.0
Choose two courses from the list below:		Units: 6.0
HUSR 111	Human Services in Contemporary Society	3.0
PSY 101	Introductory Psychology	3.0
OR		
PSY 101H	Introductory Psychology Honors*	3.0
PSY 112	Lifespan Development	3.0
PSY 114	Introduction to Abnormal Psychology	3.0
SOC 101	Introduction to Sociology	3.0
OR		
SOC 101H	Introduction to Sociology Honors*	3.0

*Prerequisite

Total: 42.0-44.0

Associate Degree
for Transfer
A Degree with a Guarantee.SM

ECONOMICS

Associate in Arts for Transfer

Description

The **Associate in Arts in Economics for Transfer AA-T Degree** is intended to meet lower division requirements for economics majors (or similar majors) at a CSU campus that offers an economics baccalaureate degree.

An economics education provides the student with a logical way of approaching various problems and issues and provides valuable qualitative skills. The student learns techniques for analyzing contemporary economic problems and develops the ability to exercise sound judgement in evaluating public policy issues.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Economics:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for courses accepted into the Economics major at the CSU where they seek transfer.

Required Courses		Units: 14.0
ECON 101	Principles of Macroeconomics*	3.0
OR		
ECON 101H	Principles of Macroeconomics Honors*	3.0
		3.0
ECON 102	Principles of Microeconomics*	3.0
OR		
ECON 102H	Principles of Microeconomics Honors*	3.0
		4.0
MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0
		4.0
MATH 170	Elements of Calculus*	4.0
OR		
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
*Prerequisite		
Choose one course from the following list:		Units: 3.0-4.0
ACCT 101	Financial Accounting	4.0
OR		
ACCT 101H	Financial Accounting Honors*	4.0
		4.0
ACCT 102	Managerial Accounting*	4.0
OR		
ACCT 102H	Managerial Accounting Honors*	4.0
CIT 101	Introduction to Computer Information Technology	3.0
Choose one course from the following list:		Units: 3.0

ECON 135	International Political Economy	3.0
OR		3.0
POLS 135	International Political Economy	3.0

CSU GE or IGTC Pattern (Units will vary)

Transferable Electives (as needed to reach 60 transferable units)

DEGREE TOTAL 60 units

Total: 20.0-21.0

ELECTRIC VEHICLE AND FUEL CELL TECHNOLOGY TECHNICIAN

Associate of Science Degree

Description

The **Associate of Science in Electric Vehicle and Fuel Cell Technology Technician** prepares students to address needs in the emerging field of servicing and diagnosing green vehicles, including electric, hybrid, plug-in hybrid, and fuel cell automobiles. Students need to apply for the Automotive Service Excellence (ASE) Light Duty/Hybrid/Electric Vehicle Specialist Test (L3) and pay all applicable fees to take the final ASE exam. This degree is intended to be the capstone of the Hybrid/Electric/Fuel Cell Program.

To acquire the **Associate of Science in Electric Vehicle and Fuel Cell Technology Technician**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE) pattern, or Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Required Courses		Units: 23.0
AUTO 106	Automotive Electrical Tools and Diagnostic Procedures	3.0
AUTO 131	Automotive EV Electronics I*	3.0
AUTO 132	Automotive EV Electronics II*	3.0
AUTO 147	Introduction to Hybrid and Electric Vehicle Technology*	3.0
AUTO 157	Automotive Specialized Electronics Training*	4.0
AUTO 260	Advanced Hybrid/Electric Vehicle*	4.0
AUTO 266	Fuel Cell Technology Fundamentals*	3.0

*Prerequisite

Total: 23.0

ELECTRIC VEHICLE AND FUEL CELL TECHNOLOGY TECHNICIAN

Certificate of Achievement

Description

The Electric Vehicle and Fuel Cell Technology Technician Certificate of Achievement prepares students to address needs in the emerging field of servicing and diagnosing green vehicles, including electric, hybrid, plug-in hybrid, and fuel cell automobiles. Hydrogen safety and National Fire Protection Association (NFPA) 2 regulations are discussed in this course of study. Student will need to apply for the Automotive Service Excellence (ASE) Light Duty/Hybrid/Electric Vehicle Specialist Test (L3), and pay all applicable fees to take the final ASE exam.

To acquire the **Certificate of Achievement in Electric Vehicle and Fuel Cell Technology Technician**, it is necessary to complete the following courses:

Required Courses		Units: 14.0
AUTO 147	Introduction to Hybrid and Electric Vehicle Technology*	3.0
AUTO 157	Automotive Specialized Electronics Training*	4.0
AUTO 260	Advanced Hybrid/Electric Vehicle*	4.0
AUTO 266	Fuel Cell Technology Fundamentals*	3.0

*Prerequisite

Total: 14.0

ELECTRONICS TECHNOLOGY

Associate of Science Degree

Description

To acquire the **Associate of Science Degree in Electronics Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 32.0
ELEC 101	DC Electronic Circuits and Devices	4.0
ELEC 102	AC Electronic Circuits and Devices	4.0
ELEC 108	Introduction to Solid State Devices and Circuits*	4.0
ELEC 109	Linear Analog Circuits and Devices*	4.0
ELEC 111	Introduction to Digital Electronics*	4.0
ELEC 208	Advanced Solid State Devices and Circuits*	4.0
ELEC 211	Advanced Digital Electronics*	4.0
ELEC 240	Microprocessors and Microcomputing*	4.0

*Prerequisite

Total: 32.0

ELECTRONICS TECHNOLOGY

Certificate of Achievement

Description

To acquire the **Certificate of Achievement in Electronics Technology**, it is necessary to complete the following courses:

Required Courses		Units: 24.0
ELEC 101	DC Electronic Circuits and Devices	4.0
ELEC 102	AC Electronic Circuits and Devices	4.0
ELEC 108	Introduction to Solid State Devices and Circuits*	4.0
ELEC 111	Introduction to Digital Electronics*	4.0
ELEC 211	Advanced Digital Electronics*	4.0
ELEC 240	Microprocessors and Microcomputing*	4.0

*Prerequisite

Total: 24.0

ELEMENTARY TEACHER EDUCATION

Associate in Arts for Transfer

Description

The Associate in Arts Elementary Teacher Education for Transfer (AA-T) Degree is intended to meet the lower division requirements for Elementary Teacher Education majors (or similar majors) at a CSU campus that offers baccalaureate degrees.

This degree is designed for students interested in an introduction to the field of Liberal Studies, Integrated Teachers Education and for students looking to further their understanding of Elementary Teacher Education. These courses will provide students with a solid foundation in Elementary Teacher Education that will serve them for transferring to a California State University.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Elementary Teacher Education.

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)

3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.

4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for courses accepted into the Elementary Teacher Education major at the CSU where they seek transfer.

Required Courses		Units: 52.0
BIOL 101	General Biology	4.0
CD 106	Child Growth and Development	3.0
ED 110	Introduction to Teaching	3.0
ENGL 101	College Composition and Research*	3.5
		3.5
ENGL 201	Advanced Composition and Critical Thinking*	3.5
OR		
ENGL 201H	Advanced Composition and Critical Thinking Honors*	3.5
GEOG 150	Physical Geology	3.0
GEOG 151	Physical Geology Laboratory	1.0
GEOG 103	World Regional Geography	3.0
HIST 101	History of World Civilization to the 17th Century	3.0
		3.0
HIST 143	History of the United States to 1877	3.0
OR		
HIST 143H	History of the United States to 1877 Honors*	3.0
		3.0
LIT 102	Approaches to Literature*	3.0

*Prerequisite

Total: 55.0

ELEMENTARY TEACHER EDUCATION

Certificate of Achievement

Description

This Certificate of Achievement is meant to be an introduction of the skills required in Elementary Education for students interested in Elementary Education majors (or similar majors) at a CSU that offers baccalaureate degrees.

To acquire the **Certificate of Achievement in Elementary Teacher Education**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
CD 106	Child Growth and Development	3.0
ED 110	Introduction to Teaching	3.0
		3.0
COUN 101	College and Life Success	3.0
OR		
EDEV 101	College and Life Success	3.0
		3.0
SPCH 101	Public Speaking	3.0
OR		
SPCH 101H	Public Speaking Honors*	3.0
*Prerequisite		
		Total: 12.0

EMERGENCY MEDICAL TECHNICIAN

Certificate of Skill Proficiency

Description

This Emergency Medical Technician Certificate program prepares entry-level EMTs to stabilize and transport patients safely to a place of medical care.

To acquire the **Certificate of Skill Proficiency in Emergency Medical Technician**, it is necessary to complete the following:

Required Courses		Units: 9.0
EMT 093	Emergency Medical Technician*	9.0
*Prerequisite		
		Total: 9.0

ENGINEERING

Associate of Science Degree

Description

The **Associate of Science Degree in Engineering** will prepare those students interested in laying a foundation for further study and for a bachelor's degree in an engineering field from a four-year college or university.

This degree program is for the **Associate of Science Degree in Engineering** only and fulfills many of the requirements and foundation courses for transfer to baccalaureate engineering-related majors, but does not satisfy all transfer requirements for specific institutions. Students should consult with a counselor for major preparation for specific universities and colleges.

To acquire the **Associate of Science Degree in Engineering**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 16.0
		4.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
MATH 191	Calculus II*	4.0

PHY 211	Physics for Scientists & Engineers - I*	4.0
PHY 213	Physics for Scientists & Engineers - III*	4.0

*Prerequisite

Plus a minimum of 20 units from one of the following areas of specialization, including at least 3 units of Engineering courses listed in that area.

Units: 20.0-22.0

Mechanical, Aerospace, and Manufacturing Engineering

		2.0
ENGR 100	Introduction to Engineering	2.0
OR		
ENGT 100	Introduction to Engineering	2.0
		4.0
ENGR 141	Materials Science and Engineering*	3.0
AND		
ENGR 141L	Materials Science and Engineering Lab*	1.0
ENGR 212	Computational Methods in MATLAB/Octave*	4.0
ENGR 217	Electric Circuit Analysis*	3.0
ENGR 217L	Electric Circuit Analysis Lab*	1.0
ENGR 235	Engineering Mechanics: Statics*	3.0
ENGR 240	Strength of Materials*	3.0
ENGR 245	Engineering Mechanics: Dynamics*	3.0
ENGT 122	Intermediate Engineering Design: Geometric Dimensioning & Tolerancing	3.0
CHEM 130	General Chemistry I*	5.0
CHEM 140	General Chemistry II*	5.0
MATH 250	Calculus III*	4.0

ENGINEERING DESIGN TECHNOLOGY

Associate of Science Degree

Description

This major curriculum leads to the **Associate of Science Degree in Engineering Design Technology** for advanced Tech Prep applications, employment in design, engineering and manufacturing-related industries, public works, utilities and CADD/Drafting-related industries. The program includes applications such as 3D parametric modeling, CADD (Computer-Assisted Design and Drafting), manufacturing processes, 3D Printing, and traditional drafting methods and standards.

To acquire the Associate of Science Degree in Engineering Design Technology, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses:		Units: 30.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		

ENGT 101	Introduction to Technical Drawing & Graphics	3.0
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0
		4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0
ENGT 250	Introduction to Parametric Modeling 3D Applications for Mechanical Design	4.0
ENGT 122	Intermediate Engineering Design: Geometric Dimensioning & Tolerancing	3.0
ENGT 123	Intermediate Engineering Design: Descriptive Geometry	2.0
ENGT 200	Intermediate CAD Modeling for Design & Production*	4.0
ENGT 131	Advanced Engineering Design: Manufacturing Applications of Technical Drawing*	4.0
ENGT 231	Product Design and Presentation*	4.0
Choose a minimum of 4 units from the following courses:		Units: 4.0
ENGT 270	Advanced 3D Parametric Modeling and Prototype Applications *	4.0
		4.0
ARCH 280	Advanced MicroStation for CADD & BIM Applications*	4.0
OR		
ENGT 280	Advanced MicroStation for CADD & BIM Applications*	4.0
ENGT 290	Work Experience Education/Internship for Drafting-Related Fields	4.0
*Prerequisite		
		Total: 34.0

ENGINEERING DESIGN TECHNOLOGY

Certificate of Achievement

Description

This Certificate is designed for technical, mechanical and manufacturing careers and leads to employment in CADD application, engineering-related, mechanical and manufacturing-related industries, public works, utilities and CADD/Drafting-related industries.

To acquire the **Certificate of Achievement in Engineering Design Technology**, it is necessary to complete the following courses:

Required Courses:		Units: 30.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0
ENGT 122	Intermediate Engineering Design: Geometric Dimensioning & Tolerancing	3.0
ENGT 123	Intermediate Engineering Design: Descriptive Geometry	2.0
ENGT 131	Advanced Engineering Design: Manufacturing Applications of Technical Drawing*	4.0
		4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0
ENGT 200	Intermediate CAD Modeling for Design & Production*	4.0
ENGT 231	Product Design and Presentation*	4.0
ENGT 250	Introduction to Parametric Modeling 3D Applications for Mechanical Design	4.0
Choose 4 units from the following courses:		Units: 4.0
		4.0
ARCH 280	Advanced MicroStation for CADD & BIM Applications*	4.0
OR		
ENGT 280	Advanced MicroStation for CADD & BIM Applications*	4.0
ENGT 270	Advanced 3D Parametric Modeling and Prototype Applications *	4.0
ENGT 290	Work Experience Education/Internship for Drafting-Related Fields*	4.0
*Prerequisite		
		Total: 34.0

ENGINEERING DESIGN TECHNOLOGY: CAD SPECIALIST

Certificate of Achievement

Description

This Certificate of Achievement provides a focused course of study for students in preparation for careers in the field of computer-aided design (CAD). Emphasis is placed on the use of CAD software to complete projects in engineering, manufacturing, or related fields. Coursework involves the preparation of CAD projects and 3D models accomplished within a design environment as experienced in higher levels of engineering education, and as is common in workplace conditions.

To acquire the **Certificate of Achievement in Engineering Design Technology: CAD Specialist**, it is necessary to complete the following courses:

Required Courses:		Units: 16.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		4.0
ENGT 170	MicroStation for Basic CADD Applications	4.0
ENGT 250	Introduction to Parametric Modeling 3D Applications for Mechanical Design	4.0
ENGT 200	Intermediate CAD Modeling for Design & Production*	4.0
		4.0
ENGT 270	Advanced 3D Parametric Modeling and Prototype Applications *	4.0
OR		
ARCH 280	Advanced MicroStation for CADD & BIM Applications*	4.0
OR		
ENGT 280	Advanced MicroStation for CADD & BIM Applications*	4.0
*Prerequisite		
		Total: 16.0

ENGINEERING DESIGN TECHNOLOGY: DESIGN AND PRODUCTION

Certificate of Achievement

Description

This Certificate of Achievement is designed for technical, mechanical, and manufacturing careers and CADD/Drafting-related industries. The certificate is intended to represent skills and understanding of production and design processes utilizing CAD software and prototyping.

To acquire the **Certificate of Achievement in Engineering Design Technology: Design and Production**, it is necessary to complete the following courses:

Required Courses:		Units: 18.0
ENGT 123	Intermediate Engineering Design: Descriptive Geometry	2.0
ENGT 200	Intermediate CAD Modeling for Design & Production*	4.0
ENGT 131	Advanced Engineering Design: Manufacturing Applications of Technical Drawing*	4.0
ENGT 231	Product Design and Presentation*	4.0
ENGT 270	Advanced 3D Parametric Modeling and Prototype Applications *	4.0
*Prerequisite		
		Total: 18.0

ENGINEERING DESIGN TECHNOLOGY: STANDARDS FOR DESIGN

Certificate of Achievement

Description

This Certificate of Achievement provides a focused course of study for students in preparation for careers in the field of engineering, manufacturing, drafting, and design technology. Emphasis is placed on the use of industry standards to complete projects in engineering, manufacturing, or related fields. Coursework involves the preparation of industry standards outlined by industry organizations such as the International Organization for Standardization (ISO), American National Standards Institution (ANSI), and American Society of Mechanical Engineers (ASME) to accomplish projects within a design environment as experienced in higher levels of engineering education, and as is common in workplace conditions.

To acquire the **Certificate of Achievement in Engineering Design Technology: Standards for Design**, it is necessary to complete the following courses:

Required Courses		Units: 16.0
ARCH 101	Introduction to Technical Drawing & Graphics	3.0
OR		
CIV 101	Introduction to Technical Drawing & Graphics	3.0
OR		
ENGT 101	Introduction to Technical Drawing & Graphics	3.0
ENGT 105	Introduction to Visualization, Sketching, & Rendering	2.0
ENGT 122	Intermediate Engineering Design: Geometric Dimensioning & Tolerancing	3.0
		4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0
ENGT 250	Introduction to Parametric Modeling 3D Applications for Mechanical Design	4.0
		Total: 16.0

ENGLISH

Associate in Arts for Transfer

Description

The Associate in Arts in English for Transfer (AA-T) is designed to provide foundational studies in English (or similar majors) for students interested in working toward a bachelor's degree in English (or similar majors) from a four-year college or university. The degree program is also relevant for students interested in developing critical thinking, interpretive reading, analytical and research writing, and presentation skills to apply to broader educational and professional goals.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T in English (and similar majors):

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education Breadth (CSU GE) pattern or the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the English (or similar) major at the CSU where they seek to transfer.

Required Courses		Units: 6.5
ENGL 201	Advanced Composition and Critical Thinking*	3.5
OR		
ENGL 201H	Advanced Composition and Critical Thinking Honors*	3.5
		3.0
LIT 102	Approaches to Literature*	3.0
OR		
LIT 102H	Approaches to Literature Honors*	3.0

*Prerequisite

List A: Chooses two courses from the following list (6 units)

Units: 6.0

LIT 112A	American Literature through 1865*	3.0
OR		3.0
LIT 112AH	American Literature through 1865 Honors*	3.0
LIT 112B	American Literature after 1865 *	3.0
OR		3.0
LIT 112BH	American Literature after 1865 Honors*	3.0
LIT 144A	World Literature: Antiquity through the 16th Century*	3.0
OR		3.0
LIT 144AH	World Literature: Antiquity through the 16th Century Honors*	3.0
LIT 144B	World Literature: 16th Century to the Present*	3.0
OR		3.0
LIT 144BH	World Literature: 16th Century to the Present Honors*	3.0
LIT 146A	British Literature through 1785*	3.0
OR		3.0
LIT 146AH	British Literature through 1785 Honors*	3.0
LIT 146B	British Literature after 1785*	3.0
OR		3.0
LIT 146BH	British Literature after 1785 Honors*	3.0
List B: Choose one course from List A (above) not used or choose one course from List B (below) (3 units)		Units: 3.0
LIT 141	Introduction to Poetry*	3.0
OR		3.0
LIT 141H	Introduction to Poetry Honors*	3.0
LIT 117	Mexican Literature in Translation*	3.0
OR		3.0
LIT 117H	Mexican Literature in Translation Honors*	3.0
ENGL 127	Language Structure and Language Use: Introduction to Linguistics*	3.0
OR		3.0
ENGL 127H	Language Structure and Language Use: Introduction to Linguistics Honors*	3.0
ENGL 131	Creative Writing*	3.0
List C: Choose any course from List A or B not used above or any of the following courses (3 units)		Units: 3.0
ENGL 125	Grammar and Usage*	3.0
ENGL 126	Languages of the World	3.0
LIT 114	Children's and Adolescent Literature*	3.0
OR		3.0
LIT 114H	Children's and Adolescent Literature Honors*	3.0
LIT 130	Women and Literature*	3.0
OR		3.0
LIT 130H	Women and Literature Honors*	3.0
LIT 140	Introduction to the Novel*	3.0
OR		3.0
LIT 140H	Introduction to the Novel Honors*	3.0
LIT 142	Introduction to Shakespeare*	3.0
OR		3.0
LIT 142H	Introduction to Shakespeare Honors*	3.0

LIT 145	Introduction to the Short Story*	3.0
OR		3.0
LIT 145H	Introduction to the Short Story Honors*	3.0
LIT 147	Cinema as Literature*	3.0
OR		3.0
LIT 147H	Cinema as Literature Honors*	3.0
LIT 148	Introduction to Dramatic Literature*	3.0
OR		3.0
LIT 148H	Introduction to Dramatic Literature Honors*	3.0
LIT 149	Introduction to Chicana/o/x Literature*	3.0
OR		3.0
LIT 149H	Introduction to Chicana/o/x Literature Honors*	3.0
LIT 299	Directed Study: Literature	3.0

CSU GE or IGETC Pattern (units will vary)

Transferable Electives (as needed to reach 60 transferable units)

DEGREE TOTAL 60 units

Total: 18.5

ENGLISH AND LITERATURE

Associate of Arts Degree

Description

This degree focuses on language and literature as forms of cultural expression with specific historical influences. Some of the courses focus on reading and writing about literary texts; others focus on genre studies and the structure of language. A third area of coursework emphasizes significant writers, literary works, and cultural movements that are most important to a particular time period. By completing specific general education courses, this program fulfills many of the requirements and foundation courses for transfer to baccalaureate English and literature majors but does not fulfill all transfer requirements for specific baccalaureate degree programs. (See a counselor for major preparation from specific four-year institutions).

To acquire the Associate of Arts in English and Literature, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 12.5
ENGL 201	Advanced Composition and Critical Thinking*	3.5
OR		3.5
ENGL 201H	Advanced Composition and Critical Thinking Honors*	3.5
LIT 102	Approaches to Literature*	3.0
OR		3.0
LIT 102H	Approaches to Literature Honors*	3.0
LIT 146A	British Literature through 1785*	3.0
OR		3.0
LIT 146AH	British Literature through 1785 Honors*	3.0
LIT 146B	British Literature after 1785*	3.0
OR		3.0
LIT 146BH	British Literature after 1785 Honors*	3.0
Choose three courses from the list below:		Units: 9.0
ENGL 125	Grammar and Usage*	3.0

ENGL 126	Languages of the World	3.0
		3.0
ENGL 127	Language Structure and Language Use: Introduction to Linguistics*	3.0
OR		
ENGL 127H	Language Structure and Language Use: Introduction to Linguistics Honors*	3.0
ENGL 131	Creative Writing*	3.0
		3.0
LIT 112A	American Literature through 1865*	3.0
OR		
LIT 112AH	American Literature through 1865 Honors*	3.0
		3.0
LIT 112B	American Literature after 1865 *	3.0

ENVIRONMENTAL SCIENCE

Associate of Science Degree

Description

The **Associate of Science Degree (AS) in Environmental Science** prepares students intending to transfer to a four-year institution in the environmental sciences. This degree provides for completion of general, lower-division coursework associated with the requirements for a bachelor degree in environmental science, environmental studies, environmental and occupational health, etc. The degree is specifically designed for students intending to transfer to a CSU or UC campus, and to gain entry-level employment in the environmental science field. Students completing the degree will take specific courses in chemistry, biology, physics, and mathematics in addition to general education preparation such as the CSU General Education Plan, or IGETC. (See admission requirements of individual colleges and universities and transfer requirements for specific majors).

To acquire the **Associate of Science Degree in Environmental Science**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 28.0-31.0
BIOL 120	Environmental Biology	3.0
BIOL 120L	Environmental Biology Laboratory*	1.0
BIOL 200	Principles of Biology 1 (Molecular and Cellular Biology)*	5.0
CHEM 130	General Chemistry I*	5.0
CHEM 140	General Chemistry II*	5.0
ET 290	Work Experience Education/Internship for Environmental Technology-Related Fields	1.0-4.0
		4.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
PHY 150	General Physics I*	4.0
*Prerequisite		

Total: 28.0-31.0

ENVIRONMENTAL SCIENCE

Associate in Science for Transfer

Description

The **Associate in Science in Environmental Science for Transfer (AS-T)** degree is intended to meet the lower-division requirements for Environmental Science majors (or similar majors) at a CSU campus that offers an Environmental Science baccalaureate degree.

This degree provides for the completion of lower division major preparation associated with the requirements for a bachelor's degree in environmental science, environmental management protection, applied ecology, environmental data analysis, and other fields. It provides a broad, comprehensive overview of the main areas of environmental science. The ability to think critically and use appropriate tools to solve environmental biological questions will be emphasized.

In addition to the courses listed below, the following additional requirements must be met to complete the AS-T in Environmental Science:

1. Completion of a minimum of 60 CSU transferable semester units.

- Achievement of a minimum GPA of at least 2.0 in all CSU transferable coursework (some majors may require a higher GPA. Students should consult with a counselor for more information).
- Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
- Certified completion of the Intersegmental General Education Transfer Curriculum (IGETC) for STEM pattern or the California State University general Education-Breadth (CSU GE) for STEM pattern. (The use of the IGETC for STEM pattern allows for the completion of the degree within 60 units.)

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted for the Environmental Science major at the CSU to which they seek to transfer.

Required Courses		Units: 15.0
BIOL 200	Principles of Biology 1 (Molecular and Cellular Biology)*	5.0
BIOL 201	Principles of Biology 2 (Diversity and Ecology)*	5.0
CHEM 130	General Chemistry I*	5.0
List A: Select courses from list below for a minimum total of 15 units		Units: 15.0
BIOL 120	Environmental Biology	3.0
CHEM 140	General Chemistry II*	5.0
		4.0-6.0
GEOL 150	Physical Geology	3.0
AND		1.0-3.0
GEOL 151	Physical Geology Laboratory*	1.0
OR		1.0-3.0
GEOG 101	Introduction to Physical Geography	3.0
OR		
GEOG 101L	Introduction to Physical Geography Laboratory*	1.0
		4.0
MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0
OR		
PSY 190	Statistics for the Behavioral Sciences*	4.0
		4.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
OR		
MATH 170	Elements of Calculus*	4.0
List B: Select one Economics course and one Physics sequence from courses listed below:		Units: 11.0
ECON 102	Principles of Microeconomics*	3.0
OR		
ECON 102H	Principles of Microeconomics Honors*	3.0
		8.0
PHY 150	General Physics I*	4.0
AND		4.0
PHY 160	General Physics II*	4.0
OR		4.0
PHY 211	Physics for Scientists & Engineers - I*	4.0
OR		
PHY 213	Physics for Scientists & Engineers - III*	4.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

ENVIRONMENTAL TECHNOLOGY

Associate of Science Degree

Description

Environmental Technology refers to the skills and knowledge that allows a person to work in the environmental field in compliance with governmental regulations and at the same time protect human health and the environment.

The Environmental Technology Associate of Science Degree Program is a two-year program designed to prepare students to either enter the work force at the technician level or transfer into a bachelors' degree program.

To acquire the **Associate of Science Degree in Environmental Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 18.0-19.0
ET 130	Health Effects of Environmental Hazardous Materials	3.0
ET 230	Safety and Emergency Response	4.0
ET 260	Environmental Sampling and Analysis	4.0
BIOL 120	Environmental Biology	3.0
BIOL 120L	Environmental Biology Laboratory*	1.0
		3.0-4.0
GIS 120	Introduction to Geographic Information Systems and Spatial Analysis	4.0
OR		
CIT 101	Introduction to Computer Information Technology	3.0
Plus units from any of the following areas of specialization and/or miscellaneous electives to equal a minimum of 27 units in the major.		Units: 9.0

Waste Management

ET 110	Hazardous Waste Generation/Reduction/Treatment	3.0
ET 150	Hazardous Waste Management Applications	4.0
ET 200	Hazardous Materials Management Applications	4.0
ET 240	Solid Waste Management Applications	4.0

Land Use Planning & Environmental Restoration

		3.0

ENVIRONMENTAL TECHNOLOGY

Certificate of Achievement

Description

Environmental Technology refers to the skills and knowledge that allow a person to work in the environmental field in compliance with governmental regulations and at the same time protect human health and the environment. The ET Certificate is designed to either prepare students to enter the field or upgrade working individuals with technician-level skills.

To acquire the **Certificate of Achievement in Environmental Technology**, it is necessary to complete the following courses:

Required Courses		Units: 30.5
BIOL 120	Environmental Biology	3.0
BIOL 120L	Environmental Biology Laboratory*	1.0
CHEM 110	Chemistry for Allied Health Majors*	5.0
ENGL 101	College Composition and Research*	3.5
ET 110	Hazardous Waste Generation/Reduction/Treatment	3.0
ET 130	Health Effects of Environmental Hazardous Materials	3.0
ET 150	Hazardous Waste Management Applications	4.0
ET 200	Hazardous Materials Management Applications	4.0

*Prerequisite

Total: 30.5

ENVIRONMENTAL TECHNOLOGY/FIELD TECHNICIAN

Certificate of Achievement

Description

The Environmental Technology Field Technician Certificate is designed to prepare students to enter the environmental field or to upgrade working individuals with field technician skills.

Students will gain the skills and knowledge that allow a person to work in the environmental field in compliance with governmental regulations and at the same time protect human health and the environment.

To acquire the **Certificate of Achievement in Environmental Technology/Field Technician**, it is necessary to complete the following courses:

Required Courses		Units: 13.0-14.0
ET 230	Safety and Emergency Response	4.0
ET 260	Environmental Sampling and Analysis	4.0
ET 290	Work Experience Education/Internship for Environmental Technology-Related Fields	1.0-2.0
BIOL 120	Environmental Biology	3.0
BIOL 120L	Environmental Biology Laboratory*	1.0

*Prerequisite

Total: 13.0-14.0

ENVIRONMENTAL TECHNOLOGY/HEALTH AND SAFETY

Certificate of Achievement

Description

The Environmental Technology Health and Safety Certificate is designed to prepare students to enter the environmental health and safety field or upgrade working individuals with environmental health and safety field technician skills.

Students will gain the skills and knowledge that allow a person to work in the environmental field in compliance with governmental regulations and at the same time protect human health and the environment.

To acquire the **Certificate of Achievement in Environmental Technology/Health and Safety**, it is necessary to complete the following courses:

Required Courses		Units: 22.0-23.0
ET 130	Health Effects of Environmental Hazardous Materials	3.0
ET 230	Safety and Emergency Response	4.0
ET 250	Fundamentals of Safety and Health I	3.0
ET 251	Fundamentals of Safety and Health II	3.0
ET 260	Environmental Sampling and Analysis	4.0
ET 290	Work Experience Education/Internship for Environmental Technology-Related Fields	1.0-2.0
BIOL 120	Environmental Biology	3.0
BIOL 120L	Environmental Biology Laboratory*	1.0

*Prerequisite

Total: 22.0-23.0

ENVIRONMENTAL TECHNOLOGY/WASTE MANAGEMENT

Certificate of Achievement

Description

The Environmental Technology Waste Management Certificate is designed to prepare students to enter the waste management field or upgrade working individuals with waste management field technician skills. Students will gain the skills and knowledge that allow a person to work in the environmental field in compliance with the governmental regulations and at the same time protect human health and the environment.

To acquire the **Certificate of Achievement in Environmental Technology/Waste Management**, it is necessary to complete the following courses:

Required Courses		Units: 24.0-25.0
ET 110	Hazardous Waste Generation/Reduction/Treatment	3.0
ET 150	Hazardous Waste Management Applications	4.0
ET 200	Hazardous Materials Management Applications	4.0
OR		
ET 240	Solid Waste Management Applications	4.0
ET 230	Safety and Emergency Response	4.0
ET 260	Environmental Sampling and Analysis	4.0
ET 290	Work Experience Education/Internship for Environmental Technology-Related Fields	1.0-2.0
BIOL 120	Environmental Biology	3.0
BIOL 120L	Environmental Biology Laboratory*	1.0
*Prerequisite		
		Total: 24.0-25.0

ENVIRONMENTAL TECHNOLOGY/WATER MANAGEMENT

Certificate of Achievement

Description

The Environmental Technology Water Management Certificate is designed to prepare students to enter the water management field or to upgrade working individuals with water management field technician skills. Students will gain the skills and knowledge that allow a person to work in the environmental field in compliance with governmental regulations and at the same time protect human health and the environment.

To acquire the **Certificate of Achievement Environmental Technology/Water Management**, it is necessary to complete the following courses:

Required Courses		Units: 13.0-14.0
ET 230	Safety and Emergency Response	4.0
ET 260	Environmental Sampling and Analysis	4.0
ET 290	Work Experience Education/Internship for Environmental Technology-Related Fields	1.0-2.0
BIOL 120	Environmental Biology	3.0
BIOL 120L	Environmental Biology Laboratory*	1.0
Choose four courses from the following list:		Units: 12.0
ET 270	Wastewater Treatment Plant Operations I	3.0
ET 271	Wastewater Treatment Plant Operations II*	3.0
ET 272	Advanced Wastewater Treatment*	3.0
ET 273	Stormwater Management, Treatment & Controls	3.0
ET 274	Industrial Waste Water Treatment	3.0
ET 275	Water Treatment	3.0
ET 276	Water Distribution	3.0
*Prerequisite		
		Total: 25.0-26.0

Associate Degree
for Transfer
A Degree with a Guarantee.SM

FILM, TELEVISION, AND ELECTRONIC MEDIA

Associate in Science for Transfer

Description

The **Associate in Science in Film, Television, and Electronic Media for Transfer (AS-T) Degree** is designed for students interested in communicating stories and ideas through moving images and recorded sound. Students in this program will gain an aesthetic appreciation for social and cultural phenomena and a critical understanding of film, television, and visual mediums, as well as practical skills in writing, directing, filming, editing, and producing work in these and other electronic media. It is intended to meet the lower division requirements for Radio, Television, Film, Video, and Electronic Arts majors (or similar majors) at a CSU campus that offers a Film, Television, and Electronic Media baccalaureate degree.

In addition to the courses listed below, the following additional requirements must be met for completion of the **Associate in Science in Film, Television, and Electronic Media for Transfer**:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted for the Film, Television, and Electronic Media major at the CSU to which they seek to transfer.

Required Courses (choose two courses from the following list):

	Units:
ART 115 The Art of Film	3.0
JOUR 115 Writing for TV and Film	3.0
MSCM 128 Mass Media in Modern Society	3.0

LIST A: Take one course from each area listed below:

Area 1: Audio (choose one course from below):

	Units: 3.0-4.0
MUST 101 Introduction to Music Technology	3.0
RDIO 136 Radio Production	4.0

Area 2: Video or Film Production

	Units: 3.0
TV 135 Digital Filmmaking I: Introduction	3.0

List B: Choose one course from the following (or any course not already used above):

	Units: 3.0
ART 106 Survey of Western Art: Renaissance to Contemporary	3.0
OR	
ART 106H Survey of Western Art: Renaissance to Contemporary Honors*	3.0
ART 110 Understanding Visual Art	3.0
JOUR 120 Communications Reporting and Writing	3.0
JOUR 147 Broadcast News	3.0
PHOT 130 Beginning Photography	3.0
RDIO 104 Radio Broadcasting	3.0
THTR 160 Introductory Playwriting/Screenwriting	3.0

*Prerequisite

List C: Choose one course from the following (or any course not already used above):

	Units: 3.0
ENGL 131 Creative Writing*	3.0
LIT 147 Cinema as Literature*	3.0
OR	
LIT 147H Cinema as Literature Honors*	3.0
MSCM 103 Survey of Motion Picture, Radio, and Television	3.0

MSCM 134	Documentary Film	3.0
MUS 135	Music in Film	3.0
THTR 112	Acting for the Camera	3.0
THTR 150	Stagecraft I for Theatre, TV, and Film	3.0
THTR 153	Lighting Design and Production for Theatre, TV, and Film	3.0
THTR 174	Costume Design and Production for Theatre, TV, and Film	3.0
THTR 176	Makeup Design and Production for Theatre, TV, and Film	3.0
TV 136	Digital Filmmaking II: Intermediate*	3.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

Total: 18.0-19.0

FINANCE

Certificate of Achievement

Description

This Certificate of Achievement is for students who want to complete a course of study in financial services to gain the skills and knowledge needed to prepare them for entry-level finance positions in small and medium-sized businesses. It will provide students with basic accounting skills combined with training in financial planning and will serve as an excellent foundation for those choosing to take the National Association of Securities Dealers series 6 or 7 examinations. It consists of 17 units and can be completed in two semesters if a student is attending full time.

To acquire the **Certificate of Achievement in Finance**, it is necessary to complete the following courses:

Required Courses		Units: 17.0
FIN 101	Introduction to Financial Planning*	3.0
FIN 102	Fundamentals of Financial Management and Investing*	3.0
ACCT 105	Income Tax Accounting	4.0
ACCT 106	Computerized Accounting	3.0
ACCT 110	Excel for Business and Accounting*	1.0
		3.0
BUSL 110	Legal Environment of Business	3.0
OR		
MGMT 108	Business Writing	3.0

*Prerequisite

Total: 17.0

FIRE ACADEMY
DIVISION OF PUBLIC SAFETY

Admission Procedures

The Fire Academy meets the State Fire College and the State Board of Fire Services' requirements for certification as Firefighter I and certification as an Emergency Medical Technician. Enrollment in the Fire Academy is open to all students. To ensure that the enrollment policy is in compliance with Section 84500 of the Education Code, the following procedure is hereby established:

1. In-service students will receive priority over pre-service students for up to 80% of the total class enrollment. Inservice students are defined as follows and will be given priority in the order listed:
 - a. fully paid members of fully paid governmental or industrial fire protection or fire prevention agencies,
 - b. sponsored Reserve/Auxiliary members of Fire Departments,
 - c. volunteers of a fire protection or fire prevention agency who have been a member of such organization for a minimum of one year and have completed a minimum of fifteen (15) units of Fire Technology in an accredited college or institution with a grade in each course of "C" or better. Explorer Scouts DO NOT qualify for in-service status.

It must be the intent of any person filing an application as an in-service member to return to the sponsoring organization upon completion of the academy training. It must be the intent of the department sponsoring such member to utilize the skills and knowledge acquired by the member in the day to-day operation of the department.

2. Pre-service students will be given priority over in-service students for up to 20% of the total class enrollment. A pre-service person is one who does not qualify as an in-service member.
3. Priority for enrollment in the Academy will be based on the number of units completed with a grade of "C" or above in Fire Technology courses in accredited colleges or institutions. However, students who withdrew from a previous Río Hondo firefighter academy due to a verified injury or extended sickness will be given priority over new applicants. Fire Technology courses are those having an accredited fire technology number.
4. Students with the same number of credit units in Fire Technology courses will be prioritized based on the grade point average of the Fire Technology courses.
5. In the event two or more students have an equal grade point average and have completed the same number of Fire Technology units, priority will be based on the total number of units completed in accredited colleges or institutions.
6. Students with the same number of completed Fire Technology units, the same grade point average in the Fire Technology units and the same number of total units completed in accredited colleges or institutions will be prioritized based on the grade point average of all college units completed.
7. It will be the responsibility of the student to have on file with the Regional Training Center Office the application and official transcripts verifying completed coursework results on or before the closing date for applications.
8. Registration for the Fire Academy based on priorities established will occur at least five working days prior to start of the Academy to allow time to obtain required materials.

FIRE ACADEMY/BASIC FIRE ACADEMY
Certificate of Achievement

Description

The Basic Fire Academy Certificate of Achievement is designed to prepare students to become entry-level firefighters in local and state fire agencies in California. This fundamental intensive training course includes all learning domains from the California Fire Marshal's office, which includes instruction in structural, commercial and industrial firefighting. This certificate also meets the certification requirements of the State Fire Marshal for employment opportunities as a firefighter in California. Students who successfully complete this certificate program are eligible for hire in a public (municipal) and private fire department.

To acquire the **Certificate of Achievement in Basic Fire Academy**, it is necessary to complete the following courses:

Required Courses		Units: 18.0-22.0
FAC 118	Firefighter I, Basic Fire Academy*	18.0-22.0
OR		18.0

*Prerequisite

Total: 18.0-22.0

FIRE TECHNOLOGY

Associate of Science Degree

Description

This curriculum was developed jointly by the Curriculum Committee of the California Fire Chiefs' Association and the College Advisory Committee and is intended for firefighters, fire officers, and interested students.

To acquire the **Associate of Science Degree in Fire Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 18.0
FTEC 101	Fire Protection Organization	3.0
FTEC 102	Principles of Fire & Emergency Services Safety & Survival	3.0
FTEC 103	Fire Behavior and Combustion	3.0
FTEC 104	Fire Prevention Technology	3.0
FTEC 105	Building Construction for Fire Protection	3.0
FTEC 106	Fire Protection Equipment and Systems	3.0
Choose 6 units from the following:		Units: 6.0-18.0
EMT 093	Emergency Medical Technician*	9.0
ET 230	Safety and Emergency Response	4.0
FAC 118	Firefighter I, Basic Fire Academy*	18.0
FTEC 044	Physical Fitness and Ability for the Firefighter *	3.0
FTEC 045	Firefighter Entrance Examination Techniques	3.0
FTEC 107	Hazardous Materials I	3.0
FTEC 108	Hazardous Materials II*	3.0
FTEC 109	Fire Fighting Tactics and Strategy	3.0
FTEC 110	Rescue Practices	3.0
FTEC 111	Fire Hydraulics	3.0
FTEC 112	Fire Apparatus and Equipment	3.0
FTEC 114	Fire Investigation	3.0
FTEC 117	Fire Service Management, Safety, and Wellness	3.0
EMT 100	Emergency Medical Responder	3.0
WFT 101	Wildland Fire Behavior	3.0
*Prerequisite		
		Total: 24.0-36.0

FIRE TECHNOLOGY

Certificate of Achievement

Description

To acquire the **Certificate of Achievement in Fire Technology**, it is necessary to complete the following courses:

Required Courses		Units: 18.0
FTEC 101	Fire Protection Organization	3.0
FTEC 102	Principles of Fire & Emergency Services Safety & Survival	3.0
FTEC 103	Fire Behavior and Combustion	3.0
FTEC 104	Fire Prevention Technology	3.0
FTEC 105	Building Construction for Fire Protection	3.0
FTEC 106	Fire Protection Equipment and Systems	3.0
Choose 6 units from the following:		Units: 6.0-18.0
EMT 093	Emergency Medical Technician*	9.0
ET 230	Safety and Emergency Response	4.0
FAC 118	Firefighter I, Basic Fire Academy*	18.0
FTEC 044	Physical Fitness and Ability for the Firefighter *	3.0
FTEC 045	Firefighter Entrance Examination Techniques	3.0
FTEC 107	Hazardous Materials I	3.0

WFT 101	Wildland Fire Behavior	3.0

*Prerequisite

Total: 24.0-36.0

FRENCH

Certificate of Achievement

Description

The **Certificate of Achievement in French** is designed to provide students with a strong foundation in the essentials of the French language: reading, listening, speaking, and writing skills. This certificate is intended for students pursuing other degrees or careers not necessarily related to the French language but who still want to learn the language. With this certificate, students can petition their employer for any benefits that may be available for those who have skills in French.

Students who successfully complete the certificate will be able to communicate competently in French at a basic conversational level. While students will not be able to act as an interpreter, they will be able to communicate directly with clients, customers, coworkers, or community members who are French speakers and whose English proficiency may be limited.

To acquire the **Certificate of Achievement in French**, it is necessary to complete the following courses:

Required Courses		Units: 18.0
FR 101	French I	4.5
FR 102	French II*	4.5
FR 201	French III*	4.5
FR 202	French IV*	4.5

*Prerequisite

Total: 18.0

GENERAL EDUCATION/CSU GE

Certificate of Achievement

Description

The California State University General Education Breadth (CSU-GE Breadth) pattern is a set of courses designed to fulfill all lower-division general education requirements for California State University campuses, as well as lead to a certificate of achievement at Rio Hondo College.

To acquire the **Certificate of Achievement in CSU-GE Breadth**, courses must have been approved for the CSU-GE Breadth area during the term in which the course was taken (please verify approval dates on www.assist.org). A grade of "C-" or better is required for courses taken in areas A1, A2, A3, and B4.

GENERAL EDUCATION/IGETC

Certificate of Achievement

Description

The Intersegmental General Education Transfer Curriculum (IGETC) is a set of courses designed to fulfill all lower-division general education requirements for California State University and University of California campuses, as well as lead to a certificate of achievement at Rio Hondo College.

To acquire the **Certificate of Achievement in IGETC**, it is necessary to complete the Intersegmental General Education Transfer Curriculum requirements listed in this catalog with a grade of "C" or better. Courses must have been approved for the IGETC area during the term in which the course was taken (please verify approval dates on www.assist.org).

GENERAL STUDIES IN ARTS AND HUMAN EXPRESSION

Associate of Arts Degree

Description

These courses emphasize the study of the cultural, literary, and artistic expressions of human beings. Students evaluate and interpret how people in different cultures throughout history have responded to themselves and the world around them via artistic and cultural creation. Students also learn to value aesthetic understanding and incorporate these concepts when constructing value judgments. This emphasis includes lower division coursework that prepares students for potential careers in fine arts, foreign languages, literature, and philosophy.

To acquire the **Associate of Arts in General Studies in Arts and Human Expression**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Choose at least one course from each category (A and B) and then complete additional courses in categories A and/or B to total 18 units of coursework from the following list:

Units: 18.0

A) ARTS

ARCH 103	History of Architecture: Renaissance to Present	3.0

GENERAL STUDIES IN SCIENCE AND MATHEMATICS

Associate of Science Degree

Description

These courses emphasize the natural sciences, which examine the physical universe, including its life forms and natural phenomena. As mathematics is the language of science, courses in mathematics help students develop quantitative reasoning skills beyond the level of intermediate algebra. Students are able to demonstrate an understanding of the methodologies of science as investigative tools. Students also examine the influence that the acquisition of scientific knowledge has on human experience. This emphasis includes lower-division coursework that prepares students for potential careers in science, engineering, math, and health-related fields.

To acquire the **Associate of Science in General Studies in Science and Mathematics**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Choose at least one course from each category (A, B, and C) and then complete additional courses in any of the categories to total 18 units from the following list. Among these courses the student must complete at least one laboratory course.

Units: 18.0

A) Life Sciences

		3.0
ANTH 101	Introduction to Physical Anthropology	3.0
OR		
ANTH 101H	Introduction to Physical Anthropology Honors*	3.0
ANTH 101L	Physical Anthropology Lab*	1.0
BIOL 101	General Biology	4.0
BIOL 105	Human Biology	3.0
BIOL 105L	Human Biology Laboratory*	1.0
BIOL 111	Marine Biology	3.0
BIOL 111L	Marine Biology Laboratory*	1.0
BIOL 112	Outdoor Biology	4.0
BIOL 120	Environmental Biology	3.0
BIOL 120L	Environmental Biology Laboratory*	1.0
BIOL 200	Principles of Biology 1 (Molecular and Cellular Biology)*	5.0
BIOL 201	Principles of Biology 2 (Diversity and Ecology)*	5.0
BIOL 206	Principles of Genetics*	3.0
BIOL 222	Microbiology*	5.0
BIOL 226	Human Physiology*	4.0
BIOT 100	Introduction to Biotechnology	4.0
		3.0
PSY 210	Biological Psychology*	3.0
OR		
PSY 210H	Biological Psychology Honors*	3.0

B) Physical Sciences

		3.0
ASTR 110	General Astronomy	3.0
OR		
ASTR 110H	General Astronomy Honors*	3.0
ASTR 112	Observational Astronomy*	1.0
ASTR 137	An Introduction to Cosmology: From the Big Bang to the Multiverse*	4.0
CHEM 110	Chemistry for Allied Health Majors*	5.0
CHEM 120	Introduction to Chemistry*	5.0
CHEM 130	General Chemistry I*	5.0
CHEM 140	General Chemistry II*	5.0
CHEM 230	Organic Chemistry I*	5.0
CHEM 231	Organic Chemistry II*	5.0
GEOG 101	Introduction to Physical Geography	3.0
GEOG 101L	Introduction to Physical Geography Laboratory*	1.0
GEOL 150	Physical Geology	3.0
GEOL 151	Physical Geology Laboratory*	1.0
GEOL 152	Historical Geology	3.0
GEOL 152L	Historical Geology Lab*	1.0
PHY 120	Physics for Everyday Use*	4.0
PHY 150	General Physics I*	4.0
PHY 160	General Physics II*	4.0
PHY 211	Physics for Scientists & Engineers - I*	4.0
PHY 212	Physics for Scientists & Engineers - II*	4.0
PHY 213	Physics for Scientists & Engineers - III*	4.0

C) Mathematics

FIN 101	Introduction to Financial Planning*	3.0
		4.0
MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0
MATH 140	Mathematics for Elementary Teachers*	4.0
MATH 150	Survey of Mathematics*	3.0
MATH 160	College Algebra*	4.0
MATH 170	Elements of Calculus*	4.0
MATH 175	Plane Trigonometry*	3.0
MATH 180	Pre-Calculus*	4.0

		Total: 18.0

GENERAL STUDIES IN SOCIAL BEHAVIOR AND SELF-DEVELOPMENT

Associate of Arts Degree

Description

These courses provide students with the knowledge and understanding of social behavior and self-development. This area of emphasis is designed to prepare students to use their understanding of themselves and others to communicate and collaborate more effectively. The course combines knowledge of theory with attention to personal growth and purpose, as well as health and wellness. Students learn to become citizens who care for themselves and others, ready to work with people in their communities. Participation in group activities and collaborative projects is a central focus of this emphasis, allowing students to experience group interactions in a variety of contexts. This emphasis includes lower division coursework that prepares students for potential careers in people- and community-oriented professions including social, health, and recreational services.

To acquire the **Associate of Arts in General Studies in Social Behavior and Self-Development**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Choose at least one course from each category below (A and B). Then complete additional courses from categories A and B to reach a total of 18 units from the following list:

Units: 18.0

A) Theory and Knowledge

AJ 101	Introduction to Administration of Justice	3.0
		3.0
ANTH 101	Introduction to Physical Anthropology	3.0
OR		
ANTH 101H	Introduction to Physical Anthropology Honors*	3.0
		3.0
ANTH 102	Introduction to Cultural Anthropology	3.0
OR		
ANTH 102H	Introduction to Cultural Anthropology Honors*	3.0

GENERAL STUDIES IN SOCIAL SCIENCES

Associate of Arts Degree

Description

These courses emphasize the perspectives, concepts, theories and methodologies of the variety of disciplines that comprise study in the social sciences. Students will study human experience in the context of a larger society. Students will study how individuals, social subgroups, and societies operate in relation to each other. This emphasis includes lower division coursework that prepares students for potential careers in the helping professions such as teaching, business, government, social work, and non-profit organizations.

To acquire the **Associate of Arts Degree in General Studies in Social Sciences**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Choose 18 units of coursework including two or more disciplines from the following list:

Units: 18.0

AJ 101	Introduction to Administration of Justice	3.0
ANTH 101	Introduction to Physical Anthropology	3.0
OR		
ANTH 101H	Introduction to Physical Anthropology Honors*	3.0
		3.0

GEOGRAPHIC INFORMATION SYSTEMS

Certificate of Achievement

Description

This **Certificate of Achievement in Geographic Information Systems** (GIS) is intended for students interested in becoming a GIS technician. A GIS technician utilizes standard GIS tools and utilities to enter and correct data in GIS databases, including locating addresses and georeferencing scanned maps, as well as digitizing, collecting, and processing data from the field. Most duties assigned to GIS technicians are routine, with a heavy amount of database entry and management, culminating in the eventual generation of maps from data. A GIS technician performs no data interpretation after data has been stored unless under the guidance of the analyst. Many students enrolled in GIS courses at Rio Hondo College have degrees in a variety of disciplines; after completing the GIS courses, these students can be regarded as a GIS analyst within their area of discipline (e.g., crime analyst, environmental planner, etc.).

To acquire the **Geographic Information Systems Certificate of Achievement**, students must complete the following courses:

Required Courses		Units: 20.0
GIS 120	Introduction to Geographic Information Systems and Spatial Analysis	4.0
GIS 220	GIS Applications*	4.0
GIS 221	Cartography Design and Geographic Information Systems*	4.0
GIS 130	Field Data Applications for GIS*	4.0
GIS 280	Geospatial Programming and Web Services*	4.0
Complete a minimum of 3 units from the courses below:		Units: 3.0-5.5
CIV 142	Introduction to Land Surveying and GPS	4.0
GIS 150	Small Unmanned Aircraft Systems Procedures and Regulations	1.5
GIS 222	GIS for Civil Engineering and Public Works*	4.0
GIS 230	Geographic Information Systems (GIS) in Environmental Technology*	3.0
GIS 281	Crime Mapping and Analysis	4.0
ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0

*Prerequisite

Total: 23.0-25.5

GEOGRAPHIC INFORMATION SYSTEMS/APPLIED GEOGRAPHIC INFORMATION SYSTEMS

Associate of Science Degree

Description

The courses listed will lead to the **Associate of Science in Applied Geographic Information Systems**. The degree prepares students for either technician or analyst careers using GIS in the fields of civil engineering, biology, public safety, planning and landscape architecture, public health, social sciences, and public administration. Completion of this program is designed to prepare students to transfer into a bachelor's degree program.

To acquire the **Associate of Science Degree in Applied Geographic Information Systems**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 17.0-20.0
GIS 120	Introduction to Geographic Information Systems and Spatial Analysis	4.0
GIS 220	GIS Applications*	4.0
GIS 221	Cartography Design and Geographic Information Systems*	4.0
GIS 280	Geospatial Programming and Web Services*	4.0
GIS 290	Work Experience Education/Internship for Geographic Information Systems-Related Fields	1.0-4.0
Choose two courses from one of the following specialization tracks:		Units: 7.0-8.0

Civil Engineering Specialization Track

ENGT 150	AutoCAD for Basic CADD Applications	4.0
OR		
ENGT 170	MicroStation for Basic CADD Applications	4.0
GIS 130	Field Data Applications for GIS*	4.0
CIV 142	Introduction to Land Surveying and GPS	4.0

Environmental Specialization Track

GIS 130	Field Data Applications for GIS*	4.0
GIS 230	Geographic Information Systems (GIS) in Environmental Technology*	3.0

Data Analyst Specialization Track

GIS 281	Crime Mapping and Analysis	4.0
PSY 190	Statistics for the Behavioral Sciences*	4.0

Total: 24.0-28.0

GEOLOGY

Associate in Science for Transfer

Description

The **Associate in Science in Geology for Transfer (AS-T) Degree** is intended to meet the lower division requirements for Geology majors (or similar majors) at a CSU campus that offers a Geology baccalaureate degree.

It will prepare students who are intending to transfer to any four-year university or college with an introductory background in geology and the history of our earth—as well as the mathematical tools and qualitative and quantitative thinking skills necessary to understand our beautiful planet.

In addition to the courses listed below, the following requirements must be met for completion of the AS-T Degree in Geology:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Geology program at the CSU where they seek transfer.

Required Courses		Units: 26.0
GEOL 150	Physical Geology	3.0
GEOL 151	Physical Geology Laboratory*	1.0
GEOL 152	Historical Geology	3.0
GEOL 152L	Historical Geology Lab*	1.0
CHEM 130	General Chemistry I*	5.0

CHEM 140	General Chemistry II*	5.0
		4.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
MATH 191	Calculus II*	4.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

*Prerequisite

Total: 26.0

GRAPHIC ART AND DESIGN

Associate of Arts Degree

Description

The **Associate of Arts Degree in Graphic Art and Design** is designed for students interested in visual arts and graphic design. This degree combines traditional visual art topics with practical graphic design skills. Students will learn to produce solutions to visual communication problems. The form of the communication can be print or digital, and include photographs, typography, illustration and other graphic forms. The work produced includes branding and identity designs, publication designs, advertising, packaging, motion graphics, websites, information architecture, and other types of communication design. Students will explore both art and design history and learn the principles and elements of design.

To acquire the **Associate of Arts Degree in Graphic Art and Design**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 27.0
ART 106	Survey of Western Art: Renaissance to Contemporary	3.0
OR		
ART 106H	Survey of Western Art: Renaissance to Contemporary Honors*	3.0
ART 120	Two-Dimensional Design	3.0
ART 124	Color Theory	3.0
PHOTO 110	Introduction to Digital Photography	3.0
GDSN 110	History of Graphic Design	3.0
GDSN 150	Typography	3.0
GDSN 162	Introduction to Web Design: User Experience Design (UX)	3.0
GDSN 164	Digital Illustration Design	3.0
GDSN 178	Digital Imaging Design	3.0

*Prerequisite

Total: 27.0

GRAPHIC DESIGN

Associate of Science Degree

Description

The **Associate of Science Degree in Graphic Design** prepares students for entry in graphic design and associated communication design industries and assists students seeking an undergraduate degree. Courses listed in the degree provide the student with the technical and critical thinking skills needed to produce and present visual communication solutions. This AS degree will enable students to build a portfolio of graphic design work in-line with industry standards and expectations including (but not limited to) branding and identity design, publication design, advertising and entertainment design, package design, website and interaction design, and other types of communication design.

NOTE: Students interested in transferring as a Graphic Design major should consult with a counselor for appropriate general education & major preparation counseling.

To acquire the **Associate of Science Degree in Graphic Design**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 30.0
ART 124	Color Theory	3.0
GDSN 110	History of Graphic Design	3.0
GDSN 150	Typography	3.0
GDSN 162	Introduction to Web Design: User Experience Design (UX)	3.0
GDSN 163	Intermediate Web Design: Interactive Design*	3.0
GDSN 164	Digital Illustration Design	3.0
GDSN 165	Branding and Identity Design*	3.0
GDSN 172	Publication Design	3.0
GDSN 178	Digital Imaging Design	3.0
GDSN 179	Advanced Digital Imaging Design*	3.0

*Prerequisite

Total: 30.0

GRAPHIC DESIGN

Certificate of Achievement

Description

Print and digital graphic design solutions require the designers to be versed in the manipulation of visual imagery, the use of typography, and the principles and elements of design; research and development related to clients and audiences are also essential components in creating effective graphic design concepts. The courses required for this certificate provide the foundational skills needed to create effective graphic design solutions.

To acquire the **Certificate of Achievement in Graphic Design**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 18.0
GDSN 110	History of Graphic Design	3.0
GDSN 150	Typography	3.0
GDSN 162	Introduction to Web Design: User Experience Design (UX)	3.0
GDSN 164	Digital Illustration Design	3.0
GDSN 172	Publication Design	3.0
GDSN 178	Digital Imaging Design	3.0

Total: 18.0

GRAPHIC DESIGN/ADVERTISING DESIGN

Certificate of Achievement

Description

Students are taught the foundational skills needed to create effective Advertising Design solutions. Print and digital advertising require the designer to be versed in the manipulation of visual imagery, the use of typography as well as the Principles and Elements of design. Research and development of both the client and audience are also essential components in creating effective advertising solution concepts.

To acquire the **Certificate of Achievement in Graphic Design: Advertising Design**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
GDSN 150	Typography	3.0
GDSN 164	Digital Illustration Design	3.0
GDSN 178	Digital Imaging Design	3.0
GDSN 179	Advanced Digital Imaging Design*	3.0

*Prerequisite

Total: 12.0

GRAPHIC DESIGN/BRANDING IDENTITY & DESIGN

Certificate of Achievement

Description

Students are taught the foundational skills needed to create effective Branding & Identity Design solutions. Print and digital Branding & Identity solutions require the designer to be versed in the manipulation of visual imagery, the use of typography as well as the Principles and

Elements of design. Research and development of both the client and audience are also essential components in creating effective Branding & Identity solution concepts.

To acquire the **Certificate of Achievement in Graphic Design: Branding Identity & Design**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
GDSN 150	Typography	3.0
GDSN 162	Introduction to Web Design: User Experience Design (UX)	3.0
GDSN 164	Digital Illustration Design	3.0
GDSN 165	Branding and Identity Design*	3.0
*Prerequisite		
		Total: 12.0

GRAPHIC DESIGN/ENTREPRENEURIAL GRAPHIC DESIGN

Certificate of Achievement

Description

The curriculum in this certificate provides foundational entrepreneurial preparation for students entering a freelance graphic design career and/or starting a small graphic design business. The certificate combines the entry-level small-business management and marketing skills and intermediate/advanced graphic design skills needed to participate as an entrepreneur in the graphic design profession.

To acquire the **Certificate of Achievement in Entrepreneurial Graphic Design**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
MGMT 130	Small Business Management-Entrepreneurship	3.0
MRKT 174	Small Business Marketing and Advertising	3.0
GDSN 290	Work Experience Education/Internship For Graphic Design-Related Fields	3.0
GDSN 299	Directed Study in Graphic Design	3.0
Choose a minimum of 9 units from the following:		Units: 9.0
GDSN 110	History of Graphic Design	3.0
GDSN 151	Typographic Design*	3.0
GDSN 163	Intermediate Web Design: Interactive Design*	3.0
GDSN 165	Branding and Identity Design*	3.0
GDSN 174	Packaging Design*	3.0
*Prerequisite		
		Total: 21.0

GRAPHIC DESIGN/PACKAGING DESIGN

Certificate of Achievement

Description

Print and digital packaging require designers to be versed in the manipulation of visual imagery, the use of typography, and the principles and elements of design; research and development related to clients and audiences are also essential components in creating effective packaging solution concepts. The courses required in this certificate provide these foundational skills needed to create effective packaging design solutions.

To acquire the **Certificate of Achievement in Graphic Design: Packaging Design**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
GDSN 150	Typography	3.0
GDSN 164	Digital Illustration Design	3.0
GDSN 174	Packaging Design*	3.0
GDSN 178	Digital Imaging Design	3.0
*Prerequisite		
		Total: 12.0

GRAPHIC DESIGN/PUBLICATION DESIGN

Certificate of Achievement

Description

Students are taught the foundational skills needed to create effective Publication Design solutions. Print and digital Publication Design solutions require the designer to be versed in the manipulation of visual imagery, the use of typography as well as the Principles and Elements of design. Research and development of both the client and audience are also essential components in creating effective Publication Design solution concepts.

To acquire the **Certificate of Achievement in Graphic Design: Publication Design**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
GDSN 150	Typography	3.0
GDSN 151	Typographic Design*	3.0
GDSN 164	Digital Illustration Design	3.0
GDSN 172	Publication Design	3.0

*Prerequisite

Total: 12.0

GRAPHIC DESIGN/WEBSITE DESIGN

Certificate of Achievement

Description

Students are taught the foundational skills needed to create effective Website Design and Digital Media solutions. Website Design and Digital Media solutions require the designer to be versed in the manipulation of visual imagery, the use of typography as well as the Principles and Elements of design. Research and development of both the client and audience are also essential components in creating effective Website Design and Digital Media solution concepts.

To acquire the **Certificate of Achievement in Graphic Design: Website Design**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
GDSN 150	Typography	3.0
GDSN 162	Introduction to Web Design: User Experience Design (UX)	3.0
GDSN 163	Intermediate Web Design: Interactive Design*	3.0
GDSN 178	Digital Imaging Design	3.0

*Prerequisite

Total: 12.0

HEALTH SCIENCE PREPARATION

Certificate of Achievement

Description

The **Certificate of Achievement in Health Science Preparation** will provide students with all the courses necessary to pursue further education in a variety of health science programs such as nursing, dental hygiene, physical therapy, occupational therapy, medical laboratory technicians, and radiological sciences. In order to earn this Certificate of Achievement, students must complete all required courses with a grade of "C" or higher.

To acquire the **Certificate of Achievement in Health Science Preparation**, it is necessary to complete the following courses:

Required Courses		Units: 21.5
BIOL 125	Human Anatomy	4.0
BIOL 222	Microbiology*	5.0
BIOL 226	Human Physiology*	4.0
		5.0
CHEM 110	Chemistry for Allied Health Majors*	5.0
OR		
CHEM 120	Introduction to Chemistry*	5.0

*Prerequisite

Total: 21.5

HEAT AND FROST INSULATORS

Associate of Science Degree

Description

The Heat and Frost Insulator Associate of Science Degree is designed to prepare students who are interested in careers in the heat and frost insulators industry to meet the needs of indentured apprentices with the State of California (i.e., programs, system, and standards). Students gain the skills and knowledge necessary to work in the heat and frost insulators industry in compliance with governmental regulations, and simultaneously to protect human health and the environment.

To acquire the **Associate of Science Degree in Heat and Frost Insulators**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Ro Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 25.0
HEFR 040	Insulation Industry Orientation*	2.5
HEFR 041	Mechanical Piping Systems*	2.5
HEFR 042	Boiler Insulation*	2.5
HEFR 043	Construction Mathematics*	2.5
HEFR 044	Mechanical Piping Insulation*	2.5
HEFR 045	Foam & Firestopping Insulation*	2.5
HEFR 046	Blueprint Reading*	2.5
HEFR 047	Prefabricated Buildings*	2.5
HEFR 048	Firestop Applications*	2.5
HEFR 049	Advanced Life Safety Firestop Applications*	2.5

*Prerequisite

Total: 25.0

HEAT AND FROST INSULATORS

Certificate of Achievement

Description

The Heat and Frost Insulator Certificate of Achievement is designed to prepare students who are interested in careers in the heat and frost insulators industry to meet the needs of indentured apprentices with the State of California (i.e., programs, system, and standards). Students gain the skills and knowledge necessary to work in the heat and frost insulators industry in compliance with governmental regulations, and simultaneously to protect human health and the environment.

To acquire the **Certificate of Achievement in Heat and Frost Insulators**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 25.0
HEFR 040	Insulation Industry Orientation*	2.5
HEFR 041	Mechanical Piping Systems*	2.5
HEFR 042	Boiler Insulation*	2.5
HEFR 043	Construction Mathematics*	2.5
HEFR 044	Mechanical Piping Insulation*	2.5
HEFR 045	Foam & Firestopping Insulation*	2.5
HEFR 046	Blueprint Reading*	2.5
HEFR 047	Prefabricated Buildings*	2.5
HEFR 048	Firestop Applications*	2.5
HEFR 049	Advanced Life Safety Firestop Applications*	2.5

*Prerequisite

Total: 25.0

HEAVY EQUIPMENT DIESEL ENGINES TECHNICIAN

Certificate of Achievement

Description

The courses listed in this certificate compile a comprehensive list of job-related skills needed to enter the heavy equipment field. The skills acquired during class will prepare an individual for entry-level employment as a heavy equipment diesel engine service technician at a modern heavy equipment and machinery repair facility.

To acquire the **Certificate of Achievement in Heavy Equipment Diesel Engines Technician**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
HET 107	Heavy Equipment Operation, Performance Testing and Adjusting*	4.0
HET 150	Heavy Equipment Fuel Systems and Emissions*	4.0
HET 160	Heavy Equipment Diesel Engines*	4.0
*Prerequisite		
		Total: 12.0

HEAVY EQUIPMENT ELECTRONICS TECHNICIAN

Certificate of Achievement

Description

The courses listed in this certificate compile a comprehensive list of job-related skills needed to enter the heavy equipment field. The skills acquired during class will help one pass the certification license (EPA Rule 1411) for Motor Vehicle Air Conditioning Service. The certificate is designed to prepare an individual for entry-level employment as a Heavy Equipment Electrical/Electronic Systems and/or Heating, Ventilation and Air Conditioning Service/Repair technician.

To acquire the **Certificate of Achievement in Heavy Equipment Electronics Technician**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
HET 107	Heavy Equipment Operation, Performance Testing and Adjusting*	4.0
HET 140	Heavy Equipment Electrical Diagnosis*	4.0
HET 240	Heavy Equipment Heating, Ventilation, and Air Conditioning*	4.0
		Total: 12.0

HEAVY EQUIPMENT GENERAL SERVICE TECHNICIAN

Certificate of Achievement

Description

The courses required in this Certificate of Achievement are comprised of a comprehensive list of job-related skills needed to acquire general heavy equipment skills. The skills acquired during class will prepare an individual for entry-level employment as a general heavy equipment service technician such as a Lube or Periodic Maintenance technician or other positions within a heavy equipment repair facility.

To acquire the **Certificate of Achievement in Heavy Equipment General Service Technician**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 15.0
HET 101	Introduction to Heavy Equipment Technology	4.0
HET 106	Heavy Equipment Electrical Fundamentals	4.0
HET 107	Heavy Equipment Operation, Performance Testing and Adjusting*	4.0
HET 290	Work Experience Education/Internship for Heavy Equipment Technology-Related Fields	1.0
WELD 040	Introduction to Welding Processes	2.0
*Prerequisite		
		Total: 15.0

HEAVY EQUIPMENT HYDRAULICS TECHNICIAN

Certificate of Achievement

Description

The courses listed in this certificate compile a comprehensive list of job-related skills needed to enter the heavy equipment field. The skills acquired during class will prepare an individual for entry-level employment as a heavy equipment hydraulic systems service technician at a modern heavy equipment and machinery repair facility.

To acquire the **Certificate of Achievement in Heavy Equipment Hydraulics Technician**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
HET 107	Heavy Equipment Operation, Performance Testing and Adjusting*	4.0
HET 200	Heavy Equipment Hydraulic Fundamentals*	4.0
HET 210	Heavy Equipment Hydraulic Diagnostics*	4.0
*Prerequisite		
		Total: 12.0

HEAVY EQUIPMENT MAINTENANCE TECHNICIAN

Certificate of Achievement

Description

The courses required for this Certificate of Achievement encompass a comprehensive list of job-related skills required to acquire heavy equipment maintenance skills. The skills obtained through these courses prepare students for entry-level employment as heavy equipment maintenance technicians or other positions within a heavy equipment repair facility.

To acquire the **Certificate of Achievement in Heavy Equipment Maintenance Technician**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 15.0
HET 121	Introduction to Heavy Equipment Maintenance	3.0
HET 122	Introduction to Heavy Equipment Electrical and Diagnostic Procedures	3.0
HET 123	Introduction to Heavy Equipment Mobile Hydraulics	3.0
HET 124	Introduction to Heavy Equipment Powertrains	3.0
HET 125	Introduction to Diesel Engines, Fuel Systems and Emissions	3.0
Choose one of the following courses:		Units: 1.0-4.0
HET 240	Heavy Equipment Heating, Ventilation, and Air Conditioning*	1.0-4.0
OR		4.0
HET 290	Work Experience Education/Internship for Heavy Equipment Technology-Related Fields	1.0-4.0
OR		
HET 299	Directed Study in Heavy Equipment Technology	1.0-3.0
		Total: 16.0-19.0

HEAVY EQUIPMENT POWERTRAINS TECHNICIAN

Certificate of Achievement

Description

The courses listed in this certificate compile a comprehensive list of job-related skills needed to enter the heavy equipment field. The skills acquired during class will prepare an individual for entry-level employment as a heavy equipment powertrain systems service technician at a modern heavy equipment and machinery repair facility.

To acquire the **Certificate of Achievement in Heavy Equipment Powertrains Technician**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 12.0
HET 107	Heavy Equipment Operation, Performance Testing and Adjusting*	4.0
HET 220	Heavy Equipment Powertrains I*	4.0
HET 230	Heavy Equipment Powertrains II*	4.0

*Prerequisite

Total: 12.0

HEAVY EQUIPMENT SERVICE TECHNICIAN

Certificate of Achievement

Description

The courses listed in the Certificate of Achievement are comprised of a comprehensive list of job skills needed to enter the heavy equipment field. The skills developed during class will prepare an individual for entry-level employment as a Heavy Equipment Service Technician at a modern heavy equipment and machinery facility.

To acquire the **Heavy Equipment Service Technician Certificate of Achievement**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 32.0
HET 140	Heavy Equipment Electrical Diagnosis*	4.0
HET 150	Heavy Equipment Fuel Systems and Emissions*	4.0
HET 160	Heavy Equipment Diesel Engines*	4.0
HET 200	Heavy Equipment Hydraulic Fundamentals*	4.0
HET 210	Heavy Equipment Hydraulic Diagnostics*	4.0
HET 220	Heavy Equipment Powertrains I*	4.0
HET 230	Heavy Equipment Powertrains II*	4.0
HET 240	Heavy Equipment Heating, Ventilation, and Air Conditioning*	4.0

*Prerequisite

Total: 32.0

HEAVY EQUIPMENT TECHNOLOGY

Associate of Science Degree

Description

The courses listed in the Associate of Science Degree are comprised of a comprehensive list of job skills needed to enter the heavy equipment field. The skills developed during class will prepare an individual for entry-level employment as a Heavy Equipment Service Technician at a modern heavy equipment and machinery facility.

To acquire the **Associate of Science Degree in Heavy Equipment Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 32.0
HET 140	Heavy Equipment Electrical Diagnosis*	4.0
HET 150	Heavy Equipment Fuel Systems and Emissions*	4.0
HET 160	Heavy Equipment Diesel Engines*	4.0
HET 200	Heavy Equipment Hydraulic Fundamentals*	4.0
HET 210	Heavy Equipment Hydraulic Diagnostics*	4.0
HET 220	Heavy Equipment Powertrains I*	4.0
HET 230	Heavy Equipment Powertrains II*	4.0
HET 240	Heavy Equipment Heating, Ventilation, and Air Conditioning*	4.0

*Prerequisite

Total: 32.0

A Degree with a Guarantee.SM

HISTORY

Associate in Arts for Transfer

Description

The **Associate in Arts in History for Transfer (AA-T) Degree** is intended to meet the lower division requirements for History majors (or similar majors) at a CSU campus that offers a baccalaureate degree. The Associate in Arts in History for Transfer Degree is designed to enable students to explore a broad understanding of the social, political, cultural and economic events and forces that have shaped our nation's past, present and future. In addition to studying the history of the United States, history majors will study other civilizations and cultures gaining a broader perspective and better understanding of the contemporary world. Through a diverse curriculum, students learn to gather, synthesize, analyze and interpret historical evidence, building a strong foundation that prepares students to either transfer to a four-year college or succeed in numerous career paths, such as teaching, law, business administration, journalism and public service.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in History:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the History major at the CSU where they seek transfer.

Required Courses		Units: 12.0
HIST 101	History of World Civilization to the 17th Century	3.0
HIST 102	History of World Civilization 1500 to the Present	3.0
		3.0
HIST 143	History of the United States to 1877	3.0
OR		
HIST 143H	History of the United States to 1877 Honors*	3.0
		3.0
HIST 144	History of the United States Since 1865	3.0
OR		
HIST 144H	History of the United States Since 1865 Honors*	3.0
		3.0
Choose one course from the following list:		Units: 3.0
HIST 131	History of the North American Indian	3.0
HIST 156	Black American Experience to 1865	3.0
HIST 157	Black American Experience Since 1865	3.0
HIST 158	US Comparative History of American Indians and Black Americans	3.0
		3.0
HIST 159	US Comparative History of Mexican and Asian Americans and Women	3.0
OR		
HIST 159H	US Comparative History of Mexican and Asian Americans and Women Honors *	3.0
		3.0
HIST 170	Women in American History	3.0
HIST 122	History of Mexico	3.0
		3.0
Choose one course from the following list:		Units: 3.0
CHST 150	Chicana/o/x Politics	3.0
		3.0
ECON 101	Principles of Macroeconomics*	3.0
OR		
ECON 101H	Principles of Macroeconomics Honors*	3.0
		3.0
		3.0
ECON 102	Principles of Microeconomics*	3.0

OR ECON 102H	Principles of Microeconomics Honors*	3.0
GEOG 102	Introduction to Cultural Geography	3.0
HIST 167	History of California	3.0
PHIL 101	Introduction to Philosophy	3.0
OR PHIL 101H	Introduction to Philosophy Honors*	3.0
POLS 110	Government of the United States	3.0
OR POLS 110H	Government of the United States Honors*	3.0
POLS 150	Latinx Politics	3.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

*Prerequisite

Total: 18.0

HOMELAND SECURITY Associate of Science Degree

Description

The **Associate of Science Degree in Homeland Security** is designed to prepare students to meet the needs of entry-level positions in the Homeland Security career fields. The curriculum will prepare students with a foundation of the Homeland Security Enterprise and provide them with the knowledge to enter varied career fields that plan for and respond to the security of people, places and programs. The skills developed during class will enhance the student's ability by completing industry-recognized third party Federal Emergency Management Agency (FEMA) certification courses as part of each class in the core program. The Homeland Security Degree program is designed for First Responders, government officials, emergency managers as well as the citizen interested in personal and community safety and security.

To acquire the **Associate of Science Degree in Homeland Security**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 15.0
HMLD 101	Introduction to Homeland Security	3.0
HMLD 102	Introduction to Emergency Management	3.0
HMLD 103	Terrorism and Violence in Society	3.0
HMLD 104	Emergency Planning and Response	3.0
HMLD 105	Hazard Mitigation in Emergency Management	3.0
Choose a minimum of 9 units from the following:		Units: 9.0-10.0
AJ 101	Introduction to Administration of Justice	3.0
AJ 102	Criminal Procedures	3.0
AJ 104	Legal Aspects of Evidence	3.0
AJ 105	Community Relations/Multicultural Issues Within Public Service	3.0
AJ 106	Criminal Law I*	3.0
AJ 107	Criminal Law II*	3.0
GIS 281	Crime Mapping and Analysis	3.0-4.0
OR FTEC 101	Fire Protection Organization	4.0
FTEC 102	Principles of Fire & Emergency Services Safety & Survival	3.0
FTEC 103	Fire Behavior and Combustion	3.0
FTEC 104	Fire Prevention Technology	3.0
FTEC 105	Building Construction for Fire Protection	3.0
FTEC 106	Fire Protection Equipment and Systems	3.0
WFT 101	Wildland Fire Behavior	3.0
WFT 102	Wildland Firefighter Safety and Survival	3.0
WFT 103	Wildland Fire Operations	3.0

WFT 104	Wildland Fire Investigation, Prevention, and Public Information	3.0
WFT 105	Wildland Fire Logistics, Finance, and Planning	3.0
*Prerequisite		

Total: 24.0-25.0

HOMELAND SECURITY

Certificate of Achievement

Description

The **Certificate of Achievement in Homeland Security** is designed to prepare students to meet the needs of entry-level positions in the Homeland Security career fields. The curriculum will prepare students with a foundation of the Homeland Security Enterprise and provide them with the knowledge to enter varied career fields that plan for and respond to the security of people, places and programs. The skills developed during class will enhance the student's ability by completing industry-recognized third-party Federal Emergency Management Agency (FEMA) certification courses as part of each class in the core program. The Homeland Security program is designed for First Responders, government officials, emergency managers as well as the citizen interested in personal and community safety and security.

To acquire the **Certificate of Achievement in Homeland Security**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 15.0
HMLD 101	Introduction to Homeland Security	3.0
HMLD 102	Introduction to Emergency Management	3.0
HMLD 103	Terrorism and Violence in Society	3.0
HMLD 104	Emergency Planning and Response	3.0
HMLD 105	Hazard Mitigation in Emergency Management	3.0
Choose one course from the following:		Units: 3.0-4.0
AJ 101	Introduction to Administration of Justice	3.0
FTEC 101	Fire Protection Organization	3.0
WFT 101	Wildland Fire Behavior	3.0
GIS 281	Crime Mapping and Analysis	4.0
		Total: 18.0-19.0

HOMELAND SECURITY PLANNING AND ADMINISTRATION

Certificate of Achievement

Description

The **Certificate of Achievement in Homeland Security Planning and Administration** is designed to prepare students to meet the needs of entry-level positions in the Homeland Security career fields. The curriculum will prepare students with an advanced foundation of the Homeland Security Enterprise and provide them with the knowledge to enter varied career fields that plan for and respond to the security of people, places and programs. The skills developed during class will enhance the student's ability by completing industry-recognized third-party Federal Emergency Management Agency (FEMA) certification courses as part of each class in the core program. The Homeland Security program is designed for First Responders, government officials, emergency managers as well as the citizen interested in personal and community safety and security.

To acquire the **Certificate of Achievement in Homeland Security Planning and Administration**, it is necessary to complete the following courses:

Required Courses		Units: 24.0
HMLD 101	Introduction to Homeland Security	3.0
HMLD 102	Introduction to Emergency Management	3.0
HMLD 103	Terrorism and Violence in Society	3.0
HMLD 104	Emergency Planning and Response	3.0
HMLD 105	Hazard Mitigation in Emergency Management	3.0
HMLD 200	Foundations of Critical Infrastructure Protection	3.0
HMLD 203	Homeland Security: Leadership, Policy and Practice	3.0
HMLD 205	Cybersecurity: Policy and Practice	3.0
		Total: 24.0

HONDA PROFESSIONAL AUTOMOTIVE CAREER TRAINING PROGRAM SPECIALIZATION (PACT)

Associate of Science Degree

Description

The courses required for this associate of science degree include a comprehensive set of job skills needed to enter the automotive field. The skills developed during coursework enhance students' ability to complete the Automotive Service Excellence (ASE) Certification Tests A1 through A8 for automotive technicians, and to become specialists for Honda/Acura vehicles. The degree is designed to prepare students to transfer and/or for entry-level employment as an automotive technician with a Honda/Acura dealer. This is a full-time, two-year accelerated training and career placement program.

Note: In partial fulfillment of the requirements for the Honda PACT Certificate/Degree, Honda requires a minimum of 640 internship hours working in a Honda or Acura franchise dealership in order to receive credit toward the Honda/Acura Technician Certification.

To acquire the **Associate of Science Degree in Honda Professional Automotive Career Training (PACT) Program Specialization**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College general education and proficiency, California State University General Education Breadth (CSU GE-Breadth), or Intersegmental General Education Transfer Curriculum (IGETC) requirements.

Required Courses		Units: 44.0
HOND 045	Honda/Acura Express Service (formerly AUTO 045)	4.0
HOND 045-1	Honda/Acura Chassis Electrical Systems (formerly AUTO 045-1)*	4.0
HOND 046	Honda/Acura Automatic Transmission Systems (formerly AUTO 046)	4.0
HOND 125	Power Train System Service and Transmission Diagnostics (formerly AUTO 125)*	4.0
HOND 140	Honda/Acura Body and Chassis Electrical Systems*	4.0
HOND 150	Honda/Acura Engine Electrical Systems*	4.0
HOND 160	Upper End Engine Rebuilding and Machining*	4.0
HOND 201	Automotive Brake and Suspension Service (formerly AUTO 201)*	4.0
HOND 240	Honda/Acura Heating and Air Conditioning*	4.0
AUTO 290	Work Experience Education/Internship for Automotive Technology-Related Fields	8.0
*Prerequisite		
		Total: 44.0

HONDA/ACURA BRAKES, SUSPENSION, AND CHASSIS ELECTRICAL SYSTEMS Certificate of Achievement

Description

The courses included in this certificate of achievement constitute a comprehensive training package that includes both cognitive and skill-based training activities. The training from these courses helps prepare students for Automotive Services Excellence (ASE) Certification Tests A4 (Suspension and Steering), A5 (Brakes), and A6 (Electrical/Electronic Systems). Students also develop skill-based training techniques that reflect hands-on work experience. The courses are structured to prepare Honda Professional Automotive Career Training (PACT) students for occupations within the Honda/Acura dealership network, such as express service technicians and/or entry-level repair technicians.

To acquire the **Certificate of Achievement in Honda/Acura Brakes, Suspension, and Chassis Electrical**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
HOND 045	Honda/Acura Express Service (formerly AUTO 045)*	4.0
HOND 106	Honda/Acura Electrical Tools and Diagnostic Procedures	3.0
HOND 201	Automotive Brake and Suspension Service (formerly AUTO 201)*	4.0
AUTO 290	Work Experience Education/Internship for Automotive Technology-Related Fields	4.0
		Total: 15.0

HONDA/ACURA ENGINE REPAIR AND ENGINE ELECTRICAL SYSTEMS Certificate of Achievement

Description

The courses included in this certificate of achievement constitute a comprehensive training package that includes both cognitive and skill-based training activities. The training in these courses helps prepare students for the Automotive Service Excellence (ASE) Certification Tests A1 (Engine Repair), A6 (Electrical/Electronic Systems), and A8 (Engine Performance). Students also develop skill-based training techniques that

reflect hands-on work experience. The courses are structured to prepare Honda Professional Automotive Career Training (PACT) students for occupations within the Honda/Acura dealership network, such as express service technicians and/or entry-level repair technicians.

To acquire the **Certificate of Achievement in Honda/Acura Engine Repair and Engine Electrical System**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
AUTO 101	Introduction to Automotive Service and Repair: Underhood Service	3.0
HOND 045-1	Honda/Acura Chassis Electrical Systems (formerly AUTO 045-1)*	4.0
HOND 150	Honda/Acura Engine Electrical Systems*	4.0
HOND 160	Upper End Engine Rebuilding and Machining*	4.0
*Prerequisite		
		Total: 15.0

HONDA/ACURA HEATING AND AIR CONDITIONING SYSTEMS

Certificate of Achievement

Description

The courses included in this certificate of achievement constitute a comprehensive training package that includes both cognitive and skill-based training activities. The training in these courses helps prepare students for Automotive Service Excellence (ASE) Certification Tests A6 (Electrical/Electronic Systems) and A7 (Heating and Air Conditioning). Students also develop skill-based training techniques that reflect hands-on work experience. The courses are structured to prepare Honda Professional Automotive Career Training (PACT) students for occupations within the Honda/Acura dealership network, such as express service technicians and/or entry-level repair technicians.

To acquire the **Certificate of Achievement in Honda/Acura Heating and Air Conditioning Systems Certificate of Achievement**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
HOND 106	Honda/Acura Electrical Tools and Diagnostic Procedures	3.0
HOND 140	Honda/Acura Body and Chassis Electrical Systems*	4.0
HOND 240	Honda/Acura Heating and Air Conditioning*	4.0
AUTO 290	Work Experience Education/Internship for Automotive Technology-Related Fields	4.0
*Prerequisite		
		Total: 15.0

HONDA/ACURA POWERTRAIN AND TRANSMISSION SYSTEMS

Certificate of Achievement

Description

The courses included in this certificate of achievement constitute a comprehensive training package for students that includes both cognitive and skill-based training activities. The training from these courses helps to prepare students for Automotive Service Excellence (ASE) Certification Tests A2 (Automatic Transmission/Transaxle), A3 (Manual Drive Train and Axles), and A6 (Electrical/Electronic Systems). Students also develop skill-based training techniques that reflect hands-on work experience. The courses are structured to prepare Honda Professional Automotive Career Training (PACT) students for occupations within the Honda/Acura dealership network, such as express service technicians and/or entry-level repair technicians.

To acquire the **Certificate of Achievement in Honda/Acura Power Train and Transmission Systems**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
HOND 046	Honda/Acura Automatic Transmission Systems (formerly AUTO 046)*	4.0
HOND 106	Honda/Acura Electrical Tools and Diagnostic Procedures	3.0
HOND 125	Power Train System Service and Transmission Diagnostics (formerly AUTO 125)*	4.0
AUTO 290	Work Experience Education/Internship for Automotive Technology-Related Fields	4.0
*Prerequisite		
		Total: 15.0

HOSPITALITY MANAGEMENT Associate in Science for Transfer

Description

The **Associate in Science in Hospitality Management for Transfer (AS-T) Degree** is intended to meet the lower division requirements for Hospitality Management majors (or similar majors) at a CSU campus that offers a Hospitality baccalaureate degree. This degree is designed for students interested in gaining the basic concepts of Hospitality Management and to prepare them for jobs with local and global hotels, restaurants, airlines, cruise lines, sports arenas, entertainment, and amusement parks. On completion, students are ready to transfer seamlessly into Hospitality Management and related degree programs at a CSU.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Hospitality Management.

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Hospitality major at the CSU where they seek transfer.

Required Courses		Units: 3.0
HOSP 101	Introduction to the Hospitality Industry	3.0
LIST A: Choose 9 units or 3 courses from the following list:		Units: 9.0
ECON 102	Principles of Microeconomics*	3.0
OR		3.0
ECON 102H	Principles of Microeconomics Honors*	3.0
HOSP 102	Introduction to Hotel Operations	3.0
HOSP 103	Sanitation and Safety	3.0
HOSP 104	Introduction to Food and Beverage	3.0
HOSP 201	Hospitality Law	3.0
LIST B: Choose 2 courses from the following list or any course from List A above not already used total 6 to 7 units:		Units: 6.0-7.0
ACCT 101	Financial Accounting	4.0
OR		4.0
ACCT 101H	Financial Accounting Honors*	4.0
ECON 101	Principles of Macroeconomics*	3.0
OR		3.0
ECON 101H	Principles of Macroeconomics Honors*	3.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

*Prerequisite

Total: 18.0-19.0

INTERNATIONAL BUSINESS Certificate of Achievement

Description

This Certificate of Achievement is designed for those students who wish to pursue a career in international business. This program is also for those students already employed in the international field who wish to improve on their international management and organizational skills which can lead to a management position in international business.

To acquire the **Certificate of Achievement in International Business**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
MGMT 140	Introduction to International Business	3.0
MGMT 141	International Marketing	3.0
MGMT 142	International Management	3.0
MGMT 143	Import and Export Business	3.0
MGMT 147	Global Business and Culture	3.0
Choose a minimum of 3 units from the following:		Units: 3.0
MGMT 108	Business Writing	3.0
MGMT 208	Business Communications*	3.0
BUSL 110	Legal Environment of Business	3.0
*Prerequisite		
		Total: 18.0

INTERNATIONAL BUSINESS MANAGEMENT Associate of Science Degree

Description

The Degree in International Business Management is designed for students who wish to pursue a career in business and desire to work with businesses in other countries. The program is also for students already employed in the international business field who wish to improve their international management and organizational skills. The program also prepares students for management positions in international business.

To acquire the **Associate of Science Degree in International Business Management**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 28.0
ACCT 101	Financial Accounting	4.0
OR		
ACCT 101H	Financial Accounting Honors*	4.0
BUSL 110	Legal Environment of Business	3.0
LOG 101	Supply Chain Management	3.0
MGMT 108	Business Writing	3.0
MGMT 140	Introduction to International Business	3.0
MGMT 141	International Marketing	3.0
MGMT 142	International Management	3.0
MGMT 143	Import and Export Business	3.0
MGMT 147	Global Business and Culture	3.0
*Prerequisite		
		Total: 28.0

JOURNALISM

Associate in Arts for Transfer

Description

The **Associate in Arts in Journalism for Transfer (AA-T) Degree** is intended to meet the lower division requirements for Journalism majors (or similar majors) at a CSU campus that offers a Journalism baccalaureate degree.

This degree is designed for students interested in an introduction to the field of Journalism and for students looking to further their education in the field of Journalism to best be prepared to enter the job market. Students will demonstrate a wide breadth and depth of understanding of mass media theories, methods and concepts. The degree is intended for students who are interested in Journalism and are planning on transferring to a California State University and majoring in Journalism or Mass Communications. Other similar Mass Communication concentrations are Broadcast Journalism, Entertainment Studies, Photo Communications and Public Relations.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Journalism:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Journalism major at the CSU where they seek transfer.

Required Courses		Units: 10.0
MSCM 128	Mass Media in Modern Society	3.0
JOUR 120	Communications Reporting and Writing	3.0
JOUR 241	Newspaper Production I*	4.0
OR		
JOUR 242	Digital Newspaper Production I*	4.0
LIST A: Select one (3-4 units)		Units: 3.0-4.0
JOUR 110	Digital Photojournalism I	3.0
JOUR 243	Newspaper Production II*	4.0
OR		
JOUR 244	Digital Newspaper Production II*	4.0
LIST B: Select two (6-8 units)		Units: 6.0-8.0
ECON 101	Principles of Macroeconomics*	3.0
OR		
ECON 101H	Principles of Macroeconomics Honors*	3.0
ECON 102	Principles of Microeconomics*	3.0
OR		
ECON 102H	Principles of Microeconomics Honors*	3.0
ENGL 201	Advanced Composition and Critical Thinking*	3.5
OR		
ENGL 201H	Advanced Composition and Critical Thinking Honors*	3.5
GDSN 172	Publication Design	3.0
JOUR 147	Broadcast News	3.0
		4.0

MATH 130	Statistics*	4.0
OR		
MATH 130H	Statistics Honors*	4.0
OR		
PSY 190	Statistics for the Behavioral Sciences*	4.0
		3.0
PHIL 112	Introduction to Logic	3.0
OR

KINESIOLOGY

Associate in Arts for Transfer

Description

The **Associate in Arts in Kinesiology for Transfer** is designed to provide students preparing to transfer with the foundation to complete a Bachelor's Degree in Kinesiology. Students will be able to pursue careers in teaching, coaching, physical therapy, athletic training, and adaptive physical education.

The Associate in Arts in Kinesiology for Transfer (AA-T) Degree is intended to meet the lower division requirements for Kinesiology majors (or similar majors) at a CSU campus that offers a Kinesiology baccalaureate degree.

This degree is designed for the transfer-oriented student who seeks to explore Kinesiology in preparation for a Bachelor's degree. Students will gain information and experience in areas that will prepare them for a job or a career in the field of teaching, youth or professional sports, coaching, fitness and health industry, physical therapy, athletic training, sports management, and lifesaving skills in First Aid and C.P.R. The degree will provide students the opportunity to pursue work in: youth sports and summer camps, in the fitness industry, assisting physical education professionals and creating new business opportunities in the area of physical activity and sports.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Associate in Arts in Kinesiology for Transfer:

1. Completion of 60 CSU-transferable semester units.

- Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
- Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
- Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Kinesiology major at the CSU where they seek transfer.

Required Courses

BIOL 125	Human Anatomy	4.0	Units: 11.0
BIOL 226	Human Physiology*	4.0	
KIN 194	Introduction to Kinesiology	3.0	

Movement Based Courses - Select a maximum of one (1) course from any three (3) of the following areas for a minimum of three (3) units:

Units: 3.0

AQUATICS

KINA 117	Swimming I	1.0
KINA 217	Swimming II	1.0

DANCE

DANC 150	Introduction to World Dance	1.0
DANC 151	Modern Dance I	1.0
DANC 153	Ballet I	1.0
DANC 154	Jazz Dance I	1.0
DANC 157	Hip-Hop Dance	1.0
DANC 251	Modern Dance II*	1.0
DANC 253	Ballet II*	1.0
DANC 254	Jazz Dance II*	1.0

FITNESS

DANC 114	Conditioning and Alignment	1.0
KINA 120	Swim for Fitness	1.0
KINA 130	Fitness and Wellness Laboratory	1.0-2.0
KINA 132	Aqua Aerobics	1.0
KINA 134	Cardio Boot Camp	1.0
KINA 136	Pilates Mat I	1.0
KINA 139	Cross Training for Fitness	1.0
KINA 140	Walking for Fitness	1.0

KINESIOLOGY*/ATHLETIC TRAINER'S AID Career Certificate

Description

The **Athletic Trainer's Aide Certificate** is designed to develop, practice and implement basic skills in the prevention, treatment and rehabilitation of athletic injuries. These courses will set a foundation that will aid in the pursuit of a career in the sports medicine And health care industries. This program will better prepare students for transfer into an accredited athletic training education program at the four-year university level or increase the breadth of education for those seeking a career in other allied healthcare fields. The student must attain a grade of "C" or higher in each course for completion.

Required Courses		Units: 16.0
KIN 290	Work Experience Education/Internship for Athletic Training-Related Fields*	4.0
KIN 193	Standard First Aid, C.P.R., and A.E.D.	3.0
KIN 194	Introduction to Kinesiology	3.0
KIN 197	Prevention and Treatment of Athletic Injuries	3.0
KIN 297	Advanced Athletic Training*	3.0

*Prerequisite

Total: 16.0

KINESIOLOGY/COACHING OF SPORTS Certificate of Achievement

Description

The **Coaching of Sports Certificate of Achievement** is designed to prepare students for employment as a coach in the sporting/athletic career field. It is possible to complete this certificate in one calendar year. The curriculum has been designed to equip students with the background, both theoretical and practical, to pursue a job as a coach. Students are prepared to complete the American Sports Education Program (ASEP) coaching certification, Positive Coaching Alliance (PCA) certifications and take the mandatory California Interscholastic Federation (CIF) test for employment. Courses in nutrition, strength and conditioning, first aid, or athletic training will prepare students for responsibilities in the field of coaching. The intent of this program is to prepare students in the field of physical activity so they may pursue a career in coaching; the courses offered will help students as they continue to pursue this career path, and prepare students for immediate entry-level employment in the field of coaching.

To acquire the **Certificate of Achievement in Coaching of Sports**, it is necessary to complete the following courses:

Required Courses		Units: 18.0
KIN 122	Nutrition for Sport and Fitness	3.0
KIN 126	Principles of Strength and Conditioning	3.0
KIN 159	Leadership in Sport	3.0

KIN 188	Theory of Coaching	3.0
KIN 193	Standard First Aid, C.P.R., and A.E.D.	3.0
		3.0
KIN 170	Sport and Exercise Psychology	3.0
OR		
KIN 195	Social Issues/Media in Sport	3.0

Total: 18.0

KINESIOLOGY/COMMUNITY HEALTH WORKER Certificate of Achievement

Description

The **Community Health Worker Certificate of Achievement** is designed to prepare students for employment as health professionals in the medical, education, and health and wellness career fields. It is possible to complete this certificate in one calendar year. The curriculum has been designed to equip students with the background, both theoretical and practical, to pursue a job promoting community health and education. Courses in nutrition, special populations, psychology/sociology, first aid, and lifelong physical activity will prepare students for responsibilities in the field of health. The program will also expose students to other areas, including health education, healthcare services, gerontology, wellness promotion, pre-allied health, nutritional science, counseling/social advocacy services, public health, and medical fields.

To acquire the **Certificate of Achievement in Community Health Worker**, it is necessary to complete the following courses:

Required Courses		Units: 18.0
KIN 122	Nutrition for Sport and Fitness	3.0
KIN 146	Training Principles for Special Populations	2.0
KIN 193	Standard First Aid, C.P.R., and A.E.D.	3.0
KIN 197	Prevention and Treatment of Athletic Injuries	3.0
		3.0
KIN 191	Health: Personal Issues	3.0
OR		
KIN 192	Health: Women's Personal Health	3.0
OR		
KIN 196	Health: Fitness and Wellness	3.0
		3.0
PSY 180	Positive Psychology	3.0
OR		
SOC 102	Major Social Problems	3.0
CWEG 290	Cooperative Work Experience Education - General	1.0
Choose two courses from below:		Units: 2.0-3.0
KINA 120	Swim for Fitness	1.0
KINA 130	Fitness and Wellness Laboratory	1.0-2.0
KINA 132	Aqua Aerobics	1.0
KINA 136	Pilates Mat I	1.0
KINA 139	Cross Training for Fitness	1.0
KINA 140	Walking for Fitness	1.0
KINA 158	Yoga I	1.0
		Total: 20.0-21.0

KINESIOLOGY/FITNESS AND SPORT MANAGEMENT Certificate of Achievement

Description

The fitness and sport fields have become dynamic growth industries and are recognized as multi-billion dollar global enterprises. The Fitness and Sport Management Certificate is designed to prepare individuals to apply business, coaching, and physical education principles to the organization, administration, and management of athletic programs and teams, fitness/rehabilitation facilities and health clubs, sport recreation services, and related services. The program includes instruction in program planning and development; business and financial management principles; sales, marketing and recruitment; event promotion, scheduling and management; facilities management; public relations; the psychology of sport and exercise, and legal aspects of sports. Depending on their specific interests, professionals in this field can do anything from managing a local gym, fitness studio, or sports camp. They may work in a college or professional sport venue and manage facilities, operations, and assist with marketing and social media. It is possible to complete this certificate in one calendar year. The curriculum has been designed to equip the student with the background, both theoretical and practical, to pursue an entry-level job managing and promoting both fitness and sport organizations.

To acquire the **Certificate of Achievement in Fitness and Sport Management**, it is necessary to complete the following courses:

Required Courses		Units: 18.0
KIN 110	Introduction to Fitness and Sport Management	3.0
KIN 159	Leadership in Sport	3.0
KIN 120	Sports Law and Ethics	3.0
KIN 188	Theory of Coaching	3.0
KIN 195	Social Issues/Media in Sport	3.0
KIN 170	Sport and Exercise Psychology	3.0
		Total: 18.0

KINESIOLOGY/FITNESS SPECIALIST Certificate of Achievement

Description

The Fitness Specialist Certificate program is designed to prepare students for employment as fitness instructors and careers in the rapidly expanding health and fitness industry. Students gain academic knowledge and fitness skills through the required course work, and develop the skills necessary to apply this knowledge in a vocational setting. The certificate is designed to be completed in one calendar year for students who attend full time, and may lead to immediate employment opportunities. The curriculum has been designed to equip students with the scientific background, both theoretical and practical, to successfully customize fitness programs that include education and guidance on nutrition, weight control, flexibility, core strength, cardiovascular exercise, and resistance training. Students are also prepared to pass national certification exams in health, fitness, strength and conditioning. The program will prepare students for transfer to a university in order to pursue a higher degree in various areas of study.

To acquire the **Certificate of Achievement in Fitness Specialist**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 21.0
KIN 115	Fitness Specialist Internship*	2.0
KIN 122	Nutrition for Sport and Fitness	3.0
KIN 126	Principles of Strength and Conditioning	3.0
KIN 127	Exercise Physiology	3.0
KIN 128	Fitness Testing and Exercise Prescription	3.0
KIN 131	Functional Anatomy of Movement	3.0
KIN 145	Theory and Analysis of Fitness Instruction	2.0
KIN 146	Training Principles for Special Populations	2.0
Choose two courses from the list below:		Units: 2.0-3.0
KINA 130	Fitness and Wellness Laboratory	1.0-2.0
KINA 134	Cardio Boot Camp	1.0
KINA 136	Pilates Mat I	1.0
KINA 158	Yoga I	1.0
KINA 230	Fitness and Wellness Laboratory II *	1.0
KINA 258	Yoga II*	1.0
DANC 114	Conditioning and Alignment	1.0
DANC 167	Latin Dance for Fitness	1.0

*Prerequisite

Total: 23.0-24.0

KINESIOLOGY/HEALTH, SAFETY AND WELLNESS Certificate of Achievement

Description

The **Certificate of Achievement in Health, Safety, and Wellness** prepares students for entry-level work in city recreation sport and youth programs. Students in the program learn nutrition essentials, explore health and wellness concepts, and evaluate personal strategies to manage stress and anxiety levels. Students also have the opportunity to fulfill the requirements for American Red Cross certifications in Standard First Aid, Cardiopulmonary Resuscitation (C.P.R.), and Automatic Defibrillation (A.E.D.) as a core element of achieving this certificate. The Health, Safety and Wellness Certificate of Achievement can be completed in one year.

To acquire the **Certificate of Achievement in Health, Safety, and Wellness**, it is necessary to complete the following courses:

Required courses:		Units: 6.0
KIN 122	Nutrition for Sport and Fitness	3.0
KIN 193	Standard First Aid, C.P.R., and A.E.D.	3.0
Select one of the following courses:		Units: 3.0

KIN 196	Health: Fitness and Wellness	3.0
KIN 191	Health: Personal Issues	3.0
KIN 192	Health: Women's Personal Health	3.0
		Total: 9.0

KINESIOLOGY/INTERCOLLEGIATE ATHLETIC COMPETITION

Certificate of Achievement

Description

The **Certificate of Achievement in Intercollegiate Athletic Competition** is for student-athletes who successfully represent the College for two seasons of sport and complete at least three off-season intercollegiate training courses, or compete on an additional intercollegiate sport team. This certificate recognizes student-athletes for their commitment, athletic and academic achievements, and dedication in representing the College in their selected sport(s).

To acquire the **Certificate of Achievement in Intercollegiate Athletic Competition**, it is necessary to complete the following courses:

Complete six units in the following intercollegiate courses:		Units: 6.0-7.5
KINA 170	Women's Intercollegiate Basketball Team	1.5
KINA 171	Women's Intercollegiate Tennis Team	3.0
KINA 172	Women's Intercollegiate Volleyball Team	3.0
KINA 173	Women's Intercollegiate Softball Team	3.0
KINA 176	Women's Intercollegiate Soccer Team	3.0
KINA 180	Men's Intercollegiate Baseball Team	3.0
KINA 181	Men's Intercollegiate Basketball Team	1.5
KINA 185	Men's and Women's Intercollegiate Swim Team	3.0
KINA 188	Men's and/or Women's Intercollegiate Water Polo Team	3.0
KINA 189	Men's Intercollegiate Wrestling Team	3.0
KINA 190	Men's Intercollegiate Soccer Team	3.0
KINA 192	Women's Intercollegiate Sand Volleyball Team	3.0
Complete 3 units in the following off-season intercollegiate courses or an additional 3 unit intercollegiate course from above:		Units: 3.0-3.5
KINA 147	Off-Season Conditioning For Intercollegiate Sports	1.0
KINA 159	Cross Training for Intercollegiate Athletics	1.0
KINA 202	Intercollegiate Baseball II	1.0
KINA 203	Off Season Softball	1.0
KINA 206	Off Season Women's Intercollegiate Volleyball Training	1.0
KINA 211	Off Season Intercollegiate Tennis	1.0
KINA 151	Strength and Conditioning for Intercollegiate Athletics	1.0
KINA 276	Off-Season for Intercollegiate Soccer	1.0
KINA 270	Women's Intercollegiate Basketball Team II	1.5
KINA 281	Men's Intercollegiate Basketball Team II	1.5
Block 1: Choose one course from the following:		Units: 3.0-3.5
ENGL 101	College Composition and Research*	3.5
PHIL 110	Critical Thinking*	3.0
PHIL 110H	Critical Thinking Honors*	3.0
KIN 120	Sports Law and Ethics	3.0
PHIL 120	Introduction to Ethics	3.0
KIN 122	Nutrition for Sport and Fitness	3.0
KIN 126	Principles of Strength and Conditioning	3.0
KIN 127	Exercise Physiology	3.0
KIN 131	Functional Anatomy of Movement	3.0
*Prerequisite		
Block 2: Choose one course from the following:		Units: 3.0
KIN 159	Leadership in Sport	3.0
KIN 170	Sport and Exercise Psychology	3.0
KIN 188	Theory of Coaching	3.0
KIN 195	Social Issues/Media in Sport	3.0
KIN 199	American Sports in Film	3.0
Choose one additional course from Block 1 or Block 2 not already taken.		Units: 3.0-3.5
		Total: 18.0-21.0

KINESIOLOGY/MAT PILATES INSTRUCTOR

Certificate of Achievement

Description

The Mat Pilates Instructor Certificate of Achievement is designed to prepare students for employment as a professional to instruct both groups and individuals in Pilates mat exercises. It is possible to complete this certificate in one calendar year. The curriculum has been designed to equip the student with the background, both theoretical and practical, to pursue a job promoting core training, injury prevention, alignment, and proper mechanics of movement for each exercise.

Courses in Pilates mat instruction, anatomy, training special populations, and Pilates activity classes will prepare the student for responsibilities in the field. The program will also expose students to other areas such as fitness, health promotion, coaching, pre-allied health, and medical fields as Pilates is often used in physical therapy rehabilitation, injury prevention, and enhancing the performance of athletes.

To acquire the **Certificate of Achievement in Mat Pilates Instructor**, it is necessary to complete the following courses:

Required Courses		Units: 14.0
KIN 131	Functional Anatomy of Movement	3.0
KIN 145	Theory and Analysis of Fitness Instruction	2.0
KIN 146	Training Principles for Special Populations	2.0
KIN 136	Pilates Mat Teaching: Foundations*	3.0
KINA 136	Pilates Mat I	1.0
KINA 236	Pilates Mat II*	1.0
KIN 115	Fitness Specialist Internship*	2.0
*Prerequisite		
		Total: 14.0

KINESIOLOGY/PEAK PERFORMANCE FOR SPORT

Certificate of Achievement

Description

The **Certificate of Achievement in Peak Performance for Sport** is designed for students seeking employment in the sport, athletic, coaching, and fitness fields. Students study physiological, psychological and sociological principles to evaluate human performance for youth, high school, collegiate, and professional athletes and teams. Students learn the basic anatomical principles used to maximize performance, biomechanics, program design, training techniques, and the role of nutrition to increase energy and enhance performance. Students in the program use social scientific inquiry through descriptive and comparative investigation to evaluate the connection between cognitive strategies and performance in fitness and sport. This certificate can be completed in one year.

To acquire the **Certificate of Achievement in Peak Performance for Sport**, it is necessary to complete the following courses:

Required courses:		Units: 9.0
KIN 122	Nutrition for Sport and Fitness	3.0
KIN 126	Principles of Strength and Conditioning	3.0
KIN 170	Sport and Exercise Psychology	3.0
Choose one of the following courses:		Units: 3.0
KIN 131	Functional Anatomy of Movement	3.0
KIN 188	Theory of Coaching	3.0
KIN 159	Leadership in Sport	3.0
Choose one of the following courses:		Units: 1.0
DANC 114	Conditioning and Alignment	1.0
KINA 139	Cross Training for Fitness	1.0
KINA 148	Strength Training	1.0
KINA 136	Pilates Mat I	1.0
KINA 158	Yoga I	1.0
		Total: 13.0

KINESIOLOGY/SPORT LEADERSHIP Certificate of Achievement

Description

The Certificate of Achievement in Sport Leadership is designed for students seeking employment in athletic administration from youth through professional levels, and/or athletic administration in recreation, education, and city programs. Students study leadership, sociological, and psychological theories; motivation strategies; and the relationship between leadership and globalization, social and traditional media, moral values, ethics, Title IX, equality, gender, ethnic minorities, and the economy—including how each of these topics impacts sport and vice versa. Students learn about leadership styles and servant and transformational leadership theories, and focus on the importance of leadership within team and organizational environments. The curriculum has been designed to equip students with a theoretical and practical foundation to pursue a job in sport administration and/or to increase leadership knowledge in the coaching and fitness fields. It is possible to complete this certificate in one year.

To acquire the **Certificate of Achievement in Sport Leadership**, it is necessary to complete the following courses:

Required courses:		Units: 12.0
KIN 159	Leadership in Sport	3.0
KIN 170	Sport and Exercise Psychology	3.0
KIN 190	Women in Sports	3.0
KIN 195	Social Issues/Media in Sport	3.0
Choose one of the following courses:		Units: 3.0
KIN 110	Introduction to Fitness and Sport Management	3.0
KIN 188	Theory of Coaching	3.0
Choose one of the following courses:		Units: 3.0
KIN 120	Sports Law and Ethics	3.0
KIN 199	American Sports in Film	3.0
		Total: 18.0

KINESIOLOGY/SPORT STUDIES Certificate of Achievement

Description

The **Certificate of Achievement in Sport Studies** prepares students to address current issues in sport and sport leadership, and is intended for students seeking employment in youth sport organizations, educational institutions, athletic programs, and recreational organizations. Students completing this certificate use social scientific inquiry through descriptive and comparative investigation to analyze sociological theories and the history of sport, as well as the role sport plays in human behavior, government, political decisions regarding sport, ethics, Title IX, gender, cultural organizations, and the human experience. This certificate can be completed in one year.

To acquire the **Certificate of Achievement in Sport Studies**, it is necessary to complete the following courses:

Required courses:		Units: 9.0
KIN 159	Leadership in Sport	3.0
KIN 190	Women in Sports	3.0
KIN 195	Social Issues/Media in Sport	3.0
Choose one of the following courses:		Units: 3.0
KIN 110	Introduction to Fitness and Sport Management	3.0
KIN 199	American Sports in Film	3.0
		Total: 12.0

KINESIOLOGY/SPORTS MEDICINE Associate of Science Degree

Description

The Associate of Science Degree is designed to give students interested in a career in sports medicine, athletic training or physical therapy an opportunity to develop, practice and implement fundamental skills in the prevention, treatment and rehabilitation of various athletic/orthopedic injuries and related medical conditions. Using a combination of dynamic classroom learning and clinical experience, this program will set a foundation that will aid in the pursuit of a multitude of allied healthcare professions. Completion of this degree will also prepare students for further study or to obtain employment as an entry-level rehabilitation/allied health paraprofessional. Earning this degree may facilitate the student's transfer to a CSU and/or professional program. Students must attain a grade of "C" or higher in each course for successful completion of the degree.

To acquire the **Associate of Science Degree in Kinesiology/Sports Medicine**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 30.0
KIN 197	Prevention and Treatment of Athletic Injuries	3.0
KIN 297	Advanced Athletic Training*	3.0
KIN 290	Work Experience Education/Internship for Athletic Training-Related Fields*	4.0
KIN 193	Standard First Aid, C.P.R., and A.E.D.	3.0
KIN 122	Nutrition for Sport and Fitness	3.0
KIN 126	Principles of Strength and Conditioning	3.0
PSY 101	Introductory Psychology	3.0
BIOL 125	Human Anatomy	4.0
BIOL 226	Human Physiology*	4.0
*Prerequisite		
		Total: 30.0

KINESIOLOGY/STRENGTH AND PERFORMANCE COACH Certificate of Achievement

Description

The **Strength and Performance Coach Certificate of Achievement** is designed to prepare students for employment as a professional to enhance the performance of sport and tactical (police, fire, military) athletes. It is possible to complete this certificate in one calendar year. The curriculum has been designed to equip the student with the background, both theoretical and practical, to pursue a job promoting the physical conditioning of athletes. Strength and conditioning coaches also assist with the injury prevention and proper mechanics of athletes within their specific sport.

Courses in nutrition, exercise physiology, exercise testing and prescription, first aid, strength and conditioning biomechanics/anatomy, and injury prevention will prepare the student for responsibilities in the field of strength and conditioning. The program will also expose students to other areas such as fitness, health promotion, coaching, pre-allied health, and medical fields.

To acquire the **Certificate of Achievement in Strength and Performance Coach**, it is necessary to complete the following courses:

Required Courses		Units: 22.0
KIN 122	Nutrition for Sport and Fitness	3.0
KIN 126	Principles of Strength and Conditioning	3.0
KIN 127	Exercise Physiology	3.0
KIN 128	Fitness Testing and Exercise Prescription	3.0
KIN 188	Theory of Coaching	3.0
OR		
KIN 159	Leadership in Sport	3.0
		3.0
KIN 193	Standard First Aid, C.P.R., and A.E.D.	3.0
OR		
KIN 197	Prevention and Treatment of Athletic Injuries	3.0
KIN 226	Advanced Training Principles for Sport and Tactical Athletes*	3.0
KIN 290	Work Experience Education/Internship for Athletic Training-Related Fields*	1.0
*Prerequisite		
		Total: 22.0

KINESIOLOGY/YOGA TEACHING TRAINING CERTIFICATION Certificate of Achievement

Description

The Yoga Teacher Training Certificate Program prepares students for employment as a certified yoga instructor to lead both group classes and private individual sessions. It is possible to complete this certificate in one calendar year. The curriculum has been designed to equip the student with the background, both theoretical and practical, to pursue a job in gyms, recreational centers, colleges, after school programs, and private studios. Courses include yoga laboratories, anatomy, movement analysis, instructional theory, foundational and methodological aspects of yoga, asanas (poses), sequencing, delivery, body alignment, philosophy, and working with people who have special medical needs or injuries. Yoga instructors also implement a mind-body-spirit connection, providing a supportive and nurturing environment while being mindful of individualized needs to engage the physical, mental, and spiritual bodies. The program will enable students to become Yoga Alliance certified at the 200-hour level.

To acquire the **Certificate of Achievement in Yoga Teacher Training Certification**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
KIN 145	Theory and Analysis of Fitness Instruction	2.0
KIN 146	Training Principles for Special Populations	2.0
KIN 058	Yoga Teacher Training I: Foundations*	3.0
KIN 059	Yoga Teacher Training II: Methodologies*	3.0
KINA 158	Yoga I	1.0
KINA 258	Yoga II*	1.0

*Prerequisite

Total: 12.0

LOGISTICS MANAGEMENT Associate of Science Degree

Description

This program is designed to prepare students for employment as logistics planners, transportation analysts, inventory planners, and purchasing analysts. The program will allow the student to develop organizational skills which can lead to advancement in operations management, transportation, purchasing, materials management, and supply chain. The sequence of courses will provide the student the opportunity to acquire the knowledge and skills demanded of the modern logistics specialist. The sequence in which courses are taken may be modified to meet individual needs.

To acquire the **Associate of Science Degree in Logistics Management**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 24.0-25.0
BUSL 110	Legal Environment of Business	3.0
LOG 101	Supply Chain Management	3.0
LOG 105	Purchasing Management	3.0
LOG 110	Warehouse Management	3.0
LOG 115	Inventory Management	3.0
MGMT 101	Introduction to Business	3.0
		3.0
CIT 101	Introduction to Computer Information Technology	3.0
OR		
LOG 130	Computerized Logistics	3.0

Choose one of the following courses:

		3.0-4.0
ACCT 100	Introduction to Accounting	3.0
OR		
ACCT 101	Financial Accounting	4.0
OR		
ACCT 101H	Financial Accounting Honors*	4.0

Required Subtotal 24 or 25 units

*Prerequisite

In addition to the Required Courses, students will choose from one of the following specializations or select one course from each specialization.

Units: 6.0-10.0

Transportation Specialization Courses - Total Units 34 or 35

GIS 120	Introduction to Geographic Information Systems and Spatial Analysis	4.0
LOG 120	Transportation Management	3.0
LOG 125	Contract Management	3.0

International Trade Specialization Courses - Total Unit 33 or 34

MGMT 140	Introduction to International Business	3.0
MGMT 142	International Management	3.0
MGMT 143	Import and Export Business	3.0

Operations Management Specialization - Total Units 30 or 31

LOG 135	Quality Management Concepts	3.0
MGMT 150	Principles of Management	3.0

Selecting one course from each specialization - Total Units 33 - 35**Total: 30.0-35.0**

LOGISTICS MANAGEMENT

Certificate of Achievement

Description

This certificate is designed to prepare students for entry-level employment in logistics, transportation, inventory management, purchasing and supply chain. The certificate will allow the student to develop organizational skills which can lead to advancement in operations management, transportation, purchasing, materials management, and related areas. The sequence of courses will provide the student the opportunity to acquire the knowledge and skills demanded of the modern logistics specialist. The sequence in which courses are taken may be modified to meet individual needs.

To acquire the **Certificate of Achievement in Logistics Management**, it is necessary to complete the following courses:

Required Courses		Units: 12.0
LOG 101	Supply Chain Management	3.0
LOG 105	Purchasing Management	3.0
LOG 110	Warehouse Management	3.0
LOG 115	Inventory Management	3.0
Choose two of the following courses:		Units: 6.0
LOG 120	Transportation Management	3.0
LOG 125	Contract Management	3.0
LOG 135	Quality Management Concepts	3.0
MGMT 101	Introduction to Business	3.0
MGMT 140	Introduction to International Business	3.0
MGMT 142	International Management	3.0
MGMT 143	Import and Export Business	3.0
MGMT 150	Principles of Management	3.0
		Total: 18.0

MASS COMMUNICATIONS/MASS MEDIA

Associate of Science Degree

Description

To acquire the **Associate of Science Degree in Mass Communications: Mass Media**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 31.0
ART 115	The Art of Film	3.0
JOUR 110	Digital Photojournalism I	3.0
JOUR 120	Communications Reporting and Writing	3.0
JOUR 147	Broadcast News	3.0
		3.0
LIT 147	Cinema as Literature*	3.0
OR		
LIT 147H	Cinema as Literature Honors*	3.0
MSCM 103	Survey of Motion Picture, Radio, and Television	3.0
MSCM 128	Mass Media in Modern Society	3.0
MSCM 134	Documentary Film	3.0
RDIO 104	Radio Broadcasting	3.0
TV 135	Digital Filmmaking I: Introduction	3.0
		1.0
JOUR 290	Work Experience Education/Internship for Journalism-Related Fields*	1.0

OR		
RDIO 290	Work Experience Education/ Internship for Radio-Related Fields*	1.0

*Prerequisite

Total: 31.0

MASS COMMUNICATIONS/MASS MEDIA Certificate of Achievement

Description

The Mass Communications: Mass Media Certificate is designed to provide a general technical background which will enable the student to make intelligent and realistic career decisions in mass communications; to provide a broad background which will afford the currently employed student an opportunity for upward mobility or career advancement; to provide a program to meet both the entry-level and skill upgrading needs of the local mass communications industry.

To acquire the **Certificate of Achievement in Mass Communications: Mass Media**, it is necessary to complete the following courses:

Required Courses		Units: 31.0
ART 115	The Art of Film	3.0
JOUR 110	Digital Photojournalism I	3.0
JOUR 120	Communications Reporting and Writing	3.0
JOUR 147	Broadcast News	3.0
		3.0
LIT 147	Cinema as Literature*	3.0

MATHEMATICS

Associate in Science for Transfer

Description

The **Associate in Science in Mathematics for Transfer (AS-T) Degree** is intended to meet the lower division requirements for Mathematics majors at a CSU campus that offers a Mathematics baccalaureate degree.

Mathematics is the language of the physical and technical sciences. As such, this Degree also partially satisfies the lower division requirements for a variety of baccalaureate degrees including Engineering, Physics, Computer Science and Chemistry.

In addition to the courses listed below, the following requirements must be met for completion of the Associate in Science in Mathematics for Transfer:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Mathematics major at the CSU where they seek transfer.

Required Courses:		Units: 12.0
MATH 190	Calculus I*	4.0
OR		4.0
MATH 190H	Calculus I Honors*	4.0
MATH 191	Calculus II*	4.0
MATH 250	Calculus III*	4.0
*Prerequisite		
Please select one of the following options:		Units: 8.0-9.0
Option 1: Complete both courses:		
MATH 260	Linear Algebra*	4.0
MATH 270	Differential Equations*	4.0
Option 2: Complete one of the following:		
MATH 251	Linear Algebra and Differential Equations*	5.0
MATH 260	Linear Algebra*	4.0
MATH 270	Differential Equations*	4.0
And one of the following:		
MATH 130	Statistics*	4.0
MATH 130H	Statistics Honors*	4.0
PHY 211	Physics for Scientists & Engineers - I*	4.0
CSU GE or IGETC Pattern (Units will vary)		
Transferable Electives as needed to reach 60 transferable units		
DEGREE TOTAL 60 units		

Total: 20.0-21.0

MUSIC

Associate in Arts for Transfer

Description

The Associate in Arts in Music Transfer (AA-T) Degree is intended to meet the lower division requirements for music majors (or similar majors) at a CSU campus that offers a music baccalaureate degree. This degree prepares students to transfer to a Bachelor of Arts degree program, a capstone or terminal liberal arts degree with an emphasis in music. Students develop musical proficiency in theory, musicianship, and performance on their primary instrument or voice.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Music:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Music major at the CSU where they seek transfer.

Required Courses		Units: 17.0
MUS 103	Music Theory I	3.0
MUS 104	Music Theory II*	3.0

MUS 105	Music Theory III*	3.0
MUS 106	Musicianship I	1.0
MUS 107	Musicianship II*	1.0
MUS 156	Musicianship III*	1.0
MUS 181	Applied Music ⁵	2.0
MUST 101	Introduction to Music Technology	3.0
⁵ Applied Music must be taken 4 times, for a total of 2 units (.5 unit each semester)		
The following large ensemble must be taken 4 times, for a total of 4 units (1 unit each semester)		Units: 4.0
		1.0
MUS 116	Diverse Instruments Ensemble*	1.0
OR		
MUS 120	Concert Choir *	1.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

The Music Department also recommends the completion of the following classes in Piano and History, in preparation for transfer to a California State University.

History - Choose one - MUS 130 or MUS 131

Piano - Choose one - MUS 145, MUS 146, MUS 147, or MUS 148

*Prerequisite

Total: 21.0

MUSIC: COMPOSITION, PERFORMANCE, AND IMPROVISATION OF CONTEMPORARY MUSIC PRACTICES

Associate of Arts Degree

Description

The **Associate of Arts in Music: Composition, Performance, and Improvisation of Contemporary Music Practices** is a two-year program designed to prepare students for the continued study of music and/or future professional employment in the field of music.

Students entering the program with the intent of composing, performing and improvising contemporary music gain valuable experience and performance skills by performing in, and composing for, the College's various choirs and unique multi-instrument ensembles. The various levels of study in vocal, instrumental, theory, musicianship, keyboard skills, music technology, and composition provide students with the skills necessary to excel in those areas when they complete the music program at Rio Hondo College.

To acquire the **Associate of Arts in Music: Composition, Performance, and Improvisation of Contemporary Music Practices**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education–Breadth (CSU GE) pattern, or Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Required Courses		Units: 22.0
MUST 101	Introduction to Music Technology	3.0
MUS 103	Music Theory I	3.0
MUS 104	Music Theory II*	3.0
MUS 105	Music Theory III*	3.0
MUS 206	Music Theory IV*	3.0
MUS 106	Musicianship I	1.0
MUS 107	Musicianship II*	1.0
MUS 156	Musicianship III*	1.0
MUS 157	Musicianship IV*	1.0
MUS 145	Piano I	1.0
MUS 146	Piano II*	1.0
MUS 147	Piano III*	1.0
Applied Music must be taken 4 times, for a total of 2 units (.5 units each semester)		Units: 2.0
MUS 181	Applied Music*	2.0
Choose a performance group from the following list. The selected course must be taken four times in four different semesters (4-8 units)		Units: 4.0-8.0
MUS 116	Diverse Instruments Ensemble	1.0
MUS 216	Industrial Orchestra*	2.0

MUS 120	Concert Choir	1.0
MUS 234	Advanced Chamber Singers*	2.0
*Prerequisite		
Choose one history course from the following list (3 units):		Units: 3.0
MUS 130	Music History and Literature Before 1750	3.0
MUS 131	Music History and Literature after 1750	3.0
		Total: 31.0-35.0

MUSIC AND INTEGRATED TECHNOLOGY

Associate of Science Degree

Description

This Associate of Science degree is a 21st-century program designed to prepare students with entry-level music and technology skills needed to enter the professional workplace and/or pursue further study upon transfer to a baccalaureate degree-granting institution. This forward-thinking program will create pathways for success by generating opportunities for students to compose, arrange and produce music and artists in a variety of musical styles, with an emphasis in composing for video games, film scoring, sound design, electronic music, songwriting and arranging, studio recording, and live sound reinforcement. The program provides balanced coursework in music and music technology that teaches music to the technologist and technology to the musician.

To acquire the **Associate of Science Degree in Music and Integrated Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses **Units: 27.0**

MUSIC CORE

MUS 103	Music Theory I**	3.0
MUS 104	Music Theory II#	3.0
MUS 106	Musicianship I**	1.0
MUS 107	Musicianship II#	1.0
MUS 145	Piano I	1.0

TECHNOLOGY CORE

MUST 101	Introduction to Music Technology	3.0
MUST 105	Introduction to the Music Business	3.0
MUST 115	Songwriting and Arranging I	3.0
MUST 121	Electronic Music I	3.0
MUST 141	Recording Studio I	3.0
MUST 145	Live Sound Reinforcement I	3.0

**Corequisite

#Corequisite and prerequisite

Select one of the following Music History courses: **Units: 3.0**

CONTEMPORARY MUSIC HISTORY

MUST 151	History of Electronic Music	3.0
MUS 132	History of Rock and Roll	3.0
MUS 135	Music in Film	3.0

Total: 30.0

MUSIC TECHNOLOGY/ADVANCED ELECTRONIC MUSIC

Certificate of Achievement

Description

This certificate of achievement prepares students for work in the music industry and for further study (transfer) by composing and producing electronic music in both analog and digital formats. Students learn aspects of advanced synthesis techniques, advanced modulation, and linear and non-linear compositional processes. Emphasis is placed on workflow with a digital audio workstation (DAW) and modular synthesizers, as well as the tools and techniques needed to create contemporary electronic music in a variety of styles.

To acquire the **Certificate of Achievement in Advanced Electronic Music**, it is necessary to complete the following courses:

Required Courses **Units: 18.0**

MUS 104	Music Theory II [#]	3.0
MUS 105	Music Theory III [#]	3.0
MUS 206	Music Theory IV [#]	3.0
MUS 107	Musicianship II [#]	1.0
MUS 156	Musicianship III [#]	1.0
MUS 157	Musicianship IV [#]	1.0
MUS 211	Composition Workshop I [*]	3.0
MUS 123	Electronic Music III [*]	3.0

[#]Corequisite and prerequisite

^{*}Prerequisite

Total: 18.0

MUSIC TECHNOLOGY/ADVANCED SONGWRITING AND ARRANGING Certificate of Achievement

Description

This certificate is focused on intermediate and advanced approaches to songwriting and arranging. Through a course of study, students find their professional writing voice in order to create original, commercially-viable songs. The culmination of this certificate requires a professional portfolio as the final project.

To acquire the **Certificate of Achievement in Advanced Songwriting and Arranging**, it is necessary to complete the following courses:

Required Courses		Units: 17.0
MUS 211	Composition Workshop I [*]	3.0
MUS 105	Music Theory III [*]	3.0
MUS 156	Musicianship III [#]	1.0
MUS 206	Music Theory IV [#]	3.0
MUS 157	Musicianship IV [#]	1.0
MUS 141	Recording Studio I [*]	3.0
MUS 116	Songwriting and Arranging II [*]	3.0

^{*}Prerequisite

Total: 17.0

MUSIC TECHNOLOGY/ADVANCED SOUND DESIGN Certificate of Achievement

Description

This certificate of achievement is for students who are interested in learning intermediate and advanced elements of sound design. This course of study will focus on how to design, create, and program sound events and objects successfully in a surround environment in the service of various music and media industries (e.g., the music, television/film, and video game industries). Emphasis is placed on building technical skills and interpersonal skills required for entry-level work in various collaborative situations.

To acquire the **Certificate of Achievement in Advanced Sound Design**, it is necessary to complete the following courses:

Required Courses		Units: 13.0
MUS 103	Music Theory I ^{**}	3.0
MUS 106	Musicianship I ^{**}	1.0
MUS 122	Electronic Music II [*]	3.0
MUS 126	Sound Design II [*]	3.0
MUS 142	Recording Studio II [*]	3.0

^{**}Corequisite

^{*}Prerequisite

Total: 13.0

MUSIC TECHNOLOGY/INTRODUCTORY ELECTRONIC MUSIC Certificate of Achievement

Description

This certificate of achievement prepares students for entry-level work in the music industry, or for further study through the study of composing and producing electronic music. Students will learn aspects of production, composition, synthesis, sampling, effects processing, and

workflow within a digital audio workstation (DAW), as well as the tools and techniques needed to create contemporary electronic music in a variety of styles.

To acquire the **Certificate of Achievement in Introductory Electronic Music**, it is necessary to complete the following courses:

Required Courses		Units: 17.0
MUST 101	Introduction to Music Technology	3.0
MUST 105	Introduction to the Music Business	3.0
MUST 121	Electronic Music I*	3.0
MUST 122	Electronic Music II*	3.0
MUS 103	Music Theory I**	3.0
MUS 145	Piano I	1.0
MUS 106	Musicianship I**	1.0
*Prerequisite		
**Corequisite		

Total: 17.0

MUSIC TECHNOLOGY/INTRODUCTORY SONGWRITING AND ARRANGING Certificate of Achievement

Description

This certificate of achievement prepares students for entry-level work in the music industry and introduces them to the process of songwriting and arranging. This course of study is designed for students who want to learn chord structure, form, rhythm, melody, harmony, and lyrics in a variety of contemporary and traditional styles. Students also record song demos and create lead sheets.

To acquire the **Certificate of Achievement in Introductory Songwriting and Arranging**, it is necessary to complete the following courses:

Required Courses		Units: 18.0
MUST 101	Introduction to Music Technology	3.0
MUST 105	Introduction to the Music Business	3.0
MUST 115	Songwriting and Arranging I*	3.0
MUS 103	Music Theory I**	3.0
MUS 104	Music Theory II#	3.0
MUS 106	Musicianship I**	1.0
MUS 107	Musicianship II#	1.0
MUS 145	Piano I	1.0
*Prerequisite		
**Corequisite		
#Corequisite and prerequisite		

Total: 18.0

MUSIC TECHNOLOGY/INTRODUCTORY SOUND DESIGN Certificate of Achievement

Description

This certificate of achievement is for students interested in learning the basics of sound design. This course of study introduces the physics of sound and how to manipulate, modulate, and record sound successfully in the service of various music and media industries (e.g., the music, television/film, and video game industries). Emphasis is placed on building technical skills and interpersonal skills required for various collaborative situations.

To acquire the **Certificate of Achievement in Introductory Sound Design**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
MUST 101	Introduction to Music Technology	3.0
MUST 105	Introduction to the Music Business	3.0
MUST 121	Electronic Music I*	3.0
MUST 141	Recording Studio I*	3.0
MUST 125	Sound Design I: Music, Media, and Game Audio*	3.0
*Prerequisite		

Total: 15.0

MUSIC TECHNOLOGY/LIVE SOUND ENGINEER

Certificate of Achievement

Description

This certificate of achievement prepares students for entry-level work through the study of live sound engineering. The certificate comprises courses that will prepare the student to become a live sound engineer through a course of study that includes the sound reinforcement system, the physics of sound, psychoacoustics, and audio measurements. The students will also learn the design types and uses of microphones, equalizers, mixers, signal processing and effects, loudspeakers and crossovers, and power amplifiers.

To acquire the **Certificate of Achievement in Live Sound Engineer**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
MUST 101	Introduction to Music Technology	3.0
MUST 105	Introduction to the Music Business	3.0
MUST 141	Recording Studio I*	3.0
MUST 145	Live Sound Reinforcement I†	3.0
MUST 146	Live Sound Reinforcement II*	3.0
*Prerequisite		
		Total: 15.0

MUSIC TECHNOLOGY/MUSIC COMPOSITION

Certificate of Achievement

Description

This certificate of achievement provides a focused course of study for students who want to learn the processes and techniques of composing. Emphasis is placed on preparing a music composition portfolio that can be used to prepare for further study at a baccalaureate-granting institution. This course of study also works in tandem with the Music and Integrated Technology program to teach music composition to students for the purpose of training to work as composers in the music, television/film, video game, and other media industries.

To acquire the **Certificate of Achievement in Music Composition**, it is necessary to complete the following courses:

Required Courses		Units: 18.0
MUS 103	Music Theory I**	3.0
MUS 104	Music Theory II#	3.0
MUS 105	Music Theory III#	3.0
MUS 106	Musicianship I**	1.0
MUS 107	Musicianship II#	1.0
MUS 156	Musicianship III#	1.0
MUS 211	Composition Workshop I*	3.0
MUS 212	Composition Workshop II*	3.0
**Corequisite		
#Prerequisite/Corequisite		
*Prerequisite		
		Total: 18.0

MUSIC TECHNOLOGY/MUSIC PRODUCTION

Certificate of Achievement

Description

This certificate of achievement is for students who want to learn about the process of making successful recordings. Emphasis is placed on the interpersonal skills required to interact with other musicians, songwriters, and engineers; as well as the technical skills required to make professional decisions while leading a production team. A final production portfolio is part of the capstone class and a requirement for completion of the certificate.

To acquire the **Certificate of Achievement in Music Production**, it is necessary to complete the following courses:

Required Courses		Units: 21.0
MUST 101	Introduction to Music Technology	3.0
MUST 105	Introduction to the Music Business	3.0
MUS 103	Music Theory I**	3.0

MUS 106	Musicianship I**	1.0
MUST 121	Electronic Music I*	3.0
MUST 141	Recording Studio I*	3.0
MUST 142	Recording Studio II*	3.0
MUST 191B	Music and Integrated Technology Capstone - Production*	2.0

**Corequisite

*Prerequisite

Total: 21.0

MUSIC TECHNOLOGY/RECORDING ENGINEER Certificate of Achievement

Description

This certificate of achievement teaches students proper and creative recording and audio editing techniques in a hands-on learning environment. This certificate will prepare students for entry-level work in the music and media industries.

To acquire the **Certificate of Achievement in Recording Engineer**, it is necessary to complete the following courses:

Required Courses

Units: 18.0

MUST 101	Introduction to Music Technology	3.0
MUST 105	Introduction to the Music Business	3.0
MUS 103	Music Theory I**	3.0
MUS 106	Musicianship I**	1.0
MUST 141	Recording Studio I*	3.0
MUST 142	Recording Studio II*	3.0
MUST 191A	Music and Integrated Technology Capstone - Recording*	2.0

**Corequisite

*Prerequisite

NURSING PROGRAMS OVERVIEW

DIVISION OF HEALTH SCIENCE AND NURSING

The Division of Health Science and Nursing

The Division of Health Science and Nursing offers two different types of programs: Associate Degree Nursing Program and Vocational Nursing Program. The division also offers three career certificates: Pre-Certification Nursing Assistant Course, Acute Care, and Home Health Aide. All three programs have exceptional pass rates on national exams and or state certification exams.

Associate Degree Nursing (ADN) Program

The ADN program is a two-year program designed to prepare students for employment as a registered nurse providing direct care to patients. The program is approved by the California State Board of Registered Nursing. Graduates receive an Associate in Science Degree of Nursing. Students who complete the program are qualified to take the examination leading to licensure as a Registered Nurse. In addition to the ADN program, we offer LVN to ADN Transition and a LVN-RN 30 Unit Option.

Associate Degree Nursing (LVN to ADN) Program

Licensed Vocational Nurses wishing to earn their Associate Degree in Nursing so they may qualify to take the examination for licensure as a Registered Nurse may enter the LVN to ADN Transition Program. This program is 2-1/2 semesters.

Non Degree Pathway to RN Licensure

Licensed Vocational Nurses wishing to qualify for licensure examination as a Registered Nurse but not obtain a degree may consider this 30-unit option.

The Vocational Nursing (VN) Program

The Vocational Nursing Program is a three-semester program following the completion of prerequisite courses. It is designed to prepare students for employment as a Vocational Nurse, giving care to patients in a variety of settings, such as acute hospitals, extended care facilities, home health care, surgical centers and medical offices. The program is approved by the California State Board of Vocational Nursing and Psychiatric Technicians. Students, who complete the curriculum and achieve the career certificate are qualified to apply for the examination leading to licensure as a Licensed Vocational Nurse. Students also have the option of obtaining an Associate of Science degree in Vocational Nursing.

Career Certificates Pre-Certification Nursing Assistant

This Career Certificate is designed for the student wishing to gain employment in the Acute Care, Long-Term Care or Assisted Living settings. Areas of emphasis will include taking care of geriatric patients in a long-term care setting utilizing skills in basic care, emergency care and communication. The student will gain a general core knowledge of entry-level nursing skills through classroom instruction and hands on clinical time.

Career Certificate for Acute Care Certified Nursing Assistant

This Career Certificate is designed for the student who already has their CNA Certificate wishing to gain employment in the Acute Care Hospital setting. Areas of emphasis will include taking care of patients in the acute care setting utilizing skills in basic care, emergency care, communication skills, patient assessment, observation and reporting, with additional emphasis on the specialized acute care areas of medical/surgical/orthopedics, pediatrics and obstetrics. Students will gain general core knowledge of entrylevel nursing skills through classroom instruction and hands on clinical time.

Career Certificate for Home Health Aide

This Career Certificate is designed for the student who already has their CNA Certificate wishing to gain employment in the home care setting. Areas of emphasis will include taking care of patients in the home care setting utilizing skills in basic care, emergency care, communication skills, patient assessment, observation and reporting, with additional emphasis on rehabilitative nursing care, and family relationships. Students will gain general core knowledge of entrylevel nursing skills through classroom instruction and hands on clinical time.

ADN Program Mission Statement

The Associate Degree Nursing Program (ADN) is committed to preparing students for the professional role of the registered nurse at the entry level. In addition, the aim of the program is to prepare the nursing student for academic advancement.

ADN Program Philosophy

The philosophy of the nursing program is in harmony with the mission, vision, and goals of Río Hondo College. The Associate Degree Nursing Program strives to be an exemplary nursing program that provides opportunities for students from diverse backgrounds, ethnicities and cultures, to be educated, responsible and caring community members. Graduates are prepared for licensure as registered nurses. The faculty recognizes the importance of also preparing students to practice in a variety of settings as health care delivery evolves. Teaching/learning strategies will embrace student-centered, competencybased instruction. In addition, the program has established quality improvement measures to assure that educational competencies have been met.

This nursing program embraces four major concepts to provide an organizational framework for the curriculum. The major concepts are: The Systems Developmental Stress Model, The Nursing Process, Erikson's Psycho-Social Theory of Human Development, and Quality Safety Education for Nurses.

The curriculum is designed to prepare the graduate to carry out their roles as a nurse: planner of care; provider of safe and skilled care; communicator; client teacher; and member of the profession. The faculty believes it is essential for the new graduate to be able to carry out evidence-based care with efficient use of resources. The graduate will provide continuity of care as the client moves from acute hospital-based care to care in transitional units and other healthcare settings in the community.

The conceptual threads are interlaced throughout the program and are the essential core components and competencies. These competencies include: critical thinking, personal hygiene, patient protection and safety, pain management, human sexuality, client abuse, pharmacology, nutrition, patient advocacy, legal, social and ethical aspects of nursing, and nursing leadership and management.

Theoretical concepts will be presented from simple to complex, building on learning acquisition. The faculty believes that students need to apply standards of critical thinking and competency-based learning in order to formulate sound clinical judgments. Students are offered a number of approaches to learning, including technology and computer assisted instruction in order to apply theory to a variety of clinical situations. Also, opportunities for learning are provided to students through clinical assignments in acute care, community facilities, the health science skill center, online, technology, and simulation. Learning may be facilitated by referral to support services provided by the college such as financial aid, remediation, tutoring, psychological counseling, and health services. A student-centered approach to learning will be supported by contemporary approaches to education, which provide a variety of techniques to appeal to varied learning styles. Student learning outcomes and competencies will measure student achievements. Additionally, the faculty believes that curriculum should be developed and implemented based on Knowles's Theory of Adult Learning, which holds that the adult is self-directed and a lifelong learner. Learning progress is based on the student's mastery of course competencies. Mastery results in graduates that have achieved success in meeting program outcomes and are able to successfully pass the national licensing exam. These graduates are now prepared to transition into the health care system ready for job placement or advanced degrees.

ASSOCIATE DEGREE NURSING PROGRAM (RN) GENERIC

A. ADMISSION REQUIREMENTS

1. EDUCATIONAL REQUIREMENTS FOR PROGRAM APPLICATION

- a. Proof of graduation from an accredited high school in the U.S.A. by transcript, diploma, or official international evaluation; Baccalaureate degree from an accredited institution of higher education in the U.S.A.; or documentation of passing score on the GED (General Education Development) exam.
- b. Students must meet the admission requirements for Río Hondo College.
- c. Completion of all three science prerequisites (Human Anatomy, Human Physiology, and Microbiology) with an overall Science GPA of at least a 2.5 with no grade less than "C" for each course. The student is limited to one repeat in any of the science courses to improve the grade. All science courses must be completed within 7 years from application.
- d. A cumulative college grade point average (GPA) of at least 2.5 for all college coursework taken.
- e. Applicants must meet graduate proficiency requirements for math and reading either by completing the minimal required courses or demonstrate proficiency as evaluated by a Río Hondo College counselor.
- f. Must complete English 101 College Composition and Research with a grade of C or higher.
- g. Only the first ATI TEAS score taken will be accepted. If a student has taken the ATI TEAS at another location, the first score will be accepted and must be a passing score to be eligible. TEAS test version V.0 will no longer be accepted for students entering the ADN program after January 1, 2017.

2. **HEALTH REQUIREMENTS** – The applicant must be free from communicable diseases, infections, psychological disorders, and other conditions that would prevent the successful performance of the responsibilities and tasks required in the education and training of a Registered Nurse. For patient safety and successful achievement of course objectives, all applicants must be able to hear and see with the use of assistive devices. The program will make every effort to provide reasonable accommodations for all applicants. Upon acceptance into the program, the student must satisfactorily pass a health examination by a licensed physician or nurse practitioner and have various laboratory tests and immunizations, as needed, to determine physical and mental fitness. If a student enrolled in the program has developed a condition that would prevent successful performance of his/her responsibilities and tasks, the Dean of Health Science and Nursing may require the student to be examined by a licensed physician. If the licensed physician verifies the condition, then there is sufficient cause for suspension or expulsion from the program pursuant to Board Policy. Information on specific health requirements will be provided to all applicants who are provisionally selected and those applicants who are alternates to the program.

3. **PATIENT SAFETY AND BACKGROUND CHECKS** – Based on California Board of Registered Nursing, and clinical facility policies, nursing students must have clear criminal background checks to participate in clinical courses. Specific procedures will be shared with the student provisionally accepted. The student is responsible for the cost of the background check. If the background check is not clear, the student will be responsible for obtaining documents showing rehabilitation and/or having the record corrected. The Dean of Health Science and Nursing is responsible for determining if the background check meets clinical placement requirements. See the Dean of Health Science and Nursing with questions concerning this procedure. All students will be required to undergo drug testing at their expense before caring for patients in the clinical setting. Specific procedures will be shared with the students upon admission. Evidence of drug use would jeopardize the admission of the student to the clinical setting.

B. ADMISSION PROCEDURE

1. Obtain a Río Hondo Student ID number by applying to the college. Application for admission to the College shall be submitted to the Admissions Office.
2. Attend an information session: It is recommended that applicants to the Associate Degree Nursing Program attend a nursing information session to discuss prerequisites, general education requirements for the degree, and basic skills testing.
3. Applicants must complete and submit an Associate Degree Nursing Program application to the Health Science and Nursing Division for admission consideration, when all the educational requirements are met.
4. Please check the Health Science and Nursing website for application deadlines.
5. Please include one copy of your high school diploma, GED, or official copy of your high school transcripts with your application.
6. Official transcripts for college coursework completed to date should be sent to Río Hondo College Admissions and Records Office. If you graduated from high school and/or college in another country, please have your transcripts evaluated by a private international evaluation service and bring the documentation, as well as official international transcripts, to Río Hondo College Admissions and Records Office. The international evaluation of college coursework should be a detailed report.

C. ADMISSION SELECTION

Acceptance to the Associate Degree Nursing Program will be based on selection criteria which includes the following:

1. Overall Cumulative GPA
2. Cumulative Science GPA
3. Other College Degrees
4. Current Health Care Work Experience
5. Current Medical/Nursing certificates/licenses
6. Life Experience
7. Other Language Spoken
8. ATI TEAS Results

Students will be selected on the basis of overall scores with those having the most points given priority. The student's overall cumulative GPA for all college coursework taken, grades in the core science courses (anatomy, physiology, and microbiology), completion of college English, and the number of repetitions of science core courses will be used to determine the student's eligibility. Students who have at least an overall cumulative GPA of 2.5 for all college coursework taken, GPA of 2.5 in the science core courses, with no grade less than "C" for each course, have no more than one repetition of any of the science core courses, and completed ENGL 101, with a grade of "C" or better, will be considered eligible for admission.

Students who are accepted to the program will be admitted to ADN 151 by permission of the Health Science and Nursing Division. This course is a prerequisite for admission to ADN first semester course (ADN 150) and is offered in the Spring semester and Summer session. Students who complete ADN 151 with a grade of "C" or better will continue the program in the Fall semester. Students failing the first course will not be eligible to continue the program and will need to reapply for admission.

D. EXPENSES – Uniforms, books, health and safety screenings and miscellaneous expenses will vary according to distributors and medical providers. Cost per units will depend on college fees. Please see Admissions and Records for College Fee information. Students are responsible for providing their own transportation to clinical facilities.

E. STUDENT SUPPORT: SCHOLARSHIPS AND FINANCIAL AID – Río Hondo College participates in a variety of federal and state financial aid programs. These programs are designed to assist students with tuition, fees, books/supplies, transportation, and room and board. Eligibility is limited to students who are U.S. citizens, permanent residents, or other eligible non-citizens.

Additional eligibility requirements apply to each program and information may be obtained from the Financial Aid Office. There are numerous scholarships available to Río Hondo College nursing students. These scholarships are funded and sponsored by a variety of on and off campus resources, including community hospital partners of the nursing program. Scholarships are granted based on a variety of qualifications. Scholarship information is available in the College Scholarship Office located in the Financial Aid Office or in the Health Science and Nursing Division. Short-term loans are available in emergency situations for books and supplies through the Student Activities Office or the Scholarship Office.

F. REQUIREMENT FOR LICENSURE – The Board of Registered Nursing requires a valid social security number for licensure. The Board of Registered Nursing should be consulted for qualifications for licensure for legal residents without social security cards. The Board of Registered Nursing can be reached at 916-322-3350.

G. TRANSFER STUDENTS – All transfer students who have taken coursework in nursing at another nursing program will be evaluated on an individual basis throughout the academic year. Previous nursing coursework must be no older than three years. The student must present a letter from the director of the former nursing program, stating the circumstances necessitating the transfer, and an evaluation of clinical safety. Students who are deemed unsafe in the clinical area are not eligible for transfer to the Río Hondo Associate Degree Nursing Program. Transfer students must demonstrate competence in clinical skills and pass a pharmacology math quiz with a score of 100% before admission to the program.

Above information subject to change

ASSOCIATE DEGREE NURSING PROGRAM PSYCHIATRIC TECHNICIAN TO (RN)

Determination of Eligibility for Admission to the ADN Program

Psychiatric Technicians wishing to become registered nurses follow the same admission procedures as those applicants for the associate degree nursing program. Psychiatric Technicians must also submit proof of their active California Psychiatric Technician license. PT-ADN students follow the same coursework of the ADN program as the Generic ADN students with the exception of receiving a waiver for ADN 252 and ADN 252L for prior knowledge and work as a Psychiatric Technician.

ASSOCIATE DEGREE NURSING PROGRAM LVN TO ADN

Determination of Eligibility for Admission to the LVN to ADN Program

A. ADMISSION REQUIREMENTS

1. EDUCATIONAL REQUIREMENTS FOR PROGRAM APPLICATION

- a. Proof of graduation from an accredited high school in the U.S.A. by transcript, diploma, or official international evaluation; Baccalaureate degree from an accredited institution of higher education in the U.S.A.; or documentation of passing score on the GED (General Education Development) exam.
- b. Students must meet the admission requirements for Río Hondo College.
- c. Copy of an active California Vocational Nurse license.
- d. Completion of all three science prerequisites (Anatomy, Physiology, and Microbiology) with an overall science GPA of at least a 2.5 and no grade less than a C. The student is limited to one repeat in any of the science courses to improve the grade. All science courses must be completed within the last seven years.
- e. A cumulative grade point average (GPA) of at least 2.5 for all college coursework taken.
- f. Applicants must meet the graduate proficiency requirements for math and reading either by completing the minimal required coursework or demonstrate proficiency as evaluated by a Río Hondo College counselor prior to application to the program.
- g. Only the first ATI TEAS score taken will be accepted. If a student has taken the ATI TEAS at another location, the first score will be accepted and must be a passing score to be eligible. TEAS test version V.0 will no longer be accepted.

2. **HEALTH REQUIREMENTS** – The applicant must be free from communicable diseases, infections, psychological disorders, and other conditions that would prevent the successful performance of the responsibilities and tasks required in the education and training of a Registered Nurse. For patient safety and successful achievement of course objectives, all applicants must be able to hear and see with the use of assistive devices. The program will make every effort to provide reasonable accommodations for all applicants. Upon acceptance into the program, the student must satisfactorily pass a health examination by a licensed physician or nurse practitioner and have various laboratory tests and immunizations, as needed, to determine physical and mental fitness. If a student enrolled in the program has developed a condition that would prevent successful performance of his/her responsibilities and tasks, the Dean of Health Science and Nursing may require the student to be examined by a licensed physician. If the licensed physician verifies the condition, then there is sufficient cause for suspension or expulsion from the program pursuant to Board Policy. Information on specific health requirements will be provided to all provisionally selected students and alternates.

B. ADMISSION PROCEDURE

1. Application for admission to the College shall be submitted to the Admissions Office.
2. Applicants to the Associate Degree Nursing Program should attend a nursing information session to discuss prerequisites, general education requirements for the degree, and basic skills testing. Applicants must complete and submit an Associate Degree Nursing Program application to the Health Science and Nursing Division for admission consideration, when all the educational requirements are met.
3. Please include one copy of your high school diploma, GED, or official copy of your high school transcripts with your application. If you graduated from high school and/ or college in another country, please have your transcripts evaluated by a private international evaluation service and bring the documentation, as well as official international transcripts, to Río Hondo College Admissions and Records Office. The international evaluation of college coursework should be a detailed report.

C. ADMISSION PROCESS – Acceptance to the Associate Degree LVN to ADN Nursing Program will be through the use of an admission's formula developed by the California Community College Chancellor's Office. The student's overall cumulative GPA for all college coursework taken, grades in the core science courses (anatomy, physiology, and microbiology), completion of college English, and the number of repetitions of science core courses will be used to determine the student's eligibility. Students who have at least an overall cumulative GPA of 2.5 for all college coursework taken, GPA of at least 2.5 in the science core courses, with no grade less than "C" for each course, have no more than one repetition of any of the science core courses, and completed ENGL 101, with a grade of "C" or better, will be considered eligible for admission. ADN 075 – LVN Transition into the Associate Degree Program is a prerequisite for admission to ADN second year course (ADN 251) and is offered once a year only. Following admission, the student will be given a permit to register for this course. Following completion of this course, with a grade of "C" or better, the student will continue the program.

D. EXPENSES – Uniforms, books, health and safety screenings, and miscellaneous expenses will vary according to distributors and medical providers. Cost per units will depend on college fees. Please see Admissions and Records for College Fee information. Students are responsible for providing their own transportation to clinical facilities.

E. STUDENT SUPPORT: SCHOLARSHIPS AND FINANCIAL AID – Río Hondo College participates in a variety of federal and state financial aid programs. These programs are designed to assist students with tuition, fees, books/supplies, transportation, and room and board. Eligibility is limited to students who are U.S. citizens, permanent residents, or other eligible non-citizens. Additional eligibility requirements apply to each program and information may be obtained from the Financial Aid Office. There are numerous scholarships available to Río Hondo College nursing students. These scholarships are funded and sponsored by a variety of on and off campus resources, including community hospital partners of the nursing program. Scholarships are granted based on a variety of qualifications. Scholarship information is available in the College Scholarship Office located in the Financial Aid Office or in the Health Science and Nursing Division. Short-term loans are available in emergency situations for books and supplies through the Student Activities Office or the Scholarship Office.

F. PATIENT SAFETY AND BACKGROUND CHECKS – Based on clinical facility policies, nursing students must have clear criminal background checks to participate in clinical courses. Specific procedures will be shared with the student upon admission. The student is responsible for the cost of the background check. If the background check is not clear, the student will be responsible for obtaining documents showing rehabilitation and/or having the record corrected. The Dean of Health Science and Nursing is responsible for determining if clinical placement is appropriate through consultation with the Human Resource Department at the clinical sites. Student information will be held in strictest confidence. See the Dean of Health Science and Nursing with questions concerning this procedure.

The student will be required to undergo drug testing at their expense before caring for patients in the clinical setting. Specific procedures will be shared with the student upon admission. Evidence of drug use would jeopardize the admission of the student to the clinical setting. The Board of Registered Nursing requires the applicant for licensure as a Registered Nurse to disclose prior misdemeanor and felony convictions. The applicant must explain the circumstances of the conviction and provide documentation of rehabilitation. The Board considers the nature and severity of the offense, subsequent acts, recency of acts or crimes, compliance with court sanctions, and evidence of rehabilitation in determining eligibility for licensure. Questions concerning this requirement may be directed to the Dean of Health Science and Nursing.

G. REQUIREMENT FOR LICENSURE – The Board of Registered Nursing requires a valid social security number for licensure. The Board of Registered Nursing should be consulted for qualifications for licensure for legal residents without social security cards. The Board of Registered Nursing can be reached at 916-322-3350.

Above information subject to change.

NON-DEGREE PATHWAY TO RN LICENSURE

Determination of Eligibility for Admission to the LVN-RN Program

A. ADMISSION REQUIREMENTS

1. EDUCATIONAL REQUIREMENTS FOR PROGRAM APPLICATION

- a. Proof of graduation from an accredited high school in the U.S.A. by transcript, diploma, or official international evaluation; Associate or Baccalaureate degree from an accredited institution of higher education in the U.S.A.; or documentation of passing score on the GED (General Education Development) exam.
- b. Students must meet the admission requirements for Río Hondo College.
- c. GPA of 2.5 or above in all science prerequisites (Physiology and Microbiology), with a grade "C" or better.
- d. Completion of Reading 043, ENGL 035, Math 030, or equivalent, with a grade "C" or better, or demonstration of proficiency as evaluated by a Río Hondo College counselor.
- e. Current CPR Card (BLS 8-hour class for health care providers, all ages, 1-person, 2-person rescuer) provided by the American Heart Association will be required after admission.
- f. Only the first ATI TEAS score taken will be accepted. If a student has taken the ATI TEAS at another location, the first score will be accepted and must be a passing score to be eligible. TEAS test version V.0 is no longer accepted.

2. **HEALTH REQUIREMENTS** – The applicant must be free from communicable diseases, infections, psychological disorders, and other conditions that would prevent the successful performance of the responsibilities and tasks required in the education and training of a Registered Nurse. For patient safety and successful achievement of course objectives, all applicants must be able to hear and see with the use of assistive devices. The program will make every effort to provide reasonable accommodations for all applicants. Upon acceptance into the program, the student must satisfactorily pass a health examination by a licensed physician or nurse practitioner and have various laboratory tests and immunizations, as needed, to determine physical and mental fitness. If a student enrolled in the program has developed a condition that would prevent successful performance of his/her responsibilities and tasks, the Dean of Health Science and Nursing may require the student to be examined by a licensed physician. If the licensed physician verifies the condition, then there is sufficient cause for suspension or expulsion from the program pursuant to Board Policy. Information on specific health requirements will be provided to the provisionally accepted student.

B. ADMISSION PROCEDURE

1. Application for admission to the College shall be submitted to the Admissions Office for the purpose of obtaining a student ID.
2. It is strongly recommended that all students considering the the 30 Unit Option LVN to RN Program should attend a nursing information session to discuss the restrictions of this option and required prerequisites. Applicants must complete and submit an application to the Health Science and Nursing Division for admission consideration to the 30 unit Option LVN to RN Program.
3. Please include one copy of your high school diploma, GED, or official copy of your high school transcripts with your application. If you graduated from high school and/or college in another country, please have your transcripts evaluated by a private international evaluation service and bring the documentation, as well as official international transcripts, to the Counseling Department. The international evaluation of college coursework should be a detailed report.

C. ADMISSION SELECTION – Acceptance to the 30 Unit Option will be through the use of an admission's formula developed by the California Community College Chancellor's Office. The student's overall cumulative GPA for all college coursework taken, grades in the core science courses (physiology and microbiology), and the number of repetitions of science core courses will be used to determine the student's eligibility. Students who have at least an overall cumulative GPA of 2.5 for all college coursework taken, GPA of at least 2.5 in the science core courses, with no grade less than "C" for each course, have no more than one repetition of any of the science core courses, will be considered eligible for admission. ADN 075 – LVN Transition into the Associate Degree Program is a prerequisite for admission to ADN second year course (ADN 251) and is offered only once a year. Following admission, the student will be given a permit to register for this course. Following completion of this course, with a grade of "C" or better, the student will continue the program.

D. EXPENSES – Uniforms, books, health and safety screenings and miscellaneous expenses will vary according to distributors and medical providers. Cost per units will depend on college fees. Please see Admissions and Records for College Fee information. Students are responsible for providing their own transportation to clinical facilities.

E. STUDENT SUPPORT: SCHOLARSHIPS AND FINANCIAL AID – Río Hondo College participates in a variety of federal and state financial aid programs. These programs are designed to assist students with tuition, fees, books/supplies, transportation, and room and board. Eligibility is limited to students who are U.S. citizens, permanent residents, or other eligible non-citizens. Additional eligibility requirements apply to each program and information may be obtained from the Financial Aid Office. There are numerous scholarships available to Río Hondo College nursing students. These scholarships are funded and sponsored by a variety of on and off campus resources, including community hospital partners of the nursing program. Scholarships are granted based on a variety of qualifications. Scholarship information is available in the College Scholarship Office located in the Financial Aid Office or in the Health Science and Nursing Division. Short-term loans are available in emergency situations for books and supplies through the Student Activities Office or the Scholarship Office.

F. PATIENT SAFETY AND BACKGROUND CHECKS – Based on clinical facility policies, nursing students must have clear criminal background checks to participate in clinical courses. Specific procedures will be shared with the student upon admission. The student is responsible for the cost of the background check. If the background check is not clear, the student will be responsible for obtaining documents showing rehabilitation and/ or having the record corrected. The Dean of Health Science and Nursing is responsible for determining if clinical placement is appropriate through consultation with the Human Resource Department at the clinical sites. Student information will be held in strictest confidence. See the Dean of Health Science and Nursing with questions concerning this procedure.

The student will be required to undergo drug testing at their expense before caring for patients in the clinical setting. Specific procedures will be shared with the student upon admission. Evidence of drug use would jeopardize the admission of the student to the clinical setting. The Board of Registered Nursing requires the applicant for licensure as a Registered Nurse to disclose prior misdemeanor and felony convictions. The applicant must explain the circumstances of the conviction and provide documentation of rehabilitation. The Board considers the nature and severity of the offense, subsequent acts, recency of acts or crimes, compliance with court sanctions, and evidence of rehabilitation in determining eligibility for licensure. Questions concerning this requirement may be directed to the Dean of Health Science and Nursing.

G. REQUIREMENT FOR LICENSURE – The Board of Registered Nursing requires a valid social security number for licensure. The Board of Registered Nursing should be consulted for qualifications for licensure for legal residents without social security cards. The Board of Registered Nursing can be reached at 916-322-3350.

Above information subject to change.

VOCATIONAL NURSING PROGRAM

The Vocational Nursing Program is a two and a half semester program following the completion of prerequisite courses. It is designed to prepare students for employment as a Vocational Nurse, giving care to patients in a variety of settings, such as acute hospitals, extended care facilities, home health care, surgical centers and medical offices. The program is accredited by the California State Board of Vocational Nursing and Psychiatric Technicians. Students, who complete the curriculum and achieve the career certificate are qualified to apply for the examination leading to licensure as a Licensed Vocational Nurse.

Philosophy of the Vocational Nursing Program

The philosophy of the Vocational Nursing Program is in harmony with the stated philosophy of Río Hondo College. The faculty recognizes the individual worth and potential of all students. Students come from a variety of backgrounds, age, sex, culture, lives and educational experience. The application of theoretical concepts occurs in the Health Science and Nursing Skill Center and the community clinical facilities. College support services include: financial aid, remediation, tutoring, psychological counseling and health services.

The conceptual framework of the Vocational Nursing curriculum focuses on the Medical Model, utilizing all aspects of the nursing process. The faculty believes that nursing is concerned with the promotion of health and wellness, and strives to provide a maximum quality of life. The Nursing curriculum includes the current health care delivery system; safety; therapeutic communication; patient teaching; nutrition; pharmacology, cultural diversity, gerontology, human sexuality, mental health, growth and development; reproduction; legal and ethical issues, and professional development, as applied to the Vocational Nurse.

Nursing is a broad occupational field involving a multiplicity of functions performed by individuals, with varying degrees of preparation. It is essential that students be assisted to recognize and accept their responsibility and scope of practice.

The nursing faculty believes education is a continuing process and students should be provided with the attitudes, skills and knowledge to qualify for licensure as well as an upward mobility to the Vocational Nursing Program.

DETERMINATION OF ELIGIBILITY FOR ADMISSION TO THE LVN PROGRAM

A. ADMISSION REQUIREMENTS

1. Educational requirements for program application

- a. Proof of graduation from an accredited high school in the U.S.A. by transcript, diploma, or official international evaluation; Associate or Baccalaureate degree from an accredited institution of higher education in the U.S.A.; or documentation of passing score on the GED (General Education Development) exam.
- b. Students must meet the admission requirements for Río Hondo College.
- c. Completion of HS 60 or Anatomy with a grade of "C" or better.

- d. Completion of Psychology 101 with a grade of "C" or better.
- e. Completion of READ 043, ENGL 035, MATH 030, 030D or 033 or equivalent, with a grade of "C" or better, or demonstration of proficiency as evaluated by a Río Hondo College counselor.
- f. Current CPR Card (BLS 8-hour class for health care providers, all ages, 1-person, 2-person rescuer) provided by the American Heart Association will be required after admission.

2. **HEALTH REQUIREMENTS** – The applicant must be free from communicable diseases, infections, psychological disorders, and other conditions that would prevent the successful performance of the responsibilities and tasks required in the education and training of a Licensed Vocational Nurse. Upon acceptance into the program, the student must satisfactorily pass a health examination by a licensed physician or nurse practitioner and have various laboratory tests and immunizations, as needed, to determine physical and mental fitness. If a student enrolled in the program has developed a condition that would prevent successful performance of his/her responsibilities and tasks, the Dean of Health Science and Nursing may require the student to be examined by a licensed physician. If the licensed physician verifies the condition, then there is sufficient cause for suspension or expulsion from the program pursuant to Board Policy. Information on specific health requirements will be provided to the student upon admission to the program.

B. ADMISSION PROCEDURE

1. Application for admission to the College shall be submitted to the Admissions Office.
2. Applicants to the Vocational Nursing Program should attend a nursing information session to discuss prerequisites, general education requirements for the degree, and basic skills testing. Applicants must complete and submit a Vocational Nursing Program application to the Health Science and Nursing Division for admission consideration, when all the educational requirements are met.
3. The Vocational Nursing Program has once a year entry.
4. The Counseling Department will evaluate academic records and complete an admissions card. Please bring one official copy of your high school transcripts, diploma or GED, and transcripts for college work completed to date to the Health Science and Nursing Division. If you graduated from high school and/or college in another country, please have your transcripts evaluated by a private international evaluation service and bring the documentation, as well as official international transcripts, to the Health Science and Nursing Division. The international evaluation of college coursework should be a detailed report.
5. All applicants will be notified in writing regarding acceptance.

C. ADMISSION PROCESS – Acceptance to the Vocational Nursing Program is done using a random selection from all qualified applicants. This selection process is in accordance with the State Board of Vocational and Psychiatric Technicians and the California Community College Chancellor's Office. Only applicants meeting the requirements will be placed in the pool for selection. Each class selection will be completed using the above process. Student will be notified in writing by the Health Science and Nursing Division of permission to register.

D. Uniforms, books, health and safety screenings and miscellaneous expenses will vary according to distributors and medical providers. Cost per units will depend on college fees. Please see Admissions and Records for College Fee information. Students are responsible for providing their own transportation to clinical facilities.

E. STUDENT SUPPORT: SCHOLARSHIPS AND FINANCIAL – Río Hondo College participates in a variety of federal and state financial aid programs. These programs are designed to assist students with tuition, fees, books/supplies, transportation and room and board. Eligibility is limited to students who are U.S. citizens, permanent residents, or other eligible non-citizens. Additional eligibility requirements apply to each program and information may be obtained from the Financial Aid Office. There are numerous scholarships available to Río Hondo College nursing students. These scholarships are funded and sponsored by a variety of on and off campus resources, including community hospital partners of the nursing program. Scholarships are granted based on a variety of qualifications. Scholarship information is available in the College Scholarship Office located in the Financial Aid Office or in the Health Science and Nursing Division. Short-term loans are available in emergency situations for books and supplies through the Student Activities Office or the Scholarship Office.

F. PATIENT SAFETY AND BACKGROUND CHECKS – Based on clinical facility policies, nursing students must have clear criminal background checks to participate in clinical courses. Specific procedures will be shared with the student upon admission. The student is responsible for the cost of the background check. If the background check is not clear, the student will be responsible for obtaining documents showing rehabilitation and/or having the record corrected. The Dean of Health Science and Nursing is responsible for determining if clinical placement is appropriate through consultation with the Human Resource Department at the clinical sites. Student information will be held in strictest confidence. See the Dean of Health Science and Nursing with questions concerning this procedure.

The student will be required to undergo drug testing at their expense before caring for patients in the clinical setting. Specific procedures will be shared with the student upon admission. Evidence of drug use would jeopardize the admission of the student to the clinical setting.

The Board of Vocational Nursing and Psychiatric Technicians requires the applicant for licensure as a Vocational Nurse to disclose prior

misdeemeanor and felony convictions. The applicant must explain the circumstances of the conviction and provide documentation of rehabilitation. The Board considers the nature and severity of the offense, subsequent acts, recency of acts or crimes, compliance with court sanctions, and evidence of rehabilitation in determining eligibility for licensure. Questions concerning this requirement may be directed to the Dean of Health Science and Nursing.

G. REQUIREMENT FOR LICENSURE – The Board of Vocational Nursing and Psychiatric Technicians requires a valid social security number for licensure. The Board of Vocational Nursing and Psychiatric Technicians should be consulted for qualifications for licensure for legal residents without social security cards. The Board of Vocational Nursing and Psychiatric Technicians can be reached at 916-263-7800.

H. TRANSFER STUDENTS – All transfer students who have taken coursework in nursing at another nursing program will be evaluated on an individual basis. Previous nursing coursework must be no older than five years. The student must present a letter from the director of the former nursing program, stating the circumstances necessitating the transfer, and an evaluation of clinical safety. Students who are deemed unsafe in the clinical area are not eligible for transfer to the Río Hondo Vocational Nursing Program.

Above information subject to change.

NURSING GENERIC STUDENT (Option #1) Associate of Science Degree

Description

The two-year Associate of Science in Nursing Degree program is designed to prepare students for employment as a registered nurse, providing direct care to patients. Graduates receive an Associate of Science Degree in Nursing. The program is accredited by the California Board of Registered Nursing (B.R.N.). Students who complete the curriculum are qualified to take the examination leading to licensure as a registered nurse.

To acquire the **Associate of Science in Nursing Degree**, students must complete one of the following: Río Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

GENERAL EDUCATION COURSES REQUIRED BY THE BOARD OF REGISTERED NURSING (BRN) FOR LICENSURE

Units: 30.5

Prerequisites (Anatomy, Physiology, Microbiology, and English 101) must be completed prior to applying to the Associate Degree Nursing program. Due to the intensity of the Nursing Program, it is highly recommended that all general education requirements be completed prior to entry.

BIOL 125	Human Anatomy	4.0
BIOL 226	Human Physiology*	4.0
BIOL 222	Microbiology*	5.0
ENGL 101	College Composition and Research*	3.5
CHEM 110	Chemistry for Allied Health Majors**	5.0
		3.0
PSY 101	Introductory Psychology	3.0

		Total: 51.0

NURSING/PSYCHIATRIC TECHNICIAN TO RN (Option #3) Associate of Science Degree

Description

The two-year Associate of Science in Nursing Degree program is designed to prepare students for employment as a registered nurse, providing direct care to patients. Graduates receive an Associate of Science in Nursing Degree. The program is approved by the California Board of Registered Nursing (B.R.N.). Students who complete the curriculum are qualified to take the examination leading to licensure as a registered nurse. For students who seek to complete option #3, a current California psychiatric technician license is required.

To acquire the **Associate of Science in Nursing Degree**, students must complete one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

GENERAL EDUCATION COURSES REQUIRED BY THE BOARD OF REGISTERED NURSING (BRN) FOR LICENSURE

Prerequisites (Anatomy, Physiology, Microbiology, and English 101) must be completed prior to applying to the Associate Degree Nursing program.

NURSING/ NON DEGREE PATHWAY TO RN LICENSURE 30 UNIT OPTION LVN TO RN

Description

This one-year program is for the applicant with a valid California Vocational Nurse license. The Vocational Nurse who completes thirty additional units beyond the LVN curriculum qualifies to take the licensing examination as a Registered Nurse. **This option does not lead to an Associate Nursing Degree.**

The program is designed to prepare students for employment as a Registered Nurse, providing direct care to patients. The student should be aware that they may not change their status as a 30 unit option RN with the Board of Registered Nursing at any time after licensure. Individuals who become licensed as Registered Nurses using this option may not be eligible for licensure in states other than California or for any advanced degrees. The program is accredited by the California Board of Registered Nursing.

Prerequisites / Corequisites		Units: 9.0
BIOL 226	Human Physiology*	4.0
BIOL 222	Microbiology*	5.0

CHEM 110 is a prerequisite to BIOL 222 and BIOL 226 and meets the AS degree requirement for a natural science with lab.

*Prerequisite

Permission to register for the following course is granted only to students admitted to the program. Note: This course is offered in the Summer session only.		Units: 2.5
ADN 075	LVN Transition into the Associate Degree Nursing Program*	2.5
COURSES REQUIRED AFTER PROGRAM ADMISSION-BY PERMIT ONLY		Units: 18.0

FALL SEMESTER

ADN 250	Advanced Pharmacology*	1.0
ADN 251	Medical /Surgical Nursing II*	2.0
ADN 251L	Medical/Surgical Nursing II Lab*	2.5
ADN 252	Psychiatric/ Mental Health Nursing*	2.0
ADN 252L	Psychiatric/Mental Health Nursing Lab*	1.5

Required Subtotal - 9

SPRING SEMESTER

ADN 253	Medical/Surgical Nursing III*	2.0
ADN 253L	Medical/Surgical Nursing III Lab*	3.0
ADN 254	Leadership and Management in Nursing*	1.5
ADN 254L	Leadership and Management in Nursing Lab*	2.5

*The Board of Registered Nursing (BRN) requires these courses be completed to be eligible to take the RN Licensing Examination. All of these courses must be completed with a grade of "C" or better.

Total: 29.5

NURSING/VOCATIONAL NURSING PROGRAM

Associate of Science Degree

Description

The Vocational Nursing Program is offered as an Associate of Science Degree or as a Certificate of Achievement. Students opting for the Associate of Science Degree should have all the General Education requirements completed prior to entering the Vocational Nursing Program.

The **Vocational Nursing Program** is a two and half semester program following completion of prerequisite courses. It is designed to prepare students for employment as staff nurses, giving care to patients in a variety of settings, such as extended care facilities, home health care, surgical centers and medical offices. The program is approved by the California State Board of Vocational Nursing and Psychiatric Technicians. Students who complete the curriculum and achieve the certificate of completion, are qualified to take the examination leading to licensure as a Licensed Vocational Nurse.

A 2.5 or better grade point average in all college work attempted is required for completion of the program and qualification to take the examination leading to licensure as a Licensed Vocational Nurse.

To acquire the **Associate of Science Degree in Vocational Nursing**, students must complete one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Prerequisites		Units: 16.5
HS 060	Health Science Core*	5.0
		3.0
PSY 101	Introductory Psychology	3.0
OR		
PSY 101H	Introductory Psychology Honors*	3.0
VN 061	Basic Fundamentals of Nursing*	3.5
VN 061L	Basic Fundamentals of Nursing Laboratory*	5.0

(VN 061 and 061L are offered once per year by permit)

NURSING/VOCATIONAL NURSING PROGRAM

Certificate of Achievement

Description

The Vocational Nursing Program is offered as an Associate of Science degree or as a Certificate of Achievement. Students opting for the associate degree should have all the General Education requirements completed prior to entering the Vocational Nursing Program.

The **Vocational Nursing Program** is a two-and-a-half semester program following completion of prerequisite courses. It is designed to prepare students for employment as staff nurses, giving care to patients in a variety of settings, such as extended care facilities, home health care, surgical centers and medical offices. The program is approved by the California Board of Vocational Nursing and Psychiatric Technicians (BVNPT). Students who complete the curriculum and achieve the certificate of completion are qualified to take the examination leading to licensure as a licensed vocational nurse.

A 2.5 or better grade point average in all college work attempted is required for completion of the program and qualification to take the examination leading to licensure as a licensed vocational nurse.

To acquire the **Certificate of Achievement in Vocational Nursing**, it is necessary to complete the following courses:

Prerequisites		Units: 16.5
HS 060	Health Science Core*	5.0
PSY 101	Introductory Psychology	3.0
OR		
PSY 101H	Introductory Psychology Honors*	3.0
VN 061	Basic Fundamentals of Nursing*	3.5
VN 061L	Basic Fundamentals of Nursing Laboratory*	5.0

(VN 061 and 061L are offered once per year by permit)

*Prerequisite

COURSES REQUIRED AFTER PROGRAM ADMISSION

Units: 35.5

FALL SEMESTER

VN 071L	Introduction to Medical-Surgical Nursing Lab*	3.5
VN 072L	Intermediate Medical-Surgical Nursing Lab*	3.5
VN 073	Basic Pharmacology*	2.0
VN 074	Nursing Care of Patients with Integumentary/Orthopedic Problems and Concepts of Gerontologic Nursing*	2.5

NURSING*/CERTIFIED NURSE ASSISTANT ACUTE CARE Career Certificate

Description

This Career Certificate is designed for the student who already has their CNA Certificate wishing to gain employment in the Acute Care Hospital setting. Areas of emphasis will include taking care of patients in the acute care setting utilizing skills in basic care, emergency care, communication skills, patient assessment, observation and reporting, with additional emphasis on the specialized acute care areas such as medical/surgical/orthopedics, pediatrics and obstetrics. Students will gain general core knowledge of entry-level nursing skills through classroom instruction and hands on clinical time.

Required Courses		Units: 3.0
HS 051	Certified Nurse Assistant Acute Care Training Course*	1.5
HS 051L	Certified Nurse Assistant Acute Care Training Course Lab*	1.5
*Prerequisite		
		Total: 3.0

NURSING*/HOME HEALTH AIDE Career Certificate

Description

This Career Certificate is designed for the student who already has their CNA wishing to gain employment in the home care setting. Areas of emphasis will include taking care of patients in the home care setting utilizing skills in basic care, emergency care, communication skills, patient assessment, observation and reporting, with additional emphasis on rehabilitative nursing care, and family relationships. Students will gain general core knowledge of entry-level nursing skills through classroom instruction and hands on clinical time.

Required Courses		Units: 2.5
HS 052	Home Health Aide Training Course*	1.5
HS 052L	Home Health Aide Training Course Lab*	1.0
*Prerequisite		
		Total: 2.5

NURSING*/NURSE ASSISTANT PRE-CERTIFICATION TRAINING COURSE Career Certificate

Description

This Career Certificate is designed for the student wishing to gain employment in the Acute Care, Long-Term Care or Assisted Living settings. Areas of emphasis will include taking care of geriatric patients in a long-term care setting utilizing skills in basic care, emergency care and communication. The student will gain a general core knowledge of entry-level nursing skills through classroom instruction and hands on clinical time.

Required Courses		Units: 6.5
HS 050	Nurse Assistant Pre-Certification Training Course	4.0
HS 050L	Nurse Assistant Pre-Certification Training Course Lab	2.5
		Total: 6.5

NUTRITION and DIETETICS Associate in Science for Transfer

Description

The **Associate in Science in Nutrition and Dietetics for Transfer (AS-T) Degree** is intended to meet the lower division requirements for Nutrition and Dietetics majors (or similar majors) at a CSU campus that offers a Nutrition and Dietetics baccalaureate degree. This degree is designed for students interested in an introduction to the field of Nutrition and Dietetics and for students looking to further their understanding of nutrition and health. These courses will provide students with a solid foundation in nutrition that will serve them either for transferring or in the workplace.

In addition to the courses listed below, the following requirements must be met for completion of the AS-T Degree in Nutrition and Dietetics:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Nutrition and Dietetics major at the CSU where they seek transfer.

Required Courses		Units: 19.0
NUTR 110	Introduction to Nutrition Science	3.0
		3.0
PSY 101	Introductory Psychology	3.0
OR		
PSY 101H	Introductory Psychology Honors*	3.0
CHEM 130	General Chemistry I*	5.0
BIOL 222	Microbiology*	5.0
NUTR 120	Principles of Foods with Lab	3.0
LIST A: Choose two courses (8-10 units)		Units: 8.0-10.0
CHEM 140	General Chemistry II*	5.0
CHEM 230	Organic Chemistry I*	5.0
BIOL 125	Human Anatomy	4.0
BIOL 226	Human Physiology*	4.0
		4.0
MATH 130	Statistics*	4.0

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

*Prerequisite

Total: 27.0-29.0

ORTHOPEDIC TECHNICIAN PROGRAM

Certificate of Achievement

Description

This program of study will provide students with in-depth knowledge and skills necessary to work as an orthopedic technician. Skills include immobilization, traction, casting, splitting, and assisting physicians with orthopedic care. The program of study requires all applicants to complete biology 125 with a grade of C or better, and passing of the reading and math assessment tests scoring above Reading 023 and English 035 prior to application. Following acceptance into the Orthopedic Technician program, the students will complete four core orthopedic courses. In total the program of study is 19 units. Upon completion of the program, students will receive a Certificate of Achievement and be eligible to take the national certification exam through the National Board of Certified Orthopedic Technicians (NBCOT).

To acquire the **Certificate of Achievement in the Orthopedic Technician Program**, it is necessary to complete the following courses:

Required Courses		Units: 19.0
BIOL 125	Human Anatomy	4.0
ORTH 040	Introduction to Orthopedic Technology*	4.0
ORTH 050	Orthopedic Technician Health Assessment*	3.0
ORTH 060	Orthopedic Technician Modalities*	4.0
ORTH 070	Orthopedic Technician Practicum*	4.0
*Prerequisite		
		Total: 19.0

PHILOSOPHY

Associate in Arts for Transfer

Description

The **Associate in Arts in Philosophy for Transfer (AA-T)** is intended to meet the lower division requirements for philosophy majors (or similar majors) at a CSU campus that offers a philosophy baccalaureate degree. The course of study provides a broad introduction to philosophy for those interested in building a foundation for an eventual bachelor's degree in philosophy, or for those seeking a structured exploration of philosophy for other reasons.

In addition to the courses listed below, the following requirements must be met to complete the AA-T in Philosophy:

1. Completion of a minimum of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework (some majors may require a higher GPA. Students should consult with a counselor for more information).
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern or the Intersegmental General Education Transfer Curriculum (IGETC) pattern

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted for the philosophy major at the Cal State University to which they seek to transfer. Students planning on transferring to a CSU are strongly advised to take PHIL 115 (Symbolic Logic) to prepare for further study.

Required courses (3 units) Choose one course from the following list:		Units: 3.0
PHIL 112	Introduction to Logic	3.0
OR		
PHIL 112H	Introduction to Logic Honors*	3.0
OR		
PHIL 115	Symbolic Logic	3.0
Required courses (3 units) Choose one course from the following list:		Units: 3.0
PHIL 101	Introduction to Philosophy	3.0
OR		

PHIL 101H	Introduction to Philosophy Honors*	3.0
OR		
PHIL 120	Introduction to Ethics	3.0

*Prerequisite

LIST A (3 units) Choose one course from the following list, or any course not already selected from above: Units: 3.0

		3.0
PHIL 110	Critical Thinking	3.0
OR		
PHIL 110H	Critical Thinking Honors	3.0
PHIL 124	History of Philosophy: Ancient	3.0
PHIL 126	History of Philosophy: Modern	3.0

LIST B (6 units) Choose two courses from the following list or any course not already selected from above: Units: 6.0

PHIL 102	Introduction to Philosophy: Global Perspectives	3.0
		3.0
PHIL 128	Introduction to Political Philosophy	3.0
OR		
PHIL 128H	Introduction to Political Philosophy Honors	3.0

PHOTOGRAPHY Associate of Arts Degree

Description

The Associate of Arts in Photography provides students with a foundational knowledge of important conceptual and technical aspects of fine art photography with the goal of preparing students to transfer to a four-year university. The courses in this degree emphasize photography as a means of communication and personal expression, with an emphasis on cultural significance and visual literacy.

Students planning to prepare for a four-year degree in photography should consult the lower division requirements of the university to which they plan to transfer.

To acquire the **Associate of Arts in Photography**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education–Breadth (CSU GE) pattern, or Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Required Courses Units: 30.0

		3.0
ART 105	Survey of Western Art: Prehistory through the Middle Ages	3.0
OR		
ART 105H	Survey of Western Art: Prehistory through the Middle Ages Honors*	3.0
		3.0
ART 106	Survey of Western Art: Renaissance to Contemporary	3.0
OR		
ART 106H	Survey of Western Art: Renaissance to Contemporary Honors*	3.0
ART 120	Two-Dimensional Design	3.0
ART 121	Three-Dimensional Design	3.0
ART 130	Freehand Drawing I	3.0

GDSN 178	Digital Imaging Design	3.0
PHTO 110	Introduction to Digital Photography	3.0
PHTO 130	Beginning Photography	3.0
		3.0
PHTO 111	Intermediate Digital Photography *	3.0
OR		
PHTO 131	Intermediate Photography *	3.0
PHTO 140	Introduction to Lighting	3.0
*Prerequisite		

Total: 30.0

PHYSICS **Associate Degree for Transfer**

Description

The **Associate in Science in Physics for Transfer (AS-T) Degree** is intended to meet the lower division requirements for Physics and Physics Education majors at a CSU campus that offers a Physics baccalaureate degree.

Physics will prepare those students interested in laying a foundation for further study and for a Bachelor's Degree in Physics and Physics Education. Since physics is the most basic of sciences, this degree will also satisfy the lower division requirements for a variety of baccalaureate degrees including, Engineering, Chemistry, Mathematics, and Computer Science.

In addition to the courses listed below, the following requirements must be met for completion of the AS-T Degree in Physics:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Physics major at the CSU where they seek transfer.

Required Courses		Units: 24.0
PHY 211	Physics for Scientists & Engineers - I*	4.0
PHY 212	Physics for Scientists & Engineers - II*	4.0
PHY 213	Physics for Scientists & Engineers - III*	4.0
		4.0
MATH 190	Calculus I*	4.0

PHYSICS - UC TRANSFER PATHWAY

Associate in Science Degree

Description

The **Associate in Science in Physics for UC Transfer Degree** is intended for Rio Hondo College students planning to transfer to the University of California (UC) system as physics majors. Along with completing the degree requirements, students must comply with the following in order to be guaranteed admission* to a UC campus participating in the Transfer Admission Guarantee (TAG) program:

1. Complete all of the physics major preparation coursework as outlined in this degree with a "C" grade or better in each course.
2. Complete the Intersegmental General Education Transfer Curriculum (IGETC) requirements with the deferment of two courses in Area 3 (Arts and Humanities) and two courses in Area 4 (Social and Behavioral Sciences) of the IGETC. These deferred courses are to be completed at the UC after transfer.
3. Complete a TAG application to a participating UC campus by the deadline set by the UC system.
4. Complete the individual TAG requirements for said UC Campus by the deadlines set by the UC system.
5. Maintain or exceed the GPA requirements as outlined in the TAG agreement the student has made at said UC campus for their completed and remaining coursework before transfer.**
6. Complete their application for admission to said UC campus by the deadline set by the UC system.

Students are highly encouraged to work with a Rio Hondo College STEM Counselor for assistance in completion of this degree.

*Please note that receiving this degree alone does not guarantee admission to the UC system. A student may submit a TAG application to only one UC campus.

**A student may still be awarded this degree by meeting the local GPA requirements at Rio Hondo College.

Required Physics Courses		Units: 12.0
PHY 211	Physics for Scientists & Engineers - I*	4.0
PHY 212	Physics for Scientists & Engineers - II*	4.0
PHY 213	Physics for Scientists & Engineers - III*	4.0
Required Chemistry Courses		Units: 10.0
CHEM 130	General Chemistry I*	5.0
CHEM 140	General Chemistry II*	5.0
Required Mathematics Courses		Units: 12.0
MATH 190	Calculus I*	4.0
OR		
MATH 190H	Calculus I Honors*	4.0
MATH 191	Calculus II*	4.0
MATH 250	Calculus III*	4.0
In addition to the required mathematics courses above, please choose one of the following options:		Units: 5.0-8.0
MATH 251	Linear Algebra and Differential Equations*	4.0-5.0
OR		
MATH 260	Linear Algebra*	4.0
OR		
MATH 270	Differential Equations*	4.0

*Prerequisite

Total: 39.0-42.0

POLICE ACADEMY MODULE I

Certificate of Achievement

Description

The Police Officer Training Certificate of Achievement is a program that is designed to prepare students to become entry-level police officers in local and state law enforcement agencies in California. This training course includes 42 learning domains, which includes instruction in leadership, professionalism and ethics, the criminal justice system, policing in the community, introduction to criminal law, laws of arrest, search and seizure, presentation of evidence, investigative report writing, vehicle operations, use of force, traffic enforcement, crime scenes, evidence, forensics, custody, arrest methods, First Aid/CPR, firearms, chemical agents, information systems, crimes against the justice system, cultural diversity/discrimination, and procedural justice. This course also meets the certification requirements of the Commission on Peace Officer Standards and Training (POST).

To acquire the **Certificate of Achievement in Police Academy Module I**, it is necessary to complete the following courses:

Required Courses		Units: 21.5
PAC 075D	Basic Course - Module I (Ext)*	21.5
OR		21.5
PAC 075G	Basic Academy Intensive Modular I*	21.5

*Prerequisite

Total: 21.5

POLICE ACADEMY MODULE II AND III

Certificate of Achievement

Description

The Police Officer Training Certificate of Achievement is a program designed to prepare students to become entry-level police officers in local and state law enforcement agencies in California. This training course comprises 42 learning domains, including instruction in leadership, professionalism and ethics, the criminal justice system, policing in the community, introduction to criminal law, laws of arrest, search and seizure, presentation of evidence, investigative report writing, emergency vehicle operations, de-escalation and use of force training, traffic enforcement, crime scene investigation and evidence collection, forensics, custody, arrest and control methods, first aid/CPR, firearms, chemical agents, information systems, crimes against the justice system, cultural diversity/discrimination, and procedural justice. The course meets the certification requirements of the Commission on Peace Officer Standards and Training (POST).

To acquire the **Certificate of Achievement in Police Academy Module II and III**, it is necessary to complete the following courses:

Required Courses		Units: 15.5
PAC 075E	Basic Academy Intensive Modular III	7.0
PAC 075F	Basic Academy Intensive Modular II	8.5
		Total: 15.5

POLICE ACADEMY/BASIC POLICE ACADEMY

Certificate of Achievement

POLICE ACADEMY/BASIC POLICE TRAINING (Open to all students) Career Certificate

Description

Several programs at Rio Hondo College are certified by the Commission of Peace Officer Standards and Training (POST). There are certain minimum physical requirements for peace officers as well as requirements of good moral character. Students may obtain more specific information about these requirements from the Administration of Justice staff.

At the Administration of Justice Regional Training Center, a modern and complete law enforcement training facility is maintained. The center is equipped to train in the use of firearms, obstacle course for physical training, and weight training apparatus and driver training exercises. The facility is equipped to train in other areas related to the field of law enforcement, security and corrections. If you are interested in attending the Rio Hondo Police Academy, there are information meetings being held on a monthly basis. Please call at (562) 463-7756.

Students who have previously earned a Basic POST Certificate or who are transferring to Rio Hondo College from another college as Administration of Justice majors must meet the college transfer requirements and complete at least six units of Administration of Justice courses at Rio Hondo College in addition to regular required courses to be eligible for graduation.

Required Courses		Units: 37.0-46.0
PAC 040	Basic Police Recruit Class*	7.0-46.0
OR		46.0
PAC 075B	Basic Course-Module III (Ext)*	7.0-21.5

POLITICAL SCIENCE Associate in Arts for Transfer

Description

The **Associate in Arts in Political Science for Transfer Degree** is intended to meet the lower division requirements for Political Science majors (or similar majors) at a CSU campus that offers a Political Science baccalaureate degree.

This degree will introduce students to the broad discipline of political science. It involves the study of political structures, processes and social conditions as they relate to political situations, policy formulation approaches, and intergovernmental relations. This program is particularly relevant for students interested in pursuing a Bachelor's Degree in Political Science from a California State University, or for those seeking a structured examination into political systems.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Political Science:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Political Science major at the CSU where they seek transfer.

PUBLIC SAFETY DISPATCHER Certificate of Achievement

Description

The Public Safety Dispatcher Certificate of Achievement is designed to prepare students to meet the skills, needs, and minimum requirements for public safety dispatchers and communications technicians for municipal, county, and state agencies. The curriculum prepares students with a foundation in the basics of criminal law, professionalism and ethics, emergency telephone answering techniques, radio dispatching, radio codes, critical incidents, stress management, and community policing and relations. The skills developed during classes enhance students' knowledge of the criminal justice system and in-depth understanding of written and oral emergency communication, as well as issues pertinent to the dispatch profession, including assessing problems, prioritizing resources, and identifying solutions using good judgement.

To acquire the **Certificate of Achievement in Public Safety Dispatcher**, it is necessary to complete the following courses:

Required Courses		Units: 6.0
PAC 071	Public Safety Dispatcher Basic Course	6.0
Choose one of the following		Units: 3.0
AJ 041	Effective Written Communication for Public Service Personnel	3.0
AJ 101	Introduction to Administration of Justice	3.0
CORR 101	Introduction to Corrections	3.0
HMLD 101	Introduction to Homeland Security	3.0
		Total: 9.0

SOCIAL JUSTICE STUDIES Associate in Arts for Transfer

Description

The **Associate in Arts in Social Justice Studies for Transfer (AA-T) Degree** is intended to meet the lower division requirements for various social science majors (or similar majors) at a CSU campus that offers a Social Justice baccalaureate degree. The Social Justice Studies degree is an interdisciplinary degree that engages students in examining identity issues such as gender, race, class, ethnicity, and nationality as they intersect with the social justice issues of racism, sexism, classism, terrorism and other oppressive structures within society. This degree is designed to appeal to students interested in learning about the experiences of marginalized groups, as well as those going into majors such as sociology, history, political science, women's studies, and race and ethnic studies.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Social Justice Studies:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department for the courses accepted into the various majors that fall under the umbrella of "Social Justice Studies" at the CSU where they seek transfer.

SOCIAL JUSTICE: LGBTQ STUDIES

Associate in Arts for Transfer

Description

The **Associate in Arts in Social Justice: LGBTQ Studies for Transfer (AA-T)** is intended to meet the lower division requirements for social justice majors (or similar majors) at a California State University (CSU) campus that offers a social justice studies baccalaureate degree.

This degree is designed to give foundational knowledge in the field of social justice for students looking to transfer, or for those who want a greater understanding of social justice among particular populations, and specifically the LGBTQ+ community.

In addition to the courses listed below, the following requirements must be met for completion of the Associate in Arts in Social Justice: LGBTQ Studies for Transfer Degree:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the units in the major with a grade of "C" or better or a "P" if the course is taken on a pass-no pass basis.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the various majors that fall under the umbrella of "social justice" at the CSU where they seek transfer.

Required Course		Units: 3.0
EGSS 130	Introduction to LGBTQ+ Studies	3.0
Required Course: Choose ONE of the following		Units: 3.0
EGSS 110	Introduction to Ethnic Studies	3.0
SOC 116	Power, Oppression, and Privilege: Race and Ethnic Relations	3.0
Required Course: Choose a course not already selected from the above list OR ONE course from the following:		Units: 3.0
EGSS 120	Introduction to Women's Studies	3.0
SOC 102	Major Social Problems	3.0
SOC 105	Introduction to Human Sexuality	3.0
SOC 120	She, He, They: Intersections of Gender	3.0
Select three courses from at least two of the following areas. In Area 3, courses can be selected only if not already used toward required courses above. Only ONE course from Area 4 may be used.		Units: 9.0-10.0
Area 1: History or Government		
HIST 122	History of Mexico	3.0
HIST 131	History of the North American Indian	3.0

SPANISH Associate in Arts for Transfer

Description

The Associate in Arts in Spanish for Transfer (AA-T) Degree is intended to meet the lower division requirements for Spanish majors (or similar majors) at a California State University (CSU) campus that offers a bachelor's degree in Spanish.

This degree is designed for students interested in the field of the Spanish language and for students looking to further their understanding of the cultural and linguistic aspects of the language as they apply to the workplace. These courses will provide students with a solid foundation in Spanish language and culture that will be useful either for transferring or using in the workplace.

In addition to the courses listed below, the following additional requirements must be met for completion of the Associate in Arts in Spanish for Transfer Degree:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Spanish major at the CSU where they seek transfer.

Required Courses		Units: 18.0
SPAN 101	Spanish I	4.5
OR		
SPAN 101S	Spanish for Spanish Speakers I	4.5
		4.5
SPAN 102	Spanish II*	4.5

SPANISH Certificate of Achievement

Description

The **Certificate of Achievement in Spanish** is designed to provide students with a strong foundation in the essentials of the Spanish language, including reading, listening, speaking, and writing skills. This certificate is intended for students pursuing other degrees or careers not necessarily related to the Spanish language but who still want to learn the language. With this certificate, students can petition their employer for any benefits that may be available for those who have skills in Spanish.

Students who successfully complete the certificate will be able to communicate competently in Spanish at a basic conversational level. While students will not be able to act as interpreters, they will be able to communicate directly with clients, customers, coworkers, or community members who are Spanish speakers and whose English proficiency may be limited.

To acquire the **Certificate of Achievement in Spanish**, it is necessary to complete the following courses:

Required Courses		Units: 16.5-18.0
SPAN 101	Spanish I	4.5
OR		4.5
SPAN 101S	Spanish for Spanish Speakers I	4.5
		4.5
SPAN 102	Spanish II*	4.5
OR		4.5
SPAN 102S	Spanish for Spanish Speakers II*	4.5
		4.5
SPAN 201	Spanish III*	4.5
OR		4.5
SPAN 201H	Spanish III Honors*	4.5
		4.5
SPAN 202	Spanish IV*	4.5
*Prerequisite		

Students who have successfully challenged the SPAN 101 or SPAN 101S prerequisite - Please choose one of the following courses:

ART 104	Art of the Ancient Americas	3.0
ART 108	The Art of Mexico	3.0
ENGL 126	Languages of the World	3.0
FR 101	French I	4.5
HIST 122	History of Mexico	3.0
HUM 125	Introduction to Mexican Culture	3.0
HUM 125H	Introduction to Mexican Culture Honors*	3.0
HUM 130	Contemporary Mexican-American Culture	3.0
LIT 117	Mexican Literature in Translation*	3.0
LIT 117H	Mexican Literature in Translation Honors*	3.0
LIT 149	Introduction to Chicana/o/x Literature*	3.0
LIT 149H	Introduction to Chicana/o/x Literature Honors*	3.0
		Total: 16.5-18.0

TESLA STUDENT AUTOMOTIVE TECHNICIAN (START) Certificate of Achievement

Description

This Certificate of Achievement is intended to educate entry-level technicians in Tesla Motors technology. Topics will include safety when working in or around high voltage, maintenance, regeneration braking, inverter power transfer, battery technologies, battery management systems, high-voltage bus and charging, pack connector and penthouse controls, and autonomous technology. Electric vehicle applications and their integrated systems from Tesla Motors are used to discuss the physics of battery storage and material composition and high-voltage generation systems. This course is suitable for students already working in the battery electric vehicle/hybrid vehicle and energy technology fields. Completion of this training is required by Tesla for employment as a Level I, Level II, or Level III technician; Mobile Service Technician; or Field Service Technician.

To acquire the **Certificate of Achievement in Tesla Student Automotive Technician (START)**, it is necessary to complete the following courses:

Required Courses		Units: 14.0
TESL 101A	Tesla Student Automotive Technician (START) Program - A*	3.0
TESL 101B	Tesla Student Automotive Technician (START) Program - B*	3.0
TESL 101C	Tesla Student Automotive Technician (START) Program - C*	3.0
TESL 101D	Tesla Student Automotive Technician (START) Program - D*	3.0
AUTO 290	Work Experience Education/Internship for Automotive Technology-Related Fields	2.0
*Prerequisite		
		Total: 14.0

THEATRE ARTS Associate in Arts for Transfer

Description

The **Associate in Arts in Theatre Arts for Transfer (AA-T)** is intended to meet the lower division requirements for Theatre Arts majors at a CSU campus that offers a Theatre Arts baccalaureate degree.

This degree is designed for students interested in a range of classes in the theatre arts. Students who earn an AA-T in Theatre Arts demonstrate knowledge and skill in areas including acting, theatre technology, dramaturgy, design (lights, set, costume, and/or make-up), theatre history, and play production. Foundational skills and knowledge of theatre is the springboard for an array of careers including professional actor, theatre critic, theatre director, playwright, set, costume, make-up or light designer, running crew and various film and television jobs.

In addition to the courses listed below, the following requirements must be met for completion of the AA-T Degree in Theatre Arts:

1. Completion of 60 CSU-transferable semester units.
2. Achievement of a minimum GPA of at least 2.0 in all CSU-transferable coursework. (Some majors may require a higher GPA. Students should consult with a counselor for more information.)
3. Completion of the major with a grade of "C" or better in each course or a "P" if the course was taken on a Pass/No Pass basis and the "P" is equal to a "C" or better.
4. Certified completion of the California State University General Education-Breadth (CSU GE) pattern; OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

Students are advised to check with the Counseling Department or Transfer Center for the courses accepted into the Theatre Arts major at the CSU where they seek transfer.

Required Courses

Units: 9.0

THTR 101	Theatre Arts Appreciation	3.0
OR		
THTR 105	The History and Development of the Theatre	3.0
OR		
THTR 105H	The History and Development of the Theatre Honors*	3.0
THTR 110	Principles of Acting I	3.0
(must complete 3 total units)		3.0
THTR 159	Stage Crew Activity	3.0
OR		
THTR 170	Theatre Rehearsal & Performance	3.0

Choose 3 classes totaling 9 units from the following list:

Units: 9.0

THTR 111	Principles of Acting II*	3.0
THTR 150	Stagecraft I for Theatre, TV, and Film	3.0
THTR 153	Lighting Design and Production for Theatre, TV, and Film	3.0
THTR 174	Costume Design and Production for Theatre, TV, and Film	3.0

If not used as Required Core:

THTR 159	Stage Crew Activity	1.0-3.0
THTR 170	Theatre Rehearsal & Performance	3.0

CSU GE or IGETC Pattern (Units will vary)

Transferable Electives as needed to reach 60 transferable units

DEGREE TOTAL 60 units

*Prerequisite

Total: 18.0

THEATRE ARTS Associate of Science Degree

Description

To acquire the **Associate of Science Degree in Theatre Arts**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 27.0
THTR 101	Theatre Arts Appreciation	3.0
THTR 105	The History and Development of the Theatre	3.0
OR		
THTR 105H	The History and Development of the Theatre Honors*	3.0
THTR 110	Principles of Acting I	3.0
THTR 111	Principles of Acting II*	3.0
THTR 150	Stagecraft I for Theatre, TV, and Film	3.0
THTR 151	Stagecraft II for Theatre, TV, and Film*	3.0
THTR 170	Theatre Rehearsal & Performance	3.0
THTR 230	Principles of Directing*	3.0
THTR 231	Principles of Directing II*	3.0
*Prerequisite		
		Total: 27.0

WELDING TECHNOLOGY Associate of Science Degree

Description

The courses required for this degree comprise a comprehensive list of job-related skills needed to acquire advanced welding skills. The skills acquired during classes prepare students to take and pass the City of Los Angeles Certified Welder Exam, which also aligns with American Welding Society (AWS) standards.

To acquire the **Associate of Science Degree in Welding Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 26.0
WELD 040	Introduction to Welding Processes	2.0
WELD 041	Elementary Metallurgy	2.0
WELD 045	Basic Electric Arc Welding	2.0
WELD 050	Semi-Automatic Welding Process*	4.0
WELD 055	Manual Electric Arc Welding Processes*	4.0
WELD 060	Production Welding Techniques	4.0
WELD 065	Introduction to Gas Tungsten Arc Welding *	4.0
WELD 070	Advanced Gas Tungsten Arc Welding*	4.0
Select one course from the following:		Units: 2.0-4.0
TCED 090	Blueprint Reading for industry	2.0
WELD 075	Certification Welding I*	4.0
*Prerequisite		
		Total: 28.0-30.0

WELDING TECHNOLOGY/LADBS STRUCTURAL STEEL CERTIFICATON PROGRAM Certificate of Achievement

Description

The courses required in this certificate compile a comprehensive list of job related skills needed to acquire advanced welding skills. The skills acquired during class will prepare an individual to take and pass the City of Los Angeles Department of Building and Safety (LADBS) Structural Steel Certified Welder Examination and Performance Test, which also aligns with standards and qualifications per the American Welding Society (AWS).

To acquire the **Certificate of Achievement in LADBS Structural Steel Certification Program**, it is necessary to complete the following courses with a grade of "C" or better:

Required Courses		Units: 17.0
WELD 040	Introduction to Welding Processes	2.0
WELD 050	Semi-Automatic Welding Process*	4.0
WELD 055	Manual Electric Arc Welding Processes*	4.0
WELD 075	Certification Welding I*	4.0
WELD 080	Certification Welding II*	3.0

*Prerequisite

Total: 17.0

WELDING TECHNOLOGY/PIPE WELDING AND FABRICATION Certificate of Achievement

Description

The courses required in this certificate compile a comprehensive list of job related skills needed for Pipe Welding and Fabrication. The skills acquired during this program will prepare an individual to take and pass the AWS B2.1 SMAW 6G pipe welding performance exam, which also aligns with standards and qualifications per the American Welding Society (AWS), American Society of Mechanical Engineers (ASME), and American Petroleum Institute (API).

To acquire the **Certificate of Achievement in Pipe Welding and Fabrication**, it is necessary to complete the following courses:

Required Courses		Units: 24.0
WELD 081	Pipe Welding - Level I*	4.0
WELD 082	Pipe Layout and Fabrication*	4.0
WELD 083	Pipe Welding II*	4.0
WELD 084	Pipe Welding - Level III*	4.0
WELD 055	Manual Electric Arc Welding Processes*	4.0
WELD 050	Semi-Automatic Welding Process*	4.0

*Prerequisite

Total: 24.0

WILDLAND FIRE TECHNOLOGY Associate of Science Degree

Description

This degree program provides students with training in hand crew formation, fire line construction, and the use of wildland equipment. The behavior of fires, protective clothing, and wildland fire tools will also be addressed. The Wildland Fire Technology Associate Degree program is for those students who desire to gain an understanding of wildland fire investigation, fire prevention, and support operations. This program also meets the requirements for the U.S. Forest Service to be hired as an entry-level wildland firefighter. This degree program will also aid currently employed municipal firefighters with the learning domains and knowledge base to respond to and mitigate a wildland conflagration.

To acquire the **Associate of Science Degree in Wildland Fire Technology**, students must complete the required major courses below with a grade of "C" or better along with one of the following: Rio Hondo College General Education and Proficiency requirements, California State University General Education Breadth (CSU GE), or Intersegmental General Education Transfer Curriculum (IGETC).

Required Courses		Units: 15.0
WFT 101	Wildland Fire Behavior	3.0
WFT 102	Wildland Firefighter Safety and Survival	3.0
WFT 103	Wildland Fire Operations	3.0
WFT 104	Wildland Fire Investigation, Prevention, and Public Information	3.0
WFT 105	Wildland Fire Logistics, Finance, and Planning	3.0
Plus a minimum of 9 units selected from the following:		Units: 9.0-16.0
EMT 093	Emergency Medical Technician*	9.0
EMT 100	Emergency Medical Responder	3.0
FTEC 044	Physical Fitness and Ability for the Firefighter*	3.0
FTEC 107	Hazardous Materials I	3.0
FTEC 108	Hazardous Materials II*	3.0
WFT 077	Wildland Fire Academy*	16.0
WFT 078	Wildland Basic Fire Academy*	9.0

*Prerequisite

Total: 24.0-31.0

WILDLAND FIRE TECHNOLOGY Certificate of Achievement

Description

The **Certificate of Achievement in Wildland Fire Technology** offers the required courses and learning domains for students to apply for employment with wildland firefighting agencies such as the United States Forest Service; California Department of Forestry; United States Department of the Interior, Bureau of Land Management; National Park Service; as well as municipal fire departments.

To acquire the **Certificate of Achievement in Wildland Fire Technology**, it is necessary to complete the following courses:

Required Courses		Units: 15.0
WFT 101	Wildland Fire Behavior	3.0
WFT 102	Wildland Firefighter Safety and Survival	3.0
WFT 103	Wildland Fire Operations	3.0
WFT 104	Wildland Fire Investigation, Prevention, and Public Information	3.0
WFT 105	Wildland Fire Logistics, Finance, and Planning	3.0
Plus a minimum of 9 units selected from the following:		Units: 9.0-16.0
EMT 093	Emergency Medical Technician*	9.0
EMT 100	Emergency Medical Responder	3.0
FTEC 044	Physical Fitness and Ability for the Firefighter *	3.0
FTEC 107	Hazardous Materials I	3.0
FTEC 108	Hazardous Materials II*	3.0
WFT 077	Wildland Fire Academy*	16.0
WFT 078	Wildland Basic Fire Academy*	9.0
*Prerequisite		Total: 24.0-31.0

10 Bachelor of Science Degree Automotive Technology Program

Admission Requirements:

Upper Division Standing

Students interested in pursuing the Bachelor of Science in Automotive Technology must meet the following requirements to be considered to have upper division standing:

- Major courses: 32-35 units of transportation related courses from a designated associate degree course sequence per California Community College Chancellor's Office Taxonomy of Programs (TOP) codes 0948.00. Each course must be completed with a C or higher.
- A minimum of 30 units (45 quarter units) in general education from either the CSU GE or IGETC patterns with a 2.0 cumulative GPA. The 30 units must include the following courses, completed with a C or higher:
 - Written Communication
 - Oral Communication
 - Critical Thinking
 - Mathematics

Students must complete the CSU GE or IGETC pattern prior to earning the bachelor's degree.

Steps for applying for upper division standing:

- Apply to Río Hondo College
- Submit a completed supplemental application
- Submit all official transcripts to Admissions and Records (must be delivered from sending institution)

Graduation with Latin Honors (for baccalaureate degree students only)

The following grade point average (GPA) criteria is used to identify bachelor's degree students who are eligible for the Latin honors designation:

- **Summa Cum Laude:** GPA equal to or greater than **3.85-4.00**
- **Magna Cum Laude:** GPA equal to or greater than **3.75 and up to 3.84**
- **Cum Laude:** GPA equal to or greater than **3.5 and up to 3.74**

Bachelor's degree students may be considered eligible for Latin honors at graduation provided that a minimum of 40 upper division units are earned at Río Hondo College. The GPA shall be determined from earned units at Río Hondo College plus all degree applicable units. Official conferral of Latin honors is determined during the final degree audit.

Credit by Exam

The Board of Trustees of Río Hondo College, in accordance with provisions of Title 5 (55753), authorizes the college to grant appropriate semester unit credit to any student who is currently enrolled and successfully passes an examination administered by appropriate staff. Students may not be enrolled in the course for which they want to challenge and receive Credit by Examination.

The Automotive Technology Department has elected to grant course credit to enable students who can demonstrate proficiency in specific bodies of subject matter, to plan a relevant educational program that will exclude courses in which essential levels of mastery of subject matter material have been previously attained.

Students admitted to the bachelor's degree shall be given Río Hondo College course credit up to 16 units in lower division and 12 units in upper division automotive technology courses upon the successful completion of examinations (which will not count as units in residence). The student's transcript will denote credit earned by credit by examination.

To challenge a course and receive Credit by Examination a student must be registered in the college and be in good standing. Course(s) must be listed in the college catalog.

Educational Leave

Students enrolled in upper division coursework for the Bachelor of Science in Automotive Technology may request an educational leave for one or two consecutive semesters without having to reapply to the upper division program upon their return. Students will need to reapply to the college if educational leave includes one primary term (fall or spring semester).

To be eligible for an educational leave students must:

- Complete at least one upper division course with a C or higher.
- Be in good academic standing.
- Must complete and submit the appropriate form to Admissions and Records including the reason for the educational leave and the approximate date to resume the upper division course work.

Program Learning Outcomes

Graduates will be technically competent and possess strong interpersonal skills. They will have the ability to communicate effectively, be able to solve problems, work in teams, and will have developed an understanding of the need for continued professional development. The Program Learning Outcomes are grouped into five broad interrelated categories:

1. Specialized Knowledge
 - This category addresses what students should demonstrate with respect to the Automotive Technology Industry beyond the vocabularies, theories, and skills of the particular fields of study.
2. Broad and Integrative Knowledge
 - This category asks students to consolidate learning from different broad fields of study (e.g., Humanities, Arts, Applied Sciences, and Social Sciences) and to discover and explore concepts and questions that bridge these essential areas of learning.
3. Intellectual Skills
 - This category includes both traditional and nontraditional cognitive skills, which include analytic inquiry, use of information resources, engagement with diverse perspectives, ethical reasoning, and quantitative and communicative fluency. All of these emphasize the importance of students making, confronting, and interpreting ideas and arguments from different points of reference (e.g., cultural, technological, and political).
4. Applied and Collaborative Learning
 - This category emphasizes what students can do with what they know. Students will be asked to demonstrate their learning by addressing unscripted problems in scholarly inquiry, both at work and in other settings outside the classroom. It also includes research and creative activities involving both individual and group efforts, and may also include practical skills crucial to the application of expertise.
5. Civics and Global Learning
 - This category recognizes higher education's responsibilities both to democracy and global community. Students will demonstrate integration of their skills and knowledge by engaging with and responding to civic, social, environmental, and economic challenges at local, state, national, and international levels.

Specific Program Learning Outcome Proficiencies

The following is an overview of the five categories of learning listed above at each level of the Automotive Technology Degree Courses (Lower Division and Upper Division), and defines the basic proficiencies to each area of learning, as well as describing their relationship to one another.

Specialized Knowledge

- Lower Division Courses: Automotive Service Technician Major
 - Students shall describe the scope of the field of study, its core theories and practices, using field-related terminology, and offer a similar description of the field of study per Industry Standards.
 - Students shall apply tools, technologies, and methods to selected questions or problems of the field of study per Industry Standards.
 - Students shall generate substantially error-free products, reconstructions, data, juried exhibits, or performances appropriate to the field of study per Industry Standards.

- Upper Division Courses: Automotive Technical Studies
 - Students shall define and explain the structure, styles, and practices of the field of study using its tools, technologies, methods, and specialized terms per Industry Standards.
 - Students shall investigate a familiar but complex problem in the field of study by assembling, arranging, and reformulating ideas, concepts, designs, and techniques per Industry Standards
 - Students shall frame, clarify, and evaluate complex challenges that bridges the field of study and at least one other related field, using theories, tools, methods, and academics from those fields to produce independently or collaboratively an investigative, creative, or practical work illuminating said challenge per Industry Standards.
 - Students shall construct a summative project, paper, performance, or application that draws on current research, academics, and techniques in the field of study per Industry Standards.

Broad and Integrative Knowledge

- Lower Division Courses: Automotive Service Technician Major
 - Students shall describe how existing knowledge or practice is advanced, tested, and revised in each core field studied, such as disciplinary and interdisciplinary courses in technology, applied sciences, social sciences, and humanities per Industry Standards.
 - Students shall describe a key debate or problem relevant to each core field studied, explain the significance of the debate or problem to the wider society, and show how concepts from the core fields can be used to address the selected debates or problems per Industry Standards.
 - Students shall use recognized methods of each core field studied, including the gathering and evaluation of evidence, in the execution of analytical, practical, or creative tasks per Industry Standards
 - Students shall describe and evaluate the ways in which at least two fields of study define, address, and interpret the importance for society of a problem in applied science, social science, humanities, or technology per Industry Standards.
- Upper Division Courses: Automotive Technical Studies
 - Students shall describe and evaluate the ways in which at least two fields of study define, address, and interpret the importance for society of a problem in applied science, social science, humanities, or technology, and explain how the methods of inquiry in these fields can address the challenge and proposes an approach to the problem that draws on these fields per Industry Standards.
 - Students shall produce an investigative, creative, or practical work that draws on specific theories, tools, and methods from at least two core fields of study per Industry Standards.
 - Students shall define and frame a problem important to the major field of study, justify the significance of the challenge or problem in a wider societal context, explain how methods from the primary field of study can be used to address the problem, and develop an approach that draws on both the major and core fields per Industry Standards.

Intellectual Skills

- Lower Division Courses: Automotive Service Technician Major
 - Students shall identify and frame a problem or question in selected areas of study and distinguish among elements of ideas, concepts, theories, or practical approaches to the problem or question per Industry Standards.
 - Students shall identify, categorize, evaluate, and cite multiple information resources so as to create projects, papers, or performances in either a specialized field of study or with respect to a general theme within applied science, social science, humanities, or technology per Industry Standards.
 - Students shall describe how knowledge from different cultural perspectives might affect interpretations of prominent problems in politics, society, and global relations per Industry Standards.
 - Students shall describe, explain, and evaluate the sources of his/her own perspective on selected issues in culture, society, politics, or global relations, and compare that perspective with other views per Industry Standards.
 - Students shall describe the ethical issues present in prominent problems in politics, economics, health care, technology, or frameworks that help to inform decision-making with respect to such issues per Industry Standards.
 - Students shall present accurate interpretations of quantitative information on political, economic, health-related, or technological topics and explain how both calculations and symbolic operations are used in those offerings per Industry Standards.
 - Students shall create and explain graphs or other visual depictions of trends, relationships, or changes in status per Industry Standards.
 - Students shall develop and present valid, coherent, and substantially error-free writing for communication to general and specialized audiences per Industry Standards.
 - Students shall demonstrate effective interactive communication through discussion by actively listening, constructively responding, and through structured oral presentations to general and specialized audiences per Industry Standards.
 - Students shall negotiate with peers to develop an action plan for a practical task, and communicate the results of the negotiation either orally or in writing per Industry Standards.
- Upper Division Courses: Automotive Technical Studies

- Students shall differentiate and evaluate theories and approaches to selected complex problems within the chosen field of study and at least one other field per Industry Standards.
- Students shall locate, evaluate, incorporate, and properly cite multiple information resources in different media or different languages in projects, papers, or performances per Industry Standards.
- Students shall generate information through independent or collaborative inquiry and uses that information in a project, paper, or performance per Industry Standards.
- Students shall construct a written project, laboratory report, exhibit, performance, or community service design expressing an alternate cultural, political, or technological vision, and explain how this vision differs from current realities.
- Students shall frame a controversy or problem within a field of study in terms of at least two political, cultural, historical, or technological forces, explore and evaluate competing perspectives on the controversy or problem, and presents a reasoned analysis of the issue, either orally or in writing, that demonstrates consideration of the competing views per Industry Standards.
- Students shall analyze competing claims from a recent discovery, scientific contention, or technical practice with respect to benefits and harms to those affected, articulate the ethical dilemmas inherent in the tension of benefits and harms, and either arrive at a clearly expressed reconciliation of that tension that is informed by ethical principles, or explain why such a reconciliation cannot be accomplished per Industry Standards.
- Students shall identify and elaborate key ethical issues present in at least one prominent social or cultural problem, articulate the ways in which at least two differing ethical perspectives influence decision making concerning those problems, and develop and defend an approach to productively address the ethical issue per Industry Standards.
- Students shall translate verbal problems into mathematical algorithms so as to construct valid arguments using accepted symbolic systems of mathematical reasoning, and presents the resulting calculations, estimates, risk analyses, or quantitative evaluations of public information in papers, projects, or multimedia presentations per Industry Standards.
- Students shall construct mathematical expressions where appropriate for issues initially described in non-quantitate terms per Industry Standards.
- Students shall construct sustained, coherent arguments, narratives, or detailed explanations of issues, problems, or technical issues and processes in writing and at least in one other medium to general and specific audiences per Industry Standards.
- Students shall conduct an inquiry concerning information, conditions, technologies, or practices in the field of study that makes substantive use of non-English-language sources per Industry Standards.
- Students shall negotiate with one or more collaborators to advance an oral argument or articulate an approach to resolving a social, personal, or ethical dilemma per Industry Standards.

Applied and Collaborative Learning

- Lower Division Courses: Automotive Service Technician Major
 - Students shall describe in writing at least one case in which knowledge and skills acquired in academic settings may be applied to a field-based challenge, and evaluate the learning gained from the application per Industry Standards.
 - Students shall analyze at least one significant concept or method in the field of study in light of learning outside the classroom per Industry Standards
 - Students shall locate, gather, and organize evidence regarding a question in a field-based venue beyond formal academic study and offer alternate approaches to answering the question per Industry Standards.
 - Students shall demonstrate the exercise of any practical skills crucial to the application of expertise per Industry Standards.
- Upper Division Courses: Automotive Technical Studies
 - Students shall prepare and present a project, paper, exhibit, performance, or other appropriate demonstration linking knowledge or skills acquired in work, community, or research activities with knowledge acquired in one or more fields of study, explain how those elements are structured, and employ appropriate citations to demonstrate the relationship of the product to literature of the field per Industry Standards.
 - Students shall negotiate a strategy for group research or performance, document the strategy so that others may understand it, implement the strategy, and communicate the results per Industry Standards.
 - Student shall write a design, review, or illustrative application for an analysis or case study in an applied scientific, social scientific, technical, or business context per Industry Standards.
 - Student shall complete a substantial project that evaluates a significant question in the field of study, including an analytic narrative of the effects of learning outside the classroom on the research or practical skills employed in executing the project per Industry Standards.

Civics and Global Learning

- Lower Division Courses: Automotive Service Technician Major
 - Students shall describe his/her own civic and cultural background, including its origins and development, assumptions, and predispositions per Industry Standards.
 - Students shall describe diverse positions, historical, and contemporary, on selected democratic values or practices, and present his/ her own position on a specific problem where one or more of these values or practices are involved per Industry Standards.
 - Students shall provide evidence of participation in a community project through either a spoken or written narrative that identifies the civic issues encountered, and personal insights gained from this experience per Industry Standards.
 - Students shall identify an economic, environmental, or public health challenge spanning countries, continents, or cultures, present evidence for the challenge, and take a position on it per Industry Standards.

- Upper Division Courses: Automotive Technical Studies
 - Students shall explain diverse positions, including those representing different cultural, economic, and geographic interests, on a contested public issue, and evaluate the issue in light of both of those interests and evidence drawn from journalistic and academic publications per Industry Standards.
 - Students shall develop and justify a position on a public issue and relate this position to alternate views held by the public or within the policy environment per Industry Standards.
 - Students shall collaborate with others in developing and implementing an approach to a civic issue, evaluate the strengths and weaknesses of the processes, and describe the results per Industry Standards.
 - Students shall identify a significant issue affecting countries, continents, or cultures, present quantitative evidence of that challenge through tables and graphs, and evaluate the activities of either non- governmental organizations or cooperative inter-governmental initiatives in addressing identified issue(s) per Industry Standards.

Automotive Technology

Bachelor of Science Degree

Description

The Bachelor of Science (B.S.) degree in Automotive Technology is designed to prepare students for a wide variety of technology-based careers in a pathway emphasizing the automotive industry.

Graduates with the Bachelor of Science degree in Automotive Technology will find employment in administrative and supervisory positions in automotive industry-related organizations and assume responsibilities in the areas of product development, post-production support, customer sales and service support, distribution, and training. Graduates will have the practical skills, technical knowledge, and organizational competencies required of mid-level management personnel.

The courses will enhance the students' levels of technical competency, computer, math, and science skills, effective communication and interpersonal skills, substantiate workplace and social ethics, the ability to work in teams, and to continue to pursue professional development and lifelong learning.

Students admitted to the bachelor of science degree upper division program must have completed lower division major and general education coursework requirements.

Required Courses		Units: 27.0
AUTO 300	Assessment of the Automotive Industry*	3.0
AUTO 310	The Global Development and Advancement of the Automobile*	3.0
AUTO 320	The Progressive Growth of Automotive Technology*	3.0
AUTO 330	Hybrid/Electric Vehicles*	3.0
AUTO 340	Analyzing Vehicle Electrical/Electronic Systems*	3.0
AUTO 350	The Future of Automotive Sales and Service *	3.0
AUTO 360	Analyzing Vehicle Fuels, Lubricants, and Combustion*	3.0
AUTO 375	The Future of Mobility*	3.0
AUTO 410	Digital Marketing for the Automotive Industry*	3.0
*Prerequisite		
Choose two courses from the following:		Units: 6.0
AUTO 400	Analyzing Vehicle Stability, Dynamics, and NVH*	3.0
AUTO 420	Analyzing Dynamic Functions of Vehicle Drivetrain Systems*	3.0
AUTO 435	Automotive Manufacturers *	3.0
AUTO 440	Analyzing Vehicle Safety, Comfort, and Security Systems*	3.0
AUTO 450	Variable and Fixed Operations of the Automotive Industry*	3.0
Choose one course from the following:		Units: 3.0
AUTO 480	Special Topics in Transportation*	3.0
AUTO 499	Directed Study in Automotive Technology*	1.0-4.0
Upper Division General Education Courses		Units:
Required Course:		Units: 3.0
ENGL 325	Technical and Professional Writing*	3.0
Choose two courses from the following:		Units: 6.0
GEOG 310	Environmental Geography*	3.0
HIST 325	History of Science and Technology*	3.0
PHIL 325	Applied and Professional Ethics*	3.0
		Total: 45.0

11 Program Level Outcomes

Degree, Certificate, and General Education

Program Level Outcomes (PLOs) – Degrees & Certificates

Program level outcomes (PLOs) for degrees and certificates represent the knowledge, skills, and/or abilities that students should be able to demonstrate upon completion of a degree or certificate program.

Administration of Justice and Fire Technology Division

ADMINISTRATION OF JUSTICE – AS DEGREE

- Students will apply legal definitions, concepts, and principles to law enforcement, courts, or correctional settings.
- Students will communicate information in a clear and organized manner.
- Students will analyze ethical dilemmas encountered in the law enforcement and/or corrections fields and decide on the correct ethical choice.
- Students will apply constitutional, statutory, procedural, and case law to real-life criminal justice situations.
- Students will adapt to the diverse and multicultural nature of American society in the criminal justice setting.
- Students will use the degree or certificate as a platform for a career in the criminal justice field or further study at a 4-year institution.

CORRECTIONS – AS DEGREE

- Students will apply legal definitions, concepts, and principles to law enforcement, courts, or correctional settings.
- Students will communicate information in a clear and organized manner.
- Students will analyze ethical dilemmas encountered in the law enforcement and/or corrections fields and decide on the correct ethical choice.
- Students will apply constitutional, statutory, procedural, and case law to real-life criminal justice situations.
- Students will adapt to the diverse and multicultural nature of American society in the criminal justice setting.
- Students will use the degree or certificate as a platform for a career in the criminal justice field or further study at a four-year institution.

EMERGENCY MEDICAL TECHNICIAN – CERTIFICATE

- Students will apply concepts related to the entire spectrum of EMS care including: airway, ventilation, oxygenation, trauma; cardiology, medical, and EMS operations

- Students will competently perform patient assessment (medical and trauma) psychomotor skills.
- Students will competently perform upper airway adjuncts and suctioning psychomotor skills.
- Students will competently perform oxygen and bagvalve-mask (apneic patient) psychomotor skills.
- Students will competently perform cardiac arrest management and AED psychomotor skills.
- Students will competently perform bleeding control and shock psychomotor skills.
- Students will competently perform spinal immobilization psychomotor skills.
- Students will competently perform fracture and dislocation immobilization psychomotor skills
- Students will competently perform pre-hospital childbirth psychomotor skills.

FIRE TECHNOLOGY – AS DEGREE

- Students will identify minimum qualifications and entry level skills for firefighter hiring; describe the following elements: application process, written exam process, physical agility exam, oral interview, chief's interview, background investigation, and firefighter probationary process and identify fire service history, culture, and diversity.
- Students will identify and comprehend laws, regulations, codes, and standards that influence fire department operations and identify regulatory and advisory organizations that create and mandate them, especially in the areas of fire prevention, building codes and ordinances, and firefighter health and safety.
- Students will analyze the causes of fire, determine extinguishing agents and methods, differentiate the stages of the fire and fire development, and compare methods of heat transfer.
- Students will calculate flow requirements for fire apparatus, diagram a pump and plumbing schematic for fire apparatus, and apply mathematic formulae to hydraulics problems.
- Students will identify and describe the apparatus used in the fire service and the equipment and maintenance of fire apparatus and equipment.
- Students will identify and describe common types of building construction and conditions associated with structural collapse and firefighter safety.
- Students will differentiate between fire detection and fire suppression systems; design and diagram a wet and dry fire protection system; and identify alarm system components and their operations.
- Students will demonstrate the ability to analyze, appraise, and evaluate fire and emergency incidents and identify components of emergency management and firefighter safety, including: size-up, report-on conditions, Incident Command System, RECEO, 10 Standard Firefighting Orders, 18 situations that shout "Watch Out," and common factors associated with injuries and line-of-duty deaths.

FIRE TECHNOLOGY – CERTIFICATE

- Students will identify minimum qualifications and entry-level skills for firefighter hiring; describe the following elements: application process, written exam process, physical agility exam, oral interview, chief's interview, background investigation, and firefighter probationary process; and identify fire service history, culture, and diversity.
- Students will identify and comprehend laws, regulations, codes, and standards that influence fire department operations and identify regulatory and advisory organizations that create and mandate them, especially in the areas of fire prevention, building codes and ordinances, and firefighter health and safety.
- Students will analyze the causes of fire, determine extinguishing agents and methods, differentiate the stages of the fire and fire development, and compare methods of heat transfer.
- Students will calculate flow requirements for fire apparatus, diagram a pump and plumbing schematic for fire apparatus, and apply mathematic formulae to hydraulics problems.
- Students will identify and describe the apparatus used in the fire service and the equipment and maintenance of fire apparatus and equipment. (Elective.)
- Students will identify and describe common types of fire suppression systems (four basic types).
- Students will demonstrate the ability to analyze, appraise, and evaluate fire and emergency incidents and identify components of emergency management and firefighter safety, including: size-up, report-on conditions, Incident Command System, RECEO, 10 Standard Firefighting Orders, 18 situations that shout "Watch Out," and common factors associated with injuries and line-of-duty deaths.

HOMELAND SECURITY – AS DEGREE AND CERTIFICATE

- Students will analyze and interpret homeland security data and theories.
- Students will apply cross-disciplinary methods of analysis.
- Students will demonstrate an understanding of homeland security information.

BASIC FIRE ACADEMY – CERTIFICATE

- Students will utilize a self-contained breathing apparatus and conduct live fire training in a flashover environment.
- Students will demonstrate proper and safe usage of a 24-foot extension ladder and climb and work on the ladder in given training scenario.
- Students will demonstrate proper hose evolution techniques in a safe and proficient manner.
- Students will don all personal protective equipment within a 60-second time frame with no errors.
- Students will demonstrate wildland fire line construction in a safe and proficient manner.
- Students will demonstrate the safe operation of the jaws of life while performing auto extrication on a vehicle such as a car, van, or truck.

BASIC POLICE ACADEMY – CERTIFICATE

- Students will apply the definitions of local, state, and federal legal statutes as well as constitutional principles addressed in the California Commission's Peace Officer Standards and Training (POST) Learning Domains as they relate to law enforcement work.

- Given realistic scenario scripts, students will demonstrate proficiency in handling situations that involve a variety of law enforcement-related incidents common in the day-to-day duties of a police officer.
- Students will analyze situations that involve ethical dilemmas encountered in law enforcement, and determine what the correct ethical choice should be in each case.
- Students will correctly demonstrate self-defense skills and tactics in a safe and proficient manner.
- Students will demonstrate firearms skills and tactics in a safety and proficient manner.
- Students will demonstrate emergency vehicle operations and tactics in a safety and proficient manner.
- Students will utilize the concepts and tenets associated with the use of procedural justice.
- Students will access a given situation and prepare an accurate and complete arrest report that meets the requirements of law enforcement agencies.
- Students will use the certificate as a platform for a career as a peace officer.

INTENSIVE MODULAR BASIC POLICE ACADEMY – CERTIFICATE

- Students will apply the definitions of local, state, and federal legal statutes as well as constitutional principles addressed in the California Commission's Peace Officer Standards and Training (POST) Learning Domains as they relate to law enforcement work.
- Given realistic scenario scripts, students will demonstrate proficiency in handling situations that involve a variety of law enforcement-related incidents common in the day-to-day duties of a police officer.
- Students will analyze situations that involve ethical dilemmas encountered in law enforcement, and determine what the correct ethical choice should be in each case.
- Students will correctly demonstrate self-defense skills and tactics in a safe and proficient manner.
- Students will demonstrate firearms skills and tactics in a safety and proficient manner.
- Students will demonstrate emergency vehicle operations and tactics in a safety and proficient manner.
- Students will utilize the concepts and tenets associated with the use of procedural justice.
- Students will access a given situation and prepare an accurate and complete arrest report that meets the requirements of law enforcement agencies.
- Students will use the certificate as a platform for a career as a peace officer.

BASIC POLICE TRAINING – CERTIFICATE

- Students will apply the definitions, concepts, statutes, and constitutional principles covered in the POST Learning Domains to law enforcement work.
- Given scripted scenarios, students will demonstrate proficiency in handling situations involving a variety of law enforcement related incidents.
- Students will analyze ethical dilemmas encountered in law enforcement and decide on the correct ethical choice.
- Students will demonstrate self-defense skills in a safe and proficient manner.
- Students will demonstrate firearms skills in a safe and proficient manner.
- Students will demonstrate emergency vehicle operations in a safe and proficient manner.

- Students will prepare an accurate and complete arrest report that meets the requirements of law enforcement agencies.
- Students will use the certificate as a platform for a career as a peace officer.

WILDLAND FIRE TECHNOLOGY – AS DEGREE

- Students will assess impacts of fuel, weather, and topography on wildland fire behavior.
- Students will recognize and avoid the four common denominators of wildland fire fatalities.
- Given a wildland fire scenario, students will prepare an incident briefing based on factors of fuel, weather, topography, and man-made hazards.
- Students will demonstrate the three components of wildland fire prevention, including education, engineering, and enforcement.
- Students will make an operation shift plan that includes the following information: people in charge, operational objectives, resources, supplies necessary to meet the objectives, area map, weather forecasting, and safety briefing using standardized ICS forms.

WILDLAND FIRE TECHNOLOGY – CERTIFICATE

- Students will safely manipulate wildland fire tools, including shovel, Pulaski, and McLeod.
- Students will recall the ten Standard Firefighting Orders.
- Students will deploy a fire shelter.
- Students will demonstrate proper use of the following tools and equipment: back pump, fuses, and backfire torch.
- Students will function within an Incident Command System environment.
- Students will assess impacts of fuel, weather, and topography on wildland fire behavior.
- Assess impacts of fuel, weather, and topography on wildland fire behavior.

Arts, Business, and Cultural Programs Division

ACCOUNTING – AS DEGREE

- Students will demonstrate an understanding of basic accounting principles and procedures as well as the role of accounting and bookkeeping within various business organizations.
- Students will apply critical thinking skills derived from knowledge of accounting theory to financial analysis and management decision making.
- Students will recognize and understand the importance of ethics and social responsibility in the accounting profession.
- Students will analyze, process, and report financial information in accordance with generally accepted accounting principles within established normal and computerized protocols.
- Students will relate material from completed courses to their current and future professional needs, even if these needs fall into a different discipline.

ACCOUNTING – CERTIFICATE

- Students will demonstrate an understanding of basic accounting principles and procedures, as well as the role of accounting and bookkeeping within various business organizations.

- Students will apply critical thinking skills derived from knowledge of accounting theory to financial analysis and management decision making.
- Students will recognize and understand the importance of ethics and social responsibility in the accounting profession.
- Students will analyze, process, and report financial information in accordance with generally accepted accounting principles within established normal and computerized protocols.

ACCOUNTING FOR GOVERNMENT AND NONPROFIT ORGANIZATIONS – CERTIFICATE

- Students will develop a comprehensive understanding of accounting as an “information system.”
- Students will record and analyze business transactions using accounting software.
- Students will distinguish between the main objectives for commercial entities, government entities, and not-for-profit entities.
- Students will identify, compare, and explain the basic fund types for state and local governmental accounting.
- Students will describe and analyze how accounting concepts apply to state and local governmental accounting.
- Students will prepare basic governmental and not-for-profit budgetary, operating, and closing entries.

ANIMATION – AA DEGREE

- When given a concept design problem, students will employ digital and traditional methods to develop and communicate a concept that is original and visually engaging.
- When given an animation problem, students will employ the use of industry standard 3D software to create an animation that exhibits a knowledge and understanding of the principles of animation.
- When given a specific topic, students will employ the latest digital visualization tools to develop and create a project suitable for a portfolio in the entertainment industry.

ART HISTORY – AA-T DEGREE

- Given a work of art to discuss, students will apply art historical terminology and methodology in its analysis and interpretation.
- Given a comparative analysis prompt, students will discuss works of art representative of diverse cultures and regions within a historical and social context.
- Given an image or set of images to analyze, students will explain how works of art communicate meaning visually.
- Given a visual analysis prompt, students will describe the principles and formal elements of visual art.
- Given an art historical or historical context, students will express an understanding of the roles and functions of art in society.

ART/STUDIO ART DEGREE – AA DEGREE

- Demonstrate an understanding of the principals and elements of art in oral, written or original studio/art work.
- Demonstrate proficiency and understanding of the use of materials used in the arts.

ART/STUDIO ART DEGREE – AA-T DEGREE

- Students will describe and discuss the fundamental or “formal properties” of art: line, positive/negative space, shade/tone, texture, color, etc.
- Students will identify, analyze, and evaluate basic techniques of “process” in a variety of media: drawing, painting, sculpture, printmaking, computer graphics, photography, ceramics, etc.
- Students will produce carefully considered art works to final completion, thereby demonstrating their “practice” of art.

DANCE – AA DEGREE

- When in rehearsal, students will demonstrate best practice methods of training and rehearsal in preparation for performance.
- In performance, students will successfully perform on stage or in class showings.
- When shown live or recorded dance performances, students will critically analyze dance material by its salient qualities of body, effort, space, and shape and recognize predominant cultural and historical forces and figures in dance.
- When presented with a choreographic or improvisational problem, students will be able to create dance material with choreographic components of Laban Movement Analysis and understanding of contemporary dance production practices.

DANCE – CERTIFICATE

- Given a real-life teaching scenario, students will analyze the learning environment and student population, design an appropriate dance class, and lead students in a wellorganized, safe, and engaging dance class.
- Students will perform successfully on stage or in class showings.
- When shown live or recorded dance performances, students will analyze dance material critically by utilizing the Laban/ Bartenieff movement analysis categories of Body, Effort, Space, and Shape {BESS}; and to recognize forces and figures in dance.
- When presented with a choreographic or improvisational problem, students will be able to create dance material using choreographic components from the Laban/ Bartenieff movement analysis categories of Body, Effort, Space, and Shape, and which demonstrates understanding of dance production.

BUSINESS ADMINISTRATION – AA DEGREE

- Students will evaluate the use of financial budgeting concepts to make sound decisions in managing business finances through the preparation of financial statements, recording and posting journal entries, and transforming data into information.
- Students will demonstrate an understanding of economic principles by differentiating between micro and macro economics, explaining supply and demand, and applying economic principles to make business decisions.
- Students will use statistical and mathematical expressions to make general statements about populations of customers and make numeric business decisions.

BUSINESS MARKETING – AS DEGREE AND CERTIFICATE

- Students will analyze a business situation by conducting a SWOT analysis (strengths, weaknesses, opportunities and

threats) and utilize the outcomes to make business decisions.

- Students will create a marketing plan that explains the marketing mix and defines the appropriate target market.
- Given a business marketing situation, students will identify the most profitable segments of the market, define the logical target market, and describe how the business of product will be positioned.

COMPUTER INFORMATION TECHNOLOGY: COMPUTER SYSTEMS – AS DEGREE AND CERTIFICATE

- Students will demonstrate basic computer literacy skills including operating input/output devices and proficiency in the Microsoft Office applications suite.
- Students will apply critical-thinking and problem-solving skills required by employers and four-year universities.
- Students will analyze a problem and identify and define the computing requirements required for its solution.

COMPUTER INFORMATION TECHNOLOGY: CLOUD COMPUTING PRACTITIONER – CERTIFICATE

- Students will apply critical-thinking and problem-solving skills in a cloud computing environment.
- Students will learn installation and configuration of cloud computing resources for an enterprise environment.
- Students will understand the architectural principles required to build a cloud system that meets identified technical requirements.
- Student will demonstrate basic knowledge of the cybersecurity principles of confidentiality, integrity, and availability (CIA).

COMPUTER INFORMATION TECHNOLOGY: CYBERSECURITY – AS DEGREE AND CERTIFICATE

- Students will demonstrate knowledge of security policies for businesses.
- Students will understand objectives of security policies for businesses and the IT infrastructure of these policies.
- Students will demonstrate proficiency in IT infrastructure security.
- Students will learn to identify risks and use tools for the prevention, detection, and mitigation of threats to computer systems; and the recovery and accountability of systems.
- Students will apply critical-thinking skills in applying cybersecurity solutions.

COMPUTER INFORMATION TECHNOLOGY: CYBERSECURITY TECHNICIAN – CERTIFICATE

- Students will demonstrate knowledge of security policies for businesses.
- Students will understand objectives of security policies for businesses and the IT infrastructure of these policies.
- Students will demonstrate proficiency in IT infrastructure security.
- Students will learn to identify risks and use tools for the prevention, detection, and mitigation of threats to computer systems; and the recovery and accountability of systems.

COMPUTER INFORMATION TECHNOLOGY: CYBERSECURITY ETHICAL HACKER – CERTIFICATE

- Students will demonstrate knowledge of security policies for businesses.

- Students will understand objectives of security policies for businesses and the IT infrastructure of these policies.
- Students will demonstrate proficiency in IT infrastructure security.
- Students will learn to identify risks and use tools for the prevention, detection, and mitigation of threats to computer systems; and the recovery and accountability of systems.
- Students will demonstrate knowledge of the tools and resources used to attack business vulnerabilities and align proper mitigations.

COMPUTER INFORMATION TECHNOLOGY: INFORMATION SYSTEMS AND TECHNOLOGY – AS DEGREE AND CERTIFICATE

- Students will demonstrate problem-solving skills in a business environment.
- Students will demonstrate fundamentals of business operations.
- Students will demonstrate basic knowledge of policies and procedures for securing a business environment.

COMPUTER INFORMATION TECHNOLOGY: NETWORK ADMINISTRATOR – AS DEGREE AND CERTIFICATE

- Students will demonstrate knowledge of the architectural principles of computer networks in a business environment.
- Students will apply critical-thinking and problem-solving skills in a computer network environment.
- Students will demonstrate basic knowledge of the cybersecurity principles of confidentiality, integrity, and availability (CIA).

COMPUTER INFORMATION TECHNOLOGY: NETWORK TECHNICIAN – CERTIFICATE

- Students will demonstrate knowledge of computer networks in a business environment.
- Students will demonstrate basic knowledge of the cybersecurity principles of confidentiality, integrity, and availability (CIA).

COMPUTER INFORMATION TECHNOLOGY: SYSTEM ADMINISTRATOR – AS DEGREE AND CERTIFICATE

- Students will demonstrate knowledge of client and server operating systems.
- Students will demonstrate basic knowledge of the cybersecurity principles of confidentiality, integrity, and availability (CIA).
- Students will apply critical-thinking and problem-solving skills in a computer system environment.
- Students will demonstrate knowledge of the architectural principles of on-premise, cloud, and hybrid computer networks in a business environment.

COMPUTER SCIENCE – AS-T DEGREE

- Students will demonstrate an ability to use math, physics, and logic for solving problems in technology.
- Students will complete lower division courses for transfer to a CSU or other four-year institution.
- Students will design and write usable and effective computer programs using a highlevel language.

COMPUTERIZED ACCOUNTING SYSTEMS – CERTIFICATE

- Students will gain competencies that will lead to success working as an accounting clerk utilizing computerized accounting systems.
- Students will utilize a sequence of courses with industryadvised curriculum input that will lead to improvement of entry level skills and abilities of future employees.
- Students will identify career ladder opportunities in the accounting industry.
- Students will demonstrate an understanding of how to utilize different functions of the accounting software package by generating accounting reports and interpreting the resulting information.
- Students will record and analyze accounts receivable, accounts payable, invoicing, payroll, inventory, and project costing transactions using QuickBooks software.
- Students will complete the accounting cycle using the QuickBooks software.
- Students will prepare GAAP – required financial statements.
- Students will demonstrate an understanding of financial analysis using reports generated from the accounting software.

ENTERTAINMENT ART – DIGITAL CHARACTERS – CERTIFICATE

- When given a concept design or illustration problem, students will employ proficient problem-solving skills using research, development, ideation, and sequential art.
- When tasked with a character design, students will employ traditional and digital tools to generate an assortment of concept art, including creatures, characters, and costumes in both 2D and 3D.
- When tasked with the development of a character and story, students will effectively employ anatomy, gesture, staging, and action.
- When given a final concept, students will generate 3D assets using effective polyflow practices to allow for appropriate rendering, animation, and clean unwraps.

ENTERTAINMENT ART – DIGITAL ENVIRONMENT – CERTIFICATE

- When given a concept design or illustration problem, students will employ proficient problem-solving skills using research, development, ideation, and sequential art.
- When tasked with an environmental concept, students will employ traditional and digital tools to create a variety of concept art, including environments, vehicles, and props in both 2D and 3D.
- When tasked with an environmental concept, students will employ efficient and accurate digital drawing and painting skills that demonstrate an understanding of perspective and light logic.
- When given a final concept, students will generate 3D assets using effective polyflow practices to allow for appropriate rendering, animation, and clean unwraps.

GRAPHIC ART AND DESIGN – AA DEGREE

- When completing a graphic art or design project, students will be able to demonstrate fluency in the visual vocabulary and technical skills relevant to graphic art and graphic design.
- When assigned a graphic design project, students will demonstrate an understanding of the design process

through research, ideation, development, and presentation of graphic art and graphic design.

- When considering the context of a graphic art and/or graphic design solution, students will understand the cultural, social, and economic environment in which their ideas, products, and strategic solutions apply.
- When evaluating graphic design, students will be able to demonstrate through critiques, discussions, and coursework the principles and elements of design.
- When creating a portfolio of graphic art and/or graphic design work, students will apply professional awareness and understand the physical preparation needed to enter the graphic design workspace.

GRAPHIC DESIGN – AS DEGREE

- When completing a graphic design project, students will be able to demonstrate fluency in the visual vocabulary and technical skills relevant to graphic design.
- When assigned a graphic design project, students will demonstrate an understanding of the design process through research, ideation, development, and presentation of graphic design.
- When considering the context of a graphic design solution, students will understand the cultural, social, and economic environment in which their ideas, products, and strategic solutions apply.
- When evaluating graphic design, students will be able to demonstrate through critiques, discussions, and coursework the principles and elements of design.
- When creating a portfolio of graphic design work, students will apply professional awareness, and understand the physical preparation needed to enter the graphic design workspace.

GRAPHIC DESIGN – CERTIFICATE

- When completing a graphic design project, students will be able to demonstrate efficiency in the visual vocabulary and technical skills relevant to graphic design.
- When assigned a graphic design project, students will demonstrate an understanding of the design process through research, ideation, development, and presentation of graphic design.
- When considering the context of a graphic design solution, students will understand the cultural, social, and economic environment in which their ideas, products, and strategic solutions apply.
- When evaluating graphic design, students will be able to demonstrate through critiques, discussions, and coursework the principles and elements of design.
- When creating a portfolio of graphic design work, students will apply professional awareness, and understand the physical preparation needed to enter the graphic design workspace.

GRAPHIC DESIGN: ADVERTISING DESIGN – CERTIFICATE

- When developing a graphic design advertising project, students will be able to demonstrate a fundamental understanding of basic elements of typography (e.g., fonts, leading, kerning and tracking, etc.).
- When assigned a graphic design advertising project, students will be able to research, conceptualize, render, and create a vector-based design solution.
- When considering the context of a graphic design advertising solution, students will be able to use advanced

tools within a raster- and bitmap-based design software program.

- When evaluating graphic design, students will be able to demonstrate through critiques, discussions, and coursework the principles and elements of design.
- When creating a portfolio of graphic design advertising work, students will apply professional awareness, and understand the physical preparation needed to enter the graphic design workspace.

GRAPHIC DESIGN: BRANDING IDENTITY DESIGN – CERTIFICATE

- When developing a graphic design branding and identity project, students will be able to demonstrate a fundamental understanding of basic elements of typography (e.g., fonts, leading, kerning and tracking, etc.).
- When assigned a graphic design branding and identity project, students will be able to research, conceptualize, render, and create a vector-based design solution.
- When assigned a graphic design packaging project, students will be able to research, conceptualize, and render a branding and identity design solution for a client.
- When evaluating graphic design branding and identity design, students will be able to demonstrate through critiques, discussions, and coursework the principles and elements of design.
- When creating a portfolio of graphic design branding and identity work, students will apply professional awareness, and understand the physical preparation needed to enter the graphic design workspace.

GRAPHIC DESIGN: ENTREPRENEURIAL GRAPHIC DESIGN – CERTIFICATE

- When completing a graphic design project, students will be able to demonstrate efficiency in the visual vocabulary and technical skills relevant to graphic design.
- When assigned a graphic design project, students will demonstrate an understanding of the design process through research, ideation, development, and presentation of graphic design.
- When considering the context of a graphic design solution, students will understand the cultural, social, and economic environment in which their ideas, products, and strategic solutions apply.
- When evaluating graphic design, students will be able to demonstrate through critiques, discussions, and coursework the principles and elements of design.
- When creating a portfolio of graphic design work, students will apply professional awareness, and understand the physical preparation needed to enter the graphic design workspace.
- When creating a small graphic design business, students will apply professional awareness, and understand the physical preparation needed to enter the graphic design workspace.
- When developing a small graphic design business, students will apply professional awareness, and demonstrate and apply marketing needed to enter the graphic design workspace.
- When developing a small graphic design business, students will apply professional awareness, and create a basic business plan needed to enter the graphic design workspace.

GRAPHIC DESIGN: PACKAGING DESIGN – CERTIFICATE

- When developing a graphic design packaging design project, students will be able to demonstrate a fundamental understanding of basic elements of typography (e.g., fonts, leading, kerning and tracking, etc.).
- When assigned a graphic design packaging design project, students will be able to research, conceptualize, render, and create a vector-based design solution.
- When assigned a graphic design packaging design project, students will be able to use advanced tools and menus within a package software program to produce packaging design solutions.
- When evaluating graphic design packaging design, students will be able to demonstrate through critiques, discussions, and coursework the principles and elements of design.
- When creating a portfolio of graphic design packaging design work, students will apply professional awareness, and understand the physical preparation needed to enter the graphic design workspace.

GRAPHIC DESIGN: PUBLICATION DESIGN – CERTIFICATE

- When developing a graphic design publication design project, students will be able to demonstrate a fundamental understanding of basic elements of typography (e.g., fonts, leading, kerning and tracking, etc.).
- When assigned a graphic design publication design project, students will be able to use fundamental tools and menus within a publication design software program.
- When evaluating graphic design publication design, students will be able to demonstrate through critiques, discussions, and coursework the principles and elements of design.
- When creating a portfolio of graphic design publication design work, students will apply professional awareness, and understand the physical preparation needed to enter the graphic design workspace.

GRAPHIC DESIGN: WEBSITE DESIGN – CERTIFICATE

- When developing a website design project, students will be able to demonstrate a fundamental understanding of basic elements of typography (e.g., fonts, leading, kerning and tracking, etc.).
- When assigned a website design project, students will be able to use advanced tools within a raster- and bitmap-based design software program.
- When assigned a website design project, students will be able to use advanced tools and menus within website design software programs to produce website design solutions.
- When evaluating website design, students will be able to demonstrate through critiques, discussions, and coursework the principles and elements of design.
- When creating a portfolio of website design work, students will apply professional awareness, and understand the physical preparation needed to enter the website design workspace.

INCOME TAX PREPARER – CERTIFICATE OF SKILL PROFICIENCY

- Students will analyze and explain the federal and California state tax structures as they apply to individuals and small businesses.
- Students will prepare federal and state income tax returns for individuals and small business.
- Students will gather, identify, examine, sort, and classify information required for filing individual income tax returns.

- Students will apply basic tax law and determine filing requirements for actual tax returns.
- Students will use TaxWise software to accurately file individual federal and state income tax returns within the scope of the VITA program.
- Students will develop a system of quality control for the tax preparation process.
- Students will communicate effectively with taxpayers when explaining tax return results.

INTERNATIONAL BUSINESS – AS DEGREE AND CERTIFICATE

- Students will strengthen their skills to present a thorough review of the potential benefits, costs, and risks of doing business abroad and how the political, economic, and legal systems of countries vary.
- Students will analyze management ethical issues and cultural sensitivities in global business.
- Students will apply integrated marketing strategies with customers, partners, and regulators in the global marketplace.
- Students will describe international trade processes and the functions of the foreign exchange market.

LOGISTICS MANAGEMENT– AS DEGREE

- Student will know the role and historical development of supply chain management and integrated logistics functions.
- Students will know the relationship between operations, warehousing, distribution centers, and materials management.
- Students will know the importance of sound inventory management principles.
- Students will contribute to process improvement projects.

LOGISTICS MANAGEMENT – CERTIFICATE

- Students will know the role and historical development of supply chain management and integrated logistics functions.
- Students will know the relationship between operations, warehousing, distribution centers, and materials management.
- Students will know the importance of sound inventory management principles.
- Students will contribute to process improvement projects.

MANAGEMENT & SUPERVISION – AS DEGREE

- Students will identify the concepts of organizational design and behavior of organizations at the supervisory level.
- Students will describe how technology and globalization affect the supervisor's job.
- Students will describe the term "360-degree appraisal" and apply the appropriate methods of motivation in an organizational setting.
- Students will explain the effect of workforce diversity on motivating employees.

MANAGEMENT & SUPERVISION – CERTIFICATE

- Students will identify the concepts of organizational design and behavior of organizations at the supervisory level. Students will describe how technology and globalization affect the supervisor's job.

- Students will describe the term “360-degree appraisal” and apply the appropriate methods of motivation in an organizational setting.
- Students will explain the effect of workforce diversity on motivating employees.

MUSIC: COMPOSITION, PERFORMANCE, AND IMPROVISATION OF CONTEMPORARY MUSIC PRACTICES – AA DEGREE; MUSIC – AA-T DEGREE

- Students will demonstrate a second-year undergraduate level competency in piano performance and piano literature.
- Students will demonstrate the ability to perform in a large ensemble, chamber group, or as a soloist through blending, playing in tune and adhering to articulations and dynamics while conducting or being conducted in many different styles and periods.
- Students will demonstrate a second-year undergraduate level competency in music theory and musicianship through four-part chorale writing, analysis, audiation, and dictation of baroque through contemporary music styles.
- Students will demonstrate an understanding of the cultural, socioeconomic, and political implications of music history from antiquity through contemporary music styles.
- Students will demonstrate a basic understanding and practical knowledge of music technology.

MUSIC AND INTEGRATED TECHNOLOGY – AS DEGREE

- Students will be able to demonstrate an understanding of how the music business functions, and the role of professionals in the industry.
- Students will be able to demonstrate a basic understanding and practical knowledge of music technology in the areas of music production, studio recording, and live sound reinforcement.
- Students will be able to demonstrate a basic understanding of the creative processes for songwriting and electronic music production.
- Students will be able to demonstrate a first-year undergraduate level competency in music theory and musicianship through four-part chorale writing, analysis, audiation, and dictation of diatonic music examples.
- Students will be able to demonstrate an understanding of the cultural, socio-economic, and political implications of contemporary music history.

MUSIC: INTRODUCTORY ELECTRONIC MUSIC – CERTIFICATE

- Students will be able to produce electronic music in specified genres.
- Students will be able to compose electronic music utilizing various types of synthesis and samples.
- Students will be able to create electronic music utilizing various digital and analog formats.
- Students will be able to demonstrate an understanding of how the music business functions and the role of professionals in the industry.
- Students will be able to demonstrate a basic understanding and practical knowledge of music technology in the areas of music production, studio recording, and live sound reinforcement.

MUSIC: ADVANCED ELECTRONIC MUSIC – CERTIFICATE

- Students will be able to write complex electronic music incorporating contemporary harmony and modern compositional processes.
- Students will be able to compose electronic music utilizing various types of advanced synthesis.
- Students will be able to program mapping for various gesture controllers.
- Students will be able to demonstrate a second-year undergraduate level competency in music theory and musicianship through four-part chorale writing, analysis, audiation, and dictation of diatonic music examples.
- Students will be able to collaborate effectively through group project-based learning.

MUSIC: INTRODUCTORY SONGWRITING AND ARRANGING – CERTIFICATE

- Students will be able to compose original songs and lyrics in specified genres.
- Students will be able to analyze basic songs in order to identify genre, form, structure, groove, and lyrical elements.
- Students will be able to create a lead sheet for original compositions.
- Students will be able to demonstrate an understanding of how the music business functions and the role of professionals in the industry.
- Students will be able to demonstrate a basic understanding and practical knowledge of music technology in the areas of music production, studio recording, and live sound reinforcement.

MUSIC: ADVANCED SONGWRITING AND ARRANGING – CERTIFICATE

- Students will be able to write complex songs by incorporating contemporary harmony and form.
- Students will be able to analyze complex songs in order to identify genre, form, structure, groove, and lyrical elements.
- Students will be able to create a lead sheet, score, and parts for strings, horn section, and back-up harmonies.
- Students will be able to compose melodies and their accompaniment using harmony or counterpoint.
- Students will be able to demonstrate a second-year undergraduate level competency in music theory and musicianship through four-part chorale writing, analysis, audiation, and dictation of diatonic music examples.
- Students will be able to collaborate effectively through group project-based learning.

MUSIC: INTRODUCTORY SOUND DESIGN – CERTIFICATE

- Students will be able to demonstrate an understanding of how the music business functions and the role of professionals in the industry.
- Students will be able to demonstrate a basic understanding and practical knowledge of music technology in the areas of music production and studio recording.
- Students will be able to use basic approaches to digital signal processing (DSP) and synthesis to generate and sculpt sound.
- Students will be able to work in an intermediate-level, collaborative sound designing environment to produce a successful deliverable.

MUSIC: ADVANCED SOUND DESIGN – CERTIFICATE

- Students will be able to demonstrate an advanced understanding and knowledge of music technology in the areas of music production and studio recording.
- Students will be able to use more complex approaches to digital signal processing (DSP) and synthesis to generate and sculpt sound.
- Students will be able to work in an advanced-level, collaborative sound designing environment to produce a successful deliverable.
- Students will be able to explain advanced theoretical principles and concepts necessary to create complex sounds.

MUSIC: LIVE SOUND ENGINEER – CERTIFICATE

- Students will be able to demonstrate an understanding of how the music business functions and the role of professionals in the industry.
- Students will be able to demonstrate a basic understanding and practical knowledge of music technology in the areas of music production and studio recording.
- Students will be able to demonstrate how to set up, test, tune, and troubleshoot a live sound reinforcement system.
- Students will be able to demonstrate specific tasks that include operating a front-of-house mix and stage monitors from a side-stage mixing board, and performing tasks that include audio feedback as well as communication with musicians.
- Students will be able to collaborate effectively through group project-based learning.

MUSIC: RECORDING ENGINEER – CERTIFICATE

- Students will be able to demonstrate an understanding of how the music business functions and the role of professionals in the industry.
- Students will be able to use digital audio workstation (DAW) software for recording and non-linear audio editing.
- Students will be able to set up, record, and document a recording session.
- Students will be able to collaborate effectively through group project-based learning.

MUSIC: MUSIC PRODUCTION – CERTIFICATE

- Students will be able to demonstrate an understanding of how the music business functions and the role of professionals in the industry.
- Students will be able to provide leadership as a postproduction team member by giving direction to and working with engineers, managers, and performers.
- Students will be able to organize, conduct, and produce a recording session.
- Students will be able to collaborate effectively through group project-based learning.

MUSIC: MUSIC COMPOSITION – CERTIFICATE

- Students will be able to demonstrate an understanding of how the music business functions and the role of professionals in the industry.
- Students will be able to demonstrate a second-year undergraduate level competency in music theory and musicianship through four-part chorale writing, analysis, audiation, and dictation of diatonic music examples.
- Students will be able to utilize contemporary compositional styles and techniques for the purpose of training for work as

composers in the music as well as scoring films, video games, and other media.

- Students will be able to analyze complex musical compositions.

PHOTOGRAPHY – AA DEGREE

- Río Hondo photography majors will create properly exposed photographs that demonstrate effective control of aperture, shutter speed, and ISO settings in various lighting situations.
- Students will demonstrate an understanding of the safe and proper use of equipment including cameras, darkroom, lighting, and digital equipment.
- Students will identify basic principles of photographic composition and apply these elements in the creation of photographic images.
- Students will recognize and identify important historic photographic genres based on their formal and conceptual elements.
- Students will demonstrate visual literacy by verbally analyzing both the formal and conceptual properties of photographic works utilizing appropriate photographic vocabulary.
- Students will create a portfolio of photographic work that demonstrates an understanding of print finishing and presentation.

RETAIL MANAGEMENT – CERTIFICATE

- Students will explain the challenges and opportunities of managing a diverse workforce in a retail environment through their understanding of leadership and management models, motivation and reward theory, and conflict resolution techniques.
- Students will demonstrate their knowledge of financial management and budgeting by applying basic math skills to calculate retail math equations; making business decisions using these calculations; and preparing proforma financial statements.
- Students will demonstrate proper communication and critical thinking skills through written and oral assignments. Skill sets demonstrated will include document editing, preparation of business reports, and proper use of the communication process.

SMALL BUSINESS MANAGEMENT – AS DEGREE

- Students will develop an effective business plan by using guerrilla marketing strategies and basic financial statements.
- Students will distinguish between the debt vs. equity finance options.
- Students will explain the essential importance of cash flow planning for small business operations.
- Students will use break-even analysis to evaluate a marketing plan.

SMALL BUSINESS MANAGEMENT – CERTIFICATE

- Students will develop an effective business plan by using guerrilla marketing strategies and basic financial statements.
- Students will distinguish between the debt vs. equity finance options.
- Students will explain the essential importance of cash flow planning for small business operations.
- Students will use break-even analysis to evaluate marketing plan.

THEATER ARTS – AS DEGREE

THEATER ARTS – AA-T DEGREE

- All Theatre Arts majors will identify basic theatre vocabulary and terminology (for example, stage directions and theatre genres).
- Students will demonstrate an understanding of basic backstage practices and procedures.
- Students will memorize and perform a live scene successfully.

Behavioral and Social Science Division

ANTHROPOLOGY – AA-T DEGREE

- Students will analyze and interpret anthropological data and theories.
- Students will apply cross-cultural methods of analysis.
- Students will demonstrate an understanding of anthropological information.

CHICANA/O/X STUDIES – AA DEGREE

- Students will (1) define and explain the basic terms and concepts with the field of Chicana/o/x Studies; (2) identify and analyze at minimum two contemporary issues affecting the Chicana/o/x/ Latinx community.

CHILD DEVELOPMENT – AS DEGREE

- Students will explain and demonstrate the principles of developmentally appropriate practice while planning for and interacting with children in the early childhood classroom.

CHILD DEVELOPMENT – CERTIFICATE

- Students will explain and demonstrate the principles of developmentally appropriate practice while planning for and interacting with children in the early childhood classroom.

DRUG STUDIES – AS DEGREE

- Students will demonstrate an understanding of concepts, theories, and techniques that are foundational to the practice of addiction treatment.
- Students will demonstrate an understanding of assessment methods, treatment planning, and case management.
- Students will demonstrate an understanding of recoveryoriented behavior in addiction treatment management.
- Students will demonstrate an understanding of ethical practices in addiction treatment.

DRUG STUDIES – CERTIFICATE

- Students will demonstrate an understanding of concepts, theories, and techniques that are foundational to the practice of addiction treatment.
- Students will demonstrate an understanding of assessment methods, treatment planning, and case management.
- Students will demonstrate an understanding of recoveryoriented behavior in addiction treatment management.

- Students will demonstrate an understanding of ethical practices in addiction treatment.

GENERAL STUDIES IN SOCIAL BEHAVIOR AND SELF-DEVELOPMENT – AA DEGREE

- Students will think critically in order to understand social issues.

GENERAL STUDIES IN SOCIAL SCIENCES – AA DEGREE

- Students will think critically in order to understand social issues.
- Students will recognize verbally or in writing the basic vocabulary and concepts of at least one social or behavioral science discipline.

HISTORY – AA-T DEGREE

- Students will demonstrate command of historical chronology and basic literacy of key events associated with the study of the past.
- Students will accurately identify historical sources and then apply appropriate historical methods to explain what the source reveals about its historical context.
- Students will accurately describe, compare, and evaluate historical interpretations (secondary sources), analyzing them for their relative quality, accuracy, and persuasiveness.

PHILOSOPHY – AA-T DEGREE

- Given previous instruction in a philosophical theory, students will correctly identify and explain the basic elements of that theory.
- Students will demonstrate an ability to read and comprehend philosophical texts by accurately identifying the main point and supporting points.
- Students will apply the basic elements of a philosophical theory to a real world scenario.
- Students will develop/articulate a critical understanding of the work of Western philosophers, demonstrating through competent paraphrase.
- Students will defend a philosophical position or argument.
- Students will evaluate the validity of a deductive argument.
- Students will evaluate the strength of an inductive argument.
- Students will reason effectively.

PRESCHOOL TEACHER – CERTIFICATE

- Students will explain and demonstrate the principles of developmentally appropriate practice while planning for and interacting with children in the early childhood classroom.

PSYCHOLOGY – AA-T DEGREE

- Given research findings and theories in psychology, students will describe and/or evaluate the role that genetics and environment play in different behaviors.
- Students will compare and contrast the experimental method to other types of inquiry.
- Students will identify the important historical figures in psychology and explain their key contributions to the field.

SOCIOLOGY – AA-T DEGREE

- Students will understand the foundations of Sociology as a discipline.
- Students will have a broad understanding of society and social behavior.
- Students will understand the importance of social and historical contexts.
- Students will demonstrate basic social analysis skills.

Career and Workforce Education Division

ALTERNATIVE ENERGY TECHNOLOGY – AS DEGREE

- The skills developed during classes will enhance students' ability to complete the North American Board of Certified Energy Practitioners (NABCEP) and to become a specialist in the Solar Photovoltaic industry.
- The Degree will prepare students for transfer and/ or entry-level employment as an alternative energy technician within the renewable energy/green technology field.
- Students will have the knowledge and skills necessary to install residential and commercial solar and wind power systems.
- Students will know and understand green building design principles and also have the skills to successfully perform residential and commercial/industrial energy audits.

ALTERNATIVE ENERGY TECHNOLOGY – CERTIFICATE

- The skills developed during classes will enhance students' ability to complete the North American Board of Certified Energy Practitioners (NABCEP) and to become a specialist in the solar photovoltaic industry.
- The certificate will prepare an individual for entry-level employment as an alternative energy technician within the renewable energy/green technology field.
- Students will have the knowledge and skills necessary to install residential and commercial solar and wind power systems.

ALTERNATIVE FUELS AND ADVANCED TRANSPORTATION TECHNOLOGY – AS DEGREE

- Students will access legal rules and regulations from a variety of resources (state and federal), providing the opportunity to acquire the knowledge and hand skills demanded of modern transportation specialists.
- Students will be able to describe and demonstrate simulated on-the-job conditions regarding the nine congressional alternative fuel sources.
- Students who complete the career path cartographically examine and assemble information for a target audience who might use the alternative fuel types.
- Regardless of career path (private, government, or fleet) the Alternative Fuels AS degree or CoA student obtains transferable credit to a university and points towards qualifying as a certified CSA Fuel Tank Inspector.
- Students will be able to pass the safety requirements with complete knowledge of NFPA, CSA, CGA 6.4, and OSHA standards.

ALTERNATIVE FUELS AND ADVANCED TRANSPORTATION TECHNOLOGY – CERTIFICATE

- Students who complete the career path cartographically examine and assemble information for a target audience who might use the alternative fuel types.

- Regardless of career path (private, government, or fleet) the Alternative Fuels AS Degree or CoA student obtains transferable credit to a university and points towards qualifying as a certified CSA Fuel Tank Inspector.
- Students are capable of describing applications in all nine alternative fuel areas (compressed, liquid, generated electrical, and biodiesel).
- Students will access legal rules and regulations from a variety of resources (state and federal), providing the opportunity to acquire the knowledge and hand skills demanded of modern transportation specialists.
- Students will be able to pass the safety requirements with complete knowledge of NFPA, CSA, CGA 6.4, and OSHA standards.

ARCHITECTURAL DESIGN AND DRAWING – AS DEGREE

- Demonstrate an understanding of and ability to prepare the various drawings that make up a set of architectural plans for residential and commercial buildings.
- Demonstrate the ability to use hand tools and/or computer drafting software to prepare architectural plans for residential and commercial building structures.
- Demonstrate an understanding of the requirements of governing building codes applicable to the design of residential and commercial buildings.
- Demonstrate an understanding of the various systems that are utilized in standard building construction including structural, mechanical, electrical, and plumbing as well as an ability to read the construction documents prepared for these trades and cost estimation from plans.
- Demonstrate a knowledge of other fields related to and in support of development projects including building construction and engineering.
- Demonstrate expanded skills for careers in architecture such as graphical representation/renderings, design using BIM, direct field experience, or similar.

ARCHITECTURAL DESIGN AND DRAWING TECHNICIAN – CERTIFICATE

- Demonstrate an understanding of and ability to prepare the various drawings that make up a set of architectural plans for residential and commercial buildings.
- Demonstrate the ability to use hand tools and/or computer drafting software to prepare architectural plans for residential and commercial building structures.
- Demonstrate an understanding of the requirements of governing building codes applicable to the design of residential and commercial buildings.
- Demonstrate an understanding of various systems that are utilized in standard building construction including structural, mechanical, electrical, and plumbing as well as an ability to read the construction documents prepared for these trades and cost estimation from plans.
- Demonstrate a knowledge of other fields related to and in support of development projects including building construction and engineering.
- Demonstrate expanded skills for careers in architecture such as graphical representation/renderings, design using BIM, direct field experience, or similar.

ARCHITECTURAL DRAFTING – CERTIFICATE

- Demonstrate the ability to use hand tools and/or computer drafting software to prepare architectural plans for residential building structures.

- Demonstrate an understanding of and ability to prepare the various drawings that make up a set of architectural plans for one- and two-story residential buildings.
- Demonstrate the ability to use advanced BIM software in architectural design development projects.

ARCHITECTURE – AS DEGREE

- Given various visual communication technologies, such as traditional drafting, sketching, CADD, BIM (Building Information Modeling); perspective drawing, and three-dimensional model development; industry standards such as AIA and AEC (Architectural, Engineering and Construction); graphic standards, and the building code, students will effectively understand, communicate, and interpret design concepts and criteria for various disciplines related to the AEC industry.
- Students will be prepared to transfer to advanced fields of study in architecture-related occupations.

ARCHITECTURE: BASIC KNOWLEDGE – CERTIFICATE

- Demonstrate a knowledge of modern architectural history and its implications on design and construction of buildings.
- Demonstrate an understanding of various systems that are utilized in standard building construction including structural, mechanical, electrical, and plumbing as well as an ability to read the construction documents prepared for these trades and cost estimation from plans.
- Demonstrate an ability to use appropriate visualization techniques in the development of sketches and graphical representation/renderings for architectural design projects.

ARCHITECTURE: BASIC SKILLS – CERTIFICATE

- Demonstrate the ability to use hand tools and/or computer drafting software to prepare architectural plans for residential building structures.
- Demonstrate an understanding of and ability to prepare the various drawings that make up a set of architectural plans for one- and two-story residential buildings.
- Demonstrate additional knowledge of architecture with exposure to architectural history, blueprint reading and estimating, or graphic representation/renderings.

RESIDENTIAL ARCHITECTURE DESIGN – CERTIFICATE

- Demonstrate an understanding of and ability to prepare the various drawings that make up a set of architectural plans for one- and two-story residential buildings.
- Demonstrate the ability to use hand tools and/or computer drafting software to prepare architectural plans for residential building structures.
- Demonstrate an understanding of the requirements of governing residential building codes applicable to the design of one- and two-family homes.

AUTOMOTIVE GENERAL SERVICE TECHNICIAN – CERTIFICATE

- Students will work safely and identify safety and health hazards in an automotive service and repair facility.

- Students will communicate effectively, both verbally and through the written word, in an automotive service and repair environment.
- Students will properly use and care for automotive service and repair tools and equipment.
- Students will research, read, and use automotive service and repair literature, both in print and in electronic format.
- Students will identify, analyze, and evaluate general automotive service and repair issues to determine concern, cause, and correction.

AUTOMOTIVE TECHNOLOGY – AS DEGREE

- Students will work safely and identify safety and health hazards in an automotive service and repair facility.
- Students will be able to communicate effectively, both verbally and through the written word, in an automotive service and repair environment.
- Students will be able to properly use and care for automotive service and repair tools and equipment.
- Students will research, read, and use automotive service and repair literature, both in print and in electronic format.
- Students will identify, analyze, and evaluate specific automotive service and repair issues to determine concern, cause, and correction.

CARPENTRY: CONCRETE FORMING – AS DEGREE

- Students will accurately perform tests to confirm concrete quality.
- Students will demonstrate journey-level skills, including those skills necessary to build all concrete infrastructures.
- Students will correctly interpret building codes, plans, and specifications as they apply to the trade.
- Students will place and finish concrete in a professional manner.
- Students will cut, patch, maintain, and repair concrete structures.
- Students will perform assigned tasks in accordance with established industry quality and production standards.

CARPENTRY: CONCRETE FORMING – CERTIFICATE

- Students will demonstrate journey-level skills, including those skills necessary to build all concrete infrastructures.
- Students will successfully measure, cut, and shape wood, plastic, and other building materials.
- Students will erect, level, and install building framework including walls, floors, and doorframes.
- Students will perform assigned tasks in accordance with established industry quality and production standards.

CARPENTRY: GENERAL – AS DEGREE

- Students will accurately utilize industry-specific nomenclature of the craft in written or oral communication.
- Students will safely operate and maintain tools and equipment of the trade.
- Students will demonstrate the ability to interpret project plans, utilize software and technology, and determine appropriate construction methods and building techniques.
- Students will assess suitability (i.e., type, size, and grade) of materials and hardware to accurately determine materials lists for a given application.
- Students will apply the proper construction sequence and building codes for a given application.

- Students will analyze building flaws, provide solutions, and take corrective measures.

CARPENTRY: GENERAL – CERTIFICATE

- Students will accurately utilize industry-specific nomenclature of the craft in written or oral communication.
- Students will demonstrate a working knowledge of core equipment, safety, and installation procedures within the carpentry field.
- Students will demonstrate the ability to interpret project plans, utilize software and technology, and determine the appropriate construction methods and building techniques.
- Students will accurately perform basic, trade-related installations and maintenance.

CARPENTRY: SCAFFOLD CONSTRUCTION – AS DEGREE

- Students will accurately utilize industry-specific nomenclature of the craft in written or oral communication.
- Students will safely operate and maintain tools and equipment of the trade.
- Students will demonstrate the ability to interpret project plans, utilize software and technology, and determine appropriate construction methods and scaffolding techniques.
- Students will assess appropriateness of scaffold type, size, accessories, component parts, and hardware; and determine materials lists and staging for a given application.
- Students will apply the proper assembly/disassembly sequence and follow manufacturers' load charts and safety code requirements for a given application.
- Students will analyze potential design flaws and overloading to provide solutions and take corrective measures.

CARPENTRY: SCAFFOLD CONSTRUCTION – CERTIFICATE

- Students will accurately utilize industry-specific nomenclature of the craft in written or oral communication.
- Students will identify and explain the types and importance of scaffolding in general construction.
- Students will be able to safely and correctly erect and dismantle various scaffolding systems.
- Students will demonstrate the ability to interpret project plans, utilize software and technology, and determine appropriate construction methods and scaffolding techniques.

CIVIL DRAFTING – CERTIFICATE

- Demonstrate a basic understanding of the numerous subdisciplines within the field of Civil Engineering and common tasks required of each. Fields include geotechnical, transportation, environmental, construction, water resources, and structural engineering.
- Demonstrate the ability to use hand tools and/or computer drafting software to prepare basic civil engineering drawings in areas such as structural, transportation, grading, etc.
- Demonstrate a basic understanding of the materials of construction and interconnection of components that are common parts of civil development projects.

CIVIL DESIGN – AS DEGREE

- Demonstrate a basic understanding of the numerous subdisciplines within the field of Civil Engineering and common tasks required of each. Fields include geotechnical,

transportation, environmental, construction, water resources, and structural engineering.

- Demonstrate an understanding of and ability to accomplish engineering survey field measurements, calculations, and other related tasks.
- Demonstrate the ability to use hand tools and/or computer drafting and modelling software to prepare basic civil engineering drawings in areas such as structural, transportation, grading, etc.
- Demonstrate a basic understanding of the materials of construction and interconnection of components that are common parts of civil development projects.
- Demonstrate experience in preparation and reading of drawings related to construction projects including those for architectural, civil, structural, and other trades as well as the development of cost estimates from plans.

CIVIL DESIGN TECHNICIAN – CERTIFICATE

- Demonstrate a basic understanding of the numerous subdisciplines within the field of Civil Engineering and common tasks required of each. Fields include geotechnical, transportation, environmental, construction, water resources, and structural engineering.
- Demonstrate an understanding of and ability to accomplish engineering survey field measurements, calculations, and other related tasks.
- Demonstrate the ability to use hand tools and/or computer drafting and modelling software to prepare basic civil engineering drawings in areas such as structural, transportation, grading, etc.
- Demonstrate a basic understanding of the materials of construction and interconnection of components that are common parts of civil development projects.
- Demonstrate experience in preparation and reading of drawings related to construction projects including those for architectural, civil, structural, and other trades as well as the development of cost estimates from plans.

CONSTRUCTION MANAGEMENT – AS DEGREE

- Students will demonstrate a knowledge of the various documents typically included in a set of construction documents for civil engineering projects, including plans, notes, details, and specifications.
- Students will demonstrate the ability to prepare basic construction documents for buildings and other similar construction projects in accordance with building, planning, and related codes.
- Students will demonstrate a broad knowledge of the numerous yet related subdisciplines within the field of civil engineering and show familiarity with typical basic tasks as accomplished by licensed civil engineers within those subdisciplines.
- Students will use experience with statistical methods and apply basic cost accounting concepts to proposed construction projects for bidding and other financial considerations.
- Students will exhibit a knowledge of typical construction materials used in development projects including wood, steel, and concrete. Such knowledge will include specifying, mixing, sampling, and testing of concrete for buildings and similar construction projects.
- Students will exhibit a knowledge of engineering statics as it relates to the design and construction of buildings and related constructs.

ELECTRONIC TECHNOLOGY – AS DEGREE

- Students will be able to become specialists in the applied electronics industry.
- Students will be prepared for transfer and/or entry-level employment as electronics technicians.

ELECTRONIC TECHNOLOGY – CERTIFICATE

- Students training in theory and practical skills will demonstrate the necessary requirements for preparation as electronics technicians.
- Student will acquire the knowledge and hands-on skills demanded of modern electronics technicians.
- Students will have the knowledge and skills necessary to gain entry-level employment in the applied electronics industry.

ENGINEERING DESIGN TECHNOLOGY – AS DEGREE

- Given various visual communication technologies, such as traditional drafting and CADD; and industry standards such as ANSI/ASME and ISO, students will effectively communicate, understand, and interpret design concepts and criteria for industries that design, engineer and manufacture products.
- Students will be prepared for industry employment and advancement within a variety of related professions.
- Students will be prepared to transfer to advanced fields of study in related occupations.

ENGINEERING DESIGN TECHNOLOGY – CERTIFICATE

- Given various visual communication technologies, such as traditional drafting and CADD; and industry standards such as ANSI/ASME and ISO, students will effectively communicate, understand, and interpret design concepts and criteria for industries that design, engineer, and manufacture products.
- Students will be prepared for industry employment and advancement within a variety of related professions.

GEOGRAPHIC INFORMATION SYSTEMS – CERTIFICATE

- Students will describe and discuss the applications of geographic information systems (GIS) in their respective field. Students will use GIS to analyze and uncover spatial patterns and trends, model environmental conditions, and predict future scenarios, (e.g., post-fire conditions, or to model suitable locations for a new housing or wind farm development).
- Students will evaluate relevance of information for GIS projects and contribute new data from a variety of sources, including Global Positioning Systems (GPS).
- Students will cartographically examine and assemble information for a target audience.

HEAVY EQUIPMENT DIESEL ENGINES TECHNICIAN – CERTIFICATE

- When given a heavy machine, students will carry out an engine performance test and determine if it operates as intended.
- When given a heavy machine, students will safely service and repair a malfunctioning engine subsystem using

manufacturer's procedures while observing OSHA's shop and personal safety requirements.

- When given a heavy machine, students will document all service events and communicate them to the interested parties in accordance with the industry standards.

HEAVY EQUIPMENT ELECTRONICS TECHNICIAN – CERTIFICATE

- When given a heavy machine, students will carry out an electrical and/or a heating, ventilation, and air conditioning performance test and determine if these systems operate as intended.
- When given a heavy machine, students will safely service and repair a malfunctioning electrical and/or heating, ventilation, and air conditioning system using manufacturer's procedures while observing OSHA's shop and personal safety requirements.
- When given a heavy machine, students will document all service events and communicate them to the interested parties in accordance with the industry standards.

HEAVY EQUIPMENT GENERAL SERVICE TECHNICIAN – CERTIFICATE

- When given a heavy machine, students will carry out a performance test and determine if all systems operate as intended.
- When given a heavy machine, students will safely perform periodic maintenance and minor repairs using machine-specific lube charts and repair procedures while observing OSHA's shop and personal safety requirements.
- When given a heavy machine, students will document all service events and communicate them to the interested parties in accordance with the industry standards.

HEAVY EQUIPMENT HYDRAULICS TECHNICIAN – CERTIFICATE

- When given a heavy machine, students will carry out a hydraulic system performance test and determine if it operates as intended.
- When given a heavy machine, students will safely service and repair a hydraulic subsystem using manufacturer's procedures while observing OSHA's shop and personal safety requirements.
- When given a heavy machine, students will document all service events and communicate them to the interested parties in accordance with the industry standards.

HEAVY EQUIPMENT MAINTENANCE TECHNICIAN – CERTIFICATE

- When given a heavy machine, students will carry out a machine performance test and determine if all systems operate as intended.
- When given a heavy machine, students will carry out electrical performance tests and determine if the electrical system operates as intended.
- When given a heavy machine, students will carry out hydraulic performance tests and determine if the hydraulic system operates as intended.
- When given a heavy machine, students will carry out powertrain performance tests and determine if the powertrain system operates as intended.

- When given a heavy machine, students will carry out engine performance tests and determine if the engine operates as intended.
- When given a heavy machine, students will document all service events and communicate them to the interested parties in accordance with industry standards.

HEAVY EQUIPMENT POWERTRAINS TECHNICIAN – CERTIFICATE

- When given a heavy machine, students will carry out a powertrain performance test and determine if it operates as intended.
- When given a heavy machine, students will safely service and repair a powertrain subsystem using manufacturer's procedures while observing OSHA's shop and personal safety requirements.
- When given a heavy machine, students will document all service events and communicate them to the interested parties in accordance with the industry standards.

HEAVY EQUIPMENT SERVICE TECHNICIAN – CERTIFICATE

- When given a heavy machine, students will carry out a performance test and determine if all systems operate as intended.
- When given a heavy machine, the student will be able to troubleshoot the root cause of a malfunctioning system and determine the best course of action.
- When given a heavy machine, students will safely service and repair a malfunctioning system using manufacturer's procedures while observing OSHA's shop and personal safety requirements.
- When given a heavy machine, students will document all service events and communicate them to the interested parties in accordance with the industry standards.

HEAVY EQUIPMENT TECHNOLOGY – AS DEGREE

- When given a heavy machine, students will carry out a performance test and determine if all systems operate as intended.
- When given a heavy machine, students will troubleshoot the root cause of a malfunctioning system and determine the best course of action.
- When given a heavy machine, students will safely service and repair a malfunctioning system using manufacturer's procedures while observing OSHA's shop and personal safety requirements.
- When given a heavy machine, students will document all service events and communicate them to the interested parties in accordance with the industry standards.

HONDA PROFESSIONAL CAREER TRAINING PROGRAM SPECIALIZATION (PACT) – AS DEGREE

- The skills developed during classes will enhance students' ability to complete the (ASE) Automotive Service Excellence Certification Tests A-1 through A-8, Automotive Technician, and to become a specialist for Honda/Acura vehicles.
- The degree is designed to prepare students for transfer and/or entry-level employment as an Automotive Technician within a Honda/ Acura Dealer.

SURVEYING, MAPPING AND DRAWING – CERTIFICATE

- Given instruction in both the theory and practice of land surveying, instruction in various visual communication technologies such as traditional drafting and CADD, and industry standards, students will effectively collect, develop, map, communicate, understand, and interpret geospatial data.
- Students will be prepared for industry employment and advancement within a variety of related professions, such as land surveying, civil engineering, construction engineering, transportation engineering, and geotechnical engineering.

WELDING TECHNOLOGY – AS DEGREE

- Demonstrate Proficiency in Various Welding Processes: Upon completion of the program, students will be able to proficiently perform and demonstrate various welding processes, including shielded metal arc welding (SMAW), gas metal arc welding (GMAW), flux cored arc welding (FCAW), and gas tungsten arc welding (GTAW) on ferrous and non-ferrous metals.
- Apply Metallurgical Principles in Welding Practices: Graduates will be able to apply basic metallurgical principles to understand the properties of metals, including steel and alloys, and their behavior under heat treatment, enabling them to make informed decisions in welding procedures.
- Interpret and Utilize Engineering Drawings for Welding Projects: Students will develop the ability to interpret and utilize engineering drawings, blueprints, and technical specifications essential for welding and manufacturing, facilitating effective communication and implementation of welding projects.
- Execute High-Quality Welds Following Industry Standards: Graduates will be able to execute high-quality welds following industry standards such as American Welding Society (AWS) guidelines and the City of Los Angeles certified welder exam requirements, ensuring compliance with safety protocols and quality standards.
- Prepare for and Pass Welding Certification Examinations: Upon completion of the program, students will possess the necessary skills and knowledge to prepare for and successfully pass welding certification examinations, including those administered by the City of Los Angeles Department of Building & Safety, demonstrating competency for employment in the welding industry.

WELDING TECHNOLOGY/LADBS STRUCTURAL STEEL CERTIFICATION PROGRAM – CERTIFICATE

- Demonstrate Proficiency in Multiple Welding Processes: Students will demonstrate proficiency in multiple welding processes, including gas metal arc welding (GMAW), shielded metal arc welding (SMAW), and flux cored arc welding (FCAW) on ferrous and non-ferrous metals, as required by the City of Los Angeles Department of Building and Safety (LADBS) certification standards.
- Apply Safety Standards and Procedures in Welding Practices: Upon completion of the certificate program, students will apply industry-standard safety practices and procedures in welding operations, ensuring compliance with occupational health and safety regulations.
- Interpret and Execute Welding Specifications and Codes: Graduates will be able to interpret and execute welding specifications, codes, and procedures specific to structural steel, light gauge steel, and structural aluminum, meeting the requirements for LADBS certification.

- Perform Welding Inspections and Non-Destructive Testing (NDT): Students will perform welding inspections and basic non-destructive testing (NDT) techniques to assess weld quality and integrity, aligning with industry standards and certification requirements.
- Prepare for and Pass LADBS Structural Steel Certified Welder Examination: Completion of the program will prepare students to successfully pass the City of Los Angeles Department of Building and Safety (LADBS) Structural Steel Certified Welder Examination, demonstrating competency in structural steel, light gauge steel, and structural aluminum welding.
- Apply Metallurgical Knowledge in Welding Applications: Graduates will apply fundamental metallurgical knowledge to understand the properties of metals and alloys, optimizing welding techniques and procedures for specific materials used in structural welding.
- Demonstrate Proficiency in Written and Practical Welding Skills: Students will demonstrate proficiency in both written comprehension of welding specifications and practical application of welding techniques, meeting the standards required for LADBS certification and industry employment.

Communications and Languages Division

AMERICAN SIGN LANGUAGE: AMERICAN SIGN LANGUAGES (ASL) – CERTIFICATE

- Students will be able to communicate in ASL with community members outside of the classroom.
- Students will be able to interact in a culturally appropriate manner with members of the Deaf community.
- Students will demonstrate confidence in communicating with ASL.

AMERICAN SIGN LANGUAGE: DEAF STUDIES – AA DEGREE

- Students will demonstrate a high level confidence in communicating using ASL in all environments.
- Students will have an in-depth knowledge of the Deaf culture and community, and will be able to apply this knowledge in social, professional, and academic settings.
- Students will meet the entrance expectations for a bachelor degree in Deaf studies in fields such as Deaf education.

AMERICAN SIGN LANGUAGE: FOUNDATIONS OF INTERPRETING – AA DEGREE

- Students will possess a strong foundation in the skills needed to provide ASL/English interpreting
- Students will meet the entrance expectations for a bachelor degree in ASL/English interpreting at a 4-year university.
- Students will possess the necessary, industry-specific business skills to work as a professional interpreter after mastering the interpreting skill set.

COMMUNICATION STUDIES – AA-T DEGREE

- Students will identify conflict management strategies in an interpersonal relationship context.
- Students will deliver a coherent speech inclusive of a distinctive introduction, body, and conclusion, as well as 2-3 substantive main points within the body and appropriate transitions.

- Students will control/manage their verbal and nonverbal communication to enhance the audience's understanding and appreciation of the speech message appropriate to the specific audience.
- Students will argue in favor of a thesis with a supportive example and refute an opposing position with an accompanying example.
- Students will think critically in order to construct a debate position, including the debater's reasoning.

CREATIVE WRITING: CREATIVE WRITING – CERTIFICATE

- Students will identify, analyze, and evaluate creative forms of writing including the novel, short story, poetry, adolescent literature, screenwriting, and playwriting.
- Students will brainstorm, draft, revise, and produce their own pieces of nonfiction and fiction to final completion.
- Students will employ critical thinking skills, research strategies, revision techniques, and correct grammar and usage in the development of their own writing.

CREATIVE WRITING: NOVEL WRITING – CERTIFICATE

- Students will identify, analyze, and evaluate creative forms of writing with an emphasis on the novel and how it is distinguished as a literary genre in regards to narrative structure, point of view, character development, setting, theme, style, imagery, and symbolism.
- Students will brainstorm, draft, revise, and produce their own pieces of nonfiction and fiction to final completion.
- Students will employ critical thinking skills, research strategies, revision techniques, and correct grammar and usage in the development of their own writing.

CREATIVE WRITING: PLAYWRITING AND SCREENWRITING – CERTIFICATE

- Students will identify, analyze, and evaluate creative genres of writing with an emphasis on playwriting and screenwriting.
- Students will brainstorm, draft, revise, and produce their own pieces of nonfiction and fiction to final completion.
- Students will employ critical thinking skills, research strategies, revision techniques, and correct grammar and usage in the development of their own writing.

CREATIVE WRITING: POETRY WRITING – CERTIFICATE

- Students will identify, analyze, and evaluate creative forms of writing with an emphasis on poetry as a literary genre, including techniques of sound, tropes and figurative language, and thematic development.
- Students will brainstorm, draft, revise, and produce their own pieces of nonfiction and fiction to final completion.
- Students will employ critical thinking skills, research strategies, revision techniques, and correct grammar and usage in the development of their own writing.

CREATIVE WRITING: SHORT STORY WRITING – CERTIFICATE

- Students will identify, analyze, and evaluate creative forms of writing with an emphasis on the short story to increase appreciation, understanding, and enjoyment of authors' various forms and techniques.
- Students will brainstorm, draft, revise, and produce their own pieces of nonfiction and fiction to final completion.

- Students will employ critical thinking skills, research strategies, revision techniques, and correct grammar and usage in the development of their own writing.

CREATIVE WRITING: WRITING FOR CHILDREN – CERTIFICATE

- Students will identify, analyze, and evaluate creative genres of writing with an emphasis on children's literature from ancient times to the present, and examine the historical and cultural environments in which this literature was written.
- Students will brainstorm, draft, revise, and produce their own pieces of nonfiction and fiction to final completion.
- Students will employ critical thinking skills, research strategies, revision techniques, and correct grammar and usage in the development of their own writing.

ENGLISH & LITERATURE – AA DEGREE

- Students will formulate an argument and support it with relevant evidence.
- Students will communicate ideas in an organized, logical manner.
- Students will incorporate quoted or paraphrased material from credible outside sources.
- Students will document sources using a designated citation format.
- Students will identify the work of significant writers, literary works, and cultural movements from a variety of diverse communities.
- Students will interpret a selection in light of the significant social and historical factors that inform the text.
- Students will explicate a selection using rhetorical textual analysis.
- Students will apply standard English grammar and mechanics in both written and oral communication.

MASS COMMUNICATIONS: MASS MEDIA – AS DEGREE

- Students will identify the evolution of Mass Media in books, magazines, television, newspapers, radio, motion pictures, the internet, blogs, twitter, cell phones, and computer use in the world today.
- Students will write a news story that demonstrates effective interviewing and note-taking techniques.
- Students will take press photos, print the photos, and prepare the composition of the photos for publication.
- Students will write a news story of a particular length that can be produced on the air for an allotted time slot.

MASS COMMUNICATIONS: MASS MEDIA – CERTIFICATE

- Students will identify the broad area of the history, theory, aesthetic principles, and techniques used in motion pictures.
- Students will take press photos, print the photos, and prepare the composition of the photos for publication.
- Students will write a news story of a particular length that can be produced on the air for an allotted time slot.
- Students demonstrate knowledge of the broad area of the history, theory, aesthetic principles, and techniques used in motion pictures.

MASS COMMUNICATIONS: PRINT MEDIA – AS DEGREE

- Students gather information, write, and edit copy for use in the print school newspaper that demonstrates an

understanding of the rights and responsibilities of the student press to the community it serves.

- Students gather information, write, and edit copy for use in the print school newspaper that demonstrates an understanding of the rights and responsibilities of the student press to the community it serves. Students will write a general interest article or story to be published in the college magazine for a student audience.
- Students will take press photos, print the photos, and prepare the composition of the photos for publication.

MASS COMMUNICATIONS: PRINT MEDIA – CERTIFICATE

- Students will gather information, write, and edit copy for use in the print school newspaper that demonstrates an understanding of the rights and responsibilities of the student press to the community it serves.
- Student will be able to gather information, write, and edit copy for use in the print school newspaper that demonstrates an understanding of the rights and responsibilities of the student press to the community it serves.
- Students will be able to write a general interest article or story to be published in the college magazine for a student audience.
- Students will take press photos, print the photos, and prepare the composition of the photos for publication.
- Students will write a news story that demonstrates effective interviewing and note-taking techniques.

SPANISH – AA-T DEGREE

- Using critical thinking skills, students will speak fluently and comprehend at the intermediate level commensurate with the grammar and vocabulary of that level, and demonstrate increased knowledge and appreciation of the Spanish language, literature, and culture.
- Students will write dialogues, letters, reports, summaries, and essays on various topics using correct grammar, syntax, punctuation, capitalization, and diacritical marks.
- Students will read, discuss and analyze literary selections in Spanish that vary in style, from simple journalist writing to highly original and complex literary works.

Health Science and Nursing Division

CERTIFIED NURSE ASSISTANT HOME HEALTH AIDE – CAREER CERTIFICATE

- Students will have the theoretical knowledge and practical skills in caring for a patient in the home care setting.
- Students who are licensed CNAs in California will gain experience in caring for patients in a home or assisted living setting.
- Students will have received hands-on clinical experience in caring for adults residing in their own homes.
- Students will gain experience in assisting in the activities of daily living including housekeeping and cooking as well as medication administration and personal care.
- Students will be equipped with the skills, knowledge, and experience to be employed in a home health setting as a certified nursing assistant.

NURSING – AS DEGREE

- Students will engage in legal and ethical nursing practice that is patient centered and culturally appropriate for individuals, families, and communities.
- Students will integrate principles of quality improvement and safety into nursing practice within healthcare organizations and systems.
- Students will utilize evidence-based practice in providing nursing care to patients across the lifespan.
- Students will demonstrate leadership behaviors that influence individuals and groups in the delivery of nursing care.
- Students will communicate effectively and collaboratively with the healthcare team, patient, family, and community in the delivery of nursing care.
- Students will utilize technologies for the management of information and the delivery of patient care.

NURSING ASSISTANT PRE-CERTIFICATION TRAINING COURSE – CAREER CERTIFICATE

- Students will have all the theoretical knowledge and practical skills to care for patients within the scope of practice of a certified nursing assistant (CNA).
- Students will have completed both didactic study as well as clinical hours required as preparation to becoming a CNA.
- Students will have gained hands-on experience while completing their clinical hours with faculty in an extended care facility.
- Students will have completed the required coursework to take the California State Certification exam to become licensed as a CNA in the State of California.

NUTRITION AND DIETETICS – AS-T DEGREE

- Students will be able to analyze and interpret client nutritional information.
- Students will be able to demonstrate the application of nutritional information in developing appropriate plans for clients.
- Students will have the appropriate knowledge of and be able to describe food safety and principles to clients.
- Students will have completed coursework that aligns them to transfer to a four-year university to pursue an advanced degree in the field of nutrition or dietetics leading to employment in the field.

ORTHOPEDIC TECHNICIAN PROGRAM – CERTIFICATE

- Students will have the knowledge and skills in the application of splints and casts for standard clients needs in the orthopedic setting.
- Students will have the knowledge and skills to accurately access the mobility or positioning needs of clients and intervene when appropriate.
- Students will gain hands on experience in the application of splints and casts in both the lab setting as well as during clinical preceptor hours.
- Students will have completed all the required didactic content and skills required to be eligible to take the national orthopedic technologist certification exam.
- Students will have been provided the knowledge and skills necessary to seek employment as an orthopedic technologist upon completion of the program.

VOCATIONAL NURSING – AS DEGREE

- Students will be prepared to care for patients utilizing the aspects of the nursing process and incorporating the medical model.
- Students will possess all the skills and knowledge to care for patients practicing within the scope of practice of the Licensed Vocational Nurse.
- Students will have completed all the course work in both theory and clinical to be eligible to take the National Council Licensure Examination for Practical Nursing (NCLEX-PN).
- Students will be prepared to gain employment as a Licensed Vocational Nurse in California after successful completion of State licensure.
- Students will have completed all general education course work earning an associates of science degree.

VOCATIONAL NURSING – CERTIFICATE

- Students will be prepared to care for patients utilizing the aspects of the nursing process and incorporating the medical model.
- Students will possess all the skills and knowledge to care for patients practicing within the scope of practice of the Licensed Vocational Nurse.
- Students will have completed all the course work in both theory and clinical to be eligible to take the National Council Licensure Examination for Practical Nursing (NCLEX-PN).
- Students will be prepared to gain employment as a Licensed Vocational Nurse in California after successful completion of State licensure.

Kinesiology and Athletics Division

ATHLETIC TRAINER'S AIDE – CERTIFICATE

- Students will conduct a primary and secondary survey following an injury and make emergency treatment decisions based on results.
- Students will treat a variety of open wounds as a first responder, recognizing the use of personal protective equipment.
- Students will apply appropriate splinting and taping techniques for a variety of injuries using a variety of medical supplies.
- Students will identify the indications, contraindications, and application techniques for the use of several therapeutic modalities.

COACHING OF SPORTS – CERTIFICATE

- Students will understand the various demands required to be successful in the coaching field.
- Students will be prepared to complete coaching certifications for the American Sports Education Program (ASEP) and California Interscholastic Federation (CIF) test for employment.
- Students will be exposed to the physical, technical, tactical, psychological, and social elements within sports.
- Students will understand the different types of workouts and diets required by the population with which they are working.
- Students will understand the importance of administration, fundraising, communication, team building, and defining success in the coaching environment.

COMMUNITY HEALTH WORKER – CERTIFICATE

- In a health education lecture, articulate the application of health and wellness principles to health conditions and special populations.
- Value individual differences in needs and goals in developing health and wellness plans.
- As a role model for health, be able to develop a personal vision and philosophy towards lifelong wellness.
- For professional development, Seek opportunities for lifelong learning, enhancement of the six dimensions of wellness.
- Using technology for video creating, demonstrate knowledge by educating community members in principles of health and wellness.
- In an emergency, understand basic procedures and situational awareness.

FITNESS SPECIALIST – CERTIFICATE

- Students will analyze individual health and fitness levels and create individual exercise programs.
- Students will apply and demonstrate exercise testing skills and techniques to real world situations, such as individual client fitness assessments.
- Students will adapt to diverse populations and fitness levels and have an awareness of special needs individuals.
- Students will apply fitness concepts, definitions, and principles to personal training, group fitness instructions, or health and fitness settings.
- Students will have a career in the personal training or fitness instructor field, or transfer to a 4-year institution, within 3 years.

FITNESS AND SPORT MANAGEMENT – CERTIFICATE

- Students will be able to analyze and organize fitness and sport management and operations; and to communicate effectively, both written and verbally, in professional fitness and sport settings.
- Students will be able to demonstrate sensitivity to a multicultural community, including related social issues; and skills in leadership, communication, collaboration, and managing personnel.
- Students will be able to demonstrate a professional understanding of the legal aspects of sport and ethics and apply those principles to managing fitness and sport businesses.
- Students will be able to achieve academic and practical foundations with the ultimate goal of employment in the fitness and/or sport management industries.

HEALTH, SAFETY, AND WELLNESS – CERTIFICATE

- Students will gain an understanding of health and wellness concepts and evaluate personal strategies to manage stress and anxiety levels.
- Students will prepare to fulfill the requirements for American Red Cross certifications in Standard First Aid, Cardiopulmonary Resuscitation (C.P.R.) and Automatic Defibrillation (AED).
- Students will study nutrition and study the function of optimal fuels for the exercising muscle.

INTERCOLLEGIATE ATHLETIC COMPETITION – CERTIFICATE

- Students will demonstrate the ability to utilize various game strategies and execution of technical skill.
- Students will display the ability to work within a team to accomplish a common goal and represent the college.
- Students will demonstrate improved cardiovascular health, muscular strength and muscular endurance.

MAT PILATES INSTRUCTOR – CERTIFICATE

- Students will design, develop, and implement Pilates mat exercise programs for individuals and/or groups, including special populations.
- Students will know how to assist individuals and groups to enhance core strength, increase physical performance, and prevent injury while providing modifications.
- Students will assess client's movement imbalances, and create Pilates Mat exercise prescription plans specific to their needs.

PEAK PERFORMANCE FOR SPORT – CERTIFICATE

- Students will gain an understanding of the connection between cognitive strategies and performance in fitness and sport.
- Students will study physiological, psychological and sociological principles to evaluate human performance.
- Students will demonstrate understanding of basic anatomical principles used to maximize performance, biomechanics, training techniques and the role of nutrition to enhance performance.

SPORT LEADERSHIP – CERTIFICATE

- Students will gain an understanding of leadership theories, motivation strategies, sociological and psychological theories in relation to sport.
- Students will analyze leadership styles, servant and transformational leadership theories and evaluate leadership within teams and organizations.
- Students will study methods of critical thinking, research, and development of their own leadership philosophy.

SPORTS STUDIES – CERTIFICATE

- Students will evaluate current issues in sport and sport leadership.
- Students will gain an understanding of the history of sport and the role sport plays in society.
- Students will study the legal aspects of sport and ethics as applied to the fitness and sport environments.

STRENGTH AND PERFORMANCE COACH – CERTIFICATE

- In the strength lab, apply knowledge and understand exercise science principles and terminology.
- With specific athletic populations, demonstrate proficiency in fitness, nutritional, and functional movement assessments of individuals.
- Through video and in-person observation, understand the unique movements associated with skill development and performance in various sports.

- For a performance athlete, design science-based exercise programs for both injury prevention and performance enhancement.
- Develop performance-based group exercise routines to meet the needs various sport and tactical athletes.
- Using the latest technology and software programs, input and analyze exercise performance data.

YOGA TEACHER TRAINING – CERTIFICATE

- Students will demonstrate and explain the anatomical alignment points and physiological benefits of key poses in each category of hatha yoga asana/postures: standing/ balancing poses, forward bends, backbends, and inversions.
- Students will demonstrate and explain the form and functions of four basic yogic breath control techniques; diaphragmatic breath, ujjayi breath, nadi shodana and breath of fire.
- Students will demonstrate and explain the form and function of four basic meditation techniques used in hatha yoga; following the breath, visualization, loving kindness and mantra meditation.
- Students will design and teach a beginning hatha yoga class and utilize best practices for cueing, assisting and giving adjustments.
- Students will summarize the history and contemporary context of hatha yoga. Include the ethics of yoga in Patanjali's "Yoga Sutras" and how this can be implemented in the contemporary student-teacher relationship.

Mathematics, Sciences, and Engineering Division

BIOLOGY – AS DEGREE

- Students will develop the ability to evaluate scientific information critically, using analytical reasoning and quantitative skills.
- Students will strengthen their skills in reading, writing, oral communication, and critical thinking.
- Students will demonstrate knowledge in three major subdisciplines of biology: cellular and molecular biology, organismal biology, and ecology and evolution
- Students will understand and use scientific methodology.

BIOLOGY: HEALTH SCIENCE PREPARATION – CERTIFICATE

- Students will demonstrate knowledge in the three prehealth science disciplines: human anatomy, microbiology, and human physiology.
- Students will be aligned to transition to programs in the health sciences and nursing.

BIOTECHNOLOGY – CERTIFICATE

- Students will apply biotechnological concepts, standards, and skills in appropriate industrial applications.
- Students will acquire the ability to work as a team to meet the needs of the biotechnology industry.

ENVIRONMENTAL SCIENCE – AS DEGREE

- Students will apply environmental science concepts and analytical procedures in various fields.

- Students will have the ability to apply economic principles to analyze environmental problems.
- •Students will have the ability to work as a member of an interdisciplinary team to solve environmental problems.
- Students will strengthen their skills in reading, writing, oral communication, and critical thinking.

ENVIRONMENTAL TECHNOLOGY – AS DEGREE

- Students will identify the types of environmental, health, and safety hazards that may be encountered in the environmental field.

ENVIRONMENTAL TECHNOLOGY – CERTIFICATE

- Students will identify the types of environmental, health, and safety hazards that may be encountered in the environmental field.

GENERAL STUDIES: SCIENCE & MATHEMATICS – AS DEGREE

- Students will critique and interpret data presented in appropriate graphical and/or verbal formats.
- Students will evaluate the strengths and limitations of scientific models employed to describe a particular phenomenon.

MATHEMATICS – AS-T DEGREE

- Students will analyze a given scenario and apply an appropriate problem-solving approach to explain and/or find a solution.
- Students will create, interpret, and analyze graphical representations of data and/or equations and inequalities.
- Students will use appropriate technology to solve mathematical problems and/or interpret data, and judge the reasonableness of their results

Student Learning Outcomes (SLOs) – General Education

General Education Student Learning Outcomes (SLOs) represent the knowledge, skills, and/or abilities that students should demonstrate upon completion of the general education requirements.

HUMANITIES

- Students will critique artistic works, evaluating elements relevant to the given work (e.g., texture, form, timbre, color, conflict, rhythm, etc.) and how these are effectively integrated in the work as a whole.
- Students will create or perform artistic works and critically evaluate their efforts.
- Students will interpret, analyze, and critique diverse literary texts by means of critical reading, classroom discussion, and composition.
- Students will perform tasks that are meaningful, personalized, and/or culturally relevant or appropriate in the target language. (Foreign language humanities outcome.)
- Given oral questions, written prompts, and/or reading selections, students will demonstrate productive and receptive skills in the target language. (Foreign language humanities outcome.) Mathematics

- Given the description of a real-world problem, students will construct correct equations and/or inequalities to represent the problem and determine the correct solution or set of solutions.
- Students will critique and interpret data presented in appropriate graphical and/or verbal formats.
- Students will effectively employ calculators, computers, and other relevant technology in solving mathematical problems.

NATURAL SCIENCES

- Students evaluate quantitative and/or qualitative data and develop a reasonable hypothesis based on these results.
- Presented with an argument promoting a particular hypothesis, students will critique the stated assertions and access whether or not the given hypothesis may be valid.
- Students will utilize appropriate scientific apparatus to obtain quantitative and/or qualitative data and correctly document the resulting measurements.
- Given a problem of scientific interest, students will develop and execute a procedure to investigate the problem.
- Students will evaluate the strengths and limitations of scientific models employed to describe a particular phenomenon.

KINESIOLOGY

- Students will develop and demonstrate an understanding of the role of diet and exercise in controlling chronic health problems.
- Students will critique their particular situation in relation to the principles of health, fitness and wellness.

- Students will explain methods and techniques used to promote cardiovascular fitness.
- Students will compare and contrast different types of exercise programs and diets and their relationship to their fitness and wellness.

READING AND WRITTEN/ORAL EXPRESSION

- Students will analyze academic or literary texts to discern meaning.
- Students will summarize main ideas from academic or literary texts.
- Students will support an argument with evidence.
- Students will organize ideas coherently.
- Students will evaluate the reliability of both print and electronic (research) sources and use them effectively.
- Using a conventional citation format, students will document both print and electronic sources.
- Students will vary or employ appropriate tone in conveying ideas.
- Students will use standard English grammar and mechanics.

SOCIAL AND BEHAVIORAL SCIENCES

- Students will recognize the basic vocabulary and concepts of at least one social or behavioral science discipline verbally or in writing.
- Students will compare and contrast social institutions and processes across a range of historical periods and cultures.
- Students will recognize and explain the methods.

12 Courses of Instruction

Course Numbering System

1-039	Non-degree Credit Courses
040-099	Degree Applicable Non-Transfer Courses
100-290*	Degree Applicable and Transfer level courses
299	Directed Studies
300-499	Upper Division Courses

*Courses numbered 100 and above are usually university parallel courses and are offered for transfer to colleges and universities. See course descriptions for any restrictions on transfer.

**FAC and PAC 4300 Series are non-transferable.

Code for Transferability of Courses

Where applicable, transferability of listed courses is designated by boldface symbols:

UC - Transfers to all University of California campuses and to most other four-year colleges.

UC (Credit Limit - See Counselor) - Transfers to all University of California campuses and to most other four-year colleges, but there are limitations to the number of units that can be accepted for credit. The student should consult a counselor for details.

CSU - Transfers to all campuses of the California State University system and to many other four- year colleges.

COURSE IDENTIFICATION NUMBERING SYSTEM (C-ID)

The Course Identification Numbering System (C-ID) is a statewide numbering system independent from the course numbers assigned by local California community colleges. A C-ID number next to a course signals that participating California colleges and universities have determined that courses offered by other California community colleges are comparable in content and scope to courses offered on their own campuses, regardless of their unique titles or local course number. Thus, if a schedule of classes or catalog lists a course bearing a C-ID number, for example COMM 110, students at that college can be assured that it will be accepted in lieu of a course bearing the C-ID COMM 110 designation at another community college. In other words, the C-ID designation can be used to identify comparable courses at different community colleges. However, students should always go to www.assist.org to confirm how each college's course will be accepted at a particular four-year college or university for transfer credit.

The C-ID numbering system is useful for students attending more than one community college and is applied to many of the transferable courses students need as preparation for transfer. Because these course requirements may change and because courses may be modified and qualified for or deleted from the C-ID database, students should always check with a counselor to determine how C-ID designated courses fit into their educational plans for transfer.

Counselors can always help students interpret or explain this information.

If a Río Hondo College course has been approved for C-ID, you will find the corresponding C-ID number next to the course prefix and number within the course descriptions on the chart that follows. More courses may have been approved for C-ID since the publication of this catalog.

More courses may have been approved for C-ID since the publication of this catalog.

You can also see C-ID approvals for Río Hondo College at C-ID.net.

Prerequisites

A course prerequisite indicates that the preparation or previous coursework is considered necessary for success in the desired course. In order for a prerequisite requirement to be met, the prerequisite course must be passed with at least a satisfactory grade. If a prerequisite course is taken at Rio Hondo College, a grade of "P" or a minimum grade of "C" is required.

ACCOUNTING

Division of Arts, Business, & Cultural Programs

ACCT 100

Introduction to Accounting

Units: 3

It is advised that students have a knowledge of elementary algebra concepts and be able to read college-level texts.

Transfers to: CSU

This course provides basic knowledge of accounting terms, concepts, and procedures for a sole proprietorship form of business. Topics include analyzing and recording business transactions for service and merchandising firms and preparing simple financial statements. Accounting for cash, sales, purchases, payroll, and end-of-year procedures are presented. This course is designed for occupationally-oriented students and/or students preparing for Financial Accounting and Computerized Accounting.

Hours: 54 Lecture.

ACCT 101 (C-ID: ACCT 110)

Financial Accounting

Units: 4

It is advised that students have a knowledge of elementary algebra concepts and be able to read college-level texts.

Advisory: ACCT 100

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: ACCT 101 or ACCT 101H. This course is an introduction to the theory, principles, and practice of accounting and financial reporting for corporations. Topics include analysis and recording of financial transactions; preparation, analysis, and interpretation of financial statements; and accounting for assets, liabilities, and equities. Computer applications are integrated into the homework. This course is required for all accounting and business administration majors.

Hours: 72 Lecture.

ACCT 101H (C-ID: ACCT 110)

Financial Accounting Honors

Units: 4

It is advised that students have a knowledge of elementary algebra concepts and be able to read college-level texts.

Prerequisite: ENGL 101

Advisory: ACCT 100

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: ACCT 101 or ACCT 101H. This course is an introduction to the theory, principles, and practice of accounting and financial reporting for corporations. Topics include analysis and recording of financial transactions; preparation, analysis, and interpretation of financial statements; and accounting for assets, liabilities, and equities.

Computer applications are integrated into the homework. This course is required for all accounting and business administration majors. This course is intended for students eligible for the Honors Program.

Hours: 72 Lecture.

ACCT 102 (C-ID: ACCT 120)

Managerial Accounting

Units: 4

Prerequisite: ACCT 101 or ACCT 101H

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: ACCT 102 or ACCT 102H. This course introduces students to the fundamentals of managerial accounting for decision making. Topics include manufacturing cost accounting, cost allocation, cost-volume-profit analysis, absorption and variable costing, differential analysis for decision making, capital investment analysis, budgeting, standard costing, responsibility accounting centers, activity-costing, just-in-time environments, and financial statement analysis. Computer applications are integrated into the homework. This course is required for all accounting and business administration majors.

Hours: 72 Lecture.

ACCT 102H (C-ID: ACCT 120)

Managerial Accounting Honors

Units: 4

Prerequisite: ACCT 101 or ACCT 101H, ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: ACCT 102 or ACCT 102H. This course introduces students to the fundamentals of managerial accounting for decision making. Topics include manufacturing cost accounting, cost allocation, cost-volume-profit analysis, absorption and variable costing, differential analysis for decision making, capital investment analysis, budgeting, standard costing, responsibility accounting centers, activity-costing, just-in-time environments, and financial statement analysis. Computer applications are integrated into the homework. This course is required for all accounting and business administration majors. This course is intended for students eligible for the Honors Program.

Hours: 72 Lecture.

ACCT 103

Payroll Accounting

Units: 3

Advisory: ACCT 100 or ACCT 101

Transfers to: CSU

This course combines basic accounting skills with specialized training in payroll accounting to prepare students for entry-level positions within the payroll segment of accounting. The course is designed for accounting majors and students interested in pursuing an entry-level position within the payroll segment of accounting; it provides a comprehensive overview of federal and state payroll laws and

these laws' effects on payroll records and required government reports.

Hours: 54 Lecture.

ACCT 104

Introduction to Governmental and Not-For-Profit Accounting

Units: 3

Prerequisite: ACCT 101

Transfers to: CSU

This course is an introduction to the fundamentals of government and not-for-profit accounting. The emphasis of the course will be placed on accounting for various fund types and restrictions relevant to government and not-for-profit agencies, with both theoretical and practical aspects explored. Topics include budgets, revenues, expenditures, tax levies, appropriations, general fund, special fund, and financial statements for government and not-for-profit entities. This course is designed for students interested in furthering their educational requirements for the CPA exam and/or pursuing an entry-level position in government and not-for-profit accounting.

Hours: 54 Lecture.

ACCT 105

Income Tax Accounting

Units: 4

Advisory: ACCT 101

Transfers to: CSU

This course covers federal and California State income tax laws and preparation as they relate to individuals and small business entities. Emphasis is placed upon income inclusion, exclusion, exemptions, capital gains and losses, and business and individual deductions. Students who successfully complete the course with at least a "C" grade will be certified by the California Tax Education Council as fulfilling the state's 60-hour qualifying education requirement (45 federal hours and 15 California hours) to become a registered tax preparer.

Hours: 72 Lecture.

ACCT 106

Computerized Accounting

Units: 3

Advisory: ACCT 100 and ACCT 101

Transfers to: CSU

This course is designed to provide students with a sound, basic knowledge of how computerized integrated accounting systems function. Students process accounting data using receivables, payables, inventory, payroll, and project modules. This course is designed for accounting majors, students interested in starting a small business, and students interested in pursuing entry-level positions in the field of accounting.

Hours: 36 Lecture. 54 Lab.

ACCT 107

Accounting Ethics

Units: 3

Prerequisite: ACCT 101

Transfers to: CSU

This course is an introduction to professional ethics in accounting and business

environments. The course covers principles and core philosophies of ethics by examining accountants' roles in different aspects of the accounting profession such as auditing, management, and taxation. It prepares students to develop their framework for making ethical decisions in the profession by learning how to ask questions and analyze ethical issues encountered in the accounting field. This course is designed for students pursuing an accounting certificate or degree, and for students looking to satisfy the accounting ethics requirement for the CPA exams.

Hours: 54 Lecture.

ACCT 108

Volunteer Income Tax Assistance Program I **Units: 2**

Advisory: ACCT 105

Transfers to: CSU

This is the first course in a sequence of two courses designed for students who want to be a part of the Volunteer Income Tax Assistance (VITA) program at Río Hondo College. The course covers federal and California tax theories and laws appropriate for the current tax year, and students apply their knowledge by taking the I.R.S. exams for VITA volunteers. Upon successful completion of the I.R.S. VITA Basic and Intermediate exams, students are able to assist low-income individuals and families with tax return preparation through the VITA program for the current year.

Hours: 36 Lecture.

ACCT 109

Volunteer Income Tax Assistance Program II **Units: 1**

Prerequisite: ACCT 108

Transfers to: CSU

This is the second course in a sequence of two courses designed for students who want to volunteer in the Volunteer Income Tax Assistance (VITA) program at Río Hondo College. This course allows students who have successfully passed ACCT108 to apply their tax knowledge by assisting low income individuals and families with tax return preparation through the VITA program for the current year. Students learn to use the tax software (e.g., TaxWise) to file individual federal and state income tax returns accurately within the scope of the VITA program. Students learn how to develop a system of quality control for actual taxpayer returns, and develop communication skills through interviews with taxpayers and in explaining tax return results. This course is offered on a pass/no pass basis.

Hours: 9 Lecture. 27 Lab.

ACCT 110

Excel for Business and Accounting **Units: 1**

Prerequisite: ACCT 101

Advisory: CIT 117

Transfers to: CSU

This course is designed for individuals seeking to enhance entry-level Microsoft Excel spreadsheet skills in a business and accounting environment. Students will learn how and why Excel is used for analyzing data, managing budgets, forecasting and modeling financial performance in business.

Hours: 13.5 Lecture. 13.5 Lab.

ACCT 203

Introduction to Cost Accounting **Units: 3**

Prerequisite: ACCT 101

Transfers to: CSU

This course applies a logical approach to the fundamentals of cost accounting as applied to a manufacturing business, as well as the use of cost data in management decisions. Principles and procedures of cost systems are presented first in an overview, then discussed and illustrated in detail. The course provides thorough coverage of job order costing, process costing, and standard costs. Analysis of cost data is integrated with discussions of cost accounting systems and procedures. Students also evaluate quantitative and qualitative data to assist management with strategic decision-making, planning, and controlling. This course is designed for accounting majors and those interested in furthering their knowledge and understanding of managerial accounting.

Hours: 54 Lecture.

ACCT 290

Work Experience Education/Internship for Accounting-Related Fields **Units: 1-4**

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under supervision of a college instructor. Training is informed by learning objectives. The student will be working in a skilled or professional level assignment in their area of vocational interest and will meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of accounting and have completed or enrolled in the appropriate coursework. This course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-216 Lab.

ACCT 299

Directed Study: Accounting **Units: 1-3**

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for

Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations, with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take Directed Study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

ASSOCIATE DEGREE NURSING

Division of Health Science and Nursing

ADN 075

LVN Transition into the Associate Degree Nursing Program **Units: 2.5**

Acceptance into Nursing Program and Current LVN License It is advised that students have a knowledge of intermediate algebra concepts and be able to read college-level texts.

This short-term course provides an overview of the Associate Degree Nursing Program. The focus is on successful learning strategies and the development of critical thinking skills. An overview of the systems developmental stress model is included as a framework for the nursing process and the Associate Degree Nursing curriculum. Also included is an in-depth study of the nursing process including physical assessment, nursing diagnosis, interventions and evaluations. The nursing skills required for physical assessment and basic patient care will be presented. This course is open to all career ladder LVN and 30-unit option students entering the second year of the Associate Degree Nursing Program.

Hours: 36 Lecture. 27 Lab.

ADN 130

Foundational Concepts of Nursing **Units: 2**

It is recommended that students be able to read and comprehend textbooks written at the college level and possess the capability to solve basic mathematical equations including multiplication and division.

Prerequisite: BIOL 125 and BIOL 125 and BIOL 125 and BIOL 222 and BIOL 222 and BIOL 226 and ENGL 101

Corequisite: ADN 130L

Transfers to: CSU

This course introduces students to foundational concepts across the lifespan that inform the provision of safe and effective nursing care. Principles of safety, care competencies, health care infrastructure, attributes, and roles are presented. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 130 and ADN 130L at the same time and pass

both courses together: the courses cannot be taken individually for credit.

Hours: 36 Lecture.

ADN 130L

Foundational Concepts of Nursing Lab

Units: 1.5

Prerequisite: BIOL 125, BIOL 226, BIOL 222, ENGL 101

Corequisite: ADN 130

Transfers to: CSU

This course introduces students to foundational concepts across the lifespan that inform the provision of safe and effective nursing care. Principles of safety, care competencies, health care infrastructure, attributes, and roles are presented. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 130 and ADN 130L at the same time and pass both courses together: the courses cannot be taken individually for credit. This course is offered on a Pass/No Pass basis only.

Hours: 81 Lab.

ADN 131

Healthcare Participant

Units: 2

Prerequisite: ADN 130, ADN 130L

Corequisite: ADN 132, ADN 131L

Transfers to: CSU

This course introduces students to attributes of the health care participant in individual, family, and community terms, and which inform the provision of safe and effective nursing care. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 131 and ADN 131L at the same time and pass both courses together: the courses cannot be taken individually for credit.

Hours: 36 Lecture.

ADN 131L

Healthcare Participant Lab

Units: 2

Prerequisite: ADN 130, ADN 130L

Corequisite: ADN 131, ADN 132

Transfers to: CSU

This course introduces students to attributes of the health care participant in individual, family, and community terms, and which inform the provision of safe and effective nursing care. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 131 and ADN 131L at the same time and pass both courses together: the courses cannot be taken individually for credit. This course is offered on a Pass/No Pass basis only.

Hours: 108 Lab.

ADN 132

Pharmacology I

Units: 1.5

Prerequisite: ADN 130, ADN 130L

Corequisite: ADN 131, ADN 131L

Transfers to: CSU

This course introduces students to pharmacologic nursing practice via a conceptual approach. Emphasis is placed on drug classifications, prototypes, actions, interactions, adverse effects, and nursing implications. Students are encouraged to utilize the nursing process and clinical judgment while applying concepts in a seminar setting; and, in conjunction with a knowledge of pharmacological principles and interventions, can put concepts into practice upon completing the course.

Hours: 18 Lecture. 27 Lab.

ADN 133

Maternal Newborn Health Concepts

Units: 1

Prerequisite: ADN 131, ADN 131L, ADN 132

Corequisite: ADN 133L

Transfers to: CSU

This course focuses on maternal and newborn health concepts that inform the provision of safe and effective nursing care. Emphasis is placed on reproduction, sexuality, homeostasis, regulation, and emotion. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 133 and ADN 133L at the same time and pass both courses together: the courses cannot be taken individually for credit.

Hours: 18 Lecture.

ADN 133L

Maternal Newborn Health Concepts Lab

Units: 1.5

Prerequisite: ADN 131, ADN 131L, ADN 132

Corequisite: ADN 133

Transfers to: CSU

This course focuses on maternal and newborn health concepts that inform the provision of safe and effective nursing care. Emphasis is placed on reproduction, sexuality, homeostasis, regulation, and emotion. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 133 and ADN 133L at the same time and pass both courses together: the courses cannot be taken individually for credit. This course is offered on a Pass/No Pass basis only.

Hours: 81 Lab.

ADN 134

Pediatric Health Concepts

Units: 1

Prerequisite: ADN 131, ADN 131L, ADN 132

Corequisite: ADN 134L

Transfers to: CSU

This course focuses on pediatric health concepts that inform the provision of safe and effective nursing care. Emphasis is placed on attributes and resources, homeostasis, and regulation. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 134 and ADN 134L at the same time and pass both courses together: the courses cannot be taken individually for credit.

Hours: 18 Lecture.

ADN 134L

Pediatric Health Concepts Lab

Units: 1.5

Prerequisite: ADN 131, ADN 131L, ADN 132

Corequisite: ADN 134

Transfers to: CSU

This course focuses on pediatric health concepts that inform the provision of safe and effective nursing care. Emphasis is placed on attributes and resources, homeostasis, and regulation. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 134 and ADN 134L at the same time and pass both courses together: the courses cannot be taken individually for credit. This course is offered on a Pass/No Pass basis only.

Hours: 81 Lab.

ADN 135

Nursing Health and Illness Concepts I

Units: 2

Prerequisite: ADN 131, ADN 131L, ADN 132

Corequisite: ADN 135L

Transfers to: CSU

This course focuses on health and illness concepts for care of individuals with common and/or chronic conditions across the lifespan, and which inform the provision of safe and effective nursing care. Emphasis is placed on concepts including homeostasis and regulation, protection and movement, oxygenation, and hemostasis; and on professional nursing concepts including professional attributes and care competencies. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 135 and ADN 135L at the same time and pass both courses together: the courses cannot be taken individually for credit.

Hours: 36 Lecture.

ADN 135L

Nursing Health and Illness Concepts I Lab

Units: 2

Prerequisite: ADN 131, ADN 131L, ADN 132

Corequisite: ADN 135

Transfers to: CSU

This course focuses on health and illness concepts for care of individuals with common and/or chronic conditions across the lifespan, and which inform the provision of safe and effective nursing care. Emphasis is placed on concepts including homeostasis and regulation, protection and movement, oxygenation, and hemostasis; and on professional nursing concepts including professional attributes and care competencies. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 135 and ADN 135L at the same time and pass both courses together: the courses cannot be taken

individually for credit. This course is offered on a Pass/No Pass basis only.
Hours: 108 Lab.

ADN 150
Medical/Surgical Nursing I

Units: 4

Prerequisite: ADN 151, ADN 151L with a "Pass", BIOL 222

Corequisite: ADN 150L, ADN 154

Transfers to: CSU

This course focuses on the application of the nursing process in caring for patients with disturbances in fluid and electrolyte status; acid/base balance; and digestive, renal, endocrine, cardiovascular and respiratory systems. Discussion includes the pathophysiology of disease processes as well as medical and nursing interventions, and students apply theoretical concepts in a clinical setting. This course is designed for students in the Associate Degree Nursing (ADN) Program. The Board of Registered Nursing requires that students must be concurrently enrolled in both ADN 150 and ADN 150L, and pass both courses together. They cannot be taken individually for credit.
Hours: 72 Lecture.

ADN 150L
Medical/Surgical Nursing I Lab

Units: 4

Prerequisite: ADN 151, ADN 151L, BIOL 222

Corequisite: ADN 150 and ADN 154

Transfers to: CSU

This course focuses on the application of the nursing process in caring for patients with disturbances in fluid and electrolyte status; acid/base balance; and digestive, renal, endocrine, cardiovascular and respiratory systems. Discussion includes the pathophysiology of disease processes as well as medical and nursing interventions, and students apply theoretical concepts in a clinical setting. This course is designed for students in the Associate Degree Nursing (ADN) Program. The Board of Registered Nursing requires that students be enrolled concurrently in ADN 150 and ADN 150L, and pass both courses together. The courses cannot be taken individually for credit.
Hours: 216 Lab.

ADN 151
Clinical Nursing Concepts

Units: 2

It is advised that students have a knowledge of intermediate algebra concepts.

Prerequisite: BIOL 125, BIOL 222, BIOL 226 and ENGL 101

Corequisite: ADN 151L

Transfers to: CSU

This is an introductory course in basic clinical nursing concepts. The student will be introduced to a theoretical framework for nursing practice including the nursing process, the conceptual model used in the Associate Degree Nursing Program and QSEN. Concepts related to therapeutic communication, legal and ethical issues, documentation and safety are included. In addition, concepts related to assessment, nursing interventions and individualization of patient care will be presented. The Board of Registered Nursing requires that students

must be concurrently enrolled in both ADN 151 and ADN 151L, and pass both courses together. They cannot be taken individually for credit.

Hours: 36 Lecture.

ADN 151L
Clinical Nursing Concepts Lab

Units: 2

It is advised that students have a knowledge of intermediate algebra concepts.

Prerequisite: BIOL 125, BIOL 222, BIOL 226 and ENGL 101

Corequisite: ADN 151

Transfers to: CSU

This is an introductory laboratory and clinical course designed to familiarize the student with the nursing process and its application to patient care. Principles and techniques for nursing skills will be introduced in order to provide the student with the opportunity to demonstrate mastery of those skills and subsequently the ability to function safely and appropriately in the laboratory and clinical setting. The Board of Registered Nursing requires that students must be concurrently enrolled in both ADN151 and ADN 151L, and pass both courses together. They cannot be taken individually for credit.

Hours: 108 Lab.

ADN 154
Pharmacology

Units: 2

Prerequisite: ADN 151

Corequisite: ADN 150 and ADN 150L

Transfers to: CSU

This is an introduction pharmacology course that focuses on the study of drugs most frequently prescribed. The course emphasis is on basic techniques and computations used in the administration of medications as well as the special nursing considerations that pertain to the safe administration of medication. Completion of this course allows the Associate Degree Nursing student to safely administer medication to patients under the supervision of the nursing instructor.

Hours: 27 Lecture. 27 Lab.

ADN 155
Nursing Process: Childbearing Family/ Women's Health

Units: 2

Prerequisite: ADN 150, ADN 150L, ADN 151, ADN 151L, ADN 154

Corequisite: ADN 155L

Transfers to: CSU

This course is designed for the Associate Degree Nursing student. It focuses on the biological, intrapersonal/interpersonal and developmental aspects of human reproduction. The nursing process is utilized in meeting maternal, newborn, and family needs as they relate to human reproduction. This course also focuses on women's health issues with regard to fertility, family planning, gynecological problems and related needs, and the utilization of the nursing process to meet those needs. The Board of Registered Nursing requires that students must be concurrently enrolled in both ADN155 and ADN155L, and pass both courses together. They cannot be taken individually for credit.
Hours: 36 Lecture.

ADN 155L
Nursing Process: Childbearing Family/ Women's Health Lab

Units: 2

Prerequisite: ADN 150, ADN 150L, ADN 151, ADN 151L, ADN 154

Corequisite: ADN 155

Transfers to: CSU

This course focuses on the application of the nursing process in caring for childbearing women, their newborns, and their families through the normal childbearing process, with attention to common pathophysiologies associated with childbearing and newborns. Students use evidence-based practice to guide their clinical practice, and enhance their cultural sensitivity to the diverse population served. Development of patient teaching skills is emphasized, the nursing process is integrated throughout the clinical experience, and students apply learned theoretical concepts in the clinical setting. This course is designed for students in the Associate Degree Nursing (ADN) Program. The Board of Registered Nursing requires that students be enrolled concurrently in ADN 155 and ADN 155L, and pass both courses together. The courses cannot be taken individually for credit.

Hours: 108 Lab.

ADN 156
Nursing Process Applied to the Care of Children

Units: 2

Prerequisite: ADN 150, ADN 150L and ADN 154

Corequisite: ADN 156L

Transfers to: CSU

This course focuses on the application of the nursing process in caring for children. Emphasis is placed on normal growth and development patterns of the growing child, as well as developmental, biological, interpersonal, and intrapersonal stressors that affect children and their families. The pathophysiology of disease processes that may occur during childhood and related medical and nursing interventions are discussed. This course is designed for students in the Associate Degree Nursing (ADN) Program. The Board of Registered Nursing requires that students be enrolled concurrently in ADN 156 and ADN 156L, and pass both courses together. The courses cannot be taken individually for credit.
Hours: 36 Lecture.

ADN 156L
Nursing Process Applied to the Care of Children Lab

Units: 2

Prerequisite: ADN 150 and ADN 150 and ADN 150L and ADN 154

Corequisite: ADN 156

Transfers to: CSU

This course focuses on the application of the nursing process in caring for children, and is designed for students in the Associate Degree Nursing Program. Emphasis is placed on normal growth and development patterns of the growing child and developmental, biological, interpersonal, and intrapersonal stressors affecting children and their families. The pathophysiology of disease process that may occur during childhood and related

medical and nursing interventions are discussed; students apply the theoretical concepts in the clinical setting. The Board of Registered Nursing requires that students must be enrolled in ADN 156 and ADN 156L concurrently, and pass both courses at the same time. Neither course can be taken individually for credit.
Hours: 108 Lab.

ADN 230
Mental Health Concepts

Units: 1.5

Prerequisite: ADN 133, ADN 133L, ADN 134, ADN 134L, ADN 135, ADN 135L

Corequisite: ADN 230L

Transfers to: CSU

This course focuses on mental health concepts across the lifespan, and which inform the provision of safe and effective nursing care. Emphasis is placed on concepts including coping and stress tolerance, emotion, cognitive function, and maladaptive behavior. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 230 and ADN 230L at the same time and pass both courses together: the courses cannot be taken individually for credit.

Hours: 27 Lecture.

ADN 230L
Mental Health Concepts Lab

Units: 1.5

Prerequisite: ADN 133, ADN 133L, ADN 134, ADN 134L, ADN 135, ADN 135L

Corequisite: ADN 230

Transfers to: CSU

This course focuses on mental health concepts across the lifespan, and which inform the provision of safe and effective nursing care. Emphasis is placed on concepts including coping and stress tolerance, emotion, cognitive function, and maladaptive behavior. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 230 and ADN 230L at the same time and pass both courses together: the courses cannot be taken individually for credit. This course is offered on a Pass/No Pass basis only.

Hours: 81 Lab.

ADN 231
Nursing Health and Illness Concepts II

Units: 2

Prerequisite: ADN 133, ADN 133L, ADN 134, ADN 134L, ADN 135, ADN 135L

Corequisite: ADN 231L, ADN 232

Transfers to: CSU

This course focuses on health and illness concepts for complex acute and chronic conditions across the lifespan, and which inform the provision of safe and effective nursing care. Emphasis is placed on concepts including oxygenation, homeostasis and regulation, protection and movement, and coping; and on professional nursing concepts including selected professional attributes and care competencies. Students apply concepts in seminar, lab, and/or clinical settings, and

can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 231 and ADN 231L at the same time and pass both courses together: the courses cannot be taken individually for credit.
Hours: 36 Lecture.

ADN 231L
Nursing Health and Illness Concepts II Lab

Units: 2.5

Prerequisite: ADN 133, ADN 133L, ADN 134, ADN 134L, ADN 135, ADN 135L

Corequisite: ADN 231

Transfers to: CSU

This course focuses on health and illness concepts for complex acute and chronic conditions across the lifespan, and which inform the provision of safe and effective nursing care. Emphasis is placed on concepts including oxygenation, homeostasis and regulation, protection and movement, and coping; and on professional nursing concepts including selected professional attributes and care competencies. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 231 and ADN 231L at the same time and pass both courses together: the courses cannot be taken individually for credit. This course is offered on a Pass/No Pass Basis only.

Hours: 135 Lab.

ADN 232
Pharmacology II

Units: 1.5

Prerequisite: ADN 132, ADN 133, ADN 133L, ADN 134, ADN 134L, ADN 135, ADN 135L

Corequisite: ADN 231L, ADN 231

Transfers to: CSU

This course continues the study of pharmacology via a conceptual approach as it relates to nursing management of drug therapy. Emphasis is placed on drug classifications, prototypes, actions, interactions, adverse effects, and nursing implications; and on complex curricular concepts related to pharmacological modalities. Students are encouraged to utilize the nursing process and clinical judgment while applying concepts in a seminar setting; and, in conjunction with a knowledge of pharmacological principles and interventions, can put concepts into practice upon completing the course.

Hours: 18 Lecture. 27 Lab.

ADN 233
Nursing Health and Illness Concepts III

Units: 2.5

Prerequisite: ADN 230, ADN 230L, ADN 231, ADN 231L, ADN 232

Corequisite: ADN 233L

Transfers to: CSU

This course focuses on health and illness concepts for care of individuals with multisystem and emergent health conditions across the lifespan, and which inform the provision of safe and effective nursing care. Concepts include homeostasis and regulation, protection and movement, and maladaptive behavior. Students apply concepts in seminar, lab, and/or clinical

settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 233 and ADN 233L at the same time and pass both courses together: the courses cannot be taken individually for credit.
Hours: 45 Lecture.

ADN 233L
Nursing Health and Illness Concepts III Lab

Units: 2

Prerequisite: ADN 230, ADN 230L, ADN 231, ADN 231L, ADN 232

Corequisite: ADN 233

Transfers to: CSU

This course focuses on health and illness concepts for care of individuals with multisystem and emergent health conditions across the lifespan, and which inform the provision of safe and effective nursing care. Concepts include homeostasis and regulation, protection and movement, and maladaptive behavior. Students apply concepts in seminar, lab, and/or clinical settings, and can put concepts into practice upon completing the course. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 233 and ADN 233L at the same time and pass both courses together: the courses cannot be taken individually for credit. This course is offered on a Pass/No Pass basis only.

Hours: 108 Lab.

ADN 234
Nursing Health and Illness Concepts IV

Units: 2

Prerequisite: ADN 233, ADN 233L

Corequisite: ADN 234L

Transfers to: CSU

This course focuses on the theoretical and clinical application of the nursing process and clinical judgment in the provision of safe and effective nursing care for patients across the lifespan. The course facilitates the transition from student nurse to graduate nurse, and includes content related to professional nursing and healthcare concepts. Students participate as a preceptor or mentee/member of the healthcare team and assume responsibility for a group of patients under the direct supervision of a registered nurse or a non-faculty preceptor. Upon completion of the course, students are expected to function satisfactorily within the Nurse of the Future core competencies. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 234 and ADN 234L at the same time and pass both courses together: the courses cannot be taken individually for credit.

Hours: 36 Lecture.

ADN 234L
Nursing Health and Illness Concepts IV Lab

Units: 2.5

Prerequisite: ADN 233, ADN 233L

Corequisite: ADN 234

Transfers to: CSU

This course focuses on the theoretical and clinical application of the nursing process and clinical judgment in the provision of safe and effective nursing care for patients across the lifespan. The course facilitates the transition from student nurse to graduate nurse, and

includes content related to professional nursing and healthcare concepts. Students participate as a preceptee or mentee/member of the healthcare team and assume responsibility for a group of patients under the direct supervision of a registered nurse or a non-faculty preceptor. Upon completion of the course, students are expected to function satisfactorily within the Nurse of the Future core competencies. The California Board of Registered Nursing (BRN) requires that students must be enrolled in ADN 234 and ADN 234L at the same time and pass both courses together: the courses cannot be taken individually for credit. This course is offered on a Pass/No Pass basis only.
Hours: 135 Lab.

ADN 250

Advanced Pharmacology

Units: 1

Prerequisite: ADN 155 and ADN 156 (for generic ADN students), ADN 075 (for LVN to ADN students)

Advisory: ENGL 101

Transfers to: CSU

This is an advanced pharmacology course that focuses on the skills and study of medications used for neurological, psychiatric, and medical-surgical concepts. The course emphasis is on advanced techniques and computations used in the administration of medications utilizing the nursing process and the Systems Developmental Stress Model, as well as the special nursing considerations that pertain to the safe administration of medication. Study of this course allows the Associate Degree Nursing student to continue to safely administer medications to patients.
Hours: 18 Lecture.

ADN 251

Medical /Surgical Nursing II

Units: 2

Prerequisite: ADN 155, ADN 155L and ADN 156, ADN 156L (for generic ADN students), ADN 075 (for LVN to ADN students)

Corequisite: ADN 252 and ADN 252L (students who have an active Psychiatric Technician license are exempt from the ADN 252 and ADN 252L corequisites), ADN 250 and ADN 251L

Transfers to: CSU

This course focuses on the aging process as it relates to normal aging and related changing biological, interpersonal, and intrapersonal needs. It also focuses on the application of the nursing process in caring for patients with disturbances in perception, coordination, and mobility. The pathophysiology of disease processes as well as medical and nursing interventions and rehabilitative approaches to restoring and maintaining optimum health are discussed. This course is designed for students in the Associate Degree Nursing program. The Board of Registered Nursing (BRN) requires that ADN 251 students must be concurrently enrolled in ADN 251L, and pass both courses together: ADN 251 and ADN 251L cannot be taken individually for credit.
Hours: 36 Lecture.

ADN 251L

Medical/Surgical Nursing II Lab

Units: 2.5

Prerequisite: ADN 155, ADN 155L and ADN 156, ADN 156L (for generic ADN students), ADN 075 (for LVN to ADN students)

Corequisite: ADN 252 and ADN 252L (students who have an active Psychiatric Technician license are exempt for ADN 252 and ADN 252L corequisites), ADN 250 and ADN 251

Transfers to: CSU

This course focuses on the aging process as it relates to normal aging and changing biological, interpersonal, and intrapersonal needs. The course also focuses on the application of the nursing process in caring for patients with disturbances in perception, coordination, and mobility. Discussion includes the pathophysiology of disease processes, as well as medical and nursing interventions and rehabilitative approaches to restoring and maintaining optimum health. This course is designed for students in the Associate Degree Nursing (ADN) Program. The Board of Registered Nursing requires that students be enrolled concurrently in ADN 251 and ADN 251L, and pass both courses together. The courses cannot be taken individually for credit.
Hours: 135 Lab.

ADN 252

Psychiatric/ Mental Health Nursing

Units: 2

Prerequisite: ADN 155, ADN 155L and ADN 156, ADN 156L or ADN 075 and Active California Vocational Nursing License

Corequisite: ADN 252L

Transfers to: CSU

This course focuses on application of the nursing process as a problem solving approach to assessment, problem identification and intervention for patients with psychiatric and mental health problems. Basic concepts related to biological, intrapersonal and interpersonal factors in mental health and mental illness are discussed. This course is designed for students in the Associate Degree Nursing Program. The Board of Registered Nursing requires that students must be concurrently enrolled in both ADN252 and ADN252L, and pass both courses together. They cannot be taken individually for credit.
Hours: 36 Lecture.

ADN 252L

Psychiatric/Mental Health Nursing Lab

Units: 1.5

Prerequisite: ADN 155 and ADN 155 and ADN 155L and ADN 156, ADN 156L or ADN 075 and Active California Vocational Nursing License

Corequisite: ADN 252

Transfers to: CSU

This course focuses on application of the nursing process as a problem solving approach to assessment, problem identification and intervention for patients with psychiatric and mental health problems. Basic concepts related to biological, intrapersonal and interpersonal factors in mental health and mental illness are discussed. This course is designed for students in the Associate Degree Nursing Program. The Board of Registered Nursing requires that students must be concurrently enrolled in both ADN252 and ADN252L, and

pass both courses together. They cannot be taken individually for credit.

Hours: 81 Lab.

ADN 253

Medical/Surgical Nursing III

Units: 2

Prerequisite: ADN 250, ADN 251, ADN 251L, ADN 252 and ADN 252L

Corequisite: ADN 253L

Transfers to: CSU

This course focuses on the nursing process with patients requiring complex nursing care. The course emphasizes approaches to handling generalized emergencies, immunologic problems, and oncologic problems. The course integrates all past nursing theory to assist the nursing student with advanced nursing concepts. This course is designed for students in the Associate Degree Nursing Program. The Board of Registered Nursing requires that students must be concurrently enrolled in both ADN 253 and ADN 253L, and pass both courses together. They cannot be taken individually for credit.

Hours: 36 Lecture.

ADN 253L

Medical/Surgical Nursing III Lab

Units: 3

Prerequisite: ADN 250, ADN 251, ADN 251L, ADN 252 and ADN 252L

Corequisite: ADN 253

Transfers to: CSU

This course focuses on the nursing process with patients requiring complex nursing care. The course emphasizes generalized emergencies, immunologic problems, and oncologic problems. The course integrates all past nursing theory to assist the nursing student with advanced nursing concepts. The students will apply the theoretical concepts in the clinical setting. This course is designed for students in the Associate Degree Nursing Program. The Board of Registered Nursing requires that students must be concurrently enrolled in both ADN253 and ADN253L, and pass both courses together. They cannot be taken individually for credit. This course is offered on a pass/no pass basis.

Hours: 162 Lab.

ADN 254

Leadership and Management in Nursing

Units: 1.5

Prerequisite: ADN 253 and ADN 253L

Corequisite: ADN 254L

Transfers to: CSU

This course focuses on principles of leadership and management as well as current trends in nursing practice. Discussion includes the legal and ethical responsibilities of the professional nurse, and the specific skills and attributes students need as they transition to nursing practice as a member of a team. Methods to maintain professional competence and advancement in the profession are explored. This course is designed for students in the Associate Degree Nursing (ADN) Program. The Board of Registered Nursing requires that students be enrolled concurrently in ADN 254 and ADN 254L, and pass both courses together. The courses cannot be taken individually for credit.

Hours: 27 Lecture.

ADN 254L**Leadership and Management in Nursing Lab****Units:** 2.5**Prerequisite:** ADN 253 and ADN 253L**Corequisite:** ADN 254**Transfers to:** CSU

This course focuses on the application of the theories and principles of leadership and management. Students will apply theory content while working in a clinical preceptorship, providing care under the guidance of an RN preceptor. The Board of Registered Nursing requires that students be enrolled concurrently in ADN 254 and ADN 254L, and pass both courses together. The courses cannot be taken individually for credit.

Hours: 135 Lab.

ALTERNATIVE ENERGY TECHNOLOGY

Division of Career and Workforce Education

AET 120**Introduction to Alternative Energy Technology****Same as:** ET 120**Units:** 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This introductory-level course provides students with a working knowledge of present-day energy systems, including in-depth analysis of the design and installation of alternative energy systems. Topics will include solar electrical systems, wind electrical systems, solar water heating systems, wind mechanical systems, small hydro-electrical systems, geothermal energy, fuel cells, biomass, energy storage, and microgrids. Students will develop skills to construct an alternative energy system. This course is intended for students who are interested in a career in the alternative energy industry.

Hours: 45 Lecture. 27 Lab.

AET 121**Photovoltaic Systems Design and Installation****Same as:** ET 121**Units:** 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

In this introductory course, students examine and implement the design and installation of solar photovoltaic power systems, including the installation of a working solar photovoltaic power system. Students learn how to perform solar site evaluations, electrical load calculations, solar system size calculations, and installation techniques for grid-tie and off-the-grid photovoltaic systems. The course is designed to prepare students for the North American Board of Certified Energy Practitioners (NABCEP) entry-

level exam, and is intended for students who are contemplating a career in the solar photovoltaic energy industry.

Hours: 45 Lecture. 27 Lab.

AET 122**Advanced Photovoltaic Systems Design and Installation****Same as:** ET 122**Units:** 3**Advisory:** AET 121 or ET 121**Transfers to:** CSU

This is the second course in the photovoltaic series in which students further examine and implement the design and installation of solar photovoltaic power systems. Students learn how to interpret the National Electrical Code (NEC) specifications concerning photovoltaic installations. Topics include code-compliant wiring of modules, inverters, charge controllers, batteries, grounding techniques, and related topics. Additional topics include the design and installation of large commercial photovoltaic systems. This course is intended for students who are contemplating a career in the solar photovoltaic energy industry.

Hours: 45 Lecture. 27 Lab.

AET 123**Wind Energy Systems Design and Installation****Same as:** ET 123**Units:** 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

In this introductory course students examine and implement the design and installation of wind power systems, including the installation of a working wind generation power system. Students learn how to perform wind site evaluations, electrical load calculations, wind system size calculations, hydraulics fundamentals, basic aerodynamics, and installation techniques for wind power generation systems; in designing and installing wind power generation systems, students obtain skills for employment. This course is intended for students who are contemplating a career in the wind turbine power generation industry.

Hours: 45 Lecture. 27 Lab.

AET 124**Advanced Wind Energy Systems Design and Installation****Same as:** ET 124**Units:** 3**Advisory:** AET 123 or ET 123**Transfers to:** CSU

This is the second course in the wind energy series in which students further examine and implement the design and installation of wind power systems. Students learn how to interpret the National Electrical Code (NEC) specifications concerning wind power installations. Topics include code-compliant wiring of modules, inverters, charge controllers, grounding techniques, and related topics. Additional topics include wind site evaluations, electrical load calculations, wind system size calculations, hydraulic fundamentals, basic aerodynamics, and installation techniques for large wind power

generation systems. This course is intended for students who are contemplating a career in the wind turbine power generation industry.

Hours: 45 Lecture. 27 Lab.

AET 125**Energy Storage Systems****Units:** 3

It is advised that students be able to engage in written composition at a college level, be able to read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course provides an introductory overview of energy storage systems. Students will obtain a working knowledge of electric/hybrid vehicles, fast battery charging, smart grids, and microgrids. Renewable energy (solar and wind), peak shaving, and reduction of energy consumption will also be discussed. Students will design and build a renewable energy system with an energy storage solution. This course is intended for students considering a career in the renewable energy industry.

Hours: 45 Lecture. 27 Lab.

AET 126**Solar PV Technical Sales****Units:** 3

It is advised that students be able to engage in written composition at a college level, be able to read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to provide students with the knowledge and skills of solar photovoltaic (PV) design and sales techniques. The course covers basic solar fundamentals, site evaluation, shade analysis, consumer electric rates, benefits of PV, return on investment, system sizing and electrical and mechanical design considerations. This course will provide students with the design and sales skills needed to become solar professionals, as well as prepare them for the NABCEP PV Technical Sales Professional Exam.

Hours: 54 Lecture.

AET 181**Home Energy Management and Auditing****Same as:** ET 181**Units:** 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course is designed to provide students working in or seeking employment in the green energy field, with an overview of home energy management and auditing. Specifically, the course assists students in preparing a comprehensive home energy audit and energy management program. Emphasis is placed on the following topics: appliances, insulation, designing/remodeling, electricity, landscaping, lighting, space heating and cooling, water heating, doors/windows/skylights, and home energy audits.

Hours: 54 Lecture.

AET 182**Industrial Energy Management and Auditing****Same as:** ET 182

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course is designed to provide students working in or seeking employment in the green energy field, with an overview of industrial energy management and auditing. Specifically, this course assists students in preparing a comprehensive energy audit and energy management program. Emphasis is placed on the following topics: types of energy audits, energy management and cost, benchmarking, energy performance, energy use requirements, maximizing system efficiencies, optimizing energy input requirements, fuel and energy substitution, and energy audit instruments.

Hours: 54 Lecture.

AET 183

Energy Management Systems

Units: 3

It is advised that students be able to engage in written composition at a college level, be able to read college-level texts, and have a knowledge of elementary algebra concepts.

Transfers to: CSU

The course focuses on the fundamentals of energy and the energy management systems in residential and commercial buildings. Students will learn procedures and tools used for efficient and effective use of energy to minimize costs and reduce future energy demand. This course is intended for students who are currently active as energy managers or energy professionals and for those just entering the industry.

Hours: 54 Lecture.

AET 280

Green Building Design Principles

Same as: ET 280

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course is designed to provide students working in or seeking employment in the green building field, with an overview of the green building industry and its components. Specifically, this course assists students in preparing for the Leadership in Energy and Environmental Design Accredited Professional (LEED AP) examination, which is the most recognized professional accreditation for green building in the nation. Emphasis is placed on the six categories of design that green buildings must address for LEED certification: sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, and innovation and design process. Each of these categories are studied, with a focus on the significance of each particular credit.

Hours: 54 Lecture.

AET 299

Directed Study in Alternative Energy Technology

Units: 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.

Hours: 54-162 Lab.

ADMINISTRATION OF JUSTICE

Division of Administration of Justice and Fire Technology

AJ 041

Effective Written Communication for Public Service Personnel

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

This course provides Administration of Justice students an overview of writing techniques for the communication of facts and information in a criminal justice setting, including the correct usage of words and proper sentence structure. Emphasis is placed on law enforcement-specific terms, phrases, and spelling. Topics include but are not limited to crime reports, investigative follow-up reports, traffic collision reports, background investigative summations and recommendations, internal investigative summations and recommendations, press releases, and inter-agency criminal activity crime bulletins.

Hours: 54 Lecture.

AJ 101 (C-ID: AJ 110)

Introduction to Administration of Justice

Units: 3

It is advised that students be able to engage in written composition at a college

level and be able to read college-level texts.

Transfers to: UC/CSU

This course introduces students to the characteristics of the criminal justice system of the United States. Focus is placed on examining crime measurement, theoretical explanations of crime, responses to crime, components of the criminal justice system, and current challenges to the system. The course examines the evolution of the principles and approaches utilized by the justice system and the evolving forces which have shaped these principles and approaches. Although justice structure and process is examined in a cross-cultural context, emphasis is placed on the justice system of the United States, and particularly the structure and function of the police, courts, and corrections. Students are introduced to the origins and development of criminal law, legal process, sentencing, and incarceration policies.

Hours: 54 Lecture.

AJ 102 (C-ID: AJ 122)

Criminal Procedures

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course provides students with an in-depth study of the legal responsibilities of law enforcement. Emphasis is placed on the judicial segment of the administration of justice system. Topics include laws of arrest, custody, and analyses of the past, present, and future procedures for each subsystem within the administration of justice system, from initial entry to final disposition. The relationship each segment maintains with system members is also covered.

Hours: 54 Lecture.

AJ 104 (C-ID: AJ 124)

Legal Aspects of Evidence

Units: 3

Advisory: AJ 101

Transfers to: CSU

This course provides students with an in-depth study of evidence rules. Emphasis is placed on the application of rules in preparing and presenting evidence. The course will discuss the history and approach to the study of evidence. Topics include proof by evidence and substitutes, general admissibility tests, evidence by way of witness testimony, documents, real evidence, and exclusion of evidence on constitutional grounds. For a better understanding of the evidence rules, judicial decisions are cited, and students are required to brief cases.

Hours: 54 Lecture.

AJ 105 (C-ID: AJ 160)

Community Relations/Multicultural Issues Within Public Service

Units: 3

Advisory: AJ 101

Transfers to: UC/CSU

This course examines the complex, dynamic relationship between communities and the justice system in addressing crime and conflict with an emphasis on the challenges and prospects of administering justice within

a diverse multicultural population. Topics covered may include crime prevention, restorative justice, conflict resolution, and ethics.

Hours: 54 Lecture.

AJ 106 (C-ID: AJ 120)

Criminal Law I

Units: 3

Prerequisite: AJ 101, PAC 040 or equivalent

Transfers to: UC/CSU - UC credit limitation. Students will receive credit from UC for only one of the following courses: AJ 106 or AJ 107

This course presents an analysis of the doctrines of criminal liability in the United States and takes up the classification of crimes against persons, property, morals, and public welfare. Special emphasis is placed on the classification and general elements of crime, the definitions of common and statutory law, and the nature of acceptable evidence. The course utilizes case law and case studies to introduce students to criminal law, and its successful completion is a foundation upon which more advanced criminal justice courses will build. The course also includes some limited discussion of prosecution and defense decision making, criminal culpability, and defenses to crimes. Hours: 54 Lecture.

AJ 107

Criminal Law II

Units: 3

Advisory: AJ 101 or completion of PAC 040 or equivalent

Transfers to: UC/CSU - UC credit limitation. Students will receive credit from UC for only one of the following courses: AJ 106 or AJ 107.

This course provides students with a comprehensive overview of criminal statutes and their definition. Topics include classification as applied to the system of administration of justice and crimes against persons and property. General statutes, health and safety statutes, and other state and federal laws are discussed.

Hours: 54 Lecture.

AJ 135

Crime Scene Investigation I

Units: 3

Advisory: AJ 102

Transfers to: CSU

This course is an introduction to forensic science and its role in criminal investigations. The course examines the basic methods of collecting, analyzing, and reporting evidence. Through the development of practical skills in crime scene techniques, it addresses topics including computer crimes; biological evidence like fingerprints, blood, the skeleton, tooth marks, and hair; pathology and toxicology; and evidence associated with forensic chemistry like fibers and traces, discharged firearms, accelerants, and illicit drugs.

Hours: 54 Lecture.

AJ 136

Crime Scene Investigation II

Units: 3

Prerequisite: AJ 135

Transfers to: CSU

This course is a continuation of Crime Scene Investigation I (AJ 135). It provides an

introduction to and opportunities for the practical application of advanced forensics in criminal investigations, as well as interview and interrogation techniques utilized after crime scene analysis and crime reconstruction. The course focuses on forensic methods, with topics that include crime scene analysis, responsibilities, and processing; physical, testimonial, trace, impression, and firearms evidence; blood and bodily fluids; arson; illicit drugs and clandestine laboratories; and sexual assaults, domestic abuse, burglaries, and homicides.

Hours: 54 Lecture.

AJ 207 (C-ID: AJ 220)

Juvenile Law and Procedure

Units: 3

Advisory: AJ 101

Transfers to: CSU

This course is designed to provide Administration of Justice or other interested students with techniques for handling juvenile offenders and victims. Emphasis is placed on the prevention and repression of delinquency, diagnosis and referral of juvenile offenders, and organization of community resources. Juvenile law and juvenile court procedures are contrasted with adult law procedures.

Hours: 54 Lecture.

AJ 208 (C-ID: AJ 140)

Principles of Investigation

Units: 3

Advisory: AJ 101

Transfers to: CSU

This course addresses the techniques, procedures, and ethical issues in the investigation of crime. The topics covered include the organization of the investigative process, crime scene searches, interviewing and interrogating, surveillance, source of information, utility of evidence, scientific analysis of evidence, and the role of the investigator in the trial process.

Hours: 54 Lecture.

AJ 215

Vice and Narcotics Control

Units: 3

Advisory: AJ 101

Transfers to: CSU

This course provides students with an in-depth understanding of code and case law of vice and narcotics. The course will focus on detection, suppression, apprehension, and prosecution of violators. Special emphasis will be placed on laws dealing with gambling, prostitution, sex crimes, narcotic identification, and search and seizure.

Hours: 54 Lecture.

AJ 228

Police Field Operations

Units: 3

Advisory: AJ 101

Transfers to: CSU

This course is designed to provide students with an in-depth understanding of the history and development of police field operations. Particular emphasis is placed on planning field activities. Topics include the functions of patrol, traffic, and other preliminary investigative duties of the field officer. The techniques of planning for patrol operations and handling requests for service, vehicular

traffic-related problems, and civil and domestic disturbances are also presented.

Hours: 54 Lecture.

AJ 250

Contemporary Issues in the Criminal Justice System

Units: 3

Advisory: AJ 101, AJ 102

Transfers to: CSU

This course is designed to provide Administration of Justice or other interested students with an in-depth understanding of personal and organizational values, beliefs, attitudes and ethics as they affect contemporary issues in the criminal justice system. Particular emphasis is placed on the historical foundations that serve as a basis for contemporary decision making. Specific issues taken up in discussions will vary from semester to semester.

Hours: 54 Lecture.

AJ 275 (C-ID: AJ 150)

Introduction to Forensic Science

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course prepares administration of justice, forensic science, and California peace officer students for the Forensic Science Identification Program. The course provides an introduction to the role of forensics in criminal investigations, examining methods utilized in the forensic analysis of crime scenes, pattern evidence, instruments, firearms, questioned documents, and controlled substances.

Hours: 54 Lecture.

AJ 290

Work Experience Education/Internship for Administration of Justice-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the fields of law enforcement or administration of justice, and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-216 Lab.

AJ 299

Directed Study: Administration of Justice

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to

assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.
Hours: 54-162 Lab.

ANIMATION

Division of Arts, Business, & Cultural Programs

ANIM 101

Introduction to Digital 3-D Animation

Units: 4

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

This course is an introduction to the production pipeline used in games, film and TV. Students will be introduced to the concepts of digital sculpting, lighting, texturing, rendering, rigging, and animating 3-D objects. This course is beneficial for all students in courses related to graphic arts (multimedia, illustration, web and game design, and film production) and industrial design (architectural, automotive, furniture, clothing, and product design).
Hours: 54 Lecture. 54 Lab.

ANIM 105

Principles of 3-D Digital Animation

Units: 4

Advisory: ART 130, ART 230

Transfers to: UC/CSU

This course introduces students to the basic principles of 3-D digital animation. The topics covered in this course are the starting point for any student interested in becoming a digital animator. Through the use of solid drawing and 3-D software such as Maya, students will learn to master fundamentals like squash and stretch, timing, weight, drag, and follow through. This course provides students with the opportunity to build and refine the basic skill set necessary to be a digital animator.
Hours: 54 Lecture. 54 Lab.

ANIM 110

Digital Character Animation

Units: 4

Advisory: ANIM 105

Transfers to: UC/CSU

This course will provide students with an opportunity to further develop their skills in the art of creating three-dimensional digital character animation. Students will learn how to create short animation sequences and loops using digital characters. This course is appropriate and beneficial for all students in courses related to graphic arts (such as those that focus on multimedia, internet web design, game design, and broadcast media production) and industrial design (including architecture, automotive, furniture, clothing, and product design). Students will be introduced to the use of storyboards and relevant concepts related to body mechanics, acting for animators, pose-to-pose and straight ahead animation, control rigging, and animating mechanical subject matter.
Hours: 54 Lecture. 54 Lab.

ANIM 130

Modeling for Games

Units: 4

Advisory: ANIM 101

Transfers to: UC/CSU

This course is an introduction to the basic principles used in 3-D modeling, UVW unwrapping, and texturing for games. The course is intended for beginning 3-D students and covers the tools and techniques used in the creation of 3-D game assets. This course is beneficial for all students in courses related to graphic arts (multimedia, illustration, web and game design, and film production) and industrial design (architectural, automotive, furniture, clothing, and product design).
Hours: 54 Lecture. 54 Lab.

ANIM 133

Character Design

Units: 4

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

This course takes up the fundamentals of character design. Students learn the basics of character development by revising and polishing innovative designs of visually intriguing characters, and in so doing use and master gesture, construction, and anatomy in their designs. Further, students learn to use digital tools to sketch, paint, and build a visually compelling portfolio of characters.
Hours: 54 Lecture. 54 Lab.

ANIM 134

Mech and Vehicle Design

Units: 4

Advisory: ANIM 101, ART 170, NART 175

Transfers to: UC/CSU

This course is geared towards designing mechs and vehicles of all types for the entertainment industry. Centered on digital drawing and rendering with Adobe Photoshop, students create and present finished portfolio pages. The course takes students through a clear and efficient design process emphasizing storytelling, gesture, shape, and color.
Hours: 54 Lecture. 54 Lab.

ANIM 135

Environment Design

Units: 4

Advisory: ANIM 101, ART 170, NART 175, ENGL 035 or ENLA 100 or appropriate placement, READ 043 or appropriate placement

Transfers to: UC/CSU

This course introduces students to the artistic and technical requirements needed to work in the entertainment industry as environment artists. Through class projects students learn the latest techniques in the construction of game levels using Maya 3D modeling software and the Unity game engine. In addition to level design and the practical aspects of modeling and lighting, emphasis is placed on the artistic merit of students' work through value, color, design, and composition.
Hours: 54 Lecture. 54 Lab.

ANIM 140

Entertainment Art Portfolio

Units: 4

Prerequisite: ANIM 101, ANIM 105

Transfers to: CSU

This course will prepare digital artists to talk about and present their artwork in a professional manner. Students will select an area of concentration within entertainment art and prepare a portfolio project using programs such as Photoshop CC, Premier CC, ZBrush, Maya, and the Unity game engine. This course is an excellent opportunity for students interested in developing and presenting a body of work that will help them take the next step in their professional career.
Hours: 54 Lecture. 54 Lab.

ANIM 290

Work Experience Education/Internship for Animation-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of animation and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.
Hours: 3 Lecture. 54-216 Lab.

ANTHROPOLOGY

Division of Behavioral and Social Sciences

ANTH 101 (C-ID: ANTH 110)

Introduction to Physical Anthropology

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: ANTH 101 or ANTH 101H. In this course, people are investigated from the perspective of evolutionary theory. Students will learn about the process of natural selection and related issues including patterns of inheritance. Also included will be an examination of the closest living relatives to humans, primates, with an emphasis on behavior and ape societies. An extensive survey of human ancestors will trace the origins of various life forms and recount how ape-like creatures evolved into modern humans. Students will also discover how natural selection can be used as a tool to understand patterns of human variation. This course is designed for anthropology majors, those with an interest in anthropology, or anyone with a desire to further their understanding of humans from an evolutionary perspective.
Hours: 54 Lecture.

ANTH 101H (C-ID: ANTH 110)
Introduction to Physical Anthropology Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limitation. Students will receive UC credit for only one of the following courses: ANTH 101 or ANTH 101H.

In this course, people are investigated from the perspective of evolutionary theory. Students will learn about the process of natural selection and related issues including patterns of inheritance. Also included will be an examination of the closest living relatives to humans, primates, with an emphasis on behavior and ape societies. An extensive survey of human ancestors will trace the origins of various life forms and recount how ape-like creatures evolved into modern humans. Students will also discover how natural selection can be used as a tool to understand patterns of human variation. This course is designed for anthropology majors, those with an interest in anthropology, or anyone with a desire to further their understanding of humans from an evolutionary perspective.
Hours: 54 Lecture.

ANTH 101L (C-ID: ANTH 115L)
Physical Anthropology Lab

Units: 1

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Prerequisite/Corequisite: ANTH 101 or ANTH 101H

Transfers to: UC/CSU

This laboratory course, designed to complement the lecture course, is for students interested in expanding their knowledge of physical anthropology. Students are introduced to the methods, techniques, and procedures used in physical

anthropology research, gaining practical experience by participating in lab activities and experiments using the scientific method. Lab exercises include an assessment of the forces that affect evolutionary change, the observation of primate behavior, the assessment of human variation, and the identification and classification of the skeletal features of humans, non-human primates, and human ancestors. Mendelian, molecular, and population genetics are also explored.
Hours: 54 Lab.

ANTH 102 (C-ID: ANTH 120)
Introduction to Cultural Anthropology

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: ANTH 102 or ANTH 102H. The emphasis of this general education course is the investigation of human culture. By learning about the diversity of cultural practices around the world, students will be able to evaluate their identities within their own societies. In addition to discovering the theories and methods important to cultural anthropology, the course includes an extensive examination of cross-cultural diversity. Students learn about how people in different cultures obtain their food, exchange goods, organize themselves in groups, engage in politics, raise children, and worship supernatural beings. Also addressed is the issue of how cultural anthropology can contribute to addressing important problems in the modern world. The course is designed for anthropology majors, those with an interest in anthropology, or anyone with a desire to further their understanding of human culture.
Hours: 54 Lecture.

ANTH 102H (C-ID: ANTH 120)
Introduction to Cultural Anthropology Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: ANTH 102 or ANTH 102H. The emphasis of this general education course is the investigation of human culture. By learning about the diversity of cultural practices around the world, students will be able to evaluate their identities within their own societies. In addition to discovering the theories and methods important to cultural anthropology, the course includes an extensive examination of cross-cultural diversity. Students learn about how people in different cultures obtain their food, exchange goods, organize themselves in groups, engage in politics, raise children, and worship supernatural beings. Also addressed is the issue of how cultural anthropology can contribute to addressing important problems in the modern world. The course is designed for anthropology majors, those with an interest in anthropology, or anyone with a desire to further their understanding of human culture. The course is intended for

those who meet Honors Program requirements.

Hours: 54 Lecture.

ANTH 103 (C-ID: ANTH 150)
Introduction to Archaeology

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

This course is a survey of human world history and prehistory as identified by the archaeological record. Emphasis is placed on major changes in human technological, economic, and social development over the course of two million years of the human material record, including topics such as the history of archaeology, research ethics, data types, theory and methodology, dating techniques, survey and site excavation methods, analysis and interpretations, and reasons to preserve the past. Case studies from the excavation of major archaeological sites around the world are examined and discussed as examples. This course is for students who are interested in ancient history or the field of archaeology, or who plan to major in anthropology.
Hours: 54 Lecture.

ANTH 104 (C-ID: ANTH 130)
Introduction to Language and Culture

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is for students majoring in anthropology or anyone interested in learning about the diversity of communication forms and language systems around the world. The course investigates the development and evolution of language, the structure and sound systems of different languages, language loss and conservation, and the variations in different languages such as dialects and the social situations in which they are used. The different forms of verbal and non-verbal communication are studied across cultures with special attention paid to the use of technology like social media and the problems that arise in communication between people of different classes, genders, and ethnicities in our globalized world.
Hours: 54 Lecture.

ANTH 110
Gender and Sexuality

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

This course is an anthropological examination of sex, gender identity, roles, relations, and sexuality across cultures. Theories and methods of the anthropology of sex and gender along with the historical origins and development of this area of specialization in cultural anthropology are studied. Ethnographic or case studies of the fluidity of sex and gender in small-scale tribal societies around the world inform class material, as will

industrialized examples of legal, political, and social issues.

Hours: 54 Lecture.

ANTH 115

Medical Anthropology: Culture, Health, and Healing

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

This course explores the perceptions of disease, health, and healing in different cultures around the world. Sociocultural, biological, and ecological perspectives are used to understand the origins of illness and disease and medical practices across cultures. Topics include diagnosis and therapies, the role of healers like witch doctors and shamans, stress and mental health, unequal access to medical care, and medical anthropology applied to global health problems.

Hours: 54 Lecture.

ANTH 125

Religion, Magic, Witchcraft, and the Supernatural

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

This course is for students interested in learning about the diverse religious beliefs and practices that exist around the world. As an introduction to the anthropological study of religion, the course includes an overview of the various forms of religious belief systems; the variety of gods and other supernatural forces; the use of myths, rituals, and ceremonies in religious practice; and the types of shamans, priests, and other religious specialists found in religious systems. The religious use of drugs is explored, along with traditional healing practices and folk medicine remedies used in many Western cultures. A survey of witchcraft, sorcery, the occult, demons, exorcism rites, sacrificial practices, and magic is included. Additionally, concepts relating to death and the afterlife (e.g., souls, ghosts, reincarnation, and zombies) are explored.

Hours: 54 Lecture.

ARCHITECTURE

Division of Career and Workforce Education

ARCH 101

Introduction to Technical Drawing & Graphics

Same as: CIV 101, ENGT 101

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This basic course in technical drawing and graphics is for students with no previous

drafting skills or training who want to pursue training in fields and careers related to architecture, civil design, and engineering design drafting. Practical application with the tools, techniques, standards, and practices used in the industries that need technical drawings and graphics. ARCH 101, CIV 101, ENGT 101 are cross-listed. Credit will be granted for one course only.

Hours: 36 Lecture. 54 Lab.

ARCH 103

History of Architecture: Renaissance to Present

Units: 3

It is advised that students be able to engage in college at a college level and read college-level texts.

Transfers to: UC/CSU

This course surveys the historical development of modern architecture from the Renaissance to the present day. The influence of technological, ecological, environmental, cultural, and socio-economic factors on architecture are considered. Analysis of current and future trends and developments in contemporary architecture and environmental design is covered.

Hours: 54 Lecture.

ARCH 110

Construction Document Reading and Estimating

Units: 3

It is advised that students be able to engage in written composition at a college level, be able to read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed for architecture students as well as apprentices and employees in all areas of the construction industry, and covers residential, light commercial, and industrial building construction. The course introduces the use of prints, construction documents, and the theory of construction estimating as used in the building industry. Principles of reading working drawings and plans; heating, ventilation, and air conditioning (HVAC) specifications; details and elevations; and electrical specifications are included, as are materials estimating, and estimating rules, tables, and procedures.

Hours: 45 Lecture. 27 Lab.

ARCH 115

Introduction to Residential Architecture: Drawing and Design

Units: 4

Advisory: ARCH 101 or ARCH 101 or CIV 101 or ENGT 101 or two years of high school drafting

Transfers to: CSU

This introductory course is for students interested in the field of architectural drawing and design. The course includes the study of architectural graphic standards related to creating construction drawings for residential projects (e.g., site plans, floor plans, roof plans, and elevations). Electrical, foundation and framing, and other drawings for a single-family residential structure are discussed. Emphasis is placed on symbology, conventions, and techniques to develop

technical skills an entry-level architectural drafter needs. Construction methods, building codes, design factors, planning, and the use of reference materials are discussed and applied. All construction documents are developed using traditional board drafting methods and standards.

Hours: 54 Lecture. 54 Lab.

ARCH 125

Residential Architecture: Design & Construction

Units: 4

Prerequisite: ARCH 115

Advisory: ENGT 150 or ENGT 170 or industry experience in CADD applications

Transfers to: CSU

This intermediate-level course is for students pursuing a degree or certificate in architectural design and drawing, and is a requirement for both the A.S. degree and certificate. The course includes the study of common planning concerns as well as the most significant building ordinances and codes that influence the design of single-family residential spaces. As a component of the course, students prepare select architectural plans for a residential building project. Emphasis is placed on site planning, appropriate and accurate space dimensioning, door/window (safety) requirements, plumbing requirements, multi-story access, exterior surface coverings, and basic structural framing.

Hours: 54 Lecture. 54 Lab.

ARCH 215

Architectural Perspective and Rendering

Units: 4

Prerequisite: ARCH 115

Advisory: ENGT 105

Transfers to: UC/CSU

In this course, students are introduced to the theory and practical application of perspective drawing and rendering as used in architecture. Topics include one and two-point perspectives, entourage, and an introduction to rendering techniques such as markers, pastels, pencil, pen, and ink. Presentation techniques also are discussed.

Hours: 54 Lecture. 54 Lab.

ARCH 225

Commercial Architecture: Design and Construction

Units: 4

Prerequisite: ARCH 115

Advisory: ENGT 150 or ENGT 170 or industry experience in CADD applications

Transfers to: CSU

This advanced level course is for students pursuing an A.S. Degree or Certificate in Architecture and Architectural Design and Drawing. The course includes the study of common planning concerns as well as the most significant building ordinances and codes which influence the design of commercial spaces. As a component of the course, students will prepare select architectural plans for a commercial building project. Emphasis is placed on effective space utilization, technical plans, elevations, aesthetics, accessible requirements, site utilization and development, traffic flow, and landscaping.

Hours: 54 Lecture. 54 Lab.

ARCH 235

Architectural Design Studio**Units:** 4**Prerequisite:** ARCH 215**Advisory:** ENGT 150**Transfers to:** UC/CSU

This course is for students pursuing an Associate in Science Degree in Architecture with the intent of transferring and continuing their study of architecture. Topics include multiple design principles, concept applications, spatial and form definition, preliminary studies, interior and exterior space planning, site orientation, styles, and materials. Student design concepts are expressed verbally and graphically using presentation drawings, isometrics and perspectives, conceptual models, renderings, and photographs. Students develop skills in a studio atmosphere dealing with existing conditions, problem solving using design criteria, codes, and environmental relationships for abstract, residential, and small commercial structures.

Hours: 54 Lecture. 54 Lab.

ARCH 236**Architectural Design Studio II****Units:** 4**Prerequisite:** ARCH 235**Transfers to:** UC/CSU

This second-level course builds upon the foundation of the Architectural Design Studio course (ARCH 235). The course presents additional design approaches to the spatial and form definition of an architectural program; urban and site planning; and topographic, civil, and environmental issues. Architectural design proposals and projects are expressed verbally and graphically using presentation drawings, conceptual models, renderings, and photographs. Students enhance their design skills in a studio atmosphere, working to justify their design solutions.

Hours: 54 Lecture. 54 Lab.

ARCH 260**Residential Architecture Using Revit and 3D Software****Units:** 4**Prerequisite:** ARCH 115, ENGT 150**Transfers to:** CSU

This course is for students pursuing an Associate of Science Degree in Architecture or Architectural Design and Drawing with the intent of transferring and continuing their study of architecture. It presents an intensive study of building information modeling (BIM) applications as they relate to architecture. Utilizing the latest releases of *Revit* BIM software and technical and architectural drafting conventions learned in previous courses, students will produce two- and three-dimensional (2D and 3D) BIM-generated residential architectural drawings and 3D virtual models. High technology skills necessary to function as a designer or computer-aided design and drafting (CADD) drafter are emphasized.

Hours: 54 Lecture. 54 Lab.

ARCH 261**Commercial Architecture Using Revit with Structural and MEP Applications****Units:** 4**Prerequisite:** ARCH 115, ENGT 150**Transfers to:** CSU

This course is for students pursuing an Associate of Science Degree in Architecture or Architectural Design and Drawing with the intent of transferring and continuing their study of architecture. It presents an intensive study of building information modeling (BIM) applications as they relate to architecture. Utilizing the latest releases of *Revit* software and technical and architectural drafting conventions learned previously in other courses, students will produce two- and three-dimensional (2D and 3D) BIM generated commercial architectural drawings and 3D virtual models. Advanced BIM applications extend the fundamentals learned in the Residential Architecture Using *Revit* and 3D Software course (ARCH 260) to include structural, mechanical, electrical, and plumbing extensions of the *Revit* software. High technology skills necessary to function as a designer or computer-aided design and drafting (CADD) drafter are emphasized.

Hours: 54 Lecture. 54 Lab.

ARCH 280**Advanced MicroStation for CADD & BIM Applications****Same as:** ENGT 280, ENGT 280**Units:** 4**Prerequisite:** ENGT 170 or appropriate CADD work experience**Advisory:** ARCH 101 or ARCH 101 or CIV 101 or ENGT 101 or two years of high school drafting**Transfers to:** CSU

This course is for students pursuing advanced study in MicroStation 3D parametric CADD (Computer Assisted Design and Drafting) and the BIM (Building Information Modeling) approach to building design using Bentley Architecture digital modeling applications. Students apply previously learned drafting conventions to produce 2D and 3D CADD- and BIM-generated mechanical and architectural drawings and virtual design models. This course benefits all students studying architecture, civil engineering of all types, drafting, design, and computer graphics. Emphasis is placed on the high technology skills necessary to function as a designer or CADD drafter.

Hours: 54 Lecture. 54 Lab.

ARCH 290**Work Experience Education/Internship for Architecture-Related Fields****Units:** 1-4

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of architectural design drafting and have completed or enrolled in the appropriate

coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-216 Lab.

ARCH 299**Directed Study in Architecture Design & Drawing****Units:** 1-3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations, with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take Directed Study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

ART

Division of Arts, Business, & Cultural Programs

ART 101**Introduction to Studio Arts****Units:** 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

Students in this introductory lecture/lab course for non-art majors explore multiple aspects of visual art, including the fundamental principles, techniques, history, and appreciation of various art forms, from traditional to contemporary. Through lectures, hands-on activities, and analysis of artworks, students gain a deeper understanding of the role of art in society, different cultures, and personal expression. Project and topics include drawing, painting, printmaking, design, and sculpture.

Hours: 36 Lecture. 72 Lab.

ART 104 (C-ID: ARTH 145)**Art of the Ancient Americas****Units:** 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

This course provides a study of the indigenous arts of Mexico, Andean South America, and Central America produced by civilizations including the Olmec, Maya, Aztec, Inca, Moche, Chavin de Huantar, and Nazca. The art of representative native tribes of the territory now encompassed by the United States and Canada is comparatively examined. Works of art and architecture are presented in relation to the various religious beliefs, political/ economic systems, and cultural practices of the ancient Americas. Art historical and archaeological methodologies relating to the understanding and interpretation of non-Western art are discussed. This course is appropriate for students pursuing a degree in art or art history and/or students with an interest in American studies and Latin American studies. Hours: 54 Lecture.

ART 105 (C-ID: ARTH 110)**Survey of Western Art: Prehistory through the Middle Ages****Units:** 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: ART 105 or ART 105H. This course presents a broad overview of prehistoric, Mesopotamian, Egyptian, Greek, Etruscan, Roman, early Christian, Islamic, and Medieval art and architecture. The course is appropriate for students pursuing a degree in Studio Art or Art History, or seeking to fulfill General Education requirements in Fine Arts and Humanities. Hours: 54 Lecture.

ART 105H (C-ID: ARTH 110)**Survey of Western Art: Prehistory through the Middle Ages Honors****Units:** 3

It is advised that students be able read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: ART 105 or ART 105H. This course presents a broad overview of prehistoric, Mesopotamian, Egyptian, Greek, Etruscan, Roman, early Christian, Islamic, and Medieval art and architecture. The course is appropriate for students pursuing a degree in Studio Art or Art History, or seeking to fulfill General Education requirements in Fine Arts and Humanities, and is designed for those who meet Honors Program requirements. Hours: 54 Lecture.

ART 106 (C-ID: ARTH 120)**Survey of Western Art: Renaissance to Contemporary****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: ART 106 or ART 106H. This course provides an overview of the history of Western art from the 14th century through the Modern Era, including Renaissance, Baroque, Rococo, Neoclassicism, Romanticism, Realism, Early Photography, Impressionism, Post Impressionism, Modernism, Postmodernism, and major art developments of the 20th and 21st centuries. The course is appropriate for all students pursuing the degree in Studio Art or Art History, or seeking to fulfill general education requirements in Fine Arts and Humanities. Hours: 54 Lecture.

ART 106H (C-ID: ARTH 120)**Survey of Western Art: Renaissance to Contemporary Honors****Units:** 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: ART 106 or ART 106H. This course provides an overview of the history of Western art from the 14th century through the Modern Era, including Renaissance, Baroque, Rococo, Neoclassicism, Romanticism, Realism, Early Photography, Impressionism, Post Impressionism, Modernism, Postmodernism, and major art developments of the 20th and 21st centuries. The course is designed for students who meet Honors Program requirements, and is appropriate for all students pursuing the degree in Studio Art or Art History, or seeking to fulfill general education requirements in Fine Arts and Humanities. Hours: 54 Lecture.

ART 107 (C-ID: ARTH 130)**The Art of Asia****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course examines the artistic traditions of prehistoric to modern Asia in relation to their cultural, philosophical, and religious influences. The art and architecture of Central Asia (India, China, Korea, and Japan) are emphasized. Examples from Southeast Asia, Pakistan, Tibet, and Nepal also are discussed. This course is appropriate for all students interested in art and culture, and for those seeking to fulfill General Education requirements for Arts, as well as Studio Art majors. Hours: 54 Lecture.

ART 108**The Art of Mexico****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is a survey of the art and architecture of Mexico, including

PreColumbian, Viceregal (Colonial) and Modern (i.e., art and architecture of the 19th and 20th centuries). Chicano/a/x art will also be examined in relation to its Mexican antecedents. This course is appropriate for all students interested in art and culture and for those seeking to fulfill General Education requirements in Fine Arts and Humanities, as well as all Studio Art and Art History majors. Hours: 54 Lecture.

ART 109**History of American Art****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is a study of American art and architecture from the colonial period through the early 20th century. The course focuses on the art of the United States, with a close examination of the country's artistic exchanges with Canada, Mexico, and South America. This course is appropriate for students with an interest in American studies and Latin American studies, and students seeking to fulfill the General Education requirement in the arts. Hours: 54 Lecture.

ART 110 (C-ID: ARTH 100)**Understanding Visual Art****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This lecture course is an introduction to the study of visual art: its vocabulary and forms, the many roles it plays in society, and the variety of processes artists master in its making. Students gain insight into current approaches used to interpret and derive meaning from art, and explore questions about the ways in which value is assigned to the art object. Using examples from cultures around the world and across time, this course offers a broad overview to students interested in art and culture, and to those seeking to fulfill general education requirements in Arts. Hours: 54 Lecture.

ART 112 (C-ID: ARTH 150)**Visual Art in the Modern Era****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is a survey of developments in art and architecture from the early 19th through the 20th century, and into the 21st. From Neoclassicism and Romanticism through Postmodernism and contemporary art, visual art movements are discussed in relation to stylistic trends, philosophical influences, innovations in technology, and other historical and social contexts. The roles played by the artist, critic, and consumer in shaping these movements are examined, as well as visual art's impact upon society in the Modern era. This course is appropriate for all students pursuing the degree in Art History and/or seeking to fulfill general education requirements in Arts. Hours: 54 Lecture.

ART 113**The History of Photography****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU

This lecture course examines the history of photography from its invention in the 1830s to the present. The technological development, social role, and aesthetic possibilities of photography are discussed in relation to major historical, art historical, cultural, and political influences. This course is appropriate for all students interested in photography, art, and art history and culture, students seeking to fulfill the General Education requirement in arts, and studio art and art history majors.

Hours: 54 Lecture.

ART 115 (C-ID: FTVE 105)**The Art of Film****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU

This introductory course explores film as an art form—its basic components and its relation to the styles and movements of other visual arts forms. An understanding of cinematic language is emphasized by focusing upon film's manipulation of time and space and its use of visual metaphors, montages, and explicit/implicit messages. The collaborative nature of filmmaking is studied by examining the role of cinematography, lighting, film editing, visual effects, art direction, and the use of sound and music to enhance the script and create style. Through discussion and written assignments, students develop the ability to analyze the impact of films viewed both in and out of class. This course is appropriate for any student interested in film, art, media studies, or culture.

Hours: 54 Lecture.

ART 117**History of World Ceramics****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU

This introductory course examines world ceramic and pottery traditions: their vocabulary, forms, and the roles they play in society, as well as the variety of processes employed by their makers. Using examples from cultures around the world and across time, this course offers a broad overview to students interested in art and culture.

Hours: 54 Lecture.

ART 120 (C-ID: ARTS 100)**Two-Dimensional Design****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU

This introductory course is open to all students interested in learning basic design principles as they apply to two-dimensional media. Through lectures, written assignments,

and studio projects using materials such as ink, paper collage, and paint, students learn how to orchestrate the fundamental elements of two-dimensional images like line, shape, texture, value, and space. In addition to developing a visual vocabulary for personal creative expression, students explore design concepts as they relate to effective visual communication across art, design, and culture.

Hours: 36 Lecture. 72 Lab.

ART 121 (C-ID: ARTS 101)**Three-Dimensional Design****Units:** 3**Advisory:** ART 120**Transfers to:** UC/CSU

This introductory course is open to all students interested in the fundamentals of visual thinking as they apply to all three-dimensional media. The course provides an introduction to the concepts, applications, and art historical contexts related to three-dimensional art, and includes the basic elements and principles of three-dimensional design. Students explore topics such as planes, volume, and texture through the creative use of different materials like foam board, wire, or wood.

Hours: 36 Lecture. 72 Lab.

ART 124 (C-ID: ARTS 270)**Color Theory****Units:** 3**It is advised that students be able to engage in written composition at a college level.****Transfers to:** UC/CSU

This course is an introduction to the characteristics of color and color interaction. It is suited for all art majors transferring to a 4-year college or interested in working in the arts as a painter, illustrator, or designer. The course covers the principles, theories, and applications of additive and subtractive color in 2 dimensions. Topics include major historical and contemporary color systems, production of projects in applied color, and the elements of design as they apply to color.

Hours: 36 Lecture. 72 Lab.

ART 130 (C-ID: ARTS 110)**Freehand Drawing I****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU

This course for art and non-art majors interested in developing basic drawing skills is an introduction to observational drawing and composition. In the course, students develop the ability to perceive and define shape, contour, volume, space, and light using a variety of drawing media and subject matter. Emphasis is on clarity of observation and the ability to order and translate 3D form and space into 2D drawings.

Hours: 36 Lecture. 72 Lab.

ART 131 (C-ID: ARTS 205)**Freehand Drawing II****Units:** 3**Prerequisite:** ART 130**Transfers to:** UC/CSU

This is a second-level course for all students in observational drawing and

composition, stressing an advanced ability to perceive and define shape, contour, volume, space, and light. Students use a variety of drawing media and subject matter. Emphasis is placed on strengthening skills introduced in ART 130 (Freehand Drawing I), the exploration of color in drawing, and concepts related to content.

Hours: 36 Lecture. 72 Lab.

ART 135 (C-ID: ARTS 210)**Beginning Painting****Units:** 3**Advisory:** ART 130**Transfers to:** UC/CSU

This is an introductory course for all students interested in developing basic painting skills. The course explores both traditional and contemporary painting techniques while stressing an ability to perceive and define shape, contour, volume, texture, space, and light using acrylic or oil painting media. Emphasis is placed on learning the techniques of painting, understanding the use of color, and strengthening observation and rendering skills while providing an understanding of the historical and cultural development of painting in human expression and creativity. Students are advised to have some drawing skills before taking this course.

Hours: 36 Lecture. 72 Lab.

ART 136**Intermediate Painting****Units:** 3**Prerequisite:** ART 130, ART 135**Transfers to:** UC/CSU

This is an intermediate course for all students interested in further developing painting skills and techniques and understanding the use of color and space while strengthening observation and rendering skills. The course explores both traditional and contemporary painting concepts, styles, and techniques that involve complex compositional as well as technical problems in either acrylic or oil painting media.

Hours: 36 Lecture. 72 Lab.

ART 140**Ceramics I****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU

This introductory course is open to all Art and non-art majors interested in learning basic skills in ceramics using the potter's wheel. Students develop a visual vocabulary for creative expression through lectures, vocabulary lists and video presentations. The course covers beginning problems of centering, throwing, and shaping various functional and non-functional pottery. Students are introduced to the process of glazing and basic firing techniques. This course emphasizes exploring personal and cultural expression in the ceramic media.

Hours: 36 Lecture. 72 Lab.

ART 141**Ceramics II****Units:** 3**Prerequisite:** ART 140**Transfers to:** UC/CSU

This intermediate course in ceramics is open to all Art and non-art majors, with continued emphasis on basic skills using the potter's wheel. Intermediate problems on the wheel, basic decorative techniques, and more advanced use of glaze are covered. Also, students are introduced to ceramic kilns and how they are loaded and fired.
Hours: 36 Lecture. 72 Lab.

ART 142
Introduction to Ceramic Handbuilding

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course introduces students to the concepts, techniques, history, and contemporary practices of handbuilding in the ceramic arts. The course is designed for students interested in the fundamentals of clay construction using handbuilding techniques.

Hours: 36 Lecture. 72 Lab.

ART 143
Ceramic Handbuilding II

Units: 3

Prerequisite: ART 142

Transfers to: UC/CSU

This intermediate course in ceramics is open to all Art and non-art majors, with continued emphasis on basic skills in hand building. Emphasis is placed on exploring hand-built forms in vessels and ceramic sculpture. Students solve visual and conceptual problems dealing with art and principles of design, and learn about shape, color, form, texture, and space.

Hours: 36 Lecture. 72 Lab.

ART 144
Advanced Handbuilding

Units: 3

Prerequisite: ART 143

Transfers to: UC/CSU

This advanced course in ceramics is open to all art and non-art majors, with continued emphasis on skills and ceramic art theory. The course allows students to consider complex problems of ceramic art as they work with the ceramic medium in conjunction with other materials (e.g., wood, metal, and glass), explore clay surface design, and develop a handbuilt body of ceramic work.

Hours: 36 Lecture. 72 Lab.

ART 145
Glaze Composition

Units: 3

It is advised that students have the ability to conduct basic calculations using fractions, decimals, and percentages.

Prerequisite: ART 140 or ART 142

Transfers to: CSU

In this course, students create unique glazes for their artwork, and This course serves as an introduction to basic glaze and clay calculations. In the course, students create unique glazes for their artwork, and learn how to calculate glaze formulas and batch recipes as well as how to analyze, formulate, and alter glazes and clay bodies. This course involves basic mathematical calculations, basic ceramic laboratory skills, and safety precautions for handling chemicals.
Hours: 27 Lecture. 81 Lab.

ART 146
Introduction to Sculpture

Units: 3

Prerequisite: ART 121

Advisory: ART 130

Transfers to: UC/CSU

This course is suited for art majors transferring to a four-year college, or any student interested in working in the arts. The course provides an introduction to three-dimensional sculptural principles, techniques, and concepts utilizing a wide range of materials and practices. Various sculpture methods are practiced with attention to creative self-expression and historical context.
Hours: 36 Lecture. 72 Lab.

ART 147
Ceramic 3D Printing

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is an introduction to exploring 3D ceramic concepts through art and design using digital tools. Students are introduced to a digital workflow during the process of producing traditional forms of art. Students learn software, hardware, and other aspects of the production process utilized in ceramic 3D printing. This course is beneficial for all students interested in studio arts, entertainment design, and industrial design.
Hours: 36 Lecture. 72 Lab.

ART 150
Beginning Printmaking

Units: 3

Advisory: ART 130

Transfers to: UC/CSU

This course is an introduction to the art of printmaking suitable for studio art majors transferring to a four-year college, or any student interested in working in the arts. The course is an introduction to the basic materials, equipment, and processes of printmaking, including relief (linocut and woodcut), intaglio (drypoint, etching, and collagraph), planography (lithography and monotype), and stencil (screenprint).
Hours: 36 Lecture. 72 Lab.

ART 151
Intermediate Printmaking

Units: 3

Prerequisite: ART 150

Transfers to: UC/CSU

This intermediate course is intended for all students interested in the continued study of intaglio and relief art printmaking processes. The course expands upon techniques and skills students learned during the Beginning Printmaking prerequisite, including color printing techniques. Emphasis is placed on combining technical and formal skills with creativity and expression; students also learn about the practice of creating an edition.
Hours: 36 Lecture. 72 Lab.

ART 170 (C-ID: ARTS 250)
Introduction to Digital Painting

Units: 3

Prerequisite: ART 130

Transfers to: UC/CSU

This course is designed for students majoring in the visual arts, including studio art, illustration, animation, graphic design, or

students interested in learning to use the computer as a tool for digital painting. The course uses technology tools and media (e.g., software, drawing tablets, scanners, and printers) to execute traditional drawing and painting effects in a digital medium. Students investigate the fundamental pictorial elements of line, shape, space, color, and texture as well as the formal relationship of these elements to produce original works of art while learning the technology, concepts, and practices of digital art production.
Hours: 36 Lecture. 72 Lab.

ART 185
Art Studio

Units: 1

Transfers to: UC/CSU

This course is designed to provide supervised studio study on an individual basis with various projects. Arranged: 4 hours lab. Offered on a pass-no pass basis.
Hours: 72 Lab.

ART 190
Gallery and Exhibition Design

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This lecture and lab course provides students with hands-on experience in exhibition design and display. It is appropriate for all students interested in art, art exhibition management, museum studies, and cultural studies. The topics addressed include exhibition space planning, principles of color and design, art exhibition principles, and the proper care and handling of art objects. Students are also introduced the basic principles of art curating and display.
Hours: 36 Lecture. 72 Lab.

ART 230 (C-ID: ARTS 200)
Beginning Life Drawing

Units: 3

Prerequisite: ART 130

Transfers to: UC/CSU

This course is intended for art, animation, and non-art majors who have satisfied the drawing course prerequisite and are interested in developing the basic drawing skills of representing the human figure. As the course is an introduction to observational figure drawing and composition, students develop the ability to identify and render the surface anatomy and structural organization of the human form through the creative use of drawing media, such as charcoal and ink.
Hours: 36 Lecture. 72 Lab.

ART 231
Intermediate Life Drawing

Units: 3

Prerequisite: ART 230

Transfers to: UC/CSU

This intermediate course is intended for all students interested in furthering their figure drawing skills. Students build upon skills learned in the beginning prerequisite course, develop an intermediate ability to render the human form, study human anatomy in greater detail, and extend their knowledge regarding the use of the figure in visual art. Emphasis is

placed on observational specificity and the ability to articulate form and space on a two-dimensional surface.

Hours: 36 Lecture. 72 Lab.

ART 232

Advanced Life Drawing

Units: 3

Prerequisite: ART 231 or ART 260

Transfers to: UC/CSU

This is advanced course is intended for all students interested in furthering their figure drawing skills. Students refine skills learned in the prerequisite beginning and intermediate courses, develop advanced drawing skills, study the human anatomy in greater detail, and extend their understanding of the expressive and conceptual dimensions of depicting the human figure in visual art.

Hours: 36 Lecture. 72 Lab.

ART 233

Freehand Drawing III

Units: 3

Prerequisite: ART 131

Transfers to: UC/CSU

This advanced-level course is for all students interested in drawing and composition. Advanced observational skills and conceptual development are explored through a range of subject matter, technical refinement, and thematic development. Particular emphasis is placed on examining individual creative interpretation, process, and intent in order to deepen each student's studio practice and exploration.

Hours: 36 Lecture. 72 Lab.

ART 234

Watercolor Painting

Units: 3

Prerequisite: ART 130

Transfers to: UC/CSU

This entry-level course is for any student interested in watercolor painting. Students are introduced to various transparent watercolor techniques including wash and glazing. Applications of drawing, beginning painting, and design fundamentals related to these techniques are included, as is the communicative element of content.

Hours: 36 Lecture. 72 Lab.

ART 235

Advanced Painting I

Units: 3

Prerequisite: ART 136

Transfers to: UC/CSU

This is an advanced course in painting for any student interested in painting. The course constitutes a study of advanced painting problems, stressing experimentation with traditional and contemporary methods of painting, composition, and expression. Class and individual projects using the figure, still life, landscape, abstraction, shaped format, altered scale, and material exploitation are stressed.

Hours: 36 Lecture. 72 Lab.

ART 236

Advanced Painting II

Units: 3

Prerequisite: ART 235

Transfers to: UC/CSU

This course is an advanced, fourth-level painting course for all students interested in painting. The course explores traditional and

contemporary methods of painting using the figure, still life, landscape, abstraction, and non-objective imagery, with an emphasis on continuing skill development and problem-solving in interpretation, expression, and conceptual issues in painting. ART 235 (Advanced Painting I) is a prerequisite to enrolling in this course.

Hours: 36 Lecture. 72 Lab.

ART 242

Advanced Ceramics

Units: 3

Prerequisite: ART 141

Transfers to: UC/CSU

This advanced course in ceramics is open to all art and non-art majors. The course places a special emphasis on personal growth and aesthetics as well as increased proficiency on the potter's wheel. Students explore the concepts of management and expressive exploration of the unique characteristics of fired ceramics—both the opportunities and constraints—presented in the processing of clay from a soft, plastic, fragile, impermanent substance into a hard, rigid, and completely metamorphosed material after drying and firing.

Hours: 36 Lecture. 72 Lab.

ART 252

Advanced Printmaking

Units: 3

Prerequisite: ART 151

Transfers to: UC/CSU

This advanced course expands upon techniques and skills students learned in beginning and intermediate prerequisite courses, and is intended for all students in the continued study of intaglio and relief art printmaking processes. In the course, students refine printmaking skills and create an edition of original prints at an advanced level.

Hours: 36 Lecture. 72 Lab.

ART 260

Figure Drawing for Animators

Units: 3

Prerequisite: ART 230

Transfers to: UC/CSU

This intermediate level figure drawing course focuses on how to capture the essential movement, dynamic expression, and individual attitude of a human body through traditional drawing media. The course provides a deeper understanding of life drawing, building on skills learned in the prerequisite beginning course that serves as a foundation for further studies in animation and entertainment arts. In the course, students study human anatomy in greater detail while learning to draw the figure in sequential movement, and learn about weight and balance, facial and body expression, and figure invention. This course may be taken by art majors wishing to further life drawing skills and is recommended for all animation art majors.

Hours: 36 Lecture. 72 Lab.

ART 290

Work Experience Education/Internship for Visual Arts-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of visual arts and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-216 Lab.

ART 299A

Directed Study in Art History

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.

Hours: 54-162 Lab.

ART 299C

Directed Study in Ceramics

Units: 1-3

Prerequisite: ART 140 or ART 142

Advisory: ART 141 or ART 143

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.
Hours: 54-162 Lab.

AMERICAN SIGN LANGUAGE

Division of Communications and Languages

ASL 101

American Sign Language I

Units: 4.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course will provide an introduction to American Sign Language, emphasizing receptive and expressive skills. The use of facial expressions during signing will also be addressed. Students will be exposed to deaf culture experiences in the classroom and other environments. In addition to classroom discussion, students will receive intensive individualized practice in American Sign Language via interactive websites, video programs, and CD-ROMs. This course is designed for students who want to learn how to communicate with people who are deaf and hard of hearing.
Hours: 72 Lecture. 27 Lab.

ASL 102

American Sign Language II

Units: 4.5

Prerequisite: ASL 101 or two years of high school ASL with a "C" or better, or successfully pass an interview and comprehensive exam developed by the department demonstrating competency of the skills required in an ASL I course.

Transfers to: UC/CSU

This course will provide a continuation to American Sign Language I (ASL 101), emphasizing receptive and expressive skills. The use of facial expressions during signing will also be addressed. Students will be exposed to deaf culture experiences in the classroom and other environments. In addition to classroom discussion, students will receive intensive individualized practice in the language laboratory via interactive websites, video programs, and CD-ROMs. This course is designed for students who want to learn how to communicate with people who are deaf and hard of hearing.
Hours: 72 Lecture. 27 Lab.

ASL 120

Introduction to Deaf Studies

Units: 3

Prerequisite: ASL 101

Transfers to: UC/CSU

This course introduces students to the basic information of the American Deaf experience in the United States: Deaf community/culture and American Sign Language. This course exposes students to the history, contributions and contemporary lives of Deaf people in America. This course is interdisciplinary in that it introduces a range of issues that are developed in the purview of Deaf Studies — linguistics, education, sociology, psychology and other fields. This course will be taught using a combination of ASL and spoken English and may or may not have interpreters facilitating the lectures depending on the instructor.
Hours: 54 Lecture.

ASL 124

Deaf Culture

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Prerequisite/Corequisite: ASL 102

Transfers to: UC/CSU

This course will cover basic information and research on deaf culture, deaf children and their upbringing, deaf education, the importance of American Sign Language to the deaf community, deaf societies around the world, and advances in and usage of technology for people who are deaf or hard of hearing. The course will focus on research and progress within deaf culture. This course will be taught using a combination of American Sign Language and spoken English and, depending on the instructor, may or may not have interpreters facilitating the lectures.
Hours: 54 Lecture.

ASL 201

American Sign Language III

Units: 4.5

Prerequisite: ASL 102 (formerly ASL 150)

Transfers to: UC/CSU

This course will focus on refining students' knowledge of the grammatical structure and lexicon of American Sign Language as these things relate to its historical, artistic, and

cultural influence in mainstream society, with an emphasis on receptive/expressive conversational and cultural skills for communication. In addition to classroom discussion, students will receive intensive individualized practice in the language laboratory via interactive websites, video programs, and CD-ROMs.
Hours: 72 Lecture. 27 Lab.

ASL 202

American Sign Language IV

Units: 4.5

Prerequisite: ASL 201

Transfers to: CSU

This course will provide a continuation to American Sign Language III (ASL 201). The course will focus on the use of American Sign Language in practical applications through discussing relevant topics like math, current events, arts, and various other topics, with an emphasis on applying the language in real world interactions. In addition to classroom discussion, students will receive intensive individualized practice in the language laboratory via interactive websites, video programs, and CD-ROMs.
Hours: 72 Lecture. 27 Lab.

ASL 211

Beginning Interpreting + Ethics 1

Units: 3

Prerequisite: ASL 102

Transfers to: UC/CSU

In this course, students survey basic theories, principles, and practices of interpreting/transliterating, including basic ethical considerations, a historical overview of the interpreting profession, and discuss the professional role of the interpreter. Students begin the development of interpreting/transliterating processing skills. This course will be taught using a combination of ASL and spoken English, and may or may not have interpreters facilitating the lectures depending on the instructor.
Hours: 54 Lecture.

ASL 212

Beginning Interpreting + Ethics 2

Units: 3

Prerequisite: ASL 201, ASL 211

Transfers to: UC/CSU

In this course, students will continue to learn theories, principles, and practices of interpreting/transliterating including more complex ethical considerations, a current overview of the interpreting profession, and discuss the professional role of the interpreter in today's workforce. This course is designed to allow students to pursue a degree in ASL interpreting. This course will be taught using a combination of ASL and spoken English and may or may not have interpreters facilitating the lectures depending on the instructor.
Hours: 54 Lecture.

ASL 220

Pathways to Interpreting Careers

Units: 2

Prerequisite: ASL 201, ASL 211

Transfers to: CSU

In this course students will learn business practices in the profession of interpreting. They will explore various career paths available to ASL interpreters from staff positions to independent contractors. Students will learn legal considerations within

the state of California and beyond as they apply to interpreting. This course will be taught using a combination of ASL and spoken English and may or may not have interpreters facilitating the lectures depending on the instructor.
Hours: 36 Lecture.

ASL 250
ASL Linguistics

Units: 3

Prerequisite: ASL 102

Advisory: ENGL 101

Transfers to: UC/CSU

This course will serve as an introductory course in linguistics, with a special emphasis on American Sign Language (ASL). Students will learn basic linguistic concepts such as phonology, morphology, and syntax as they apply to all languages. Students will further their knowledge of linguistics as it relates specifically to ASL. No prior knowledge of linguistics is needed to take this course. Upon completion of this course students will be able to pursue careers related to Deaf education or ASL pedagogy. This course will be taught using a combination of ASL and spoken English and may or may not have interpreters facilitating the lectures depending on the instructor.
Hours: 54 Lecture.

ASL 270
ASL Literature

Units: 3

Prerequisite: ASL 201

Advisory: ASL 250

Transfers to: UC/CSU

This course will take students on a journey through the history and current status of the literary body of American Sign Language (ASL). This is a rare opportunity to explore a body of literature in its infancy stages. Students will analyze videos and books created or written by ASL poetic performers or authors. Word choices, deeper meanings, and metaphors used will be discussed. This course will be taught using a combination of ASL and spoken English and may or may not have interpreters facilitating the lectures depending on the instructor.
Hours: 54 Lecture.

ASL 280
ASL Storytelling

Units: 2

Prerequisite: ASL 124, ASL 201

Transfers to: UC/CSU

This course is designed to further refine the student's knowledge and mastery of American Sign Language (ASL) through the practical application of storytelling. Students will study master storytellers and analyze their techniques. Upon completion of this course, students will have created multiple original stories in ASL. These are necessary skills to achieve fluency in ASL.
Hours: 36 Lecture.

ASL 299
Directed Study: American Sign Language

Units: 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to

assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.
Hours: 54-162 Lab.

ASTRONOMY

Division of Mathematics, Sciences, and Engineering

ASTR 110
General Astronomy

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts and have a knowledge of elementary algebra concepts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit from UC for only one of the following courses: ASTR 110 or ASTR 110H

This descriptive, nonmathematical course is designed for students who want to develop an appreciation of astronomy and a broad cosmic perspective. The emphasis of the course is on the current state of knowledge about our solar system, our galaxy, and the universe. Topics on the frontier of astronomical knowledge such as black holes and the search for extraterrestrial life are explored. This course is designed for students with an interest in astronomy or anyone who desires to expand their cosmic horizons.
Hours: 54 Lecture.

ASTR 110H
General Astronomy Honors

Units: 3

It is advised that students be able to read college-level texts and have a knowledge of elementary algebra concepts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: ASTR 110 or ASTR 110H

This descriptive, nonmathematical course is designed for students who want to develop an appreciation of astronomy and a broad

cosmic perspective. The emphasis of the course is on the current state of knowledge about our solar system, our galaxy, and the universe. Topics on the frontier of astronomical knowledge such as black holes and the search for extraterrestrial life are explored. This course is designed for students with an interest in astronomy or anyone who desires to expand their cosmic horizons. It is intended for students who meet Honors Program requirements.
Hours: 54 Lecture.

ASTR 112
Observational Astronomy

Units: 1

It is advised that students be able to engage in written composition at a college level, read college-level texts and have a knowledge of elementary algebra concepts.

Prerequisite/Corequisite: ASTR 110

Transfers to: UC/CSU

This course is designed to acquaint students with the methods, techniques, and tools of the astronomer. Indoor labs demonstrate classical methods and techniques of science. Students learn the critical thinking processes needed to acquire and analyze scientific data; become familiar with visible objects including constellations, planets, star clusters, galaxies, meteors, and the phases of the moon; and learn to locate objects visually and use astronomical coordinate systems. The development of skills in the operation of optical telescopes is emphasized. This course is designed for students with an interest in learning about night skies and the tools astronomers use to explore the cosmos. Observatory facilities are utilized often, weather permitting.
Hours: 54 Lab.

ASTR 137
An Introduction to Cosmology: From the Big Bang to the Multiverse

Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an elementary algebra course. It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course introduces students to the science of cosmology and the study of the origins and development of the universe. The course covers Newtonian mechanics, Einstein's theories of special relativity and the curvature of space-time, the Big Bang theory, the cosmic microwave background, cosmic inflation, dark matter and energy, and associated evidence and theories that explain these phenomena, including string theory and multiverse theory. Laboratory topics cover the conceptual underpinnings of observational cosmology through experiments in modern and classical physics. This course is intended for students who are enthusiastic cosmology amateurs and requires only a high school-level mathematics background.
Hours: 54 Lecture. 54 Lab.

ASTR 299
Directed Study: Astronomy

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title 5 regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of twelve (12) units college wide.
Hours: 54-162 Lab.

AUTOMATION

Division of Career and Workforce Education

ATMN 101
Introduction to Automation Applications
Units: 3
It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.
Transfers to: CSU
This exploratory course in automation utilizes hands-on modules in mechanical, electronics (mechatronics), and robotics technology. Students will develop the entry-level skills required for high-demand and high-paying careers.
Hours: 45 Lecture. 27 Lab.

ATMN 102
Shop Safety and Measurements
Units: 2
It is advised that students be able to read college-level texts and have a knowledge of elementary algebra concepts.
Transfers to: CSU
This course covers OSHA 10 safety training. In addition, students obtain skills to solve technical problems by doing practical applications of basic math and arithmetic in industrial (shop) applications. Topics include units of measure and conversions, reading tools of measurement, error calculation and propagation, reading graphs and plots, and using geometry to calculate perimeter/area/volume.
Hours: 27 Lecture. 27 Lab.

ATMN 105

Technical Writing and Communication
Units: 2
It is advised that students be able to engage in college composition written at a college level and to read college-level texts.
Transfers to: CSU
This course introduces the principles and practices of writing in a wide range of technical documents including emails, letters, technical reports, and presentations used in technology fields and engineering. The use of graphical information such as tables and charts are covered, as well as technical resumes, letters, and instruction and operation manuals.
Hours: 27 Lecture. 27 Lab.

ATMN 110
Engineering Graphics with SolidWorks
Units: 3
It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.
Transfers to: CSU
This course covers the fundamentals of engineering graphics including descriptive geometry and orthographic projection to help with visualization, and utilizing SolidWorks software to practice solid modeling and Three-Dimensional Computer Aided Design (CAD). Students are prepared for the Certified SolidWorks Associate exam (CSWA), an industry-valued credential.
Hours: 36 Lecture. 54 Lab.

ATMN 115
Print Reading with Geometric Dimensioning and Tolerancing
Units: 2
Prerequisite: ATMN 110
Transfers to: CSU
This course covers the principles and practices of visualizing and interpreting engineering drawings and prints by going over actual prints from various industries. The main topics are the study of drawing types, symbology, drawing management, industry standards, and ASME Y14.5 standard for Geometric Dimensioning and Tolerancing.
Hours: 27 Lecture. 27 Lab.

ATMN 120
DC and AC Fundamentals
Units: 3
It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.
Transfers to: CSU
This introductory course in direct current (DC) and alternating current (AC) electricity is for students and for those contemplating a career in the electrical/electronics industry. Course content includes basic theories, resistance, capacitance, inductance, simple DC and AC circuits, transformers, measuring instruments, batteries, motors, and generators.
Hours: 45 Lecture. 27 Lab.

ATMN 125
Basic Programmable Logic Controllers
Units: 2
Prerequisite: ATMN 120

Transfers to: CSU
This course introduces Basic Programmable Logic Controllers (PLC), programming devices, ladder diagrams, and designing basic PLC programs for automation processes.
Hours: 18 Lecture. 54 Lab.

ATMN 130
Mechanical Systems
Units: 2
Advisory: ATMN 102
Transfers to: CSU
This course presents fundamental concepts of mechanical drives and systems, including safe operation, installation, alignment, troubleshooting, and maintenance of a range of mechanical drives in automated manufacturing systems.
Hours: 18 Lecture. 54 Lab.

ATMN 135
Fluid Systems
Units: 2
Advisory: ATMN 102
Transfers to: CSU
This course presents the fundamentals of hydraulic and pneumatic systems, including safe operation, installation, troubleshooting, and maintenance of control systems in automated manufacturing systems.
Hours: 18 Lecture. 54 Lab.

ATMN 140
Introduction to Robotics and Programming
Units: 2
Advisory: ATMN 102
Transfers to: CSU
This introductory course in robotics emphasizes hands-on experience of building and operating a functional robotic kit, including electric motors, servos, sensors, switches, actuators, and their functions in the operation of a robot. Students also learn to program and operate an industrial robot.
Hours: 18 Lecture. 54 Lab.

AUTOMOTIVE TECHNOLOGY

Division of Career and Workforce Education

AUTO 065
Smog Technician Diagnostic and Repair Procedures
Units: 3
It is advised that students be able to engage in written composition at a college level and read college-level texts.
This course is designed to help students satisfy the Bureau of Automotive Repair (BAR) Smog Check Technician training requirement and successfully complete the Specified Diagnostic and Repair Training Course when applying for the California Smog Check Technician licensing examination. Course content includes diagnostic and repair strategies in electrical and electronic systems, engine performance, and advanced engine performance. This course is also intended for students as a test preparation course for the Automotive Service Excellence (A.S.E.) A6, A8, and L1 certification exams. Upon successful completion of this course, students receive a

certificate of completion from Río Hondo College's Automotive Technology Department. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards. Hours: 45 Lecture. 27 Lab.

AUTO 101

Introduction to Automotive Service and Repair: Underhood Service

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This introductory course is designed to provide students with the fundamentals of the engine and its subsystems of the 21st century automobile. Students learn basic automotive tool and equipment use and how to safely perform basic repair and maintenance operations. Students also have the opportunity to perform minor repair work on their own vehicles to complete required tasks. This course is required for the General Service Technician Certificate of Achievement. It is designed to be a companion course to AUTO 103 and AUTO 106, and is one of the three prerequisite courses for AUTO 107. Students are encouraged to complete all three courses in order to obtain a firm foundation in this subject. Hours: 45 Lecture. 27 Lab.

AUTO 103

Introduction to Automotive Service and Repair: Undercar Service

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This is an introductory course designed to provide students with the fundamentals of the drive train, steering, suspension, and brake systems of the 21st century automobile. Students have access to training vehicles to complete required tasks by which they learn basic automotive tool and equipment use and how to safely perform basic repair and maintenance operations. This course is required for the General Service Technician Certificate of Achievement. It is designed to be a companion course to AUTO 101 and AUTO 106, and is one of the three prerequisite courses for AUTO 107. Students are encouraged to complete all three courses in order to obtain a firm foundation in this subject. Hours: 45 Lecture. 27 Lab.

AUTO 106

Automotive Electrical Tools and Diagnostic Procedures

Units: 3

Advisory: AUTO 101 or AUTO 103

Transfers to: CSU

This introductory course is designed to provide students with the fundamentals of the electrical systems of the 21st century automobile. Emphasis is placed on electrical fundamentals, symbols and circuit diagrams, batteries, starting, charging, ignition, and lighting systems. Students learn the proper use of automotive electrical tools and equipment and how to safely perform basic

vehicle electrical repair and maintenance operations. Students also have the opportunity to perform minor repair work on their own vehicles to complete required tasks. This course is required for the General Service Technician Certificate of Achievement. It is designed to be a companion course to AUTO 101 and AUTO 103, and is one of the three prerequisite courses for AUTO 107. Students are encouraged to complete all three courses in order to obtain a firm foundation in this subject. Hours: 45 Lecture. 27 Lab.

AUTO 107 (C-ID: AUTO 110X)

Introduction to Automotive Light Service

Units: 3

Prerequisite: AUTO 101, AUTO 103 and AUTO 106

Transfers to: CSU

This introductory course provides students with working knowledge of light duty service. Students will learn underhood and undercar systems service, battery and basic electrical service, pre-delivery inspection procedures, and preventative maintenance operations. Emphasis will be placed on the safe operation of light-duty service tools and equipment, and general repair procedures of wheels and tires, suspension & steering components, engine and transmission components, engine & vehicle electrical components, and brake system components. This course offers further practice and more experience in the subjects taught in three other introduction courses (AUTO 101, AUTO 103, & AUTO 106). Hours: 45 Lecture. 27 Lab.

AUTO 115

Computerized Engine Controls and Diagnostics

Units: 3

Prerequisite: AUTO 150

Transfers to: CSU

This course is designed to provide students with an introduction to the Automotive Service Excellence (ASE) Advanced Engine Performance Specialist Certification Test (L1) "Composite Vehicle" by the use of simulator boards and computer-based training methods. This is an introductory study of computerized engine controls and diagnosis as it pertains to the function and control of the engine, fuel, ignition, and emission control systems. Emphasis will be placed upon system components and their operational characteristics. Basic troubleshooting techniques of the engine, fuel, ignition, and emission control systems will be demonstrated. Hours: 54 Lecture.

AUTO 130

Level-I Smog Technician Training Course: Engine and Emission Control Fundamentals

Units: 3

Advisory: AUTO 065

Transfers to: CSU

This course is designed to help students satisfy the Bureau of Automotive Repair (BAR) Smog Check Technician training requirement and successfully complete the Level-I Smog Technician Training Course when applying for the California Smog Check Technician licensing examination. Course content includes engine theory, design and operation, ignition systems, fuel systems,

engine management systems, and emission control systems. Emphasis is placed on proper engine diagnostic procedures and onboard diagnostic systems (OBD-I and OBD-II). Lab activities focus on the use of testing equipment, scan tools, and digital scopes and meters, as well as inspection and repair procedures of vehicles that fail the smog test. Upon successful completion of this course, students receive a certificate of completion from Río Hondo College's Automotive Technology Department. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards. Hours: 45 Lecture. 27 Lab.

AUTO 131

Automotive EV Electronics I

Units: 3

Prerequisite: AUTO 106, AUTO 157

Transfers to: CSU

This is the first of two introductory courses designed to expand student skills related to the fundamentals of the electrical systems of the modern hybrid/electric automobile. The course covers the general electrician skills needed to understand and diagnose modern electric vehicles. Emphasis is placed on electrical fundamentals, symbols and circuit diagrams, high-voltage batteries, charging systems, heat pumps for cooling and heating, and LED lighting systems. Students learn the proper use of high voltage electrical diagnostic tools and equipment and how to safely perform vehicle electrical service and maintenance operations. Students also have the opportunity to perform minor repair work on hybrid and high voltage vehicles to complete required tasks. The course is designed to be a companion course to AUTO 132 and a prerequisite course for AUTO 147. Students are encouraged to complete both AUTO 131 and AUTO 132 in order to obtain a firm foundation in this subject. Hours: 45 Lecture. 27 Lab.

AUTO 132

Automotive EV Electronics II

Units: 3

Prerequisite: AUTO 131

Transfers to: CSU

This is the second of two introductory courses designed to expand student skills related to the fundamentals of the electrical systems of the modern hybrid/electric automobile. The course covers the general electrician skills needed to understand and diagnose modern electric vehicles. Emphasis is placed on electrical fundamentals, symbols and circuit diagrams, high-voltage energy storage and range calculations, charging systems/on and off vehicle, heat pump for cooling and heating, motor and generators, magnetism, induction, and LED lighting systems. Students learn the proper use of high voltage electrical diagnostic tools and equipment, automated driver alert systems, camera, and radar communication with vehicle safety systems, and how to safely perform vehicle electrical service and maintenance operations. Students also have the opportunity to perform minor repair work on hybrid and high voltage vehicles to complete required tasks. This course is designed to be a companion course to AUTO 131, a prerequisite course for AUTO

147 and AUTO 148. Students are encouraged to complete both AUTO 131 and AUTO 132 to obtain a firm foundation on the subject of electronics and electric vehicles.
Hours: 45 Lecture. 27 Lab.

AUTO 135

Level-II Smog Technician Training Course: Smog Check Inspection Procedures

Units: 3

Advisory: AUTO 130

Transfers to: CSU

This course is designed to help students satisfy the Bureau of Automotive Repair (BAR) Smog Check Technician training requirement and successfully complete the Level-II Smog Technician Training Course when applying for the California Smog Check Technician licensing examination. Course content includes customer awareness, program administration, equipment maintenance, inspection and testing procedures, and pass/fail reports. Emphasis is placed on the practical application of the loaded and non-loaded modes of emissions testing. Lab activities focus on vehicle identification, visual and functional inspections and calibration of testing equipment, and performing complete smog check inspections of vehicles. Upon successful completion of this course, students receive a certificate of completion from Rio Hondo College's Automotive Technology Department. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.
Hours: 45 Lecture. 27 Lab.

AUTO 140

Body and Chassis Electrical Systems

Units: 4

Prerequisite: AUTO 106

Advisory: AUTO 157

Transfers to: CSU

This course provides an overview of the 21st century automobile's electrical system as related to the body and chassis of the vehicle. The course covers the theory of operation, operational characteristics, and methods of problem diagnostics and repair of systems including lighting; instruments; windshield wipers; power windows, seats, and mirrors; convertible tops; safety restraints; and audio, anti-theft, and supplemental restraint systems (S.R.S.). This course prepares students for the Automotive Service Excellence (A.S.E.) A-6 exam and is intended for automotive majors. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.
Hours: 54 Lecture. 54 Lab.

AUTO 144

Alternative Fuels Technician

Units: 3

It is advised that students be able to engage in college composition written at a college and read college-level texts.

Transfers to: CSU

This course covers gaseous alternative fuels as they pertain to modern vehicles. Various alternative fuels (e.g., compressed natural gas (CNG), liquefied natural gas (LNG), liquefied petroleum gas (LPG), hydrogen, and biofuels) are examined and compared; and the

operation, system components, and safe handling of these fuels is discussed. Students will develop skills in the areas of vehicle preparation, system component identification, and repair procedures related to alternative fuel vehicles. The course is designed for students and technicians working on stationary power engines, transportation, and clean fuels who seek to improve skills related to the maintenance and repair of gaseous fuels; and will provide students with information related to Automotive Service Excellence (ASE) F1 or H1 test preparation.
Hours: 45 Lecture. 27 Lab.

AUTO 147 (C-ID: ALTF 100X)

Introduction to Hybrid and Electric Vehicle Technology

Units: 3

Prerequisite: AUTO 157

Transfers to: CSU

This course explores the use of hybrid and electric power for vehicle transportation. Topics will include safety when using high voltage, maintenance, drivability, inverter power transfer, battery technologies, hydrogen electric power, and fuel cell technology. The physics of battery storage, hybrid generation systems, and electric vehicle applications and their integrated systems from various manufacturers will be discussed. This course is suitable for students entering into the alternative fuels or power generation and energy technology fields.
Hours: 45 Lecture. 27 Lab.

AUTO 148

Vehicle Safety, Comfort and Convenience Systems

Units: 3

Prerequisite: AUTO 106

Transfers to: CSU

This course introduces students to the fundamentals of automotive safety, comfort, and convenience systems related to the advanced drivers assistance systems (ADAS) in modern automobiles. Students learn how to use specific tools and equipment, and how to perform basic repair and maintenance operations safely. Emphasis is placed on the lane change assist, crash avoidance, adapted cruise control, camera and ultra-sonic sensors, keyless entry, supplemental restraint system (SRS) airbag, anti-lock braking (ABS) and traction control, air-conditioning and heating, lighting, and theft deterrence systems. Service information systems, electrical circuits, symbols and circuit diagrams, and other, related topics are also discussed. This course requires students to have a solid background regarding the technical knowledge of basic automotive electrical and electronic systems.
Hours: 45 Lecture. 27 Lab.

AUTO 150

Engine Electrical Systems

Units: 4

Prerequisite: AUTO 106

Transfers to: CSU

This course provides an overview of the 21st century automobile's electrical system as related to the engine and engine-related systems. The course covers the theory of operation, operational characteristics, methods of problem diagnosis, and repair of systems including electronic ignition,

electronic fuel injection, engine management, emission control, charging, cooling, and starting. This course prepares students for the Automotive Service Excellence (A.S.E.) A8 Engine Performance test, and is intended for automotive majors. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.
Hours: 54 Lecture. 54 Lab.

AUTO 157

Automotive Specialized Electronics Training

Units: 4

Prerequisite: AUTO 106

Transfers to: CSU

This course provides an overview of the principles of automotive electronics. Topics covered include electrical theory, fundamentals of circuit construction, computers, semiconductors, microprocessors, integrated circuits (IC), types of output signals, wire repair techniques, meter usage and strategy based diagnostics. A demonstration General Motors circuit board will be used to illustrate circuit board function. This course is designed for entry level technicians or students who need an understanding of the basics of automotive electronics.
Hours: 72 Lecture.

AUTO 158

Automotive High Voltage Safety

Units: 2

Prerequisite: AUTO 157

Transfers to: CSU

This course continues the study of the use and service of hybrid electronic generation, plug-in battery-electric power, and fuel cell power generation for vehicles. Topics will include OSHA/NEC/NFPA high voltage safety specifically for the service technician. Dynamics of high voltage battery energy, hybrid generation systems, electric vehicle applications and their integrated systems from many manufacturers will be discussed. Battery storage systems for home charging usage as they apply to the home charging of a plug-in vehicle will also be addressed. High-voltage battery management systems including active/passive designs that control charging system safe operation, diagnosing with proper test tools and equipment, will be the primary focus of this course. This course is for students working in the hybrid/electric vehicle energy, fuel cell power engineering and technology fields.
Hours: 27 Lecture. 27 Lab.

AUTO 160

Upper End Engine Rebuilding and Machining

Units: 4

Prerequisite: AUTO 101

Transfers to: CSU

This course provides occupational preparation by teaching the skills required for the adjustment and repair of the 21st century automobile engine's upper end and valve train assembly. Emphasis is placed on problem diagnosis, repair techniques, service procedures, and machining operations. This course prepares students for the Automotive Service Excellence (A.S.E.) A-1 exam and is intended for automotive majors. Students

with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.

Hours: 54 Lecture. 54 Lab.

AUTO 170

Lower End Engine Rebuilding and Machining

Units: 4

Prerequisite: AUTO 101

Advisory: AUTO 160

Transfers to: CSU

This course provides occupational preparation by teaching the skills required for the adjustment and repair of the 21st century automobile's engine lower end assembly. Emphasis is placed on problem diagnosis, repair techniques, service procedures, and machining operations. This course prepares students for the Automotive Service Excellence (A.S.E.) A-1 exam and is intended for automotive majors. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.

Hours: 54 Lecture. 54 Lab.

AUTO 190

Engine Blueprinting and Machining

Units: 3

Advisory: AUTO 160 or AUTO 170

Transfers to: CSU

This advanced course is intended for students interested in engine blueprinting and engine machining practices. Topics include cylinder block machining and preparation, cylinder head machining and repair, crankshaft materials and construction, connecting rod applications and machining, piston design and applications, and camshaft lobe applications and profile analysis. Students must be proficient with basic precision instruments or have prior experience with engine machining or assembly practices to be successful in the course. Emphasis is placed on engine blueprinting methods, machining operations, and component applications.

Hours: 45 Lecture. 27 Lab.

AUTO 200 (C-ID: AUTO 140X)

Suspension, Steering, and Alignment Service

Units: 4

Prerequisite: AUTO 103

Transfers to: CSU

This course covers the principles of suspension, steering, and wheel alignment for 21st century imported and domestic automobiles and light trucks. Emphasis is placed on developing skills required in the diagnosis, and/or repair and adjustment to steering systems and wheel alignment angles. Complete suspension and steering system overhaul is covered in the laboratory, and computerized wheel alignment and computerized wheel balancing equipment are techniques that will be utilized and demonstrated. This course is designed for students who want to work in the automotive sector, or automotive technicians who need to improve their skills and knowledge in suspension, steering, and alignment. Students may re-enroll in the course only one time, and only with permission from the Division of Career and Technical Education (C.T.E.), in

order to meet certification and licensure standards.

Hours: 54 Lecture. 54 Lab.

AUTO 210 (C-ID: AUTO 150X)

Automotive Brake Systems

Units: 4

Prerequisite: AUTO 103

Transfers to: CSU

This course examines the theory of operation, service and repair procedures, related tool and equipment use, and strategy-based problem diagnosis related to modern disc and drum brakes. The procedures for imported and domestic automobiles and light trucks are developed through classroom discussions, demonstrations, and laboratory experiences. The course is designed for students who want to work in the automotive sector or automotive technicians who need to improve their skills and knowledge in brake service. This course prepares the student for the Automotive Service Excellence (ASE) A4 exam and is intended for automotive majors. Students may re-enroll in the course only one time, and only with permission from the Division of Career and Technical Education (C.T.E.), in order to meet certification and licensure standards.

Hours: 54 Lecture. 54 Lab.

AUTO 211

Anti-lock Brakes/Traction Control Systems

Units: 3

Prerequisite: AUTO 103

Advisory: AUTO 210

Transfers to: CSU

This course is designed for students wanting to work in the automotive sector or automotive technicians needing to improve their skills and knowledge in modern Anti-lock and/or Traction Control systems. This course will provide instruction in automotive anti-lock brake systems, traction control systems and vehicle stability assist (VSA), including diagnosis, operation and maintenance of ABS/ TCS/VSA. The course will include the use of scanners, DVOM meters and lab-scopes in diagnosis of various ABS/TCS/VSA systems; both 2 wheel and 4 wheel systems will be covered.

Hours: 54 Lecture.

AUTO 220

Manual Drive Trains and Axles

Units: 4

Prerequisite: AUTO 103

Transfers to: CSU

This course covers the theory of operation, methods of repair, service, equipment operation, and techniques of problem diagnosis related to modern manual transmissions, transaxles, drivelines, differentials, and four-wheel-drive/all-wheel-drive (4WD/AWD) systems. Procedures for imported and domestic vehicles are developed through classroom discussion, demonstrations, and laboratory experiences. This course prepares students for the Automotive Service Excellence (A.S.E.) A-3 Exam and is intended for automotive majors. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.

Hours: 54 Lecture. 54 Lab.

AUTO 230

Automatic Transmission/Transaxle

Units: 4

Prerequisite: AUTO 103

Transfers to: CSU

This course is designed to provide instruction in automatic transmission/transaxle systems. Topics include application of friction materials, planetary gear components, hydraulic components (both hydraulically and electronically controlled), fluid types, and sealing materials. In the course, students learn skills in diagnosing, removing, disassembling, reassembling, and rebuilding transmission units to manufacturer's specifications, as well as part nomenclature and function. This course prepares the student for the Automotive Service Excellence (ASE) A2 exam and is intended for automotive majors. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.

Hours: 54 Lecture. 54 Lab.

AUTO 240 (C-ID: AUTO 170X)

Heating and Air Conditioning

Units: 4

Prerequisite: AUTO 103

Transfers to: CSU

This course covers the operating principles of common automotive heating and air conditioning systems. Topics include new service equipment, contamination issues, servicing and diagnosing manual and automatic systems, retrofitting R-12 refrigeration systems to R-134a, and Air Quality Management District (A.Q.M.D.) and Environmental Protection Agency (E.P.A.) rules. Students who take the course also have the opportunity to earn their certification license (E.P.A. Rule 1411). Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.

Hours: 54 Lecture. 54 Lab.

AUTO 260

Advanced Hybrid/Electric Vehicle

Units: 4

Prerequisite: AUTO 147

Advisory: AUTO 157

Transfers to: CSU

This course continues the study of the use and service of hybrid electronic generation and plug-in battery electric power for vehicle transportation. The course is not for beginner technicians. Topics will include Occupational Safety and Health Administration/National Electrical Code/National Fire Protection Association (OSHA/NEC/NFPA) safety when using high voltage; vehicle maintenance; drivability conditions; inverter power transfer; battery storage technologies; regeneration of electrical power from kinetic energy; and Level 1, Level 2, Level 3 battery charging and fuel cell technology. Dynamics of battery storage, hybrid generation systems, electric vehicle applications, and their integrated systems from many manufacturers are discussed. High-voltage battery management systems including active/passive design to charging systems will be the primary focus of the course. This course is for students working in the hybrid and electric vehicle or power engineering and technology fields.

Hours: 54 Lecture. 54 Lab.

AUTO 266**Fuel Cell Technology Fundamentals****Units:** 3**Prerequisite:** AUTO 260**Advisory:** AUTO 147 Students are highly recommended to have completed the AUTO 147 course to understand the basic electronic powertrain theory.**Transfers to:** CSU

This course addresses the fundamentals of the different types of fuel cells and their application for the generation of mobile, vehicular, and stationary power. Topics will include: safety standards (OSHA/NEC/NFPA) when developing, servicing, and working in a high voltage/power inverter transfer; battery storage technologies, and regeneration of electrical power from kinetic energy. A descriptive overview of key fuel cell technologies, including proton exchange membrane (PEM), direct methanol fuel cell, alkaline, and solid oxide fuel cell, will be provided together with potential applications for transportation, stationary, and portable power. Hydrogen production/storage and high voltage safety will also be covered.

Hours: 45 Lecture. 27 Lab.

AUTO 290**Work Experience Education/Internship for Automotive Technology-Related Fields****Units:** 1-4

It is advised that students be able to engage in written composition and read college-level texts

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the automotive/transportation field and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-162 Lab.

AUTO 299**Directed Study in Automotive Technology****Units:** 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a

regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.

Hours: 6-18 Lecture. 48-144 Lab.

AUTO 300**Assessment of the Automotive Industry****Units:** 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: PHY 120, ENGL 201 or ENGL 201H, MATH 130 or MATH 130H**Transfers to:** CSU

This course provides the automotive technology student with a detailed practical study of how to be successful in the automotive service, parts, and sales industry. It provides a practical study of current service, parts, and sales practices performed in dealerships and independent repair shops, while also discussing the review and preparation of the theory and skills necessary to successfully pass the National Institute for Automotive Service Excellence (ASE) exams relevant to industry standards. Topics include becoming efficient in the shop, mastering various pay systems, understanding managers and owners, building customer loyalty, demonstrating workplace and social ethics, and making Customer Satisfaction Index (CSI) values work for all employees. In addition, vehicle engines, transmissions, brakes, suspension, and air-conditioning; and engine performance systems, parts, and components, and new and emerging technologies that support the service and repair of the modern automobile will be discussed. Emphasis will be placed upon the important tasks of proper repair procedures; the safe use of tools, equipment, technical data, and scan tools; and the ins-and-outs of the business of service, parts, and sales. Current automotive industry practices and relevant case studies will be discussed and demonstrated throughout the course. The goal of this course is for the student to apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle after-sales field operations management spectrum.

Hours: 54 Lecture.

AUTO 310**The Global Development and Advancement of the Automobile****Units:** 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: PHY 120, ENGL 201 or ENGL 201H, MATH 130 or MATH 130H**Transfers to:** CSU

This course provides automotive technology students with a detailed, practical study of the development of the automobile from its

beginnings to the present day. The course is a practical study of the invention of the first suitable power source to be adopted to self-propel a road vehicle and how it resulted in a major paradigm shift that revolutionized transportation and mobility. Topics include the development of animal-drawn transportation devices and the quest for a prime mover, the pioneering era of the automobile and how it led to being an industrial product, mass production of the automobile and how it became a consumer product, and new and emerging technologies that support the automobile and motorized traffic and transportation systems. Emphasis is placed upon the global perspective—particularly the developments that occurred in the United States, Europe, and Asia—and the numerous technological and business revolutions of the first and second half of the 20th century. Current automotive industry practices and relevant case studies are discussed and demonstrated throughout the course. The overall goal of this course is to have students apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle after-sales field operations management spectrum.

Hours: 54 Lecture.

AUTO 320**The Progressive Growth of Automotive Technology****Units:** 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: PHY 120, ENGL 201 or ENGL 201H, MATH 130 or MATH 130H**Transfers to:** CSU

This course provides automotive technology students with a detailed, practical study of the development of automotive technology from its beginnings to the present day, focusing on the basics and its long-term development. The course is a practical and contextualized study of the importance of the technological automotive changes that have evolved as a result of engineering improvements and cultural changes. Topics include the development of vehicle layout and design; the needs and behaviors of drivers, producers, non-users, and other stakeholders; and the ever-changing, computerized control of its systems and other emerging technologies. Emphasis will be placed upon the systematic overview of the mechanization and electrification of the automobile, not only as machines, but as a testimony to their important role in the way we live today. Current automotive industry practices and relevant case studies are discussed and demonstrated throughout the course. The overall goal of this course is to have students apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle after-sales field operations management spectrum.

Hours: 54 Lecture.

AUTO 330**Hybrid/Electric Vehicles****Units:** 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, PHY 120

Transfers to: CSU

This course explores the use of hybrid and electric power for vehicle transportation. Hybrid electric vehicles (HEV) are studied and examined, with particular attention paid to power flows, losses, and energy usage as these things relate to isolated powertrain components and HEV configurations. Topics include powertrain architecture, vehicle testing, fuel consumption, aerodynamics and rolling resistance, engines, batteries, electric machines, power electronics, idle reduction, and regenerative braking. Concepts that are explored include power flows, losses, energy usage, and drive quality over drive cycles to determine vehicle performance measures; HEV analysis to examine the operation, integration, and design of powertrain components; vehicle applications and integrated systems from various manufacturers, with emphasis placed on the design of the system parts; and the operation characteristics of components and subsystems. Current, industry-approved diagnostic and troubleshooting techniques and relevant case studies are discussed and demonstrated throughout the course. Hours: 54 Lecture.

AUTO 340**Analyzing Vehicle Electrical/Electronic Systems****Units:** 3**Enrollment requires special approval from the Automotive Technology Department.****Advisory:** PHY 120, ENGL 201 or ENGL 201H, MATH 130 or MATH 130H**Transfers to:** CSU

This course provides automotive technology students with a detailed, practical application of electrical and electronic systems of the modern automobile. The course is a practical study of computerized vehicle controls and diagnostic strategies as they pertain to the function, operation, and vehicle on-board diagnostic and communication systems of the engine, powertrain, brakes, suspension, safety, convenience, and emission control systems. Topics include emerging technologies (such as modern instrumentation, navigation, and telematics) and the use of vehicle network configuration systems used by late-model automotive manufacturers. Emphasis is placed on the design of system parts, components, and subsystems; and their operational characteristics, including programmed microprocessors, microcontrollers, and computer-language protocol. Current industry-approved diagnostic, troubleshooting, and reprogramming techniques and relevant case studies are discussed and demonstrated throughout the course. The overall goal of this course is to have students apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle after-sales field operations management spectrum. Hours: 54 Lecture.

AUTO 350**The Future of Automotive Sales and Service****Units:** 3**Enrollment requires special approval from the Automotive Technology Department.****Advisory:** ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, PHY 120**Transfers to:** CSU

This course provides students with a detailed, practical study of current and future automotive sales and service in a retail setting, and is a practical and contextualized study of the importance of automotive industry business practices that have evolved from dealer salesmen to Internet car sales. Topics include the history of sales and finance, client expectations, and future strategies. Current automotive industry practices and recent case studies are discussed and demonstrated throughout the course. Students apply and demonstrate skills and knowledge in retail sales and service that will enable them to advance their careers in the automotive industry. Hours: 54 Lecture.

AUTO 360**Analyzing Vehicle Fuels, Lubricants, and Combustion****Units:** 3**Enrollment requires special approval from the Automotive Technology Department.****Advisory:** PHY 120, ENGL 201 or ENGL 201H, MATH 130 or MATH 130H**Transfers to:** CSU

This course provides automotive technology students with a detailed, practical application of the fuels, lubricants, and combustion systems of the modern automobile. The course is a realistic study of the physical and chemical properties of fuels, lubricants, and combustion, including diagnostic strategies as they pertain to the function, operation, and everyday use of the systems and subsystems of the automotive internal combustion engine and related powertrain components. Topics include emerging technologies, such as modern fuel and lubricant requirements and how they affect combustion, emissions, and maintenance schedules used by late-model automotive manufacturers. Emphasis is placed on the design of system parts, components, subsystems, and their operational characteristics, including failure analysis. Current industry-approved diagnostic and troubleshooting techniques and relevant case studies are discussed and demonstrated throughout the course. The overall goal of this course is to have students apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle after-sales field operations management spectrum. Hours: 54 Lecture.

AUTO 370**Standard Accounting Systems of the Automotive Industry****Units:** 3**Enrollment requires special approval from the Automotive Technology Department.****Advisory:** ACCT 101 or ACCT 101H, ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, PHY 120**Transfers to:** CSU

This course provides automotive technology students with a detailed, practical application of accounting fundamentals and business management principles, and the adaptation of these things to factory-to-store and day-to-day operations. The course is a practical study of the theory, principles, and practice of

preparing and interpreting accounting statements and business management reports. Topics include an overview of computerized accounting information systems and practices in business management techniques, such as the importance of strong financial and management control, financial statements and statement analysis. Emphasis is placed upon the concepts of using accounting fundamental principles, cash and contracts, short-term and long-term liabilities and assets, and stockholders' equity of reporting documents, which are essential to a successful automotive business operation. Current automotive industry practices and relevant case studies are discussed and demonstrated throughout the course. The overall goal of this course is to have students apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle sales and service fixed operations management spectrum. Hours: 54 Lecture.

AUTO 375**The Future of Mobility****Units:** 3**Enrollment requires special approval from the Automotive Technology Department.****Advisory:** ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, PHY 120**Transfers to:** CSU

This course provides students with a detailed, practical study of current and future means of mobility, and is a practical and contextualized study of the importance of automotive industry business practices that have evolved from ownership to vehicle membership services. Topics include consumer perception, lifestyles, types of ownership, alternatives to ownership, future ownership experiences, and ownership expectations and future strategies. Current automotive industry practices and recent case studies are discussed and demonstrated throughout the course. Students apply and demonstrate skills and knowledge in current vehicle ownership and future trends that will enable them to advance their careers in the automotive industry. Hours: 54 Lecture.

AUTO 390**Work Experience Education/Internship for Automotive Technology Bachelor of Science Degree****Units:** 1-3**Enrollment requires special approval from the Automotive Technology Department.****Prerequisite:** ENGL 201 or ENGL 201H**Advisory:** ENGL 325**Transfers to:** CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of an Automotive Technology Bachelor of Science Degree college instructor. Training is informed by learning objectives. The student will be working in a skilled or professional level assignment in their area of vocational interest as it relates to the Automotive Technology Bachelor's Degree. Emphasis will be placed on the student's ability to meet performance objectives related to instruction that are equal to or greater than their current job duties and conditions of regular

employment. This course is intended for students who are currently enrolled in the BS Degree Program, and whose job is related to the automotive/transportation field.
Hours: 3 Lecture. 54-162 Lab.

AUTO 400

Analyzing Vehicle Stability, Dynamics, and NVH

Units: 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, PHY 120

Transfers to: CSU

This course provides automotive technology students with a detailed, practical application of stability, dynamics, and noise-vibration-harshness (NVH) of the modern automobile. The course is a practical study of the systems that provide vehicle operation safety, including diagnostic strategies as they pertain to the function, operation, and everyday use of automotive tires, brakes, steering, and suspension systems. Topics include emerging technologies such as modern antilock brakes, traction control, electronic stability assist, electronic power steering, active suspension, and tire construction and pressure monitoring systems used by late-model automotive manufacturers. Emphasis is placed on the design of system parts, components, subsystems, and their operational characteristics, including techniques in reducing NVH. Current industry-approved diagnostic and troubleshooting techniques and relevant case studies are discussed and demonstrated throughout the course. The overall goal of this course is to have students apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle after-sales field operations management spectrum.
Hours: 54 Lecture.

AUTO 410

Digital Marketing for the Automotive Industry

Units: 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, MRKT 170, PHY 120

Transfers to: CSU

This course provides automotive technology students with a detailed, practical application of various internet and social media marketing strategies, including category-based guidelines impacting the operations of the automotive wholesale and retail business. The course is a practical study of the policies and practices of digital marketing, and the necessary tools, templates, and checklists needed to develop a strategic and successful marketing campaign. Topics include in-sourcing and out-sourcing, responsive and adaptive website technologies, developing content, and policies and processes. Emphasis is placed on the use of online and traditional media to increase customer satisfaction, including the preparation of business management and marketing reports. Current automotive industry practices and relevant case studies are discussed and demonstrated throughout the course. The overall goal of this course is to have students apply and demonstrate knowledge and skills that will

enable them to advance their employment in the vehicle sales and service fixed operations management spectrum.
Hours: 54 Lecture.

AUTO 420

Analyzing Dynamic Functions of Vehicle Drivetrain Systems

Units: 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, PHY 120

Transfers to: CSU

This course provides automotive technology students with a detailed, practical application of electromechanical and hydraulic functions of transmission and drivetrain systems of the modern automobile. The course is a practical study of the systems that provide vehicle mobility, including diagnostic strategies as they pertain to the function, operation, and everyday use of automotive transmission, differential, and drive axle systems. Topics include emerging technologies such as modern dual-clutch transmissions, continuously-variable transmissions, real-time gear shifting mechanisms and controls, torque convertor and convertor clutch designs, torque-management strategies, and innovative designs of gears, bearings, seals, and friction materials used by late-model automotive manufacturers. Emphasis is placed on the design of system parts, components, and subsystems, and their operational characteristics, including techniques in reducing noise-vibration-harshness (NVH). Current industry-approved diagnostic and troubleshooting techniques and relevant case studies are discussed and demonstrated throughout the course. The overall goal of this course is to have students apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle after-sales field operations management spectrum.
Hours: 54 Lecture.

AUTO 430

Finance and Insurance Regulations for the Automotive Industry

Units: 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: PHY 120, ENGL 201 or ENGL 201H, MATH 130 or MATH 130H

Transfers to: CSU

This course provides automotive technology students with a detailed, practical application of the numerous federal, state, and local agencies and their laws and regulations pertaining to the operation of an automotive wholesale and retail business. This course is a practical study of a broad scope of regulatory agencies and regulations such as the Department of Motor Vehicles (DMV), Internal Revenue Service (IRS), Franchise Tax Board (FTB), Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA), air quality managements districts (AQMDs), National Highway Transportation Safety Administration (NHTSA), Federal Trade Commission (FTC), fair labor standards, truth in advertising, truth in lending, the Consumer Leasing Act, Equal Credit Opportunity Act, Fair Credit Reporting Act, and other related agencies and

regulations. Topics include an in-depth study of automotive business finance, insurance, and new and certified used vehicle departments within an organization. Emphasis is placed on the services offered in these departments and their potential for generating profits and improving customer satisfaction. Current automotive industry practices and relevant case studies are discussed and demonstrated throughout the course. The overall goal of this course is to have students apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle sales and service fixed operations management spectrum.
Hours: 54 Lecture.

AUTO 435

Automotive Manufacturers

Units: 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, PHY 120

Transfers to: CSU

This course provides students with a detailed, practical study of numerous federal, state, and local agency laws and regulations that pertain to the operation of an automotive wholesale and retail business, including the function of an original equipment manufacturer (OEM). Topics include automotive products, franchise agreements, partnerships, and sustainability. Current automotive industry practices and relevant case studies are discussed and demonstrated throughout the course. Students apply and demonstrate knowledge and skills that will enable them to advance their employment in the automotive manufacturing landscape.
Hours: 54 Lecture.

AUTO 440

Analyzing Vehicle Safety, Comfort, and Security Systems

Units: 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, PHY 120

Transfers to: CSU

This course provides automotive technology students with a detailed, practical application of vehicle occupant protection, comfort, and security systems of the modern automobile. The course is a practical study of the systems that provide integrated vehicle and driving protection against hazardous and inadvertent situations, as well as occupant amenities, including diagnostic strategies as they pertain to the function, operation, and everyday use of active/passive safety, comfort, and convenience systems. Topics include emerging technologies such as modern airbag systems, accident avoidance and pre-crash/post-crash mitigation of injuries, vehicle-to-vehicle (V2V) infrastructure technology, and innovative driver assistance, infotainment, and occupant contentment and security systems used by late-model automotive manufacturers. Emphasis is placed on the design of system parts, components, and subsystems, and their operational characteristics, including techniques in reducing vehicle crashes and improving occupant/pedestrian protection.

Current industry-approved diagnostic and troubleshooting techniques and relevant case studies are discussed and demonstrated throughout the course. The overall goal of this course is to have students apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle after-sales field operations management spectrum.
Hours: 54 Lecture.

AUTO 450

Variable and Fixed Operations of the Automotive Industry

Units: 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, PHY 120

Transfers to: CSU

This course provides students with a detailed, practical study of variable and fixed operations of new and used vehicle sales, as well as the operations of service and parts, at successful automotive retail centers. Topics include new and used vehicle sales operations, finance, service, parts, and financial return. Emphasis is placed on maximizing and balancing inventory turnaround, wholesale practices, trade-in appraising, vehicle reconditioning, the role that auctions play, the important relationship between the parts and service departments, technician productivity and efficiency, wholesale and retail parts sales, stock and non-stock parts inventory and ordering practices, and part phase-in/phase-out criteria. Current automotive industry practices and relevant case studies are discussed and demonstrated throughout the course. Students apply and demonstrate knowledge and skills that will enable them to advance their employment in the vehicle sales and service fixed operations management spectrum.
Hours: 54 Lecture.

AUTO 480

Special Topics in Transportation

Units: 3

Enrollment requires special approval from the Automotive Technology Department.

Advisory: ENGL 201 or ENGL 201H, MATH 130 or MATH 130H, PHY 120

Transfers to: CSU

This course provides an opportunity for students to keep well informed about the ever-changing trends, technology, and business management practices related to the transportation industry. Students may be expected to attend presentations by industry representatives and/or to conduct research about new trends, technology, and/or business management practices, and then present their findings in class. The course may be repeated for a maximum of 6 units since the subject matter changes each offering.
Hours: 54 Lecture.

AUTO 499

Directed Study in Automotive Technology

Units: 1-4

Enrollment requires special approval from the Automotive Technology Department.

Advisory: ENGL 325

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take upper division directed study courses for a maximum of 4 units within a discipline.
Hours: 54-216 Lab.

BIOLOGY

Division of Mathematics, Sciences, and Engineering

BIOL 101

General Biology

Units: 4

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have a knowledge of elementary algebra concepts.

Transfers to: UC/CSU - UC credit limitation. No credit will be given for BIOL 101 if taken after BIOL 200.

This course is a General Education course open to all students, and is designed to provide an introduction to concepts and principles of modern biology. Topics covered include cell structure and function, energy relationships, genetic control mechanisms, concepts of evolution, biological diversity, and ecosystem function. The laboratory component of the course emphasizes the application of the scientific method as a tool to understanding living systems.
Hours: 54 Lecture. 54 Lab.

BIOL 105

Human Biology

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This lecture-only course is an introduction to the basic principles, structures, functions, and biological processes of the human body. The course emphasizes a scientific view of the workings of the human body and its interactions with the environment as well as the necessary practices needed to promote a healthy body. The course is intended for non-

biology majors who are interested in furthering their own knowledge of human biology.
Hours: 54 Lecture.

BIOL 105L

Human Biology Laboratory

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Prerequisite/Corequisite: BIOL 105

Transfers to: UC/CSU

This laboratory course pairs with the BIOL 105 lecture course, and is intended for non-biology majors. The course provides students with hands-on laboratory experiences to demonstrate and enhance concepts and principles essential to an understanding of the functions of the human body.
Hours: 54 Lab.

BIOL 111

Marine Biology

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have a knowledge of elementary algebra concepts.

Transfers to: UC/CSU

This course is designed to give students a better understanding of the basic principles of marine biology. Emphasis is placed on how the scientific method is used to investigate the chemical, physical, and geological properties of the marine environment. Students learn to distinguish among the diverse organisms and habitats that compose the ocean's ecosystems. An introduction to the structure and function of marine ecosystems is provided, and the impact of human activity on those systems addressed. This course fulfills the General Education requirement for the Life Sciences.
Hours: 54 Lecture.

BIOL 111L

Marine Biology Laboratory

Units: 1

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have a knowledge of elementary algebra concepts.

Prerequisite/Corequisite: BIOL 111

Transfers to: UC/CSU

This laboratory course complements the Marine Biology lecture course and is designed for students interested in furthering their understanding of the marine environment and its organisms, with emphasis placed on marine life of the local coasts. The scientific method is employed to investigate the chemical and physical properties of seawater, the role of pigments in marine algae, the behavior of marine organisms, the basic classification and morphology of marine producers, invertebrates and vertebrates, and adaptations of organisms to specific habitats. Students use basic laboratory equipment and techniques in both classroom and field-based investigations. Field trips to coastal marine habitats and public aquariums are conducted.
Hours: 54 Lab.

BIOL 112

Outdoor Biology

Units: 4

It is advised that students be able to write short essays, comprehend textbook reading at the precollegiate level, and have knowledge of elementary algebra concepts.

Transfers to: UC/CSU

This course is intended for students who have an interest in the natural world and the ecological relationships of the organisms found within it. The course emphasizes the natural habitats of Southern California and the plants and animals associated with them. Human impact upon these natural habitats is also discussed. Fieldwork utilizes the Rio Hondo College Wildlife Sanctuary, which allows students to gather original data through firsthand observation and experience. Several additional, more distant trips require driving to explore some of the various natural habitats in Southern California. Hours: 54 Lecture. 54 Lab.

BIOL 120 (C-ID: ENVS 100)

Environmental Biology

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have a knowledge of elementary algebra concepts.

Transfers to: UC/CSU

In this course, students utilize basic biological concepts and an interdisciplinary approach to determine how to address environmental challenges. Topics may include ecosystem characteristics and functions, population dynamics, energy and material resource use, pollution, and alternative energy sources. Because the course takes up the social, political, and economic implications of environmental decisions, it is intended for students from many disciplines, including non-STEM disciplines. This course fulfills the general education requirement for life sciences majors. Hours: 54 Lecture.

BIOL 120L

Environmental Biology Laboratory

Units: 1

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have a knowledge of elementary algebra concepts.

Prerequisite/Corequisite: BIOL 120

Transfers to: UC/CSU

This laboratory course complements the Environmental Biology lecture course and is designed for students interested in furthering their understanding of the environmental sciences. The scientific method is employed to investigate ecosystems and their functions, natural selection, population interactions, environmental toxicology, radiation exposure effects, soil and groundwater systems, water pollution, alternative energy systems, and environmental resistance. This is a required course for Environmental Science majors. Hours: 54 Lab.

BIOL 125 (C-ID: BIOL110B)

Human Anatomy

Units: 4

Advisory: BIOL 101 or BIOL 105

Transfers to: UC/CSU

This course is primarily a systems approach to mastering the anatomical structures of the human body. The study of each body system includes structural specializations and functions at a microscopic and macroscopic level, emphasizing the interdependence of form and function. Additional topics include methods of anatomical study, human genetics, and embryonic development. This course is intended for pre-health students specifically preparing to enter careers in the health sciences.

Hours: 54 Lecture. 54 Lab.

BIOL 200 (C-ID: BIOL 135S, BIOL 190)

Principles of Biology 1 (Molecular and Cellular Biology)

Units: 5

Prerequisite: CHEM 120

Transfers to: UC/CSU

This course is first in a sequence of courses for undergraduate preparation for biology majors. The course covers principles and applications of prokaryotic and eukaryotic cell structure and function, biological molecules, homeostasis, cell reproduction and its controls, molecular genetics, classical/Mendelian genetics, cell metabolism including photosynthesis and respiration, and cellular communication. Additional areas of focus include evolution and ecology. The laboratory portion of the course applies the processes of scientific inquiry and experimental design to the study of biological concepts focusing on observations, experimentation, record keeping, data collection and analysis, and presentation of outcomes. The course sequence also provides excellent preparation for students who intend to pursue post-graduate studies in the medical sciences.

Hours: 54 Lecture. 108 Lab.

BIOL 201 (C-ID: BIOL 135S)

Principles of Biology 2 (Diversity and Ecology)

Units: 5

Prerequisite: BIOL 200

Transfers to: UC/CSU

This course continues the sequence of undergraduate preparation for biology majors. The course is a survey of the diversity of unicellular and multicellular life on earth, focusing on the relationships between structure and function, as well as evolutionary adaptations to their environments. Topics deal with classification, development, evolutionary relationships, and ecological functions of living organisms, inclusive of prokaryotes, fungi, protists, plants, and animals. Laboratories emphasize life forms, experimentation, and dissections. Field trips are used to examine organisms in their natural settings.

Hours: 54 Lecture. 108 Lab.

BIOL 205

Molecular Biology and Biotechnology

Units: 4

Prerequisite: BIOL 200, CHEM 130

Transfers to: UC/CSU

This course is designed for Life Science majors and introduces them to the basic concepts of biochemistry, molecular biology and molecular genetics; including protein structure and function, DNA structure and replication, transcription, RNA processing,

translation, and recombinant DNA technology. Students will also be introduced to the science of biotechnology by providing both the theory and hands-on experience with laboratory protocols that include the isolation, purification, and cloning of a gene; including the use of restriction enzymes, electrophoresis, library construction, blotting and hybridization and sequencing. Polymerase chain reaction (PCR) will be explained in detail, particularly how it has revolutionized research in molecular biology, medicine, forensics, systematics and evolutionary biology.

Hours: 54 Lecture. 54 Lab.

BIOL 206

Principles of Genetics

Units: 3

Prerequisite: BIOL 200

Transfers to: UC/CSU

This course is designed for life sciences majors as a continuation of their general biology studies. The course covers a variety of topics relevant to the study of genetics, ranging from classical to nontraditional Mendelian genetics, and from bacterial and viral genetics to human genetics, and includes studies on molecular techniques and their applications. Other topics will include chromosome analysis, and population genetics and genomics.

Hours: 54 Lecture.

BIOL 222

Microbiology

Units: 5

Prerequisite: CHEM 110

Advisory: BIOL 101

Transfers to: UC/CSU

This course encompasses the biology of microorganisms with an emphasis on the role of bacteria and viruses on human health and disease. Other topics include resistance and immunity to disease, basic biological principles, microbial genetics and physiology, the harmful and useful aspects of microorganisms in nature, medicine, and industry. Laboratory exercises emphasize sterile culture techniques and the detection, isolation, and identification of microorganisms. This course is intended for students preparing to enter careers in the health sciences.

Hours: 54 Lecture. 108 Lab.

BIOL 226 (C-ID: BIOL 120B)

Human Physiology

Units: 4

Prerequisite: BIOL 125 and CHEM 110

Advisory: BIOL 101, BIOL 105

Transfers to: UC/CSU

This course is a general introduction to the function and regulation of human body systems. Physiological integration of the systems to maintain homeostasis and the significance of biochemistry is emphasized throughout the course. Course content includes neural and hormonal homeostatic control mechanisms, as well as the musculoskeletal, circulatory, respiratory, digestive, urinary, immune, and endocrine systems. Laboratory exercises allow students to gather physiological data and draw conclusions about how physiological mechanisms are regulated. This course is

intended for students preparing to enter careers in the health sciences.
Hours: 54 Lecture. 54 Lab.

BIOL 299A

Directed Study in General Biology

Units: 1-3

Prerequisite: BIOL 200

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.
Hours: 54-162 Lab.

BIOL 299B

Directed Study in Health Science Biology

Units: 1-3

Prerequisite: BIOL 222 or BIOL 226

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not

accumulate more than a total of 9 units college wide.
Hours: 54-162 Lab.

BIOL 299C

Directed Study in Health Environmental Technology

Units: 1-3

Prerequisite: BIOL 120

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.
Hours: 54-162 Lab.

BIOTECHNOLOGY

Division of Mathematics, Sciences, and Engineering

BIOT 100

Introduction to Biotechnology

Units: 4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

The course will introduce students to the study of the biological sciences with an emphasis on the role that biotechnology plays in basic research and product development. The laboratory component will provide the students with hands-on introductory experiences in biotechnology techniques.
Hours: 54 Lecture. 54 Lab.

BIOT 110

Introduction to Biotechnology Techniques and Applications

Units: 4

Prerequisite: BIOT 100

Transfers to: CSU

The course will introduce students to the biotechnological techniques and their applications. The significant laboratory component will enable students to become

familiar with the techniques and concerns of the biotechnology laboratory and its business applications. Techniques studied will include macromolecule isolation, purification and identification, solution preparation and monitoring, as well as best practices for laboratory operation and documentation.
Hours: 36 Lecture. 108 Lab.

BIOT 120

Quality and Regulatory Practices in Biotechnology

Units: 3

Transfers to: CSU

This course serves as an introduction to basic quality principles and tools, with an emphasis on their application in fermentation practices. Students explore concepts related to quality control, quality assurance, validation, documentation, and regulatory compliance within this industry. The course prepares students for examination through the American Society for Quality (ASQ) to become a Certified Quality Improvement Associate (CQIA).
Hours: 54 Lecture.

BIOT 130

Fermentation Technology 1

Units: 5

Advisory: BIOT 110, BIOL 101, CHEM 110

Transfers to: CSU

This introductory-level course takes up fermentation technologies, and emphasizes especially batch yeast fermentations associated with the brewing of beer. The course covers the history, development, and current status of beer brewing; the biology and genetics of yeast; and the influence of raw materials on the final outcome of the brewing process. Emphasis is placed on current technologies involved in modern, small-scale brewing. In addition, the use of yeast as a general agent of biological change is discussed. The laboratory part of the course emphasizes the design, formulation, and execution of a specific product in a hands-on environment in order to simulate current industry standards and practices. Field trips of industrial fermentation sites are included.
Hours: 54 Lecture. 108 Lab.

BIOT 230

Fermentation Technology 2

Units: 5

Prerequisite: BIOT 110, BIOT 130, CHEM 110 or CHEM 120

Transfers to: CSU

This course is a continuation of Fermentation Technology 1 and focuses on bacterial fermentation in a laboratory setting. The course emphasizes the biological and genetic aspects of bacteria and the role of bacteria in the production of modern biotechnologies. Technologies particular to both batch and continuous fermentation processes and product identification and recovery are explored. Students are placed in a production-styled laboratory setting to produce and purify a particular bacterial product following current industry standards and protocols. Field trips to local industrial installations will be used to highlight and clarify real-world applications.
Hours: 54 Lecture. 108 Lab.

BIOT 240

Instrumental and Sensory Analysis in Biotechnology

Units: 4

Prerequisite: BIOT 130

Transfers to: CSU

This advanced course takes up the laboratory analyses associated with industrial fermentations, with an emphasis on those analyses used in brewing. In addition, the course explores the techniques used in sensory analysis of foods—especially brewed beverages.

Hours: 54 Lecture. 54 Lab.

BUSINESS LAW

Division of Arts, Business, & Cultural Programs

BUSL 110 (C-ID: BUS 120)

Legal Environment of Business

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course examines the legal, regulatory, and international environment of business. Included are the topics of alternative dispute resolution, the forms of business organization, regulations affecting employment, and current environmental statutes. Case studies are used to discuss torts, crimes, contracts and sales, warranty and product liability, labor law, employment discrimination, and environmental law.

Hours: 54 Lecture.

CARPENTRY

Division of Career and Workforce Education

CARP 020H

Welding

Units: 1

Indentured Apprentice with the State of California It is advised that students be able to engage in written composition at a college level

This course is designed to meet the needs of Indentured Apprentices with the State of California who are interested in the carpentry industry. Modules cover the following topics: history of the carpentry profession along with state and federal labor law, job layout, safe working conditions, health and safety certifications, basic blueprint reading, advanced blueprint reading, use and application of levels and transits, foundations, flatwork, wall structures, stairs and ramps, welding materials and welding applications.

Hours: 20 Lecture. 20 Lab.

CARP 020I

Advanced Welding

Units: 1

This course is designed to meet the needs of Indentured Apprentices with the State of California who are interested in the carpentry industry. Modules cover the following topics: history of the carpentry profession along with state and federal labor law, job layout, safe

working conditions, health and safety certifications, basic blueprint reading, advanced blueprint reading, use and application of levels and transits, foundations, flatwork, wall structures, stairs and ramps, welding materials and welding applications.

Hours: 20 Lecture. 20 Lab.

CARP 040A

Orientation

Units: 2

Enrollment restricted to State Indentured Carpenter Union Apprentices It is advised that students have a knowledge of intermediate algebra concepts and read college-level texts.

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers fundamental trade skills, employee/employer roles and responsibilities, and safe work practices needed for entry-level positions in the construction industry. While emphasis is placed on attaining industry-standard safety credentials, the course is designed to provide students with practical experience using construction terminology, math operations, basic measuring techniques, and tool identification and proper usage. Safety topics will cover Occupational Safety and Health Administration (OSHA) training for jobsite hazard recognition, accident prevention, and safe tool and equipment operation. Upon successful completion, students receive an OSHA 10-Hour Certification Card.

Hours: 30 Lecture. 10 Lab.

CARP 040B

Safety & Health Certifications

Units: 2

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the safe and appropriate use of hazardous communication systems, fall protection, fork lifts, and emergency response procedures. Students learn how to assess danger, employ prevention measures, and take appropriate action in emergencies. This training exposes students to various health emergency scenarios, and provides students with ample opportunities to practice cardiopulmonary resuscitation (CPR) and first aid. Upon successful completion, students are issued an American Red Cross First Aid/CPR Certification Card, and United Brotherhood of Carpenters (UBC) Fall Protection, Hazard Communication and Chemical Safety, and Forklift Qualification Cards.

Hours: 30 Lecture. 10 Lab.

CARP 040C

Print Reading

Units: 2

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the basic skills needed for reading and interpreting

construction prints. Material focuses on developing students' ability to interpret two-dimensional views to convey the shape and characteristics of construction elements and to provide an overview of the scope of the project. Students learn how to recognize standard drawing methods and pictorial views, and how to read visual and verbal communication cues.

Hours: 30 Lecture. 10 Lab.

CARP 040D

Transit Level/Laser

Units: 2

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the terminology, optical principles and operating procedures for transit laser levels. The conventional methods for measuring angles and using degrees, minutes, and seconds on veneer scales are included in the transit portion of the course. Students set up levels, determine benchmarks, and take and record elevation readings.

Hours: 30 Lecture. 10 Lab.

CARP 040E

Foundations and Flatwork

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers required and supplemental instruction for the design and function of several types of foundations and concrete flatwork; as well as the methods, techniques and procedures for formwork layout, elevation, and construction. Topics like jobsite safety, print interpretation, material identification, and basic use of the builders' level are included in the training.

Hours: 20 Lecture. 20 Lab.

CARP 040F

Wall Forming

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers skills and procedures required to form reinforced concrete walls using single and double waler systems. Identification of the characteristics and applications of built-in-place, prefabricated, and specialty forms are covered. Practical exercises prepare students for locating wall forming information on project plans, calculating layout dimensions, and estimating material requirements. Topics like basic wall panel forming and reinforcement methods, material preparation, and hardware installation are included in this course.

Hours: 20 Lecture. 20 Lab.

CARP 040G

Stair and Ramp Forming**Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers methods, procedures, and practices used to form stair and ramp structures. Students review project plans to determine stair and ramp configuration and overall dimensions. Stinger riser and stair thread calculations are explained and practiced; and state and federal building codes pertaining to stairs, ramps, and handrail requirements covered.

Hours: 20 Lecture. 20 Lab.**CARP 040H****Commercial Floor Framing****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers procedures for floor joist construction and the various installation techniques used in the commercial industry. Students interpret floor plans for job planning, identify floor joist systems, and calculate material take offs. Topics like integration of wall plating, joist layout, and floor sheathing methods are included. Students learn measuring skills, the use of math operations, specialty hardware applications, and how to identify appropriate building codes.

Hours: 20 Lecture. 20 Lab.**CARP 040I****Basic Roof Framing****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course is an introduction to basic gable roof framing, including terminology, characteristics, and construction methods. Students interpret print views and drawing elevations for job planning, and also to determine rafter systems and layout details. Basic rise, run, rafter angles, and length calculations are practiced. Framed wall construction is undertaken to facilitate the gable roof assembly techniques and installation procedures that are the focus of the course.

Hours: 20 Lecture. 20 Lab.**CARP 040J****Advanced Print Reading****Units:** 2**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers required and supplemental instruction in advanced print reading. In this course, students analyze

multi-view drawings to determine construction type, locate benchmark and building elements, review codes and references, and perform calculations for construction planning. A closer look at specifications with the instructors helps students understand how they are formatted and used to clarify specific project design outcomes. Additionally, tips for troubleshooting installation, complying with codes, and managing project scope and quality of construction prepare students for jobsite leadership.

Hours: 30 Lecture. 10 Lab.**CARP 040K****Rigging****Units:** 2**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers procedures for proper lifting and rigging methods as well as information about and the history behind industry-recognized standards, applicable regulations, specific hazards, and general safety concerns associated with construction rigging. Detailed descriptions of hoisting and rigging configurations, lifting hardware, crane types, and operating issues are presented. In-class training takes up identifying standard signaling and communication methods, and stresses the importance of load calculations, manufacturer load limits, inspection criteria, and safe operator/operating parameters applicable to the carpenter trade. Upon successful completion, students will receive a United Brotherhood of Carpenters (UBC) Rigging Qualification Card.

Hours: 30 Lecture. 10 Lab.**CARP 040L****Solar Installer Level I****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course provides students with an industry overview and outlook for photovoltaic (i.e., renewable) energy production. Key terms and concepts of photovoltaic system operations include solar cell technology, photovoltaic array configuration, series and parallel circuits, testing equipment, inspection, balance of system components, mounting methods, and applicable codes. Practical training covers site analysis, system orientation based on site location, safety concerns, utilization of construction tools, and skills for rooftop and ground mount system installations. Upon successful completion students receive a United Brotherhood of Carpentry (UBC) Solar Installer Level 1 Qualification Card.

Hours: 20 Lecture. 20 Lab.**CARP 040M****Water Treatment Facilities****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of Indentured Apprentices with the State of California who are interested in the carpentry industry. The course provides instruction in the detailing, layout and construction of concrete formwork and waterstop used in water treatment facilities. The terms, components, materials, building techniques and procedures will be presented. The class project includes keyway, panel, waterstop, head wall and wing wall construction.

Hours: 20 Lecture. 20 Lab.**CARP 040N****Green Building & Weatherization****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course begins with a detailed explanation of sustainable building science, materials recycling, and whole house audits, as well as a discussion of construction components and systems that contribute to energy efficiency. The differences in structural design such as joints, framing, windows and door openings, floors, and attics are evaluated for issues related to air flow and stack effect in conditioned spaces. Instruction includes thermal principles, air exchange rates, controlling air leakage, and ratings for insulation and fenestration, as well as air sealing methods. Best practices for renovation construction are demonstrated during practical exercises focused on implementing energy audit recommendations for insulation, air leak/duct sealing, window replacement, water conservation, hazard and moisture remediation and appliance upgrades, and combustion appliance zones (CAZ). Techniques and devices used to maintain healthy air quality during construction are employed for applicable activities.

Hours: 20 Lecture. 20 Lab.**CARP 040P****Basic Wall Framing****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course presents the theory, methods, and procedures required to frame basic walls. Hands-on practice using proper tool techniques and appropriate materials enhance fundamental skills development. Beginning with an introduction to print reading, students perform basic wall layout, plating procedures, and framing assembly and bracing before aligning and completing selected wall construction projects according to industry standards.

Hours: 20 Lecture. 20 Lab.**CARP 040R****Tool/Equipment Applications****Units:** 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices**Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers hand/power tool and equipment skill development for various construction applications. Students identify correct practices for handling and preparing materials. Training includes how to select, use, and operate tools and aerial lifts correctly to prevent accidents and injuries. Scaffold safety and the proper procedures to erect and dismantle welded frame scaffold also are covered. Upon successful completion, students are issued a United Brotherhood of Carpenters (UBC) Aerial Lift and Scaffold Erector-Welded Frame Qualification Card. Hours: 20 Lecture. 20 Lab.

CARP 040S**Moldings and Trims****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers how moldings and trims are utilized to finish exterior and interior construction design features. Product styles, characteristics, applications, and installation methods are covered. Students learn about and practice with tools in order to learn cutting techniques, coping, and the installation of various molding and trim types. Hours: 20 Lecture. 20 Lab.

CARP 040T**Storefront Installations****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers all aspects of the installation process, from constructing storefront openings through placing glass components into the commercial storefront metal framing. Emphasis is placed on print interpretation, window and door schedules, and symbols and material recognition. Key discussions draw attention to typical problems, causes, and solutions encountered during the glazing assembly and installation processes. In-class training takes up glazing tools and techniques, applicable building/fire codes, layout accuracy, and proper fit and alignment. Hours: 20 Lecture. 20 Lab.

CARP 040V**Basic Metal Framing****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course provides an overview of residential metal framing theory and construction techniques. Students interpret

prints for job planning and estimating materials, and learn about layout and detail wall plates for locating all wall and truss components and openings. Instruction includes measuring techniques, mathematical principles, wall and roof assembly, and installation techniques.

Hours: 20 Lecture. 20 Lab.

CARP 050A**Basic Commercial Framing****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course introduces students to the basic rake wall framing theory and commercial construction techniques and materials. Students use floor plan interpretation for job planning, design recognition, and determining materials. Students lay out and detail wall plates for locating basic rake wall components and door openings typically found in commercial construction applications. Instruction includes measuring skills, mathematical principles, wall assembly and installation procedures, and details about how structural connections are made.

Hours: 20 Lecture. 20 Lab.

CARP 050B**Cabinet Installation****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course provides procedures for design layout, cabinet installation, and attaching countertops, with emphasis placed on print interpretation, job planning, scribing techniques, and proper installation sequence. Students use methods and specific procedures to install typical upper and lower cabinetry units and countertops.

Hours: 20 Lecture. 20 Lab.

CARP 050C**Doors and Door Hardware****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the installation processes for several types of security and exit door hardware. Topics include electrical and card reader systems, and emphasis is placed on print interpretation, codes, door schedules, symbols, and hardware recognition. Students use the methods and procedures they learn to install selected door and hardware systems.

Hours: 20 Lecture. 20 Lab.

CARP 050D**Basic Stairs****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course introduces students to stair framing theory, terminology, and construction techniques. Students interpret floor plans and drawing elevations for job planning and to layout and detail stair stringers. Methods for calculating the number of stairs, landing height, stair threads, and riser dimensions are presented and practiced. Instruction includes measuring skills, mathematical principles, stair and handrail fabrication, assembly, and installation.

Hours: 20 Lecture. 20 Lab.

CARP 050E**Bridge Construction****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers bridge design and construction methods and procedures, and takes up exterior and interior girders, edge forms, bulkheads, and hinge forms. Discussion topics include job-built and precast formwork methods. Students construct bridge and deck formwork using job-built forming methods, with a formwork project that includes panel construction, assembly, and hardware installation tasks. Related subjects including safety, math, and print reading are also covered in the training.

Hours: 20 Lecture. 20 Lab.

CARP 050F**Tilt Up Construction****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers layout techniques and building procedures for commercial structures using the tilt-up panel construction method, with discussion topics including various wall types, position, and sequences for raising panels. Emphasis is placed on identifying specific types of openings, as well as the location of finish floor and roof lines on prints. By the end of the course, students are able to explain the importance of layout methods in squaring panel formwork.

Hours: 20 Lecture. 20 Lab.

CARP 050G**Beam and Deck Forming****Units:** 1.5**Enrollment restricted to State Indentured Carpenter Union Apprentices****Prerequisite:** CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course is an introduction to the use of various woods and patented forming systems for construction of concrete beams and decks. Students identify formwork types

and installation techniques including calculating materials and setting beam and deck forms. Metal beam forms and capitals are highlighted. Additionally, layout and builders level skills are used in this class. Hours: 20 Lecture. 20 Lab.

CARP 050H

Gang Forms/Columns

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course is an introduction to formwork types, applications, and construction methods for gang and column forms using built and manufactured forming systems. Discussions cover heavy timber gang forms and use of taper ties, bracing, and bulkhead tables. The course project includes gang and column formwork construction, assembly, and hardware using selected manufactured products. Related safety, math, and print reading will be covered in this course.

Hours: 20 Lecture. 20 Lab.

CARP 050I

Abutments

Units: 1.5

Enrollment restricted to State indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers formwork construction skills for the abutment support structure used in most bridge and heavy highway projects. Students identify abutment anatomy and learn about footing layout, form detailing, and construction techniques used in the industry. Terminology, components, form materials, building code requirements, and sequences of construction are presented, and students work collectively to complete an abutment formwork project including keyway, panel, headwall, and wing wall construction. Hours: 20 Lecture. 20 Lab.

CARP 050J

Exterior Finish Details

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the terminology, design considerations, and construction techniques for various types of exterior finish detail installations. Students use plan views and drawing elevations for job planning activities, including calculating dimensions and materials, identifying wall covering types, and other exterior construction details. Students use the construction techniques they learn to complete various exterior detail installations to print specifications. Hours: 20 Lecture. 20 Lab.

CARP 050K

Advanced Stairs

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers basic stair construction before presenting advanced skills needed to perform circular and "u-shaped" stair framing tasks. Students interpret floor plans and drawing elevations for job planning, and to lay out and construct advanced stair designs. Students will adapt stair calculations to determine the number of stairs, landing height, stair tread, and riser dimensions. In addition to measuring skills, mathematical principles, and stair and handrail fabrication and assembly, the course covers installation techniques required for circular and u-shaped stair configurations. Hours: 20 Lecture. 20 Lab.

CARP 050L

Advanced Commercial Framing

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers advanced commercial wall framing theory and construction techniques with structural hardware and shear panel installation. Students interpret floor plans for job planning and to lay out and detail plates for complex wall configurations, rake walls, and openings. Instruction includes measuring skills, the use of mathematical principles, advanced rake wall construction design, plywood shear panel installation, and structural hardware attachment. Hours: 20 Lecture. 20 Lab.

CARP 050M

Bridge Falsework

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers bridge falsework design and construction methods and procedures. The techniques for bent assemblies, base sub-assemblies, deck soffits and hardware installation are presented. Falsework tasks include rigging and alignment techniques, and relevant safety, math, and print reading are covered in the in-class training. Hours: 20 Lecture. 20 Lab.

CARP 050N

Advanced Roof Framing

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the advanced skills used to frame hip roof types, including

terminology, roof characteristics, and construction methods. Students interpret print views and elevations for job planning to determine hip roof rafter systems and layout details. Students perform rise, run, rafter angles, and length calculations. Framed wall construction is incorporated to facilitate hip roof assemble techniques and installation procedures.

Hours: 20 Lecture. 20 Lab.

CARP 050P

Panelized Roofing

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the structural components and building techniques associated with heavy timber construction and panelized roof systems, and includes discussions about the advantages of different types of manufactured wood used in these processes, including their load carrying strength, span, and spacing. Emphasis is placed on the distinction between standard post and beam and heavy timber construction. Students interpret floor plan, section views, and drawing elevations for job planning, and to lay out and construct a heavy timber post-and-beam-supported panelized roof. Hours: 20 Lecture. 20 Lab.

CARP 050R

Intermediate Commercial Framing

Units: 1.5

Enrollment restricted to State indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course goes beyond basic wall framing theory, and involves the application of wall construction techniques that require greater skill levels. Topics include a review of basic wall framing and floor plans used for job planning, design recognition, and materials lists. Students lay out and detail wall plates for locating basic wall components and door openings. Instruction details how structural connections are made, and includes measuring skills, mathematical principles, wall assembly, and installation procedures. Hours: 20 Lecture. 20 Lab.

CARP 050S

Intermediate Stairs

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course uses floor plans and print elevations at an intermediate level to enhance developing students' basic stair construction skills. Students interpret prints to complete job planning, project layouts, and material cut lists for "L-shaped" stair designs. Stair calculations are used to determine the

number of stairs, landing height, stair thread, and riser dimensions for assigned projects.
Hours: 20 Lecture. 20 Lab.

CARP 050T
Drywall Applications

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers required and supplemental instruction for carpentry apprentices, and focuses on the commercial and residential skills necessary to properly handle and install drywall used in specialized applications including fire resistance, sound control, and for-life safety. Layout, cutting, attachment procedures, and productivity techniques are discussed and practiced under jobsite conditions. Wall framing and drywall finishing methods are incorporated into the hands-on activities.

Hours: 20 Lecture. 20 Lab.

CARP 050U
Interior Elevations

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers required and supplemental instruction for carpentry apprentices, including the techniques and skills used in construction of interior spaces. Print elevation views and details are utilized for job planning and design recognition, and to determine materials. Students lay out and detail interior walls, surfaces for arches, soffits, and trim installation. Instruction includes a review of transit and builder levels, measuring skills, and cutting techniques for inside/outside corners and radius cuts.

Hours: 20 Lecture. 20 Lab.

CARP 050V
Welding Fabrication

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course is designed as an introduction to layout and basic welding and fabrication. Students are introduced to the basic skills of measuring, equipment setup and cutting, shaping, grinding, welding, filing, heating, and bending metal parts. Training includes fundamental arc welding techniques to fabricate project components.

Hours: 20 Lecture. 20 Lab.

CARP 060A
Cabinet, Millwork and Assembly

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of

California who are interested in the carpentry industry. The course provides details of cabinetry fabrication from design and function through the complete production process. Emphasis is placed on print interpretation, job planning, and proper construction sequence. Countertops and hardware styles and types are discussed. Students use the methods and procedures presented to build typical base casework to industry standards.

Hours: 20 Lecture. 20 Lab.

CARP 060B
Plastic Laminates

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the materials, tools, and adhesive application techniques for fabricating plastic laminated countertops. Also covered is the installation of plastic laminates, including function and design. Students review prints to determine substrates and laminate material types, and to calculate countertop dimensions. Emphasis is placed on installation methods and techniques for drop edges and backsplashes, as well as cleaning and repair. Students design and install a countertop to specifications while using tools and other equipment correctly.

Hours: 20 Lecture. 20 Lab.

CARP 060C
Doors and Door Frames

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the installation process of doors and door frames, from constructing rough openings to hanging and adjusting doors. Emphasis is placed on print interpretation, door schedules, symbols, and hardware recognition. Students use the methods and procedures covered during the course to install select frames and doors.

Hours: 20 Lecture. 20 Lab.

CARP 060D
Stair Trim

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers how various trims are utilized to finish stair construction design features. Students use the techniques presented to complete a stair, railing, and wall project. Product styles, characteristics, applications, and installation methods are included in the discussions. The tool techniques for cutting materials, mitering corners, and installing selected trim types are presented and practiced throughout the training.

Hours: 20 Lecture. 20 Lab.

CARP 060E
Commercial Fixtures

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers print interpretation and fabrication techniques used in the preparation and installation of commercial store fixtures. Emphasis is placed on pre-job planning, proper hand and power tool use, and safety measures. Students apply the procedures covered in the course to complete valance and wall panel installations.

Hours: 20 Lecture. 20 Lab.

CARP 060F
Fitting Rooms/Partitions

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040B, CARP 040A

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers style comparison, attachment methods, and installation techniques for various fitting room and partition fixtures. Framing elements, mounting brackets, and panel products are covered. Students use procedures covered in the course during fitting room and partition application projects.

Hours: 20 Lecture. 20 Lab.

CARP 060G
Exit & Electrical Security Devices

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the classifications, types, models, codes, and uses for accident hazard exit (i.e., "panic") devices and fire exit devices. A range of security products and door hardware used in the industry (e.g., crossbars, latches, flush bolts, and kick plates) are discussed, and the proper selection, installation, and adjustment techniques for selected devices are included.

Hours: 20 Lecture. 20 Lab.

CARP 060H
Solid and Stone Surfaces

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the mill and cabinet work industry. The course provides both basic and advanced assembly and installation techniques for solid surface, natural stone, and manufactured materials. Topics include various products, designs, materials, accessories, maintenance, repairs and safety considerations. Discussions about typical applications for different surface types

aid in the identification of suitable materials. Students use the procedures covered in the course to fabricate countertops with backsplashes and create a design inlay.
Hours: 20 Lecture. 20 Lab.

CARP 060I

Hand/Power Tool Usage

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the proper selection, safe use, and maintenance of both hand and power tools. Students learn to distinguish conditions when the use of hand and power tools are appropriate alternatives to stationary saws and equipment. Discussions help students identify key tool features, accessories, and tasks that can be performed using a variety of methods and techniques. Practical exercises focus on various saw types, hand planes, and hand-held drills.

Hours: 20 Lecture. 20 Lab.

CARP 060J

Power Tools and Stationary Equipment

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course provides instruction for the power tools and stationary equipment typically used in millwork production. Students identify appropriate procedures and machining operations for various milling applications. Practical exercises focus on shaping materials using various types of stationary saws, planes, sharpeners and power tools.

Hours: 20 Lecture. 20 Lab.

CARP 060K

Print Reading and Stock Billing

Units: 2

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course focuses on working drawings used in the designing and building of a project. Instruction includes an explanation of the methods and procedures used to identify the components and materials needed to finish projects. Students study floor plans, elevations, and detail drawings to determine the design, wood types, style, and features of construction and assembly details.

Hours: 30 Lecture. 10 Lab.

CARP 060L

Material and Hardware Applications

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the characteristics and construction suitability of various types of wood, woodworking materials, and hardware typically used in the cabinet making industry. Emphasis is placed on cabinet making design and wood selection. Working with a variety of wood samples, students develop the ability to recognize the natural qualities associated with a particular wood species. Practical exercises include handling selected wood species, and provide experience working with a variety of hardware.

Hours: 20 Lecture. 20 Lab.

CARP 060M

Production Casework and Assembly

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the mill and cabinet work industry. The course provides details of cabinetry fabrication, from design and function through the complete production process. Emphasis is placed on print interpretation, job planning, and proper construction sequence. Countertops and hardware styles and types are discussed. Students use the methods and procedures covered in the course to build typical base casework to industry standards.

Hours: 20 Lecture. 20 Lab.

CARP 060N

Laminates and Overlays

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the mill and cabinet work industry. The course covers materials, tools, and adhesive application techniques for the fabrication and installation of plastic laminated countertops. Students review prints to determine substrates and laminate material types, and to calculate countertop dimensions. Emphasis is placed on installation methods and techniques for drop edges and backsplashes, as well as cleaning and repair. Students design and install a countertop to specifications while using tools and other equipment correctly.

Hours: 20 Lecture. 20 Lab.

CARP 060P

Jigs, Fixtures and Accessories

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the mill and cabinet work industry. The course provides instruction for jigs, fixtures, and other accessories typically used with power and stationary tools for the production of millwork. A wide range of accessories and their applications are identified during training, and discussions enable students to

explain when and how add-on equipment makes work easier and improves productivity. Students use the techniques covered in the course to select and attach accessories and to fabricate custom jigs.

Hours: 20 Lecture. 20 Lab.

CARP 060R

Millwork and Specialty Applications

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the mill and cabinet work industry. The course covers how moldings and trims are utilized to finish wall and cabinets. Students are introduced to product styles, characteristics, and millwork; specialty applications and installation methods are also included in this training. The tool techniques for milling profiles, measuring, cutting, coping, and installing various molding, trim, and specialty items are presented and practiced throughout the course.

Hours: 20 Lecture. 20 Lab.

CARP 060S

Computerized Project Planning and Estimating

Units: 2

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the mill and cabinetmaker industry. The course focuses on computerized project planning and estimating tasks. Training begins with a brief review of basic computer operations. Students use project prints and specifications to determine material types, sizes, and quantities; and to plan and estimate material and labor costs using Microsoft Windows, Word, and Excel worksheets.

Hours: 40 Lecture.

CARP 060T

Computer Applications CAD-CAM

Units: 2

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the mill and cabinetmaker industry. The course focuses on computerized software used to create production drawings and cabinetry designs. Training includes a brief review of basic computer operations, including access to software, internet, and email programs. Students become familiar with the organization of computer aided design (CAD) software user interface (AutoCAD 2014), basic drawing commands, and file saving tools. Discussion includes an overview of computer aided manufacturing (CAM) from design to production, and students use CAD drawing tools to create a base cabinet design.

Hours: 40 Lecture.

CARP 060V

Building Information Modeling Concepts

Units: 2

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the mill and cabinetmaker industry. The course focuses on computerized software used in project management planning, workflows, and troubleshooting. Training includes a brief review of basic computer operations, including access to software, internet, and email programs. Students analyze building information modeling (BIM) project data to grasp basic concepts related to viewing three-dimensional building models, project scheduling, and construction problem-solving features.

Hours: 40 Lecture.

CARP 060W

Building Information Modeling Computer Applications

Units: 2

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the mill and cabinetmaker industry. The course focuses on computerized software used to develop three-dimensional models of construction projects. Training provides an introduction to the design process using various drawing software. Students practice importing and exporting design elements into building information modeling (BIM) organization structures for project management and workflow assessment. The course also includes a review of basic computer skills.

Hours: 40 Lecture.

CARP 070A

Basic Frame Scaffold

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the basic techniques and procedures used to erect frame scaffolds, with construction practices and safety considerations as a major focus of the course. Scaffold standards and industry-wide, enforced regulations are presented and utilized in hands-on projects. Students identify frame scaffold components and the importance of site and equipment inspections, and erect typical frame scaffold assemblies according to industry standards.

Hours: 20 Lecture. 20 Lab.

CARP 070B

Basic System Scaffold

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the basic techniques and procedures used to erect

system scaffolds, with construction practices and safety considerations as a major focus of the course. Scaffold standards and industry-wide, enforced regulations are presented and utilized in hands-on projects. Students identify system scaffold components and the importance of site and equipment inspections, and erect typical system scaffold assemblies according to industry standards.

Hours: 20 Lecture. 20 Lab.

CARP 070C

Basic Tube and Clamp Scaffold

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the basic techniques and procedures used to erect tube and clamp scaffolds, with construction practices and safety considerations as a major focus of the course. Scaffold standards and industry-wide, enforced regulations are presented and utilized in hands-on projects. Students identify tube and clamp scaffold components, access, inspection, and assembly and disassembly procedures, and install components for multi-bay and multi-tier scaffolds according to industry standards.

Hours: 20 Lecture. 20 Lab.

CARP 070D

Basic Suspended Scaffold

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the basic techniques and procedures used to install suspended scaffolds, with training focused on the terminology and use of scaffold components in cable (i.e., wire rope) suspended configurations. Topics include anchorage systems, structural supports, hoists, and suspension devices. Students form eyes in wire rope using proper clamping techniques, and safety hazards and increased fall protection measures are taken as students follow design plans to construct cable-suspended scaffolds.

Hours: 20 Lecture. 20 Lab.

CARP 070E

Intermediate Frame Scaffold

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. Students learn the skills required to construct elevated platforms that span a large area, with emphasis placed on the importance of verifying that the first bay is plumb, level, and square at the same time practices for attaching and aligning multi-bay scaffolds in both width and length directions are explained. Students access various methods of distributing platform loads, employ proper procedures to elevate each row of bays to

maintain a uniform and level platform, and use presented techniques to erect multiple connected and non-connected scaffold bays to industry standards.

Hours: 20 Lecture. 20 Lab.

CARP 070F

Intermediate System Scaffold

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. Students learn the skills required to construct elevated platforms that span a large area, and then use presented techniques to erect multiple connected and non-connected scaffold bays.

Hours: 20 Lecture. 20 Lab.

CARP 070G

Advanced Frame Scaffold

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course teaches students how to adapt scaffold configurations to follow the contour of a building's architectural features and height limitations. Students use the proper terminology to describe structural and design elements typically found in construction; utilize reach limitation guidelines to determine maximum platform height; and erect a frame scaffold to conform to angles, slopes, obstacles and obstructions of walls and /or ceilings.

Hours: 20 Lecture. 20 Lab.

CARP 070H

Advanced System Scaffold

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

Advisory: MATH 070 or appropriate placement, READ 022 or appropriate placement

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course teaches students how to adapt scaffold configurations to follow the contour of a building's architectural features and height limitations. Students erect a frame scaffold to conform to angles, slopes, obstacles and obstructions of a wall and/or ceiling.

Hours: 20 Lecture. 20 Lab.

CARP 070I

Advanced Suspended Scaffold

Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the advanced techniques and procedures required when constructing suspended scaffolds supported

by structural members. Students identify the suitable structural components for this application type, and the methods used to determine load bearing capability of structural elements are presented. Hazards and precautionary techniques associated with safely building this type of suspended platform are the focus of this training. Hours: 20 Lecture. 20 Lab.

CARP 070J
Confined Space

Units: 2
Enrollment restricted to State Indentured Carpenter Union Apprentices
Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers safe access, entry, and monitoring methods for work-confined spaces. Terminology, hazard recognition, air quality, and the use of various types of personal protective and respiratory equipment are presented. Students complete simulated work tasks and emergency rescue procedures utilizing a mock up. Upon successful completion of the course students are issued a United Brotherhood of Carpenters (UBC) Confined Space Qualification Card. Hours: 30 Lecture. 10 Lab.

CARP 070K
Scaffold Reshoring

Units: 1.5
Enrollment restricted to State Indentured Carpenter Union Apprentices
Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the basic techniques and procedures associated with frame, system, and tube and clamp scaffold components used in industrial settings. Regulations, terminology and components used in these systems types are discussed in depth. Construction practices and safety considerations include plant operating processes, equipment, hazardous material awareness, and emergency response. Students identify and erect equipment using basic configurations suitable for jobsites where industrial scaffolds are commonly used during maintenance cycles. Hours: 20 Lecture. 20 Lab.

CARP 070L
Specialty Scaffold Applications

Units: 1.5
Enrollment restricted to State Indentured Carpenter Union Apprentices
Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers specialty scaffold applications focusing on ramps, chutes, and mobile towers suitable for light and heavy duty use. Students identify the characteristics of commercial and industrial scaffold construction. The selected projects for the course introduce the techniques and procedures used for access/egress, debris handling, and maintenance scaffolds. Hours: 20 Lecture. 20 Lab.

CARP 070N
Scaffold Erector Qualification

Units: 1.5
Enrollment restricted to State Indentured Carpenter Union Apprentices
Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course is designed to comply with applicable regulations and to provide students with industry-recognized general scaffold building credentials. A fundamental approach and careful explanation of scaffold-built applications is presented, including safety and terminology, elevated platform intended use, span and loading criteria, access and egress, stability, structural connections, and inspections. Detailed project drawing review provides practical experience in locating dimensions and determining layout and scaffold material requirements. Emphasis on erection/dismantling sequence fosters the development of job planning, preparation skills, and applied math. The importance of a safety program that includes site specific conditions, communication, and fall protection is addressed during scaffold construction exercises. Hours: 20 Lecture. 20 Lab.

CARP 070P
Industrial Scaffolding

Units: 1.5
Enrollment restricted to State Indentured Carpenter Union Apprentices
Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the basic techniques and procedures associated with frame systems and tube and clamp scaffold components used in industrial settings. A major focus of the course is construction practices and safety considerations, including general plant operating conditions and hazards. Upon successful completion of the course students are issued a United Brotherhood of Carpenters (UBC) Scaffold Qualification Card (standard 40-hour training). Hours: 20 Lecture. 20 Lab.

CARP 080A
Basic Wood Flooring Installation

Units: 1.5
Enrollment restricted to State Indentured Carpenter Union Apprentices
Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course provides an introduction to wood flooring materials and installation techniques. Students study the characteristics of various hard and soft wood species typically chosen for grade, durability, and color. The inspection of existing subfloors is discussed, and procedures for installing new subfloors are included. The proper preparation and installation sequence of wood strips and plank flooring is the main focus of the training. Hours: 20 Lecture. 20 Lab.

CARP 080B

Borders
Units: 1.5

Enrollment restricted to State Indentured Carpenter Union Apprentices
Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the fabrication and production skills used to create borders for wood flooring installations. Students interpret floor plans to determine details for border designs and estimate materials. Instruction includes designs considerations, geometric layout procedures, and techniques for maintaining border symmetry. Hours: 20 Lecture. 20 Lab.

CARP 080C
Parquet Flooring

Units: 1.5
Enrollment restricted to State Indentured Carpenter Union Apprentices
Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the methods and techniques for installing parquet flooring. Students study the characteristics of various parquet flooring patterns, and evaluate the suitability of hard and soft woods for use in parquet flooring patterns. The inspection, patching, and leveling of existing subfloors are discussed and practiced. The proper preparation and installation sequence of parquet wood flooring is the main focus of the training. Hours: 20 Lecture. 20 Lab.

CARP 080D
Advanced Patterns

Units: 1.5
Enrollment restricted to State Indentured Carpenter Union Apprentices
Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the fabrication and installation skills used in the production of custom wood flooring design. Students study examples of artistic wood floor elements including geometric patterns, color variations, and the inclusion of materials other than wood. Students create a design pattern for a custom wood floor medallion, and use the techniques and skills presented to complete the medallion project. Hours: 20 Lecture. 20 Lab.

CARP 080E
Diagonal and Herringbone Patterns

Units: 1.5
Enrollment restricted to State Indentured Carpenter Union Apprentices
Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the fabrication and installation skills used in the production of diagonal and herringbone flooring patterns. Students interpret floor plans to detail pattern assemblies and estimate materials. Instruction includes design considerations, geometric layout procedures,

and techniques for maintaining pattern symmetry.

Hours: 20 Lecture. 20 Lab.

CARP 080F

Crew Lead Training

Units: 2

Enrollment restricted to State Indentured Carpenter Union Apprentices

Prerequisite: CARP 040A, CARP 040B

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the carpentry industry. The course covers the supervisory and crew leadership skills required for professional development in the wood flooring industry. Topics include typical work processes, communication methods, customer service considerations, motivational concepts and problem solving techniques that, when employed, result in the efficient and effective management of wood floor installation. Various project scenarios are used to conduct classroom exercises.

Hours: 40 Lecture.

CARP 290

Work Experience Education in Carpenters Apprenticeship

Units: 1-4

Enrollment restricted to State Indentured Carpenter Union Apprentices It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course provides students the opportunity to work in the Carpenters apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the Carpenters Joint Apprenticeship and Training Committee (J.A.T.C.). Students complete work experience hours at approved training sites. Students may take up to 16 units total across all Work Experience Education course offerings. Only one Work Experience Education course may be taken per semester.

Hours: 3 Lecture. 54-216 Lab.

CHILD DEVELOPMENT

Division of Behavioral and Social Sciences

CD 102 (C-ID: ECE 220)

Nutrition, Health and Safety for Children

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students interested in working in group care and/or educational programs that enroll children from infancy to early adolescence. The course focuses on preventative health and safety practices in group care environments for both children and adults, and integrating these practices into daily program planning and development. The course also introduces students to the laws, regulations, standards, policies and procedures, and child development curriculum related to child nutrition, health, and safety. Topics include prevention and recognition of infectious

disease, immunization, dental and mental health, child nutrition, menu planning, sanitary food handling, injury prevention, emergency preparedness and evacuation, and providing services for children with special needs; as well as child abuse prevention, identification, and reporting responsibilities. The importance of program collaboration with families and health professionals also is addressed. This course meets the Department of Social Services (DSS) Classification Indicator DS7 and the State of California Department of Education Title 5 Child Development Permit.

Hours: 54 Lecture.

CD 103

Parenting

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students interested in learning how to understand and work effectively with parents, and to understand the parent-child relationships in their own lives. The course provides a framework for topics pertinent to current parenting concepts. Topics include understanding the parenting process from infancy to adulthood, parenting in diverse cultures, various lifestyles and family structures, alternatives to biological parenting, and understanding high-risk families.

Hours: 54 Lecture.

CD 106 (C-ID: CDEV 100)

Child Growth and Development

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: CD 106 or PSY 112

This course provides an overview of human growth from conception to adolescence. The theories of development relevant to life through the teenage years are introduced, and the social, emotional, cognitive, and physical aspects of these early stages of life are addressed. This course is appropriate for students preparing for a profession working with children and their families, or those interested in furthering their understanding of child and adolescent development. This course is also designed to meet the Department of Social Services Classification DS1 and applies toward the State of California Title 5 requirement for the Child Development Permit.

Hours: 54 Lecture.

CD 110 (C-ID: ECE 120)

Principles and Practices of Early Childhood Education

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students who seek to work in educational programs for children from birth to age eight. The course examines the underlying theoretical principles of

developmentally appropriate practices applied to programs and environments, emphasizing the key role of relationship, constructive adult-child interaction, and teaching strategies in supporting physical, social, creative, and intellectual development for all children. This course includes a review of the historical roots or early childhood programs and the evolution of the professional practices promoting advocacy, ethics, and professional identity. This course applies towards the childcare licensing category 3 (DS3) as authorized by Title 22 within the California Department of Social Services (CDSS), as well as the California teacher credentialing requirements for the child development permit.

Hours: 54 Lecture.

CD 111 (C-ID: ECE 130)

Early Childhood Education Curriculum

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This introductory course presents current concepts in childhood curriculum development and implementation. Students design curriculum based on observation and assessment of young children to support play and learning using developmental, inclusive, and anti-bias principles in collaboration with families to support all children; demonstrate knowledge of the teachers' role in evaluating best practices; and apply understanding of children's learning and development. This course is meant for students who plan to create and implement children's educational programs. This course is also designed to meet the State of California Title 22 Department of Social Services Classification Indicator DS3 and applies to the State of California Title 5 requirements for the Child Development Permit.

Hours: 54 Lecture.

CD 114 (C-ID: ECE 200)

Observation and Assessment

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students working towards a Child Development Permit. The course focuses on the appropriate use of assessment and observation strategies applied to document development, growth, play, and learning in order to join with families and professionals in promoting children's success and maintaining quality programs. Recording strategies, rating systems, portfolios, and multiple assessment methods are explored. Advantages and disadvantages of observation techniques, observer bias, and cultural considerations are discussed. This course meets the Department of Social Services (DSS) Classification Indicator DS3 and applies toward the State of California Title 5 requirement for the Child Development Permit.

Hours: 54 Lecture.

CD 115

Creative Art Experiences for Children

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is a comprehensive study of creativity and its impact on child development. A developmental perspective is utilized as students explore creative art and its impact on the whole child, the artistic development process, aesthetics, the elements of art, specific art program approaches, artistic styles, facilitating and supporting creative art experiences for children, art assessment techniques, and specific art experiences. This course is appropriate for students interested in working with children in group care and educational environments. This course applies towards the childcare licensing category 3 (DS3) as authorized by Title 22 within the California Department of Social Services (CDSS), as well as the California teacher credentialing requirements for the child development permit.

Hours: 54 Lecture.

CD 118

Development of Science and Math Experiences

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students preparing for a career in teaching children, and provides a framework from which to explore the theories, philosophies, principles, and implementation of science and math experiences for children from birth to early adolescence. Emphasis is placed upon theoretical and developmental foundations with practical application in the form of developmentally appropriate activities for use in schools and child care centers. The course meets the Department of Social Services (DSS) Classification Indicator DS3 and applies towards the State of California Department of Education Title 5 Child Development Permit.

Hours: 54 Lecture.

CD 119

Music and Movement for Children

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students interested in working with children in group care and educational programs, and offers a framework for providing developmentally appropriate music and movement principles and experiences for children from birth to early adolescence. The developmental characteristics of movement and music abilities, the basics of movement, and music education are outlined. Students participate in music- and movement-related activities. The course meets the Department of Social Services (DSS) Classification Indicator DS3 and applies towards the State of California Department of Education Title 5 Child Development Permit.

Hours: 54 Lecture.

CD 120

Experiences in Language Arts

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students interested in promoting and facilitating the language development of children. The course is a study of the philosophies, principles, and implementation of language arts experiences for children from birth to early adolescence. The theoretical bases of language development and systems of teaching literacy are addressed. Literature, dramatics, flannel board stories, puppetry, and storytelling are incorporated into the course as strategies for language acquisition as well as literacy activities. The course meets the Department of Social Services (DSS) Classification Indicator DS3 and applies towards the State of California Department of Education Title 5 Child Development Permit.

Hours: 54 Lecture.

CD 208 (C-ID: CDEV 110)

Child, Family, and Community

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students desiring to work with children in a group setting, as well as for parents and others who wish to further their understanding of how the socio-cultural environment affects the developing child. The course examines the historical and contemporary interrelationship of family, school and community on child development. The process of socialization and identity formation will be highlighted, showing the importance of respectful, reciprocal relationships that support and empower families. This course meets the Department of Social Services Classification Indicator DS2 and the State of California Department of Education Title 5 Child Development Permit.

Hours: 54 Lecture.

CD 211

Infant and Toddler Development

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course studies infants and toddlers from pre-conception to age three, including physical, cognitive, language, social, and emotional growth and development. The focus of this course applies theoretical frameworks to interpret behavior and interactions between heredity and environment; it also emphasizes the role of family and relationships in development. This course meets the Department of Social Services (DSS) Classification Indicator DS4 and applies towards the State of California Department of Education Title 5 Child Development Permit.

Hours: 54 Lecture.

CD 213

Care and Education for Infants and Toddlers

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course applies current theory and research to the care and education of infants and toddlers in group settings. The course examines essential policies, principles, and practices that lead to quality care and developmentally appropriate curriculum for children from birth to 36 months. The course meets the Department of Social Services (DSS) Classification Indicator DS4 and applies towards the State of California Department of Education Title 5 Child Development Permit.

Hours: 54 Lecture.

CD 224 (C-ID: ECE 230)

Diversity Issues During Early Childhood, School Age, and Adolescence

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students interested in working in children's programs and educational settings, and addresses the similarities, variety, and multiplicity found within programs and educational settings for young children, school age children, and adolescents. Topics covered include family values, culture, race, gender, social class, sexual preference, language, and abilities. Focus also is placed on developmental appropriateness in addressing diversity, parental perspectives, and the effects of diversity on the domains of development. This course meets the Department of Social Services (DSS) Classification Indicator DS 3 and applies towards the State of California Department of Education Title 5 Child Development Permit.

Hours: 54 Lecture.

CD 226

Introduction to Special Education

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students who want to work in children's programs or educational environments, preparing them to facilitate the learning and development of children with special needs. The course introduces the variations in the development of children with special needs, ages birth through eight, and the resulting impact on families; it also includes an overview of historical and societal influences, laws relating to children with special needs, and the identification and referral process. This course applies toward the State of California Teacher Credentialing requirements for the Child Development Permit.

Hours: 54 Lecture.

CD 228 (C-ID: ECE 210)

Early Childhood Education Practicum

Units: 3

Verification of freedom from tuberculosis and immunizations against influenza, pertussis, and measles are necessary to fulfill the lab requirement of this course.

Prerequisite: CD 106, CD 110, CD 111, CD 114 and CD 208

Transfers to: CSU

In this capstone course, students practice and demonstrate developmentally appropriate early childhood program planning and teaching competencies under the supervision of Child Development faculty and other qualified early education professionals. Students utilize practical classroom experiences to make connections between theory and practice, develop professional behaviors, and build a comprehensive understanding of children and families. Child-centered, play-oriented approaches to teaching, learning, and assessment; and knowledge of curriculum content areas are emphasized as student-teachers design, implement, and evaluate experiences that promote positive development and learning for all young children. This course is designed for students looking for supervised field/ laboratory experience in an early childhood setting. The course meets Department of Social Services Classification Indicator DS3 and applies to the State of California Department of Education Title 5 Child Development Permits.

3.4 consecutive hours of weekly supervised field experience at the Rio Hondo College Child Development Center (CDC) are required. A lab schedule must be established to start the semester. Beginning times are typically 9:00 a.m. or 1:30 p.m. Verification of freedom from tuberculosis and immunizations against influenza, pertussis, and measles are required prior to the semester's start.

Hours: 36 Lecture. 54 Lab.

CD 229

Literacy Development for Children

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students interested in facilitating and supporting literacy development in children enrolled in group care and educational environments. Focus is on effective skills and techniques utilized by teachers and caregivers to enhance the development of emergent literacy skills throughout childhood. Students develop knowledge of the sequence of literacy and language development, developmentally appropriate practices in classroom environments, and a balanced literacy approach. Effective assessment and curriculum and techniques to promote skill development are also introduced. The course meets the Department of Social Services (DSS) Classification Indicator DS3 and applies towards the State of California Department of Education Title 5 Child Development Permit. Hours: 54 Lecture.

CD 232

Curriculum and Strategies for Children with Special Needs

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course covers curriculum and intervention strategies for working with children with special needs in partnership with their families. It focuses on the use of observation and assessment in meeting the individualized needs of children in inclusive and natural environments. Topics include the role of the teacher as a professional working with families, collaboration with interdisciplinary teams, and cultural competence. The course meets the Department of Social Services (DSS) Classification Indicator DS3 and applies towards the State of California Department of Education Title 5 Child Development Permit. < Hours: 54 Lecture.

CHEMISTRY

Division of Mathematics, Sciences, and Engineering

CHEM 110

Chemistry for Allied Health Majors

Units: 5

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an elementary algebra or pre-statistics course. It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: CHEM 110, CHEM 120; no credit if taken after CHEM 130

This introductory course takes up the fundamental concepts of general, organic, and biological chemistry. Emphasis is placed on the relationship between chemistry and the health/medical sciences, so the course is especially appropriate for students who intend to pursue a career in nursing and other health-related professions, including kinesiology and psychology. Weekly laboratory activities require students to empirically verify concepts presented in lectures. No previous background in chemistry is required or expected of students enrolling in this course.

Hours: 72 Lecture. 54 Lab.

CHEM 120 (C-ID: CHEM 101)

Introduction to Chemistry

Units: 5

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an intermediate algebra course. It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limitation. Students will receive credit for only one of the following courses: CHEM 110, CHEM 120; no credit if taken after CHEM 130

This one-semester course is designed for students intending to major in science or engineering. The course primarily prepares students for CHEM130; additionally, it fulfills the General Education requirement in the physical sciences. This course introduces the fundamental principles of general chemistry, with emphasis on chemical nomenclature and quantitative problems in chemistry. The

lecture presents classical and modern chemistry, including atomic theory, periodic properties, chemical bonding, chemical reactions, stoichiometry, acids and bases, gas laws, and solutions. The laboratory introduces the techniques of experimental chemistry with examples from all areas of chemistry. Hours: 72 Lecture. 54 Lab.

CHEM 130 (C-ID: CHEM 110, CHEM 120S)

General Chemistry I

Units: 5

Prerequisite: CHEM 120

Advisory: ENGL 101, MATH 175

Transfers to: UC/CSU

This course is the first semester of a two-semester sequence designed for students intending to major in science and engineering. The lecture course covers classical and modern chemistry, with applications in stoichiometry and classical atomic theory of chemistry, periodic properties, gas laws, modern quantum theory of atomic and molecular structure and periodic properties, thermochemistry, liquids and solids, and solution chemistry. The laboratory introduces experimental chemistry with examples from all areas of chemistry. Hours: 54 Lecture. 108 Lab.

CHEM 140 (C-ID: CHEM 120S)

General Chemistry II

Units: 5

Prerequisite: CHEM 130

Advisory: ENGL 101, MATH 180

Transfers to: UC/CSU

CHEM 140 is a continuation of CHEM 130. Theory and techniques of elementary physical chemistry are stressed. Emphasis is placed on the dynamics of chemical change using thermodynamics and reaction kinetics as the major tools. A thorough treatment of equilibrium is given, with many examples of acid/base, buffer, solubility, and complex ions. Entropy and free energy, electrochemistry, coordination compounds and a brief introduction to organic chemistry and nuclear chemistry are presented. Various analytical techniques used in modern chemistry are introduced.

Descriptive chemistry of representative metallic and nonmetallic elements is included. The Laboratory introduces experimental chemistry with examples from areas of kinetics, equilibrium, acid/base and buffer preparation, differential titration, electrochemistry, and qualitative analysis. Modern instrumental methods are used in some exercises.

Hours: 54 Lecture. 108 Lab.

CHEM 230 (C-ID: CHEM 150, CHEM 160S)

Organic Chemistry I

Units: 5

Prerequisite: CHEM 140

Transfers to: UC/CSU

This course, the first of a two-semester sequence, provides a rigorous introduction to the practical and theoretical aspects of organic chemistry. Several topics will be explored in depth, including molecular structure and hybridization, applications of acid/base theory to organic compounds, stereochemistry, alkanes, alkenes, alkynes, dienes, substitution and elimination reactions, and spectroscopic methods of analysis (e.g., infrared (IR), ultraviolet/visible (UV/VIS),

nuclear magnetic resonance (NMR)). Particular emphasis will be placed on thermodynamic and kinetic aspects of reactions and detailed examination of reaction mechanisms. Laboratory exercises are designed to provide students with a solid foundation in the essential techniques of organic chemistry, including the determination of melting points, thin-layer and column chromatography, extraction, distillation, and spectroscopic analysis of products. This course is appropriate for students majoring in chemistry, biological sciences, and chemical engineering, and satisfies the admissions requirements for medical, dental, veterinary, and other health-related graduate programs.
Hours: 54 Lecture. 108 Lab.

CHEM 231 (C-ID: CHEM 160S)

Organic Chemistry II

Units: 5

Prerequisite: CHEM 230

Transfers to: UC/CSU

This course, the second of a two-semester sequence, provides a rigorous introduction to the practical and theoretical aspects of organic chemistry. The chemistry of aromatic and carbonyl-containing compounds is emphasized throughout the course of the semester. Bioorganic compounds are introduced. Particular emphasis is placed on thermodynamic and kinetic aspects of reactions, the detailed examination of reaction mechanisms, and the design of multi-step syntheses. Laboratory exercises require students to use techniques learned in the previous semester to carry out more complex reactions and multi-step synthesis. Additionally, students investigate the techniques of organic qualitative analysis. This course is appropriate for students majoring in chemistry, biological sciences, and chemical engineering, and satisfies the admissions requirements for medical, dental, veterinary, and other health-related graduate programs.
Hours: 54 Lecture. 108 Lab.

CHEM 299

Directed Study: Chemistry

Units: 1

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is

responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.
Hours: 54 Lab.

CHINESE

Division of Communications and Languages

CHIN 101

Chinese I

Units: 4.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This introductory course focuses on Chinese language and culture. The course stresses oral and written proficiency through fundamental use of Chinese pronunciation and the Pinyin spelling system; students are also introduced to Chinese characters. Various facets of Chinese history, culture, and civilization are analyzed via cross-cultural comparisons. In addition to classroom discussion, students are required to complete at least 27 hours of intensive, individualized oral-aural practice via interactive websites, audio CDs, video programs, and films in the RHC Language Laboratory, where work focuses on vocabulary, grammar, and cultural practices. This course is intended for students interested in learning to speak Chinese, as well as those seeking a degree in Chinese language.
Hours: 72 Lecture. 27 Lab.

CHIN 102

Chinese II

Units: 4.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Prerequisite: CHIN 101 or completion of 2 years high school Chinese with a grade of "C" or better

Transfers to: UC/CSU

This course is a continuation of CHIN 101. The course stresses oral and written proficiency through fundamental use of Chinese pronunciation and the Pinyin spelling system, and students continue to further their knowledge of Chinese characters. Various facets of Chinese history, culture, and civilization are analyzed via cross-cultural comparisons. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice via interactive websites, audio CDs, video programs, and films in the RHC Language Laboratory, where work focuses on vocabulary, grammar, and cultural practices. This course is intended for students interested in learning to speak Chinese, as well as those seeking a degree in Chinese language.
Hours: 72 Lecture. 27 Lab.

CHICANX AND LATINX STUDIES

Division of Behavioral and Social Sciences

CHST 101

Introduction to Chicana/o/x Studies

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This introductory course examines social, political, economic, and historical issues as they impact the Chicana/o/x experience in the U.S. Topics include identity, gender, language, race, sexuality, immigration, labor, poverty, and education. This course is designed to acquaint students with the interdisciplinary models and paradigms developed within the field of Chicana/o/x studies.
Hours: 54 Lecture.

CHST 146

The Mexican American in the History of the United States

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This interdisciplinary course presents a survey of Mexican/Mexican-American people in the context of U.S. history. The course begins with the U.S. declaration of war on Mexico in 1846 and goes on to examine Mexican-American struggles for integration, liberation, self-determination, and decolonization. This course provides a historical context to understand contemporary issues that impact Chicana/o/x communities.
Hours: 54 Lecture.

CHST 148

La Chicana: Mexican-American Women in Contemporary Society

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: CHST 148 or CHST 148H

This introductory course explores the intersectional identity formations of Chicana women in the United States. Course themes include an examination of the genesis of the term "Chicana"; the emergence of Chicana feminism; and the intersection of race, gender, class, ethnicity, and sexuality in relation to the formation and study of Chicana identities. This course is interdisciplinary, drawing on methodologies and paradigms from ethnic studies, gender and sexuality studies, queer studies, history, literature, sociology, and popular culture.
Hours: 54 Lecture.

CHST 148H

La Chicana: Mexican-American Women in Contemporary Society Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: CHST 148 or CHST 148H

This introductory course explores the intersectional identity formations of Chicana women in the United States. Course themes include an examination of the genesis of the term "Chicana"; the emergence of Chicana feminism; and the intersection of race, gender, class, ethnicity, and sexuality in relation to the formation and study of Chicana identities. This course is interdisciplinary, drawing on methodologies and paradigms from ethnic studies, gender and sexuality studies, queer studies, history, literature, sociology, and popular culture. This course is intended for students eligible for the Honors Program.

Hours: 54 Lecture.

CHST 150

Chicana/o/x Politics

Same as: POLS 150

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course examines U.S. history and political issues relevant to the Chicana/o/x and Latina/o/x community. The course provides an overview of demographic changes in the U.S. and examines political activism and political leadership. Students interested in this course may include individuals with familial or personal connections to the Chicana/o/x (Mexican-American) community and/or those intending to work in environments with high concentrations of this population.

Hours: 54 Lecture.

COMPUTER INFORMATION TECHNOLOGY

Division of Arts, Business, & Cultural Programs

CIT 101 (C-ID: BUS 140, ITIS 120)

Introduction to Computer Information Technology

Units: 3

It is advised that students understand how a personal computer is used to launch programs, open files, use a browser for accessing the Internet, and how to access email. It is also advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is an examination of information technologies and information systems used in business, with a focus on information systems, database management systems, networking, ethics and security, computer hardware, and software applications and development. Application of these concepts and methods through hands-on projects are used to develop computer-based solutions to business problems.

Hours: 54 Lecture.

CIT 102

Introduction to Microsoft® Office 365

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is intended as an introduction for students wanting to learn the latest version of the integrated program suite of Microsoft® Office 365. Students are introduced to the basics of the following applications in the suite - Word®, Excel®, Access®, PowerPoint®, Outlook®, and Teams®, as well as their Internet integration. In addition, an introduction to fundamental computer concepts is presented, including hardware and software basics, file management, computer networks, and communications.

Hours: 45 Lecture. 27 Lab.

CIT 103

Microsoft® Word®

Units: 3

Advisory: CIT 101

Transfers to: CSU

This is a thorough introduction to the word processing application Microsoft® Word®. This course will provide instruction in the use of the latest version of word processing software for business applications. Students will learn the basic editing and formatting functions of the program. Document maintenance, formatting enhancements, and the creation and formatting of tables will also be presented. Additional topics include macros and styles, specialized tables, protected forms and shared documents. This course is intended for students desiring to complete the requirements for the Computer Information Technology Microcomputer Specialists Degree or professionals wanting to master Microsoft Word.

Hours: 45 Lecture. 27 Lab.

CIT 111 (C-ID: ITIS 130)

Introduction to Programming

Units: 3

Advisory: CIT 101

Transfers to: UC/CSU

This course is for students who want to develop the problem-solving abilities required to work in the computer field. Programming concepts are discussed through a variety of techniques including hierarchy diagrams, flow-charting, data diagrams, and pseudocode. The course will also include information on integrated development environments (IDEs).

Hours: 54 Lecture.

CIT 114

Introduction to Cloud Computing with DevOps

Units: 4

It is advised that students understand how a personal computer is used to launch programs, open files, use a browser for accessing the Internet, and how to access email. It is also advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is an examination of information systems as they relate to developer operations (i.e., DevOps) and cloud

computing, with specific emphasis placed on their role in business. The course focuses on information systems, security, database management systems, networking, operating systems, cloud computing, project management strategies, version control, and programming methodologies. Students in the course apply these concepts and methods through hands-on projects developing computer-based solutions to business problems.

Hours: 63 Lecture. 27 Lab.

CIT 117

Microsoft® Excel®

Units: 3

Advisory: CIT 101

Transfers to: CSU

This is a comprehensive spreadsheet application course that provides instruction in the use of the latest version of spreadsheet software for business applications. Students learn to create and format a workbook, work with formulas and functions, and produce charts, tables, and PivotTables. Students also learn advanced functions and develop Excel applications. The course is intended for students or working professionals who want a comprehensive knowledge of Microsoft® Excel®.

Hours: 45 Lecture. 27 Lab.

CIT 119

Microsoft® Access®

Units: 3

Advisory: CIT 101

Transfers to: CSU

This comprehensive microcomputer database applications course provides instruction in the use of the latest versions of database software for business applications. Students learn to create and modify tables, build table relationships, add and edit records, create forms for data entry, produce simple queries and reports, articulate advanced query functions, customize forms design for data entry, customize report writing, and share and integrate data with web pages. This course is intended for students who want to complete the requirements for the Computer Information Technology Degree, or working professionals who want a thorough introduction to Microsoft® Access®.

Hours: 45 Lecture. 27 Lab.

CIT 125

Introduction to C++ Programming

Units: 4

Advisory: CIT 101, CIT 111

Transfers to: UC/CSU

This course is for students who want to complete the requirements for the Computer Information Technology degree, or professionals who want to continue developing their programming skills using Visual C++ programming language. The course covers the fundamentals of software development using the most popular language (C++). Topics covered include designing, writing the source code, compiling, linking, executing, debugging, data types, arithmetic/logical expressions, pointers, looping, branching, classes, objects, and static and dynamic memory allocation.

Hours: 63 Lecture. 27 Lab.

CIT 126

Advanced C++ Programming

Units: 4

Prerequisite: CIT 125

Transfers to: UC/CSU

This course is intended for students desiring to complete the requirements for the Computer Information Technology degree, or professionals who want to continue developing their programming skills using an object-oriented programming language. The course will review the fundamentals of software development and cover the advanced programming skills using the C++ language. Advanced topics include classes and data abstraction, operator overloading, inheritance, virtual function and polymorphism, stream input and output, and exception handling.

Hours: 63 Lecture. 27 Lab.

CIT 127 (C-ID: COMP 122)

Python Programming I

Units: 3

Prerequisite: CIT 111

Transfers to: UC/CSU

This course is an introduction to the discipline of computer science, with a focus on the design and implementation of algorithms to solve simple problems using Python. Topics include fundamental programming constructs, problem-solving strategies, debugging techniques, declaration models, and an overview of procedural and object-oriented programming languages. Students learn to design, implement, test, and debug algorithms using pseudocode and Python.

Hours: 45 Lecture. 27 Lab.

CIT 128 (C-ID: COMP 132)

Python Programming II

Units: 3

Prerequisite: CIT 127

Transfers to: UC/CSU

This software engineering course focuses on the application of software engineering techniques for the design and development of large programs using Python. In the course, students learn to design, implement, test, and debug programs. Topics include object-oriented programming, data abstraction, data structures and their associated algorithms, and recursion.

Hours: 45 Lecture. 27 Lab.

CIT 130

Windows Configuration

Units: 3

Advisory: CIT 180

Transfers to: CSU

This course is designed for students preparing to take the Windows client operating system certification exam. Students will learn to install, upgrade and migrate from previous to the current Windows client operating system and deploy Windows using system images and configure virtual hard disks. Students will also learn to configure hardware & applications, network connectivity, access to resources, mobile computing, backup and recovery, and monitoring and maintaining systems that run Windows.

Hours: 45 Lecture. 27 Lab.

CIT 131

Windows Server Active Directory

Units: 3

Advisory: CIT 130

Transfers to: CSU

This course is designed for students preparing to take the Windows Server Active Directory, Configuring certification exam. Students will learn to configure Domain Name System, Active Directory infrastructure, Active Directory Roles & Services, creating and maintaining Active Directory objects, maintaining the Active Directory environment, and configure Active Directory Certificate Services.

Hours: 45 Lecture. 27 Lab.

CIT 133

Windows Server Applications Infrastructure

Units: 3

Advisory: CIT 130

Transfers to: CSU

This course is designed for students preparing to take the Windows Server Applications Infrastructure certification exam. Students will learn to deploy servers, configure remote desktop services, configure web services infrastructure, and configure network application services.

Hours: 45 Lecture. 27 Lab.

CIT 135

Introduction to Java Programming

Units: 4

Advisory: CIT 101, CIT 111

Transfers to: UC/CSU

This course is intended for students who want to complete the requirements for the Computer Information Technology degree, or professionals who want an introduction to Java programming. The course will cover the fundamentals of software development using the most popular open source language (Java). Course topics include program design, algorithms, writing and testing source code, arithmetic/logic expressions, control structures, objects, and basic Java structures.

Hours: 63 Lecture. 27 Lab.

CIT 136

Advanced Java Programming

Units: 4

Prerequisite: CIT 135

Transfers to: UC/CSU

This course is for students who want to complete the requirements for the Computer Information Technology degree, or professionals who want to continue developing their programming skills using Java. The course covers the basics of the software development and the advanced programming skills using the Java language. Topics include Java data syntax, data structure, applets, graphics, animation, inheritance, abstract Windows toolkit, exception handling, file input and output, and multithreading.

Hours: 63 Lecture. 27 Lab.

CIT 139

Linux I

Units: 3

Prerequisite: CIT 101 or CIT 114

Transfers to: CSU

This course provides a skills foundation for students pursuing a career as Linux system administrators. The course prepares students for the Red Hat System Administration I (RH124) certificate. Students must complete this course if they wish to pursue the Red Hat System Administration II (RH134) certificate.

Hours: 45 Lecture. 27 Lab.

CIT 140

Linux II

Units: 3

Prerequisite: CIT 139

Transfers to: CSU

This course provides skills that build on the skills learned in Linux I. It prepares students for the Red Hat System Administrator II (RH134) certificate. RH134 focuses on the key tasks needed to become a full time Linux administrator.

Hours: 45 Lecture. 27 Lab.

CIT 155

Introduction to E-Commerce

Units: 3

It is advised that students have a knowledge of elementary algebra concepts.

Advisory: CIT 101

Transfers to: CSU

This course provides a hands-on, problem-solving approach to learning both basic and more advanced aspects of doing business on the Internet. Students learn how to use electronic commerce effectively, including selling and marketing on the Internet, developing business-to-business online strategies, using online auctions, identifying the hardware and software required to support security for e-commerce, selecting electronic payment systems, and planning for e-commerce. Additionally, students learn how and why e-commerce is an important part of our economy and society.

Hours: 54 Lecture.

CIT 160

Introduction to Operating Systems

Units: 3

Prerequisite: CIT 101

Transfers to: CSU

This course provides an introduction to the operating systems used in modern business infrastructures, including Windows® (desktop and server), Unix®, Linux®, and Mac OS X. Students are introduced to how these systems are used in industry, desktop virtualization, networking basics, and information related to how to create mixed operating system environments.

Hours: 45 Lecture. 27 Lab.

CIT 170 (C-ID: ITIS 155)

Server +

Units: 3

Prerequisite: CIT 101

Transfers to: CSU

This course provides students with the knowledge and skills required to build, maintain, troubleshoot and support server hardware and software technologies. Students can identify environmental issues; understand and comply with disaster recovery and physical / software security procedures; understand industry terminology and concepts; understand server roles / specializations and interaction within the overall computing environment. This course prepares students for the current version of CompTIA's Server+ certification exam.

Hours: 45 Lecture. 27 Lab.

CIT 171 (C-ID: ITIS 150)

Network +

Units: 3

Prerequisite: CIT 101 or CIT 114

Transfers to: CSU

This course provides an overview of the architecture, structure, functions, components, and models of the Internet and other computer networks. The principles and structure of Internet protocol (IP) addressing and the fundamentals of ethernet, media, and operations concepts are introduced to provide a foundation for further study of computer networks. The Open Systems Interconnection (OSI) and Transmission Control Protocol (TCP) layered models are used to examine the nature and roles of protocols and services at the application, network, data link, and physical layers. This course prepares students for the CompTIA Network+ certification exam.
Hours: 45 Lecture. 27 Lab.

CIT 172 (C-ID: ITIS 180)
Database Essentials in Amazon Web Services

Units: 3

Prerequisite: CIT 101 or CIT 114

Transfers to: CSU

This course provides students with an introduction to core concepts in data and information management in traditional and cloud systems. The course centers around the fundamental skills of identifying organizational information requirements, modeling requirements using conceptual data modeling techniques, converting conceptual data models into relational data models, and verifying structural characteristics with normalization techniques. The course also takes up implementing and utilizing a relational database using an industrial-strength database management system in Amazon Web Services (AWS). The course covers basic database administration tasks and key concepts of data quality and data security. In addition to developing database applications, the course helps students understand how large-scale packaged systems are highly dependent on the use of database management systems (DBMS). Building on the transactional database understanding, the course provides an introduction to data and information management technologies that provide decision support capabilities under the broad business intelligence umbrella.
Hours: 45 Lecture. 27 Lab.

CIT 173
Compute Engines in Amazon Web Services

Units: 1.5

Prerequisite: CIT 114

Transfers to: CSU

This course addresses how cloud computing systems are built using a common set of core technologies, algorithms, and design principles centered around distributed systems. Students use the Amazon Web Services (AWS) management console to provision, load-balance, and scale their applications using the Elastic Compute Cloud (EC2) and the AWS Elastic Beanstalk services. From a developer perspective, the course takes up the most important reasons for using AWS and examines the underlying design principles of scalable cloud applications.
Hours: 22.5 Lecture. 13.5 Lab.

CIT 174
Security in Amazon Web Services

Units: 1.5

Prerequisite: CIT 114

Transfers to: CSU

This course focuses on protecting the confidentiality, integrity, and availability of computing systems and data. Students learn how Amazon Web Services (AWS) uses redundant and layered controls, continuously validates and tests, and utilizes automation to ensure the underlying infrastructure is continuously monitored and protected. Students examine the AWS shared responsibility model and access the AWS Management Console to learn more about security tools and features provided by the AWS platform.
Hours: 22.5 Lecture. 13.5 Lab.

CIT 175
DevOps Engineering in Amazon Web Services

Units: 3

Prerequisite: CIT 173, CIT 174

Advisory: CIT 127

Transfers to: CSU

In this course, students explore how development processes are automated and integrated with operations so that changes to software can be deployed to cloud computing environments according to developer and operations (DevOps) best practices. Students use Amazon Web Services (AWS) products to provision infrastructure and deploy code using a managed pipeline. Operations topics include initializing infrastructure as code, applying security, monitoring service health, and troubleshooting. Development topics include secure deployment practices with continuous integration and continuous delivery as they relate to the software development life cycle. Students build their skills by participating in in-class interactive lectures and hands-on lab activities, and by working on comprehensive assignments.
Hours: 45 Lecture. 27 Lab.

CIT 180 (C-ID: ITIS 110)
PC Maintenance - A+ Certification

Units: 4

Prerequisite: CIT 101

Transfers to: CSU

This course provides an introduction to the computer hardware and software skills needed to help meet the growing demand for entry-level information and communication technology (ICT) professionals. The fundamentals of computer hardware and software as well as advanced concepts such as security, networking, and the responsibilities of an ICT professional will be introduced. Preparation for the CompTIA A+ certification exams.
Hours: 54 Lecture. 54 Lab.

CIT 192 (C-ID: ITIS 160)
Security +

Units: 3

Prerequisite: CIT 171 or CIT 210

Advisory: CIT 180

Transfers to: CSU

This course is an introduction to information technology security and risk management at the organizational level. The course addresses hardware, software, processes, communications, applications, and policies and procedures with respect to organizational

cybersecurity and risk management. This course prepares students for the CompTIA Security+ certification exam, and is intended to help students meet educational requirements to qualify for entry-level information technology jobs with cybersecurity skills.
Hours: 45 Lecture. 27 Lab.

CIT 200 (C-ID: ITIS 140)
Systems Analysis and Design

Units: 3

Prerequisite: CIT 101 or CIT 114

Transfers to: CSU

The course presents a systematic methodology for analyzing a business problem or opportunity, determining what role, if any, computer-based technologies can play in addressing a business need, articulating business requirements for the technology solution, specifying alternative approaches to acquiring the technology capabilities needed to address the business requirements, and specifying the requirements for an information systems solution in particular, in-house development, development from third-party providers, or purchasing commercial-off-the-shelf packages.
Hours: 54 Lecture.

CIT 210 (C-ID: ITIS 150)
Cisco® Networking I

Units: 3

Prerequisite: CIT 101

Advisory: CIT 180

Transfers to: CSU

This course introduces the architecture, structure, functions, components, and models of the Internet and other computer networks. The principles and structure of IP (Internet Protocol) addressing and the fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for further study of computer networks. It uses the OSI (Open Systems Interconnection) and TCP (Transmission Control Protocol) layered models to examine the nature and roles of protocols and services at the application, network, data link, and physical layers. This course is the first of three courses designed to prepare CCNA (Cisco® Certified Networking Associate) Certification and helps in preparation for the CompTIA Network+ certification exam.
Hours: 45 Lecture. 27 Lab.

CIT 214 (C-ID: ITIS 151)
Cisco Networking II

Units: 3

Prerequisite: CIT 210

Advisory: CIT 180

Transfers to: CSU

This second course in the Cisco Certified Network Associate (CCNA) curriculum series focuses on switching technologies and router operations that support small-to-medium business networks, and includes wireless local area networks (WLAN) and security concepts. In addition to learning key switching and routing concepts, students perform basic network configuration and troubleshooting, identify and mitigate LAN security threats, and configure and secure a basic WLAN.
Hours: 45 Lecture. 27 Lab.

CIT 215
Cisco Networking III

Units: 3

Prerequisite: CIT 214

Transfers to: CSU

This third course in the Cisco Certified Network Associate (CCNA) curriculum series focuses on the architectures and considerations related to designing, securing, operating, and troubleshooting enterprise networks. The course covers wide area network (WAN) technologies and quality of service (QoS) mechanisms used for secure remote access; as well as the introduction of software-defined networking, virtualization, and automation concepts that support the digitalization of networks. Students acquire the skills needed to configure and troubleshoot enterprise networks, and learn to identify and protect against cybersecurity threats while being introduced to network management tools and key concepts of software-defined networking (e.g., controller-based architectures and how application programming interfaces (APIs) enable network automation). By the end of the CCNA course series, students gain practical, hands-on experience preparing them for the CCNA certification exam and career-ready skills for associate-level roles in the information and communication technologies (ICT) industry. Hours: 45 Lecture. 27 Lab.

CIT 221 (C-ID: ITIS 164)

Ethical Hacking

Units: 3

Prerequisite: CIT 171 or CIT 210, CIT 192

Transfers to: CSU

Students are introduced to technology and techniques to find weaknesses in technology so that those weaknesses can be corrected before threat actors (Black hat hackers) can abuse them. Penetration testers (White-Hat hackers) use the same techniques as Black hat hackers but are guided by ethics and professionalism and cause no harm to the systems they test. Penetration testing is also known as "ethical hacking." Penetration testing has evolved into a formalized process with best practices and certifications. People can acquire certifications to prove they have the skills to execute effective penetration tests. One such certification is the CompTIA PenTest+ certification. Hours: 45 Lecture. 27 Lab.

CIT 290

Work Experience Education/ Internship for Computer Information Technology-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of computer information technology and have completed or enrolled in the appropriate coursework. The course may be taken once

and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures. Hours: 3 Lecture. 54-216 Lab.

CIVIL DESIGN

Division of Career and Workforce Education

CIV 101

Introduction to Technical Drawing & Graphics

Same as: ARCH 101, ENGT 101

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This basic course in technical drawing and graphics is for students with no previous drafting skills or training. The course is designed for students who want to pursue training in fields and careers related to architecture, civil design, and engineering design drafting. Practical application with the tools, techniques, standards, and practices used in the industries that need technical drawings and graphics is a feature of the course. ARCH 101, CIV 101, ENGT 101 are cross-listed. Credit will be granted for one course only. Hours: 36 Lecture. 54 Lab.

CIV 140

Civil Engineering & Construction Fundamentals

Units: 4

Advisory: ARCH 101 or ARCH 101 or CIV 101 or ENGT 101 or two years of High School Drafting. It is also advised that students have a knowledge of elementary algebra and geometry concepts.

Transfers to: CSU

This course provides an overview of various civil engineering subdisciplines, including common tasks required of civil engineers and their support staff for the design and construction of projects. Students complete basic level engineering calculations and use hand drafting techniques or computer aided design and drafting (CADD) software to complete projects relating to subdivision development, roadway planning and layout, structural design and detailing, site grading, project scheduling, wastewater management, and similar engineering tasks. Students are also introduced to future trends in construction technology, and explore building information modeling (BIM) and virtual design and construction (VDC) technologies and their impact. Hours: 54 Lecture. 54 Lab.

CIV 142

Introduction to Land Surveying and GPS

Units: 4

Advisory: CIT 102 - It is also advised that students have a knowledge of elementary algebra and geometry concepts

Transfers to: CSU

This course is for students interested in the career fields of civil design drafting, surveying/mapping, and civil engineering. It covers the principles and practices of land

surveying, including measuring distance, direction, elevation and position; topographic mapping; and the use and care of surveying equipment. The fundamentals of global positioning systems (GPS) and their applications in land surveying will also be introduced. This course will also be beneficial for practitioners in the construction industry who need to acquire property data. Hours: 54 Lecture. 54 Lab.

CIV 143

Applications to Surveying and GPS

Units: 4

Prerequisite: CIV 142

Transfers to: CSU

This course is for students who have a basic understanding of surveying and are interested in pursuing a career in the field of land surveying. The course presents advanced applications that will cover the theory and practice of plane surveying, including principles of position, horizontal and vertical curves, construction staking, alignments, field procedures, the U.S. Public Land Survey System, boundary surveying, and the use and care of surveying equipment. Hours: 54 Lecture. 54 Lab.

CIV 210

Concrete Technology and Testing

Units: 2

Advisory: CIV 140 or industry experience

Transfers to: CSU

This course is an introduction to the use of concrete as a common construction material. The course is intended for students who intend to pursue careers in construction and/or wish to progress into construction management as a sub-discipline of civil engineering. Topics include the components, physical properties, mix design, quality control, and placing and testing of concrete. The course includes classroom lectures and assignments as well as lab projects with direct experience in working with and testing concrete. Hours: 18 Lecture. 54 Lab.

CIV 241

Civil Engineering Drafting and Design

Units: 3

Prerequisite: CIV 140, ENGT 150 or ENGT 170

Transfers to: CSU

This intermediate-level course is for students interested in the career field of civil design drafting and civil engineering. In the course the practice and preparation of drawings pertaining to the civil engineering field will be expanded to include the development of maps and drawings used for site development, grading and drainage, and road alignment. Preparing construction documents for buildings and related constructs will also be covered. Other topics include project notes, specifications, and details for civil engineering drawings. Students will use both hand drafting and computer-aided design and drafting (CADD) to complete projects related to these topics. Hours: 36 Lecture. 54 Lab.

CIV 245

Civil Engineering Design and Modeling

Units: 3

Prerequisite: CIV 140, ENGT 150 or ENGT 170

Prerequisite/Corequisite: CIV 241

Transfers to: CSU

This advanced-level course is for students interested in the career fields of civil engineering design drafting and civil engineering, and takes up the design, analysis, and preparation of drawings used in the civil engineering field. Students will use civil engineering software such as Bentley's OpenRoads or Autodesk's Civil 3D to complete projects relating to transportation and site development, including grading, drainage, and road alignment plans and details. Specific areas of focus include the use of software for terrain modeling and editing, surfaces, profiles, cross-sections, earthwork computations, and site planning design. Hours: 36 Lecture. 54 Lab.

CIV 290

Work Experience Education/Internship for Civil-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the fields of civil design drafting and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures. Hours: 3 Lecture. 54-216 Lab.

CIV 299

Directed Study in Civil Design Technology

Units: 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress

throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.

Hours: 6-18 Lecture. 48-144 Lab.

CORRECTIONS

Division of Administration of Justice and Fire Technology

CORR 060

Corrections Basic Academy

Units: 23

Enrollment is restricted to sworn cadets employed by California Department of Corrections and Rehabilitation

This course is designed for the California Department of Corrections and Rehabilitation (CDCR) cadet who has successfully passed and completed the employment requirements established for a position as a state correctional officer. This course covers relevant topics required by the Commission of Correctional Peace Officer Standards and Training (CPOST) per California Penal Code Sections 13600 through 13603.

Hours: 364 Lecture. 156 Lab.

CORR 101 (C-ID: AJ 200)

Introduction to Corrections

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides students with an overview of the history and trends of adult and juvenile corrections. It focuses on probation, parole, legal issues, specific laws and the general operation of correctional institutions. The relationship between corrections and other components of the justice system is also examined. This course has been identified by the Correctional Peace Officer Standards and Training (CPOST) Board of the Peace Officers Association as fulfilling the educational requirements of the CPOST Certificate for newly-hired officers after July 1, 1995 by the California Department of Corrections and Rehabilitation (CDCR) and California Youth Authority (CYA). Hours: 54 Lecture.

CORR 104

Control and Supervision in Corrections

Units: 3

Advisory: CORR 101

Transfers to: CSU

This course provides students with an overview of supervision of inmates in local, state, and federal correctional institutions. The issues of control in a continuum form of institutional daily living through crisis situations are introduced and discussed. The course emphasizes the role played by the offender and the correctional worker. Topics include inmate subculture, violence and the effects of crowding on inmates and staff, and coping techniques for correctional officers in a hostile prison environment. The causes and effects of abusive tactics are also discussed. This course has been identified by the Correctional Peace Officer Standards and

Training (CPOST) Board of the California Department of Corrections and Rehabilitation (CDCR), California Youth Authority (CYA), and California Correctional Peace Officers Association as fulfilling the educational requirements of the CPOST Certificate for newly-hired officers after July 1, 1995 by CDCR and CYA.

Hours: 54 Lecture.

CORR 106

Legal Aspects of Corrections

Units: 3

Advisory: CORR 101

Transfers to: CSU

This course provides students with an awareness of the historical framework, concepts, and precedents that guide correctional practice. Course material broadens students' perspectives of the corrections environment, civil rights of prisoners, and responsibilities and liabilities of corrections officials. The course has been identified by the Correctional Peace Officer Standards and Training (CPOST) Board of the California Department of Corrections and Rehabilitation (CDCR), California Youth Authority (CYA), and California Correctional Peace Officers Association as fulfilling the educational requirements of the CPOST Certificate for newly hired officers after July 1, 1995 by CDC and CYA.

Hours: 54 Lecture.

CORR 134

Introduction to Interviewing and Counseling Skills for Correctional Officers

Units: 3

Advisory: CORR 101

Transfers to: CSU

This course provides students with an introduction to and overview of the interviewing techniques and counseling skills employed by correctional officers. An overview of the interviewing and counseling techniques used by entry-level practitioners in a correctional setting is provided. Emphasis is placed on the development of positive relationships between the inmate client and support personnel.

Hours: 54 Lecture.

CORR 190

Public Safety Communications

Units: 3

Advisory: AJ 101

Transfers to: CSU

This course is designed to provide California peace officers or other interested students with an in-depth understanding of public safety communication in the correctional field. Topics include techniques of effectively communicating information in a clear and logical manner for public safety reports. Students gain practical experience in interviewing, note taking, report writing, and testifying.

Hours: 54 Lecture.

CORR 208

Leadership in Corrections

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides students with an overview of the skills needed to be an

effective leader in a correctional setting. Topics addressed include the unique challenges faced by executives managing in prison settings, approaches to ensuring the creation and maintenance of a safe prison environment, and techniques for personnel development.
Hours: 54 Lecture.

CORR 209

Case Load Management

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course introduces students to effective caseload management in a correctional setting. Topics include the laws, policies, and bargaining units that govern caseload management. Specialized supervision issues, such as offenders with psychological problems and second strike offenders, are also addressed.

Hours: 54 Lecture.

CORR 210

Supervision in Public Safety

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides students with an overview of the characteristics of an effective supervisor in a correctional setting. Topics include basic supervisory responsibilities, the importance of effective interpersonal communications, and managing personnel complaints in a prison setting.

Hours: 54 Lecture.

CORR 235

Conflict Resolution for the Correctional Officer

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides students with an understanding of the types of conflict situations that may be encountered while working in a correctional facility. The following topics may be discussed as they pertain to the correctional experience: anxiety, fear, frustration, hostility, aggression, motivation and manipulation roles, racial and cultural segregation, crowd and mob interaction, alcohol, drugs, sexual problems, character, neurotic and psychotic disorders, youthful offenders, stress of incarceration, and brain disorders.

Hours: 54 Lecture.

CORR 264

Inmate Discipline in Corrections

Units: 3

Advisory: AJ 101

Transfers to: CSU

This course provides students with an overview of the correctional process of inmate discipline. Topics covered include due process, disciplinary process, disciplinary reports, findings, and disposition. The curriculum covered is recommended by the California Commission on Peace Officer Standards and Training (POST).

Hours: 54 Lecture.

CORR 265

Supervision of Sex Offenders

Units: 3

Advisory: AJ 101

Transfers to: CSU

This course is designed to teach California peace officers or other interested students about the correctional process of supervising inmates who have been convicted of sex offenses. Topics include human sexuality and dysfunctions, theories of sexual offense, offender typologies, and supervision techniques. The curriculum follows recommendations from the California Commission on Peace Officer Standards and Training (POST) and the California Commission on Correctional Peace Officer Standards and Training (CPOST).

Hours: 54 Lecture.

COUNSELING

Division of Counseling and Student Development

COUN 100

Introduction to College Survival

Units: 1.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is intended for special populations (e.g., student athletes) and special programs (e.g., the Summer Scholars Transfer Institute). The course helps students develop knowledge and skills to move successfully through the community college system and transition and acculturate into a four-year institution. Students learn and apply information about education terminology, community college transfer requirements, and the skills necessary for completing a bachelor's degree or higher. Students also learn about academic, social, and cultural integration for retention in higher education through knowledge of college requirements, policies and procedures, campus support services, and self-management.

Hours: 27 Lecture.

COUN 101

College and Life Success

Same as: EDEV 101

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 3 units credit for all COUN/EDEV courses.

This course provides an exploration of cognitive, psychological, social, and physical factors influencing success in college and in life. Topics include personal responsibility, critical thinking, motivation, self-efficacy, personal awareness, lifelong learning, self-management, health and wellness, interpersonal communication in a diverse world, and introductory career and educational planning. Students learn about the purpose, demands, and requirements of higher education, as well as student support

services, at both Rio Hondo College and four-year institutions.

Hours: 54 Lecture.

COUN 102

Introduction to the Transfer Process

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 3 units for all COUN/EDEV courses.

This course is designed to develop and enhance decision-making strategies for students interested in transferring to a four-year institution. Students develop critical thinking skills by identifying, comparing, and analyzing the differences in universities' entrance and major requirements as related to their educational and career goals. Students examine the requirements of universities and complete a comprehensive educational plan. On-site research/field study at universities is required.

Hours: 36 Lecture.

COUN 103

Introduction to Student Leadership Development

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 3 units credit for all COUN/EDEV courses.

This course focuses on building students' leadership potential. It examines foundational leadership theories and their application in student government and organizations. Students develop their own personal leadership philosophy that includes an understanding of self, other, and community. Topics covered include leadership theories, characteristics and competencies, ethics, diversity in leadership, decision making, program development, parliamentary procedure, and team building.

Hours: 54 Lecture.

COUN 104

Stress and Anxiety Management for Emotional Well-Being

Units: 3

It is advised that students be able to engage in written composition at the college level.

Transfers to: CSU

This course is designed to increase students' awareness of the effects of stress and anxiety on academic performance and daily life. Topics include the impact of stress on behavioral, cognitive, physical, and social-emotional well-being. Emphasis is placed on understanding effective and ineffective responses to stress and anxiety, planning a personal stress and anxiety management program, and having students explore and develop a variety of practical coping skills and management techniques.

Hours: 54 Lecture.

COUN 105

Orientation and Education Planning

Units: 0.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for first-time college students as well as students who have not yet developed an individual education plan. Students are oriented to Rio Hondo College policies and procedures, learning about certificate/degree options within the higher education system and the graduation/transfer requirements within these systems. The course culminates in the development of an individual education plan based on each student's specific academic goals. This course is offered on a pass/no pass basis.
Hours: 9 Lecture.

COUN 151

Career Exploration and Life Planning

Same as: EDEV 151

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 3 units credit for all COUN/EDEV courses.

This course will examine student, career, and self-development theories to empower students to make effective decisions throughout their lifespan by engaging in the process of career and life planning from a psychological, sociological, and physiological perspective. Students will compare and contrast human development and career theories, decision-making processes, and factors that contribute to college success, life skills, adult workplace competencies, values, interests, abilities, and personality. Labor market trends in a global economy and successful job search and workplace behaviors will also be examined.
Hours: 54 Lecture.

COUN 290

Work Experience Education/Internship for Student Services-Related Fields

Units: 1-4

Advisory: It is advised that students be able to engage in written composition at the college level and read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of student services and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.
Hours: 3 Lecture. 54-216 Lab.

COUN 299

Directed Study in Counseling

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations, with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take Directed Study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.
Hours: 54-162 Lab.

COMPUTER SCIENCE

Division of Arts, Business, & Cultural Programs

CS 142 (C-ID: COMP 142)

Computer Architecture and Organization

Units: 3

Prerequisite: CIT 127

Transfers to: UC/CSU

Students are introduced to the organization and behavior of real computer systems at the assembly-language level. The mapping of statements and constructs in a high-level language onto sequences of machine instructions is studied, as well as the internal representation of simple data types and structures. Numerical computation is examined, noting the various data representation errors and potential procedural errors.
Hours: 54 Lecture.

CS 152 (C-ID: COMP 152)

Discrete Structures

Units: 3

Prerequisite: CIT 127

Transfers to: UC/CSU

This course is an introduction to the discrete structures used in Computer Science with an emphasis on their applications. Topics covered include: Functions, Relations and Sets; Basic Logic; Proof Techniques; Basics of Counting; Graphs and Trees; and Discrete Probability.
Hours: 54 Lecture.

DANCE

Division of Arts, Business, & Cultural Programs

Dance activity courses may be used in place of Kinesiology (formerly P.E.) activity courses to fulfill degree requirements.

DANC 114

Conditioning and Alignment

Same as: KINA 114

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed to provide the physical training and preparation for students interested in dance, Yoga, Pilates, and athletics, and is suitable for students seeking to move with greater efficiency and less pain in everyday activities. Students learn how to move safely and effectively while developing strength, flexibility, proper alignment, agility, balance, and coordination. Coursework is designed for those who want to work at a more deliberate pace and in a non-competitive atmosphere, or who are recovering from prior injury.
Hours: 54 Lab.

DANC 142

Dance Improvisation I

Units: 2

Advisory: DANC 151

Transfers to: UC/CSU - UC Credit limit. The UC will grant a maximum of 4 units credit for PE activity courses

This dance studio course explores the theory and practice of dance improvisation in solo and group form. Utilizing techniques of improvisation across cultural traditions in dance, students experiment with sensory stimuli, modes of self-expression, composing in the moment, music visualization, and contact improvisation for performance. The course explores the practical use of improvisation in expressing imagery, developing choreographic concepts, and enhancing performance. Although the course supports dance majors and those seeking careers in dance and choreography, students of all abilities and backgrounds are welcome. No formal dance experience is required.
Hours: 18 Lecture. 54 Lab.

DANC 150

Introduction to World Dance

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units for PE activity courses.

This course offers dance and non-dance students alike an opportunity to study cultural diversity through the activity of dance. Students learn how to analyze and perform basic movement patterns as they compare and contrast the social conventions, religious

traditions, and historic contexts represented in the dance practices from different parts of the world performed in the United States today.

Hours: 54 Lab.

DANC 151 Modern Dance I

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This studio course offers beginning modern dancers an introduction to the fundamental principles of modern dance. The course emphasizes an awareness of breath and gravity, skeletal alignment, and core strength; and investigates kinesthetic and spatial awareness. Modern dance technique, improvisational exercises, and choreographic phrases provide physical, mental, and creative exploration for beginner students, students preparing for transfer, and students seeking careers in dance. This course is a requirement for the Associate of Arts Degree in Dance and the Certificate of Achievement in Dance. The course may be taken once and repeated three times for credit.

Hours: 54 Lab.

DANC 152 Dance Rehearsal and Performance

Units: 3

Corequisite: DANC 180

Advisory: DANC 151

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This introductory course provides experience and laboratory exploration in all aspects of dance rehearsal performance for beginner level students. Students have the opportunity to perform in an evening-length dance concert, work with faculty choreographers and guest artists, and participate as a member of a touring dance ensemble. Students contribute as dancers and rehearsal assistants under the supervision and guidance of faculty choreographers. Productions will be presented for public performance on and off campus.

Hours: 18 Lecture. 108 Lab.

DANC 153 Ballet I

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This introductory course is designed for students who seek technical skill in classical ballet. The course will focus on functional body alignment and placement, traditional steps and combinations, musicality, ballet terminology, and the development of strength and flexibility. Students also gain knowledge of classical and contemporary ballet history. This course may be taken once and repeated three times for credit.

Hours: 54 Lab.

DANC 154

Jazz Dance I

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units for PE activity courses.

This course is designed to introduce beginning students to the fundamental physical skills, polyrhythms, terminology, and historical context that form the basis of jazz dance technique. Highly visible on stage and screen, jazz dance is an eclectic and versatile contemporary art form with deep roots in African-American music and dance. A variety of jazz dance styles are introduced, and may include tap, musical theater, contemporary lyrical, pop, funk, hip-hop, Lindy Hop, and other African-American, Latin, Cuban, and Afro-Caribbean social dances that form the basis of this dance genre in the United States. This course may be taken once and repeated three times for credit.

Hours: 54 Lab.

DANC 157 Hip-Hop Dance

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

In this course, students learn various forms of beginning hip-hop dance, including hip-hop funk, with an emphasis on body isolations, syncopations, and rhythms. The course explores the use of space, energy, rhythm, movement dynamics, and improvisation while emphasizing body control, alignment, balance, and use of weight changes. A basic history of hip-hop culture and music is discussed. The course fulfills an elective for the Associate of Art Degree in Dance, and is appropriate for students seeking careers in dance, looking to expand their dance skills, or wanting a dance-based aerobic workout.

Hours: 54 Lab.

DANC 159 Choreography I

Units: 3

Advisory: DANC 151

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units for PE activity courses.

This introductory course focuses on the art and craft of dance composition. Through lecture and activity, students learn how to incorporate the elements of dance in order to create meaningful dance works. Basic elements of choreography—including form, design, motivation, phrasing, gesture, rhythm, dynamics, musical accompaniment, and production basics—are explored through improvisational exercises and experimentation. Additionally, students learn to analyze dance critically through Laban movement analysis (LMA). The class culminates in the presentation of student choreography.

Hours: 36 Lecture. 54 Lab.

DANC 162 Dance Production

Units: 3

Corequisite: DANC 180

Advisory: DANC 151, DANC 159, DANC 251

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This introductory course focuses on the technical aspects of dance production and is designed for beginner-level dance students. Topics of exploration include basic staging, costume design, set design, make-up, lighting, sound production, and publicity. Productions are presented for public performance on and/or off campus.

Hours: 18 Lecture. 108 Lab.

DANC 167 Latin Dance for Fitness

Same as: KINA 167

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course combines dance, Latin and Funk rhythms, and aerobic elements to provide a fun, upbeat, cardiovascular workout. Students constantly move to various genres of Latin music utilizing various tempos. Salsa, Cha-Cha, Tango, Mambo, Latin Jazz, and Hip-Hop rhythms are incorporated in instruction, and by which students build stamina while increasing cardiovascular fitness. This course is designed to help students develop aerobic capacity, coordination, balance, rhythmic awareness, and flexibility. This class also includes exercises to build abdominal strength, lower body strength, and upper body strength. Classes may incorporate sections with small handheld weights, exercise bands, and/or other fitness props to further develop strength and endurance. Students build a foundation for a personalized exercise and fitness program that can be continued after the course has ended.

Hours: 54 Lab.

DANC 168 Latin Social Dance

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This movement exploration course covers various types of beginning club and American-style Latin dance forms including salsa, cha-cha, samba, rumba, merengue, bachata, and bolero. Students develop dance skills including proper alignment, balance, body awareness, and rhythmic coordination through individual and partner work. Students also learn proper lead and follow techniques, dance partner etiquette, and communication. The course is designed for students interested in the social aspects of dance, seeking experience in partnering work, pursuing careers in dance, or seeking the AA in Dance and/or the Certificate of Achievement in Dance.

Hours: 54 Lab.

DANC 172 Dance Repertory

Units: 3

Corequisite: DANC 180

Advisory: DANC 151

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units for PE activity courses.

This course provides dance students the opportunity to rehearse and perform choreographic works based on existing dance repertoire created by well-known and established choreographers, faculty, and/or guest artists. Students will learn how to analyze movement using basic elements of Laban Movement Analysis in preparation for stage. They will also experience different methods of reconstructing existing repertoire and gain knowledge about the historical significance of the repertoire explored. Productions will be presented for public performance either on and/or off campus. Hours: 18 Lecture. 108 Lab.

DANC 179

Dance History

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: DANC 179 or DANC 179H. This survey course investigates the forces which and figures who have shaped dance through history. Through readings, films, research, and class discussions, students study dance forms from ancient to contemporary times, paying particular attention to Western concert dance. Comparisons of various dance techniques, theories, and personalities are conducted through dance movement analysis. This course is designed for students seeking to broaden their understanding of dance while fulfilling their general education arts requirement, and for dance majors pursuing an Associate of Arts Degree in Dance or Certificate of Achievement in Dance. Hours: 54 Lecture.

DANC 179H

Dance History Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: DANC 179 or DANC 179H. This survey course investigates the forces which and figures who have shaped dance through history. Through readings, films, research, and class discussions, students study dance forms from ancient to contemporary times, paying particular attention to Western concert dance. Comparisons of various dance techniques, theories, and personalities are conducted through dance movement analysis. This course is designed for students seeking to broaden their understanding of dance while fulfilling their general education arts requirement, and for dance majors pursuing an Associate of Arts Degree in Dance or Certificate of Achievement in Dance. The course is intended for students who meet Honors Program requirements. Hours: 54 Lecture.

DANC 180

Performance

Units: 1

Corequisite: DANC 152 or DANC 152 or DANC 152 or DANC 162 or DANC 162 or DANC 172 or DANC 182

Advisory: DANC 151, DANC 159, DANC 251

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit PE activity courses.

This course provides dance students the opportunity to participate in dance productions. Productions will be presented for public performance either on or off campus. Students will learn how to adjust a performance for presentation on a stage. Pre-performance and post-performance responsibilities will be outlined. In addition, students will be exposed to basic stage direction and techniques for overcoming stage fright. This course may be repeated for a maximum of 4 units in different semesters. Hours: 54 Lab.

DANC 182

Dance Ensemble

Units: 3

Corequisite: DANC 180

Advisory: DANC 151, DANC 159

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course provides an opportunity for dance students to develop and practice dance ensemble skills necessary to rehearse for and produce a professional dance performance. Modes of collaboration, basic ensemble skills used in the field of dance, rehearsal techniques, and the process of rehearsing and producing collaboratively are covered. Productions are presented for public performance on and/or off campus. Hours: 18 Lecture. 108 Lab.

DANC 199

Dance Appreciation

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: DANC 199 or DANC 199H. This survey course is a multicultural exploration of one of the world's oldest and most universal art forms. Dance is analyzed in terms of body, effort, space, and shape; and examined to determine cultural, social, and political influences. In addition, the history of dance techniques and dance genres are investigated through lecture, film, and performance. This course is designed for students seeking to broaden their understanding of dance while fulfilling their general education arts requirement, and for dance majors pursuing an Associate of Arts Degree in Dance or Certificate of Achievement in Dance. Hours: 54 Lecture.

DANC 199H

Dance Appreciation Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: DANC 199 or DANC 199H. This survey course is a multicultural exploration of one of the world's oldest and most universal art forms. Dance is analyzed in terms of body, effort, space, and shape; and examined to determine cultural, social, and political influences. In addition, the history of dance techniques and dance genres are investigated through lecture, film, and performance. This course is designed for students seeking to broaden their understanding of dance while fulfilling their general education arts requirement, and for dance majors pursuing an Associate of Arts Degree in Dance or Certificate of Achievement in Dance. The course is intended for students who meet Honors Program requirements. Hours: 54 Lecture.

DANC 251

Modern Dance II

Units: 1

Prerequisite: DANC 151

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This studio course offers intermediate modern dancers an opportunity to deepen and strengthen fundamental skills acquired in Modern Dance I. While continuing to develop proper alignment and modern dance technique, the intermediate student learns to perform combinations while shifting spatial orientation and integrating improvisation as required in auditions. Learning to create movement phrases, students develop a sense of artistry and dynamic phrasing necessary for performing. Furthering their understanding of and ability to identify the underlying movement principles of modern dance, students hone their technical skills in preparation for transfer or careers in dance. This course is a requirement for the Associate of Arts Degree in Dance and Certificate of Achievement in Dance. This course may be taken once and repeated three times for credit. Hours: 54 Lab.

DANC 253

Ballet II

Units: 1

Prerequisite: DANC 153

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This intermediate-level course is designed for students who want to further develop technical and performance skills acquired in Ballet I. The class includes more advanced technique work at the barre, across the floor, and in-center floor combinations. Complex adagio and allegro dance sequences are also introduced. Students have the opportunity to perform in an informal showing or concert setting. This course may be taken once and repeated three times for credit. Hours: 54 Lab.

DANC 254

Jazz Dance II

Units: 1

Prerequisite: DANC 154

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This intermediate-level course is designed for students who wish to further develop the technical and performance skills acquired in Jazz Dance I. The social histories and cultural contexts of jazz dance are emphasized through lectures, readings, and observations of professional dance concerts, musical theater, and contemporary dance in the film, television, and music video industries. Students also have the opportunity to perform in an informal showing or concert setting.

Hours: 54 Lab.

DANC 257

Hip-Hop Dance II

Units: 1

Prerequisite: DANC 157

Transfers to: UC/CSU - UC Credit limit. The UC will grant a maximum of 4 units credit for PE activity courses

In this course, students learn various forms of intermediate hip-hop dance, including pop and lock, hip-hop funk, syncopations, and rhythms. The class explores the use of space, energy, rhythm, and improvisation while emphasizing body control, alignment, balance, and use of weight changes. The history of hip-hop culture is discussed. The course is appropriate for students seeking careers in dance, looking to expand their dance skills, and/or wanting a dance-based aerobic workout. This course may be taken once and repeated 3 times for credit. Hours: 54 Lab.

DATA SCIENCE

Division of Mathematics, Sciences, and Engineering

DSCI 100

Foundations of Data Science

Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an intermediate algebra course.

Advisory: ENGL 101, READ 101

Transfers to: CSU

This course introduces basic programming and statistical concepts, including programming for data cleansing, manipulation, visualization, and statistical computation for intelligence gathering. Students apply common built-in language functions for analysis of real-world datasets, including global and local economic data, commercial business, document collections, and social networks. This course also delves into machine learning and data-driven decision-making using statistical concepts like hypothesis testing, confidence intervals via bootstrapping, regression and inference for regression, and predictive modeling. In the course, students also learn about social issues surrounding data privacy and ownership. Hours: 72 Lecture.

DSCI 101

Statistics for Data Science

Units: 4

Prerequisite: DSCI 100

Transfers to: CSU

This course is an introduction to descriptive and inferential statistics, emphasizing the combined use of mathematics and programming for data science applications. The course provides hands-on experience with data analysis using modern statistical software, including the interpretation of statistical findings. Topics include numerical and graphical summarization of central tendency and spread, probability, normal, and binomial distributions. This course also addresses sampling distributions, t-distribution, the chi-squared distribution, estimation, hypothesis testing, and analysis of variance with linear and multiple regression. Students work with big data and complete a research project employing simple statistical inference and advanced modeling techniques. Hours: 72 Lecture.

ECONOMICS

Division of Behavioral and Social Sciences

ECON 101 (C-ID: ECON 202)

Principles of Macroeconomics

Units: 3

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an elementary algebra course. It is also advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: ECON 101 or ECON 101H. This introductory course has students learn to analyze and describe the performance and policies of national economic systems, with particular emphasis on the U.S. economy. The course is intended for economics or business majors and also satisfies General Education (GE) requirements. Topics include production possibilities and tradeoffs; comparative economic systems; the functions of government; national income and employment; business cycles; money and banking; monetary and fiscal policy; comparative advantage and trade policy; economic growth and stability; and income distribution and poverty. Hours: 54 Lecture.

ECON 101H (C-ID: ECON 202)

Principles of Macroeconomics Honors

Units: 3

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an intermediate algebra course. It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: ECON 101 or ECON 101H. This introductory course has students learn to analyze and describe the performance and policies of national economic systems, with particular emphasis on the U.S. economy. The course is intended for economics or business

majors and also satisfies General Education (GE) requirements. Topics include production possibilities and tradeoffs; comparative economic systems; the functions of government; national income and employment; business cycles; money and banking; monetary and fiscal policy; comparative advantage and trade policy; economic growth and stability; and income distribution and poverty. This course is intended for students who meet Honors Program requirements. Hours: 54 Lecture.

ECON 102 (C-ID: ECON 201)

Principles of Microeconomics

Units: 3

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an elementary algebra course. It is also advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: ECON 102 or ECON 102H. This introductory course in economic analysis of markets has students learn how markets work to coordinate consumers and producers, the various causes of the failure of free markets, and policies used to correct or regulate market behavior. The course is intended for economics and business majors as well as to satisfy General Education (GE) requirements, and may be taken prior to ECON 101. Hours: 54 Lecture.

ECON 102H (C-ID: ECON 201)

Principles of Microeconomics Honors

Units: 3

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an intermediate algebra course. It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: ECON 102 or ECON 102H. This introductory course in economic analysis of markets has students learn how markets work to coordinate consumers and producers, the various causes of the failure of free markets, and policies used to correct or regulate market behavior. Students complete a research project on an actual economic policy or a theoretical view. The course is intended for economics and business majors as well as to satisfy General Education (GE) requirements, and may be taken prior to ECON 101 by any student who has completed ENGL 101 with a "C" or better. This course is intended for students who meet Honors Program requirements. Hours: 54 Lecture.

ECON 135

International Political Economy

Same as: POLS 135

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This is an introductory course designed for students interested in economics and political science, as well as anyone interested in the global interconnectedness of the world economy. The course focuses on the relations between the political and economic systems within the global economy. The course covers the impact of political decisions on world economies and international organizations. Further emphasis is placed on a comparison-contrast of various national economies. Geographic areas of concern include Africa, Europe, the Pacific Rim, the Middle East, Latin America, Russia, China, and the United States. The course is cross-listed as Economics 135 and Political Science 135. Credit is given in either area, not both.
Hours: 54 Lecture.

EDUCATION

Division of Behavioral and Social Sciences

ED 110 (C-ID: EDUC 200)

Introduction to Teaching

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed to introduce students to the profession of teaching through lecture and observation of K–12 classrooms and public schools. The major aspects of the teaching profession and the diversity of the public school system are examined and discussed, and students gain experience in all three levels of the K–12 system. This course is intended for students considering a career in teaching; 45 hours of structured fieldwork is required.

Hours: 54 Lecture.

EDUCATIONAL DEVELOPMENT

Division of Disabled Students Programs and Services

EDEV 021

Literacy Skills II

Units: 3

Corequisite: EDEV 021L

Advisory: READ 012 or VOCB 025 or appropriate skill level demonstrated through multiple measures or appropriate placement
This course is designed primarily for students with disabilities who need to improve basic reading skills such as dictionary usage, vocabulary development, and reading comprehension. Students practice specific learning strategies needed to compensate for diverse learning styles or deficits. This is a non-degree-applicable course and is offered on a pass/no pass basis. All students are required to be enrolled in the one-unit reading lab, EDEV 021L, at the same time they take this course.

Hours: 54 Lecture.

EDEV 021L

Literacy Skills II Lab

Units: 0.5

Corequisite: EDEV 021

This skills course is designed for students with learning disabilities who need to improve reading comprehension and vocabulary through individually prescribed lab work. Students complete reading tasks designed to complement the activities of their reading course. All students are required to be enrolled in EDEV 021, Literacy Skills II, at the same time they take this course. This is a non-degree-applicable course and is offered on a pass/no pass basis.

Hours: 27 Lab.

EDEV 024

Assessment for Learning Disabilities

Units: 0.5

Enrollment requires appropriate placement through the Learning Disabilities Assessment Process

This course provides intensive diagnostic learning assessment for students with learning disabilities. A profile will be developed through cognitive and achievement assessment which will emphasize specific academic and learning modality strengths and weaknesses. Students will develop a Student Education Contract to help them improve in reading, writing, spelling, computation, and learning skills as well as plan for future educational support. Recommended for all students who suspect they may have a learning disability. This is a non-degree credit course.

Hours: 27 Lab.

EDEV 025A

Adaptive Computer Technology A

Units: 1

Advisory: EDEV 021, EDEV 030 or ENLA 034

This course introduces disabled students to essential skills required to use a computer, including composing and sending email, using and navigating the campus-wide learning management system (LMS) (i.e., Canvas), and the basic features of assistive technology programs (e.g., Read&Write and Kurzweil 3000). The course also includes training in notetaking and word processing software (e.g., Glean and Microsoft Word).

Hours: 18 Lecture.

EDEV 025B

Adaptive Computer Technology B

Units: 1

Advisory: EDEV 021, EDEV 030 or ENLA 034

This course introduces disabled students to intermediate skills required to use a computer, including advanced features of assistive technology programs (e.g., Read&Write and Kurzweil 3000) as well as presentation, personal information manager, and spreadsheet software (e.g., Microsoft PowerPoint, Outlook, and Excel).

Hours: 18 Lecture.

EDEV 027

Strategies for Career Success

Units: 3

Students must meet measured appropriate adaptive behaviors that meet California Community Colleges Title 5 regulations for DSP&S

Corequisite: EDEV 027L

Advisory: EDEV 020

This course is designed specifically for the Developmentally Delayed Learner (DDL) and students with special learning needs to prepare them for employment. Emphasis is on developing skills in the areas of goal setting, career assessment inventory, career awareness, career exploration, choosing a career, career preparation, socialization, utilizing community resources and appropriate grooming and hygiene. This is a non-degree credit course and is offered on a pass/no pass basis.

Hours: 54 Lecture.

EDEV 027L

Strategies for Career Success Lab

Units: 1

Advisory: EDEV 020

Prerequisite/Corequisite: EDEV 027

This course is designed specifically for the Developmentally Delayed Learner (DDL) population and students with special learning needs. The laboratory is a work experience program with minimum supervision. Students are placed in on- and off-campus work sites for 4 hours per week. They will receive on-the-job training with close supervision at the various locations - 4 weeks at each job site. This is a non-degree credit course and is offered on a pass/no pass basis.

Hours: 54 Lab.

EDEV 029

Independent Living Skills

Units: 3

Advisory: EDEV 021 or EDEV 021 or EDEV 025 or VOCB 025 or appropriate placement.

This course is specifically designed for developmentally delayed learners (DDL) and students with special learning needs. Essential independent living skills are emphasized; topics focus on how to live and work issues—from maintaining a healthy body and a safe home to finding and keeping a job—with the goal of students developing the necessary skills to gain greater independence outside the family structure.

Hours: 54 Lecture.

EDEV 030

English Skills

Units: 3

Corequisite: EDEV 030W

This course is designed for students with learning disabilities who need to improve basic writing skills. A process approach to writing is integrated with reading assignments to provide a variety of writing experiences. Students practice strategies to develop thinking, language, and writing skills. This course is the beginning level of composition; it prepares students for success in ENGL 035 or ENGL 101. This is a non-degree credit course and is offered on a pass/no pass basis. Students are required to concurrently enroll in EDEV 030W.

Hours: 54 Lecture.

EDEV 030W

English Skills Workshop

Units: 1

Corequisite: EDEV 030

This course is a skills class to assist students with learning disabilities in improving writing and language skills through instruction with

the Learning Disabilities Specialist. Students will perform writing tasks designed to complement the activities of their composition class. This is a non-degree applicable course and is offered on a pass/no pass basis. Students are required to concurrently enroll in EDEV 030, English Skills. Hours: 54 Lab.

EDEV 033A
Mathematical Foundations
Units: 2.5

It is advised that students be able to read pre-collegiate texts and have completed EDEV 030 or ENLA 034

This course combines topics from basic math and prealgebra, including operations with whole numbers, integers, fractions, and decimals. It serves as a foundational course for all students. Completion of the course enables students to register for EDEV 033B (students must complete EDEV 033A and EDEV 033B within a maximum period of 24 months). This course is designed to help students with special needs master and develop problem solving and arithmetic skills, and to acquire learning strategies to allow them to be successful upon matriculating into upper-level mathematics courses. This is a non-degree-applicable course. Hours: 45 Lecture.

EDEV 033B
Mathematical Foundations
Units: 2.5

Prerequisite: EDEV 033A or appropriate placement

This course combines topics from basic math and prealgebra, including rates, ratios, and proportional thinking; percent problems and applications to percent; and an introduction to algebraic thinking using fundamental principles of expressions and methods to solve linear equations. It serves as a foundational course for all students, who must complete EDEV 033B and its prerequisite, EDEV 033A, within a maximum period of 24 months. This course is designed to help students with special needs master and develop problem solving and arithmetic skills, and to acquire learning strategies to allow them to be successful upon matriculating into upper-level mathematics courses. This is a non-degree-applicable course. Hours: 45 Lecture.

EDEV 101
College and Life Success
Same as: COUN 101
Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 3 units credit for all COUN/EDEV courses.

This course explores the cognitive, psychological, social, and physical factors that influence success in college and in life. Topics include personal responsibility, critical thinking, motivation, self-efficacy, personal awareness, lifelong learning, self-management, health and wellness, interpersonal communication in a diverse world, and introductory career and educational planning. Students learn about

the purpose, demands, and requirements of higher education, as well as student support services, at Rio Hondo College and four-year institutions.

Hours: 54 Lecture.

EDEV 134
Study Techniques
Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This is a course in college study skills which also addresses the needs of students identified with special learning needs. Students are taught specific techniques, principles, and strategies which enable them to effectively acquire, integrate, store, and retrieve information and thus become more successful students. Topics in this course include in-depth instruction in critical reading and thinking, time management, memory techniques, note-taking, test-taking, creativity, and communication. Students are encouraged to utilize appropriate college resources.

Hours: 54 Lecture.

EDEV 151
Career Exploration and Life Planning
Same as: COUN 151
Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 3 units credit for all COUN/EDEV courses.

This course will examine student, career, and self-development theories to empower students to make effective decisions throughout their lifespan by engaging in the process of career and life planning from a psychological, sociological, and physiological perspective. Students will compare and contrast human development and career theories, decision-making processes, and factors that contribute to college success, life skills, adult workplace competencies, values, interests, abilities, and personality. Labor market trends in a global economy and successful job search and workplace behaviors will also be examined.

Hours: 54 Lecture.

ETHNIC, GENDER, AND SEXUALITY STUDIES

Division of Behavioral and Social Sciences

EGSS 110 (C-ID: SJS 110)
Introduction to Ethnic Studies
Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is an introduction to the interdisciplinary study of race and ethnicity in the United States. Focusing on the socioeconomic and political experiences of Black Americans, Native Americans, Asian Americans, and Chicana/Latina Americans, the

course surveys topics such as colonization, decolonization, racialization, indigeneity, immigration, intersectionality, social justice movements, cultural expression and resistance, and major theories of race and ethnicity.

Hours: 54 Lecture.

EGSS 120 (C-ID: SJS 120)
Introduction to Women's Studies
Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is an introduction to the origins, purpose, subject matter, and methods of women's studies and to feminist perspectives on a range of social issues affecting women of diverse backgrounds. The course focuses on an examination of gender and its intersections with race, class, sexuality, disability, age, religion, and other systems of difference.

Hours: 54 Lecture.

EGSS 130 (C-ID: SJS 130)
Introduction to LGBTQ+ Studies
Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is an introduction to Lesbian, Gay, Bisexual, Transgender, and Queer Plus (LGBTQ+) Studies, and examines LGBTQ+ Studies as an interdisciplinary field. In particular, the course takes up the influences of history, politics, media, and health care as they relate to the LGBTQ+ community. Throughout this course, students work toward a deeper understanding of the intersectional dynamics of privilege and oppression as significant LGBTQ+ issues.

Hours: 54 Lecture.

EGSS 140
Introduction to African American Studies
Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Introduction to African American Studies takes an interdisciplinary approach to exploring the history, culture, and experiences of African Americans in the United States and the origins and foundations of Black/American Studies as an academic discipline. This study, ranging from the early modern era to the present day, examines approximately five hundred years of cultural, sociological, political, psychological, historical, and economic developments and transformations of people of African descent in the United States. Students will interrogate a broad range of literature, art, music, film, and political and social discourse to understand African Americans' history, culture, contributions, achievements, and struggles.

Hours: 54 Lecture.

ELECTRONICS

Division of Career and Workforce Education

ELEC 050

Introduction to the Electrical Industry

Units: 2

It is advised that students be able to engage in written composition at a early college level, read college-level texts, and have knowledge of elementary algebra concepts.

This introductory course is for a general audience and for those contemplating a career in the powerline (electrical) industry. Students will become acquainted with the basic concepts of terminology and will receive hands-on experience with components and measuring equipment.

Hours: 27 Lecture. 27 Lab.

ELEC 051

Electrical Power Distribution Systems

Units: 3

Prerequisite: ELEC 050

This is an introductory course for linemen and those interested in a career in the power utility industry. This is the second class of a five class program designed to provide the student with knowledge and skills with electrical power distribution systems. This course explains how electricity is generated and delivered to customers. Course content includes safety, basic electrical theory of generation, transmission, transformers, regulators, fuses, meters, and applied mathematics to illustrate basic electricity relationships of components in an electrical power distribution system.

Hours: 45 Lecture. 27 Lab.

ELEC 052

Distribution of Electrical Power

Units: 3

Prerequisite: ELEC 051

This is an introductory course for linemen and those interested in a career in the power utility industry. This is the third class of a five class program designed to provide the student with knowledge and skills with electrical power distribution systems. This course further explains the distribution of electrical energy, starting with the various methods of generation, through a more extensive look into various transmission systems, into the rural and urban substations, and ending at the customer's service entrance. Course content includes safety, electrical theory of generation, transmission, distribution, substations, transformers, and applied mathematics related to the components of an electrical power distribution system.

Hours: 45 Lecture. 27 Lab.

ELEC 061

Fundamentals of Wire and Cabling

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course will present the principles and practices of copper cable wiring technology and includes instruction in the design, installation, and maintenance of copper

wiring systems for intelligent control systems, lighting and appliance control devices, communication, and networking. Also includes instruction in household and institutional power wiring. This course is designed for students wanting to work in the Home Technology Service industry.

Hours: 27 Lecture. 27 Lab.

ELEC 062

Fundamentals of Fiber Optics

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course presents the principles and practices of fiber optics and optoelectronic technology and includes instruction in the design, installation, and maintenance of fiber optic cabling control systems and optoelectronic control systems for computer communication and networking systems. This course is designed for students wanting to work in the Home Technology Service industry.

Hours: 27 Lecture. 27 Lab.

ELEC 063

Fundamentals of Wireless Communication

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course presents the principles and practices of wireless communication technology and includes instruction in the design, installation, and maintenance of wireless communication technology network systems. Emphasis is placed on system reliability, security, and cost containment concerns. This course is designed for students wanting to work in the Home Technology Service industry.

Hours: 27 Lecture. 27 Lab.

ELEC 064

Home Technology Integration

Units: 4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course presents the principles and practices of installing and maintaining home technology. Students are exposed to home lighting controls, computer networking, home security, home entertainment systems including video, data, and voice, heating ventilation and air conditioning control systems, and home systems integration. This course prepares the student for Home Technology Industry certification and is designed for students wanting to work in the Home Technology Service industry.

Hours: 54 Lecture. 54 Lab.

ELEC 070

Applied Telecommunications Technology

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have a knowledge of elementary algebra concepts.

This is an introductory course that will examine the theory behind present day wireless (cellular) telecommunications systems which will include an in-depth

analysis of the design and installation of these systems. The course is intended for students interested in a career in the wireless telecommunications industry. Topics will include: mobile devices networks, antenna orientation, base station system, and the operation and support system associated with the wireless systems. Also presented are topics on environmental effects, governmental impact and history of wireless telecommunications.

Hours: 45 Lecture. 27 Lab.

ELEC 071

Mobile and Wireless Communications

Units: 3

Prerequisite: ELEC 070

This is the second class of a five class program that will further examine the theory behind present day wireless (cellular) telecommunications systems. This course is designed to provide students with information and skills associated with the wireless (cellular) telecommunications industry. The course is intended for students that are interested in a new career or are currently working in the wireless telecommunications industry. Topics will include: Wireless standards and protocols and the critical issues of compatibility, internetworking, and voice/data convergence, design and integration of WCDMA/UMTS, CDMA2000, and SC-DMA into existing cellular/PCS networks. Also presented are topics on RF propagation, 3G and 4G networks, and the future of wireless telecommunications.

Hours: 45 Lecture. 27 Lab.

ELEC 100

DC and AC Fundamentals

Units: 3

It is advised that students be able to engage in written composition at a college and read college-level texts.

Transfers to: CSU

This introductory course in direct current (DC) and alternating current (AC) electricity is for students and for those contemplating a career in the electrical/electronics industry. Course content includes basic theories, resistance, capacitance, inductance, simple DC and AC circuits, transformers, measuring instruments, batteries, motors, and generators.

Hours: 45 Lecture. 27 Lab.

ELEC 101

DC Electronic Circuits and Devices

Units: 4

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have a knowledge of elementary algebra concepts.

Transfers to: CSU

This course is an introduction to the field of Direct Current (DC) electricity/electronics. Emphasis is on the theory of operation, physical properties and characteristics of DC electrical/electronic circuits and devices. Students will analyze circuits and solve problems utilizing basic network analysis methods. The course will instruct students on the arrangement of circuit diagrams, proper identification of circuit/device symbols, and use of wiring schematics. Laboratory work provides experience with the design and test

of basic electrical circuits, use of meters, schematic diagrams, oscilloscopes, and common laboratory equipment. This course is for students that are contemplating a career in the electrical/electronics industry and is part of the preparation leading to an A.S. Degree or a Certificate in Electronics Technology.

Hours: 54 Lecture. 54 Lab.

ELEC 102

AC Electronic Circuits and Devices

Units: 4

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have a knowledge of elementary algebra concepts.

Transfers to: CSU

This course is an introduction to the field of Alternating Current (AC) electricity/electronics. Emphasis is on the theory of operation, physical properties and characteristics of AC electrical/electronic circuits and devices. Students will analyze circuits and solve problems utilizing basic network analysis methods. The course will instruct students on the arrangement of circuit diagrams, proper identification of circuit/device symbols, and use of wiring schematics. Laboratory work provides experience with the design and test of basic electrical circuits, use of meters, schematic diagrams, oscilloscopes, and common laboratory equipment. This course is for students that are contemplating a career in the electrical/electronics industry and is part of the preparation leading to an A.S. Degree or a Certificate in Electronics Technology.

Hours: 54 Lecture. 54 Lab.

ELEC 105

Computer Simulation and Fabrication of Electronic Circuits

Units: 2

Prerequisite: ELEC 101

Transfers to: CSU

This course provides an introduction to the use of computer software in the simulation and fabrication of electronic circuits and printed circuit boards. It is intended for students in electronics technology as well as those currently working in the electronics industry. Using a popular educational version of circuit simulation software, the Electronics Workbench TM program suite, students will be introduced first to concepts of analog and digital circuit simulation. The modeled circuits are then processed. Fabricated and ultimately tested as prototype circuit boards. Students will learn to use a miniature computer controlled circuit board mill to produce the prototypes.

Hours: 18 Lecture. 54 Lab.

ELEC 108

Introduction to Solid State Devices and Circuits

Units: 4

Prerequisite: ELEC 101 and ELEC 102

Transfers to: CSU

This course is an introduction to solid state devices used in the field of electronics. Emphasis is on the theory of operation, methods of fabrication, physical properties, and characteristics of semiconductor devices and circuits. Devices considered include

diodes, bipolar junction transistors (BJTs) and field effect transistors (FETs), special diodes, thyristors (i.e., silicon-controlled rectifiers, or SCRs), digital and analog integrated circuits (ICs), and typical applications of each device in amplifier, regulator, oscillator, timer, and digital circuits. Students analyze circuits and solve problems utilizing basic network analysis methods. Laboratory work provides experience with the design and testing of basic solid state device circuits, including signal tracing and troubleshooting, use of meters, schematic diagrams, oscilloscopes, and common laboratory equipment. This course is for students who are contemplating a career in the electrical/electronics industry, and is part of the preparation leading to an A.S. degree or a Certificate in Electronics Technology.

Hours: 54 Lecture. 54 Lab.

ELEC 109

Linear Analog Circuits and Devices

Units: 4

Prerequisite: ELEC 101 and ELEC 102

Transfers to: CSU

This course focuses on linear analog circuits and devices used in the field of electronics. Emphasis is on the theory of operation, methods of fabrication, physical properties, and characteristics of operational amplifiers, other discrete circuits, and external circuitry. The course builds on the foundations students have learned in previous electronics courses, continuing the study of solid state devices and circuits with an emphasis on integrated circuits (ICs) and applications. Students analyze circuits and solve problems utilizing basic network analysis methods, exploring IC device characteristics and considering the topics of input/output impedance, drift, offset, bias current, gain, frequency response, and simple modeling. Device data sheets and application notes are introduced to provide training in the selection of devices for specific purposes. Laboratory work provides experience with the design and testing of basic solid state device circuits, including signal tracing and troubleshooting, use of meters, schematic diagrams, oscilloscopes, and common laboratory equipment. This course is for students who are contemplating a career in the electrical/electronics industry and is part of the preparation leading to an A.S. degree in Electronics Technology.

Hours: 54 Lecture. 54 Lab.

ELEC 111

Introduction to Digital Electronics

Units: 4

Prerequisite: ELEC 101 and ELEC 102

Transfers to: CSU

This course is an introduction to digital electronic principles common to all areas of electronics. The course emphasizes the study of number systems and representations such as binary codes, hexadecimal codes, and Boolean algebra; and covers topics including analysis and design of combinational and sequential logic circuits, gates, adders, transistor-transistor logic (TTL), small- and medium-scale integrated devices, programmable logic, simulation of digital circuits and complementary metal-oxide-semiconductors (CMOSs), and emitter-coupled logic (ECL) families.

Laboratory work also provides experience with the design and testing of basic digital circuits, use of meters, schematic diagrams, oscilloscopes, and common laboratory equipment. This course is for students who are contemplating a career in the electrical/electronics industry and is part of the preparation leading to an A.S. degree or a Certificate in Electronics Technology.

Hours: 54 Lecture. 54 Lab.

ELEC 208

Advanced Solid State Devices and Circuits

Units: 4

Prerequisite: ELEC 108

Transfers to: CSU

This course is a continuation of the study of solid state devices used in the field of electronics presented in the introductory course ELEC 108. Emphasis is on the theory of operation, physical properties and characteristics of advanced semiconductor devices and circuits. Devices considered are advanced design transistors, silicon controlled rectifiers (SCRs) and other digital and analog integrated circuits (ICs), typical applications of each device in inverters, converters, and switching power supplies. Students analyze circuits and solve problems utilizing basic network analysis methods with an emphasis on advanced biasing, cascading, coupling, and phase shifting. Laboratory work provides experience with the design and testing of advanced solid state device circuits including signal tracing and troubleshooting, schematic diagrams, and common laboratory equipment. This course is for students who are contemplating a career in the electrical/electronics industry and is part of the preparation leading to an A.S. degree or a Certificate in Electronics Technology.

Hours: 54 Lecture. 54 Lab.

ELEC 211

Advanced Digital Electronics

Units: 4

Prerequisite: ELEC 111

Transfers to: CSU

This course is a continuation of introduction to electronic digital principles common to all areas of electronics. Building on the foundations covered in ELEC 111, emphasis will be placed on the study of various types of Counters, A/D and D/A Converters, I/O Devices, Memories and an introduction to Micro Computers. Through laboratory work, students learn applications by constructing various circuits and devices. Advanced analysis and design of combinational and sequential Logic Circuits, Gates, Adders, TTL: small and medium scale integrated devices, programmable logic and simulation of digital circuits and ECL families will be covered. Laboratory work will also provide experience with the design and test of basic digital circuits, use of meters, schematic diagrams, oscilloscopes, and common laboratory equipment. This course is for students who are contemplating a career in the electrical/electronics industry and is part of the preparation leading to an A.S. degree or a Certificate in Electronics Technology.

Hours: 54 Lecture. 54 Lab.

ELEC 240

Microprocessors and Microcomputing

Units: 4

Prerequisite: ELEC 211

Transfers to: CSU

This course provides a fundamental knowledge of the general architecture of microcomputers. Emphasis is on the study of organization and structuring of the major hardware and software components of computers, including the central processing unit (CPU) and some of the input/output (I/O) devices used to interface the CPU to various peripheral devices. The course considers the physical aspects of information transfer and control within a digital computer, and emphasizes network architecture, communication protocol, microprogramming instruction sets, and assembly language programming. Laboratory exercises focus on construction and deconstruction of a basic computer and testing and troubleshooting critical functions. This course is for students who are contemplating a career in the electrical/electronics industry and is part of the preparation leading to an A.S. degree or a Certificate in Electronics Technology. Hours: 54 Lecture. 54 Lab.

ELEC 299

Directed Study in Electronics Technology

Units: 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.

Hours: 54-162 Lab.

EMERGENCY MEDICAL TECHNICIAN

Division of Administration of Justice and Fire Technology

EMT 093

Emergency Medical Technician

Units: 9

Prerequisite: EMT 100 with a grade of "B" or better

This course is designed to certify students as a National Registry and State of California emergency medical technician (EMT), and gain employment as an ambulance EMT, hospital emergency department EMT, or event staff EMT. After successful completion of this course, students will be approved to take the National Registry EMT cognitive examination and then request certification as an EMT through the Los Angeles County Emergency Medical Services (EMS) Agency or other local EMS accrediting agencies in California. Topics discussed include pre-hospital care terminology, cardiovascular emergencies, emergency childbirth, communicable disease transmission, extrication tools and equipment, tactical casualty care, automatic external defibrillation, and the EMS system. In order to participate in this course students must pass a background check, EMT medical physical that includes vaccination verification, and a 10-panel drug screen.

Hours: 126 Lecture. 108 Lab.

EMT 093-1

Emergency Vehicle Operations

Units: 4

Enrollment requires possession of a class "C" license and the ability to read college-level texts. It is advised that students be able to engage in written composition at a college level and have a knowledge of prealgebra concepts.

This course is designed for EMT students and other interested students to gain certification to obtain an Ambulance Driver Certificate in California. An Ambulance Driver Certificate can be obtained prior to completion of this course. Pre-Trip inspection, driving skills and a driving test is part of this course. Students will complete their certification through the California DMV. A physical may be required to meet California DMV requirements in regards to licensing.

Hours: 54 Lecture. 54 Lab.

EMT 100

Emergency Medical Responder

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is intended for students who seek a better understanding of the role and responsibilities of a first responder. The course also meets the State of California Title 22 requirements pertinent to cardiopulmonary resuscitation (CPR), first aid, and automatic external defibrillation (AED) training as related to being an emergency medical technician (EMT). This course also certifies students in CPR for the healthcare professional.

Hours: 36 Lecture. 54 Lab.

EMT 290

**Work Experience Education/Internship for
Emergency Medical Technician-Related
Fields**

Units: 6

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of fire technology or EMS (emergency medical services) and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 324 Lab.

ENGLISH

Division of Communications and Languages

ENGL 010S

English Composition Support

Units: 1

It is advised that students be able to engage in written composition at a college level.

Corequisite: ENGL 101

This co-requisite course for English 101 assists students who may benefit from additional support so that they can succeed in a college-level English composition course. Students are afforded additional practice in all phases of composition, grammar, and mechanics. Hours: 18 Lecture.

ENGL 010SP

English Composition Support Plus

Units: 2

It is advised that students be able to read college-level texts.

Corequisite: ENGL 101

This co-requisite course for English 101 assists students who may benefit from additional support so that they can succeed in a college-level English composition course. Students are afforded additional practice in all phases of composition, grammar, and mechanics. Hours: 36 Lecture.

ENGL 101 (C-ID: ENGL 100)

College Composition and Research

Units: 3.5

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or eligibility for college composition.

Transfers to: UC/CSU

This composition course enables students to generate logical, coherent essays that incorporate sources necessary for academic and professional success. Students become proficient in researching, evaluating, and incorporating sources, and in learning critical reading and thinking skills through expository and persuasive reading selections before applying these skills to creating original

documented essays. The writing workshop component of the course is designed to assist students with improving and refining their writing and language skills: Students complete writing workshop activities that enhance their ability to compose logical, well-supported arguments that exhibit grammatical fluency and correct citation styles. Students meet with composition instructors through individual or small group conferences that address students' specific writing concerns. This course is designed for students who wish to fulfill the General Education requirement for Written Communication.
Hours: 54 Lecture. 27 Lab.

ENGL 125

Grammar and Usage

Units: 3

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or eligibility for college composition. It is advised that students be able to read college-level texts.

Transfers to: UC/CSU

This course explores parts of speech, varieties of sentence structures, common grammar and usage problems, and how to apply these issues to real-world communications. It is designed for students who wish to expand their knowledge of standard American English and thereby increase their skill in the written and spoken language. It is especially helpful for students planning to go into teaching.
Hours: 54 Lecture.

ENGL 126

Languages of the World

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

This is a linguistics course which covers the major languages families of the world and representative languages from those families. It presents the phonology, morphology, syntax, and pragmatics of these languages. It is specifically targeted at those who will be working with non-native speakers of English in order to equip them to recognize the cross-linguistic influences of other languages on English, thus preparing them to communicate more effectively with their clients and/or students and to assess the linguistic and sociolinguistic factors which affect communication. This course is useful for majors in foreign language, anthropology, communications, health science, and English, and especially for those planning to enter elementary and secondary teaching in California, with its diversity of languages and cultures.
Hours: 54 Lecture.

ENGL 127

Language Structure and Language Use: Introduction to Linguistics

Units: 3

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or eligibility for college composition. It is advised that students be able to engage in written composition at a college level.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: ENGL 127 or ENGL 127H
This course explores the nature and structure of world languages. Students will study whole language development through discourse and semantics. The structure of words, which includes phonology, morphology, and how words are used together in sentences, syntax, will also be explored. The tool to decode worldwide sounds, the International Phonetic Alphabet, will be a key element in the course. Students will also discuss the difference between learning a language and acquiring a language. This course is beneficial for future teachers and for those majoring in any foreign language, English, communications, and anthropology.
Hours: 54 Lecture.

ENGL 127H

Language Structure and Language Use: Introduction to Linguistics Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: ENGL 127 or ENGL 127H
This course explores the nature and structure of world languages and students will study language development through discourse and semantics as well as language use. The structure of words, which includes phonology, morphology, and how words are used together in sentences, syntax, will also be explored. A tool to decode worldwide sounds, the International Phonetic Alphabet, will be a key element in the course. Students will also discuss the difference between learning a language and acquiring language. This course is beneficial for future teachers and for those majoring in any foreign language, English, communications, and anthropology. This course is designed for students eligible for the Honors Program.
Hours: 54 Lecture.

ENGL 131 (C-ID: ENGL 200)

Creative Writing

Units: 3

Prerequisite: ENGL 101

Transfers to: UC/CSU

This course is for students interested in various types of writing as forms of expression. It offers students a workshop setting in which to develop their writing skills in various genres such as fiction, poetry, and playwriting. Students will learn to "read as writers" by analyzing published writings in various genres with a focus on authorial techniques and effectiveness. Students also will be required to write regularly, present their own work in class for discussion, and develop critical standards for evaluating the merit of their own work and the work of their peers.
Hours: 54 Lecture.

ENGL 201 (C-ID: ENGL 105)

Advanced Composition and Critical Thinking

Units: 3.5

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: ENGL 201 or ENGL 201H
This advanced composition course is open to all students who have successfully completed ENGL 101 and expect to transfer to four-year institutions. In the course, students learn classical critical thinking concepts and decision-making and problem-solving skills applicable to real-world scenarios by engaging with current issues using argumentative and research techniques. Students also read and write extensively while applying critical thinking skills and research techniques, demonstrating these abilities in advanced composition as they research and write a series of argumentative essay that demonstrate the ability to analyze issues, evaluate positions, and argue persuasively through clear, concise prose. The course's writing workshop component is designed to assist students in improving and refining their writing and language skills: in writing workshop students undertake activities that enhance their ability to compose logical, well-supported arguments that exhibit grammatical fluency and correct citation styles. Additionally, students meet with composition instructors through individual or small group conferences that address students' specific writing concerns.
Hours: 54 Lecture. 27 Lab.

ENGL 201H (C-ID: ENGL 105)

Advanced Composition and Critical Thinking Honors

Units: 3.5

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Student will receive credit for only one of the following courses: ENGL 201 or ENGL 201H
This advanced composition course is open to all students who have successfully completed ENGL 101, and is designed for those who expect to transfer to four-year colleges or universities. In the course, students read and write extensively while applying critical thinking skills and research techniques, demonstrating advanced composition acumen by researching and writing a series of argumentative essays that demonstrate the ability to analyze issues, evaluate positions, and argue persuasively through clear and concise prose. The lab component of the course is designed to assist students in advancing and refining writing and language skills, and augments students' ability to exercise critical thought. Students complete lab activities that further enhance their ability to compose logical, well-supported arguments that exhibit grammatical fluency and correct citation styles. Students meet with composition instructors through individual conferences that address their specific writing concerns. The course is intended for students who meet Honors Program requirements.
Hours: 54 Lecture. 27 Lab.

ENGL 231

Advanced Creative Writing

Units: 3

Prerequisite: ENGL 131

Transfers to: UC/CSU

This course is for students interested in continuing their studies in various forms of

writing. It offers students a workshop beyond ENGL 131 in which to develop more advanced writing skills in various genres such as fiction and poetry. Students will continue to learn to "read as writers" by analyzing published writings in various genres, with a focus on authorial techniques and effectiveness. Students also will be required to write regularly, present their own work in class for discussion, and develop critical standards for evaluating the merit of their own work and the work of their peers.
Hours: 54 Lecture.

ENGL 299

Directed Study: English

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of four (4) units within a discipline, and may not accumulate more than a total of twelve (12) units college wide.
Hours: 54-162 Lab.

ENGL 325

Technical and Professional Writing

Units: 3

Prerequisite: ENGL 201 or ENGL 201H

Transfers to: CSU

This upper division, General Education course is designed for students pursuing a Bachelors of Science degree in Automotive Technology. Students develop expository writing skills on technical subjects relevant to automotive and transportation-related industries, business, science, government, and similar fields. Written assignments comprise short forms including technical description, proposals, manuals, and journal articles, as well as longer formal papers, feasibility studies, and technical reports. This course helps students develop principles of clear writing appropriate to automotive industry standards.
Hours: 54 Lecture.

ENGINEERING

Division of Mathematics, Sciences, and Engineering

ENGR 100 (C-ID: ENGR 110)

Introduction to Engineering

Same as: ENGT 100

Units: 2

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: UC/CSU

This introductory course considers different branches of engineering, the engineering industries, and the functions of engineers and related roles. Topics include the methods and tools of engineering problem solving and design, the place of engineering in society, and engineering ethics. Students learn about the educational requirements for careers in engineering fields and effective strategies to be academically successful in engineering programs, practice developing communication skills pertinent to engineering professions, and explore a variety of engineering career pathways to plan and shape career goals.
Hours: 27 Lecture. 27 Lab.

ENGR 141 (C-ID: ENGR 140)

Materials Science and Engineering

Units: 3

Prerequisite: PHY 211 and CHEM 130

Transfers to: UC/CSU

This course takes up the internal structures and behaviors of materials used in engineering applications, including the material properties of metals, ceramics, polymers, composites, and semiconductors. Students learn how to select appropriate materials to meet engineering design criteria and to understand the effects of heat, stress, imperfections, and chemical environments upon material properties and performance.
Hours: 54 Lecture.

ENGR 141L (C-ID: ENGR 140L)

Materials Science and Engineering Lab

Units: 1

Prerequisite: CHEM 130, PHY 211

Prerequisite/Corequisite: ENGR 141

Transfers to: UC/CSU

This course takes up the internal structures and behaviors of materials used in engineering applications, including the material properties of metals, ceramics, polymers, composites, and semiconductors. Students directly observe and analyze the characteristics of engineering materials discussed in the lecture (ENGR 141) through the operation of experimental equipment and activities related to report writing.
Hours: 54 Lab.

ENGR 212 (C-ID: ENGR 220)

Computational Methods in MATLAB/Octave

Units: 4

Prerequisite: MATH 190 or MATH 190H, PHY 211

Transfers to: UC/CSU

This course teaches scientific computation using MATLAB/Octave software packages. Topics include an introduction to matrix and vector methods, numerical methods including integration and differentiation, Monte Carlo methods, statistical analysis of large data sets, and the creation of scientific graphics. Topics are applied to solve typical problems in physics and engineering.
Hours: 54 Lecture. 54 Lab.

ENGR 217 (C-ID: ENGR 260)

Electric Circuit Analysis

Units: 3

Prerequisite: MATH 260, MATH 270, PHY 213

Transfers to: UC/CSU

This course is for students who intend to pursue a major in engineering. The course covers topics in electrical engineering, including Ohm's law, dependent and independent sources, Kirchhoff's laws, mesh-current and nodal-voltage methods, Thévenin and Norton equivalent circuits, linear superposition, DC/AC transient and steady-state responses of linear RLC circuits, phasors, AC power calculations, and three-phase circuits. Theoretical analysis of modern, semiconducting devices such as diodes, operational amplifiers (op-amps), metal-oxide-semiconductor field-effect transistors (MOSFETs), and bipolar junction transistors (BJTs) will also be explored in the context of non-linear circuits, digital circuits capable of Boolean logic, and the integration of semiconducting circuit elements into linear, RLC circuits with applications.
Hours: 54 Lecture.

ENGR 217L (C-ID: ENGR 260L)

Electric Circuit Analysis Lab

Units: 1

Prerequisite: MATH 260, MATH 270, PHY 213

Prerequisite/Corequisite: ENGR 217

Transfers to: UC/CSU

This course is an introduction to the design, construction, and measurement of analog and digital electrical circuits, including operational amplifiers and modern semiconducting devices. The use of multimeters, oscilloscopes, power supplies, and function generators is emphasized, as is the simulation of circuits with software. Direct current (DC), transient, and alternating current (AC) steady state conditions are investigated.
Hours: 54 Lab.

ENGR 235

Engineering Mechanics: Statics

Units: 3

Prerequisite: PHY 211

Transfers to: UC/CSU

This course is for students who intend to pursue a major in engineering, and provides an overview of the effect of two- and three-dimensional force systems on particles and rigid bodies under equilibrium conditions. Topics covered include distributed forces and determination of centroids, analysis of trusses, frames and machines, internal forces and moments, systems involving friction, and methods of virtual work and equilibrium.
Hours: 54 Lecture.

ENGR 240

Strength of Materials

Units: 3

Prerequisite: ENGR 235, MATH 191

Transfers to: UC/CSU

This course is an introduction to the basics of strength of materials. Students examine how forces affect machine members and structural elements, calculate stress and strain, analyze connections, and evaluate beams and columns. Topics include loading; statically indeterminate structures; temperature and prestrain effects; shear force and bending moment; axial, shear, bearing and bending stresses; deflection of beams; and buckling of columns. Students use calculations applied to the above topics to determine if a certain design will succeed or fail.
Hours: 54 Lecture.

ENGR 245 (C-ID: ENGR 230)
Engineering Mechanics: Dynamics
Units: 3

Prerequisite: ENGR 235
Transfers to: UC/CSU

This course is for students who intend to major in engineering, and provides an overview of the effect of two- and three-dimensional force systems on particles and rigid bodies in motion. Topics include kinematics of particles and rigid bodies; applications of Newton's Second Law; energy and momentum methods in the study of motions; translational, rotational, and general planar motion; and mechanical vibrations.
Hours: 54 Lecture.

ENGINEERING TECHNOLOGY

Division of Career and Workforce Education

ENGT 100 (C-ID: ENGR 110)
Introduction to Engineering
Same as: ENGR 100
Units: 2

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: UC/CSU

This introductory course considers different branches of engineering, the engineering industries, and the functions of engineers and related roles. Topics include the methods and tools of engineering problem-solving and design, the place of engineering in society, and engineering ethics. Students learn about the educational requirements for careers in engineering fields and effective strategies to be academically successful in engineering programs, practice developing communication skills pertinent to engineering professions, and explore a variety of engineering career pathways to plan and shape career goals.
Hours: 27 Lecture. 27 Lab.

ENGT 101
Introduction to Technical Drawing & Graphics
Same as: ARCH 101, CIV 101
Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.
Transfers to: UC/CSU

This basic course in technical drawing and graphics is for students with no previous drafting skills or training. The course is designed for students who want to pursue training in fields and careers related to architecture, civil design, and engineering design drafting. Practical application with the tools, techniques, standards, and practices used in the industries that need technical drawings and graphics is a feature of the course. ARCH 101, CIV 101, ENGT 101 are cross-listed courses. Credit will be granted for one course only.
Hours: 36 Lecture. 54 Lab.

ENGT 105
Introduction to Visualization, Sketching, & Rendering
Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to develop skills in drawing as used by design professionals in architectural and technical applications. Using visualization and deploying basic principles of proportion, composition, and freehand techniques, students prepare technical isometric, oblique, perspective, and orthographic sketches to industry standards. Design considerations for various projects involving preliminary design sketches are also introduced. This course is open to all students who want to develop drawing skills. It is required for all students working towards a degree or certificate in the Architecture and Engineering Design Drafting program.
Hours: 27 Lecture. 27 Lab.

ENGT 122
Intermediate Engineering Design: Geometric Dimensioning & Tolerancing
Units: 3

Advisory: ARCH 101 or ARCH 101 or CIV 101 or ENGT 101 or two years of high school drafting, ENGT 105, ENGT 150 or ENGT 170
Transfers to: UC/CSU

In this course, emphasis is placed on technical drawing using International Organization for Standardization (ISO) and American National Standards Institute (ANSI) standards, including geometric dimensioning and tolerancing (GD&T), for the purposes of completing a conceptual design project and the preparation of working drawings. This course is required for all students working towards a degree or certificate in the Architecture and Engineering Design Drafting program. The course is also recommended for students interested in transferring to schools of engineering.
Hours: 36 Lecture. 54 Lab.

ENGT 123
Intermediate Engineering Design: Descriptive Geometry
Units: 2

Advisory: ARCH 101 or ARCH 101 or CIV 101 or ENGT 101, ENGT 105, ENGT 150
Transfers to: UC/CSU

This course is an introduction to graphics as used in engineering design utilizing descriptive geometry to solve three-dimensional engineering problems involving space, points, planes, and lines. The course explores the concepts of true length and size

used within the industry to design and manufacture projects with high accuracy; utilizing auxiliary views; and revolution methods in regard to creating edges, surfaces, and developments.
Hours: 27 Lecture. 27 Lab.

ENGT 131
Advanced Engineering Design: Manufacturing Applications of Technical Drawing
Units: 4

Prerequisite: ENGT 122, ENGT 123, ENGT 150 or ENGT 170 or appropriate CADD experience
Advisory: ENGT 200, ENGT 250
Transfers to: UC/CSU

This intermediate course takes up technical drawing as used in manufacturing applications of design and engineering technology, and is intended for all students in areas of study related to engineering, technical drafting, design, and computer graphics. The course incorporates orthographic projection, introduction to tool design, and applications of descriptive geometry through layouts and developments. The course also covers the American National Standards Institute (ANSI) Y14.5 standard, precision dimensioning, geometric tolerancing, and manufacturing terminology and processes. Lab exercises and drawings are used to reinforce lecture and demonstration concepts.
Hours: 54 Lecture. 54 Lab.

ENGT 150
AutoCAD for Basic CADD Applications
Units: 4

Advisory: ARCH 101 or ARCH 101 or CIV 101 or ENGT 101 or two years of high school drafting

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units of credit for the following courses: ENGT 150, ENGT 250, and ENGT 270.

This course is for students preparing for high-technology careers who need the skills necessary to function as an entry-level computer-aided design and drafting (CADD) operator, or to apply CADD to the specific disciplines of mechanical and architectural design, manufacturing, illustration, and engineering-related documents. An overview of computer graphics and CADD utilizing the latest release of AutoCAD software is provided. Students produce 2D orthographic, isometric, and basic 3D model solutions of mechanical and architectural applications.
Hours: 54 Lecture. 54 Lab.

ENGT 170
MicroStation for Basic CADD Applications
Units: 4

Advisory: ARCH 101 or ARCH 101 or CIV 101 or ENGT 101 or two years of high school drafting

Transfers to: CSU

This course is for students preparing for high technology careers who need the skills necessary to function as an entry level CADD operator or to apply CADD to specific disciplines of mechanical and architectural design, manufacturing, illustration and engineering related documents. An overview of computer graphics and CADD (Computer Assisted Design and Drawing) utilizing the latest release of MicroStation software will be

provided. Students will produce 2D orthographic and basic 3D model solutions of mechanical and architectural applications. Hours: 54 Lecture. 54 Lab.

ENGT 200

Intermediate CAD Modeling for Design & Production

Units: 4

Advisory: ARCH 101 or ARCH 101 or CIV 101 or ENGT 101 or two years of high school drafting, ENGT 105, ENGT 150

Transfers to: CSU

This course is for students pursuing AS Degrees or Certificates of Achievement in Architecture or Civil Engineering, or the Engineering Design Drafting Program, as well as those who to enhance their computer-aided design (CAD) skills for workplace productivity. The course is an intermediate application study in CAD, drafting, and graphics using the latest revisions of CAD software. Combined with previously learned technical drafting conventions and basic CAD operational skills, students use CAD software to produce detailed drawings that involve models, 2D and 3D objects, data attributes, and scales. Emphasis is placed on working with multiple drawing files using external files to create mechanical, architectural, and civil projects.

Hours: 54 Lecture. 54 Lab.

ENGT 231

Product Design and Presentation

Units: 4

Prerequisite: ENGT 250

Advisory: ENGT 122, ENGT 150 or ENGT 170 or appropriate CADD experience, ENGT 200

Transfers to: CSU

This advanced course focuses on research, product proposal and design, illustration for presentation, and manufacturing processes. Using computer aided design (CAD), students apply previously learned skills to develop a product design, graphic illustrations of mechanical applications for use in manufacturing, and engineering support presentation documents.

Hours: 54 Lecture. 54 Lab.

ENGT 250

Introduction to Parametric Modeling 3D Applications for Mechanical Design

Units: 4

Advisory: ARCH 101 or ARCH 101 or CIV 101 or ENGT 101, ENGT 105, ENGT 122

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units of credit for the following courses: ENGT 150, ENGT 250, and ENGT 270.

This course presents introductory applications of 2D and 3D computer aided design drafting (CADD) and an introduction to parametric modeling and rapid prototyping utilizing the latest releases of Autodesk Inventor series, SolidWorks, and other parametric modeling software to produce solutions for mechanical applications. This course benefits all students in areas of study related to engineering, drafting, design and computer graphics and emphasizes CADD-generated 3D graphics using wire frame, surface modeling, and parametric solids.

Hours: 54 Lecture. 54 Lab.

ENGT 270

Advanced 3D Parametric Modeling and Prototype Applications

Units: 4

Prerequisite: ENGT 122, ENGT 150 or ENGT 170, ENGT 200, ENGT 250

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units of credit for the following courses: ENGT 150, ENGT 250, and ENGT 270.

This course is an intensive study of 3D computer graphics and computer assisted design and drafting (CADD) utilizing the latest release of 3D software. This course benefits all students in areas of study related to engineering, drafting, design, and computer graphics. Students produce 3D, parametric, computer-generated virtual models incorporating mechanical design refinements. The course emphasizes the technological skills necessary to function as a design professional in order to apply 3D design graphics technology to the specific disciplines of mechanical engineering, machine drafting and design, manufacturing, animation, modeling, and illustration. Students are introduced to a variety of ways to produce prototype models directly from CADD-generated solid geometry. Students also take the Certified SolidWorks Associate (CSWA) industry standard test to check their proficiency, and receive certification upon passing.

Hours: 54 Lecture. 54 Lab.

ENGT 280

Advanced MicroStation for CADD & BIM Applications

Same as: ARCH 280

Units: 4

Prerequisite: ENGT 170 or appropriate CADD work experience

Advisory: ARCH 101 or ARCH 101 or CIV 101 or ENGT 101 or two years of high school drafting

Transfers to: CSU

This course is for students pursuing advanced study in MicroStation 3D parametric CADD (Computer Assisted Design and Drafting) and the BIM (Building Information Modeling) approach to building design using Bentley Architecture digital modeling applications. Students apply previously learned drafting conventions to produce 2D and 3D CADD- and BIM-generated mechanical and architectural drawings and virtual design models. This course benefits all students studying architecture, civil engineering of all types, drafting, design and computer graphics. Emphasis is placed on the high technology skills necessary to function as a designer or CADD drafter.

Hours: 54 Lecture. 54 Lab.

ENGT 290

Work Experience Education/Internship for Drafting-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area

of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of engineering design drafting and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures. Hours: 3 Lecture. 54-216 Lab.

ENGT 299

Directed Study in Engineering Design Drafting

Units: 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations, with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take Directed Study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 6-18 Lecture. 48-144 Lab.

ENGLISH AS A NEW LANGUAGE

Division of Communications and Languages

ENLA 034

Intermediate-Advanced Composition

Units: 3.5

Prerequisite: ENLA 024 or appropriate placement

A continuation of ENLA 024, this course is for ENLA students and emphasizes longer writings with more complicated sentence patterns leading up to a basic essay. Students focus on both thematic and rhetorical modes of composition while they practice topic sentences, thesis statements, subordination, and transitional expressions. This course is

offered on a pass/no pass basis and is not applicable to the degree.
Hours: 54 Lecture. 27 Lab.

ENLA 100

Advanced Composition

Units: 3.5

Prerequisite: ENLA 034

Transfers to: UC/CSU

ENLA 100 is the highest-level course of the ENLA writing sequence and an ENLA student's gateway in to English 101. As a result of taking this course, students will be able to utilize various stages of the writing process, MLA conventions of academic writing in several rhetorical modes (including a research paper), and advanced levels of grammatical and mechanical accuracy in their writing.

Hours: 54 Lecture. 27 Lab.

ENVIRONMENTAL TECHNOLOGY

Division of Mathematics, Sciences, and Engineering

ET 110

Hazardous Waste Generation/Reduction/ Treatment

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to educate students working in or seeking employment in the hazardous waste management field, with an overview of industrial processes and their generation of waste streams. Selected industries include electroplating, metal finishing, printed circuit board production, oil refining, chemical production, steel production, general manufacturing, printing and graphic reproduction, agriculture, and consumer services.

Hours: 54 Lecture.

ET 120

Introduction to Alternative Energy Technology

Same as: AET 120

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This introductory-level course provides students with a working knowledge of present-day energy systems, including an in-depth analysis of the design and installation of alternative energy systems. Topics will include solar electrical systems, wind electrical systems, solar water heating systems, wind mechanical systems, small hydro-electrical systems, geothermal energy, fuel cells, biomass, energy storage, and microgrids. Students will develop skills to construct an alternative energy system. The course is intended for students who are contemplating a career in the alternative energy industry.

Hours: 45 Lecture. 27 Lab.

ET 121

Photovoltaic Systems Design and Installation

Same as: AET 121

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

In this introductory course students examine and implement the design and installation of solar photovoltaic power systems, including the installation of a working solar photovoltaic power system. Students learn how to perform solar site evaluations, electrical load calculations, solar system size calculations, and installation techniques for grid-tie and off-the-grid photovoltaic systems. The course is designed to prepare students for the North American Board of Certified Energy Practitioners (NABCEP) entry-level exam, and is intended for students who are contemplating a career in the solar photovoltaic energy industry.

Hours: 45 Lecture. 27 Lab.

ET 122

Advanced Photovoltaic Systems Design and Installation

Same as: AET 122

Units: 3

Advisory: AET 121 or ET 121

Transfers to: CSU

This is the second course in the photovoltaic series in which students further examine and implement the design and installation of solar photovoltaic power systems. Students learn how to interpret the National Electrical Code (NEC) specifications concerning photovoltaic installations. Topics include code-compliant wiring of modules, inverters, charge controllers, batteries, grounding techniques, and related topics. Additional topics include the design and installation of large commercial photovoltaic systems. This course is intended for students who are contemplating a career in the solar photovoltaic energy industry.

Hours: 45 Lecture. 27 Lab.

ET 123

Wind Energy Systems Design and Installation

Same as: AET 123

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

In this introductory course students examine and implement the design and installation of wind power systems, including the installation of a working wind generation power system. Students learn how to perform wind site evaluations, electrical load calculations, wind system size calculations, hydraulics fundamentals, basic aerodynamics, and installation techniques for wind power generation systems; in designing and installing wind power generation systems, students obtain skills for employment. This course is intended for students who are contemplating a career in the wind turbine power generation industry.

Hours: 45 Lecture. 27 Lab.

ET 124

Advanced Wind Energy Systems Design and Installation

Same as: AET 124

Units: 3

Advisory: AET 123 or ET 123

Transfers to: CSU

This is the second course in the wind energy series in which students further examine and implement the design and installation of wind power systems. Students learn how to interpret the National Electrical Code (NEC) specifications concerning wind power installations. Topics include code-compliant wiring of modules, inverters, charge controllers, grounding techniques, and related topics. Additional topics include wind site evaluations, electrical load calculations, wind system size calculations, hydraulic fundamentals, basic aerodynamics, and installation techniques for large wind power generation systems. This course is intended for students who are contemplating a career in the wind turbine power generation industry.

Hours: 45 Lecture. 27 Lab.

ET 130

Health Effects of Environmental Hazardous Materials

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to educate students working in or seeking employment in areas that include health and safety responsibilities. The course provides an overview of how to identify and evaluate the hazards of chemical, physical, and biological agents that can be encountered in industrial operations, as well as waste disposal and remediation sites.

Hours: 54 Lecture.

ET 150

Hazardous Waste Management Applications

Units: 4

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to provide students working in or seeking employment in the environmental field with an overview of hazardous waste management and regulations. The course explains the hazardous waste regulatory framework and helps students develop research skills in the hazardous waste area. Emphasis is placed on the following topics: universal waste, generator compliance, site investigation and remediation, permitting, enforcement, liability, and storm water discharge. The course also provides opportunities for the hands-on application of regulations. These applications include preparing a hazardous waste manifest, labeling and storing containers, sampling and analysis, and preparing a Phase I environmental site assessment (ESA).

Hours: 54 Lecture. 54 Lab.

ET 181

Home Energy Management and Auditing
Same as: AET 181

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to provide students working in or seeking employment in the green energy field, with an overview of industrial energy management and auditing. Specifically, this course assists students in preparing a comprehensive energy audit and energy management program. Emphasis is placed on the following topics: types of energy audits, energy management and cost, benchmarking, energy performance, energy use requirements, maximizing system efficiencies, optimizing energy input requirements, fuel and energy substitution, and energy audit instruments.

Hours: 54 Lecture.

ET 182

Industrial Energy Management and Auditing

Same as: AET 182

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to provide students working in or seeking employment in the green energy field, with an overview of industrial energy management and auditing. Specifically, this course assists students in preparing a comprehensive energy audit and energy management program. Emphasis is placed on the following topics: types of energy audits, energy management and cost, benchmarking, energy performance, energy use requirements, maximizing system efficiencies, optimizing energy input requirements, fuel and energy substitution, and energy audit instruments.

Hours: 54 Lecture.

ET 200

Hazardous Materials Management Applications

Units: 4

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to provide students working or seeking employment in the hazardous materials management field with a general overview of the requirements and applications of federal, state, and local laws and regulations relating to hazardous materials. The course will emphasize compliance with Department of Transportation (DOT), Occupational Safety and Health Administration (OSHA) Hazard Communication, Superfund Amendments and Reauthorization Act (SARA) Title III Community Right-to-Know, underground tank, asbestos, Proposition 65, and air toxics regulations.

Hours: 54 Lecture. 54 Lab.

ET 230

Safety and Emergency Response

Units: 4

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to provide students working or seeking employment in the environmental technology field with hands-on instruction in safety and emergency response to chemical and physical exposures at hazardous waste sites. Topics include hazard identification, emergency response planning, proper use and selection of personal protective equipment (PPE), site control and evaluation, handling drums and containers, field sampling and air monitoring, proper use of instruments, confined spaces, and emergency response including field exercises in the use of air-purifying respirators (APR) and self-contained breathing apparatuses (SCBA). This course satisfies the requirements for 40-hour Hazardous Waste Operations and Emergency Response (HAZWOPER) training under Occupational Safety and Health Administration (OSHA) Standard 1910.120 and confined space entry training under OSHA Standard 1910.146.

Hours: 54 Lecture. 54 Lab.

ET 240

Solid Waste Management Applications

Units: 4

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to provide students working or seeking employment in the solid waste management field with an overview of the solid waste industry and its components. Emphasis is placed on the various aspects of integrated waste management including: waste prevention, recycling, composting, incineration, landfilling, environmental sampling and monitoring, facility siting and permitting, and compliance with environmental, health and safety regulations.

Hours: 54 Lecture. 54 Lab.

ET 250

Fundamentals of Safety and Health I

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to introduce students to the field of occupational safety and health management and program development. Topics include instruction on federal, state and local agency legislation, and the application of labor and occupational safety and health regulations. The course content also includes familiarization with workers compensation/general liability insurance, accident investigation techniques, industrial hygiene, ergonomics, fire prevention, site and facility auditing, systems Safety, and program development. This course is for working supervisors, professionals, or business owners responsible for worker safety or placement of

workers compensation/general liability insurance, and is a requirement for an Associate of Science Degree in Environmental Technology and/or a Certificate of Achievement in Environmental Technology Health and Safety.

Hours: 54 Lecture.

ET 251

Fundamentals of Safety and Health II

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to introduce students to the supervisory and management functions of occupational safety and health and risk management. Topics include a review of federal, state, and local agency legislation; labor and occupational safety and health regulations; and workers' compensation insurance. The course content focuses on the elements of developing a safety and health program, behavior-based safety, workplace violence, terrorism preparedness, hazardous materials and waste management, the application of occupational safety and health design/compliance and regulations, and the development of a safety and health and loss prevention program (i.e., a quality assurance/quality control (QA/QC) policy). This course is for students pursuing a degree in Environmental Technology and/or a Certificate of Achievement in Health and Safety, and working professionals or business owners responsible for worker safety or risk management.

Hours: 54 Lecture.

ET 260

Environmental Sampling and Analysis

Units: 4

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course provides an overview of the techniques of sampling protocols for obtaining soil, air, surface water, and groundwater samples based on sampling protocols approved by the United States Environmental Protection Agency (EPA). In the lecture, emphasis is placed on aspects of the procurement of samples through the EPA-approved standard operating procedures and practices. In the laboratory, students gain practical knowledge and skills for the appropriate collection and handling of environmental samples.

Hours: 54 Lecture. 54 Lab.

ET 270

Wastewater Treatment Plant Operations I

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This is the initial course in a series of wastewater treatment courses designed to train students in the practical aspects of operating and maintaining wastewater treatment plants, emphasizing the use of safe practices and procedures. It is intended for students working or who seek employment in the wastewater treatment field. Topics include the role and responsibilities of a treatment plant operator, an explanation of why wastes must be treated, and detailed descriptions of the equipment and processes used in a wastewater treatment plant. Students learn to operate and maintain racks, screens, comminutors, sedimentation tanks, trickling filters, rotating biological contactors, package-activated sludge plants, oxidation ditches, ponds, and chlorination facilities. Students also learn how to analyze and solve operational problems and perform mathematical calculations related to wastewater treatment process control. Hours: 54 Lecture.

ET 271

Wastewater Treatment Plant Operations II **Units: 3**

Prerequisite: ET 270

Transfers to: CSU

This is the second course in a series of wastewater treatment courses designed to train students in the practical aspects of operating and maintaining wastewater treatment plants, emphasizing the use of safe practices and procedures. It is intended for students working or who seek employment in the wastewater treatment field. Topics include conventional activated sludge processes, sludge digestion and solids handling, effluent disposal, plant safety and good housekeeping, plant and equipment maintenance, analysis and presentation of data, and records and report writing. Students also learn how to analyze and solve operational problems and to perform mathematical calculations related to wastewater treatment process control. Hours: 54 Lecture.

ET 272

Advanced Wastewater Treatment **Units: 3**

Prerequisite: ET 271

Transfers to: CSU

This is the third course in a series of wastewater treatment courses designed to train students in the practical aspects of operating and maintaining wastewater treatment plants, emphasizing the use of safe practices and procedures. It is intended for students working or who seek employment in the wastewater treatment field. Topics include detailed descriptions of the equipment and advanced treatment processes used for odor control, pure oxygen-activated sludge treatment, solids removal from secondary effluents, residual solids management, enhanced biological control (including nitrogen and phosphorus removal), and wastewater reclamation. This course focuses on actual operating procedures: Students learn to operate and maintain treatment plant instrumentation equipment and systems. Additionally, students learn how to analyze and solve operational problems and perform mathematical calculations

relating to wastewater treatment process control.

Hours: 54 Lecture.

ET 273

Stormwater Management, Treatment & Controls **Units: 3**

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to provide students working or seeking employment in the industrial stormwater management field with the skills necessary to manage stormwater activities at industrial sites. Such management activities include the ability to write stormwater plans, implement structural and non-structural best management practices, evaluate and design stormwater treatment systems, conduct laboratory testing, understand how to collect stormwater samples, evaluate low impact development methods, and understand the regulatory and political framework of stormwater management. Emphasis is placed on stormwater chemistry, water treatment, student-designed industrial treatment systems, auditing for compliance, monitoring of industrial effluent, interpretation of laboratory results, and how to apply data to achieve real reductions in effluent contaminated by industrial pollutants. Hours: 54 Lecture.

ET 274

Industrial Waste Water Treatment **Units: 3**

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to provide individuals, who are working in or seeking employment in the water management field, with the practical aspects of operating and maintaining industrial waste water treatment plants. Emphasis is placed on the following topics: role of the industrial waste water treatment operator, types of industrial waste streams, industrial waste water regulations, sources of wastes and methods for preventing and minimizing wastes at the source, and industrial waste monitoring. The plant operations and maintenance topics that will be highlighted include the following: operating and maintaining flow measure equipment, preliminary treatment processes, physical-chemical treatment processes, pressure and gravity filters, physical treatment processes, treatment of metal waste streams, and safety procedures. Hours: 54 Lecture.

ET 275

Water Treatment **Units: 3**

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to provide students working or seeking employment in the water management field with the practical aspects of operating and maintaining water treatment plants. Topics include responsibilities of the water treatment plant operator, sources of water, reservoir management and intake structures, coagulation and flocculation, sedimentation and filtration, disinfection and corrosion control, and taste and odor control. Day-to-day operating procedures are highlighted in this course, with topics including regulation of flows, chemical use and handling, records and reports, plant maintenance, safety and security, emergency procedures, handling complaints, and energy conservation. Hours: 54 Lecture.

ET 276

Water Distribution **Units: 3**

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to provide students working or seeking employment in the water management field with the practical aspects of operating and maintaining water distribution systems. Topics include the role and duties of water distribution system operators, procedures for operating and maintaining clear wells and storage tanks, characteristics of distribution system facilities, operating and maintaining distribution systems, maintaining water quality, disinfecting water systems, and techniques for recognizing hazards and developing safe procedures and programs. Students also learn to analyze and solve problems associated with operating a distribution system. Hours: 54 Lecture.

ET 277

Water Treatment II **Units: 3**

Prerequisite: ET 275

Transfers to: CSU

This advanced course in operating and maintaining a water treatment plant emphasizes safe and efficient work practices. Potable water reuse technologies are addressed. The objectives for this course are to prepare the student for the Grades III and IV Water Treatment Operator Certification exams administered by the California State Water Resources Control Board; thus, students learn more advanced calculations. In addition, material is presented on topics including but not limited to advanced water treatment processes, iron and manganese control, fluoridation, softening, trihalomethanes, demineralization, drinking water regulations (e.g., regulations established by the Safe Drinking Water Act, including amendments), handling and disposal of process wastes, and laboratory procedures. Finally, this course enhances students' understanding and imparts the skills needed to address California's future sustainable resource needs. Hours: 54 Lecture.

ET 280**Green Building Design Principles****Same as:** AET 280**Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This course is designed to provide students working in or seeking employment in the green building field, with an overview of the green building industry and its components. Specifically, this course assists students in preparing for the Leadership in Energy and Environmental Design Accredited Professional (LEED AP) examination, which is the most recognized professional accreditation for green building in the nation. Emphasis is placed on the six categories of design that green buildings must address for LEED certification: sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, and innovation and design process. Each of these categories are studied, with a focus on the significance of each particular credit.

Hours: 54 Lecture.

ET 290**Work Experience Education/Internship for Environmental Technology-Related Fields****Units:** 1-4**It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.****Transfers to:** CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of environmental technology and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-216 Lab.

ET 299**Directed Study: Environmental Technology****Units:** 1-3**Transfers to:** CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and

submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

ELECTRICAL TECHNOLOGY

Division of Career and Workforce Education

ETEC 101**Electrician Fundamentals****Units:** 3**It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.****Transfers to:** CSU

This introductory course covers the practices, applications, terms, and components for students already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their education, or increase their skill levels. The course covers general electrician training, laboratory and job site safety, the proper use of testing instruments, hand tools, power tools, knots, electrical drawing reading, trade practices, and an introduction to the National Electrical Code (NEC). Extensive, hands-on lab exercises are provided to reinforce these concepts.

Hours: 45 Lecture. 27 Lab.

ETEC 102**Applied Mathematics for Electricians****Units:** 3**It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.****Transfers to:** CSU

This introductory course in mathematics for electricians is for students already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their education, or increase their skill levels. The course is designed to help students become more effective, efficient users of the fundamental skills utilized in technical trades. Topics include units of measure and measurement tools; converting fractions, decimals, and percentages; graphs and charts; perimeter, area, and volume; and personal finance. Emphasis is placed on the practical application of these topics, and hands-on classroom activities reinforce these concepts.

Hours: 54 Lecture.

ETEC 103**Fundamentals of DC Electricity****Units:** 3**It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.****Transfers to:** CSU

This introductory course in the fundamentals of direct current (DC) electricity is for students already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their education, or increase their skill levels. The course covers DC electrical theory, including electrical safety, the basic principles of atomic structure, electrical quantities, static electricity, magnetism, induction, resistors, series circuits, parallel circuits, combination circuits, and DC motors and generators, formulas used in electrical theory, information regarding proper use and selection of hand tools, materials, and wiring as practiced in the electrical maintenance and construction industries. Resistive circuits are analyzed using Ohm's Law, the power equation and Kirchhoff's Voltage and Current Laws. Hands-on lab exercises reinforce these concepts.

Hours: 45 Lecture. 27 Lab.

ETEC 104**OSHA Workplace Safety****Units:** 3**It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.****Transfers to:** CSU

This course is designed for students working as or seeking employment as an electrician by providing the required number of contact hours for certification in both the California and Federal Occupational Safety and Health Administration (OSHA) safety regulations, standard first aid, and CPR for the general industry and construction workplace. Upon completion of this course and passing the certification exam, students will receive a 30-hour OSHA training certificate of completion. The course fulfills the requirements for the American Red Cross certification in standard first aid, cardiopulmonary resuscitation (CPR), and automatic defibrillation (AED).

Hours: 45 Lecture. 27 Lab.

ETEC 105**Introduction to the National Electric Code****Units:** 3**It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.****Transfers to:** CSU

This introductory course in the National Electrical Code (NEC) is for students already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their education, or increase their skill levels. The course covers the NEC requirements for commercial, office,

and light industrial wiring. Topics include the electrical layout and design of commercial buildings, feeder circuit calculations, branch circuit calculations, and circuit over current protection.

Hours: 54 Lecture.

ETEC 106

Electrical Drawings

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This introductory course in electrical drawings is for students who are already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their education, or increase their skill levels. This course is designed to help students comprehend and correctly interpret electrical drawings used in electrical and related construction trades.

Hours: 45 Lecture. 27 Lab.

ETEC 107

Fundamentals of AC Electricity

Units: 3

Prerequisite: ETEC 102, ETEC 103

Transfers to: CSU

This introductory course in the fundamentals of alternating current (AC) electricity is for students already working as or seeking employment as an electrician and who want to meet occupational goals, continue their education, or increase their skill levels. Emphasis is placed on the theory of the operation, physical properties, and characteristics of AC electrical/electronic circuits and devices. Students analyze circuits and solve problems using basic network analysis methods, and learn about the arrangement of circuit diagrams, proper identification of circuit/device symbols, and use of wiring schematics. Laboratory work provides experience with the design and test of basic electrical circuits, use of meters, schematic diagrams, oscilloscopes, and common laboratory equipment; hands-on lab exercises reinforce these concepts. The course requires previous coursework in direct current (DC) electricity and math, including right angle trigonometry.

Hours: 45 Lecture. 27 Lab.

ETEC 108

Conductors, Grounding Systems, & Testing

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This introductory course covers conductors, grounding systems, and testing, and is designed for students who are already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their education, or increase their skill levels. Topics include the proper use of hand tools, wiring methods, conductor identification, splicing, termination, trade practices, and an introduction to the National Electrical Code (NEC). Students study

and interpret the NEC, paying particular attention to NEC requirements for grounding, grounding system components, principles of operation, design and fault current calculations, as well as local ordinances and regulations related to wiring installations and principal circuit requirements.

Hours: 45 Lecture. 27 Lab.

ETEC 109

Fundamentals of Transformers

Units: 3

Prerequisite: ETEC 105, ETEC 107

Transfers to: CSU

This introductory course in the fundamentals of transformers is for students who are already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their education, or increase their skill levels. The course covers the complete electrical design of a commercial/industrial facility inclusive of general electrical, transformer, and electrical load calculations. All design work is completed to the applicable National Electrical Code (NEC). Students study and interpret the NEC, paying particular attention to NEC requirements for grounding, as well as local ordinances and regulations that cover wiring installations and principal circuit and grounding requirements. Extensive, hands-on lab exercises reinforce these concepts.

Hours: 45 Lecture. 27 Lab.

ETEC 110

Conduit, Raceways, Panelboards, Switchboards, & Overcurrent Devices

Units: 4

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This introductory course covers conduit, raceways, panelboards, switchboards, and overcurrent devices, and is designed for students already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their education, or increase their skill levels. Topics include how to properly calculate, layout and bend electrical metallic tubing (EMT) and rigid metal conduit (RMC); hand bending and the use of mechanical and machine benders per industry standards; and the function, operation, and characteristics of overcurrent protection. All design work is completed to the applicable National Electrical Code (NEC). Students study and interpret the NEC, as well as local ordinances and regulations that cover wiring installations and principal circuit requirements.

Hours: 54 Lecture. 54 Lab.

ETEC 111

Motors, Motor Controllers and Process Controllers, Generators and Power Supplies

Units: 4

Prerequisite: ETEC 102, ETEC 103, ETEC 107

Transfers to: CSU

This introductory course in the fundamentals of motors, motor and process controllers, generators, and power is for students already working as or seeking employment as an electrician, and who want to meet

occupational goals, continue their university education, or increase their skill levels. The course covers the operational theory and practices associated with motors and generators and power supplies. Students study and interpret the NEC, paying particular attention to NEC requirements for grounding, grounding system components, principles of operation, design and fault current calculations, as well as local ordinances and regulations related to wiring installations and principal circuit requirements covering wiring installations and principal circuit requirements. In addition, extensive hands-on lab exercises are provided to reinforce these concepts.

Hours: 54 Lecture. 54 Lab.

ETEC 112

Specialty & Lighting Systems

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of intermediate algebra concepts.

Transfers to: CSU

This introductory course to specialty and lighting systems power is for students already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their university education, or increase their skill levels. The course covers National Electrical Code (NEC) requirements for grounding and bonding, and the complete electrical design of a commercial/industrial facility, including general electrical drawings; fire and security alarms; voice, data, television, signaling, and fiber optic systems; lighting protection and systems; and heating, air conditioning, and refrigeration. Students verify specialty system design work according to applicable National Electrical Code (NEC) requirements. In addition, extensive demonstrations are provided to reinforce these concepts.

Hours: 54 Lecture.

ETEC 113

Electrical Cost Estimating

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of intermediate algebra concepts.

Transfers to: CSU

This introductory course in electrical cost estimating is for students already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their university education, or increase their skill levels. The course provides an overview of electrical cost estimating, including billing of materials and listing procedures, and is most specifically intended for students preparing to enter electrical estimating occupations or electrical contracting work.

Hours: 45 Lecture. 27 Lab.

ETEC 114

Personal Development & Jobsite Management

Units: 3

It is advised that students be able to engage in written composition at a college

level, read college-level texts, and have knowledge of intermediate algebra concepts.

Transfers to: CSU

This introductory course in personal development and jobsite management is for students already working as or seeking employment as an electrician, and who want to meet occupational goals, continue their university education, or increase their skill levels. Topics include personal development, working with others, effective communication, personal finance, personal employment benefits, personal growth, and workplace development, and as a result students acquire an understanding of attitudes and behaviors beneficial to success in vocational settings as well as everyday life.

Hours: 54 Lecture.

ETEC 115

Electronics & Digital Logic Circuits

Units: 4

Prerequisite: ETEC 102, ETEC 103, ETEC 107

Transfers to: CSU

This introductory course in electronics and digital logic circuits is for students who are working as or seeking employment as an electrician, and who want to meet occupational goals, continue their education, or increase their skill levels. Topics include solid state devices and digital electronic principles used in the field of electronics, with emphases on the theory of operation, methods of fabrication, physical properties, and characteristics of semiconductor devices and circuits. Students analyze circuits and solve problems utilizing basic network analysis methods; laboratory work provides experience with the design and test of basic solid state device circuits and digital logic circuits, including signal tracing and troubleshooting, use of meters, schematic diagrams, oscilloscopes, and common laboratory equipment.

Hours: 54 Lecture. 54 Lab.

ETEC 120

Electrical Circuits, Wiring, and Conduits

Units: 1.5

Advisory: ETEC 102

Transfers to: CSU

This course is intended for students working or seeking employment as electricians and who want to meet occupational goals, continue their college education, or increase their skill levels. Topics include a study and practice in properly and safely calculating, planning, installing, and testing specified electrical components, wiring plans, and conduits. Methods taught include common practice as specified by industry standards and National Electrical Code (NEC) standards.

Hours: 18 Lecture. 27 Lab.

FIRE ACADEMY

Division of Administration of Justice and Fire Technology

FAC 042

Special Equipment Familiarization (formerly FAC 4335)

Units: 0.148-2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course provides students with current information on specialized equipment and emerging technology being used in modern fire service. Examples of topical equipment include hydraulic extrication equipment, thermal imaging cameras, atmospheric monitoring, digital incident management systems, unmanned aerial vehicles (U.A.V.), and digital-trunked communication systems.

Hours: 2-18 Lecture. 2-54 Lab.

FAC 043

Advanced Fire Course

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This is a variable format (2-40 Hours of Lecture; 2-40 Hours of Lab) course designed to keep fire service personnel informed of new laws and fire codes, current prevention procedures, recent developments in hazardous materials, stress on the firefighter, technology, community relations, physical fitness & wellness and other refresher training as may be necessary.

Hours: 2-40 Lecture. 2-40 Lab.

FAC 043A

Hazardous Materials (Hazmat)

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This advanced fire course is designed to keep fire service personnel informed of new laws, codes, and techniques in hazardous materials (hazmat) operations and awareness. The effects of firefighter exposure, review of technology, and other refresher training may be included.

Hours: 2-40 Lecture. 2-40 Lab.

FAC 043B

Technical Rescue

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This advanced fire course is designed to keep fire service personnel informed of new laws, codes, and techniques in technical rescue, including rope rescue, structural collapse, and confined space. The effects of firefighter exposure, a review of technology, and other refresher training may be included.

Hours: 2-40 Lecture. 2-40 Lab.

FAC 043C

Engine Company Operations

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This advanced fire course is designed to keep fire service personnel informed of new laws, codes, and techniques in engine company operations and awareness. The effects of firefighter exposure, a review of technology, and other refresher training may be included.

Hours: 2-40 Lecture. 2-40 Lab.

FAC 043D

Truck Company Operations

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This advanced fire course is designed to keep fire service personnel informed of new laws, codes, and techniques in truck company operations and awareness. The effects of firefighter exposure, a review of technology, and other refresher training may be included.

Hours: 2-40 Lecture. 2-40 Lab.

FAC 043E

Wildland Urban Interface

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This advanced fire course is designed to keep fire service personnel informed of new laws, codes, and techniques in wildland urban interface operations and awareness. The effects of firefighter exposure, a review of technology, and other refresher training may be included.

Hours: 2-40 Lecture. 2-40 Lab.

FAC 043F

Firefighter Safety, Survival, Health, and Welfare

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This advanced fire course is designed to keep fire service personnel informed of new laws, codes, and techniques in firefighter safety, survival, health, and welfare. The effects of firefighter exposure, a review of technology, and other refresher training may be included.

Hours: 2-40 Lecture. 2-40 Lab.

FAC 043G

Management and Command

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This advanced fire course is designed to keep fire service personnel informed of new laws, codes, and recent developments in fire service management and command. The effects of firefighter exposure, a review of technology, and other refresher training may be included.

Hours: 2-40 Lecture. 2-40 Lab.

FAC 043H

Firefighter 1: Manipulative and Cognitive Skills Exam Preparation

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This refresher course is designed for employed firefighters and other students who have received training equivalent to the California State Fire Marshal Firefighter 1 Certification curriculum, either through Accredited Regional Training Programs (ARTP) or an Accredited Local Academy (ALA), or having met curricular learning outcomes through experience in the fire service. It is designed to prepare employed firefighters or students to complete all manipulative and cognitive exams required to obtain the International Fire Services Accreditation

Congress (IFSAC)/Pro Board Firefighter 1 certification as designated by the California State Fire Marshal. The course covers the three modules of the California Firefighter 1 certification (Firefighter 1A: Structure; 1B: HazMat; and 1C: Wildland), with topics that include personal protective equipment, structural tactics and strategy, hazardous materials awareness and operations, and wildland firefighting techniques.
Hours: 2-40 Lecture. 2-40 Lab.

FAC 043J

Firefighter 2: Manipulative and Cognitive Skills Exam Preparation

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This refresher course is designed for employed firefighters and other students who have received training equivalent to the California State Fire Marshal Firefighter 2 Certification curriculum, either through Accredited Regional Training Programs (ARTP) or an Accredited Local Academy (ALA), or having met curricular learning outcomes through experience in the fire service. It is designed to prepare employed firefighters or students to complete all manipulative and cognitive exams required to obtain the International Fire Services Accreditation Congress (IFSAC)/Pro Board Firefighter 2 certification as designated by the California State Fire Marshal. The course covers the Firefighter 2A: Structure module, with topics that include organizing incident management, coordinating fire attack, rescue operations, radio communications, and cause and origin.
Hours: 2-40 Lecture. 2-40 Lab.

FAC 049

Fire Control Operations, Structures (formerly FAC 4327)

Units: 0.148-2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course provides students with the cognitive and psychomotor skills that prepare a firefighter to locate, control, and extinguish an interior structure fire. A review of basic firefighting tactics and strategy for occupancies such as dwellings and commercial, industrial, and special occupancies is included. Skills in hoseline handling, nozzle selection and use, flow path management, transitional attack, advanced victim search (V.E.I.S.) are also presented and practiced. Emphasis is placed on safety to personnel, and crew cohesiveness.
Hours: 2-18 Lecture. 2-54 Lab.

FAC 050

Fire Instructor I

Units: 2.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course provides the skills and knowledge needed for entry-level professional instructors to perform their duties safely, effectively, and competently. The curriculum is based on the 2012 edition of the National Fire Protection Association (NFPA) 1041 Standard for Fire Service Instructor Professional Qualifications. At the end of this course, candidates for

Instructor I certification will be able to teach and deliver instruction from a prepared lesson plan utilizing instructional aids and evaluation instruments, adapt a lesson plan, and complete reporting requirements to the local jurisdiction.
Hours: 45 Lecture.

FAC 051

Fire Instructor II

Units: 2.5

Prerequisite: FAC 050

This course provides the skills and knowledge needed for intermediate-level professional instructors to perform their duties safely, effectively, and competently. The curriculum is based on the 2012 edition of the National Fire Protection Association (NFPA) 1041 Standard for Fire Service Instructor Professional Qualifications, and the 2012 edition of NFPA 1403 Standard on Live Fire Training Evolutions. At the end of this course, candidates for Instructor II certification will be able to develop lesson plans and evaluation instruments, teach and deliver instruction, evaluate and coach other instructors, analyze resources, and formulate a program budget.
Hours: 45 Lecture.

FAC 054

Fire Investigation 1A: Basic Fire Investigation

Units: 2.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course provides information on securing the fire scene and determining the origin and cause of the fire. Topics include responsibilities of a fire investigator, securing the fire ground, conducting an exterior and interior survey, analyzing fire patterns, interpreting individual fire patterns, discriminating the effects of explosions, examining and removing fire debris, reconstructing the area of origin, and inspecting the performance of building systems. The 2014 edition of the National Fire Protection Association (NFPA) 1033 Standard Professional Qualifications for Fire Investigators is the basis for this course.
Hours: 45 Lecture.

FAC 055

Fire Investigation 1B: Evidence and Documentation

Units: 2

Prerequisite: FAC 054

This course provides information on scene documentation and evidence collection/preservation. Topics include photographing the scene, diagramming the scene, constructing investigative notes, processing evidence and establishing chain of custody, processing victims and fatalities, selecting evidence for analysis, maintaining a chain of custody, preparing a fire investigation report, and disposing of evidence. The 2014 edition of the National Fire Protection Association (NFPA) 1033 Standard for Fire Investigator Professional Qualifications is the basis for this course.
Hours: 36 Lecture.

FAC 057

Fire Inspector 1A (formerly FAC 4346)

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course is the first of a four-course series designed to prepare fire service personnel or other students interested in becoming a California Certified Fire Inspector 1. It is one of the State Board of Fire Services-accredited courses and applies to California Fire Service Training and Educational System certifications. Topics covered provide a broad, technical overview of fire prevention codes, ordinances, inspection practices, key hazards, responsibilities and authority, occupancy classification and types of construction, egress requirements, fire-resistant assemblies, general fire safety provisions, and principles and procedures for fire inspections.
Hours: 40 Lecture.

FAC 058

Fire Inspector 1B (formerly FAC 4347)

Units: 2

Prerequisite: FAC 057

This course is the second in the series of four courses designed for fire service personnel or other students interested in becoming a California Certified Fire Inspector. The course focuses on the special hazards associated with flammable and combustible liquids and gases, with topics of discussion that include bulk storage and handling and transportation of flammable gases and liquids.
Hours: 36 Lecture.

FAC 062

Driver Operator 1A (formerly FAC 4330)

Units: 0.148-2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course provides students with the knowledge and skills needed to perform preventative maintenance on and operate a fire apparatus. Topics include routine tests, inspections, and servicing functions; operating, backing, maneuvering, and turning a fire apparatus under a variety of conditions; and operating all fixed systems and equipment on a fire apparatus. This course fulfills the California Department of Motor Vehicles (D.M.V.) requirements for the noncommercial Class C driver's license with a firefighter endorsement.
Hours: 2-18 Lecture. 2-54 Lab.

FAC 063

Driver Operator 1B (formerly FAC 4331)

Units: 0.148-2

It is advised that students be able to engage in written composition at a college level, read college-level texts and have knowledge of elementary algebra concepts.

This course trains students to operate a fire apparatus under emergency and non-emergency conditions. It integrates the physical properties of modern fire apparatus suppression systems, pump theory, and operation; hydraulic calculations, water supply considerations, relay pumping principles, water shuttle operations, and foam systems operation; and apparatus maintenance and testing. This course includes classroom discussion pumping demonstrations, and pumping practice.
Hours: 2-18 Lecture. 2-54 Lab.

FAC 066**Hazardous Materials 1B (formerly FAC 4305)****Units:** 2-2.963**It is advised that students be able to engage in written composition at a college level and read college-level texts.**

This course is for fire department personnel and other interested students who want to learn about the current laws and regulations pertaining to the labeling of hazardous materials and the United Nations (U.N.) Hazardous Classifications. The National Fire Protection Association (N.F.P.A.) guidelines and the Department of Transportation (D.O.T.) rules and regulations are covered in this course.

Hours: 36-40 Lecture. 4-40 Lab.

FAC 069**Hazardous Materials 1F (formerly FAC 4329)****Units:** 2-2.963**It is advised that students be able to engage in written composition at a college level and read college-level texts.**

This course teaches students how to operate on a fire department response to hazardous materials incidents. A basic review of hazard classifications, response concerns when hazardous materials are present, and responder safety is presented. This course also presents response issues related to terrorist acts involving chemical, biological, radiological, nuclear, and explosive (C.B.R.N.E.) weapons. This class meets the requirements of National Fire Protection Association (N.F.P.A.) 470, Hazardous Materials Standards for First Responders, and the curriculum of the California Specialized Training Institute (C.S.T.I.).

Hours: 36-40 Lecture. 4-40 Lab.

FAC 074**Company Officer 2D - All-Risk Command Operations for Company Officers (formerly FAC 4350)****Units:** 2**It is advised that students be able to engage in written composition at a college level and read college-level texts.**

This course teaches students to conduct incident size-up and the skills to develop and implement an initial plan of action that involves single and multi-unit operations. Students apply these skills to situations involving various types of emergency incidents, and learn to mitigate each situation by following agency safety procedures, conducting pre-incident planning, and developing and undertaking a post-incident analysis.

Hours: 18 Lecture. 56 Lab.

FAC 075**Company Officer 2E - Wildland Incident Operations for Company Officers (formerly FAC 4361)****Units:** 2**It is advised that students be able to engage in written composition at a college level and read college-level texts.**

This course covers the process of evaluating and reporting incident conditions, analyzing incident needs, and developing and implementing a plan of action. Students also learn how to deploy incident

resources, complete all operations to suppress a wildland fire, establish an incident command post, create an incident action plan, and complete incident records and reports.

Hours: 36 Lecture. 4 Lab.

FAC 118**Firefighter I, Basic Fire Academy****Units:** 18**It is advised that students have knowledge of elementary algebra.****Prerequisite:** FTEC 044, FTEC 101, FTEC 102, FTEC 103, FTEC 104, FTEC 105, FTEC 106**Transfers to:** CSU

This course is designed for recently employed firefighters and other interested students. Topics covered include organization of the public and private fire service, characteristics and behavior of fire, fire hazards and firefighter safety, extinguishing agents and related extinguishing equipment, fire protection systems and water supply, incident command system, confined-space rescue awareness, building construction and assemblies, basic fire fighting tactics and strategy, fire prevention, hazardous materials, emergency care, wildland firefighting, rapid intervention, rescue systems, and physical fitness. This course meets the State Board of Fire Services (SBFS) requirements for designation as a "California Firefighter I Accredited Academy" (Accredited Regional Academy (ARA) by the California State Fire Marshal). Students who complete this course also receive California certification in Vehicle Extrication, Fire Control I, Fire Congrol II, Hazardous Materials First Responder Operational, Confined Space Rescue Awareness, Rescue Systems I, S-110, S-130, S-190, Rapid Intervention Crew Tactics, and ICS-200. This course requires completion of a medical physical examination and includes arduous physical activity.

Hours: 126 Lecture. 594 Lab.

FINANCE

Division of Arts, Business, & Cultural Programs

FIN 101**Introduction to Financial Planning****Units:** 3**Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an elementary algebra course. It is also advised that students be able to read college-level texts.****Transfers to:** UC/CSU

This course provides an overview of the fundamentals of financial planning, and is designed to provide students with tools needed to achieve their personal financial goals. Students learn to make informed decisions related to spending, saving, borrowing, and investing by applying quantitative reasoning concepts. Course topics include the financial planning process, budgeting, cash flow, debt consolidation, investing, and retirement planning.

Hours: 54 Lecture.

FIN 102**Fundamentals of Financial Management and Investing****Units:** 3**Prerequisite:** FIN 101**Transfers to:** UC/CSU

This course provides an introduction to financial management and investment decision-making involving stocks, bonds, mutual funds, government securities, options, and real estate. Topics include asset allocation principles, modern portfolio theory, investment tools and strategies, diversification, and tax implications of investments. This course is designed for students interested in pursuing a Finance Certificate of Achievement or entry-level positions in financial planning.

Hours: 54 Lecture.

FRENCH

Division of Communications and Languages

FR 101**French I****Units:** 4.5**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU

This course is an introduction to the essentials of French language: reading, listening, speaking, and writing skills. Various facets of French-speaking culture (history, philosophy, and politics) will be analyzed via cross-cultural comparisons. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs and films. The Language Laboratory work focuses on vocabulary, grammar, and cultural practices. This class is designed for those interested in learning to speak French as well as those seeking a degree in the French language.

Hours: 72 Lecture. 27 Lab.

FR 102**French II****Units:** 4.5**Prerequisite:** FR 101 or completion of 2 years of high school French with a grade of "C" or better**Transfers to:** UC/CSU

This course is a continuation to the essentials of the French Language: reading, listening, speaking, and writing skills. Various facets of French-speaking culture (history, philosophy, and politics) will be analyzed via cross-cultural comparisons. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs, and films. The Language Laboratory work focuses on vocabulary, grammar, and cultural practices. This class is designed for those interested in continuing to learn to speak French as well as for those seeking a degree in the French language.

Hours: 72 Lecture. 27 Lab.

FR 201**French III****Units:** 4.5**Prerequisite:** FR 102 or completion of three years high school French with a grade of "C" or better.**Transfers to:** UC/CSU

This course stresses advanced conversational, reading, writing and translation skills. Emphasis is placed on understanding spoken French as well as on proficiency and accuracy in speaking French. The course will include an introduction to French literature as well as the reading of one novel in French to be determined by the instructor. Various facets of French culture, philosophy, politics and history will also be explored. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs, and films. The Language Laboratory work focuses on vocabulary, grammar, and cultural practices. This class is designed for students who wish to broaden their knowledge in French as well as for those seeking a degree in the French language.

Hours: 72 Lecture. 27 Lab.

FR 202**French IV****Units:** 4.5**Prerequisite:** FR 201 or completion of four years of high school French with a grade of "C" or better.**Transfers to:** UC/CSU

This course is a continuation of FR 201. The course stresses advanced conversational, reading, writing and translation skills. Emphasis is placed on understanding spoken French as well as on proficiency and accuracy in speaking French. The course will include an introduction to French literature as well as the reading of one novel in French to be determined by the instructor. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs, and films. The Language Laboratory work focuses on vocabulary, grammar, and cultural practices. Various facets of French culture, philosophy, politics and history will also be explored. This course is intended for those interested in continuing to learn to speak French as well as for those seeking a degree in the French language.

Hours: 72 Lecture. 27 Lab.

FR 299**Directed Study: French****Units:** 1-3**Transfers to:** CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or

related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

FIRE TECHNOLOGY

Division of Administration of Justice and Fire Technology

FTEC 044**Physical Fitness and Ability for the Firefighter****Units:** 3

Students must be able to lift 75 pounds, drag a 150 pound drag dummy and use a sledge hammer in completion of a physical abilities test. It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course is designed to present in-service firefighters and interested students with information about conditioning and fire department physical ability test designs. The course includes manipulative drills needed to pass California physical abilities tests (PAT). This course will provide information on the most recently developed tests in Southern California, including the Candidate Physical Abilities Test (CPAT) and the Biddle Physical Ability Test (PAT). Students learn about firefighter wellness programs and review basic nutrition as well as current National Fire Protection Association (NFPA) standards pertaining to firefighter health and safety. Students must be able to perform basic firefighter activities including climbing, using sledge hammers, dragging 150-pound dummies, and wearing a self-contained breathing apparatus.

Hours: 36 Lecture. 54 Lab.

FTEC 045**Firefighter Entrance Examination Techniques****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course is designed to prepare students to take a firefighter's entrance examination. Topics covered include a review of firefighter duties, employment requirements in the fire service, and the hiring process. Resumes, written examinations, oral interviews, and related topics are discussed.

Hours: 54 Lecture.

FTEC 101**Fire Protection Organization****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides students with an overview of fire protection issues. Topics include an introduction to the philosophy and history of fire protection and fire service; organization and function of public and private fire protection services; laws and regulations affecting fire service; and the role of fire departments as part of local government. Basic fire chemistry, fire protection systems, firefighting strategies, and possible career opportunities in fire-related fields are also presented.

Hours: 54 Lecture.

FTEC 102**Principles of Fire & Emergency Services Safety & Survival****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course introduces fire technology or other interested students to the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavior changes throughout the emergency services. This course has been updated to meet the National Fire and Emergency Services Higher Education objectives as it pertains to firefighter safety and survival techniques used in today's fire service.

Hours: 54 Lecture.

FTEC 103**Fire Behavior and Combustion****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides fire technology or other interested students with an exploration of theories and fundamentals of how and why fires start, spread, and how they are controlled. An in-depth study of fire chemistry and physics, fire characteristics of materials, extinguishing agents, and fire control techniques will be explored.

Hours: 54 Lecture.

FTEC 104**Fire Prevention Technology****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to provide fire technology or other interested students with fundamental information regarding the history and philosophy of fire prevention, organization and operation of a fire prevention bureau, use of fire codes, identification and correction of fire hazards, and the relationships of fire prevention with built-in fire protection systems, fire investigation, and fire and life-safety education.

Hours: 54 Lecture.

FTEC 105**Building Construction for Fire Protection****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This course provides fire technology or other interested students with an understanding of the essential components used in building construction that directly relates to fire safety. The elements of construction and design of structures, factors when inspecting buildings, preplanning fire operations, and operating at fires will be discussed. The development and evolution of building and fire codes will be studied in relationship to past fires in residential, commercial, and industrial occupancies.

Hours: 54 Lecture.

FTEC 106**Fire Protection Equipment and Systems****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This course provides the fire technology student with information pertaining to the design and operation of fire detection and alarm systems, heat and smoke control systems, special protection and sprinkler systems, water supply for fire protection and portable fire extinguishers.

Hours: 54 Lecture.

FTEC 107**Hazardous Materials I****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This course provides fire technology or other interested students with information pertaining to the first responder role when dealing with hazardous materials operations. Hazardous materials decontamination procedures will also be discussed. Classification of hazardous materials and National Fire Protection Association standards (NFPA 472) will be addressed.

Hours: 54 Lecture.

FTEC 108**Hazardous Materials II****Units:** 3**Prerequisite:** FTEC 107**Transfers to:** CSU

This course provides the fire technology or other interested student with information pertaining to the handling, identification, firefighting practices, and the explosive hazards confronted with during a hazardous materials response. The role of a Hazardous Material Technician and Specialist will be discussed. The types of hazardous materials that could be used during a terrorism event will be covered.

Hours: 54 Lecture.

FTEC 109**Fire Fighting Tactics and Strategy****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This course provides the fire technology or other interested students with information pertaining to the elements of the incident management system, evaluation of information management and critical incident factors including control of incident communications, basic strategy decisions, and the development of an incident action plan. Basic current fire ground strategies will also be explored in this course.

Hours: 54 Lecture.

FTEC 110**Rescue Practices****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This course provides fire technology or other interested students with a better understanding of rescue problems and techniques in the fire service field. Topics covered include emergency rescue equipment, toxic gases, chemicals, diseases, radiation hazards, and care of victims. Students will become prepared for emergency childbirths, respiration and resuscitation, auto extrication, and other emergency conditions throughout the course.

Hours: 54 Lecture.

FTEC 111**Fire Hydraulics****Units:** 3**It is advised that students be able to engage in written composition at a college level, read college-level texts, and possess the ability to add, subtract, multiply, and divide.****Transfers to:** CSU

This course provides the fire technology student with information applicable to fire service hydraulics, specifically pertaining to fire hose, friction loss and calculations for gallons per minute (GPM) on the fire ground. The student will study fire ground hydraulic formulas used to calculate needed fire flow for residential and commercial structures.

Hours: 54 Lecture.

FTEC 112**Fire Apparatus and Equipment****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This course provides the fire technology or other interested students with information pertaining to the design and operation of fire department apparatus. This includes components such as the engine, pump and drive train. Basic hydraulic calculations for operation and safe vehicle use will also be discussed. Topics addressed include the different types of fire apparatus and their function including wildland firefighting apparatus and municipal fire apparatus.

Hours: 54 Lecture.

FTEC 114**Fire Investigation****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This course provides the fire technology or other interested students with an understanding of determining causes of fires including accidental, suspicious, and incendiary. Topics covered include arson laws, field note taking, and fire cause. Also addressed are the recognition and preserving of evidence, the interviewing of witnesses and suspects, arrest and detention procedures, court demeanor, and the giving of court testimony.

Hours: 54 Lecture.

FTEC 117**Fire Service Management, Safety, and Wellness****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This course is designed for fire technology majors to provide the student with the concepts, theories and principles of fire service management. Emphasis is placed on the distinctions between management, supervision, and leadership. Fire service stress and safety management will be discussed and the national fire service standards will be presented.

Hours: 54 Lecture.

FTEC 150**Truck Academy Operations****Units:** 2.5**Prerequisite:** FAC 118 or Firefighter 1 certification or completion of a CSFM approved Fire Academy**Transfers to:** CSU

This course is for veteran firefighters or other interested students that want to enhance their knowledge and ability as it pertains to the fire ground operations associated with truck company tactics and strategy. Basic roof construction, vertical and horizontal ventilation, forcible entry, positive and negative ventilation, search and rescue, thermal imaging technology, firefighter safety and survival, rapid intervention tactics, elevator rescue and related truck company operations will be discussed.

Hours: 25 Lecture. 60 Lab.

FTEC 290**Work Experience Education/Internship for Fire Technology-Related Fields****Units:** 1-4**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of fire technology and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work

Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-216 Lab.

FTEC 299

Directed Study: Fire Technology

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title 5 regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

FILM, TELEVISION, AND ELECTRONIC MEDIA

Division of Communications and Languages

FTVE 115

Introduction to Screenwriting

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This is an introductory course in narrative script writing for film and episodic television. Emphasis on basic screenplay structure, characters, conflict, theme, and technical script formatting in the development of a short screenplay. Promotes representation of race/ethnicity, gender, class, sexual orientation, and ability.

Hours: 54 Lecture.

FTVE 215 (C-ID: 100)

Advanced Screenwriting

Units: 3

Prerequisite: FTVE 115

Transfers to: CSU

This course is designed for prospective feature film or television writers. Students progress through a series of assignments, beginning with the revision of the step outline and Act I completed as part of the

requirements for Introduction to Screenwriting (FTVE 115). The central aim of the course is to reexamine the fundamental elements of screenwriting, which include developing an effective step outline, creating a viable story idea, developing characters, and learning to successfully pitch the story.

Hours: 54 Lecture.

FIRST YEAR SEMINAR

Division of Library and Learning Support Services

FYS 101

Beyond Words: Visual and Performing Arts in Action

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This seminar course is designed to introduce first-year students to the spirit of academic excellence and intellectual curiosity that lies at the heart of learning. All First-Year Seminar courses explore a common selected theme in depth. This seminar course will approach the selected theme as a conduit for understanding the visual and performing arts. FYS 101 will examine the artist's use of an abstracted language that moves beyond words to the visual, aural, and kinesthetic. Students are invited to explore creativity, innovation, self-expression, imagination, close observation, introspection, and inquisitiveness as artistic responses to the world around us. This seminar will then examine how visual and performing artists give shape to these responses by applying skill and ingenuity. Through inquiry-based instruction and active learning, students develop into self-directed problem-solvers. Coursework will build throughout the semester toward a culminating project in a variety of media. Through presentations, guest speakers, and field trips, students will be exposed to professions and fields of study in dance, design, film, music, theater, and visual art.

Hours: 54 Lecture.

FYS 103

Science in Society

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This seminar course is designed to introduce first-year students to the spirit of academic excellence and intellectual curiosity that lies at the heart of learning. All First-Year Seminar courses explore a theme in depth. FYS 103 will explore the selected theme through the lens of the natural sciences, their effects on society, and how the pursuit of science has been influenced by social forces. Through inquiry-based instruction and active learning, students develop into self-directed problem-solvers. Coursework will build throughout the semester toward a culminating project in various media. Through presentations, guest speakers, and field trips, students will be exposed to professions and fields of study in the natural sciences.

Hours: 54 Lecture.

FYS 104

Understanding the SELFie: Diversity and Human Experiences

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This seminar course is designed to introduce first-year students to the spirit of academic excellence and intellectual curiosity that lies at the heart of learning. All First-Year Seminar courses explore a common selected theme in depth. This seminar course will approach the selected theme as a conduit for understanding diversity and human experiences. FYS 104 will explore major themes, problems, theories, and ideologies from both past and present. This seminar encourages student inquiry and analysis into subject matter which continue to shape their lives today. This course challenges students to utilize primary skills found in each discipline in order to explain human experiences, examine historical and contemporary theories, and facilitate their contributions to their communities at large. Through inquiry-based instruction and active learning, students develop into self-directed problem-solvers. Coursework will build throughout the semester toward a culminating project in various media. Through presentations, guest speakers, and field trips, students will be exposed to professions and fields of study in behavioral and social sciences.

Hours: 54 Lecture.

FYS 105

Voices, Ideas, and the Power of Language

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This seminar course is designed to introduce first-year students to the spirit of academic excellence and intellectual curiosity that lies at the heart of learning. All First-Year Seminar courses explore a theme in depth. This seminar course will consider the selected theme through the lens of written and oral communication. FYS 105 will explore the etymology, analysis, and practice of how we use symbols in society, both orally and in writing. Through inquiry-based instruction and active learning, students develop into self-directed problem-solvers. Coursework will build throughout the semester toward a culminating project in various media. Through presentations, guest speakers, and field trips, students will be exposed to professions and fields of study in language, literature, and verbal expression.

Hours: 54 Lecture.

GAME DESIGN

Division of Arts, Business, & Cultural Programs

GAD 101

Introduction to Game Design

Units: 3

Advisory: ENGL 101

Transfers to: CSU

This course is an introduction to the theory and process of designing games. Students critically explore the historical, cultural, economic, and social aspects of the concepts and techniques used in the design of games; discover what the components of games are, including what parts of games are influenced by their design; and learn several ways to approach the design of a game, including processes and best practices for prototyping, play testing, and balancing a game after it has been designed.

Hours: 36 Lecture. 54 Lab.

GAD 102

Game Concept Design and Visual Development

Units: 3

Advisory: ENGL 101

Transfers to: CSU

In this course, students develop foundational skills for illustration and concept design by creating characters, props, and environments as used in the video game and animation industries. The course will focus on creating thumbnail and final illustrations, composition, value studies, perspective, and digital painting techniques for a concept design workflow.

Hours: 36 Lecture. 54 Lab.

GAD 103

Game Technologies and Engines

Units: 3

Advisory: ENGL 101

Transfers to: CSU

This course is an introduction to the fundamental concepts and vocabulary of computer game tools and techniques. Students employ a variety of digital tools with a focus on game engines (e.g., Unreal Engine) to create playable environments. Included are topics such as introduction to game editors, 3D asset creation and management, and foundational skills in creating playable content.

Hours: 36 Lecture. 54 Lab.

GAD 104

Game Level and Environment Design

Units: 3

Prerequisite: GAD 102

Transfers to: CSU

In this course, students develop skills in the process of creating environments and level designs for playable media. Students design and construct living environments that include climate, habitat, and ambiance that reflect a level design document.

Hours: 36 Lecture. 54 Lab.

GAD 106

Game Prototyping and Mechanics

Units: 3

Prerequisite: GAD 103

Transfers to: CSU

In this course, students explore the various aspects of game mechanics: what they are, how they can be formed, how they interact with each other, what values they transmit, and how they relate to the application of the overall game design. Students prototype, test, and implement mechanics that meet the limitations of a "target platform." In the course, a game design document is created that illustrates all aspects of game production, including game description, game mechanics,

and identifying problem areas. The game design documents address business aspects of the industry that impact designs, including demographics, economic models, budgets, and marketing.

Hours: 36 Lecture. 54 Lab.

GAD 203

Game Technologies and Systems

Units: 3

Prerequisite: GAD 106

Transfers to: CSU

In this course, students develop a fundamental understanding of how the technical aspects of game engines (e.g., Unreal Engine) are applied to the development of games. Topics include animation construction, playable characters, heads up display (HUD) development, and event triggers. In the course, students design a game and, using a game engine, make a basic prototype that includes a major feature, a minor feature, and a level mechanic.

Hours: 36 Lecture. 54 Lab.

GAD 210A

Game Production Studio A

Units: 3

Prerequisite: GAD 101

Transfers to: CSU

In this course, students explore the process and production in game design and related industries by working in groups on projects. In the course, students closely simulate the roles, responsibilities, and demands of professional work environments such as animation studios, visual effects houses, and game design companies; and work on projects such as animated shorts, interactive content, and video games.

Hours: 36 Lecture. 54 Lab.

GAD 210B

Game Production Studio B

Units: 3

Prerequisite: GAD 203

Transfers to: CSU

In this course, students explore the process and production in game design and related industries by working in groups on projects. In the course, students closely simulate the roles, responsibilities, and demands of professional work environments such as animation studios, visual effects houses, and game design companies. Students also continue development work on projects such as animated shorts, interactive content, and video games.

Hours: 36 Lecture. 54 Lab.

GAD 210C

Game Production Studio C

Units: 3

Prerequisite: GAD 210B

Transfers to: CSU

In this course, students explore the process and production in game design and related industries by working in groups on projects. In the course, students closely simulate the roles, responsibilities, and demands of professional work environments such as animation studios, visual effects houses, and game design companies. Students also take a lead role in development work on projects such as animated shorts, interactive content, and video games.

Hours: 36 Lecture. 54 Lab.

GRAPHIC DESIGN

Division of Arts, Business, & Cultural Programs

GDSN 110

History of Graphic Design

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is a survey of historical developments in graphic design from the Industrial Revolution to the Digital Age. Students will analyze the development of graphic design, its origins as a career [and] technical education (CTE) area, and the influences of the political, social, and economic climates of the different historical periods. The course provides a historical framework for analyses of current and future trends in graphic design, and explores various historical art and design movements in order to recognize and evaluate the contexts of fine art, design, and science.

Hours: 54 Lecture.

GDSN 150

Typography

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Advisory: NART 285

Transfers to: UC/CSU

This course is intended for students interested in the history, theory and practice of typography as it applies to graphic design, advertising, and other areas of design and visual communication. Students learn and practice hand-rendered and mechanical aspects of typography, and how typography attracts, informs, educates, inspires, and creates retaining impressions—as well as how typography modifies human actions and behavior. Through discussions, exercises, and projects, students develop an understanding leading to clearer interpretations of typography and its role in human history, communication, design, and art. Activities include the history and principles of typography, letter structure, typeface selection, fundamentals of typesetting and introductory typographic layout.

Hours: 36 Lecture. 72 Lab.

GDSN 151

Typographic Design

Units: 3

Prerequisite: GDSN 150

Advisory: NART 285

Transfers to: UC/CSU

This course is intended for students interested in the theory and practice of letterforms and typography as they apply to graphic design, advertising, and other areas of design and visual communication. Focus is placed on the compositional use of type as a principal design element and its relationship to issues of visual hierarchy, readability, and page structure. Students continue their exploration of typography as an expressive visual form through typographic design projects.

Hours: 36 Lecture. 72 Lab.

GDSN 162**Introduction to Web Design: User Experience Design (UX)****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Advisory:** NART 285**Transfers to:** UC/CSU

This introductory web design course is a practical introduction for students interested in user experience (UX) and visual interface design, and the challenges they pose for graphic designers. Using web design applications (like Adobe *Dreamweaver* and *Photoshop*), students are introduced to the steps involved in creating a basic, functional, and interactive website. Topics include aesthetic design considerations, front-end technology, interaction, UX, user interface (UI) and cascading style sheets (CSS) design, file optimization, and website principles and practices. This course is for students interested in a degree or certificate in graphic design and those interested in web design and interactive design.

Hours: 36 Lecture. 72 Lab.

GDSN 163**Intermediate Web Design: Interactive Design****Units:** 3**Prerequisite:** GDSN 162**Advisory:** NART 285**Transfers to:** UC/CSU

Focusing on usability, this intermediate class offers broader and more advanced instruction related to the "front-end" visual design and aesthetics of interactive media, as well as the technical and design requirements of designing a fully functional website. Using intermediate web design applications (like Adobe *Dreamweaver*), students are instructed in the techniques needed to maximize the quality of user experience (UX). Students continue to perfect the creation of a fully functional website using multifaceted applications. Topics include interactive design software, front-end aesthetics, technology, interaction, UX, user interface (UI) and cascading style sheets (CSS) design, the principles and elements of digital design and aesthetics, and interactive design business practices. This course is for students interested in a degree or certificate in graphic design and those interested in expanding their knowledge of web design and interactive design.

Hours: 36 Lecture. 72 Lab.

GDSN 164**Digital Illustration Design****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Advisory:** NART 285**Transfers to:** UC/CSU

This introductory course is an introduction to graphic design and uses vector software (like Adobe *Illustrator*) as the principal digital tool. Topics include the principles and elements of design, typography, color, shape stroke, illustration techniques, page layout design, as well as introductory critical concepts and professional practices employed by graphic designers. This course includes exercises,

projects, and portfolio building with an emphasis on professional standards. This course is for students interested in a degree or certificate in graphic design as well as those interested in 2-dimensional (2D) design and layout applications employed as tools by graphic designers.

Hours: 36 Lecture. 72 Lab.

GDSN 165**Branding and Identity Design****Units:** 3**Prerequisite:** GDSN 164**Advisory:** NART 285**Transfers to:** CSU

This course is an exploration of branding and identity design, a sub-discipline of graphic design. Topics include the research and development of trademarks and logos for clients, the principles and elements of design, typography, color, shape stroke, illustration techniques, and page layout design, as well as intermediate and advanced critical concepts and professional practices employed by graphic designers. This course includes portfolio building with an emphasis on professional standards. This course is for students interested in a degree or certificate in graphic design as well as those interested in 2-dimensional (2D) design and layout applications employed as tools by graphic designers.

Hours: 36 Lecture. 72 Lab.

GDSN 172**Publication Design****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Advisory:** NART 285**Transfers to:** CSU

This introductory course is an exploration of publication design, a sub-discipline of graphic design and uses page-layout software (like Adobe *InDesign*) as the principal digital tool. Topics include the principles and elements of design, page composition, creative use of typography, color, imagery and the grid, and discussion of output and pre-press considerations for print and digital distribution, as well as current methods and styles, critical concepts, and professional practices employed by graphic designers. This course includes portfolio building, with an emphasis on professional standards.

Hours: 36 Lecture. 72 Lab.

GDSN 174**Packaging Design****Units:** 3**Prerequisite:** GDSN 164**Advisory:** NART 285**Transfers to:** CSU

In this introductory course, students will use software applications employed as tools by graphic designers for 2-dimensional (2D) and 3-dimensional (3D) surfaces. The course is a project-driven exploration of packaging design, which is defined as stylized functional design for carrying, protecting, or presenting a product. Topics include the principles and elements of design, current technical and creative methods and styles employed by package designers, sustainability, advanced critical concepts, and professional practices.

This course includes portfolio building, with an emphasis on professional standards.

Hours: 36 Lecture. 72 Lab.

GDSN 178 (C-ID: ARTS 250)**Digital Imaging Design****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Advisory:** NART 285**Transfers to:** UC/CSU

This introductory graphic design course uses bitmap software as the principal digital tool. Topics include the principles and elements of design, typography, color, photo/raster/bitmapped-based scanning, vector graphic integration, time-based design, image formats, optimization, retouching, adjustments, compositing, blending, color, conceptual, narrative and time-based techniques, technical and creative methods and styles employed by graphic designers, introductory critical concepts, and professional practices. The course includes exercises, projects, and portfolio building, with an emphasis on professional standards. This course is for students interested in obtaining a degree or certificate in graphic design or transfer, and those seeking to pursue a career in graphic design or related professions.

Hours: 36 Lecture. 72 Lab.

GDSN 179**Advanced Digital Imaging Design****Units:** 3**Prerequisite:** GDSN 178**Advisory:** NART 285**Transfers to:** UC/CSU

This course is for students interested in a degree in graphic design and/or those interested in advanced 2-dimensional (2D) design and layout applications employed as tools by graphic designers. This course is an advanced, project-driven exploration of graphic design, and uses 2D design and layout application software (like Adobe *Photoshop*) as the principal digital tool. Topics include photo montage, compositing, collage, advanced conceptual and narrative techniques, current technical and creative methods and styles employed by graphic designers, advanced critical concepts, and professional practices. The course includes portfolio building, with an emphasis on professional standards.

Hours: 36 Lecture. 72 Lab.

GDSN 290**Work Experience Education/Internship For Graphic Design-Related Fields****Units:** 1-4**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Advisory:** NART 285**Transfers to:** CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular

employment. This course is intended for students whose job is related to the field of graphic design and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.
Hours: 3 Lecture. 54-216 Lab.

GDSN 299

Directed Study in Graphic Design

Units: 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Advisory: NART 285

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.
Hours: 54-162 Lab.

GEOGRAPHY

Division of Mathematics, Sciences, and Engineering

GEOG 101 (C-ID: GEOG 110)

Introduction to Physical Geography

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts and have a knowledge of elementary algebra concepts.

Transfers to: UC/CSU

This general education course introduces students to the natural processes that shape the earth. Weather and climate, landforms and volcanoes, glaciers, rivers, and coastal phenomena are among the topics explored. This course is for any students interested in the physical processes that shape land masses.
Hours: 54 Lecture.

GEOG 101L (C-ID: GEOG 111)

Introduction to Physical Geography Laboratory

Units: 1

It is advised that students be able to engage in written composition at a college level, read college-level texts and have a knowledge of elementary algebra concepts.

Prerequisite/Corequisite: GEOG 101

Transfers to: UC/CSU

The physical geography laboratory is designed to acquaint students with the methods, techniques, and procedures used by geographers in the study and analysis of the physical environment. Students use maps, the Internet, and other tools to work with real-world geographic data. This course fulfills the general education lab requirement in physical sciences when taken with or after the Introduction to Physical Geography course (GEOG 101).
Hours: 54 Lab.

GEOG 102 (C-ID: GEOG 120)

Introduction to Cultural Geography

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This general education course introduces students to the basic elements of culture. Population growth, migration, ethnicity, language, religion, folk and popular culture, and settlement forms are among the topics presented. This course may be of interest to students considering the fields of elementary school teaching, ecology, or social science, or travel-related vocations.
Hours: 54 Lecture.

GEOG 103 (C-ID: GEOG 125)

World Regional Geography

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course explores the world's geographic regions, including Sub-Saharan Africa, North Africa, Southwest Asia, China, Southeast Asia, Middle America, South America, Japan, Europe, and Russia. The course describes the cultural, economic, and environmental aspects of each of these geographic regions. It provides a geographic perspective that enhances global awareness and geographic literacy.
Hours: 54 Lecture.

GEOG 299

Directed Study: Geography

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or

related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.
Hours: 54-162 Lab.

GEOG 310

Environmental Geography

Units: 3

Prerequisite: ENGL 201 or ENGL 201H, GEOG 101

Transfers to: CSU

This upper division General Education course is designed for students pursuing a bachelor of science degree within the California Community College system. This course examines how the environment is impacted by human activity in different geographical regions and how the environment responds. Topics include global cycles and systems of the air, water and soil, and the effects of human activity on the environment and living systems. Case studies will be used to investigate specific environmental issues.
Hours: 54 Lecture.

GEOLOGY

Division of Mathematics, Sciences, and Engineering

GEOL 150 (C-ID: GEOL 100)

Physical Geology

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: UC/CSU

This introductory course covers the principles of geology, with emphasis on Earth processes, and fulfills the physical science general education requirement. The course focuses on the internal structure and origin of the Earth and the processes that change and shape. Earthquakes, volcanoes, oil, beaches, tsunamis, rocks, rivers, glaciers, plate tectonics, minerals, and continent and mountain building are among the topics that are explored.
Hours: 54 Lecture.

GEOL 151 (C-ID: GEOL 100L)

Physical Geology Laboratory

Units: 1

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra

concepts.

Prerequisite/Corequisite: GEOL 150

Transfers to: UC/CSU

This lab engages students with a hands-on review of the principles presented in GEOL 150 and their application to everyday life. Laboratory exercises will include but are not limited to the identification of minerals; igneous, metamorphic, and sedimentary rocks; topographic and geologic map exercises demonstrating the work of water, wind, ice, and gravity; and the effects of tectonic activity.

Hours: 54 Lab.

GEOL 152 (C-ID: GEOL 110)

Historical Geology

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: UC/CSU

This introductory course covers the history of Earth and the life it supports. Topics include geologic dating, global tectonics, stratigraphy, fossils, biological evolution, the planet's origin, and the processes that have influenced paleogeography during the past 4.6 billion years.

Hours: 54 Lecture.

GEOL 152L (C-ID: GEOL 110L)

Historical Geology Lab

Units: 1

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Prerequisite/Corequisite: GEOL 152

Transfers to: UC/CSU

This lab engages students with a hands-on review of the principles presented in GEOL152. Topics include geologic dating, plate tectonics, stratigraphy, fossils, biological evolution, the planet's origin, and the processes that have influenced paleogeography during the past 4.6 billion years.

Hours: 54 Lab.

GEOL 299

Directed Study: Geology

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be

the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

GEOGRAPHIC INFORMATION SYSTEMS

Division of Career and Workforce Education

GIS 120

Introduction to Geographic Information Systems and Spatial Analysis

Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an intermediate algebra course.

Advisory: CIT 101

Transfers to: UC/CSU - UC credit limit. UC will receive credit for only one of the following courses: GIS 120 or GIS 220
This course introduces fundamental concepts of geographic information and spatial analysis. Using industry standard geospatial application tools including geographic information systems (GIS), global positioning systems (GPS), and small unmanned aerial vehicle (sUAVs), students perform spatial analysis in various disciplines including but not limited to business, public safety, health, politics, civil engineering, and environmental, social, biological and geological sciences. Students learn how to organize geospatial data; visualize spatial patterns by aggregating numbers by areas, analyzing ratios and proportions, generating scatterplots, qualifying volumes and areas, and performing map algebra; and interpret correlations or suitable locations based on provided or researched criteria.

Hours: 54 Lecture. 54 Lab.

GIS 130

Field Data Applications for GIS

Units: 4

Prerequisite: GIS 120

Transfers to: CSU

This course provides students and working professionals an expanded hands-on study on field data collection and methods using various geospatial technology including Global Positioning Systems (GPS) and sUAV (small unmanned aerial vehicles) for applications in Geographic Information Systems (GIS) and Remote Sensing (RMS). Experience in using field data collection enhances GIS technician and analyst employability. Students will research real world applications for public safety, public works, digital humanities and various sciences. This course will include off-campus field trips.

Hours: 54 Lecture. 54 Lab.

GIS 150

**Small Unmanned Aircraft Systems
Procedures and Regulations**

Units: 1.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course prepares the student to pass the FAA Aeronautical Knowledge Test for a Remote Pilot Certificate. Material covers subjects areas in the Part 107 Aeronautical Knowledge Test including aerodynamics, aircraft performance, navigation, weather, and aviation regulations. Flight workflow demonstration prepares the student in sUAS operation and flight planning with an overview of trending applications including videography, survey mapping, public safety, and biology.

Hours: 18 Lecture. 27 Lab.

GIS 220

GIS Applications

Units: 4

Prerequisite: GIS 120

Advisory: CIT 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: GIS 120 or GIS 220

This course covers advanced applications of geographic information systems (GIS), including digitizing with topology, georeferencing "as-builts," and deriving new spatial data by importing computer aided drafting (CAD) drawings. Students learn how to distinguish the difference and value of raster data versus vector data, perform new trends in GIS including processing new raster data with photogrammetry of imagery collected by small unmanned aircraft vehicles (sUAVs), and create mobile applications for field data collection (i.e., fire hydrant inventory). The course may include field trips to industry events and to attend off-campus survey field exercises.

Hours: 54 Lecture. 54 Lab.

GIS 221

Cartography Design and Geographic Information Systems

Units: 4

Prerequisite: GIS 120

Transfers to: CSU

GIS plays an important role in many disciplines, and improves the understanding of particular kinds of information through visual interpretation. This course is for students who want a better understanding of methods to effectively portray information spatially using conventions of patterns, colors and symbology. Students are introduced to the history of map interpretation, map projections, scales, map accuracy, and layout conventions for publication in reports or large formats at emergency operations center. The course may include field trips for students to visit industry user meetings.

Hours: 54 Lecture. 54 Lab.

GIS 222

GIS for Civil Engineering and Public Works

Units: 4

Prerequisite: GIS 120

Transfers to: CSU

This course uses GIS software and cloud services as analytical and informational tools for engineers, maintenance planners, and

facility managers to aid in civil engineering, facilities management, systems evaluation, maintenance, and asset management of public works utilities or capital improvement projects. Students perform hydrological and volumetric calculations by using surface models, sizing public works infrastructure based on land use, zoning and population data, and managing large-scale construction projects and public works infrastructure based on asset management and maintenance principles. The course includes data collection workflow using small unmanned aerial vehicle (sUAV) technology, photogrammetry, and the production of professional web and mobile field data collection applications.
Hours: 54 Lecture. 54 Lab.

GIS 230

Geographic Information Systems (GIS) in Environmental Technology

Units: 3

Prerequisite: GIS 120

Transfers to: CSU

Environmental technicians collect, manage, manipulate and interpret environmental data using geographic information systems (GIS). This course will prepare students to integrate spatial technologies and environmental information in various disciplines in environmental technology, biology, planning, landscape architecture, engineering, geology, archaeology, and related fields. Practical GIS exercises engage the student with industry-used technologies including global positioning systems (GPS), remote sensing, and small unmanned aerial vehicles (sUAVs) in activities designed to increase comprehension of the concepts, and skills they need to become marketable in their chosen environmental fields. Possible day field trips are scheduled to visit local industries and for field work.
Hours: 36 Lecture. 54 Lab.

GIS 280

Geospatial Programming and Web Services

Units: 4

Prerequisite: GIS 120

Transfers to: CSU

Knowledge of a scripting language is a highly desired skill for geographic information system (GIS) technicians. This course teaches how to automate GIS tasks by applying common industry scripting language (e.g., Python or Model Builder). Advanced database management methodologies for spatial data analysis and development of GIS applications will also be covered. Upon completion, students will perform programming fundamentals effectively, providing easier interfaces for end users.
Hours: 54 Lecture. 54 Lab.

GIS 281

Crime Mapping and Analysis

Units: 4

Advisory: CIT 101

Transfers to: CSU

Crime mapping plays an important role in almost any form of crime analysis and can improve our understanding of the important relationships between people, location, time, and crime. As a result, geographic information systems (GIS) has become an essential tool used by crime analysts to discover crime patterns, implement corrective

strategies, optimize resource allocation and to develop crime prevention measures. Students will use ArcGIS to analyze crime series, conduct problem analysis, study crime trends, and address deployment issues as they relate to decision making in law enforcement. Students should have a working knowledge of Windows to be successful in this course.
Hours: 54 Lecture. 54 Lab.

GIS 290

Work Experience Education/Internship for Geographic Information Systems-Related Fields

Units: 1-4

Prerequisite: GIS 120

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of Geographic Information Systems and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.
Hours: 3 Lecture. 54-216 Lab.

GIS 299

Directed Study in Geographic Information Systems

Units: 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations, with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take Directed Study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.
Hours: 54-162 Lab.

HEAT AND FROST

Division of Career and Workforce Education

HEFR 040

Insulation Industry Orientation

Units: 2.5

Enrollment limited to State Indentured Heat and Frost Insulator Union

Apprentices. It is advised that students be able to comprehend precollegiate texts and have a knowledge of elementary algebra concepts.

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the heat and frost insulators industry. Topics include orientation to the trade, industry safety, jobsite safety, insulation, pipe systems, the Occupational Safety and Health Association (OSHA), refinery safety, boom and scissor lift safety, and duct systems.
Hours: 40 Lecture. 40 Lab.

HEFR 041

Mechanical Piping Systems

Units: 2.5

Enrollment limited to State Indentured Heat and Frost Insulator Union

Apprentices

Prerequisite: HEFR 040

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the heat and frost insulators industry. Topics include insulation materials, techniques, finishes, piping systems, fireproofing, hand tools, fall protection, and equipment used in the field.
Hours: 40 Lecture. 40 Lab.

HEFR 042

Boiler Insulation

Units: 2.5

Enrollment limited to State Indentured Heat and Frost Insulator Union

Apprentices

Prerequisite: HEFR 040

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the heat and frost insulators industry. Topics include boilers, insulating techniques, stacks, breechings, Hy-Rib lath insulation, finishing, shipyard orientation, pen welding, safety, first-aid, confined spaces, and fittings.
Hours: 40 Lecture. 40 Lab.

HEFR 043

Construction Mathematics

Units: 2.5

Enrollment limited to State Indentured Heat and Frost Insulator Union

Apprentices

Prerequisite: HEFR 040

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the heat and frost insulators industry. Mathematical operations commonly used in the construction trade are reviewed and applied. Topics include whole numbers, fractions, decimals, basic geometry functions, curves and angles, drawings, estimating, energy appraising, insulation certifications, and measurements.

Hours: 40 Lecture. 40 Lab.

HEFR 044

Mechanical Piping Insulation

Units: 2.5

Enrollment limited to State Indentured Heat and Frost Insulator Union Apprentices

Prerequisite: HEFR 040

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the heat and frost insulators industry. Topics include heat transfer, general insulating methods, materials, application of insulation materials, coatings, coverings for pipes and fittings, attachment methods, mold recognition and abatement, and finishing for pipes in various thermal ranges.

Hours: 40 Lecture. 40 Lab.

HEFR 045

Foam & Firestopping Insulation

Units: 2.5

Enrollment limited to State Indentured Heat and Frost Insulator Union Apprentices

Prerequisite: HEFR 040

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the heat and frost insulators industry. Topics include metal cutting, fittings, band saws, foam materials, spray equipment operations, firestopping insulation, and maintenance and repair of foam application equipment.

Hours: 40 Lecture. 40 Lab.

HEFR 046

Blueprint Reading

Units: 2.5

Enrollment limited to State Indentured Heat and Frost Insulator Union Apprentices

Prerequisite: HEFR 040

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the heat and frost insulators industry. Topics include introduction to blueprint reading, general arrangement, symbols, industry standards, insulation drawings, isometric drawings, industry certifications, and shop drawings.

Hours: 40 Lecture. 40 Lab.

HEFR 047

Prefabricated Buildings

Units: 2.5

Enrollment limited to State Indentured Heat and Frost Union Apprentices

Prerequisite: HEFR 040

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the heat and frost insulators industry. Topics include insulation, the design of walls, prefabricated industry panels, prefabricated metal buildings, hazardous materials, and storage tank insulation.

Hours: 40 Lecture. 40 Lab.

HEFR 048

Firestop Applications

Units: 2.5

Enrollment limited to State Indentured Heat and Frost Insulator Union Apprentices

Prerequisite: HEFR 040

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the insulation and firestop industry. Topics include layout, fabrication, installation, maintenance and repair procedures for firestopping systems on mechanical, electrical, and plumbing penetrations.

Hours: 40 Lecture. 40 Lab.

HEFR 049

Advanced Life Safety Firestop Applications

Units: 2.5

Enrollment limited to State Indentured Heat and Frost Insulator Union Apprentices

Prerequisite: HEFR 040 and HEFR 048

This course is designed to meet the needs of indentured apprentices with the State of California who are interested in the insulation and firestop industry. Topics include advanced layout, fabrication, installation, and maintenance and repair procedures for firestopping systems on mechanical, electrical, and plumbing penetrations.

Hours: 40 Lecture. 40 Lab.

HEFR 290

Work Experience Education in Heat and Frost Insulator Apprenticeship

Units: 1-4

Enrollment limited to State Indentured Heat and Frost Insulator Union Apprenticeship. It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides students the opportunity to work in the heat and frost insulators apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the Heat and Frost Insulator Joint Apprenticeship and Training Committee (J.A.T.C.). Students complete work experience hours at approved training sites. Students may take up to 16 units total across all work experience course offerings. Only one work experience course may be taken per semester.

Hours: 3 Lecture. 54-216 Lab.

HEAVY EQUIPMENT TECHNOLOGY

Division of Career and Workforce Education

HET 061

Outdoor Power Equipment Operation and Maintenance

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This introductory course familiarizes students with the basic operation and maintenance of different types of outdoor power equipment. Instruction covers the repair and maintenance of compact tractors, towable backhoes, lawn and brush equipment, portable generators, air compressors, pressure washers, ground vibrating plates, water pumps, gas powered saws, and many kinds of equipment powered

by small displacement internal combustion engines. Students have the opportunity to perform minor repair work on their own equipment to complete required tasks. This course is designed to be a companion course to HET 062, HET 063, and HET 064, and is required for the Outdoor Power Equipment Maintenance Technician certificate. Students are encouraged to complete all four courses in order to obtain a firm foundation in the outdoor power equipment field.

Hours: 45 Lecture. 27 Lab.

HET 062

Outdoor Power Equipment Four-Stroke Engine Repair

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This introductory course familiarizes students with the basic operation and repair of four-stroke outdoor power equipment engines. Instruction covers tools and service equipment, problem diagnosis, failure analysis, proper repair techniques, machining operations, and testing and adjusting after repairs. Students have the opportunity to perform engine work on their own equipment to complete required tasks. This course is designed to be a companion course to HET 061, HET 063, and HET 064, and is required for the Outdoor Power Equipment Maintenance Technician certificate. Students are encouraged to complete all four courses in order to obtain a firm foundation in the outdoor power equipment field.

Hours: 45 Lecture. 27 Lab.

HET 063

Outdoor Power Equipment Engine Systems

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This introductory course familiarizes students with the basic operation and repair of outdoor power equipment engine systems. Instruction covers tools and service equipment, problem diagnosis, and proper repair techniques of air induction, exhaust, fuel, lubrication, cooling, electrical, ignition, governor, and power delivery systems. Students have the opportunity to perform engine work on their own equipment to complete required tasks. This course is designed to be a companion course to HET 061, HET 062, and HET 064, and is required for the Outdoor Power Equipment Maintenance Technician certificate. Students are encouraged to complete all four courses in order to obtain a firm foundation in the outdoor power equipment field.

Hours: 45 Lecture. 27 Lab.

HET 064

Introduction to Two-Stroke Gasoline Engines

Units: 3

Advisory: READ 043 or appropriate placement

This introductory course familiarizes students with the basic operation and repair of two-stroke engines used in hand-held outdoor power equipment. Instruction covers tools and service equipment, problem diagnosis, failure analysis, proper repair techniques, and

testing and adjusting after repairs. Students have the opportunity to perform engine work on their own equipment to complete required tasks. This course is designed to be a companion course to HET 061, HET 062, and HET 063, and is required for the Outdoor Power Equipment Maintenance Technician certificate. Students are encouraged to complete all four courses in order to obtain a firm foundation in the outdoor power equipment field.

Hours: 45 Lecture. 27 Lab.

HET 101

Introduction to Heavy Equipment Technology

Units: 4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This is an introductory course designed to familiarize the student with the basic operation and maintenance of a multitude of systems commonly found on Heavy Equipment machinery. Students will learn the fundamentals of diesel engines, clutches, manual transmissions, torque converters, automatic transmissions, drive lines, steer and drive axles, various brake and hydraulic systems. In addition, the students will learn basic tools and equipment, and how to safely perform basic repairs and maintenance operations. This is the first course in a series of Heavy Equipment Technology classes, and is designed for the student who wants to enter the field of Heavy Equipment Maintenance and Repair.

Hours: 54 Lecture. 54 Lab.

HET 106

Heavy Equipment Electrical Fundamentals

Units: 4

It is advised that students be able to engage in written composition at a college level and read college level-texts.

Transfers to: CSU

This introductory course is designed to familiarize the student with the heavy equipment's electrical and electronic systems. Topics covered include fundamentals of electricity, basic circuits, schematics, symbols, diagrams, DVOM, graphing multimeter and oscilloscope usage, wire repair techniques, electrical components, semiconductors (including IC), battery, charging, starting, accessory, and instrumentation systems. Demonstrations using the A-Tech circuit boards will be used to illustrate electrical principles, including strategy-based diagnostics.

Hours: 54 Lecture. 54 Lab.

HET 107

Heavy Equipment Operation, Performance Testing and Adjusting

Units: 4

Prerequisite: HET 101, HET 106

Transfers to: CSU

This course is designed to familiarize the students with California and Federal OSHA Safety Regulation for the General Industry Workplace, and a variety of material handling and construction equipment including forklifts, skid steer loaders, and front end loaders/backhoes. Topics covered include rules and regulations, worksite material

storage and handling, fire protection and prevention, hand and power tools, welding and cutting, electrical safety, and fall protection. Machine specific terminology, pre-operational inspection, principles of balance and stability, capacity and load handling, refueling, hydraulic power, job site and pedestrian safety will also be covered. Students will learn how to safely verify the machine performance and how to perform minor adjustments of various subsystems if needed. Upon successful completion of this course and forklift operation examination the student will receive a Certificate of Completion and wallet card for Forklift Operator Safety Training as required by OSHA 1910.178(l) and CAL/OSHA Title 8 (Section 3669), which is good for three years, and a 10-hour OSHA Training Certificate of Completion, which is good for life.

Hours: 54 Lecture. 54 Lab.

HET 121

Introduction to Heavy Equipment Maintenance

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This is an introductory course designed to familiarize students with the fundamentals of periodic maintenance of various heavy equipment systems such as engines, hydraulics, drive trains, final drives, and hydraulic, and air brake systems. Students learn basic tools and shop equipment, and how to safely perform routine services and minor repair operations on heavy machinery. This course is designed to be a companion course to HET 122, HET 123, HET 124, and HET 125, and is required for the Heavy Equipment Maintenance Technician Certificate. Students are encouraged to complete all five courses in order to obtain a firm foundation in heavy equipment technology.

Hours: 45 Lecture. 27 Lab.

HET 122

Introduction to Heavy Equipment Electrical and Diagnostic Procedures

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This is an introductory course designed to familiarize students with the basics of heavy equipment electrical systems. Topics include fundamental principles, electrical symbols and schematics, batteries, starting, charging, and lighting systems. Students will learn the proper use of electrical measuring tools and how to safely perform basic electrical tests and minor repairs. This course is designed to be a companion course to HET 121, HET 123, HET 124 and HET 125, and it is required for the Heavy Equipment Maintenance Technician Certificate. Students are encouraged to complete all five courses in order to obtain a firm foundation in heavy equipment technology.

Hours: 45 Lecture. 27 Lab.

HET 123

Introduction to Heavy Equipment Mobile Hydraulics

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This is an introductory course designed to familiarize students with the basic construction and operation of mobile hydraulic systems. Topics include hydraulic safety, fundamental principles, pumps, valves, cylinders and motors, hoses, couplers, and hydraulic symbols and schematics. Students learn the proper use of hydraulic tools and how to safely perform hydraulic tests and minor repairs. This course is designed to be a companion course to HET 121, HET 122, HET 124 and HET 125, and it is required for the Heavy Equipment Maintenance Technician Certificate. Students are encouraged to complete all five courses in order to obtain a firm foundation in heavy equipment technology.

Hours: 45 Lecture. 27 Lab.

HET 124

Introduction to Heavy Equipment Powertrains

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This is an introductory course designed to familiarize students with the basic construction and operation of heavy equipment powertrains. Topics include principles of gears, friction clutches, fluid couplers, anti-friction bearings, planetary gears, and differential gear sets. Students learn the proper use of precision measuring tools and how to safely perform basic powertrain tests and minor repairs. This course is designed to be a companion course to HET 121, HET 122, HET 123 and HET 125, and it is required for the Heavy Equipment Maintenance Technician Certificate. Students are encouraged to complete all five courses in order to obtain a firm foundation in heavy equipment technology.

Hours: 45 Lecture. 27 Lab.

HET 125

Introduction to Diesel Engines, Fuel Systems and Emissions

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This is an introductory course design to familiarize students with the basic construction, operation, and emission controls of the four-stroke diesel engine. Topics include engine blocks, rotating assemblies, cylinder heads, valve trains, and intake, exhaust, lubrication and cooling systems. In addition, fuel systems and diesel emission reduction strategies are also discussed. Students learn the proper use of diagnostic tools and how to safely perform basic engine tests and minor repairs. This course is designed to be a companion course to HET 121, HET 122, HET 123 and HET 124, and it is required for the Heavy Equipment Maintenance Technician Certificate. Students

are encouraged to complete all five courses in order to obtain a firm foundation in heavy equipment technology.
Hours: 45 Lecture. 27 Lab.

HET 140

Heavy Equipment Electrical Diagnosis

Units: 4

Prerequisite: HET 107

Transfers to: CSU

This course is designed to familiarize the student with the heavy equipment's electrical and electronic systems. Topics include review of electrical theory, circuit faults, electrical and electronic components usage and diagnostics, computers, sensors, actuators, and data communications. A-Tech simulator boards will be used to illustrate different component functions. In addition, the students will be introduced to the strategy based diagnostics, including troubleshooting electrical problems using live equipment.
Hours: 54 Lecture. 54 Lab.

HET 150

Heavy Equipment Fuel Systems and Emissions

Units: 4

Prerequisite: HET 107

Transfers to: CSU

This course is intended to familiarize the students with a wide variety of heavy equipment diesel engine fuel systems and operation. Topics covered include hydromechanical systems such as port-helix, inlet-metering, sleeve-metering and mechanical unit injectors as well as computerized management systems including common rail and amplified common rail. Additional topics regarding diesel engine emission control strategies and devices such as diesel oxidation catalyst, diesel particulate filter and selective catalytic reduction will also be covered. Component failure analysis will be discussed as part of testing and adjusting of various fuel systems. In addition, proper shop and personal safety, and how to use manufacturer's service specifications information will also be covered.
Hours: 54 Lecture. 54 Lab.

HET 160

Heavy Equipment Diesel Engines

Units: 4

Prerequisite: HET 107

Transfers to: CSU

This course is designed to familiarize the students with the mechanical aspects of the Heavy Equipment diesel engines. Topics covered include engine terminology, designs, theory of operation, construction, disassembly, cleaning, components inspection, failure analysis, and reassembly. In addition, proper shop and personal safety, correct usage of shop and hand tools, precision measuring instruments, critical fasteners, and how to use manufacturer's service specifications information will also be covered.
Hours: 54 Lecture. 54 Lab.

HET 200

Heavy Equipment Hydraulic Fundamentals

Units: 4

Prerequisite: HET 107

Transfers to: CSU

This introductory course is designed to familiarize the students with a variety of

mobile hydraulic systems and their operational characteristics. Topics covered include hydraulics safety, hydraulic power principles, system designs, basic components, oil contamination and filtration, hydraulic symbols, schematics, diagrams, and testing instruments. In addition, an overview of electro-hydraulic systems including electric and electronic components, controllers, controller programming, and data communication, will also be covered. Hydraulic trainer simulators will be used to illustrate power principles and operation. Using hydraulic schematics the students will build a wide variety of hydraulic systems commonly installed in modern heavy equipment.
Hours: 54 Lecture. 54 Lab.

HET 210

Heavy Equipment Hydraulic Diagnostics

Units: 4

Prerequisite: HET 200

Transfers to: CSU

This course is intended to familiarize the students with the heavy equipment's hydraulic and electro-hydraulic systems. Topics include review of hydraulic theory and basic hydraulic system designs and components, hydraulic and electronic components used in electro-hydraulic systems, hydraulic controllers, sensors, actuators, and data communications. In addition, the students will be introduced to the strategy-based diagnostics, with an emphasis on electro-hydraulic controls failures, using hydraulic trainer simulators and live equipment.
Hours: 54 Lecture. 54 Lab.

HET 220

Heavy Equipment Powertrains I

Units: 4

Prerequisite: HET 107

Transfers to: CSU

This course is designed to familiarize the students with conventional Heavy Equipment powertrain systems and components. Topics covered include fundamentals of gears, friction and anti-friction bearings, mechanical clutches, manual transmissions, driveline systems, drive axles, final drives, hydraulic and air brakes, and undercarriage systems. Component failure analysis will be discussed as part of disassembly, inspection, and reassembly of various transmissions, drive axles, and final drives. In addition, proper shop and personal safety, and how to use manufacturer's service specifications information will also be covered.
Hours: 54 Lecture. 54 Lab.

HET 230

Heavy Equipment Powertrains II

Units: 4

Prerequisite: HET 220

Transfers to: CSU

This course is intended to familiarize the students with a wide variety of modern heavy equipment powertrains systems and components. Topics covered include powershift transmissions, torque converters, hydrostatic drive systems, AC electric drive systems, spring-applied hydraulically released brakes, steering, and suspension systems. Component failure analysis will be discussed as part of disassembly, inspection, and

reassembly of various transmissions, drives, brakes and steering systems. In addition, proper shop and personal safety, and how to use manufacturer's service specifications information will also be covered.
Hours: 54 Lecture. 54 Lab.

HET 240

Heavy Equipment Heating, Ventilation, and Air Conditioning

Units: 4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to familiarize the student with the heavy equipment's heating, ventilation and air-conditioning systems, and prepare them for an entry level technician in this field. Topics covered include environmental and safety practices, thermodynamic principles, refrigeration systems, engine cooling and heat sources, service and troubleshooting procedures. Automatic systems, service equipment, contamination issues and the rules of AQMD/EPA will also be covered. During the course, students will be given the opportunity to earn their certification license (EPA Rule 1411).
Hours: 54 Lecture. 54 Lab.

HET 290

Work Experience Education/Internship for Heavy Equipment Technology-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of heavy equipment maintenance and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.
Hours: 3 Lecture. 54-216 Lab.

HET 299

Directed Study in Heavy Equipment Technology

Units: 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor.

Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.

Hours: 54-162 Lab.

HISTORY

Division of Behavioral and Social Sciences

HIST 101 (C-ID: HIST 150)

History of World Civilization to the 17th Century

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is a survey of the political, economic, and social development of world civilization up to the 17th century. Special emphasis is placed on the origins of the earth's principal centers of civilization, their subsequent interaction, and the emergence of a world economic, political, and intellectual order. The course is designed for students who want to increase their understanding and appreciation of cultural, political, and intellectual diversity, as well as the process of intercultural interaction. This course also satisfies a course requirement for the Associate in Arts in History for Transfer (AA-T). Hours: 54 Lecture.

HIST 102 (C-ID: HIST 160)

History of World Civilization 1500 to the Present

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This is a general education course for Rio Hondo College and the Cal State University (CSU) and University of California (UC) systems, and is also a required course for the Associate required course for the Associate in Arts in History for Transfer (AA-T).

Additionally, the course is a restricted elective for the Associate in Arts in General Studies with an Emphasis in Art and Human Expression, Emphasis in Social Behavior and Self-Development; and Emphasis in Social Sciences.

Hours: 54 Lecture.

HIST 122

History of Mexico

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course examines the cultural, social, and political history of Mexico from pre-Columbian to modern times. The course will cover pre-Columbian Mesoamerica; the Spanish conquest and the colonial period; and the national period, with special emphasis on Mexico's relations with the United States and its place and role in the world community. It is designed for students interested in understanding Mexico as a nation, and also is recommended for all history and most social science majors. This course is also a restricted elective for the Associate of Arts in History for Transfer (AA-T).

Hours: 54 Lecture.

HIST 131

History of the North American Indian

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course surveys the struggle of Native Americans to maintain their culture in the face of invasion and changing technology. It explores the U.S. government's Indian policies of removal, pacification, annihilation, and assimilation, and considers issues facing Native Americans today. The course is intended for students who want to understand the role of Native Americans in the historical development of North America and is recommended for all history majors. This course also satisfies a course requirement for the Associate of Arts in History for Transfer (AA-T).

Hours: 54 Lecture.

HIST 143 (C-ID: HIST 130)

History of the United States to 1877

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: HIST 143 or HIST 143H. This course is a survey of United States history from Native American origins to post-Civil War Reconstruction. Social, economic, political, and cultural developments are explored, and an emphasis placed on the independence movement, Revolutionary War, new republic, westward expansion, and the Civil War. The course is designed for students interested in the foundational history of the United States. It is recommended for all history majors, and fulfills the Cal State University (CSU) and University of California (UC) systems' American Institutions requirement and the American Institutions requirement for the associate degree. This course also satisfies a requirement for the Associate in Arts in History for Transfer (AA-T). Hours: 54 Lecture.

HIST 143H (C-ID: HIST 130)

History of the United States to 1877

Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: HIST 143 or HIST 143H. This course is a survey of United States history from Native American origins to post-Civil War Reconstruction. Social, economic, political, and cultural developments are explored, and an emphasis placed on the independence movement, Revolutionary War, new republic, westward expansion, and the Civil War. The course is designed for students interested in the foundational history of the United States. It is recommended for all history majors, fulfills the Cal State University (CSU) and University of California (UC) systems' American Institutions requirement and the American Institutions requirement for the associate degree, and is intended for those who meet Honors Program requirements. This course also satisfies a requirement for the Associate in Arts in History for Transfer (AA-T). Hours: 54 Lecture.

HIST 144 (C-ID: HIST 140)

History of the United States Since 1865

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: HIST 144 or HIST 144H. This course provides a survey of the political, social, economic, and cultural development of the United States from Reconstruction (1865) to the present. Some topics addressed are Reconstruction, the American West, capital and labor in the age of enterprise, America as an emerging world power, World War I, World War II, the Vietnam Era, the Cold War, and the new world order. This course fulfills the American Institutions requirement for the Associate Degree. It is recommended for all history majors and satisfies a course requirement for the History for Transfer (AA-T) degree. Hours: 54 Lecture.

HIST 144H (C-ID: HIST 140)

History of the United States Since 1865

Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: HIST 144 or HIST 144H. This course provides a survey of the political, social, economic, and cultural development of the United States from Reconstruction (1865) to the present. Some topics addressed are Reconstruction, the American West, capital and labor in the age of enterprise, America as an emerging world power, World War I, World War II, the Vietnam Era, the Cold War, and the new world order. This course fulfills the American Institutions requirement for the Associate Degree. It is recommended for all history majors, satisfies a course requirement for the History for Transfer (AA-T) degree, and

143 or HIST 143H or HIST 143H or HIST 144 or HIST 144H

Transfers to: CSU

This upper division General Education course is designed for students pursuing a bachelor of science degree within the California Community College system. The course explores the history of science and technology, from initial Ptolemaic and Aristotelian understandings of the universe, through the challenges brought by the scholars of the Scientific Revolution, to the modern innovators of scientific developments and advancements in technology. The course provides an overview of how individuals, societies, and nations were impacted by these developments and how science and technology impact political, social, economic, and cultural changes over time. Since both science and technology are vital in the twenty-first century, this course aims to highlight the long history behind each from a global historical perspective.

Hours: 54 Lecture.

HOMELAND SECURITY

Division of Administration of Justice and Fire Technology

HMLD 101

Introduction to Homeland Security

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides first responders and students with foundational knowledge about homeland security. The course takes up theories about and the history of homeland and national security, and includes discussions about the policies, organizational relationships, and legal issues in an American context from federal, state, and local municipal government perspectives.

Hours: 54 Lecture.

HMLD 102

Introduction to Emergency Management

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides students with the foundational knowledge that pertains to first responded responsibilities and emergency management. Topics include policies, organizational relationships, and legal issues from United States federal, state, and local municipal government perspectives.

Hours: 54 Lecture.

HMLD 103

Terrorism and Violence in Society

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course provides students with an overview of domestic and global issues related to terrorism and violence in society. The course includes an analysis of terrorism

and violent extremism as an aggressive alternative to peaceful change and traditional warfare in the modern age. From domestic and international levels of analysis, students also investigate the role economic, political, and social factors play in determining patterns of terrorist activity, homegrown terrorism, and violent extremism.

Hours: 54 Lecture.

HMLD 104

Emergency Planning and Response

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is for students who want to know about emergency planning and response. The course covers this subject using the National Incident Management System (NIMS) and the Incident Command System (ICS) as part of the National Response Framework (NRF). Students learn about national responses to all types of disasters and emergencies in the United States; and how the NRF's flexibility is used in the public-private sector of the homeland security enterprise, including governmental agencies and regulatory and legal sources responsible for hazard mitigation. Students apply concepts learned in the course to risk assessments and in developing strategies and plans at local, state, national, and international levels.

Hours: 54 Lecture.

HMLD 105

Hazard Mitigation in Emergency Management

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is an introduction to mitigation—one of the four core phases of emergency management. The course covers the hazard planning process to assist students in mitigating or eliminating hazards from an all-hazard approach to emergency management. Students also learn about the national framework used in the public-private sector of the homeland security enterprise, including governmental agencies and regulatory and legal sources responsible for hazard mitigation. Students apply concepts learned in the course to risk assessments and in developing strategies and plans at local, state, national, and international levels.

Hours: 54 Lecture.

HMLD 200

Foundations of Critical Infrastructure Protection

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides the student with an overview of the policies, strategies, and practical application of critical infrastructure security and resilience from an all-hazards perspective. Students will explore the contemporary risk environment and examine the challenges and opportunities associated

with the following: public-private partnerships; information-sharing; risk analysis and prioritization; risk mitigation and management; performance measurement; incident management; and addressing future risks.

Hours: 54 Lecture.

HMLD 203

Homeland Security: Leadership, Policy and Practice

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides the student with an in-depth overview of the issues related to the leadership, policies and practices of homeland security in America and abroad. This course provides for the critical examination of the challenges facing the nation and the homeland security enterprise through detailed investigation of selected case studies from a leadership perspective. Students will analyze significant issues of homeland security from social, political, economic and cultural perspectives facing the nation. This course adds to the Homeland Security program with an in-depth study of the policies and practices affecting homeland security.

Hours: 54 Lecture.

HMLD 205

Cybersecurity: Policy and Practice

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides the student with an overview of the domestic and global issues related to the policies and practices of cybersecurity in America. This course includes an analysis of the history of the internet, the technological advances of internet based programs and the security of the cyber domain. Students will also investigate the role economic, political and social factors play in determining how cybersecurity will play a significant role in society from a domestic and international level of analysis.

Hours: 54 Lecture.

HONDA/ACURA

Division of Career and Workforce Education

HOND 045

Honda/Acura Express Service (formerly AUTO 045)

Units: 4

Enrollment requires acceptance into the Honda/Acura program.

Prerequisite: AUTO 101

This course is an introduction to maintenance, light, repair, and service (MLRS) operations for late model Honda and Acura vehicles. Students engage in interactive activities related to MLRS, lessons, and/or special assignments via distance learning using Honda Interactive Network Training MLRS modules. Upon completion of each MLRS

training module, students are assessed. Successful completion of all MLRS modules is followed by an Express Service performance evaluation. During Express Service, students have an opportunity to demonstrate their skills in MLRS areas in a mock dealership environment. Successful completion of all MLRS modules and the Express Service evaluation count toward MLRS certification. Hours: 72 Lecture.

HOND 045-1

Honda/Acura Chassis Electrical Systems (formerly AUTO 045-1)

Units: 4

Enrollment requires acceptance into the Honda/Acura program.

Prerequisite: AUTO 106

This course focuses on automotive chassis electronics. The content includes operation of digital circuits, semiconductor devices, and methods for troubleshooting complex problems. Students engage in a variety of activities using diagnostic equipment, the five-step diagnostic method, and research to discover vehicle failures. To support their diagnoses, students are also expected to discover and retrieve research materials from the Honda Interactive Network's Technical Library. The purpose of the course is to build upon students' prior knowledge of electronics using basic parallel/series circuit design fundamentals as the foundation. Students learn how to make circuit performance predictions from schematics. In addition to test data, students navigate a circuit's operation via diagnostic flow charts. Successful course completion includes finishing designated Honda Interactive Network Training modules (where proof of completion is posted on students' Dealer Personal Tracking System (DPTS), correctly diagnosing vehicle failures, completing homework assignments, and performing satisfactorily in practical exams. The course is a requirement for the Honda Professional Automotive Career Training Program Specialization (PACT) Associate of Science and Honda/Acura Engine Repair and Engine Electrical Systems Certificate of Achievement. Hours: 72 Lecture.

HOND 046

Honda/Acura Automatic Transmission Systems (formerly AUTO 046)

Units: 4

Enrollment requires acceptance into the Honda/Acura program.

Prerequisite: AUTO 103

Corequisite: HOND 125

This course provides instructions related to specific internal operations of automatic transmissions, including drive, driven, and holding components, as well as fluid pressures and sensor voltages. Students engage in activities using specialized Honda diagnostic equipment to research automatic transmission topics from the Honda Interactive Training Network (HINT). Students also participate in instructor-led demonstrations and interactive classroom assignments. Successful course completion includes finishing designated Honda Interactive Network Training modules (where proof of completion is posted on students'

Dealer Personal Tracking System (DPTS), The course is a requirement for the Honda Professional Automotive Career Training Program Specialization (PACT) Associate of Science and the Honda/Acura Powertrain and Transmission Systems Certificate of Achievement.

Hours: 72 Lecture.

HOND 106

Honda/Acura Electrical Tools and Diagnostic Procedures

Units: 3

Enrollment requires acceptance into the Honda/Acura program.

Advisory: AUTO 101 or AUTO 103

Transfers to: CSU

This introductory course is designed to provide Honda/Acura students with the fundamentals of the electrical systems of the 21st century automobile. Emphasis is placed on electrical fundamentals, symbols and circuit diagrams, batteries, starting, charging, ignition, and lighting systems. Students learn the proper use of automotive electrical tools and equipment and how to safely perform basic vehicle electrical repair and maintenance operations. This course is required for the Honda/Acura Brakes, Suspension, and Chassis Electrical Systems Certificate of Achievement.

Hours: 45 Lecture. 27 Lab.

HOND 125

Power Train System Service and Transmission Diagnostics (formerly AUTO 125)

Units: 4

Prerequisite: AUTO 103

Transfers to: CSU

This course in power train service and light repair addresses topics related to manual transmissions, automatic transmissions/transaxles, differentials, clutches, and drive shafts. Emphasis is placed on correct procedures for sustaining transmission service life, identifying service intervals for prolonging component life, procedures for proper transmission removal and reinstallation, and inspection of components. Students are informed about specific power train -related faults, how problems are diagnosed, and protocols for updating transmission shift logic using updated computer software. Topics are facilitated through classroom discussions, live demonstrations, and student laboratory exercises. Students use scan tools, flushing equipment, computers, and a variety of specialty tools to complete classroom and laboratory exercises.

Hours: 54 Lecture. 54 Lab.

HOND 140

Honda/Acura Body and Chassis Electrical Systems

Units: 4

Enrollment requires acceptance into the Honda/Acura program.

Prerequisite: HOND 106

Transfers to: CSU

This course provides an overview of the 21st century automobile's electrical system as related to the body and chassis of the vehicle. The course covers the theory of operation, operational characteristics, and methods of problem diagnostics and repair of systems

including lighting; instruments; windshield wipers; power windows, seats, and mirrors; convertible tops; safety restraints; and audio, anti-theft, and supplemental restraint systems (S.R.S.). This course prepares students for the Automotive Service Excellence (A.S.E.) A-6 exam and is intended for automotive majors. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.

Hours: 54 Lecture. 54 Lab.

HOND 150

Honda/Acura Engine Electrical Systems

Units: 4

Prerequisite: HOND 106

Transfers to: CSU

This course provides an overview of the 21st century automobile's electrical system as related to the engine and engine-related systems. The course covers the theory of operation, operational characteristics, methods of problem diagnosis, and repair of systems including electronic ignition, electronic fuel injection, engine management, emission control, charging, cooling, and starting. This course prepares students for the Automotive Service Excellence (A.S.E.) A8 Engine Performance test, and is intended for automotive majors. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.

Hours: 54 Lecture. 54 Lab.

HOND 160

Upper End Engine Rebuilding and Machining

Units: 4

Prerequisite: AUTO 101

Transfers to: CSU

This course provides occupational preparation by teaching the skills required for the adjustment and repair of the 21st century automobile engine's upper end and valve train assembly. Emphasis is placed on problem diagnosis, repair techniques, service procedures, and machining operations. This course prepares students for the Automotive Service Excellence (A.S.E.) A-1 exam and is intended for automotive majors. Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.

Hours: 54 Lecture. 54 Lab.

HOND 201

Automotive Brake and Suspension Service (formerly AUTO 201)

Units: 4

Prerequisite: AUTO 103

Transfers to: CSU

This course covers the theory of operation, service and repair procedures, related tool and equipment use, and strategy-based problem diagnosis related to brakes and suspension. These procedures for imported and domestic automobiles and light trucks are developed through classroom discussions, demonstrations, and laboratory experiences. This course is designed for students who want to work in the automotive sector or automotive technicians who need to improve their skills and knowledge in brake and suspension service.

Hours: 54 Lecture. 54 Lab.

HOND 240
Honda/Acura Heating and Air Conditioning
Units: 4

Enrollment requires acceptance into the Honda/Acura program.

Prerequisite: AUTO 103

Transfers to: CSU

This course covers the operating principles of common automotive heating and air conditioning systems. Topics include new service equipment, contamination issues, servicing and diagnosing manual and automatic systems, retrofitting R-12 refrigeration systems to R-134a, and Air Quality Management District (A.Q.M.D.) and Environmental Protection Agency (E.P.A.) rules. Students who take the course also have the opportunity to earn their certification license (E.P.A. Rule 1411). Students with permission from the Division of Career and Technical Education (CTE) may re-enroll only one time for certification or licensure standards.

Hours: 54 Lecture. 54 Lab.

HOSPITALITY

Division of Career and Workforce Education

HOSP 101 (C-ID: HOSP 100)

Introduction to the Hospitality Industry

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides an overview of the hospitality industry with perspectives on customer service, operations, and career opportunities. Key industry segments are presented with close attention to service standards, trends and issues, the interrelationships between industry segments and the connections with the tourism industry.

Hours: 54 Lecture.

HOSP 102 (C-ID: HOSP 140)

Introduction to Hotel Operations

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to introduce students to the hotel industry. Students will gain an understanding of hotel organization and classification, and the range of hotel operations including front office, housekeeping, food and beverage, information systems, accounting, and property maintenance. They will also gain an understanding of how these functional areas work together to deliver the guest experience and exceed guests' expectations.

Hours: 54 Lecture.

HOSP 103 (C-ID: HOSP 110)

Sanitation and Safety

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

In this course, students learn the principles and practices of sanitation and safety in food service operations. Topics covered include food-borne illness identification and prevention, contamination, handling food safely, the Hazard Analysis of Critical Control Point (HACCP) system, the flow of food (purchasing, receiving, and storing), food preparation, the flow of food service (holding and serving), safe facility maintenance and prevention, pest management, and accident and fire prevention. In addition, students learn the general understanding of industry vocabulary, methods, and aspects of food service operations. This course prepares students for the National Restaurant Association's ServSafe® Manager Certification.

Hours: 54 Lecture.

HOSP 104 (C-ID: HOSP 130)

Introduction to Food and Beverage Management

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to introduce students to the food and beverage industry and entry-level management of food and beverage operations. Focal areas include an overview of the food service industry, nutrition, menu pricing and food costs, types of food and beverage service, sanitation and safety, managing finances, and sustainability.

Hours: 54 Lecture.

HOSP 201 (C-ID: HOSP 150)

Hospitality Law

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

The course explores the legal relationship and considerations of hotel, restaurant, travel and tourism operations. Limiting personal and business exposure to liability and best practices for complying with requirements of the US legal system are emphasized. Topics include food and beverage liability, employee selection, common contracts, responsibilities to guests and for guest property, safety and security, and Americans with Disabilities Act.

Hours: 54 Lecture.

HOSP 290

Work Experience Education/Internship for Hospitality Industry-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition and read college-level texts

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor, and is facilitated by the use of learning objectives. Students work in a skilled or professional-level assignment in the area of hospitality and meet performance objectives related to instruction that are

above and beyond the conditions of regular employment. This course is intended for students whose job is related to the hospitality industry and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-162 Lab.

HEALTH SCIENCES

Division of Health Science and Nursing

HS 045

Math for the Health Care Professional

Units: 1

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

This is a basic course that focuses on mathematical computation and application within the health care setting. Topics covered within this course include drug dosages, calculation of intake and output, weights and measures, temperatures, intravenous infusion rates and conversions necessary for safe employment in the healthcare setting. This course is an elective course for students wanting to pursue a career in the healthcare industry.

Hours: 18 Lecture.

HS 050

Nurse Assistant Pre-Certification Training Course

Units: 4

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Corequisite: HS 050L

This entry-level nursing course meets Title 22 regulations for taking care of the geriatric population in a long term care setting, utilizing skills in basic care, emergency care, and communication. The course, which consists of 72 hours of classroom instruction, prepares students to take the California State Certification Exam to become a Certified Nurse Assistant (CNA). After obtaining the state certification, students may find employment in the acute care and/or long-term care settings. The California Department of Public Health (CDPH) requires students must be enrolled in HS 050 and HS 050L concurrently, and pass both courses at the same time; neither course can be taken individually for credit.

Hours: 72 Lecture.

HS 050L

Nurse Assistant Pre-Certification Training Course Lab

Units: 2.5

Corequisite: HS 050

This lab, to be taken at the same time as HS 050 (the Nurse Assistant Pre-Certification Training Course) meets Title 22 regulations for taking care of the geriatric population in a

long term care setting, utilizing skills in basic care, emergency care, and communication. The Nurse Assistant Pre-Certification training course lab consists of 135 hours of supervised clinical practice in the classroom lab and long-term care facilities. The course prepares the student to take the California State Certification Exam to become a Certified Nurse Assistant (CNA). After obtaining the state certification, students may find employment in the acute care and/or long-term care settings. The California Department of Public Health (CDPH) requires students must be enrolled in HS 050 and HS 050L concurrently, and pass both courses at the same time; neither course can be taken individually for credit.
Hours: 135 Lab.

HS 051

Certified Nurse Assistant Acute Care Training Course

Units: 1.5

Enrollment requires California State Nurse Assistant Certification

Prerequisite: HS 050 and HS 050L

Corequisite: HS 051L

This course is designed for students who are Certified Nurse Assistants that wish to learn the basic nursing skills and duties in the acute care hospital setting with additional emphasis on the specialized acute care areas such as medical/surgical, orthopedics, pediatrics and obstetrics. The Certified Nurse Assistant Acute Care Training Course consists of 27 hours of lecture content. This course includes communication, patient observation skills, reporting and recording training as well as reinforcement of Certified Nurse Assistant basic-care procedures. The Division of Health Science and Nursing requires that students must be concurrently enrolled in both HS 051 and HS 051L, and pass both courses together. They cannot be taken individually for credit.
Hours: 27 Lecture.

HS 051L

Certified Nurse Assistant Acute Care Training Course Lab

Units: 1.5

Enrollment requires California State Nurse Assistant Certification

Prerequisite: HS 050 and HS 050L

Corequisite: HS 051

This course is designed for students who are Certified Nurse Assistants that wish to learn the basic nursing skills and duties in the acute care hospital setting with additional emphasis on the specialized acute care areas such as medical/surgical, orthopedics, pediatrics and obstetrics. The Certified Nurse Assistant Acute Care course lab consists of 81 hours of clinical practice alongside a clinical employed CNA in an acute care facility with faculty daily/weekly monitoring. This course includes communication, patient observation, reporting and recording training as well as reinforcement of Certified Nurse Assistant basic-care procedures. The Health Science and Nursing Division require that students must be concurrently enrolled in both HS 051 and HS 051L, and pass both courses together. They cannot be taken individually for credit.
Hours: 81 Lab.

HS 052

Home Health Aide Training Course

Units: 1.5

Enrollment requires California State CNA Certification

Prerequisite: HS 050, HS 050L

Corequisite: HS 052L

This course is designed for students who are Certified Nurse Assistants that wish to learn how to provide personal care in the home care setting for those who are unable to do it for themselves and/or promote the recovery, safety and comfort of the patient. Additional emphasis on rehabilitative nursing care, family relationships and the impact of long-term illness on the family as well as the client will be included. The Home Health Aide training course consists of 27 hours classroom instruction. This course meets title 22 regulations for Home Health Aides training programs. The California Department of Health requires that students must be concurrently enrolled in both HS 052 and HS 052L, and pass both courses together. They cannot be taken individually for credit.
Hours: 27 Lecture.

HS 052L

Home Health Aide Training Course Lab

Units: 1

Enrollment requires California State CNA Certification

Prerequisite: HS 050, HS 050L

Corequisite: HS 052

This course is designed for students who are Certified Nurse Assistants that wish to learn how to provide personal care in the home care setting for those who are unable to do it for themselves and/or promote the recovery, safety and comfort of the patient. Additional emphasis on rehabilitative nursing care, family relationships and the impact of long-term illness on the family as well as the client will be included. The Home Health Aide training course consists of 54 hours supervised clinical practice in either the Acute care or Skilled Nursing Facility. This course meets title 22 regulations for Home Health Aides training programs. The California Department of Health requires that students must be concurrently enrolled in both HS 052 and HS 052L, and pass both courses together. They cannot be taken individually for credit.
Hours: 54 Lab.

HS 054

Beginning Terminology for Healthcare Workers

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course covers the basic knowledge and understanding of medical language, terminology, and basic human anatomy. The student will learn word parts, prefixes, suffixes, word roots and will review the body systems. Anatomical, physiological and pathophysiological terms will also be defined. This is an entry-level course for students interested in the health care field and is highly recommended prior to enrolling in any health-related course.
Hours: 54 Lecture.

HS 060

Health Science Core

Units: 5

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or eligibility for college composition, the ability to read college-level texts, and completion of a prealgebra course.

This is a basic course which focuses on medical terminology, normal body structures and functions, the principles of nutrition, and the relationship of nutrition to health. It provides a strong foundation for all students entering the health care field. This course is a prerequisite for the Vocational Nursing Program.

Hours: 90 Lecture.

HS 070

Introduction to Ambulatory Care Nursing

Units: 4.5

Enrollment requires possession of an unrestricted California RN license

This is an introductory level course to prepare the licensed RN to work in the ambulatory care nursing setting. This course includes classroom lecture and learning activities that provides the type of skills and competencies needed for the RN to work in outpatient care settings, such as clinics.

Hours: 81 Lecture.

HUMANITIES

Division of Behavioral and Social Sciences

HUM 110

Survey of Humanities

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course provides an interdisciplinary presentation of cultural forces, providing the student with a comprehensive view of the most vital artistic, literary, philosophical, religious and architectural movements within the Western, Eastern and Meso-American traditions from the Egyptians to the 1500s. This course is intended for students who wish to further their understanding of the major cultural developments from around the world.
Hours: 54 Lecture.

HUM 111

Survey of Humanities

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course provides an interdisciplinary presentation of cultural forces, providing the student with a comprehensive view of the most vital artistic, literary, philosophical, religious, scientific and architectural movements within the Western, Eastern and Latin American traditions from the Renaissance to the 20th century. This course is intended for students who wish to further their understanding of major cultural developments around the world.
Hours: 54 Lecture.

HUM 125

Introduction to Mexican Culture

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: HUM 125 or HUM 125H

This course provides an interdisciplinary presentation of vital artistic, literary, architectural, musical, political, religious and historical movements within Mexico spanning from Pre-Cortesian to contemporary times.

This course is designed for students who wish to further their understanding of major Mexican cultural and historical developments.
Hours: 54 Lecture.

HUM 125H

Introduction to Mexican Culture Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: HUM 125 or HUM 125H

This course provides an interdisciplinary presentation of vital artistic, literary, architectural, musical, political, religious and historical movements within Mexico spanning from pre-Cortesian to contemporary times.

This course is designed for students who wish to further their understanding of major Mexican cultural and historical developments. This course is intended for those who meet Honors Program Requirements.
Hours: 54 Lecture.

HUM 130

Contemporary Mexican-American Culture

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course provides a contemporary interdisciplinary examination of the most vital Mexican-American literary, artistic, musical, theatrical, social, political and historical movements. This course is designed for students who wish to further their understanding of major Mexican-American cultural contributions to contemporary society.
Hours: 54 Lecture.

HUM 140

Introduction to Asian Cultures

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students who wish to further their understanding of major Asian cultural contributions to classic and contemporary society. The student will be provided with an interdisciplinary examination of the most vital Asian literary, artistic, philosophical, architectural, religious, political and historical movements.
Hours: 54 Lecture.

HUM 145

Women in the Humanities

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is an interdisciplinary examination of the most vital artistic, literary, political, historical, musical, religious, cinematic, and philosophical contributions by women from a variety of Western and non-Western cultures from antiquity to the present. The course is designed for students who want to further their understanding of the artistic and intellectual contributions women have made in the humanities.
Hours: 54 Lecture.

HUMAN SERVICES

Division of Behavioral and Social Sciences

HUSR 111

Human Services in Contemporary Society

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is an introduction to the history and philosophy of human services in contemporary society. Emphasis is placed on the function and objectives of human services organizations as well as the qualifications of human services professionals. A survey of the populations served in the field focuses on cultural, social, economic, and historical trends. The course is designed for students pursuing careers in human services, social work, counseling, or community organizing.
Hours: 54 Lecture.

HUSR 118 (C-ID: ADS 150X)

Chemical Dependency: Intervention, Treatment & Recovery

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides an introduction to current perspectives with respect to the management of chemical dependency. Through an examination of alcoholism as a model of drug dependence, the treatment of and recovery from such disorders will be explored from two divergent perspectives: the reformatory and the transformative. Current treatment modalities will be compared and contrasted in terms of their view of the individual in both the social and clinical context. The class experience itself will serve as an intervention by challenging students to examine their existing ideas about treatment and recovery from substance use disorders. This course is suitable for students interested in furthering their understanding of substance dependence and those interested in working with populations recovering from or at risk for such problems.
Hours: 54 Lecture.

HUSR 120

Introduction to Rehabilitation Services

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

The purpose of this course is to provide students with an introduction to the field of rehabilitation services. The course presents an orientation to federal/state and private rehabilitation/community agencies, which are involved in facilitating the rehabilitation and treatment processes of individuals. An historical, philosophical, and social overview of rehabilitation counseling is provided, as is coverage of the private/state agencies and community support that assist people with disabilities. A wide variety of different issues related to the professions of rehabilitation is discussed in detail. In the course, students learn to analyze the personal, social, and vocational implications of a disability in an individual's life and in their participation in a community.
Hours: 54 Lecture.

HUSR 122 (C-ID: ADS 130X)

Introduction to Group Leadership and Process

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides an introduction to the dynamics of group interaction, where an individual's firsthand experience is emphasized as the group studies itself under supervision. The factors involved in problems of communication, effective emotional responses, and personal growth are highlighted, and group process is examined as a means of changing behavior. This course is suitable for students interested in furthering their understanding of group dynamics and those interested in supervising groups dedicated to achieving behavioral change.
Hours: 54 Lecture.

HUSR 123

Drug Education and Prevention

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students interested in furthering their understanding of substance dependence and those interested in working with populations recovering from or at risk for such problems. It addresses the history, theories, models, and approaches to substance abuse education and prevention. In addition to an academic look at drug abuse, students also explore and examine their own values and beliefs about substance use and misuse. The impact of public policy, the media, and drug education programs on drug use are additional topics that are considered.
Hours: 54 Lecture.

HUSR 124 (C-ID: ADS 170X)

Introduction to Case Management and Documentation

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course introduces students to case management and documentation in a variety of settings. In the course, students study the purpose, function, and rationale for case management. In addition, the documentation of client clinical records is covered, with emphasis placed on taking social histories and writing treatment plans. Additionally, the professional guidelines necessary for working with clients in social services settings are covered, providing students with an understanding of issues related to ethics, client rights, and confidentiality. This class is designed for students interested in working in social services settings.
Hours: 54 Lecture.

HUSR 126 (C-ID: ADS 180X)**Counseling the Family of the Addicted Person****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides an overview of the systems approach to counseling the chemically dependent family. Alcoholism is used as a model for developing counseling skills through the analysis and examination of the relationships that develop in the addicted family system. An experiential format is employed as students participate in exercises that lead to the development of necessary skills. This course is designed for students working with or preparing to work with drug-dependent individuals and the people around them.
Hours: 54 Lecture.

HUSR 128**Chemical Dependency and Co-Occurring Disorders****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course explores understanding mental illness and persons with more than one mental/psychiatric disorder. In the course, students are introduced to various disorders in infancy, childhood, adolescence and adulthood, as well as co-existing disorders, and the various diagnosis and treatment techniques used to treat this unique population. Students also tour two different types of mental health facilities to provide an additional understanding of mental health issues.
Hours: 54 Lecture.

HUSR 130 (C-ID: ADS 120X)**Essential Counseling Skills****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course focuses on critical counseling skills and strategies within a multicultural context. The course provides a vital orientation to the helping process and the counseling profession. Current issues within the counseling profession, such as diversity and multiculturalism, are discussed and

integrated throughout the course. A unique focus is given to the students' growth and development as counselors, and how they can use supervision best in this developmental process; as such, the course would be beneficial to anyone working in human services or social services settings.
Hours: 54 Lecture.

HUSR 135**Law and Ethics in Human Services****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course covers topics that include the applicable laws and ethics relating to case manager/client professional relationships in inpatient and outpatient treatment settings. Laws relating to confidentiality, patient rights, assessments, sharing of personal information, mandatory reporting, and crisis intervention requirements are presented. Dealing with issues such as duty to warn, evaluating a person's potential for suicide, child and elder abuse, and when individuals pose a serious potential of harm to others are also addressed. This is a core course for drug studies majors who are pursuing a certificate or degree.
Hours: 54 Lecture.

HUSR 136**Diverse Populations in Human Services****Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course examines cultural and social influences including age, ethnicity, gender, legal status, physical and psychological disability, race, religion, sexual identity, and socioeconomic status on the use of alcohol and controlled substances, as well as access to treatment for associated problems. The attitudes, knowledge, and skills necessary to provide a competent assessment of and treatment for those who are often disadvantaged or removed from conventional society are explored. This course is designed to further understanding of these diverse populations in relation to addiction, co-occurring disorders, recovery, and rehabilitation. This is a core course for drug studies majors who are pursuing a certificate or a degree.
Hours: 54 Lecture.

HUSR 199A**Seminar in Human Services****Units:** 1

Prerequisite: PSY 101 or PSY 101 or SOC 101 or HUSR 111

Corequisite: HUSR 199B**Transfers to:** CSU

This course is corequisite with Fieldwork in Human Services (HUSR 199B), providing the academic element to the experiential course offering and reinforcing the application of concepts learned in prerequisite courses. Together, HUSR 199A and HUSR 199B provide supervised field experience in a community organization, agency, or institution, allowing students to apply

knowledge and learn new skills outside the classroom environment.

Hours: 18 Lecture.

HUSR 199B**Work Experience Education/Internship in Human Services-Related Fields****Units:** 2-3**Prerequisite:** PSY 101 or SOC 101**Corequisite:** HUSR 199A**Transfers to:** CSU

The corequisite courses HUSR 199A and 199B provide students with a supervised field experience in a community organization, agency, or institution, allowing the student to apply knowledge and learn new skills outside of the classroom environment. In this course students take the theories and principles learned in the classroom and apply them to their work in a field setting. This course is designed to provide the student with an opportunity to develop skills that would facilitate gaining employment in the human services field.

Hours: 108-162 Lab.

HUSR 230A**Drug Studies Seminar****Units:** 1

Prerequisite: HUSR 122, HUSR 124, HUSR 130

Corequisite: HUSR 230B**Transfers to:** CSU

The corequisite courses, HUSR 230A and 230B, are designed to be taken in the final semester of the Drug Studies Program and provide students with work experience in a drug treatment facility. This seminar course is a companion to the internship experience and focuses on ethics, the further development of counseling skills, and the use of community resources. Concurrent enrollment in Human Services 230B is required.

Hours: 18 Lecture.

HUSR 230B**Work Experience Education/Internship for Drug Studies-Related Fields****Units:** 2-3

Prerequisite: HUSR 122, HUSR 124, HUSR 130

Corequisite: HUSR 230A**Transfers to:** CSU

Co-requisite with HUSR 230A, this course is designed to be taken in the final semester of the Drug Studies Program, and provides students with work experience in a drug treatment facility. Through their internship work, students apply the concepts and skills gained through their coursework as they intern in a setting where drug dependent individuals are served. Students must meet the requirements of the internship facility. Concurrent enrollment in HUSR 230A is required.

Hours: 108-162 Lab.

JAPANESE

Division of Communications and Languages

JAPN 101**Japanese I****Units:** 4.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This introductory course focuses on Japanese language and culture. The course stresses oral and written proficiency through fundamental use of the Japanese language, as well as the Hiragana and Katakana script. Students also receive an introduction to Kanji characters. Various facets of Japanese history, culture and civilization are also analyzed via cross-cultural comparisons. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice via interactive websites, audio CDs, video programs, and films in the RHC Language, where work focuses on vocabulary, grammar, and cultural practices. This course is intended for students interested in learning to speak Japanese, as well as those seeking a degree in Japanese language.

Hours: 72 Lecture. 27 Lab.

JAPN 102

Japanese II

Units: 4.5

Prerequisite: JAPN 101 or completion of 2 years high school Japanese with a grade of "C" or better

Transfers to: UC/CSU

This course is a continuation of JAPN 101. The course stresses oral and written proficiency through fundamental use of the Japanese language, as well as the Hiragana and Katakana script. Students also further their knowledge of Kanji characters. Various facets of Japanese history, culture and civilization are also analyzed via cross-cultural comparisons. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice via interactive websites, audio CDs, video programs, and films in the RHC Language Laboratory, where work focuses on vocabulary, grammar, and cultural practices. This course is intended for students interested in learning to speak Japanese, as well as those seeking a degree in Japanese language.

Hours: 72 Lecture. 27 Lab.

JOURNALISM

Division of Communications and Languages

JOUR 110

Digital Photojournalism I

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides an introduction the process of taking photographs using digital cameras, digital video cameras, and digital printing devices. Photocomposition, printing and scanning techniques using Photoshop for the use of publication, and other computer skills related to contemporary photojournalism will also be addressed. Assignments may include work for college publications. This class is recommended for

students majoring in journalism or photography. Lab hours are required in addition to scheduled lecture hours.
Hours: 36 Lecture. 54 Lab.

JOUR 115

Writing for TV and Film

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course introduces students to writing for film and electronic media. The course emphasizes formatting scripts properly, including fundamental technical, conceptual, and stylistic issues related to writing fictional and nonfictional scripts for informational and entertainment purposes in film and electronic media. A writing evaluation component is a significant course requirement.

Hours: 54 Lecture.

JOUR 120 (C-ID: JOUR 110)

Communications Reporting and Writing

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

The course is an introduction to the writing and editing techniques used in the newspaper industry, with emphasis placed on gathering information and the principles of clarity and conciseness. Students use computers during class and lab times. The course is intended for students who are pursuing the Associate of Science Degree/Certificate of Achievement in Mass Communications with either Mass Media or Print Media Specializations.

Hours: 54 Lecture.

JOUR 147

Broadcast News

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is intended for students interested in broadcasting for television. Students learn the principles and techniques of broadcast news, including gathering and writing news for television, script writing and interviewing, and the procedures and techniques of presenting the news for broadcast. This course covers law and ethics, producing news packages, live-to-tape packages, and live shots, including voiceover-to-sound (VO/SOT), producing, and directing. In the course, students have the opportunity to produce the "Rio News" weekly segments for the *El Paisano* digital newspaper.

Hours: 36 Lecture. 54 Lab.

JOUR 220

Advanced Reporting and Writing

Units: 3

Prerequisite: JOUR 120

Transfers to: UC/CSU

This course provides students with advanced instruction in explanatory and investigative journalism, covering public affairs, police, courts, school boards, and city boards. Students study methods of preparing material intended for publication in print and online editions of newspapers. The course

incorporates the study of editing principles, style, and design to meet journalism industry expectations.

Hours: 54 Lecture.

JOUR 230

Magazine Production

Units: 3

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or eligibility for college composition.

Advisory: JOUR 110

Transfers to: CSU

This course involves writing news, news and profile features, and commentary as well as taking and editing photographs for publication in *La Cima*, the college magazine. Students learn copy editing, layout/computer design, Photoshop, digital photography, and advertising fundamentals through the process of writing, editing, and laying out the college magazine.

Hours: 36 Lecture. 54 Lab.

JOUR 231

Digital Magazine Production

Units: 3

Enrollment requires appropriate placement (based on high school GPA and/or other measures) or eligibility for college composition and read college-level texts.

Advisory: GDSN 172, JOUR 110, JOUR 120

Transfers to: CSU

This course introduces students to the fundamentals of magazine writing, production, and editing. Students learn the methods, techniques, and procedures of magazine publication using software (e.g., *InDesign*) to layout magazine content by participating in the pre- and post-production of *La Cima*, the college magazine. Students learn how to develop story ideas and content, write stories, take photographs, prepare for publication, and design pages. Class lectures include subjects like magazine preparation, production, organization, structure, and operation. At the conclusion of the course, students will have participated in the total development and production of a magazine(s) that will be published online and printed, thereby mastering the use of design layout, illustration, and ensuring page layouts are well-balanced.

Hours: 36 Lecture. 54 Lab.

JOUR 241 (C-ID: JOUR 130)

Newspaper Production I

Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or eligibility for college composition. It is advised that students be able to read college-level texts.

Transfers to: CSU

This course is for students who want to learn production and management techniques for newspaper production. Students participate in every facet of developing a newspaper for the college community by serving as staff writers, staff photographers, editors, and layout personnel. During the semester, students publish the college newspaper, *El Paisano*, by having weekly assignments for different sections of the paper, including News, Features, Arts and Entertainment, Opinion, Advertising and Sports. In addition, students

may be tasked with taking photographs for special Focus pages. Editors are responsible for designing their sections of the newspaper on days designated by publication deadlines by using Quark Express and Photoshop. Hours: 36 Lecture. 108 Lab.

JOUR 242 (C-ID: JOUR 130)

Digital Newspaper Production I

Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or eligibility for college composition and to read college-level texts.

Advisory: JOUR 241

Transfers to: CSU

This course is for students who want to learn production and management techniques of online newspaper publication. During the semester, students participate in every facet of developing and gathering the news for the online edition of *El Paisano* by taking on daily and weekly assignments for different sections of the newspaper, including News, Features, Arts and Entertainment, Opinion, Advertising, and Sports. In addition, students may be tasked with taking photographs for special online slide shows and developing and producing online radio podcasts, video news, and feature programs. Appointed editors distribute assignments to staff personnel during the semester and help with the development of each member of the class to produce viable online news. Hours: 36 Lecture. 108 Lab.

JOUR 243 (C-ID: JOUR 131)

Newspaper Production II

Units: 4

Prerequisite: JOUR 241

Advisory: JOUR 120

Transfers to: CSU

This course is for students who want to continue to learn production and management techniques for newspaper production and earn their degree in either journalism and/or mass communications with a specialization in print media. Students write, produce, layout pages, copy edit, sell advertisements, and design pages and advertisements using InDesign, Photoshop, and other editing software for the college newspaper, *El Paisano*. Students also acquire production skills in formatting and file conversions for print media. Students are expected to serve in leadership roles and cover on- and off-campus news. Hours: 36 Lecture. 108 Lab.

JOUR 244 (C-ID: JOUR 131)

Digital Newspaper Production II

Units: 4

Prerequisite: JOUR 242

Transfers to: CSU

This course is for students interested in improving their journalistic skill sets, and/or furthering their journalism career in the digital realm. Students work hands on with the variety of media platforms used to publish *El Paisano Online* (www.elpaisanoonline.com). Students produce content for all online aspects of the digital newspaper, including podcasting, broadcasting, news segments, and writing for a mass audience while implementing the video component of all stories. At the

conclusion of the course, students will have learned the concept of immediacy for online news while keeping the reader engaged. Hours: 36 Lecture. 108 Lab.

JOUR 290

Work Experience Education/Internship for Journalism-Related Fields

Units: 1-4

Prerequisite: JOUR 120, JOUR 241, ENGL 101

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of journalism and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures. Hours: 3 Lecture. 54-216 Lab.

JOUR 299

Directed Study: Journalism

Units: 1-3

Transfers to: CSU

This course is for students who are able to assume responsibility for independent work and prepare written or oral reports and/or appropriate projects. To enroll in an independent/directed study course, students must possess a 2.5 overall grade point average, and a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent/directed studies may be developed from any topic that arises from or is related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and to submit a final report or project. Student progress will be evaluated at regular intervals. Academic standards for independent/directed Studies will be the same as standards for other courses. Units are awarded in accordance to Title 5 regulations, with one (1) unit of credit awarded for 54 hours of directed study, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide. Hours: 54-162 Lab.

KINESIOLOGY THEORY

Division of Kinesiology and Athletics

KIN 058

Yoga Teacher Training I: Foundations

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Prerequisite/Corequisite: KINA 158

This course includes foundational information necessary for those intending to teach Hatha Yoga. Students who successfully complete this course with the corequisite, one-unit lab practicum and KINA 258 Yoga II will fulfill one half, or 100 hours, required for the Yoga Alliance RYS 200 Certification. The first of a sequential two-part series, Yoga Teacher Training I: Foundations focuses on establishing a personal practice in combination with an experiential analysis of the foundational Hatha Yoga techniques of Pranayama (breath control), Asana (postures), and Dhyana (meditation). This course also introduces students to the history and philosophy of yoga, as well as the ethics, methodologies, and business of teaching yoga. This course is designed for students pursuing the Yoga Teacher Training Certificate or a career teaching yoga in the fitness industry, or those interested in furthering their understanding of the effects of yoga for health, fitness, and performance. Hours: 54 Lecture.

KIN 059

Yoga Teacher Training II: Methodologies

Units: 3

Prerequisite: KIN 058

Prerequisite/Corequisite: KINA 258

This course builds upon Yoga Teacher Training I: Foundations (KIN 058) to include further study about information necessary for students intending to teach Hatha Yoga. Students who successfully complete this course will fulfill one half, or 100 hours necessary to apply for the Yoga Alliance RYS 200 Certification. The second of a sequential two-part series, Yoga Teacher Training II: Methodologies builds on the foundations of analysis and personal practice to Pranayama, Asana, and Dhyana. Students study the historical contexts and philosophies of Hatha Yoga as it is taught in the United States today, as well as the ethics, methodologies, and business of teaching yoga. This course is designed for students pursuing the Yoga Teacher Training Certificate or a career teaching yoga in the fitness industry, or for those interested in furthering their understanding of the effects of yoga for health, fitness, and performance. Hours: 54 Lecture.

KIN 110

Introduction to Fitness and Sport Management

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course is designed to introduce the concepts of fitness and sport management, and includes information needed for students who intend to explore the growing industry of administering fitness and sport programs and overseeing small businesses. The course covers areas of facility management, membership/sales, business and finance,

facility oversight, equipment, and policies and procedures. In addition, the history and evolution of sport management, organizational functions, management levels, rules and compliance oversight, event management, and leadership will be included. This course is designed for the student pursuing a career in fitness and/or sport management, exploring administration and facility operations, or interested in furthering their understanding of the business of fitness and sport.
Hours: 54 Lecture.

KIN 115
Fitness Specialist Internship

Units: 2

Enrollment requires instructor approval

Prerequisite: KIN 126, KIN 127, KIN 131

Prerequisite/Corequisite: KIN 122, KIN 128, KIN 145, KIN 146

Transfers to: CSU

This course will provide students with practical experience in the fields of health, fitness, and exercise instruction. Emphasis is placed on participant screening, evaluation, fitness assessment, exercise program design, nutrition and health education, and principles of exercise science. The course includes career preparation, self-marketing and social media, trainer-client relationship building, and professional responsibility in a fitness setting. This course is designed for the student pursuing a career in the fitness industry and/or a Certificate of Achievement in the Fitness Specialist Program, as well as those interested in furthering their understanding of the effects of exercise on the mind and body. Instructor approval is required for enrollment.
Hours: 18 Lecture. 54 Lab.

KIN 120
Sports Law and Ethics

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts.

Transfers to: UC/CSU

This course explores how various bodies of substantive law are applied in the context of the sport industry—both professional and amateur. The course examines the various types of laws that apply to the sport industry (e.g., constitutional, tort, contract, labor, and antitrust) and how these laws are interpreted to decide legal claims for employment, personal injury, intellectual property, and discriminatory practices; and the legal relationships among athletes, teams, leagues, governing bodies, sports facilities, licensees, broadcasters, and fans. The course will also address the compliance issues and ethical structures that define the sports industry.
Hours: 54 Lecture.

KIN 122
Nutrition for Sport and Fitness

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units credit for PE Theory courses.

This course provides an overview of the role of nutrition to increase energy and enhance performance. Nutrients such as carbohydrates, lipids, proteins, vitamins, minerals, and water will be introduced. The digestive system and metabolic systems will be discussed. Sport and exercise nutrient needs before, during, and after exercise are evaluated for their effect on optimal health and performance. Carbohydrate loading, popular diets, and supplementation are discussed. This course is designed for the student pursuing a career in the fitness industry; certificates in Fitness Specialist, Coaching of Sport, Sport and Performance Coach, and Community Health Worker; and/or the A.A. in Dance and the A.S. in Sports Medicine, as well as those interested in furthering their understanding of the effects of nutrition on the mind and body.
Hours: 54 Lecture.

KIN 126
Principles of Strength and Conditioning

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course includes information needed for students who intend to teach strength and conditioning. The course covers anatomy and physiology, bioenergetics, biomechanics, training adaptations, exercise and equipment selection, training techniques, program design, and safety factors. This course is designed for students pursuing a career in the fitness industry; Fitness Specialist, Strength and Performance Coach, or Coaching of Sport Certificates; or an AS in Sports Medicine; and/or students interested in furthering their understanding of the effects of exercise on the body and mind.
Hours: 54 Lecture.

KIN 127
Exercise Physiology

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units credit for PE Theory courses.

This course provides an overview of the body systems and their functions under conditions of exercise stress, including how fitness training affects health, wellness, and performance. Emphasis will be placed on the muscular, skeletal, cardiovascular, respiratory, endocrine, metabolic/bioenergetic, and neurological systems, as well as the physiological processes that are affected by exercise. The effects of various diseases and exercise immunology will also be addressed. This course is designed for the student pursuing a career in the fitness industry, a Certificate of Achievement in Fitness Specialist or Strength and Performance Coach, the Associate of Arts in Dance, or those interested in furthering their understanding of the effects of exercise on the body and mind.

Hours: 54 Lecture.

KIN 128
Fitness Testing and Exercise Prescription

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course provides an overview of how to assess and evaluate the results of cardiorespiratory endurance, muscular strength and endurance, flexibility, body fat, pulmonary function, blood pressure, postural analysis, and functional movement. Emphasis is placed on determining appropriate tests, conducting the tests, interpreting results, and creating exercise programs. This course is designed for students pursuing a career in the fitness industry or for the Fitness Specialist and Strength and Performance Coach certificates, as well as those interested in furthering their understanding of the effects of exercise on the body.
Hours: 54 Lecture.

KIN 131
Functional Anatomy of Movement

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: CSU

This course provides an overview of the study of movement as it relates to exercise under both normal and injury conditions. Students learn the basic anatomical principals used specifically in the area of human performance. Emphasis is placed on applying body alignment, range of motion, stabilization, and acceleration principles important to the analysis of movement. This course is designed for students pursuing careers in the fitness industry or a certificate in either the Fitness Specialist Program, Mat Pilates Instructor, or Peak Performance for Sport. It is also for students interested in furthering their understanding of the biomechanical effects of exercise on the body.
Hours: 54 Lecture.

KIN 136
Pilates Mat Teaching: Foundations

Units: 3

Prerequisite: KINA 136

Transfers to: CSU

This course includes foundational information necessary for students interested in teaching Pilates Mat classes. The course will focus on establishing a personal practice in combination with an experiential analysis of the physical fitness system created by Joseph Pilates. The course will also introduce the student to the history and philosophy of Pilates Mat, as well as the methodologies and business of teaching Pilates Mat. This course is designed for students pursuing the proposed Pilates Mat Teacher Training Certificate, a career teaching Pilates Mat in the fitness industry, or for those interested in furthering their understanding of the effects and benefits of Pilates for health, fitness,

rehabilitation, and overall physical performance and endurance.
Hours: 54 Lecture.

KIN 145

Theory and Analysis of Fitness Instruction

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This introductory course covers the principles and techniques involved in teaching group exercise and developing a personal trainer/client relationship. Emphasis is placed on client assessment, communication skills, program design, exercise adherence, teaching strategies, and professional responsibility and liability. This course is designed for students pursuing a career in the fitness industry or a certificate in the Fitness Specialist Program, as well as students interested in furthering their understanding of the effects of exercise on the mind and body.

Hours: 36 Lecture.

KIN 146

Training Principles for Special Populations

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides an overview of the exercise implications for special populations related to age, medical condition, and level of fitness. Emphasis is placed on cardiovascular and respiratory conditions, exercise-induced asthma, metabolic disorders, diabetes, obesity, orthopedic injuries, physical disabilities, auto-immune issues, sensory impairments, mental challenges, geriatrics/seniors, children, pregnant and post-partum women, and the issues and challenges of exercise. This course is designed for the student pursuing a career in the fitness industry; a certificate in Fitness Specialist, Yoga Teacher Training, and Community Health Worker Program; as well as those interested in furthering their understanding of the effects of exercise on the mind and body.

Hours: 36 Lecture.

KIN 157

Theory of Lifeguard Training and Water Safety

Units: 3

Enrollment requires students to swim 300 yards continuously; tread water for two minutes using only the legs; complete timed swimming, submersion and retrieval event; and swim at American Red Cross Learn-to-Swim Level 4 proficiency. It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units of credit for PE Theory courses.

This course is intended for students who want to earn the American Red Cross (A.R.C.) certifications necessary for employment as a pool lifeguard and swimming instructor. The course gives the most current instruction in A.R.C. lifeguard training, first aid and cardiopulmonary resuscitation/automated external defibrillation (C.P.R./A.E.D.) skills, and

Water Safety Instructor (W.S.I.) courses. Upon successful completion, students earn certifications for A.C.R. Lifeguard Training, C.P.R./A.E.D. for the Professional Rescuer, First Aid for Public Safety Personnel (Title 22), and Water Safety Instructor. These certifications enable students to gain eligibility for a pool lifeguarding position, and to teach the Learn-to-Swim programs of the A.R.C. Adequate swimming skills are necessary at the Learn-to-Swim Level 4. Students may petition to re-enroll in the course to renew certifications.

Hours: 54 Lecture.

KIN 159

Leadership in Sport

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units credit for PE Theory courses.

This course takes up leadership theories and the impact of leadership empowerment through sport. The course is designed for students interested in increasing insight into leadership within sport environments by examining philosophical, sociological, and psychological leadership dynamics in individual and team sports from youth through professional levels. The course covers topics such as leadership theories, self-awareness, informal and formal leadership, emotional intelligence theory, athlete motivation, team dynamics, the role of team captains, and communication theories.

Hours: 54 Lecture.

KIN 170

Sport and Exercise Psychology

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units credit for PE Theory courses.

This course is designed to improve the athletic performance of individuals and teams within the areas of sport and fitness by introducing students to psychological concepts and skills. Areas of study will include motivation theory, personality and sport, group processes, research methods, and cognitive development in sport performance. The course will examine techniques such as imagery, goal setting, cognitive restructuring, coping, and arousal regulation to help athletes and coaches achieve peak performance.

Hours: 54 Lecture.

KIN 188

Theory of Coaching

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

The purpose of this course is to examine the philosophical, physiological, sociological, and psychological aspects of the coaching profession. Other aspects that will be studied are the principles used in the effective teaching of sports, athlete motivation, nutrition for athletes from youth through

collegiate age groups, leadership, technical and tactical skill training and all components of team management.

Hours: 54 Lecture.

KIN 190

Women in Sports

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units credit for PE Theory courses.

This course examines the history, analysis, and interpretation of the people, events, and issues that have affected women in sport historically and in present society. Psychological, sociological, and physiological considerations of female athletes as related to sport, history, and education will be covered. Students gain an understanding of the substantial impact women have had on the sport world, and how their significance will determine the future of women in sport.

Hours: 54 Lecture.

KIN 191

Health: Personal Issues

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units credit for PE Theory courses. In addition, students will receive credit for only one of the following: KIN 191, KIN 192, or KIN 196.

This course is designed for all students who are physically active and interested in learning how to improve and maintain their personal health. Topics covered include general health principles, nutrition and diet, physical fitness, stress management, sexuality and reproduction, drug/alcohol use and abuse, consumer and safety issues and the process of death. Students learn how to develop sound health principles through readings, lectures, assignments/labs, and guest speakers.

Hours: 54 Lecture.

KIN 192

Health: Women's Personal Health

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 8 units credit for PE Theory courses. In addition, students will receive credit for only one of the following: KIN 191, KIN 192, or KIN 196 or PE Theory courses.

This course is designed for students interested in expanding their knowledge about health problems and social issues that affect women uniquely. Physiological and psychological aspects of nutrition, hygiene, sexuality and reproduction, drugs and chemicals, and common diseases are among the many topics covered. Guest speakers, videos, current events, and web-based as well as text readings help students develop sound health principles for use in everyday life.

Hours: 54 Lecture.

KIN 193 (C-ID: KIN 101)

Standard First Aid, C.P.R., and A.E.D.**Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 8 units credit for PE Theory courses.

This course is designed for students pursuing a career working with the public and for those who want to further their understanding of handling emergency situations. Students learn how to give immediate care to suddenly injured or ill persons. In addition, students learn techniques for controlling bleeding, splinting, transporting victims, emergency procedures, one-person cardiopulmonary respiration (C.P. R.) and the use of an automated external defibrillator (A.E.D). Students have the opportunity to apply these technical procedures in class. This course fulfills the requirements for American Red Cross certifications in standard first aid as well as C.P.R. and A.E.D.

Hours: 54 Lecture.

KIN 194 (C-ID: KIN 100)**Introduction to Kinesiology****Units:** 3**It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.****Transfers to:** CSU

This course is designed for students interested in pursuing a career in the field of kinesiology. The philosophy, history, and ethical and scientific foundations of kinesiology are covered. The concepts of basic movement and performance movement in relationship to kinesiology are examined. Students explore the sub-disciplines of motor learning, biomechanics, exercise physiology, sport sociology, sport psychology, and sport nutrition. Professional career opportunities in health/fitness, therapeutic exercise, teaching, coaching and sport management are examined. The challenges for kinesiology, future of kinesiology, and sport and health/wellness are also addressed. This course is required for the Associate in Arts in Kinesiology for Transfer (AA-T).

Hours: 54 Lecture.

KIN 195**Social Issues/Media in Sport****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU

This course examines sport as a significant aspect of modern culture and a major institution of contemporary civilization. Students gain an understanding of the impact sport has had in history and politics, and on moral values, ethics, and sociological issues historically and in present-day society. Topics include gender, race, and ethnicity and their roles in sport; sport as an economic enterprise; social media and sport; sport at the youth, high school, collegiate, professional and international levels; the effects that social class, globalization, and media have on sport; and what future trends will influence the world of sport.

Hours: 54 Lecture.

KIN 196**Health: Fitness and Wellness****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 8 units credit for PE Theory courses. Students will receive credit for only one of the following: KIN 191, KIN 192, or KIN 196.

This course is designed for students interested in learning the value of lifelong, healthy lifestyles. Students are given the tools to help them make positive life-style changes based on a personal health/fitness profile. Topics covered include basic anatomy and physiology, nutrition, weight control, tobacco and alcohol, muscle fitness, flexibility, stress reduction, cardiovascular functioning, health topics, disease entities, and preventive health care measures.

Hours: 54 Lecture.

KIN 197**Prevention and Treatment of Athletic Injuries****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 8 units credit for PE Theory courses.

This course introduces the most salient concepts of athletic training, including the instruction for prevention, recognition, management, and treatment of common injuries in a physically active population. The skills of basic strapping, bracing, padding, and taping for the prevention and management of injuries are presented and practiced. The course is recommended for students interested in becoming a certified athletic trainer, physical therapist, or occupational therapist.

Hours: 54 Lecture.

KIN 199**American Sports in Film****Units:** 3**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** CSU

This kinesiology course explores sports and the lives and contributions of athletes from diverse gender, ethnic, and socioeconomic backgrounds through how they are represented in sports-related films. Students also consider how human movement, the human body, and healthy lifestyles are represented on screen, as well as the influence of sports culture in Western and non-Western contexts.

Hours: 54 Lecture.

KIN 226**Advanced Training Principles for Sport and Tactical Athletes****Units:** 3**Prerequisite:** KIN 122, KIN 126, KIN 127, KIN 128**Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 8 units for PE Theory courses.

This course includes information needed by students who intend to assess and teach strength training and performance skills to sport and tactical athletes. The course covers anatomy and physiology; bioenergetics; biomechanics; training adaptations; physical assessments for strength, agility, power, speed, and quickness; program design; exercise and equipment selection; training techniques; and safety factors. The course is designed for students pursuing a career in the strength and conditioning area, completing the Strength and Performance Coach Certificate of Achievement, exploring the field of kinesiology, or interested in furthering their understanding of the effects of exercise for strength and performance in sport and tactical athletes.

Hours: 54 Lecture.

KIN 290**Work Experience Education/Internship for Athletic Training-Related Fields****Units:** 1-2**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Prerequisite/Corequisite:** KIN 197**Transfers to:** CSU

This course supports and reinforces on-the-job training in the field of athletic training under supervision of a college instructor and is facilitated by the use of learning objectives. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of pathetic training and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-108 Lab.

KIN 297**Advanced Athletic Training****Units:** 3**Prerequisite:** KIN 197**Transfers to:** CSU

This course introduces advanced concepts of athletic training, including instruction for the evaluation and rehabilitation of common athletic injuries. Advanced taping and bracing techniques are also presented and practiced. This class is designed for students interested in becoming a certified athletic trainer or who are preparing for a career in any allied health care profession.

Hours: 54 Lecture.

KINESIOLOGY ACTIVITY

Division of Kinesiology and Athletics

KINA 101**Tennis I****Units:** 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE Activity courses.

This beginning tennis class is designed to bring students to a recreational level, skills-wise. Topics include the serve, groundstroke, volley, and rules of the sport. Students also learn how to play doubles and singles matches in order to compete at a recreational level.

Hours: 54 Lab.

KINA 102 Intercollegiate Baseball I

Units: 1

Students should be able to read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE Activity courses.

This course is designed for students interested in competing in baseball at the collegiate level. Instruction will focus on the introduction of advanced drills in the areas of offense, defense, and pitching. Special attention will be placed on skill development and class participation in preparing students for intercollegiate competition. This course may be taken once and repeated three times for credit.

Hours: 54 Lab.

KINA 103 Softball I

Units: 1

Students should be able to read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed for beginning students who want to gain the fundamental skills of softball. It is designed to present the following skills: throwing, batting, bunting, and defense. Additionally, individual field positions and responsibilities associated with team work are emphasized.

Hours: 54 Lab.

KINA 104 Volleyball I

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is a beginning class designed to present the basic fundamental skills and rules of volleyball. In the course, students have the opportunity to learn and practice serving, setting, and spiking, and also participate in team play. This class is appropriate for students who have never played volleyball, are just learning the game, or have not played for an extended period of time and want to refresh their skills.

Hours: 54 Lab.

KINA 105 Basketball I

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This beginning-level course designed for all students provides instruction in the fundamentals of basketball such as dribbling, passing, shooting, team play, rebounding, defense, and strategy. Collegiate rules, class competition, injury prevention and care, and proper diet and fitness needs are included in instruction. Emphasis is placed on active participation, basketball as recreation, and skill development within this team sport.

Hours: 54 Lab.

KINA 107 Badminton I

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This beginning badminton class focuses on various degrees of competitive play. In the course, students receive instruction in serving, driving, dropping, smashing, clears, rules, and court etiquette in order to perform at a competitive level.

Hours: 54 Lab.

KINA 108 Water Polo I

Units: 1

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed for students who want to learn the fundamental skills of water polo, including passing, guarding, shooting, team play, and strategy. The rules of the game are explored, and class competition is a component of the course.

Hours: 54 Lab.

KINA 109 Soccer I

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This is a beginning soccer/activity class designed for all students interested in developing the physical, technical and tactical elements of the game of soccer. The course includes fundamental technical skills that include dribbling, passing, kicking, collecting, and basic concepts of offensive and defensive tactics. Rules of the game, skill practice, and participation in recreational soccer matches are included.

Hours: 54 Lab.

KINA 110 Futsal (Indoor Soccer)

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This class provides instruction and repetition in the technical and tactical components of futsal (indoor soccer). The Federation of International Football Association (FIFA), the governing body of soccer in the world, and the United States Soccer Federation (USSF), the governing body of soccer in the United States, recognize futsal as its own sport consisting of a smaller, fast-paced technical game. FIFA Futsal Laws of the Game are introduced to the students. The course develops skills, provides knowledge of the rules, and instructs students to demonstrate futsal techniques, recognize tactical situations, and improve cardiovascular fitness.

Hours: 54 Lab.

KINA 113 Golf I

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

Golf I is designed for the beginning golfer who wants to gain the essential skills necessary to enjoy the game of golf. Students will learn the fundamentals of a proper grip, stance and swing that will allow them to perform a basic golf swing.

Hours: 54 Lab.

KINA 114 Conditioning and Alignment Same as: DANC 114

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed to provide the physical training and preparation for students interested in dance, Pilates, Yoga, and athletics, and is suitable for students seeking to move with greater efficiency and less pain in everyday activities. Students learn how to move safely and effectively while developing strength, flexibility, proper alignment, agility, balance, and coordination. Coursework is designed for those who want to work at a more deliberate pace and in a non-competitive atmosphere, or who are recovering from a prior injury.

Hours: 54 Lab.

KINA 117 Swimming I

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is a beginning class designed to equip students with basic water skills and knowledge in order to make them reasonably safe while in the water. The course is suitable for all students interested in basic swimming.

Hours: 54 Lab.

KINA 120**Swim for Fitness****Units:** 1**Advisory:** KINA 117**Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This swimming/fitness course is designed to provide students with beginning swimming skills an opportunity to master the fundamentals of physical fitness as they relate to swimming as an aerobic activity. Emphasis is placed on aerobic training with some training at the anaerobic threshold and anaerobic levels. This class is suitable for all students interested in swimming as a fitness activity.

Hours: 54 Lab.

KINA 130**Fitness and Wellness Laboratory****Units:** 1-2**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is a self-paced physical fitness laboratory designed to develop and encourage positive health and wellness attitudes and habits. Topics include cardiovascular fitness, flexibility, body composition, muscular strength, and endurance. Students are assessed in each of these areas, and an individual fitness profile is established. Fitness activities primarily utilize exercises organized into an aerobic super circuit with additional activities prescribed to increase strength and flexibility.

Hours: 54-108 Lab.

KINA 132**Aqua Aerobics****Units:** 1**It is advised that students be able to read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed to utilize the resistance properties of water to improve muscle tone, flexibility, and cardiovascular health and endurance using various exercise movements. Because water buoyancy will help support joints and muscles, students of all levels of fitness and abilities will be able to participate in the activity. Students will have the opportunity to improve overall body strength and conditioning through a sequence of exercises done in the water. Students who are overweight, pregnant, elderly, diabetic, or recovering from injuries—or who have been inactive—will find this class appropriate, therapeutic, and beneficial to their health.

Hours: 54 Lab.

KINA 134**Cardio Boot Camp****Units:** 1**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed for students who want to improve their cardiovascular and core fitness levels. Students learn lifelong skills to improve their health. Workout skills such as core strengthening, cardiovascular fitness, step aerobics, and flexibility training are covered. Instruction includes proper diet, heart rate monitoring, skills proficiency, and fitness program planning.

Hours: 54 Lab.

KINA 136**Pilates Mat I****Units:** 1**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course introduces students to the basic Pilates floor exercises, which are designed to increase strength in abdominal and spinal musculature. Students engage in activities and exercises designed to increase awareness of body alignment; strength in the torso, spine, and limbs; and endurance. By engaging in activities, students also learn breathing techniques to utilize in strength training exercises, how to increase coordination and improve balance, and about the muscle groups and their actions being utilized during traditional Pilates mat work. This course is suitable for students interested in conditioning, dance, Hatha Yoga, and athletics, as well as students seeking to increase strength to better support the spine during everyday activities.

Hours: 54 Lab.

KINA 139**Cross Training for Fitness****Units:** 1**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This cross training course is designed for beginning through advanced students who want to increase their cardiovascular fitness level through a variety of aerobic and anaerobic activities. The course is designed to present the following skills: running, cycling, swimming, interval training, and introduction to weight training. Additionally, students learn basic definitions and terminology of the current fitness arena, assisting them with fitness as a lifelong process using a variety of cardiovascular mediums.

Hours: 54 Lab.

KINA 140**Walking for Fitness****Units:** 1**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed to meet the needs of daily physical exercise for lifelong fitness and health. Walking is one of the safest and most effective forms of exercise to improve health

and develop and maintain physical fitness.

The course provides cardiovascular conditioning through the activity of walking. Instruction in proper diet, heart rate monitoring, skill proficiency, and fitness program planning is provided for each student. This class is designed for students interested in starting an exercise program or developing an active lifestyle.

Hours: 54 Lab.

KINA 147**Off-Season Conditioning For Intercollegiate Sports****Units:** 1**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed for all students preparing for specific physical fitness related to off-season intercollegiate athletic participation. The purpose of the course is to develop a level of physical fitness, strength, and conditioning that will enhance an athlete's ability to be successful in intercollegiate competition. This course may be taken once and repeated three times for credit.

Hours: 54 Lab.

KINA 148**Strength Training****Units:** 1**It is advised that students be able to read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course covers the fundamentals of strength and conditioning. Students are introduced to a variety of routines that enable them to develop personal strength and conditioning plans.

Hours: 54 Lab.

KINA 151**Strength and Conditioning for Intercollegiate Athletics****Units:** 1**Experience in college athletics, high school varsity athletics, or equivalent is recommended: It is advised that students be able to read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units for PE activity courses.

This advanced course is designed for students preparing to compete on an intercollegiate team. The course is designed for student-athletes to improve all fitness levels through a variety of strength, flexibility, aerobic, and anaerobic activities and technology. The specific demands of the sport are addressed by intercollegiate athletes during the off-season, and via in-season periodization training techniques specific to each sport. The purpose of the course is for student-athletes to understand and develop a high level of physical fitness, strength, and conditioning that will enhance their ability to be successful in intercollegiate competition. This class may be taken once for credit and repeated three times.

Hours: 54 Lab.

KINA 158**Yoga I****Units:** 1**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This introductory course is designed for beginning students who want to learn the fundamental physical Asanas (poses) of Hatha Yoga as well as Pranayama (breathing techniques) and Dhyana (meditation techniques). The goal of the course is to integrate the mind, body, and spirit and to give students tools to better manage stress, alleviate physical tensions, and encourage optimum fitness. In the course, students learn proper physical alignment in the standing poses (i.e., Sun Salutation Series A-C, Warrior 1-2, Downward Dog, Upward Dog, Cobra, Triangle, Crescent); the floor poses (i.e., Staff, Lotus, Cobbler, Twists, Backbends); and elementary inversions (i.e., Inverted Leg Rest, Headstand Preparation, Wall-Dog Preparation). This course is a requirement for the Yoga Teacher Training Certificate of Achievement (C.O.A.) and an elective for the Fitness Specialist C.O.A.

Hours: 54 Lab.

KINA 159**Cross Training for Intercollegiate Athletics****Units:** 1**Enrollment requires participation in Intercollegiate Athletics: It is advised that students be able to read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This cross-training course is designed for advanced intercollegiate athletes who want to increase all aspects of their fitness levels through a variety of strength, flexibility, aerobic and anaerobic activities in order to prepare for intercollegiate athletic competition. The specific physical fitness routines required by intercollegiate athletes during the off-season will be addressed. The purpose of the course is to develop levels of physical fitness, strength, and conditioning that will enhance athletes' abilities to be successful in intercollegiate competition. This course may be taken once and repeated two times for credit.

Hours: 54 Lab.

KINA 167**Latin Dance for Fitness****Same as:** DANC 167**Units:** 1**It is advised that students be able to engage in written composition at a college level and read college-level texts.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course combines dance, Latin and Funk rhythms, and aerobic elements to provide a fun, upbeat, cardiovascular workout. Students constantly move to various genres of Latin music utilizing various tempos. Salsa, Cha-Cha, Tango, Mambo, Latin Jazz, and Hip-Hop rhythms are incorporated in instruction, and by which students build stamina while

increasing cardiovascular fitness. This course is designed to help students develop aerobic capacity, coordination, balance, rhythmic awareness, and flexibility. This class also includes exercises to build abdominal strength, lower body strength, and upper body strength. Classes may incorporate sections with small handheld weights, exercise bands, and/or other fitness props to further develop strength and endurance. Students build a foundation for a personalized exercise and fitness program that can be continued after the course has ended.

Hours: 54 Lab.

KINA 170**Women's Intercollegiate Basketball Team****Units:** 1.5**Students should be able to read college-level texts; High School or Club team experience recommended.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This advanced-level course is designed for students who will be competing in the sport of women's basketball at the collegiate level. This class is offered for 11 consecutive weeks to run concurrently with the intercollegiate basketball season as determined by the California Community College Athletic Association (C.C.C.A.A.) governing body. Students are required to spend a minimum of 7.36 hours per week for 11 weeks preparing for competition with other colleges. This course may be taken once and repeated 3 times for credit.

Hours: 81 Lab.

KINA 171**Women's Intercollegiate Tennis Team****Units:** 3**Students should be able to read college-level texts; High School or Club team experience recommended.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units for PE activity courses.

This advanced course is designed to prepare students for intercollegiate competition in the sport of women's tennis. Emphasis will be placed on all aspects of the sport and the academic requirements for transfer and maintaining eligibility. Students will be monitored and encouraged to advance in their academic and athletic skills through the course. This course may be taken once and repeated three times for credit.

Hours: 162 Lab.

KINA 172**Women's Intercollegiate Volleyball Team****Units:** 3**Students should be able to read college-level texts; High School or Club team experience recommended.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This is an advanced course for students who will be competing at the collegiate level in the sport of women's volleyball. Students will be required to spend a minimum of 10.125 hours a week preparing for competition. This course may be taken once and repeated three times for credit.

Hours: 162 Lab.

KINA 173**Women's Intercollegiate Softball Team****Units:** 3**Students should be able to read college-level texts; High School or Club team experience recommended.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This is an advanced course designed for students who will be competing at the collegiate level in the sport of women's softball. Students will be required to spend a minimum of 10.125 hours a week preparing for competition with other colleges. This course may be taken once and repeated three times for credit.

Hours: 162 Lab.

KINA 176**Women's Intercollegiate Soccer Team****Units:** 3**Students should be able to read college-level texts; High School or Club team experience recommended.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This is an advanced course designed to prepare athletes for intercollegiate competition in soccer. Emphasis will be placed on all aspects of the sport as well as the academic requirements for transfer and maintaining eligibility. The student-athletes will be monitored and encouraged to advance in their academic and athletic skills through the course. This course may be repeated three times for credit.

Hours: 162 Lab.

KINA 180**Men's Intercollegiate Baseball Team****Units:** 3**Students should be able to read college-level texts; High School or Club team experience recommended.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This advanced course is designed for students who will be competing in the sport of men's baseball at the collegiate level. Students will be required to spend a minimum of 10.125 hours a week preparing for competition with other colleges. This course may be taken once and repeated three times for credit.

Hours: 162 Lab.

KINA 181**Men's Intercollegiate Basketball Team****Units:** 1.5**Students should be able to read college-level texts; High School or Club team experience recommended.****Transfers to:** UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This advanced-level course is designed for students who will be competing at the collegiate level in the sport of men's basketball for pre-season conditioning and play. The course is offered for 11 consecutive weeks to run concurrently with the intercollegiate basketball season as determined by the California Community College Athletic Association (C.C.C.A.A.)

governing body. Students are required to spend a minimum of 7.36 hours per week for 11 weeks preparing for competition with other colleges. This course may be taken once and repeated 3 times for credit.
Hours: 81 Lab.

KINA 185

Men's and Women's Intercollegiate Swim Team

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts; High School or Club team experience recommended.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses. credit

This advanced course is designed for students who will be competing at the collegiate level in the sport of swimming. Students are required to spend a minimum of 10.125 hours per week preparing for competition with other colleges. The course may be taken once and repeated three times for credit.
Hours: 162 Lab.

KINA 188

Men's and/or Women's Intercollegiate Water Polo Team

Units: 3

Students should be able to read college-level texts; High School or Club team experience recommended.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This is an advanced course designed for students who will be competing at the collegiate level in the sport of men's and women's water polo. Students will be required to spend a minimum of 10.125 hours a week preparing for competition with other colleges. This course may be taken once and repeated three times for credit.
Hours: 162 Lab.

KINA 189

Men's Intercollegiate Wrestling Team

Units: 3

Students should be able to read college-level texts; High School or Club team experience recommended.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This is an advanced course designed for students who will be competing at the collegiate level in the sport of men's wrestling. Students will be required to spend a minimum of 10.125 hours a week preparing for competition with other colleges. This course may be taken once and repeated three times for credit.
Hours: 162 Lab.

KINA 190

Men's Intercollegiate Soccer Team

Units: 3

Students should be able to read college-level texts; High School or Club team experience recommended.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This is an advanced course designed to prepare athletes for intercollegiate

competition in soccer. Emphasis will be placed on all aspects of the sport as well as the academic requirements for transfer and maintaining eligibility. The student-athletes will be monitored and encouraged to advance in their academic and athletic skills through the course. This course may be repeated three times for credit.

Hours: 162 Lab.

KINA 192

Women's Intercollegiate Sand Volleyball Team

Units: 3

High School or Club team experience recommended; It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This is an advanced course designed for students who will be competing at the collegiate level in the sport of women's sand volleyball. Students are required to spend a minimum of 10.125 hours a week preparing for competition with other colleges. This course may be taken once and repeated three times for credit.
Hours: 162 Lab.

KINA 201

Tennis II

Units: 1

Advisory: KINA 101

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for all PE activity courses.

This intermediate tennis course is designed to take students beyond recreational tennis skills. Advanced instruction in the serve, ground strokes, volley, and playing strategy is provided. The lob and overhead smash, as well as spins, are also introduced.
Hours: 54 Lab.

KINA 202

Intercollegiate Baseball II

Units: 1

Enrollment requires participation in Intercollegiate Athletics; It is recommended that students be able to read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for all PE activity courses.

This advanced course is designed for students interested in competing in the sport of men's baseball at the collegiate level. Instruction will focus on advanced drills in the areas of offense, defense, and pitching. Special attention will be placed on preparing students for intercollegiate competition. This course may be taken once and repeated three times for credit.
Hours: 54 Lab.

KINA 203

Off Season Softball

Units: 1

Advisory: KINA 103

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed for advanced softball students competing at the collegiate level. Instruction focuses on advanced drills in the

area of offense, defense, and pitching. Special attention is placed on preparing students for intercollegiate competition. This course may be repeated 3 times for credit.

Hours: 54 Lab.

KINA 204

Volleyball II

Units: 1

Advisory: KINA 104

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed for intermediate volleyball students who have previously played volleyball and are looking to improve their skill and knowledge of the game. Students develop the intermediate skills of setting, serving, passing, spiking, team offense of 6-1, team offense of 5-1, and defensive coverage. Rules and class competition are included.

Hours: 54 Lab.

KINA 205

Basketball II

Units: 1

Prerequisite: KINA 105 or instructor approval

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed for intermediate to advanced basketball players who want to play at an advanced level. Students participate in full court team play; receive advanced instruction on strategies, offensive and defensive skills and concepts; analyze intercollegiate and professional game films; and learn intercollegiate and professional basketball rules.

Hours: 54 Lab.

KINA 206

Off Season Women's Intercollegiate Volleyball Training

Units: 1

Prerequisite: KINA 172 or participation in Intercollegiate College Athletics

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This advanced course is designed for students interested in competing at the collegiate level in the sport of women's volleyball. Instruction will focus on advanced techniques in serving, passing, setting, and hitting; as well as jump serving, jump setting, jump attacking, various defensive patterns, and team play training and conditioning. Special attention will be placed on preparing students for intercollegiate competition. This course may be taken once and repeated three times for credit.

Hours: 54 Lab.

KINA 207

Badminton II

Units: 1

Prerequisite: KINA 107 or instructor approval for admission

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This intermediate-level badminton course is designed for students who want to learn how to respond appropriately (relative to their own abilities) to the particular problems posed by the game. The course includes

advanced instruction in the basic strokes as well as the introduction of the Indonesian serve and around-the-head, hairpin, and flick shots.

Hours: 54 Lab.

KINA 209

Soccer II

Units: 1

Prerequisite: KINA 109

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This advanced soccer activity course is designed for all students interested in developing the physical, technical, and tactical elements of the game of soccer. The course includes analysis of fundamental skills, game strategy, team offense, and team defense through participation and an overview of rules. The advanced course is intended to take students beyond recreational skills. Emphasis is placed on team tactics, strategies, and systems of play.

Hours: 54 Lab.

KINA 210

Futsal (Indoor Soccer) II

Units: 1

Advisory: KINA 110

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This intermediate/advanced-level futsal activity course is designed for students interested in developing the physical and technical skills involved in playing the game. In the course students learn game strategy, analysis of fundamental skills, and offensive and defensive tactics in small groups. Strategies and transitional play are emphasized.

Hours: 54 Lab.

KINA 211

Off Season Intercollegiate Tennis

Units: 1

Enrollment requires participation in Intercollegiate Athletics; It is advised that students be able to read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This advanced course is designed for students interested in competing in the sport of tennis at the collegiate level. Instruction will focus on training and conditioning, and will also include advanced strategies, on court drilling and match play experience. Special attention will be placed on preparing students for intercollegiate competition. This course may be taken once and repeated three times for credit.

Hours: 54 Lab.

KINA 213

Golf II

Units: 1

Prerequisite: KINA 113

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed for intermediate to advanced golfers who want to take their golf game beyond fundamentals. Every year thousands of people choose golf as their favorite sports activity. Once learned, golf

becomes an enjoyable lifetime recreation.

Golf II students build on the skills learned in Golf I. A major portion of class time is spent on the golf course, applying the techniques learned in Golf I.

Hours: 54 Lab.

KINA 217

Swimming II

Units: 1

Advisory: KINA 117

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This intermediate-level course is designed to provide students with an opportunity to learn the elements of proper swim techniques. Students enhance their skills in the basic strokes learned in Swimming I. Basic components of distance training are covered along with conditioning methods. Safety and rescue skills are also included.

Hours: 54 Lab.

KINA 230

Fitness and Wellness Laboratory II

Units: 1-2

Prerequisite: KINA 130

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is a self-paced physical fitness laboratory designed to develop and encourage positive health and wellness attitudes and habits. The course provides students with the skills and information needed to improve cardiovascular fitness through activities like running, rowing, cycling, core training, aerobic activity, aerobic circuit, and resistance bands. Students learn about the importance of nutrition, blood pressure, heart rate, and exercise target zones in relation to cardiovascular disease.

Hours: 54-108 Lab.

KINA 231

Fitness and Wellness Laboratory III

Units: 1

Prerequisite: KINA 230

Transfers to: CSU

This self-paced laboratory course is designed for students who are at an intermediate level of physical fitness and can apply skills learned in Fitness and Wellness Laboratory I and II (KINA 130 and KINA 230). The course focuses on developing strength, flexibility, and cardiovascular endurance through a variety of activities, including weight training, cardio, and stretching.

Hours: 54 Lab.

KINA 232

Fitness and Wellness Laboratory IV

Units: 1

Prerequisite: KINA 231

Transfers to: CSU

This course is a self-paced physical fitness laboratory designed for students who have completed Fitness and Wellness Laboratory I, II, and III (KINA 130, KINA 230 and KINA 231) to apply knowledge gained in these courses to practical use. The course focuses on increasing strength, cardiovascular fitness levels, body composition, endurance and flexibility utilizing various types of equipment available in the Fitness and Wellness Center. In the course, students demonstrate knowledge and skills in cardiovascular

training, Super Circuit training, interval training, and weight training exercises.

Additionally, students demonstrate knowledge of definitions and terminology of the current fitness arena, assisting them with fitness as a lifelong process that uses a variety of cardiovascular and strength mediums.

Hours: 54 Lab.

KINA 236

Pilates Mat II

Units: 1

Prerequisite: KINA 136

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

KINA 236 is a continuation of KINA 136, and builds upon the basic Pilates Mat exercises covered in KINA 136. The exercises in this course are designed to further increase strength in the abdominal and spinal musculature. Students engage in exercises and learn how to utilize props (e.g., magic circles, stretch/exercise bands, mini balls, gliders, and hand weights) designed to further increase awareness of body alignment, torso strength, and spine and limbs as well as to increase endurance while fine-tuning breathing techniques utilized in strength training exercises. Additionally, students advance their coordination and balance, and learn about the muscle groups and their actions being utilized during traditional Pilates Mat work. This course is suitable for students interested in conditioning, dance, athletics, and fitness, or those seeking to increase overall strength to better support the spine in everyday activities. The course is required for the Mat Pilates Teacher Training Certificate.

Hours: 54 Lab.

KINA 258

Yoga II

Units: 1

Prerequisite: KINA 158

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This course is designed for intermediate students who want to advance their familiarity with the physical asanas (poses) of Hatha Yoga as well as Pranayama (breathing techniques) and Dhyana (meditation techniques). The goal of the course is to integrate the mind, body, and spirit and to further challenge students in their physical practice by increasing sustainment, perfecting alignment, and incorporating twists and wraps. Parivrtta Trikonasana, Prasara Padottanasana, Malasana, Garudasana, Natasajasana, Utthita Hasta Padangustasana, Chaturanga Dandasana, Purvottanasana, Navasana, Virasana, Ustrasana, Matsyasana, Sarvangasana, Surya Namaskar B are covered in depth during the course. This course is required for the Yoga Teacher Training Certificate of Achievement (C.O.A.)

Hours: 54 Lab.

KINA 270

Women's Intercollegiate Basketball Team II

Units: 1.5

Prerequisite: KINA 170

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This advanced-level course is designed for students who will be competing in the sport of women's basketball at the collegiate level during conference play. This class is offered for 11 consecutive weeks to run concurrently with the intercollegiate basketball season as determined by the California Community College Athletic Association (C.C.C.A.A.) governing body. Students are required to spend a minimum of 7.36 hours per week for 11 weeks preparing for competition with conference colleges. This course may be taken once and repeated 3 times for credit. Hours: 81 Lab.

KINA 276

Off-Season for Intercollegiate Soccer

Units: 1

Advisory: KINA 176 or competitive organized soccer experience (club or high school varsity)

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This advanced soccer/activity class for the intercollegiate level player will stress soccer training, technical skills, knowledge, strategy, and an understanding of team play. The course is intended for students with varsity intercollegiate experience who compete currently or are preparing to play competitive intercollegiate soccer. This course may be taken once and repeated three times for credit.

Hours: 54 Lab.

KINA 281

Men's Intercollegiate Basketball Team II

Units: 1.5

Prerequisite: KINA 181

Transfers to: UC/CSU - UC credit limit. The UC will grant a maximum of 4 units credit for PE activity courses.

This advanced-level course is designed for students who will be competing at the collegiate level in the sport of men's basketball during conference and post-season play. This class is offered for 11 consecutive weeks to run concurrently with the intercollegiate basketball season as determined by the California Community College Athletic Association (C.C.C.A.A.) governing body. Students are required to spend a minimum of 7.36 hours per week for 11 weeks preparing for competition with conference colleges. This course may be taken once and repeated 3 times for credit. Hours: 81 Lab.

LITERATURE

Division of Communications and Languages

LIT 102 (C-ID: ENGL 120)

Approaches to Literature

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit. Students will receive credit for only one of the following courses: LIT 102 or LIT 102H. This course is designed for students who wish to study the four general literary forms: poetry, drama, short story, and novel.

Emphasis is placed on critical thinking, critical reading, and composing. Compositions will be based upon discussion, analysis and interpretations of literature, and upon the relationship of Western and Non-Western literature to contemporary thought. Hours: 54 Lecture.

LIT 102H (C-ID: ENGL 120)

Approaches to Literature Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 102 or LIT 102H

This course is designed for students who wish to study the four general literary forms:

poetry, drama, short story, and novel. Emphasis will be placed on critical thinking, critical reading, and composing.

Compositions will be based upon discussion, analysis and interpretations of literature, and upon the relationship of Western and Non-Western literature to contemporary thought.

This course is intended for students eligible for the Honors Program.

Hours: 54 Lecture.

LIT 112A (C-ID: ENGL 130)

American Literature through 1865

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 112A or LIT 112AH

This course explores a range of American literature, with a focus on major texts and writers from early settlement to 1865.

Representative writers include Bradstreet, Bradford, Franklin, Douglass, Paine, Lincoln, Emerson, Thoreau, Poe, Melville, and Dickinson. Course reading and writing assignments explore major cultural and historical themes, including the pre-colonial exploration of the Americas, Native American literary contributions, the Revolutionary and Civil Wars, transcendentalism, and romanticism. This course is designed for students interested in exploring various genres of literature or learning more about cultural expression in the Americas, and students majoring in English or liberal studies. Hours: 54 Lecture.

LIT 112AH (C-ID: ENGL 130)

American Literature through 1865 Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 112A or LIT 112AH

This course explores a range of American literature, with a focus on major texts and writers from early settlement to 1865.

Representative writers include Bradstreet, Bradford, Franklin, Douglass, Paine, Lincoln, Emerson, Thoreau, Poe, Melville, and Dickinson. Course reading and writing assignments explore major cultural and historical themes, including the pre-colonial exploration of the Americas, Native American

literary contributions, the Revolutionary and Civil Wars, transcendentalism, and romanticism. This course is designed for students interested in exploring various genres of literature or learning more about cultural expression in the Americas, and students majoring in English or liberal studies. This course is designed for students eligible for the Honors Program. Hours: 54 Lecture.

LIT 112B (C-ID: ENGL 135)

American Literature after 1865

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 112B or LIT 112BH

This course is designed for students interested in exploring American literature from the middle nineteenth century to the present. Through class discussions and written essays, the course introduces students to representative writers of this period, including Emily Dickinson, Mark Twain, Edith Wharton, Robert Frost, Zora Neale Hurston, William Faulkner, Ernest Hemingway, Tennessee Williams, Lorraine Hansberry, David Henry Hwang, Toni Morrison, Leslie Marmon Silko, Maxine Hong Kingston, Milcha Sanchez-Scott, and others.

Hours: 54 Lecture.

LIT 112BH (C-ID: ENGL 135)

American Literature after 1865 Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

This course is intended for students eligible for the Honors Program.

Hours: 54 Lecture.

LIT 114 (C-ID: ENGL 180)

Children's and Adolescent Literature

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 114 or LIT 114H

This course is an introduction to children's and adolescent literature in its three general literary forms: the short story (including myths, legends, fairy tales, and folk tales), the novel, and poetry. Stress is placed upon critical thinking, critical reading, and composing. The course explores works of

children's literature from ancient times to the present, analyzes the literary elements of these works, assesses their value for both children and adults, and examines the historical periods and cultural environments in which they were written. This course is beneficial for English majors, students planning to transfer to a university, parents, and future elementary and secondary teachers.

Hours: 54 Lecture.

LIT 114H (C-ID: ENGL 180)

Children's and Adolescent Literature

Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 114 or LIT 114H

Hours: 54 Lecture.

LIT 117

Mexican Literature in Translation

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 117 or LIT 117H

This course explores a range of Mexican literature in English translation, with a focus on major literary influences and achievements from the pre-Hispanic era to the twentieth century. Course reading and writing assignments explore indigenous literatures and myths, chronicles of the Spanish conquest, literature of the colonial period, high culture and folklore of the eighteenth century, political and modernist literature of the nineteenth century, and poetry and prose of the twentieth century. This course is designed for students interested in exploring various genres of literature and/or interested in learning more about Mexican cultural expression, and students majoring in Chicano Studies.

Hours: 54 Lecture.

LIT 117H

Mexican Literature in Translation Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 117 or LIT 117H

This course explores a range of Mexican literature in English translation, with a focus on major literary influences and achievements from the pre-Hispanic era to the twentieth century. Hours: 54 Lecture.

LIT 130

Women and Literature

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 130 or LIT 130H

This course explores women writers—their lives, the roles they play in culture and society, and how they have influenced the world. Students examine topics such as female authorship, literary influence, the evolution of technique, effects of race and class, and the historic and cultural environments in which works were written. Stress is placed on critical thinking, critical reading, and composing. Feminist, literary, and political theory are explored. Special emphasis may be placed on a period, genre, theme, or literary grouping. This course is beneficial for English majors, students planning to transfer to a university, and anyone interested in learning about women and literature.

Hours: 54 Lecture.

LIT 130H

Women and Literature Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 130 or LIT 130H

and literature. This course is intended for students eligible for the Honors Program.

Hours: 54 Lecture.

LIT 140

Introduction to the Novel

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 140 or LIT 140H

This course introduces students to a variety of approaches to the novel. Course readings focus on novels selected from different historical periods and within a variety of cultural traditions. Students gain an understanding of the features that distinguish the novel as a literary genre, including narrative structure, point of view, character development, setting, theme, style, imagery, and symbolism. This course is designed for students interested in learning more about literary expression, and students intending to major in a literary- or arts-related field of study.

Hours: 54 Lecture.

LIT 140H

Introduction to the Novel Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: LIT 140 or LIT 140H

LIT 299

Directed Study: Literature

Units: 1-3

Prerequisite: ENGL 101

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title 5 regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

LOGISTICS

Division of Arts, Business, & Cultural Programs

LOG 101

Supply Chain Management

Units: 3

It is advised that students be able to engage in written composition at a college level and have knowledge of elementary algebra.

Advisory: CIT 051

Transfers to: CSU

This course is designed for students seeking a career in logistics or supply chain management. The course presents the tools and techniques for the design and improvement of any supply chain, through the optimal use of information, materials, and technology to improve efficiency and reduce costs. Students examine the processes for planning, sourcing, making, delivering, and returning products in order to integrate suppliers and customers into an organization's supply chain. Students also receive an overview of career opportunities within the logistics and supply chain management field.

Hours: 54 Lecture.

LOG 105

Purchasing Management

Units: 3

Advisory: CIT 051, ECON 101 or ECON 102, LOG 101

Transfers to: CSU

This course is intended for students seeking a career in logistics or supply chain management. This course explores the basic purchasing functions including establishing purchasing requirements and quantities, developing purchasing policies and procedures, receiving acceptable goods, arranging for packaging and shipping, managing inventory control, and the integration of the purchasing activities with other business functions.

Hours: 54 Lecture.

LOG 110

Warehouse Management

Units: 3

Advisory: CIT 051, ECON 101, LOG 101

Transfers to: CSU

This course is intended for students seeking a career in logistics or supply chain management. The course provides warehouse managers, supervisors, distribution center leaders, and warehouse personnel with a pathway to gain and apply practical skills in warehouse design, layout planning, the safe storage of inventory, identifying appropriate material handling equipment, and quality control of warehouse services. Topics include industry terminology, modern warehouse management system tools, industry quality standards, and warehouse contracting.

Hours: 54 Lecture.

LOG 115

Inventory Management

Units: 3

Advisory: ACCT 100, CIT 051, LOG 101

Transfers to: CSU

This course is intended for students seeking a career in logistics or supply chain management. The course reviews the concepts and techniques available for planning and controlling inventories. Students will examine methods to determine the appropriate amount of inventory to carry; the relationship between inventory as a physical asset and an accounting asset; the difference between raw material, work-in-process, and

finished goods inventories; controlling the physical locations of inventory; recognizing and analyzing inventory dysfunctions; bar code technologies; and protecting inventory from natural, technological, and man-made disasters.

Hours: 54 Lecture.

LOG 120

Transportation Management

Units: 3

Advisory: CIT 051, LOG 101

Transfers to: CSU

The course provides a study of traffic management principles and techniques that facilitate distribution of the world's commerce, and is intended for students seeking a career in logistics or supply chain management. Topics covered include analysis of the major forms of transportation, such as motor, rail, air, water, pipeline, inter-modal, and international; the integration of transportation forms into a distribution system; carrier management and selection, including rate structures, scheduling, outsourcing, private fleet operations, and transportation customers; government regulations on tariffs; and transportation of hazardous materials.

Hours: 54 Lecture.

LOG 125

Contract Management

Units: 3

Advisory: BUSL 110 or LOG 101

Transfers to: CSU

This course is designed for students seeking a career in logistics or supply chain management. The course provides a study of the legal and regulatory requirements applicable to contracts for product transportation and logistics functions, as well as considerations for drafting and negotiating contracts with freight carriers, warehousemen, and other logistics service providers.

Hours: 54 Lecture.

LOG 130

Computerized Logistics

Units: 3

Advisory: CIT 051, LOG 101 or LOG 115

Transfers to: CSU

This course is intended for students seeking a career in logistics or supply chain management. The course covers the need and use of computers in the supply chain and logistics industry, as well as an introduction to available, related software (e.g., enterprise resource planning, demand planning, and warehouse management applications). Emphasis is placed on the need to balance supply with demand through mathematical models and computerized analysis.

Hours: 54 Lecture.

LOG 135

Quality Management Concepts

Units: 3

Advisory: LOG 101 or LOG 105

Transfers to: CSU

This course is intended for students seeking a career in logistics or supply chain management. The course covers the basic principles, objectives, and policies of a quality management program. Topics include the implementation of continuous quality improvement and understanding various quality philosophies such as Deming's 14

Points, process management, ISO 9000 certification, Six Sigma efforts, Baldrige Award criteria, and an introduction to statistical process control.
Hours: 54 Lecture.

MATHEMATICS

Division of Mathematics, Sciences, and Engineering

MATH 007E

Essential Topics for Elements of Calculus

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Corequisite: MATH 170

This support course is designed to develop the mathematical knowledge necessary for the successful completion of Elements of Calculus (MATH 170). Students must be concurrently enrolled in a section of MATH 170 to take this support course. Topics from college algebra are covered to build a foundation for Elements of Calculus. This is a nondegree applicable course offered on a pass/no pass basis.
Hours: 36 Lecture.

MATH 013E

Essential Topics for Statistics

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Corequisite: MATH 130

This support course is designed to develop the mathematical knowledge and study skills necessary for successful completion of Statistics (MATH 130). Students must be concurrently enrolled in a section of MATH 130 to take this support course. Topics from algebra and intermediate algebra are covered to build a foundation for college-level statistics. Strategic reading, critical thinking and problem-solving are incorporated to build the strategies needed to solve contextualized problems. Topics in the area of study skills are also included to support students in a college-level math course. This is a non-degree applicable course offered on a pass/no pass basis.
Hours: 18 Lecture.

MATH 015E

Essential Topics for Survey of Mathematics

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Corequisite: MATH 150

This support course is designed to develop the mathematical knowledge and study skills needed to complete MATH 150 (Survey of Mathematics) successfully. Topics from intermediate algebra and geometry are

covered to build a foundation for college-level quantitative reasoning. Additionally, strategic reading and critical thinking are taken up to build the strategies needed to solve contextualized problems. Topics in the area of study skills and metacognition are also included to support students in a college-level math course. This is a non-degree-applicable course offered on a pass/no-pass basis.
Hours: 36 Lecture.

MATH 016E

Essential Topics for College Algebra

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Corequisite: MATH 160

This support course is designed to develop the mathematical knowledge and study skills necessary for successful completion of College Algebra (MATH 160). Students must be concurrently enrolled in a College Algebra course to take this support course. Topics from intermediate algebra are covered to build a foundation for success in college-level algebra. Strategic reading, critical thinking, and problem-solving are incorporated to build the strategies needed to solve contextualized problems. Topics in the area of study skills and meta-cognition are also included to support students in a college-level math course. This is a non-degree applicable course offered on a pass/no pass basis.
Hours: 18 Lecture.

MATH 017E

Essential Topics for Plane Trigonometry

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Corequisite: MATH 175

This course develops the mathematical knowledge and study skills necessary for successful completion of MATH 175 (Plane Trigonometry). Students must be concurrently enrolled in a trigonometry course to take this support course. Topics from intermediate algebra are covered. Strategic reading, critical thinking, and problem-solving are incorporated to aid in solving contextualized problems. Study skills and metacognitive topics are included to support students in a college-level math course. This is a non-degree-applicable course offered on a pass/no-pass basis.
Hours: 18 Lecture.

MATH 018E

Essential Topics for Pre-Calculus

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Corequisite: MATH 180

This course develops the mathematical knowledge and study skills necessary for successful completion of MATH 180 (Pre-Calculus). Students must be concurrently enrolled in a section of MATH 180 to take this support course. Topics from intermediate algebra and trigonometry are covered to build a foundation for college-level quantitative reasoning. Strategic reading,

critical thinking, and problem-solving are incorporated to aid in solving contextualized problems. Study skills are included to support students in a college level math course. This course is not degree applicable and is offered in a pass/no-pass format.
Hours: 18 Lecture.

MATH 019E

Essential Topics for Calculus I

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Corequisite: MATH 190

This support course is designed to help students develop the mathematical knowledge necessary for the successful completion of Calculus I (MATH 190). Students must be concurrently enrolled in a section of MATH 190 to take this support course. Topics from pre-calculus and trigonometry are covered to build a foundation for Calculus I. This is a non-degree applicable course offered on a pass/no pass basis.
Hours: 36 Lecture.

MATH 130 (C-ID: MATH 110)

Statistics

Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of a pre-statistics course or intermediate algebra course.

Advisory: ENGL 101, READ 101

Transfers to: UC/CSU - UC credit limit. The UC will grant credit for only one of the following courses: MATH 130 or MATH 130H or PSY 190

This course is designed for students majoring in business, social sciences, and life sciences. This course provides an overview of descriptive and inferential statistics. Students learn to read, interpret, and present data in a well-organized way via a study of frequency distributions, graphs, measures of central tendency and variability, correlation, and linear regression. While discussing inferential statistics, students learn to make generalizations about populations, including probability, sampling techniques, confidence intervals, and hypothesis tests.
Hours: 72 Lecture.

MATH 130H (C-ID: MATH 110)

Statistics Honors

Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of a pre-statistics or intermediate algebra course.

Prerequisite: ENGL 101

Advisory: READ 101

Transfers to: UC/CSU - UC credit limit. The UC will grant credit for only one of the following courses: MATH 130 or MATH 130H or PSY 190

This course is designed for students majoring in business, social sciences, and life sciences. This course provides an overview of descriptive and inferential statistics. Students learn to read, interpret, and present data in a well-organized way via a study of frequency distributions, graphs, measures of central tendency and variability, correlation, and linear regression. While discussing inferential

statistics, students learn to make generalizations about populations, including probability, sampling techniques, confidence intervals, and hypothesis tests. This course is intended for students who meet Honors Program requirements. Hours: 72 Lecture.

MATH 140 (C-ID: MATH 120)
Mathematics for Elementary Teachers

Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an intermediate algebra course.

Transfers to: UC/CSU

This course is designed to deepen and extend the student's understanding of the foundations of the mathematics taught in elementary school. Because it is intended for the student preparing to teach at that level, it frequently refers to and uses materials and methodology appropriate for students at that level, but it is not a methods course. The course is concept-driven with an emphasis on problem solving. Concrete manipulatives are used to give meaning to abstract mathematical concepts. Topics include numeration and place value concepts, models and algorithms for operations with whole numbers, integers, fractions and decimals, and the structure and properties of the real number system.

Hours: 90 Lecture.

MATH 150
Survey of Mathematics

Units: 3

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an intermediate algebra course.

Transfers to: UC/CSU

In this course students will learn to read and understand quantitative information, solve practical problems, and make sound decisions using numbers. Topics include consumer applications, logic, probability, statistics, algebra, and geometry. This course is for students who need a quantitative reasoning course for graduation or transfer.

Hours: 54 Lecture.

MATH 160 (C-ID: MATH 150)
College Algebra

Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an intermediate algebra course.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: MATH 160 or MATH 180.

This course covers linear, quadratic, polynomial, power, exponential, and logarithmic functions and their applications from a graphical, numerical, and analytical point of view. The course also covers systems of equations and inequalities and sequences and series. This course serves as preparation for students planning to take Elements of Calculus (MATH 170).

Hours: 72 Lecture.

MATH 170 (C-ID: MATH 140)
Elements of Calculus
Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures) or completion of an intermediate algebra course.

Advisory: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: MATH 170, MATH 190 or MATH 190H

This one-semester course focuses on the fundamentals of algebra-based calculus and its applications to the fields of business, economics, social sciences, biology, and technology. Course topics include graphing of functions; applications of derivatives and integrals of functions including polynomials; rational, exponential, and logarithmic functions; multivariable derivatives; and differential equations.

Hours: 72 Lecture.

MATH 175 (C-ID: MATH 851)

Plane Trigonometry

Units: 3

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of a geometry and an intermediate algebra course.

Transfers to: CSU

This course is for students majoring in mathematics, science, and engineering. The course equips students with the skills necessary for success in precalculus, presenting the concepts of plane trigonometry using a functions approach. The course also includes a study of trigonometric functions including their inverses and graphs, identities and proofs related to trigonometric expressions, trigonometric equations, solving right triangles, solving triangles using the law of cosines and the law of sines, polar coordinates, and an introduction to vectors.

Hours: 72 Lecture.

MATH 180 (C-ID: MATH 155)

Pre-Calculus

Units: 4

It is advised that students be able to engage in written composition at a college level.

Prerequisite: MATH 175 or appropriate placement

Advisory: READ 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: MATH 160 or MATH 180.

This course is designed to prepare students for the study of calculus. The course presents a comprehensive study of linear, quadratic, polynomial, exponential, logarithmic, rational, and trigonometric functions. Inequalities, introductory analytic geometry, polar coordinates, polar equations and their graphs, and an introduction to sequences are also included. This course is a prerequisite for MATH 190.

Hours: 72 Lecture.

MATH 190 (C-ID: MATH 210, MATH 900S)

Calculus I

Units: 4

Prerequisite: MATH 180

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: MATH 170, MATH 190 or MATH 190H.

MATH 190 is a semester course designed primarily for those students planning to pursue programs in engineering, mathematics, computer science, and physical sciences. This is the first course in differential and integral calculus of a single variable. It includes topics in functions, limits, and continuity, techniques and applications of differentiation and integration and the Fundamental Theorem of Calculus.

Hours: 90 Lecture.

MATH 190H (C-ID: MATH 210, MATH 900S)

Calculus I Honors

Units: 4

Prerequisite: MATH 180, ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: MATH 170, MATH 190 or MATH 190H

MATH 190 is a semester course designed primarily for those students planning to pursue programs in engineering, mathematics, computer science, and physical sciences. This is the first course in differential and integral calculus of a single variable. It includes topics of functions, limits, and continuity, techniques and applications of differentiation and integration and the Fundamental Theorem of Calculus. This course is intended for students who meet Honors Program requirements.

Hours: 90 Lecture.

MATH 191 (C-ID: MATH 220, MATH 900S)
Calculus II

Units: 4

Prerequisite: MATH 190 or MATH 190H or appropriate placement

Transfers to: UC/CSU

This semester-long course continues the study of calculus begun in MATH 190. The course includes techniques of integration, improper integrals, anti-derivatives, applications of the definite integral, differential equations, Taylor polynomials, series, polar equations, and parametric equations. This course is the second course of the calculus sequence required of all engineering, physics, and mathematics majors.

Hours: 90 Lecture.

MATH 250 (C-ID: MATH 230)

Calculus III

Units: 4

Prerequisite: MATH 191

Advisory: ENGL 101

Transfers to: UC/CSU

This course involves a study of functions of two or more variables using the principles of calculus, vector analysis, and parametric equations. Also included is a study of solid regions using partial differentiation, vector analysis, and multiple integration, as well as a study of vector calculus topics including line and surface integrals, Green's theorem, Stokes' theorem, and the divergence theorem. This is the third course of the calculus sequence required for engineering, physics, and mathematics majors.

Hours: 90 Lecture.

MATH 251 (C-ID: MATH 910S)

Linear Algebra and Differential Equations

Units: 5

Prerequisite: MATH 191

Transfers to: UC/CSU

This course is an introduction to ordinary differential equations and linear algebra, and is designed for STEM majors who do not need separate courses in linear algebra and differential equations. Topics in this course include first order ordinary differential equations, including separable, linear, homogeneous of degree zero, Bernoulli, and exact equations with applications and numerical methods; solutions to higher order differential equations using undetermined coefficients, variation of parameters, and power series, with applications; solutions to linear and non-linear systems of differential equations, including numerical solutions; matrix algebra, solutions of linear systems of equations, and determinants; vector spaces, including the Gram-Schmidt procedure; and linear transformations, kernel and range, eigenvalues, eigenvectors, diagonalization, and symmetric matrices.

Hours: 90 Lecture.

MATH 260 (C-ID: MATH 250)**Linear Algebra**

Units: 4

Prerequisite: MATH 191

Transfers to: UC/CSU

This course is an introductory study of linear algebra with applications to problems in the physical and social sciences. It includes the solution of systems of linear equations, matrix algebra with inverses, determinants, vectors and vector spaces, linear transformations, Eigenvalues and Eigenvectors, orthogonality and diagonalization. This course is required for engineering, physics, computer science and mathematics majors.

Hours: 72 Lecture.

MATH 270 (C-ID: MATH 240)**Differential Equations**

Units: 4

Prerequisite: MATH 250

Transfers to: UC/CSU

This course covers ordinary differential equations with applications in the physical and social sciences. It includes a study of linear and nonlinear first-order differential equations, linear higher order differential equations, systems of differential equations, the power series solution of differential equations, and Laplace transforms. The course is a continuation of MATH 190, MATH 191, and MATH 250, and is required for all Engineering, Physics, and Mathematics majors.

Hours: 72 Lecture.

MATH 299**Directed Study: Mathematics**

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in

developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

MANAGEMENT

Division of Arts, Business, & Cultural Programs

MGMT 101 (C-ID: BUS 110)**Introduction to Business**

Units: 3

It is advised that students be able to engage in written composition at a college level, read college-level texts, and have knowledge of elementary algebra concepts.

Transfers to: UC/CSU

This course is designed for the student who has an interest in a career in business. Topics cover business operations, strategies for both domestic and international markets, economic factors, legal regulations, management, leadership, marketing, financial operations, accounting controls, and e-commerce. This course will count toward a business certificate or degree in business and transfer to a four-year school.

Hours: 54 Lecture.

MGMT 105**Elements of Supervision**

Units: 3

Advisory: MGMT 101

Transfers to: CSU

This course is designed for students considering a career in management and/or seeking an entry-level career position with a company in retailing, industry, or the government. The course examines the role of the first-line manager and/or supervisor within the organization, and emphasizes the application of management functions in effective supervision. Topics include an overview of management principles in direct and straightforward terms, critical concepts, and insights into real world practice and challenges.

Hours: 54 Lecture.

MGMT 108**Business Writing**

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course, designed for students pursuing careers in business, covers the principles of

effective writing in a business context, and provides students with extensive experience in using the different forms of business writing (e.g., memoranda, letters, reports, and resumes). Among other topics related to effective written communication, cultural differences and their impacts on communicating in a business context are studied.

Hours: 54 Lecture.

MGMT 120**Human Relations in Business**

Units: 3

Advisory: MGMT 101

Transfers to: CSU

This course is designed for the student who is seeking a career in management or is currently in a leadership role and wants a better understanding of human relation skills and techniques. Topics covered in the course include leadership, teamwork, communication, group problem-solving, diversity, motivation, and managerial organizations. These topics will apply to both a diverse and competitive environment.

Hours: 54 Lecture.

MGMT 125**Managerial Computer Applications**

Units: 3

Advisory: MGMT 101

Transfers to: CSU

This course is an introduction to computer technology as it applies to the business management environment. The course prepares managers to leverage current technology, in both theory and application, to meet the needs of the global business environment. Managerial issues and ethical standards are explored, and web-based, hands-on modules prepare students to become proficient in Microsoft Word, Excel, and PowerPoint.

Hours: 54 Lecture.

MGMT 130**Small Business Management-Entrepreneurship**

Units: 3

Advisory: MGMT 101

Transfers to: CSU

This course is designed for students interested in small business, either in a domestic or international market. Topics include start-up methods and techniques, management and operations, marketing, financing and cash management, location strategies, personnel practices, buying and selling strategies, and e-commerce. This course also provides students with an opportunity to develop a business plan as it pertains to their small business interests.

Hours: 54 Lecture.

MGMT 140**Introduction to International Business**

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to provide students with a global perspective of business and acquaint students with the relationship of culture, politics, laws, and economics to operation in today's complex global business environment. The subjects covered include

international trade and finance, confidentiality and privacy, international marketing, and international human resources management. This course is designed for students looking for entry-level positions in the field of international business.
Hours: 54 Lecture.

MGMT 141
International Marketing

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to provide students with an in-depth study of international marketing. International market opportunities and the determination of marketing objectives are also explored. Students evaluate the marketing research data and analyze selected approaches that affect the marketing mix for specific markets to coordinate strategies in global world markets. This course is designed for the marketing-oriented students and those interested in furthering their knowledge and understanding of international business.
Hours: 54 Lecture.

MGMT 142
International Management

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to provide students with a comprehensive overview of the management practice as it relates to international business. Emphasis is placed on planning, problem-solving, organizational structure, human resource management, and production management as related to international competition. These functions of management are evaluated and examined under international competitive situations and cross-cultural boundaries. This course is designed for international business majors and those students interested in furthering their knowledge of business culture, strategy and behavior issues in a global context.
Hours: 54 Lecture.

MGMT 143
Import and Export Business

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed to provide students who want to start or expand their own import and export business or professionals who seek to enter their career advancement and to do business overseas successfully. The course covers major practical applications, from understanding the objectives of parties involved in importing and exporting to the basics of letters of credit, packaging, transporting and shipments, role of banks and freight forwarders, foreign currency management, and documents used in international trade.
Hours: 54 Lecture.

MGMT 146
Human Resources Management

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students who want to study employer-employee relationships with particular emphasis on the challenges facing an expanding multicultural workforce in Southern California. Topics include legal frameworks, personnel policies and procedures, implementing equal employment and affirmative action, legal aspects of supervision, training and development, interviewing, testing, wage and salary administration, job analysis and description, recruitment, transfers, promotions, and principles of collective bargaining.
Hours: 54 Lecture.

MGMT 147
Global Business and Culture

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course introduces the concept of global citizenship and the interconnectivity of business and culture, and is designed to train students to improve intercultural interactions by learning to become more aware of their multicultural business environment domestically and internationally. In the course, students explore different cultures and their effects on international business, learn to operate effectively in a diverse context, and solve business problems by effectively learning to engage interculturally.
Hours: 54 Lecture.

MGMT 150
Principles of Management

Units: 3

Advisory: MGMT 101

Transfers to: CSU

This course is designed for students seeking a career in management or for students who need to expand their knowledge of management techniques and organizational methods. In this course, students learn the theory and application of managerial functions as it applies to planning, organizing, leading, and controlling organizations. Additional topics include the history of management, and practical management techniques, practices, and problem-solving methodologies. The topics of employee empowerment, characteristics and qualities of successful managers, and contemporary trends in management also are explored in the course.
Hours: 54 Lecture.

MGMT 180
Invention Principles I: Problem Discovery

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course introduces the concept of invention principles. It is designed to teach students to improve problem-discovery skills by learning about the details and constraints of a situation for real-world problems, and

through the unique strengths and creativity they bring to the process. In the course, students understand each stage of the problem-discovery process that is critical before they explore solutions.
Hours: 54 Lecture. 0 Lab.

MGMT 181
Invention Principles II: Solution Exploration

Units: 4

Prerequisite: MGMT 180

Transfers to: CSU

This course builds upon the concept of invention principles and is designed for students to continue the design process into the prototype and development phase of their solutions invention cycle. Students create iterations of their solutions that will seek to address the scope of their initial problem discovery. In the course, students understand each stage of the solution exploration process that is critical in developing a viable product or service.
Hours: 54 Lecture. 54 Lab.

MGMT 208 (C-ID: BUS 115)
Business Communications

Units: 3

Prerequisite: ENGL 101

Transfers to: CSU

This course covers the principles of effective writing in business. The course provides extensive experience using the different forms of business writing: memorandums, letters, reports, and resumes. Cultural differences and their impact on communicating in business are studied. This course satisfies the business communications component for the Associate in Science in Business Administration for Transfer degree.
Hours: 54 Lecture.

MGMT 290
Work Experience Education/Internship for Business Management-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of business management and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.
Hours: 3 Lecture. 54-216 Lab.

MGMT 299
Directed Study: Management

Units: 1-3

Transfers to: CSU

Independent study/directed study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or

appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent studies/directed studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet with their faculty sponsor on a regular basis and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for independent studies/directed studies are the same as those for other courses. Units are awarded in accordance with Title 5 regulations with 1 unit of credit awarded for 54 hours of directed studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide. Hours: 54-162 Lab.

MARKETING

Division of Arts, Business, & Cultural Programs

MRKT 170 **Principles of Marketing** **Units:** 3

Advisory: MGMT 101

Transfers to: CSU

This course is designed for students interested in a career in marketing or an entry-level marketing position with a retail, industrial, service, or consumer product company. Discussion of marketing concepts, strategies, and techniques take place in an environment that reflects new technologies and international competitiveness. Topics include marketing concepts, functions, operations, and organizations of retail and wholesale enterprises; distribution channels; market research; advertising; marketing costs; pricing; cooperative marketing; marketing legislation; and regulations and trends. Hours: 54 Lecture.

MRKT 171 **Consumer Behavior** **Units:** 3

Advisory: MGMT 101

Transfers to: CSU

This class investigates and analyzes the reasons consumers select, purchase, use, and dispose of goods and services to satisfy their personal and household needs. Topics include consumer culture, group influence, consumption patterns, and consumer attitudes and lifestyles. This class is appropriate for marketing majors and anyone who wants to know why people buy. Hours: 54 Lecture.

MRKT 172 **Advertising and Promotion** **Units:** 3

Advisory: MGMT 101

Transfers to: CSU

This course introduces students to the creative and competitive field of advertising and promotion. Topics include understanding the target audience, developing marketing and advertising plans, engaging in the creative process through strategy and execution, and integrating marketing communications elements as they relate to personal selling, sales promotion, direct marketing, and electronic, digital, and print media. This course is appropriate for marketing majors or anyone interested in advertising and promotion. Hours: 54 Lecture.

MRKT 173 **Principles of Selling** **Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students interested in a sales position, or students currently in the sales field who need further training or want to transition to a management or marketing manager position. The course focuses on relationship selling and developing productive selling environments as well as prospecting techniques, approach strategies, presentation and demonstration skills, overcoming selling objections, and closing techniques. Hours: 54 Lecture.

MRKT 174 **Small Business Marketing and Advertising** **Units:** 3

Advisory: MGMT 101

Transfers to: CSU

This class provides useful and effective marketing and advertising tools and techniques to students who have or would like to own a small business. A special emphasis is placed on the fundamentals of marketing and guerilla marketing and advertising techniques. Topics will include marketing plan strategies, marketing research, marketing channel management, retail and pricing strategies, and cost-effective guerilla advertising techniques for small businesses. Hours: 54 Lecture.

MRKT 175 **Retail Management** **Units:** 3

Advisory: MGMT 101

Transfers to: CSU

This course is designed for students who are pursuing a career in retail management or want to own their own retail business. Class discussions explore the topics of customer buying behavior, retail market strategy, retail site location, and human resources management. Case studies and experiential exercises are used to help students understand additional topics including customer service; retail pricing; and store, supply chain, and merchandise management. Hours: 54 Lecture.

MASS COMMUNICATIONS

Division of Communications and Languages

MSCM 103 **Survey of Motion Picture, Radio, and Television** **Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: MSCM 103 or MSCM 128. This course provides an overview of the history, theory, and aesthetic principles of radio, television, and motion pictures, and examines their social impacts and effects on society. The changing nature of consumer information is explored, along with the evolution of these three mediums in the traditional and non-traditional aspects of listening, writing, and viewing. The social, political, regulatory, ethical, and theoretical impacts on society are also studied. Hours: 54 Lecture.

MSCM 128 (C-ID: JOUR 100) **Mass Media in Modern Society** **Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: MSCM 103 or MSCM 128. This course in mass media surveys the history, format, laws, and significant contributors in American mass communications. Through projects and readings, students research and discuss such issues as free press, fair trial, foreign communications systems, and the relationship between free media and a democratic society. Hours: 54 Lecture.

MSCM 134 **Documentary Film** **Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course serves as an introduction to documentary film. It provides an overview of key historical and critical concepts regarding film, including vocabulary for storyboard and scene analysis. Students analyze films in relation to mise-en-scene, editing, sound, narrative, cinematography, screenplay, and meaning. Hours: 54 Lecture.

MUSIC

Division of Arts, Business, & Cultural Programs

MUS 101 (C-ID: MUS 110) **Fundamentals of Music** **Units:** 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students interested in the fundamentals of music theory. The class takes up basic notation, rhythm reading, major and minor scale construction, simple musical analysis, and basic chord construction.

Hours: 54 Lecture.

MUS 103 (C-ID: MUS 120)

Music Theory I

Units: 3

It is advised that students be able to read college-level texts.

Corequisite: MUS 106

Transfers to: UC/CSU

Through guided composition and analysis, this course incorporates the following concepts: rhythm and meter; basic properties of sound; intervals; diatonic scales and triads; diatonic chords, basic cadential formulas and phrase structure; dominant seventh; figured bass symbols; and non-harmonic tones. Development of skills in handwritten notation is expected.

Hours: 54 Lecture.

MUS 104 (C-ID: MUS 130)

Music Theory II

Units: 3

Prerequisite: MUS 103

Corequisite: MUS 107

Transfers to: UC/CSU

This course incorporates the concepts from Music Theory I. In addition, through guided composition and analysis, the course includes an introduction to two-part counterpoint; voice leading involving four-part chorale writing; diatonic harmony; and an introduction to secondary/applied chords and modulation.

Hours: 54 Lecture.

MUS 105 (C-ID: MUS 140)

Music Theory III

Units: 3

Prerequisite: MUS 104

Corequisite: MUS 156

Transfers to: UC/CSU

This course incorporates the concepts learned in MUS 104 (Music Theory II). In addition, through writing and analysis, the course introduces students to chromatic harmony, secondary/applied chords, modulation, borrowed chords, and Neapolitan and augmented-sixth chords.

Hours: 54 Lecture.

MUS 106 (C-ID: MUS 125)

Musicianship I

Units: 1

It is advised that students be able to read college-level texts.

Corequisite: MUS 103

Transfers to: UC/CSU

This course is designed for students who want to develop beginning aural recognition, sight-singing, and dictation skills. It is recommended for all instrumentalists, singers, and composers, and required for all music majors.

Hours: 54 Lab.

MUS 107 (C-ID: MUS 135)

Musicianship II

Units: 1

It is advised that students be able to read college-level texts.

Prerequisite: MUS 106

Corequisite: MUS 104

Transfers to: UC/CSU

This course is designed for students who want to develop the rhythmic, melodic, and harmonic materials of MUS 104 (Music Theory II) through ear training, sight singing, analysis, and dictation. This course is required for all music majors.

Hours: 54 Lab.

MUS 110

College Community Orchestra

Units: 1

Advisory: MUS 101

Transfers to: UC/CSU

This course is designed for the instrumental music student who wants to become familiar with the vast body of orchestral music. It provides players an opportunity to develop their own musical capabilities and participate in ensemble playing. Students are expected to provide their own instruments. This course may be taken once and repeated three times for credit.

Hours: 54 Lab.

MUS 116 (C-ID: MUS 185)

Diverse Instruments Ensemble

Units: 1

Advisory: MUS 101

Transfers to: UC/CSU

This course is designed for electric instrumental students, acoustic instrumental students, and vocal students who are at a beginning or intermediate level. Students perform together in one ensemble. The content is arranged for the instrumental and vocal makeup of the class and includes a diversity of styles such as popular, jazz, and contemporary classical music. Improvisation is introduced at a beginning and intermediate level appropriate to the style.

Hours: 54 Lab.

MUS 119

Advanced College Community Orchestra

Units: 1

Prerequisite: MUS 110

Transfers to: UC/CSU

This course is designed for the more advanced instrumental music student who wants to become more familiar with the vast body of orchestral music. It provides advanced players an opportunity to further develop their own musical capabilities further and to participate in ensemble playing. Students are expected to provide their own instruments. This course may be taken once and repeated three times for credit.

Hours: 54 Lab.

MUS 120 (C-ID: MUS 180)

Concert Choir

Units: 1

Enrollment requires successful audition with instructor approval prior to enrollment to demonstrate proficiency of entry skills. It is advised that students be able to read college-level texts.

Transfers to: UC/CSU

This course is designed for students who seek the skills needed to study, rehearse, and perform literature within a large vocal ensemble. Participation in public performance

is required. The repertoire includes a diversity of selections including classical choral literature, world music, popular and contemporary music. Previous choral experience is not required. This course may be taken for credit up to four times for a total of 4 units.

Hours: 54 Lab.

MUS 129

Music in Latin American Culture

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is a survey course designed for the student seeking an introduction to music in Latin American culture. The course will focus on the diverse musical cultures of South America, Central America, Mexico, Puerto Rico, and the Caribbean. Emphasis will be placed on rhythmic styles and structures, as well as, specific social, cultural, and historical backgrounds.

Hours: 54 Lecture.

MUS 130

Music History and Literature Before 1750

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is for students who seek an introduction to the major composers and musical movements from antiquity to the 1700s. The course focuses on learning, reasoning, and writing about the music of these periods with the goal of understanding their social, political, and cultural contexts. In addition, these periods will be compared to contemporary culture and its social, political, and cultural framework.

Hours: 54 Lecture.

MUS 131

Music History and Literature after 1750

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is for students who seek an introduction to the major composers and musical movements from 1750 to the present. The course focuses on learning, reasoning, and writing about the music of these periods with the goal of understanding their social, political, and cultural contexts. In addition, these periods will be compared to contemporary culture and its social, political, and cultural framework.

Hours: 54 Lecture.

MUS 132

History of Rock and Roll

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This survey course is designed for students who seek an introduction to the musical genre, or style, of rock and roll. The course focuses on rock and roll music, its origins, and the many sub-styles that have shaped its evolution. The social, political, and economic

influence rock and roll music has had on society and other types of music are also examined.

Hours: 54 Lecture.

MUS 133

Music Appreciation

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is a survey of musical practices from various periods of music history, with an emphasis on social, political, and commercial contexts. Classical, jazz, rock, blues, and world music are the types of music covered. This course is intended for students seeking to fulfill the general education arts requirement.

Hours: 54 Lecture.

MUS 135

Music in Film

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is a survey of the art and craft of film music as practiced by prominent film composers and sound designers. Emphasis is placed on history and function from 1930 to the present, as well as cultural context. The class is designed for students interested in learning how music influences film.

Hours: 54 Lecture.

MUS 136

History of Jazz

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This survey course is designed for students who seek an introduction to jazz. The course focuses on jazz music, including its origins and many sub-styles. The social, political, and economic influences the music has had on society and other types of music are also examined.

Hours: 54 Lecture.

MUS 138

Masterworks Chorale

Units: 2

Enrollment requires an audition. It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This advanced-level course is for students who seek to broaden their choral repertoire by performing major choral works from various musical periods accompanied by orchestra or other instrumental ensemble. Attention is given to the refinement and polishing of choral vocal technique. Public performance is required. Enrollment criteria requires an audition.

Hours: 27 Lecture. 27 Lab.

MUS 140

Beginning Class Voice I

Units: 1.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is for non-music majors interested in learning the foundations of singing, including proper posture, breath support, healthy vocal fold vibration, optimal resonance, articulation, diction, and stage presence. Students are given appropriate repertoire from the standard vocal literature throughout the semester. No previous musical experience is necessary.

Hours: 18 Lecture. 27 Lab.

MUS 142

Beginning Class Voice II

Units: 1.5

Prerequisite: MUS 140

Transfers to: UC/CSU

This course is for non-music majors interested in developing the voice and technique acquired in MUS 140 (Beginning Voice I) through more advanced vocal exercises and repertoire. A comprehensive study of style and interpretation is a main feature of the course.

Hours: 18 Lecture. 27 Lab.

MUS 145

Piano I

Units: 1

It is advised that students be able to read college-level texts.

Transfers to: UC/CSU

This course is part of the music core, and intended for music majors. Course material includes basic technique and notation, major and minor five finger patterns, major scales, sight reading, and basic chord progressions as they are encountered in beginning piano music.

Hours: 18 Lecture.

MUS 146

Piano II

Units: 1

Prerequisite: MUS 145

Transfers to: UC/CSU

This course is part of the music core, and is intended for music majors. Course material includes piano technique, all major and minor scales and arpeggios, sight reading, chord progressions, harmonization, and transposition skills as encountered in upper-beginning/early intermediate piano music.

Hours: 18 Lecture.

MUS 147

Piano III

Units: 1

Prerequisite: MUS 146

Transfers to: UC/CSU

This course is part of the music core, and is intended for music majors. Course material includes piano technique, all major and minor scales and arpeggios, sight reading, expanded chord progressions, harmonization, and transposition skills as encountered in intermediate piano music.

Hours: 18 Lecture.

MUS 148

Piano IV

Units: 1

Prerequisite: MUS 147

Transfers to: UC/CSU

This course is part of the music core, and is intended for music majors. Course material builds upon skills acquired from Piano III (MUS 147). Attention is given to intermediate-

level technical and interpretive skills including piano technique; sight reading; soprano, alto, tenor, bass (SATB) score reading; and basic song accompaniment.

Hours: 18 Lecture.

MUS 150

Beginning Class Guitar I

Units: 1.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is for non-music majors interested in beginning guitar skills and in the understanding of music through the study of simple guitar pieces. The development of skills at the beginning level may be used in playing various styles, including classical, pop, jazz, rock, and blues. No previous musical experience is necessary.

Hours: 18 Lecture. 27 Lab.

MUS 151

Beginning Class Guitar II

Units: 1.5

Prerequisite: MUS 150

Transfers to: UC/CSU

This course is for non-music majors interested in broadening their understanding of guitar literature by performing beginning-level works. Attention is given to the refinement and polishing of technique through scales, arpeggios, sight-reading, interpretation, and tone production.

Hours: 18 Lecture. 27 Lab.

MUS 152

Intermediate Class Guitar I

Units: 1.5

Prerequisite: MUS 151

Transfers to: UC/CSU

This course is for non-music majors interested in broadening their understanding of guitar literature by performing intermediate-level works. Attention is given to the refinement and polishing of technique through scales, arpeggios, sight-reading, interpretation, and tonal production; as well as analysis of various musical periods and styles.

Hours: 18 Lecture. 27 Lab.

MUS 153

Intermediate Class Guitar II

Units: 1.5

Prerequisite: MUS 152

Transfers to: UC/CSU

This course is for non-music majors interested in improving their technique and skills by performing more difficult guitar works. Assigned scales, chord progressions, pieces, and etudes are selected to advance a student's technique and repertoire from various periods and styles.

Hours: 18 Lecture. 27 Lab.

MUS 156

Musicianship III

Units: 1

Prerequisite: MUS 107

Corequisite: MUS 105

Transfers to: UC/CSU

This course is designed for the student who wants to develop the rhythmic, melodic, and harmonic materials of MUS 105 (Music Theory III) through ear training, sight singing analysis and dictation. This course is required of all music majors.

Hours: 54 Lab.

MUS 157
Musicianship IV

Units: 1

Prerequisite: MUS 156

Corequisite: MUS 206

Transfers to: UC/CSU

This course is designed for students who want to develop the rhythmic, melodic, and harmonic materials of MUS 105 (Music Theory III) through ear training, sight singing, analysis, and dictation. This course is required for all music majors.

Hours: 54 Lab.

MUS 158
Masterworks Chorale II

Units: 2

Enrollment requires an audition

Prerequisite: MUS 138

Transfers to: UC/CSU

This advanced-level course is designed for students who seek in-depth study of choral literature by performing complex choral works such as Beethoven's *Mass in C*, Orff's *Carmina Burana*, and Britten's *War Requiem* accompanied by orchestra or other instrumental ensemble, or sung a cappella. Attention is given to every detail of musical development through rehearsal and performance of choral music from various musical periods and styles. Public performance is required. Enrollment criteria requires successful completion of MUS 138 (Masterworks Chorale) and an audition.

Hours: 27 Lecture. 27 Lab.

MUS 160
Beginning Class Piano I

Units: 1.5

It is advised that students be able to read college-level texts.

Transfers to: UC/CSU

This course is for non-music majors interested in beginning piano skills and understanding music through the study of simple piano pieces. The development of skills at the beginning level may be used in playing various styles, including classical, pop, jazz, and rock. Individual pieces are performed in class. Previous experience is unnecessary.

Hours: 18 Lecture. 27 Lab.

MUS 161
Beginning Class Piano II

Units: 1.5

Prerequisite: MUS 160

Transfers to: UC/CSU

This course is for non-music majors interested in beginning piano skills and understanding music through the study of simple piano pieces. The development of skills at the beginning level may be used in playing various styles, including classical, pop, jazz, and rock. Individual pieces are performed in class. This course builds on the material students learn in Beginning Class Piano I (MUS 160).

Hours: 18 Lecture. 27 Lab.

MUS 162
Intermediate Class Piano I

Units: 1.5

Prerequisite: MUS 161

Transfers to: UC/CSU

This course is for non-music majors seeking to broaden their knowledge and

understanding of piano literature. Various works of intermediate difficulty are introduced, and attention paid to the refinement and polishing of technique, interpretation, and tone production.

Hours: 18 Lecture. 27 Lab.

MUS 163
Intermediate Class Piano II

Units: 1.5

Prerequisite: MUS 162

Transfers to: UC/CSU

This class is for non-music majors who seek to broaden their knowledge and understanding of piano literature. More advanced solo literature of intermediate difficulty is introduced, and emphasis placed on the continued technical and interpretive demands required to perform a varied repertoire.

Hours: 18 Lecture. 27 Lab.

MUS 178
Masterworks Chorale III

Units: 2

Enrollment requires an audition

Prerequisite: MUS 158

Transfers to: UC/CSU

This advanced-level course is designed for students who seek in-depth study of choral literature by performing complex choral works like Bach's sacred and secular cantatas, masses by Mozart and Haydn, renaissance madrigals and sacred pieces, and contemporary choral works accompanied by orchestra or other instrumental ensemble, or sung a cappella. Attention is given to every detail of musical development through rehearsal and performance of choral music. Public performance is required. Students are expected to take on leadership roles as section leaders, mentors to new singers, and committee work for the choral organization. Enrollment criteria requires successful completion of MUS 158 (Masterworks Chorale) and an audition.

Hours: 27 Lecture. 27 Lab.

MUS 181 (C-ID: MUS 160)
Applied Music

Units: 0.5

Enrollment requires an audition. It is advised that students be able to engage in written composition at a college level and read college-level texts.

Corequisite: MUS 116 or MUS 116 or MUS 116 or MUS 120 or MUS 120 or MUS 216 or MUS 234

Transfers to: UC/CSU

This course is for students interested in receiving individual instruction in voice, piano, guitar, band, or orchestral instruments with an assigned instructor. Emphasis is placed on study at the beginning level of technique and repertoire. Each week, the course includes one recital class and one individual lesson. Performance for a faculty jury is required at the end of the semester. This course may be taken for credit up to 4 times for a total of 2 units.

Hours: 9 Lecture.

MUS 206 (C-ID: MUS 150)
Music Theory IV

Units: 3

Prerequisite: MUS 105

Corequisite: MUS 157

Transfers to: UC/CSU

This course is designed for students who want an introduction to the materials and the major trends and movements of the 20th- and 21st centuries. Students gain techniques for motivic and harmonic analysis, improvisation, and listening strategies for addressing this repertoire, and will both compose and perform as a class following the models of masterworks of the last 100 years.

Hours: 54 Lecture.

MUS 211
Composition Workshop I

Units: 3

Prerequisite: MUS 104

Transfers to: UC/CSU

This beginner-level course is for students who want to develop vocal and instrumental compositional skills through analysis and creative writing in a workshop setting. The course includes the basic elements and tools of musical composition, including rhythm, melody, harmony, and counterpoint; and musical structure and form. Students are assigned composition exercises, describe and discuss their work with the class, and work on a final composition project.

Hours: 54 Lecture.

MUS 212
Composition Workshop II

Units: 3

Prerequisite: MUS 211

Advisory: MUS 105, MUS 206

Transfers to: UC/CSU

This intermediate-level course is for students who want to further develop vocal and instrumental compositional skills through analysis and creative writing in a workshop setting. The course includes elements and tools of musical composition, including late 19th- and 20th-century harmony, the study of musical forms, analysis, guided listening, and discussion of examples from the repertoire. Students are assigned composition exercises, describe, discuss and discuss their work with the class, and work on building a composition portfolio.

Hours: 54 Lecture.

MUS 216 (C-ID: MUS 185)
Industrial Orchestra

Units: 2

Enrollment requires successful audition with instructor approval to demonstrate proficiency of entry skills.

Transfers to: UC/CSU

This course is designed for advanced electric instrumental students, acoustic instrumental students, and vocal students to broaden their abilities to perform and improvise in an ensemble as well as record in the studio. The ensemble content is arranged for the instrumental and vocal makeup of the class, and includes a range of styles that include contemporary classical, popular, film and video game music, and electroacoustic music. Rio Hondo College composition students may also arrange and compose for this performance group. This course may be taken for credit up to four times for a total of 8 units.

Hours: 27 Lecture. 27 Lab.

MUS 234 (C-ID: MUS 180)
Advanced Chamber Singers

Units: 2

Enrollment requires successful audition with instructor approval required prior to enrollment to demonstrate proficiency of entry skills; It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students with advanced skills in rehearsing and performing choral music. A wide variety of music selected from different musical periods and styles will be selected for study and performance. This course may be taken up to four (4) times for a total of eight (8) units.

Hours: 27 Lecture. 27 Lab.

MUS 241

Advanced Voice I

Units: 1.5

Prerequisite: MUS 142

Transfers to: UC/CSU

This course is for students interested in further developing the vocal technique, musical interpretation, and performance skills appropriate for advanced vocal performance. Attention is given to details including specific vowels, clarity of tone, and interpretation. Public performance is required.

Hours: 18 Lecture. 27 Lab.

MUS 290

Work Experience Education/Internship for Music-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of music or music technology and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-216 Lab.

MUS 299

Directed Study: Music

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and

submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

MUSIC AND INTEGRATED TECHNOLOGY

Division of Arts, Business, & Cultural Programs

MUST 312

Popular and Contemporary Electronic Music Theory

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Transfers to: CSU

This course is designed for the student who wishes to study the theory and practice of popular and contemporary electronic music. The principles and procedures of composition and songwriting in various electronic media from avant-garde through hip hop and electronic dance music to modern electronic popular music are explored through exercises, reading, listening, and discussion.

Hours: 54 Lecture.

MUST 316

Songwriting and Demo Production for Electronic Popular Music

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Advisory: MUST 115

Transfers to: CSU

This course is designed for students who want to further their knowledge of the processes of songwriting and producing demos for electronic popular music. Students delve into song structures, chord progressions, rhythms, melodies, lyrics, and the production of polished demos. Projects are designed to bring students' unique sound to life through synthesis, samples, and recorded tracks for electronic accompaniment. Students create original electronic popular music and enhance their music production skills.

Hours: 36 Lecture. 54 Lab.

MUST 351

History and Evolution of Electronic and Computer Music

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Advisory: MUST 151

Transfers to: CSU

This course explores the history and evolution of electronic and computer music of the 20th century. Through the study of representative works from groundbreaking composers, students explore the immense musical and technological changes that characterize these periods, as well as important cultural, political, and social movements that continue to inspire and shape modern electronic music.

Hours: 54 Lecture.

MUST 361

Crossroads Electronic Digital Instrument Pop Collective

Units: 2

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Transfers to: CSU

This course is designed for students who want to broaden their abilities to perform in small groups using electronic digital instruments (E.D.I.), as well as to record performances on a computer. This course focuses on intermediate-level rehearsal and public performance of beat-driven, grid-based pieces covering an eclectic and diverse selection of electronic music styles. The repertoire also includes original student works as well as re-orchestrated pieces.

Hours: 108 Lab.

MUST 365

Electronic Digital Instrument Experimental Orchestra

Units: 2

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Transfers to: CSU

This course is designed for students who want to broaden their abilities to perform in a large ensemble setting using electronic digital instruments (E.D.I.), as well as to record performances on a computer. Focus is placed on rehearsal and public performances of texturally-driven, off-grid-based pieces that cover an eclectic and diverse selection of electronic music styles. The repertoire includes original student works as well as re-orchestrated pieces.

Hours: 108 Lab.

MUST 397

Production Companies and Independent Record Labels

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Advisory: MUST 105

Transfers to: CSU

This course provides students with the knowledge to explore the dynamic world of independent record labels, including a comprehensive focus on legal aspects, contracts, publishing, licensing, and strategies for navigating the streaming music landscape. In the course, students learn the skills to launch and manage an independent label successfully in the digital age.

Hours: 54 Lecture.

MUST 398

Mastering Music Sales and Promotion: From Branding to Marketing

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Advisory: MUST 105

Transfers to: CSU

This course teaches students the exhaustive process of do-it-yourself (D.I.Y.) music sales and promotion, from developing a brand and identifying a vision to promotions and publicity, while creating a customized, low-budget marketing plan that includes website design and social media. This hands-on class is designed to empower aspiring artists with the essential tools and techniques required to effectively promote themselves in the ever-evolving music industry.

Hours: 54 Lecture.

MUST 400A

Electronic Digital Instrument Performance Techniques III

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Prerequisite: MUST 300B

Transfers to: CSU

This is the third course of a sequence designed for students to gain performance and improvisation skills in electronic popular music using and developing samples and loops. Techniques on MIDI push button controllers like Ableton Push 3, as well as turntable controllers, are used to create and develop sound objects. Additional topics include performing mashups and building live sets. Courses culminate in a performance jury to demonstrate students' electronic digital instrument (E.D.I.) performance progress.

Hours: 36 Lecture. 54 Lab.

MUST 400B

Electronic Digital Instrument Performance Techniques IV

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Prerequisite: MUST 400A

Transfers to: CSU

This is the fourth course of a sequence designed for students to incorporate human gestures and expressions into their electronic popular music performance and improvisation skills. Techniques on MIDI push button controllers like Ableton Push 3, as well as Max for Live, are used to explore gestures and the mapping of controllers to sound parameters. Courses culminate in a performance jury to demonstrate students' electronic digital instrument (E.D.I.) performance progress.

Hours: 36 Lecture. 54 Lab.

MUST 421

Samples and Sound Libraries in Electronic Popular Music

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Advisory: MUST 122

Transfers to: CSU

This course focuses on principles and techniques of using and manipulating samples and sound libraries in the service of electronic popular music. Additional topics

include deconstructing and recreating samples for use in electronic popular music production, as well as spectral analysis of complex sounds without clear pitch content.

Hours: 36 Lecture. 54 Lab.

MUST 422

Interactive Electronic Popular Music

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Advisory: MUST 122

Transfers to: CSU

This course focuses on interactive and basic algorithmic methods of sound creation in the service of electronic popular music. Projects focus on how to create systems of sound and explore the various ways of interacting and influencing them. Topics include programming and mapping gesture controllers using digital audio software and specialized programming language (e.g., Ableton Live and Max for Live).

Hours: 36 Lecture. 54 Lab.

MUST 441

Advanced Electronic Popular Music Production Techniques

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Advisory: MUST 122, MUST 115, MUST 141

Transfers to: CSU

This course focuses on software-based electronic popular music production along with modern songwriting trends and mixing techniques. In this experiential and project-oriented course, aspiring producer-songwriter-performers become familiar with popular music-making conventions and mixing techniques in the context of in-the-box electronic popular music production.

Hours: 36 Lecture. 54 Lab.

MUST 497

Senior Performance and Production Project

Units: 1

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Prerequisite: MUST 400A

Transfers to: CSU

The senior performance and production project is half of the final requirement in order to complete the Electronic Digital Instrument (E.D.I.) Performance and Production Degree. Students will compose, perform, and produce a full-length album of approximately 45 minutes of original music in order to promote their popular electronic music career. Work is to be accomplished under the supervision of an appropriate faculty member.

Hours: 18 Lecture.

MUST 498

Senior Performance Recital

Units: 1

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Prerequisite: MUST 400A

Transfers to: CSU

The senior performance recital is half of the final requirement in order to complete the

Electronic Digital Instrument (E.D.I.)

Performance and Production Degree.

Students produce an evening-length recital of approximately 45 minutes of original music that is written, scored, rehearsed, and performed by students with help from other live musicians. Students also collaborate and interface with a live sound crew. Work is accomplished under the supervision of an appropriate faculty member.

Hours: 18 Lecture.

MUST 100

Pro Tools Fundamentals I

Units: 3

It is advised that students be able to read college-level texts.

Transfers to: CSU

This course introduces fundamental Pro Tools concepts and principles, covering everything students need to know to complete a basic Pro Tools project, from initial setup to final mixdown. Students also learn to build sessions that include multi-track recordings of live audio, MIDI sequences, and virtual instruments. Hands-on exercises and projects introduce essential techniques for creating sessions, recording and importing audio and MIDI, editing session media, navigating sessions and arranging media on tracks, and using basic processing and mixing techniques to finalize a production.

Hours: 54 Lecture.

MUST 101 (C-ID: CMUS 100X)

Introduction to Music Technology

Units: 3

It is advised that students be able to read college-level texts.

Transfers to: CSU

This course is designed for the student who wants to learn the terminology, equipment, techniques, and concepts of music technology. Focus will be on principles and practices of sound, digital audio, synthesis, Musical Instrument Digital Interface (MIDI), MIDI sequencing, notation software, and audio recording utilizing hardware and software platforms. Lab activities will place an emphasis on the operation and components of the typical MIDI and digital audio lab (hardware and software). Students will complete independent projects demonstrating hands-on knowledge.

Hours: 36 Lecture. 54 Lab.

MUST 105 (C-ID: CMUS 140X)

Introduction to the Music Business

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is intended for students interested in the music business. It presents an overview of the business and legal aspects of the music industry in order to help students understand the rapid and massive changes caused by the digital music revolution. The course focuses on career possibilities, the development of business-related knowledge and skills necessary for effectively maintaining a professional music career, the vocabulary and terminology of the music industry, and the distinction between music and business at the corporate level. Topics include record contracts, publishing, licensing, marketing,

distribution, performances, and copyright. In addition, the duties and responsibilities of musicians, songwriters, lawyers, agents, promoters, publishers, executives, managers, and anyone trying to navigate the rapid transformation of the industry are examined. Hours: 54 Lecture.

MUST 110
Pro Tools Fundamentals II

Units: 3

Prerequisite: MUST 100

Transfers to: CSU

This course expands upon the basic principles taught in the Pro Tools Fundamentals I course and introduces the core concepts and techniques students need to competently operate a Pro Tools system running mid-sized sessions. Students learn to build sessions designed for commercial purposes and improve the results of their recording, editing, and mixing efforts. Guided exercises provide experience in setting up sessions, importing media, working with digital video, spotting sound effects, using loop recording and MIDI Merge techniques, and working with virtual instruments. Additional topics include warping with Elastic Audio, applying Real-Time Properties, creating clip loops, applying signal processing, using automation, and using submixes and track groups to simplify a final mix. Together with the first course in the series, Pro Tools Fundamentals I, this course provides the training required to prepare for the Avid Certified User: Pro Tools certification exam. Hours: 54 Lecture.

MUST 111
Theory and Musicianship for Electronic Music I

Units: 4

It is advised that students be able to read college-level texts.

Transfers to: CSU

This course is the first of a sequence for students to focus on the development of theory and musicianship skills in both traditional notation and digital audio workstation (DAW) tablature. Through guided writing and analysis of popular electronic music, this course incorporates the following concepts: rhythm and meter; basic properties of sound; intervals; diatonic scales and triads; diatonic chords, basic cadential formulas, and phrase structure; dominant seventh; and non-harmonic tones. The course also develops beginning-level aural skills, sight-reading, sight-singing, as well as dictation and rhythmic interpretation skills. Hours: 72 Lecture.

MUST 112
Theory and Musicianship for Electronic Music II

Units: 4

Prerequisite: MUST 111

Transfers to: CSU

This course is the second in a sequence for students to focus on the development of theory and musicianship skills in both traditional notation and digital audio workstation (DAW) tablature. Through guided composition and analysis, the course includes an introduction to two-part counterpoint; voice leading involving four-part writing; diatonic harmony; and an introduction to

secondary/applied chords and modulation. This course also develops beginning-intermediate-level aural skills, sight-reading, sight-singing, as well as dictation and rhythmic interpretation skills. Hours: 72 Lecture.

MUST 115 (C-ID: CMUS 150X)
Songwriting and Arranging I

Units: 3

Prerequisite: MUS 103, MUST 101

Transfers to: UC/CSU

This course is designed for students who want to learn the process of songwriting. Songs are analyzed using chord structure, form, rhythm, melody, harmony, and lyrics. Original compositions and performances are expected from all students. Hours: 36 Lecture. 54 Lab.

MUST 116
Songwriting and Arranging II

Units: 3

Prerequisite: MUS 104 or MUST 115

Transfers to: UC/CSU

This course is designed for students who want to further their knowledge of the process of songwriting and arranging. Complex songs and advanced song forms are analyzed using chord structure, form, rhythm, melody, harmony, and lyrics. Additional emphasis on the creation of lead sheets as well as the proper presentation of a score and parts for strings and horn sections is included. Original compositions, recordings, and performances are expected from all students. Hours: 36 Lecture. 54 Lab.

MUST 121 (C-ID: CMUS 110X)
Electronic Music I

Units: 3

Prerequisite: MUST 101

Transfers to: CSU

This course is designed for students who want to gain an understanding of the processes and tools available to the modern electronic musician. While using the most up-to-date software, students will learn to record, arrange, mix, and produce music. Topics include synthesis, sampling, and musical instrument digital interface (MIDI) sequencing. Compositions are expected of students utilizing electronic music techniques. Hours: 36 Lecture. 54 Lab.

MUST 122
Electronic Music II

Units: 3

Prerequisite: MUST 121

Transfers to: CSU

This course is designed for students who want to continue the study of concepts and techniques needed to compose electronic music. Sequencing, advanced forms of automation, and various types of analog and digital synthesis are studied in greater depth, and the topic creating music for film and video games is also introduced. Hours: 36 Lecture. 54 Lab.

MUST 123
Electronic Music III

Units: 3

Prerequisite: MUST 122

Transfers to: CSU

This course is designed for advanced electronic music students who want to continue the study of concepts and

techniques needed to compose electronic music. It is recommended for students who intend to pursue music professionally. Assignments include ambient soundscapes, which explore advanced concepts of sound and noise, *musique concrete*, experimental dance music, and scoring music for animation and motion picture scenes. Hours: 36 Lecture. 54 Lab.

MUST 125
Sound Design I: Music, Media, and Game Audio

Units: 3

Prerequisite: MUST 121

Advisory: MUST 141

Transfers to: CSU

This course is for students interested in learning the basics of sound design. The course introduces the physics of sound and how to successfully manipulate, modulate, and record sound in the service of various music and media industries (e.g., the music, television/film, and video game industries). Assignments are project based. Hours: 36 Lecture. 54 Lab.

MUST 126
Sound Design II

Units: 3

Prerequisite: MUST 122, MUST 125, MUST 142

Transfers to: CSU

This course is for students interested in learning advanced techniques and theory of sound design. The course will introduce acoustics, the psychoacoustics of sound and how to successfully program complex systems in order to synthesize and sculpt, and sound in the service of various music and media industries (e.g., the music, television/film, and video game industries). Assignments will be project based. Hours: 36 Lecture. 54 Lab.

MUST 130
Pro Tools for Game Audio

Units: 3

Prerequisite: MUST 100

Transfers to: CSU

This course exposes students to the core skills, workflow, and concepts involved in creating and implementing game audio using Pro Tools systems. The course covers basic sound design techniques along with sample workflows. Session time is divided between demonstration and guided practice, with ample time to experiment with sample material. Together with the Pro Tools Fundamentals I course, this course provides the training required to prepare for the Avid Certified User: Pro Tools for Game Audio certification exam. Hours: 54 Lecture.

MUST 141 (C-ID: CMUS 130X)
Recording Studio I

Units: 3

Advisory: MUST 101

Transfers to: CSU

This course is designed for students who want to learn how to make high-quality recordings using a wide array of tools and techniques. Emphasis is placed on digital audio workstation (DAW) sound recording, editing, and mixing processes through hands-on experience. Students collaborate to produce recordings within several musical genres.

Hours: 36 Lecture. 54 Lab.

MUST 142

Recording Studio II

Units: 3

Prerequisite: MUST 141

Transfers to: CSU

This course is designed for students who want to continue the study of recording studio techniques, signal flow using an analog console, and advanced ensemble microphone techniques. Students also create a portfolio of work demonstrating their recording knowledge.

Hours: 36 Lecture. 54 Lab.

MUST 145 (C-ID: CMUS 120X)

Live Sound Reinforcement I

Units: 3

Advisory: MUST 101

Transfers to: CSU

This course is designed for students who want an overview of live concert sound reinforcement. Topics include basic sound system theory and its application, as well as the operation of individual sound system components, including microphones, mixers, effects, power amplifiers, and speaker systems. This course offers opportunities for hands-on experience in troubleshooting, sound checking, and mixing sound for live performance applications.

Hours: 36 Lecture. 54 Lab.

MUST 146

Live Sound Reinforcement II

Units: 3

Prerequisite: MUST 145

Transfers to: CSU

This course is designed for students seeking to further their knowledge in live concert sound reinforcement. Topics include professional communication with musicians, and intermediate sound system theory and its application. It also covers individual sound system component operation, including microphones, mixers, effects, power amplifiers, and speaker systems. This course offers opportunities for hands-on experiences in troubleshooting, sound checking, and mixing sound for live performance applications.

Hours: 36 Lecture. 54 Lab.

MUST 151

History of Electronic Music

Units: 3

Advisory: READ 101, ENGL 101

Transfers to: UC/CSU

This survey course is designed for students who seek an introduction to electronic music. Beginning with the European and American avant garde, the course traces the roots and routes of electronic music through Jamaican Dub, Chicago House, Detroit Techno, Bronx Hip-hop, and U.K. Rave, among other styles. Analysis of musical style and the relationship to particular technologies accompanies an examination of various genres in their social and cultural contexts.

Hours: 54 Lecture.

MUST 152

History of Hip Hop

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students who seek to expand their knowledge of hip hop music through the exploration of its cultural, musical, and technological influences. The course includes a comprehensive survey of styles beginning with old-school hip hop, through its golden age, to its present-day status as the most popular genre of music in the United States. The course also covers sampling, licensing, and copyright law, which are all integral parts of the music business.

Additionally, the course delves into technology-centered topics such as turntablist beat matching and scratching, digital samplers, digital workstations, Auto-Tune, and beyond.

Hours: 54 Lecture.

MUST 161

Electronic Digital Instrument Pop Collective

Same as: MUST 361

Units: 2

Advisory: MUST 200A

Transfers to: CSU

This course is designed for students who want to broaden their abilities to perform in small groups using electronic digital instruments (E.D.I.), as well as to record performances on a computer. This course focuses on beginner-level rehearsal and public performance of beat-driven, grid-based pieces covering an eclectic and diverse selection of electronic music styles. The repertoire also includes original student works as well as re-orchestrated pieces.

Hours: 108 Lab.

MUST 191A

Music and Integrated Technology Capstone - Recording

Units: 2

Prerequisite: MUST 141

Advisory: MUST 142

Transfers to: CSU

This course is for students in the Music and Integrated Technology program to learn hands-on skills. The course focuses on collaborative projects, with students performing the professional roles of recording engineers and assistant engineers, and will prepare students for the highly collaborative music and media industries. Additionally, the course will help students build a professional portfolio with which to apply for entry-level jobs.

Hours: 108 Lab.

MUST 191B

Music and Integrated Technology Capstone - Production

Units: 2

Prerequisite: MUST 121, MUST 141

Advisory: MUST 142

Transfers to: CSU

This course is for students in the Music and Integrated Technology program to learn hands-on skills. The course focuses on collaborative projects, with students performing the professional role of music producer, and will prepare students for the highly collaborative music and media industries. Additionally, the course will help students build a professional portfolio with which to apply for entry-level jobs.

Hours: 108 Lab.

MUST 200A

Electronic Digital Instrument (EDI) Controllers I

Units: 1

It is advised that students be able to read college-level texts.

Transfers to: CSU

In this course, students develop Electronic Digital Instrument (EDI) performance skills, and declare EDI as the primary instrument of study for electronic musicians. Emphasis is placed on push button controller techniques. Course content includes basic technique and notation, major and minor fingering patterns, sight reading, and basic chord patterns and progressions.

Hours: 18 Lecture.

MUST 200B

Electronic Digital Instrument (EDI) Controllers II

Units: 1

Prerequisite: MUST 200A

Transfers to: CSU

In this course, students continue to develop Electronic Digital Instrument (EDI) performance skills, and declare EDI as the primary instrument of study for electronic musicians. Course content includes intermediate-level techniques and notation, major and minor fingering patterns, sight reading, and intermediate-level chord patterns and progressions.

Hours: 18 Lecture.

MUST 201

Pro Tools Production I

Units: 3

Prerequisite: MUST 110

Transfers to: CSU

This course covers the core concepts and skills needed to operate an Avid Pro Tools Ultimate system with HD-series hardware in a professional studio environment. This course builds on the Pro Tools Fundamentals I and II series of courses, providing intermediate- and advanced-level Pro Tools concepts and techniques. Students learn to customize the configuration of Pro Tools | HD Native systems to maximize results and improve recording, editing, and mixing workflows. Guided exercises provide experience in optimizing system resources, configuring I/O, navigating and color-coding sessions, managing session media, using advanced selection and auditioning techniques, working with clip gain, applying advanced automation techniques, creating submixes and applying parallel processing, advanced mixing, and finishing techniques for a final mixdown. This course provides the foundational training for the Avid Certified Operator: Pro Tools | Music, and Avid Certified Operator: Pro Tools | Post certification exams.

Hours: 54 Lecture.

MUST 300A

Electronic Digital Instrument Performance Techniques I

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Transfers to: CSU

This is the first course in a sequence that will explore techniques of harmonic and melodic performance and improvisation skills for live

electronic popular music performance. The course focuses on performance techniques for MIDI push button controllers like Ableton Push 3, as well as computer-assisted melodic and harmonic vocal practices with and without pitch correction and harmonization software. Musical topics include scales, chords, arpeggios, and melodies. Courses culminate in a performance jury to demonstrate students' electronic digital instrument (E.D.I.) performance progress. Hours: 36 Lecture. 54 Lab.

MUST 300B

Electronic Digital Instrument Performance Techniques II

Units: 3

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Prerequisite: MUST 300A

Transfers to: CSU

This second course of a sequence explores techniques of rhythmic performance and improvisation skills for live electronic popular music performance. Techniques on MIDI push button controllers like Ableton Push 3, as well as computer-assisted beat-boxing and vocal percussion practices, are explored. Additional topics include drum machine programming, beat patterns, and electronic pulses. Courses culminate in a performance jury to demonstrate students' electronic digital instrument (E.D.I.) performance progress. Hours: 36 Lecture. 54 Lab.

MUST 305

Critical Listening for the Electronic Popular Musician

Units: 2

Enrollment requires admission to the EDI Performance and Production baccalaureate degree program.

Transfers to: CSU

This course is designed to help students develop an understanding of audio quality, identify synthesis modules, and modulation techniques, and to understand musical aspects of audio production and the vocabulary necessary to offer audio critique. Hours: 36 Lecture.

NUTRITION SCIENCE

Division of Health Science and Nursing

NUTR 110 (C-ID: NUTR 110)

Introduction to Nutrition Science

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed to provide students with basic knowledge of scientific concepts related to the function of nutrients in basic life processes and current health issues with emphasis on individual needs, dietary guidelines, macronutrients, micronutrients, digestion, absorption, metabolism, health, and disease prevention through a balanced diet. This course is appropriate for nutrition majors and health science majors, including nursing.

Hours: 54 Lecture.

NUTR 120 (C-ID: NUTR 120)

Principles of Foods with Lab

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students majoring in nutrition to learn the application of food science principles with emphasis on ingredient function and interaction, food preparation, food preparation techniques, sensory evaluation standards, food safety and sanitation, and nutrient composition of food. Hours: 45 Lecture. 27 Lab.

OPERATING ENGINEERS

Division of Career and Workforce Education

OENG 041

Introduction to Apprenticeship

Units: 2.5

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program.

This course provides related and supplemental instruction for state-indentured apprentices employed full-time in the operating engineers trade. Students identify basic safety rules and procedures when operating and working around heavy construction equipment, and learn about proper safe attitudes and work ethics, personal financial planning responsibilities, the history of organized labor and its structure, and the importance of wages and benefits of being a member of a local union. Hours: 36 Lecture. 36 Lab.

OENG 042

Grade Checking

Units: 2.5

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course provides related and supplemental instruction for state-indentured apprentices employed full-time in the operating engineers field. The course reviews information found on typical grading and survey stakes, the use of colored ribbon on grade stakes, transferring elevations from one point to another, setting grading stakes for both cut and fill slopes, grading stakes for curb and streets, staking procedures for subdivisions, basic laser set-up, and basic GPS equipment setup. Hours: 36 Lecture. 36 Lab.

OENG 043

Equipment Operator

Units: 2.5

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course provides related and supplemental instruction for state-indentured apprentices employed full-time in the operating engineers field. The course covers preventive maintenance and operation of heavy construction equipment, best practices and personal safety, terminology, maintenance, and operation of the following pieces of equipment: scrapers, dozers, loaders, forklifts, compactors, rollers, and construction cranes.

Hours: 36 Lecture. 36 Lab.

OENG 044

Plan Reading

Units: 2.5

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course provides related and supplemental instruction for state-indentured apprentices employed full-time in the operating engineers field. The course introduces the tasks of interpreting and reading plan sets consisting of grading, infrastructure, and structural plans for roadways, subdivisions, and service utilities. Hours: 36 Lecture. 36 Lab.

OENG 045

Skills Specialization

Units: 2.5

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course provides related and supplemental instruction to operating engineer apprentices. The course covers the topics of preventive maintenance and operation of heavy construction equipment, best practices and personal safety, terminology, maintenance, and operation of the following pieces of equipment: backhoes, excavators, motor graders, finish dozers, slope boards, hydraulic and conventional cranes. Hours: 36 Lecture. 36 Lab.

OENG 052

Welding

Units: 2.5

State Indentured Apprentice in the Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course is designed to meet the needs of state indentured apprentices employed full-time in the operating engineer field. Topics include the safe use of oxyacetylene cutting equipment, the technique of brazing, and electric arc welding. Hours: 36 Lecture. 36 Lab.

OENG 053

Introduction to Hydraulics

Units: 2.5

State Indentured Apprentice in the Operating Engineers Trust Apprenticeship Program; It is advised that students have

knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course is designed to meet the needs of state indentured apprentices employed full-time in the operating engineers field. Course topics include the principles of hydraulics, how a hydraulic system works, and the practical uses of hydraulics.
Hours: 36 Lecture. 36 Lab.

OENG 054

Advanced Hydraulics/Pneumatics

Units: 2.5

State Indentured Apprentice in the Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course is designed to meet the needs of state indentured apprentices employed full-time in the operating engineer field. Course topics include the diagnosis, service, and repair of hydraulic valves, motors, pumps, and cylinders; diagnosis and repair of variable speed hydraulic drives; and service and maintenance of pneumatic systems used on heavy equipment and heavy trucks.
Hours: 36 Lecture. 36 Lab.

OENG 055

Engines - Gasoline and Diesel

Units: 2.5

State Indentured Apprentice in the Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course provides related and supplemental instruction in basic safety practices and proper maintenance procedures required of operating engineer apprentices when working with gasoline and/or diesel engines. Specific topics include internal combustion engine theory for both diesel and gasoline engines, use of appropriate hand tools needed for engine repair, proper procedures for engine disassembly and assembly, and troubleshooting and diagnosing engine failures.
Hours: 36 Lecture. 36 Lab.

OENG 056

Component Disassembly and Assembly

Units: 2.5

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course is designed to meet the needs of state-indentured apprentices employed full-time in the operating engineer field. Course topics include clutches, mechanical transmissions, differentials, final drives, crawler tractor undercarriage, and crawler tractor track assemblies.
Hours: 36 Lecture. 36 Lab.

OENG 062

Structural Masonry Inspection

Units: 4

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship

Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course is designed to meet the needs of state-indentured apprentices with the State of California who are interested in the field of operating engineer inspection. Topics include industry safety, industry terminology, masonry inspection testing, structural masonry plan reading, field interpretation, and successful completion of the industry standard certification examination.
Hours: 54 Lecture. 54 Lab.

OENG 063

Reinforced Concrete Inspection

Units: 4

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course provides related and supplemental instruction for operating engineer apprentices. The course covers codes and duties, reinforcing steel, blueprinting reading, structural gunite applications, report writing, and people skills. Apprentices gain the knowledge, research skills, and confidence needed to pass written and oral exams.
Hours: 54 Lecture. 54 Lab.

OENG 064

Structural Steel/Welding

Units: 4

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course is designed to meet the needs of state indentured apprentices with the State of California who are interested in the field of operating engineer inspection. Topics include industry safety, industry terminology, structural steel/welding inspection testing, analytical blueprint reading, field interpretation, and successful completion of the industry standard certification examination.
Hours: 54 Lecture. 54 Lab.

OENG 065

Prestressed Concrete Inspector

Units: 4

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course provides the related and supplemental instruction for operating engineer apprentices. The course takes up reinforcing steel, codes, blueprints, stressing sheets, plan changes, report writing, people skills, job etiquette and protocol. Apprentices gain the knowledge, research skills, and confidence needed to pass their written and oral exams.
Hours: 54 Lecture. 54 Lab.

OENG 066

Soil Testing and Inspection

Units: 4

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course is designed to meet the needs of state-indentured apprentices with the State of California who are interested in the field of operating engineer inspection. Topics include industry safety, industry terminology, inspection testing procedures, blueprint reading, field interpretation, and successful completion of a certification class sponsored by the American Concrete Institute and Nuclear Safety Course.
Hours: 54 Lecture. 54 Lab.

OENG 067

Structural Steel/Bolting

Units: 4

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course provides the related and supplemental instruction for operating engineer apprentices. The course covers codes and duties, structural bolting inspection, report writing, and personal skills. Apprentices gain the knowledge, research skills, and confidence needed to pass their written and oral exams.
Hours: 54 Lecture. 54 Lab.

OENG 068

Non-Destructive Testing (NDT)

Units: 4

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course provides the related and supplemental instruction for operating engineer apprentices. The course covers ultrasonic, magnetic particle, and liquid penetrant testing codes and duties, welding procedures, report writing, people skills, and testing equipment orientation. Students gain the knowledge, research skills, and confidence needed to pass their written and oral exams as applicable to non-destructive testing requirements.
Hours: 54 Lecture. 54 Lab.

OENG 070

Fireproofing and Firestopping Inspection

Units: 4

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students have knowledge of elementary algebra concepts and be able to comprehend pre-collegiate texts.

This course provides the required related and supplemental instruction for operating engineer apprentices in fireproofing and firestopping inspection, testing codes and duties, application procedures, report writing, people skills, and testing equipment orientation. Members will gain the

knowledge, research skills, and confidence needed to pass their written and oral exams as applicable to the Fireproofing and Firestopping Testing requirements.
Hours: 54 Lecture. 54 Lab.

OENG 290

Work Experience Education in Operating Engineers Union Apprenticeship

Units: 1-4

Enrollment restricted to State Indentured Operating Engineers Trust Apprenticeship Program; It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course provides students the opportunity to work in the Operating Engineers apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the Operating Engineers Joint Apprenticeship Council (J.A.C.). Students complete work experience hours at approved training sites. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.
Hours: 3 Lecture. 54-216 Lab.

ORTHOPEDIC TECHNOLOGY

Division of Health Science and Nursing

ORTH 040

Introduction to Orthopedic Technology

Units: 4

Prerequisite: BIOL 125

This course will provide students with an introduction to the roles, professional responsibilities, code of ethics, and employment qualifications of an Orthopedic Technician. Instruction will also include the review of the musculoskeletal system as it relates to the field of orthopedic technology emphasizing loco-motor, neuro-muscular and peripheral vascular structures.
Hours: 72 Lecture.

ORTH 050

Orthopedic Technician Health Assessment

Units: 3

Prerequisite: ORTH 040

This course will provide the student with entry level abilities to function as an Orthopedic Technician. Students will receive instruction in the physical examination of the extremities, spine and pelvis. Instruction will include joint range of motion, specific muscle group testing and measuring the loco-motor system.
Hours: 45 Lecture. 27 Lab.

ORTH 060

Orthopedic Technician Modalities

Units: 4

Prerequisite: ORTH 050

This course will provide the student with entry level abilities to function as an Orthopedic Technician in the private practice, hospital and managed care facilities. Students will receive instruction in back office skills focusing on casting, splinting, application of soft goods, wound care management, client communication and surgical assisting in

major and minor orthopedic procedures. The student will learn operating room etiquette, gowning, gloving, sterile back table set up for categories 1, 2 and 3 orthopedic procedures. Instruction will include seminars, demonstrations and physical examinations, hands on casting and splinting applications, surgical gowning and gloving and assisting in major orthopedic procedures.
Hours: 36 Lecture. 108 Lab.

ORTH 070

Orthopedic Technician Practicum

Units: 4

Prerequisite: ORTH 060

This course will provide the student with entry level abilities to function as an Orthopedic Technician. Students will participate in clinical and hospital rotations consisting of instruction in back office skills to include casting, splinting, application of soft goods, wound care management, client communication and sterile technique. Operating room etiquette, gowning, gloving, sterile back table set up for category 3 major procedures.
Hours: 18 Lecture. 162 Lab.

POLICE ACADEMY

Division of Administration of Justice and Fire Technology

PAC 020

Physical Fitness

Units: 0.037-0.741

Advisory: PAC 040

This course is designed to keep peace officers informed of physical fitness techniques, current Federal and State laws and recent requirements which affect current law enforcement procedures. Physical Fitness for officer development presents new concepts in law enforcement procedures. The curriculum follows that recommended as refresher training by the California Commission on Peace Officer Standards and Training.
Hours: 2-40 Lab.

PAC 021

Firearms

Units: 0.037-0.741

Advisory: PAC 040

This course is designed to keep peace officers informed of new Firearms Techniques and equipment, current Federal and State laws and recent requirements which affect current law enforcement procedures. Firearms for Officer Development present new concepts in law enforcement procedures. The curriculum follows that recommended as refresher training by California Commission on Peace Officer Standards and Training.
Hours: 2-40 Lab.

PAC 022

First Aid/CPR

Units: 0.148-2.962

Advisory: PAC 040

This course is designed to keep peace officers informed of new first aid and CPR techniques, current Federal and State laws and recent requirements which affect current law enforcement procedures. First Aid/CPR for officer development presents new concepts in law enforcement procedures. The curriculum

follows that recommended as refresher training by the California Commission on Peace Officer Standards and Training.
Hours: 2-40 Lecture. 2-40 Lab.

PAC 023

Field Training Officer Course

Units: 0.148-2.962

Advisory: PAC 040

This course is designed to teach a Police Officer how to train new recruits. This course includes training principles, civil liability, ethics and integrity, performance goals, principles of instruction, and role model.
Hours: 2-40 Lecture. 2-40 Lab.

PAC 024

Weapons, Semi-Automatic Handguns

Units: 0.148-2.962

Advisory: PAC 040

This course is designed for personnel who are concerned with semiautomatic pistols as a police service side arm. Overall course will encompass Colt .45 semiautomatic, Smith and Wesson models M7P 9, M&P 9L, M&P 40L and M&P 45, Glock Models: 17, 21, 22, 34, and 35, Springfield Armory XD, or XDM, Beretta Models 92F and FS, Browning Hi-Power 9 millimeters, plus other uniform and off-duty semiautomatic pistols.
Hours: 2-40 Lecture. 2-40 Lab.

PAC 025

PC 832 Arrest

Units: 0.148-2.962

Advisory: PAC 040

This course is designed to provide the student, employed or seeking employment in public agencies, with the skills and information necessary to satisfy the state requirements for the PC 832 Arrest course which covers the California justice system, professional behavior, law, evidence and discretionary decision making. This course can be taken alone or in combination with PAC 026, PC 832 Firearms and/or PAC 027, PC 832 Communications and Arrest Methods to satisfy varying agency requirements.
Hours: 2-40 Lecture. 2-40 Lab.

PAC 026

PC 832 Firearms

Units: 0.148-2.962

Prerequisite: PAC 025 Pursuant to Section 13511.5 of the California Penal Code, each student who is not sponsored by a local or other law enforcement agency, must submit written certification from the California Department of Justice certifying no criminal history background which would disqualify the student pursuant to Section 12021.1 P.C. This course is designed to provide the student employed or seeking employment in public agencies with the skills and information necessary to satisfy state requirements for the PC 832 Firearms course which covers firearms safety, care, cleaning, shooting and qualification. This course can be taken alone or in combination with PAC 025, PC 832 Arrest and/or PAC 027, PC 832 Communications/Arrest to satisfy varying agency requirements. The curriculum follows that recommended as refresher training by the California Commission on Peace Officer Standards and Training.
Hours: 2-40 Lecture. 2-40 Lab.

PAC 027

PC 832 Communications and Arrest Methods**Units:** 0.148-2.96**Advisory:** PAC 025

This course is designed to provide the student employed or seeking employment in public agencies and currently have a working knowledge of the law enforcement functions with the skills and information necessary to satisfy state requirements for the PC 832 Communications and Arrest Techniques course which covers community relations, communications, report writing, arrest control and personal searches. This course can be taken alone or in combination with PAC 025, PC 832 Arrest and/or PAC 026, PC 832 Firearms to satisfy varying agency requirements. The curriculum follows that recommended as refresher training by the California Commission on Peace Officer Standards and Training.

Hours: 2-40 Lecture. 2-40 Lab.**PAC 031****School Security Guard Training****Units:** 2

The course is designed to meet California State requirements for security guards in K-12 school districts or California Community College districts. According to California law, school security guards must complete a course of training developed by the Bureau of Security and Investigative Services (BSIS) in consultation with the California Commission on Peace Officer Standards and Training (POST) and in accordance with California's Business and Professions Code (section 7583.45) and Education Code (sections 38001.5 and 72330.5).

Hours: 36 Lecture.**PAC 040****Basic Police Recruit Class****Units:** 46

Enrollment requires medical clearance, California Department of Justice clearance for firearms training, passing scores on POST written and physical tests (agency sponsored cadets are exempt). It is advised that students be able to engage in written composition at a college level and read college-level texts.

This is a fundamental course that covers criminal law, evidence, procedure and investigation, firearms, first aid, defense tactics, use of chemical agents, and other police-related subjects. This course meets the educational requirements for basic certification by the Commission on Peace Officer Standards and Training (POST).

Hours: 774 Lecture. 162 Lab.**PAC 042****Police Supervision****Units:** 4.5**Advisory:** PAC 040 or PAC 075B, PAC 075C, PAC 075D

This course explains and applies the elements of supervision as they apply to law enforcement personnel. Methods of effective leadership, motivation, communication, and training techniques are presented. This course is certified by the California Commission on Peace Officer Standards and Training (POST).

Hours: 81 Lecture.**PAC 043****Advanced Officers Course****Units:** 0.148-2.962**Advisory:** PAC 040 or PAC 075B, PAC 075C and PAC 075D

This course is designed for upgrading currently employed law enforcement personnel. The curriculum follows that recommended by the Commission of Peace Officer Standards and Training. The course is designed to keep peace officers informed of new laws, recent court decisions, current enforcement procedures, new concepts in law enforcement, technology, community relations and other refresher training as may be necessary.

Hours: 2-40 Lecture. 2-40 Lab.**PAC 071****Public Safety Dispatcher Basic Course****Units:** 6**Advisory:** PAC 040

This course takes up a variety of topics as they relate to a career as a public safety dispatcher, including professional orientation, criminal justice system, law, communication technology, telephone procedures, radio procedures, missing persons, domestic violence, referral services, cultural diversity, sexual harassment, hate crimes, gang awareness, stress management, critical incidents, telecommunications, and practical application activities. The course meets the California Commission on Peace Officer Standards Training (POST) requirements for the position of public safety dispatcher.

Hours: 102 Lecture. 18 Lab.**PAC 075B****Basic Course-Module III (Ext)****Units:** 7

Enrollment requires medical clearance, California Department of Justice clearance for firearms training, passing scores on POST written and physical tests (agency sponsored cadets are exempt). It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course is designed for those interested in becoming a Level III Reserve officer. This course covers criminal law, evidence, investigations, firearms, arrest and control, vehicle operations, report writing, first aid/CPR, cultural diversity, and other related police topics. It is the level of training which satisfies the legal requirements for a Level III Reserve officer.

Hours: 99 Lecture. 81 Lab.**PAC 075C****Basic Course-Module II (Ext)****Units:** 8.5

Enrollment requires medical clearance, California Department of Justice clearance for firearms training, passing scores on POST written and physical tests (agency sponsored cadets exempt).

Prerequisite: PAC 075B

This course is designed for those interested in becoming a Level II Reserve officer. This course covers criminal law, evidence, investigations, firearms, arrest and control, community relations, report writing, cultural diversity, and other related police topics. It is training which satisfies the legal requirements for a Level II Reserve officer and can be used

as a Prerequisite for the PAC 075D Module I Course.

Hours: 117 Lecture. 108 Lab.**PAC 075D****Basic Course - Module I (Ext)****Units:** 21.5

Enrollment requires medical clearance, California Department of Justice clearance for firearms training, passing scores on POST written and physical tests (agency sponsored cadets exempt).

Prerequisite: PAC 075B, PAC 075C

This course is designed for those interested in becoming a Level I Reserve officer or a regular peace officer. This course covers criminal law, evidence, investigations, firearms, arrest and control, emergency vehicle operation, and other related police topics. It is the final level of training which constitutes satisfaction of the Regular Basic Course training requirement and the legal requirements for a Level I Reserve officer and a regular police officer in accordance with Commission on Peace Officer Standards and Training requirements.

Hours: 297 Lecture. 270 Lab.**PAC 075E****Basic Academy Intensive Modular III****Units:** 7

Enrollment requires medical Clearance, California Department of Justice clearance for firearms training, passing scores on POST written and physical tests (agency sponsored cadets are exempt) - It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course is designed for those interested in becoming a Level III Reserve officer. This course covers criminal law, evidence, investigations, firearms, arrest and control, vehicle operations, report writing, first aid/CPR, cultural diversity, and other related police topics. It is the level of training which satisfies the legal requirements for a Level III Reserve officer.

Hours: 99 Lecture. 81 Lab.**PAC 075F****Basic Academy Intensive Modular II****Units:** 8.5

Enrollment requires medical Clearance, California Department of Justice clearance for firearms training, passing scores on POST written and physical tests (agency sponsored cadets are exempt)

Prerequisite: PAC 075E

This course is designed for those interested in becoming a Level II Reserve officer. This course covers criminal law, evidence, investigations, firearms, arrest and control, vehicle operations, report writing, first aid/CPR, cultural diversity, and other related police topics. It is the level of training which satisfies the legal requirements for a Level II Reserve officer.

Hours: 117 Lecture. 108 Lab.**PAC 075G****Basic Academy Intensive Modular I****Units:** 21.5

Enrollment requires medical clearance, California Department of Justice clearance for firearms training, Passing scores on POST written and physical tests (agency

sponsored cadets are exempt).

Prerequisite: PAC 075F

This course is designed for those interested in becoming a Post Certified Police Officer. This course covers criminal law, evidence, investigations, firearms, arrest and control, vehicle operations, report writing, first aid/CPR, cultural diversity, and other related police topics. It is the level of training which satisfies the legal requirements for a Post Certified Police Officer.

Hours: 297 Lecture. 270 Lab.

PAC 078

Requalification - Basic Course

Units: 6

Prerequisite: PAC 040 or successful completion of a California POST Basic Police Academy and a California Department of Justice clearance for firearms training. This course is for students who have completed basic police recruit academy training but have not been active in the law enforcement field for at least three years. The course provides a review of the skills and knowledge needed to return to active law enforcement duty. The topics covered include human relations, legal changes and a review of current legal issues, conducting a preliminary investigation, field tactics, the use of force and weaponry, and racial profiling. Hours: 90 Lecture. 54 Lab.

PAC 083

Pre-Academy Physical Fitness

Units: 0.148-2.962

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course is designed to help prospective police cadets improve their physical performance and keep informed of physical fitness techniques prior to entering the Rio Hondo Police Academy. The curriculum is geared toward and utilized by the California Commission on Peace Officer Standards and Training.

Hours: 2-40 Lecture. 2-40 Lab.

PHILOSOPHY

Division of Behavioral and Social Sciences

PHIL 101 (C-ID: PHIL 100)

Introduction to Philosophy

Units: 3

It is advised that students be able to read college-level texts.

Advisory: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: PHIL 101 or PHIL 101H This course introduces philosophical ideas and methods concerning knowledge, reality, and values. Expected topics include the sources and limits of knowledge and the nature of reality. Other topics that may be examined from a philosophical perspective include the nature of the self, truth, ethics, religion, science, language, beauty and art, political theory, and mind. This course is appropriate for students seeking a broader program of philosophical study or to fulfill a

General Education Humanities or philosophy major requirement.

Hours: 54 Lecture.

PHIL 101H (C-ID: PHIL 100)

Introduction to Philosophy Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: PHIL 101 or PHIL 101H This course introduces philosophical ideas and methods concerning knowledge, reality, and values. Expected topics include the sources and limits of knowledge and the nature of reality. Other topics that may be examined from a philosophical perspective include the nature of the self, truth, ethics, religion, science, language, beauty and art, political theory, and mind. This course is appropriate for students seeking a broader program of philosophical study or to fulfill a General Education Humanities or philosophy major requirement, and is intended for students who meet Honors Program requirements.

Hours: 54 Lecture.

PHIL 102

Introduction to Philosophy: Global Perspectives

Units: 3

It is advised that students be able to read college-level texts.

Advisory: ENGL 101

Transfers to: UC/CSU

This course introduces philosophical ideas and methods concerning knowledge, reality, and values while centering voices and traditions from Asia, the Americas, and the African diaspora. Topics may include the sources and limits of knowledge and the nature of reality. Other topics that may be examined from a philosophical perspective include the nature of the self, truth, ethics, political theory, and ways of life. This course is appropriate for students seeking a broader program of philosophical study, or to fulfill a General Education Humanities or Philosophy major requirements.

Hours: 54 Lecture.

PHIL 110

Critical Thinking

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: PHIL 110 or PHIL 110H This course is an introduction to the methods and techniques of informal reasoning. Topics include schematizing and articulating arguments, causal arguments, analogical arguments, testimony arguments, and informal fallacies. Emphasis on the application of critical thinking for effective writing is reflected in the frequency, scope, and nature of course writing assignments, which are evaluated with regard to both content and form. Students should expect to write approximately 8,000 words in various writing assignments. This course is

appropriate for students seeking to improve their writing and reasoning skills.

Hours: 54 Lecture.

PHIL 110H

Critical Thinking Honors

Units: 3

Prerequisite: ENGL 101

Advisory: It is advised that students be able to read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: PHIL 110 or PHIL 110H This course is an introduction to the methods and techniques of informal reasoning. Topics include schematizing and articulating arguments, causal arguments, analogical arguments, testimony arguments, and informal fallacies. Emphasis on the application of critical thinking for effective writing is reflected in the frequency, scope, and nature of course writing assignments, which are evaluated with regard to both content and form. Students should expect to write approximately 8,000 words in various writing assignments. This course is appropriate for students seeking to improve their writing and reasoning skills, and is intended for students who meet Honors Program requirements.

Hours: 54 Lecture.

PHIL 112 (C-ID: PHIL 110)

Introduction to Logic

Units: 3

It is advised that students have a knowledge of elementary algebra concepts, be able to engage in written composition at a college level, and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: PHIL 112 or PHIL 112H This course introduces the formal methods and principles of deductive logic. Topics include translation between natural and formal language, syllogistic logic, and propositional logic. This course is especially recommended for students in mathematics, business, computer science, science, engineering, law, and humanities majors.

Hours: 54 Lecture.

PHIL 112H (C-ID: PHIL 110)

Introduction to Logic Honors

Units: 3

It is advised that students have a knowledge of elementary algebra concepts and be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: PHIL 112 or PHIL 112H This course introduces the formal methods and principles of deductive logic. Topics include translation between natural and formal language, syllogistic logic, and propositional logic. This course is especially recommended for students in mathematics, business, computer science, science, engineering, law, and humanities majors and is intended for students who meet Honors Program requirements.

Hours: 54 Lecture.

PHIL 115 (C-ID: PHIL 210)

Symbolic Logic

Units: 3

Advisory: PHIL 101 or PHIL 101H, PHIL 112 or PHIL 112H

Transfers to: UC/CSU

This course is intended for students interested in symbolic methods of deductive reasoning, including philosophy and mathematics majors. Students in the course develop an understanding of both sentential logic and predicate logic. Students also learn to translate ordinary language sentences and arguments into symbolic form, and evaluate symbolized arguments for validity using truth-tables and natural deduction techniques.

Hours: 54 Lecture.

PHIL 120 (C-ID: PHIL 120)

Introduction to Ethics

Units: 3

It is advised that students be able to read college-level texts.

Advisory: ENGL 101

Transfers to: UC/CSU

This introductory level course is for students interested in the humanities, law, medicine, politics, social science and related fields, and will expose them to some of the most profound moral and ethical questions in the Western philosophical tradition. We will examine the concept of morality and values, representative ethical theories, and may include their applications to moral problems.

Hours: 54 Lecture.

PHIL 122

Philosophical Perspectives on Death & Dying

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course introduces students to a broad array of themes associated with death and dying. Students consider both practical and philosophical aspects of death, comparing the concept of death historically, socially, psychologically, and cross-culturally. Current legal, medical, and ethical issues related to death and dying are explored through the lens of philosophy, with topics that may include suicide, euthanasia, moral and social issues stemming from modern medical technology, hospice and palliative care, end-of-life issues, violent deaths, mass killings, and the beliefs and customs of various cultures worldwide concerning death and the possibility of an afterlife. This course is well suited for students interested in the humanities, law, medicine, politics, social science and related fields, or for those seeking to improve their ability to process and respond to death and dying in a healthy manner.

Hours: 54 Lecture.

PHIL 124 (C-ID: PHIL 130)

History of Philosophy: Ancient

Units: 3

It is advised that students be able to read college-level texts.

Advisory: ENGL 101

Transfers to: UC/CSU

This introductory-level course is for students interested specifically in the earliest stages of ancient Western philosophy. The development of Greek philosophy from the

Pre-Socratics through Aristotle is addressed, and Hellenistic, Roman, medieval or non-Western thinkers may be considered. Beyond a study of the figures and key ideas, the early view of philosophy as a "way of life" is considered, as is how these movements were intended to transform the lives of those who followed them.

Hours: 54 Lecture.

PHIL 126 (C-ID: PHIL 140)

History of Philosophy: Modern

Units: 3

It is advised that students be able to read college-level texts.

Advisory: ENGL 101

Transfers to: UC/CSU

This introductory-level course is intended for all students interested in the modern period of Western philosophy (i.e., the 1500s through 1700s). Broad epistemological and metaphysical developments through close analysis of primary texts is emphasized. Philosophers studied include Descartes and other rationalists, Hume and other empiricists, and Kant.

Hours: 54 Lecture.

PHIL 128 (C-ID: POLS 120)

Introduction to Political Philosophy

Same as: POLS 128, POLS 128, POLS 128

Units: 3

It is advised that students be able to read college-level texts.

Advisory: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: PHIL 128 or PHIL 128H

This course is for students interested in the relationship between political systems and philosophy, and is especially relevant for students interested in political science, philosophy, and law. The course introduces the history and development of political thought, and considers the justification of the state, interpretations of justice, systems of government, conceptions of rights and distributions of goods, and justification for civil disobedience, among other topics.

Hours: 54 Lecture.

PHIL 128H (C-ID: POLS 120)

Introduction to Political Philosophy

Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: PHIL 128 or PHIL 128H

This course is for students interested in the relationship between political systems and philosophy, and is especially relevant for students interested in political science, philosophy, and law. The course introduces the history and development of political thought, and considers the justification of the state, interpretations of justice, systems of government, conceptions of rights and distributions of goods, and justification for civil disobedience, among other topics. This course is designed for students who meet Honors Program requirements.

Hours: 54 Lecture.

PHIL 135

Philosophy of Social Justice

Units: 3

It is advised that students be able to read college-level texts.

Advisory: ENGL 101

Transfers to: UC/CSU

This introductory course explores the philosophical aspects of a variety of contemporary issues, with an emphasis on the theoretical foundations as well as practical applications of social justice. The course is intended for students interested in applying philosophical methods to contemporary topics in social justice, enrolled in the Pathway to Law program (i.e., pre-law students), and/or majoring in philosophy, political science, or social justice.

Hours: 54 Lecture.

PHIL 140

Philosophy of Religion

Units: 3

It is advised that students be able to read college-level texts.

Advisory: ENGL 101

Transfers to: UC/CSU

This introductory-level course is intended for students who seek a thoughtful exploration of religious issues in a non-sectarian context, or as part of a broader program of philosophical study. Topics include Western religion from a philosophical perspective, including arguments for and against the existence of God, and an investigation into the status of religious beliefs. Additional topics may include a consideration of the evolution-creationism debate and a discussion of religious pluralism.

Hours: 54 Lecture.

PHIL 299

Directed Study: Philosophy

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an Independent Study/Directed Study course, students must possess a 2.5 overall grade point average or a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies are the same as those for other courses. Units are awarded in accordance to Title 5 regulations, with one unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college wide.

Hours: 54-162 Lab.

PHIL 325

Applied and Professional Ethics

Units: 3

Prerequisite: ENGL 201 or ENGL 201H, PHIL 101 or PHIL 101 or PHIL 101 or PHIL 101 or PHIL 101H or PHIL 101H or PHIL 101H or PHIL 110 or PHIL 110 or PHIL 110H or PHIL 120

Transfers to: CSU

This upper division general education course is designed for students pursuing a Bachelor of Science in Automotive Technology. This course is intended for students who seek a greater understanding of the relationship between ethics and human living. This course will expose them to the moral and ethical views in the Western philosophical tradition. Students will then apply these views to various contemporary issues. Expected topics include: business ethics, euthanasia, terrorism, public policy, the death penalty, and issues in science and technology.

Hours: 54 Lecture.

PHOTOGRAPHY

Division of Arts, Business, & Cultural Programs

PHTO 110

Introduction to Digital Photography

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This introductory course covers the processes, principles, and tools of digital photography. Topics include the development of technical and aesthetic skills, elements of design and composition, camera technology, materials and equipment, and contemporary trends in photography. Students are required to supply their own mirrorless or digital single-lens reflex (D.S.L.R.) cameras. The course is suitable for students pursuing an Associate of Arts in Photography as well as non-majors who have an interest in learning basic digital photography skills.

Hours: 36 Lecture. 72 Lab.

PHTO 111

Intermediate Digital Photography

Units: 3

Prerequisite: PHTO 110

Transfers to: UC/CSU

This course is designed for students who have successfully completed PHTO 110, and have a working knowledge of basic camera control and photographic composition. It will cover use of digital cameras, metadata, workflow organization, global and local image editing and manipulation, color theory, and basic lighting techniques using flash and strobe. Emphasis will be placed on using photography as a means of communication and personal expression. Students are required to supply their own DSLR or mirrorless cameras capable of shooting in RAW file format.

Hours: 36 Lecture. 72 Lab.

PHTO 130

Beginning Photography

Units: 3

Advisory: ART 120

Transfers to: UC/CSU

This course is designed for students who want to study the basic technical and conceptual approaches to contemporary photography. Traditional black-and-white photography techniques are explored, with special emphasis on the basic use of the 35 mm camera and enlarger, as well as the processing of black-and-white film and printing paper. Students are required to provide their own 35 mm camera with manual controls.

Hours: 36 Lecture. 72 Lab.

PHTO 131

Intermediate Photography

Units: 3

Prerequisite: PHTO 130

Transfers to: UC/CSU

This course is designed for students who have successfully completed Beginning Photography and want to study more advanced technical and conceptual approaches to contemporary black and white photography in a 35 mm film-based, wet lab environment. Techniques such as the use of studio lighting, light meters, toners, hand coloring, and solarization are explored, with special emphasis given to understanding the conceptual framework for the production and analysis of both personal and commercial photographic imagery. Students are required to provide their own 35 mm camera with manual controls.

Hours: 36 Lecture. 72 Lab.

PHTO 140

Introduction to Lighting

Units: 3

Advisory: PHTO 110 or TV 135

Transfers to: UC/CSU

In this course students use cameras to explore the creative use of light, and to produce works that apply to basic lighting principles with natural, continuous, or strobe light sources. Topics include an introduction to lighting vocabulary, design, and exposure control, and light modifiers are covered through concept-driven assignments. Relevant examples of lighting from historic and contemporary photography as well as the cinematic arts are presented throughout. This course is intended for all students working with camera-based media whose work requires the use of light to convey meaning, define a subject, or tell a story.

Hours: 36 Lecture. 72 Lab.

PHTO 200

Art of Video for Photographers

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course provides photography students with basic technical and conceptual skills to create video content using the same DSLR or mirrorless digital cameras used for still photographic work. Introduction to basic procedures for conceptualization, video capture, sound recording, lighting, editing, and delivery techniques for video projects are covered. Students explore different project types used by photographers and artists working individually, which include narrative, non-narrative, experimental, and

short-form videos that support still photography projects.

Hours: 36 Lecture. 72 Lab.

PHTO 230

Medium and Large Format Photography

Units: 3

Prerequisite: PHTO 110, PHTO 130

Transfers to: UC/CSU

This course is for students who have completed beginning analog and digital photography courses successfully and seek to study more advanced technical and conceptual approaches to photography using medium and large format cameras. The course is designed as a hybrid course that combines analog and digital techniques into one workflow. Special emphasis is given to the understanding and analysis of photographic imagery and portfolio development.

Hours: 36 Lecture. 72 Lab.

PHTO 299

Directed Study: Photography

Units: 1-3

Prerequisite: PHTO 110, PHTO 130

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations, with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take Directed Study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

PHYSICS

Division of Mathematics, Sciences, and Engineering

PHY 120

Physics for Everyday Use

Units: 4

Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of an elementary algebra course. It is advised that students be able to engage in written composition

at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.
Students will receive no credit for PHY 120 if taken after PHY 150 or PHY 211.
This course investigates the basic characteristics of matter and the interactions that govern its behavior, and emphasizes how remarkable everyday phenomena are from this perspective. Examples from popular culture (e.g., movies, TV, and sports) are utilized. Topics include how to describe an object's motion, how to explain changes in an object's motion, and the roles of work and energy, among other topics. The course is intended for non-science majors, stresses conceptual understanding, and presents students with an opportunity to see how our world works according to physics.
Hours: 54 Lecture. 54 Lab.

PHY 150 (C-ID: PHYS 100S, PHYS 105)

General Physics I

Units: 4

Prerequisite: MATH 175

Transfers to: UC/CSU - UC credit limit.
Students will receive credit for one physics series: PHY 150 and PHY 160 or PHY 211, PHY 212, and PHY 213

This course is the first of a two-semester, trigonometry-based physics sequence and is designed for students transferring to a four-year institution and planning careers in health professional fields such as medicine, dentistry, veterinary science, pharmacy, and optometry as well as those students in engineering technology and architecture. Topics include kinematics, dynamics, energy, work, momentum, conservation principles, rotational motion, simple harmonic motion, fluids, and thermodynamics. Students majoring in the biological sciences should consult a counselor as to whether this course satisfies the general preparation requirements for their major at their intended transfer university.

Hours: 54 Lecture. 54 Lab.

PHY 160 (C-ID: PHYS 100S, PHYS 110)

General Physics II

Units: 4

Prerequisite: PHY 150

Transfers to: UC/CSU - UC credit limit.
Students will receive credit for one physics series: PHY 150 and PHY 160 or PHY 211, PHY 212, and PHY 213.

This course is the second of a two-semester, trigonometry-based physics sequence and is designed for students transferring to a four-year institution with majors in health professional fields such as medicine, dentistry, veterinary science, pharmacy, and optometry as well as those students in engineering technology and architecture. Topics include electricity and magnetism, oscillations, waves, optics, and modern physics. Students majoring in the biological sciences should consult a counselor as to whether this course satisfies the general preparation requirements for their major at their intended transfer university.

Hours: 54 Lecture. 54 Lab.

PHY 211 (C-ID: PHYS 200S, PHYS 205)

Physics for Scientists & Engineers - I

Units: 4

Prerequisite: MATH 190 or MATH 190H

Transfers to: UC/CSU - UC credit limit.
Students will receive credit for one physics series: PHY 150 and PHY 160 or PHY 211, PHY 212, and PHY 213.

This course is the first of a three-semester sequence designed for students transferring to four-year institutions with majors in the sciences and engineering. Topics covered include kinematics, dynamics, energy, work, momentum, and conservation principles.
Hours: 54 Lecture. 54 Lab.

PHY 212 (C-ID: PHYS 200S, PHYS 215)

Physics for Scientists & Engineers - II

Units: 4

Prerequisite: PHY 211 and MATH 191

Transfers to: UC/CSU - UC credit limit.
Students will receive credit for one physics series: PHY 150 and PHY 160 or PHY 211, PHY 212, and PHY 213.

This course is the second of a three-semester sequence designed for students transferring to four-year institutions with majors in the sciences and engineering. Topics covered include kinematics, dynamics, energy, work, momentum, and conservation principles.
Hours: 54 Lecture. 54 Lab.

PHY 213 (C-ID: PHYS 200S, PHYS 210)

Physics for Scientists & Engineers - III

Units: 4

Prerequisite: PHY 211 and MATH 191

Advisory: MATH 250

Transfers to: UC/CSU - UC credit limit.
Students will receive credit for one physics series: PHY 150 and PHY 160 or PHY 211, PHY 212, and PHY 213.

This course is the first of a three-semester sequence designed for students transferring to four-year institutions with majors in the sciences and engineering. Topics covered include electric fields, electric potential, current, circuits, magnetic fields, Gauss' law, Ampere's law, Maxwell's equations, induction, and electromagnetic waves.
Hours: 54 Lecture. 54 Lab.

PHY 220

Unmanned Rocket Science

Units: 3

Prerequisite: PHY 211

Transfers to: UC/CSU

This course introduces students to the creation and implementation of payloads and unmanned flight vehicles. The payloads and unmanned vehicles such as rockets, balloons and unmanned aerial vehicles (drones) collect inflight atmospheric data that are later analyzed and presented.

Hours: 36 Lecture. 54 Lab.

PHY 299A

Directed Study: General Studies

Units: 1-3

Advisory: PHY 211 or PHY 211 or PHY 212 or PHY 213

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be

developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance with Title 5 regulations with 1 unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college-wide.
Hours: 54-162 Lab.

PHY 299B

Directed Study: Biophysics and Biophysics Research I

Units: 1-3

Advisory: PHY 211, PHY 212 and PHY 213

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance with Title 5 regulations with 1 unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college-wide.
Hours: 54-162 Lab.

PHY 299C

Directed Study: Biophysics and Biophysics Research II

Units: 1-3

Advisory: PHY 211, PHY 212 and PHY 213

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be

developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress is evaluated at regular intervals. Academic standards for Independent Studies/ Directed Studies shall be the same as those for other courses. Units are awarded in accordance with Title 5 regulations with 1 unit of credit awarded for 54 hours of Directed Studies, 6 hours of which must be with an instructor. The instructor is responsible for monitoring student progress throughout the semester. Students may take directed study courses for a maximum of 3 units within a discipline, and may not accumulate more than a total of 9 units college-wide. Hours: 54-162 Lab.

POLITICAL SCIENCE

Division of Behavioral and Social Sciences

POLS 110 (C-ID: POLS 110)

Government of the United States

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: POLS 110 or POLS 110H. This course surveys and analyzes the origins, principles, institutions, policies, and politics of U.S. National and California State Governments, including their constitutions. Emphasis is placed on the rights and responsibilities of citizens, and an understanding of the political processes and issues involved in the workings of government. This course fulfills the American Institutions requirement for the Associate Degree. It also is suitable for students wishing to expand their knowledge of local, state and national governments. Hours: 54 Lecture.

POLS 110H (C-ID: POLS 110)

Government of the United States Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: POLS 110 or POLS 110H. This course surveys and analyzes the origins, principles, institutions, policies, and politics of U.S. National and California State Governments, including their constitutions. Emphasis is placed on the rights and responsibilities of citizens, and an understanding of the political processes and issues involved in the workings of government. This course fulfills the American Institutions requirement for the Associate Degree. It also is suitable for students wishing to expand their knowledge of local, state and national governments. This course is intended for students eligible for the Honors Program. Hours: 54 Lecture.

POLS 115

Women in U.S. Politics

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course examines the status and role of women in American politics and their participation in the electoral process as voters, activists, candidates, and elected officeholders. Topics of discussion include theoretical frameworks and approaches to studying women in American politics; the intersection of gender, race, and ethnicity in U.S. politics; the gender gap in elections and public opinion; gender stereotypes in American elections; women's underrepresentation in U.S. politics; and women in political institutions. Hours: 54 Lecture.

POLS 120

California State and Local Governments

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course stresses the study of California state and local government (counties, cities, and special districts) and California party politics, including the study of the California constitution, intergovernmental relations, regional governments, and urban politics and problems. This course is designed to make available to students the concepts, information, and skills which will enable them to better understand the political and governmental systems in which Californians function. Hours: 54 Lecture.

POLS 125

Law and Democracy

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course provides an examination and analysis of practical law as it affects people in daily life as citizens in a democracy. It assists in the development of skills to successfully navigate legal systems and in understanding democratic political values. Emphasis is placed on constitutional rights and civil liberties, police encounters and criminal law, local government and advocacy, small claims and traffic courts, landlord/tenant relations, family law, consumer rights, contracts, employment and immigration. Further emphasis is placed on application, critical thinking and problem solving in common legal situations. This course is designed for any student wishing to learn more about the law and its interaction with democratic government and those students wishing to attend law school. It is also a requirement for any student seeking to participate in the Community College Pathway to Law School Initiative. Hours: 54 Lecture.

POLS 128 (C-ID: POLS 120)

Introduction to Political Philosophy

Same as: PHIL 128

Units: 3

It is advised that students be able to read college-level texts.

Advisory: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: POLS 128 or POLS 128H. This course is for students interested in the relationship between political systems and philosophy, and is especially relevant for students interested in political science, philosophy, and law. The course introduces the history and development of political thought, and considers the justification of the state, interpretations of justice, systems of government, conceptions of rights and distributions of goods, and justification for civil disobedience, among other topics. Hours: 54 Lecture.

POLS 128H (C-ID: POLS 120)

Introduction to Political Philosophy

Honors

Same as: PHIL 128H

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: POLS 128 or POLS 128H. This course is for students interested in the relationship between political systems and philosophy, and is especially relevant for students interested in political science, philosophy, and law. The course introduces the history and development of political thought, and considers the justification of the state, interpretations of justice, systems of government, conceptions of rights and distributions of goods, and justification for civil disobedience, among other topics. This course is designed for students who meet Honors Program requirements. Hours: 54 Lecture.

POLS 130 (C-ID: POLS 130)

Comparative Government

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course examines the political systems of selected industrial democracies, dictatorships, and governments of the developing world. Emphasis is placed on the institutional development and political processes and cultures within these countries. The course features an examination of current political problems and a comparison of such differing ideologies as Marxism, democracy, theocracy, and totalitarianism, and is intended for students interested in the study of foreign governments as well as those who want to major in political science. Hours: 54 Lecture.

POLS 135

International Political Economy

Same as: ECON 135

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This is an introductory course designed for students interested in economics and political science, as well as anyone interested in the global interconnectedness of the world economy. The course focuses on the relations between the political and economic systems within the global economy. The course covers the impact of political decisions on world economies and international organizations. Further emphasis is placed on a comparison-contrast of various national economies. Geographic areas of concern include Africa, Europe, the Pacific Rim, the Middle East, Latin America, Russia, China, and the United States. The course is cross-listed as Economics 135 and Political Science 135. Credit is given in either area, not both.
Hours: 54 Lecture.

POLS 140 (C-ID: POLS 140)

International Relations

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course examines the structure and operation of the international system. Emphasis is placed on the nature and sources of conflict and cooperation, issues of war and peace among states in the international system, and international economic development. The impact of nation-states, international organizations, and non-governmental actors are all examined. This course is suitable for students who wish to expand their knowledge of international politics and for those who wish to major in political science or international relations.
Hours: 54 Lecture.

POLS 150

Latinx Politics

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course examines the history and contemporary role of Latinx people in the U.S. political system. Much of the course will explore the migration and political activism of the largest Latinx-origin groups: Mexican, Puerto Rican, Cuban, Salvadorean, Dominican, and Guatemalan. The course begins with a review of U.S. demographics and discussion about "Latino" and "Hispanic" as meaningful political terms. Students also learn about the political institutional context in the U.S.; examine the political relationships between Latinx and non-Latinx groups as they relate to political parties, voting coalitions, representation and public policy; and learn how to analyze data on Latinx public opinion, voting behavior, and political attitudes.
Hours: 54 Lecture.

POLS 299

Directed Study: Political Science

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course,

students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.
Hours: 54-162 Lab.

PSYCHOLOGY

Division of Behavioral and Social Sciences

PSY 101 (C-ID: PSY 110)

Introductory Psychology

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit. Students

will receive credit for only one of the following courses: PSY 101 or PSY 101H. This course is designed as a general introduction to psychology for psychology majors, those with an interest in psychology, or anyone with a desire to further their understanding of human behavior. It provides an overview of the field of psychology, introducing students to the research methods used to advance the science of psychology and the various areas that comprise this diverse discipline. Research and theories are presented, discussed, and evaluated. Topics covered include biological psychology, sensation and perception, lifespan development, learning, memory, motivation and emotion, cognition, personality, psychopathology and social psychology.
Hours: 54 Lecture.

PSY 101H (C-ID: PSY 110)

Introductory Psychology Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: PSY 101 or PSY 101H. This course is designed as a general introduction to psychology for psychology majors, those with an interest in psychology, or anyone with a desire to further their understanding of human behavior. It provides an overview of the field of psychology, introducing students to the research methods

used to advance the science of psychology and the various areas that comprise this diverse discipline. Research and theories are presented, discussed, and evaluated. Topics covered include biological psychology, sensation and perception, lifespan development, learning, memory, motivation and emotion, cognition, personality, psychopathology, and social psychology. This course is intended for those who meet Honors Program requirements.
Hours: 54 Lecture.

PSY 112 (C-ID: PSY 180)

Lifespan Development

Units: 3

It is advised that students be able to engage in written composition at the college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: PSY 112 or CD 106. This course provides an overview of human psychological development across the lifespan. The course addresses the physical, cognitive, social, and emotional changes that occur from the prenatal period through death; explores the development issues of stability versus change, continuity versus discontinuity, and nature versus nurture; examines the perspectives of major developmental theorists, including Freud, Erickson, and Piaget; and considers current research findings and their applicability to ongoing developmental problems. This course is appropriate for students who want to develop a better understanding of the developmental gains and losses that occur throughout our lives.
Hours: 54 Lecture.

PSY 114 (C-ID: PSY 120)

Introduction to Abnormal Psychology

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course provides an introduction to the study of abnormal behavior for psychology majors, those with an interest in mental illness, or anyone with a desire to further their understanding of how psychological "abnormalities" are defined, studied, and treated. The classification, assessment and treatment of psychological disorders will be explored. Students will not only develop an understanding of the etiology and diagnosis of such disorders, as based upon the criteria provided in the most current version of the Diagnostic and Statistical Manual of Mental Disorders ("DSM"), but develop an appreciation of the cultural, historical and theoretical influences that affect the definitions and treatment of abnormal behavior.
Hours: 54 Lecture.

PSY 121 (C-ID: ADS 110X)

Drugs, Society, and Behavior

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is for the student who seeks a basic understanding of the effects of drugs of

abuse and an in-depth consideration of the societal aspects of psychoactive drugs. It is designed for those students interested in furthering their understanding of psychoactive drugs and those interested in working with populations recovering from or at risk for drug problems. Current and historical uses of and attitudes towards drugs will be addressed, as well as drug use disorders, drug legislation, and treatment options. Societal and cultural differences will also be noted.
Hours: 54 Lecture.

PSY 127 (C-ID: ADS 140X)
Introduction to the Physiological Effects of Drugs of Abuse
Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU
This course is designed for students interested in furthering their understanding of psychoactive drugs, and those interested in working with populations recovering from or at risk for drug problems. The course examines the pharmacological actions of drugs of abuse as they relate to the physiological and behavioral effects of such drugs, and emphasizes the properties of drugs that increase the likelihood of developing substance use disorders.
Hours: 54 Lecture.

PSY 180
Positive Psychology
Units: 3
It is advised that students be able to engage in written composition at a college level and read college-level texts.
Transfers to: UC/CSU

This course focuses on the research, theories, and ideas surrounding, promoting, and maintaining well-being, good health, and happiness. Students explore topics in the field of positive psychology including but not limited to wellness, optimism, flow, happiness, and positive thinking. The course is beneficial for students majoring in psychology, or looking to transfer as a psychology major.
Hours: 54 Lecture.

PSY 190 (C-ID: MATH 110, SOCI 125)
Statistics for the Behavioral Sciences
Units: 4
Enrollment requires appropriate placement (based on high school GPA and/or other measures), or completion of a pre-statistics or an intermediate algebra course.
Advisory: ENGL 101 and the ability to read college-level texts.

Transfers to: UC/CSU - UC credit limit. The UC will grant credit for only one of the following courses: MATH 130 or MATH 130H or PSY 190.
This course provides an overview of the types of statistics that are important in the behavioral sciences. It is designed to teach students majoring in psychology, sociology, political science, and anthropology how to present and interpret experimental data. The course focuses on hypothesis testing and the statistics used to analyze assumptions, with topics including basic probability, measures

of central tendency, measures of variance, sampling, and inferential statistics.
Hours: 72 Lecture.

PSY 200 (C-ID: PSY 200)
Research Methods in Psychology
Units: 3

Prerequisite: PSY 101 or PSY 101H, PSY 190 or PSY 190 or MATH 130 or MATH 130H
Transfers to: UC/CSU

This course provides an introduction to the philosophy of science and the examination of hypothetical deductive methods and their relationship to theory. Topics include the nature of experimental research and design, experimental and non-experimental research—including group and single-subject designs, literature reviews, research ethics, the collection and analysis of data, and writing APA-style reports. Collection, handling, and analysis of original empirical data during and outside of class, and in both experimental and nonexperimental designs, are an integral component of the course. The course is designed for students intending to pursue a degree in psychology.
Hours: 36 Lecture. 54 Lab.

PSY 210 (C-ID: PSY 150)
Biological Psychology
Units: 3

Prerequisite: PSY 101
Transfers to: UC/CSU - UC credit limit. The UC will only grant credit for one of the following courses: PSY 210 or PSY 210H
This course is designed for students interested in understanding the biological processes that underlie human behavior. The biological basis of normal and abnormal behavior—including sensory systems, brain and behavior relationships, and underlying neurochemical processes—is explored, as is the extent to which biological processes interact with environmental influences to determine behavior.
Hours: 54 Lecture.

PSY 210H (C-ID: PSY 150)
Biological Psychology Honors
Units: 3

Prerequisite: PSY 101, ENGL 101
Transfers to: UC/CSU - UC credit limit. Students will receive credit for only one of the following courses: PSY 210 or PSY 210H
This course is designed for students interested in understanding the biological processes that underlie human behavior. The biological basis of normal and abnormal behavior—including sensory systems, brain and behavior relationships, and underlying neurochemical processes—is explored, as is the extent to which biological processes interact with environmental influences to determine behavior. This course is intended for students eligible for the Honors Program.
Hours: 54 Lecture.

PSY 299
Directed Study: Psychology
Units: 1-3

Transfers to: CSU
Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade

point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.
Hours: 54-162 Lab.

RADIO

Division of Communications and Languages

RDIO 104
Radio Broadcasting
Units: 3

It is advised that students be able to engage in written composition at a college level and be able read college-level texts.
Transfers to: UC/CSU

This course introduces students to the field of broadcasting and related electronic media, with emphasis placed on the history, development, and current status of broadcasting and related industries. Students explore the broadcasting industry and develop "on-air" skills for a variety of radio formats, and upon completion, demonstrate knowledge of the regulations, organizational structures, revenue sources, historical development, and ongoing operation of broadcasting and related industries.
Hours: 54 Lecture.

RDIO 105
Introduction to Radio News Writing
Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.
Transfers to: CSU

This course is designed to teach students how to write news for radio. Students learn to use proper industry templates for writing dialogue, public service announcements, live broadcasts, and other radio segments. The course also covers radio terminology with a focus on the theories and practices of radio broadcast newsgathering, writing, and on-air talent delivery.
Hours: 54 Lecture.

RDIO 119
Sports Radio Broadcasting
Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

In this course, students broadcast local and Río Hondo College-related sports for radio on the website of the *El Paisano* student newspaper website. Broadcasted sports may include baseball, soccer, basketball, water polo, tennis, volleyball, or other sports played during the semester. Students also broadcast play-by-play and interview athletes and coaches.

Hours: 36 Lecture. 54 Lab.

RDIO 122

Introduction to Radio Announcing

Same as: RDIO 122

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

In this course, students are introduced to narrating, dubbing, and announcement work used in the radio industry. The course includes the development and use of radio terminology and an in-depth study of microphone techniques.

Hours: 54 Lecture.

RDIO 136

Radio Production

Units: 4

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

This introductory-level course focuses on the theory and application of audio production techniques for radio broadcasting. Students learn about audio equipment for both live and pre-recorded (i.e., live-to-tape) broadcasting, broadcast writing, radio program formats, announcing skills, how to use recording equipment, mixers, and digital audio production.

Hours: 36 Lecture. 108 Lab.

RDIO 236

Advanced Radio Production

Units: 4

Prerequisite: RDIO 136

Transfers to: UC/CSU

This course is an opportunity for advanced study for students who want to learn production and management techniques used in radio broadcasting. Students are shown proper announcing and on-air presentation techniques through lecture, demonstration, and taped examples. Students will have an opportunity to air their programs over KRHC, the campus internet radio station.

Hours: 36 Lecture. 108 Lab.

RDIO 290

Work Experience Education/ Internship for Radio-Related Fields

Units: 1-4

Prerequisite: RDIO 104

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area

of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of radio and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-216 Lab.

RDIO 299

Directed Study: Radio

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

READING AND STUDY SKILLS

Division of Communications and Languages

READ 012

Learning Strategies

Units: 1.5

It is advised that students be able to read pre-collegiate texts.

Advisory: ENLA 034

This course is designed for students entering college who need to develop their skills as learners. Students acquire and build study techniques in the areas of note taking, test taking, reading, memorizing, time planning, and communicating. Emphasis is placed on learning new techniques and then applying them to classes and work situations. This is a non-degree-applicable credit course and is offered on a pass/no pass basis.

Hours: 27 Lecture.

READ 101

Critical Reading

Units: 3

Enrollment requires the ability to read college-level texts. It is advised that students be able to engage in written composition at a college level.

Transfers to: UC/CSU

This course is designed to aid students in acquiring critical reading and thinking skills across disciplines. Emphasis is placed on the ability to analyze and evaluate material by establishing thesis and support as well as by analyzing elements of argumentation. The course also focuses on vocabulary and the effects of language on readers.

Hours: 54 Lecture.

READ 134

Academic Success and Lifelong Learning

Units: 3

It is advised that students be able to engage in college composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students to acquire reading and study strategies for college success and lifelong learning. Outcomes include the knowledge of applicable educational learning theories as well as psychological and physiological tools that promote self-development in learning. Specific topics consist of reading print versus digital texts, critical thinking, lecture and textbook note taking, metacognitive strategies, test preparation, and time management.

Hours: 54 Lecture.

SOCIOLOGY

Division of Behavioral and Social Sciences

SOC 101 (C-ID: SOCI 110)

Introduction to Sociology

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: SOC 101 or SOC 101H. This course is designed for students with an interest in the discipline of sociology, or anyone who wants to further their understanding of human group behavior and the organization of society. Using several theoretical points of view, students study and analyze the organization of social life; problems of inequality, including age, sex, race and ethnicity, social class, and lifestyle; the basic social institutions of family, religion, and economics; and global issues related to technology, social movements, and social change.

Hours: 54 Lecture.

SOC 101H (C-ID: SOCI 110)

Introduction to Sociology Honors

Units: 3

Enrollment is restricted to those who meet the Honors Program requirements (minimum GPA of 3.0). It is advised that

students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the

following courses: SOC 101 or SOC 101H

This course is designed for students with an interest in the discipline of sociology, or anyone who wants to further their understanding of human group behavior and the organization of society. Using several theoretical points of view, students study and analyze the organization of social life; problems of inequality, including age, sex, race and ethnicity, social class, and lifestyle; the basic social institutions of family, religion, and economics; and global issues related to technology, social movements, and social change. This course is intended for students eligible for the Honors Program.

Hours: 54 Lecture.

SOC 102 (C-ID: SOCI 115)

Major Social Problems

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: UC/CSU

This course is designed to provide students with an understanding of the definition, development, reduction, and elimination of major social problems in contemporary society. Topics include problems of mental and physical health, including addictions, crime and violence, social inequality, terrorism and war, and technology and the environment. Various social theories and relevant empirical research are critically examined throughout the course.

Hours: 54 Lecture.

SOC 105

Introduction to Human Sexuality

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students interested in the social scientific study of human sexuality. The course provides students with knowledge about the processes and variation in sexual functions, reproduction, intimate relationships, sexual and gender role development, and sexual activities. The social, cultural, and historical contexts of human sexuality are critically analyzed; and numerous factors involved in human sexuality are explored, emphasizing sexuality as a form of human interaction.

Hours: 54 Lecture.

SOC 110

Human Sexuality from a Cross-Cultural Perspective

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is for students interested in human sexuality from a cross-cultural perspective. Sexual anatomy, development, response, and behavior will be examined, along with historical and cultural patterns.

Students will learn about the development and expression of gender and orientation from both Western and non-Western perspectives, with an emphasis on the influence of culture on individuals.

Hours: 54 Lecture.

SOC 114 (C-ID: SOCI 130)

Hookups, Breakups, and Makeups

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students interested in examining issues such as marriage, family, and emerging alternative lifestyles from a sociological perspective. The course explores love, sexuality, mate selection, and engagement preceding traditional marriage and family patterns; extra-marital and non-marital unions; singles; and future trends in intimate relationship styles.

Hours: 54 Lecture.

SOC 116 (C-ID: SOCI 150)

Power, Oppression, and Privilege: Race and Ethnic Relations

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students interested in understanding the complexities of multiethnic, multiracial societies. The course presents an overview of the structure and character of racial and ethnic relations in the United States and abroad. Students gain knowledge of the treatment and experiences of a variety of racial and ethnic groups and gain insight into the complex social features of intergroup contact.

Hours: 54 Lecture.

SOC 120 (C-ID: SOCI 140)

She, He, They: Intersections of Gender

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

In this course students explore how gender shapes peoples' lives and the world around them. Using a sociological perspective, students will examine gender as a social construction rather than a simple biological difference. Topics may include cultural ideas of gender, gender and the economy, politics, the media, families, and education. This course is designed for students who want to learn more about the social connections of gender, and how the importance of gender differences are reinforced in society today.

Hours: 54 Lecture.

SOC 127 (C-ID: SOCI 160)

Introduction to Criminology

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students interested in the subject of criminology. The scientific analysis of the nature, extent, and causes of violations of societal rules of

behavior formally defined as crime and delinquency is emphasized. The course includes an analysis of the development of criminal law and the administration of criminal justice; the patterns of criminality and delinquency; the impact of crime on social change; and the labeling, identification, characteristics, and treatment of criminals and delinquents.

Hours: 54 Lecture.

SOC 130

Introduction to Disability Studies

Units: 3

Advisory: SOC 101

Transfers to: UC/CSU

This course introduces the topic of disability studies from a sociological perspective. Students learn definitions and distinctions involved in the study of disabilities, which include various theories and models of disability. The course is designed for students who want to learn about the connections between disability and society, including the culture of disability and ableism, the relationship between disability and various social institutions, and the intersectional relationship between disabled and other marginalized groups.

Hours: 54 Lecture.

SOC 299

Directed Study in Sociology

Units: 1-3

Prerequisite: SOC 101

Transfers to: CSU

This course provides an opportunity for students to expand their studies in Sociology beyond the classroom by completing a project or an assignment arranged by an agreement between students and an instructor. Independent study/directed study is intended for students able to assume responsibility for independent work, and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent studies/directed studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress are evaluated at regular intervals. Academic standards for independent studies/directed studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations, with one unit (1) of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

SOC 325

Analysis of Social Change

Units: 3

Prerequisite: ENGL 201, SOC 101 or SOC 101 or SOC 101H or SOC 102

This upper division general education course is designed for students pursuing a California Community College baccalaureate degree at Rio Hondo College and is open to all students who have completed the required prerequisites. Students develop a broad understanding of social change through the examination of various social mechanisms that lead to, promote, and eventually incorporate or quell the products and processes of social change. Special attention is paid to industrialization, globalization, social movements, the implementation and evolution of technology, and how social change is shaped by and produces unique social behavior.

Hours: 54 Lecture.

SPANISH

Division of Communications and Languages

SPAN 101 (C-ID: SPAN 100)

Spanish I

Units: 4.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following sequences of courses: SPAN 101 and SPAN 102 or SPAN 101S and SPAN 102S. This course is an introduction to the essentials of Spanish language: reading, listening, speaking, and writing skills. Various facets of Spanish-speaking cultures will be analyzed via cross-cultural comparisons. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs, and films. The Language Laboratory work focuses on vocabulary, grammar, and cultural practices.

This class is designed for those students who do not have a Spanish language background who wish to learn to speak Spanish or who seek a degree in the Spanish language.

Hours: 72 Lecture. 27 Lab.

SPAN 101S (C-ID: SPAN 100)

Spanish for Spanish Speakers I

Units: 4.5

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following sequences of courses: SPAN 101 and SPAN 102 or SPAN 101S and SPAN 102S. This course is an introduction to the essentials of Spanish language: reading, listening, speaking, and writing skills. Various facets of Spanish-speaking cultures will be analyzed via cross-cultural comparisons. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs and films. The Language Laboratory work focuses on

vocabulary, grammar, and cultural practices. This class is designed for those students who do have a Spanish language background and want to develop a better written and oral competency in the language, or who seek a degree in the Spanish language.

Hours: 72 Lecture. 27 Lab.

SPAN 102 (C-ID: SPAN 110)

Spanish II

Units: 4.5

Prerequisite: SPAN 101 or completion of 2 years of high school Spanish with a grade of "C" or better

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following sequences: SPAN 101 and SPAN 102 or SPAN 101S and SPAN 102S

This course is a continuation of the study of the essentials of Spanish language: reading, listening, speaking, and writing skills. The skills learned in SPAN 101 will be reviewed. The class will increase vocabulary, grammar, and cultural knowledge to improve on the reading, listening, speaking and writing skills presented in SPAN 101. In this course the study of verb tenses and constructions is completed. Various facets of Spanish-speaking cultures will be analyzed via cross-cultural comparisons. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs, and films. The Language Laboratory work focuses on vocabulary, grammar, and cultural practices. This class is designed for those students who do not have a Spanish language background who wish to learn to speak Spanish or who seek a degree in the Spanish language.

Hours: 72 Lecture. 27 Lab.

SPAN 102S (C-ID: SPAN 110)

Spanish for Spanish Speakers II

Units: 4.5

Prerequisite: SPAN 101S

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following sequences: SPAN 101 and SPAN 102 or SPAN 101S and SPAN 102S

This course is a continuation of the essentials of the Spanish language: reading, listening, speaking, and writing skills. The skills learned in Spanish 101S will be reviewed. The class will increase vocabulary, grammar, and cultural knowledge to improve on the reading, listening, speaking and writing skills presented in Spanish 101S. In this course, the study of verb tenses and constructions is completed. It is designed to further improve the language skills of students with a Spanish language background. Various facets of Spanish-speaking cultures will be analyzed via cross-cultural comparisons. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs, and films. The Language Laboratory work focuses on vocabulary, grammar, and cultural practices. This class is designed for those students who do have a Spanish language background and want to develop a better written and oral

competency in the language, or who seek a degree in the Spanish language.

Hours: 72 Lecture. 27 Lab.

SPAN 201 (C-ID: SPAN 200)

Spanish III

Units: 4.5

Prerequisite: SPAN 102 or SPAN 102S or completion of three years of high school Spanish with a grade of "C" or better.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: SPAN 201 or SPAN 201H. This is an intermediate level course in which Spanish grammar is reviewed. It includes intensive practice in conversation and composition. Many aspects of Spanish culture are introduced in short stories by Latin-American and Spanish authors. Students strengthen their communications and written skills by analyzing these stories in Spanish. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs, and films. The Language Laboratory work focuses on vocabulary, grammar, and cultural practices. This class is designed for students who wish to broaden their knowledge in Spanish as well as for those seeking a degree in the Spanish language.

Hours: 72 Lecture. 27 Lab.

SPAN 201H (C-ID: SPAN 200)

Spanish III Honors

Units: 4.5

Prerequisite: ENGL 101, SPAN 102 or SPAN 102S or completion of three years of high school Spanish with a grade of "C" or better.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: SPAN 201 or SPAN 201H. This is an intermediate level course in which Spanish grammar is reviewed. It includes intensive practice in conversation and composition. Many aspects of Spanish culture are introduced in short stories by Latin-American and Spanish authors. Students strengthen their communications and written skills by analyzing these stories in Spanish. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs, and films. The Language Laboratory work focuses on vocabulary, grammar, and cultural practices. This class is designed for students who wish to broaden their knowledge in Spanish as well as for those seeking a degree in the Spanish language. This course is intended for students eligible for the Honors Program.

Hours: 72 Lecture. 27 Lab.

SPAN 202 (C-ID: SPAN 210)

Spanish IV

Units: 4.5

Prerequisite: SPAN 201 or SPAN 201H or completion of four years of high school Spanish with a grade of "C" or better.

Transfers to: UC/CSU

This course is the continuation of SPAN 201. SPAN 202 is an intermediate level course in which Spanish language and culture is reviewed. It stresses written and oral

proficiency as well as reading comprehension and composition. Many aspects of Spanish culture, literature, and history are analyzed in readings by Latin American and Spanish authors. Students strengthen their communication and writing skills by analyzing these stories in Spanish. In addition to classroom discussion, students are required to complete at least 27 hours of intensive individualized oral-aural practice in the Language Laboratory via interactive websites, audio CDs, video programs, and films. The Language Laboratory work focuses on vocabulary, grammar, and cultural practices. This class is designed for those students who wish to broaden their knowledge in Spanish as well as for those interested in pursuing a degree in the Spanish language.
Hours: 72 Lecture. 27 Lab.

SPAN 299

Directed Study: Spanish

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

SPEECH

Division of Communications and Languages

SPCH 100 (C-ID: COMM 130)

Interpersonal Communication

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: SPCH 100 or SPCH 100H. This introductory course focuses on the kinds of interpersonal communication interactions that happen between two people. Designed to provide students with greater

understanding of communication in everyday activities, the course focuses on self-discovery and strengthening the self-image; discovering and understanding the factors that influence communication behavior; and the establishment and maintenance of meaningful relationships in professional and social settings. This course is designed for speech communication majors or anyone with an interest in human communication.
Hours: 54 Lecture.

SPCH 100H

Interpersonal Communication Honors

Units: 3

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: SPCH 100 or SPCH 100H. This introductory course focuses on the kinds of interpersonal communication interactions that happen between two people. Designed to provide students with greater understanding of communication in everyday activities, the course focuses on self-discovery and strengthening the self-image; discovering and understanding the factors that influence communication behavior; and the establishment and maintenance of meaningful relationships in professional and social settings. This course is designed for speech communication majors or anyone with an interest in human communication. This course is intended for students eligible for the Honors Program.
Hours: 54 Lecture.

SPCH 101 (C-ID: COMM 110)

Public Speaking

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: SPCH 101 or SPCH 101H.

This introductory course is designed to prepare students to be effective oral communicators in all aspects of public presentations, including design and delivery of a public speech. The course is appropriate for all students interested in developing their public speaking knowledge and skills, such as speech communications and languages majors, future teachers, and future business leaders.

Hours: 54 Lecture.

SPCH 101H (C-ID: COMM 110)

Public Speaking Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: SPCH 101 or SPCH 101H.

This introductory course is designed to prepare students to be effective oral communicators in all aspects of public presentations, including design and delivery of a public speech. The course is appropriate for all students interested in developing their public speaking knowledge and skills, such as speech communications and languages majors, future teachers, and future business

leaders. This course is designed for students eligible for the Honors Program.

Hours: 54 Lecture.

SPCH 110 (C-ID: COMM 160B)

Forensics: Speech & Debate Team

Units: 2-4

Prior or concurrent enrollment in SPCH 101 or SPCH 101H or SPCH 130 or SPCH 140 is recommended. It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course trains students to participate in Rio Hondo College's Forensic Speech and Debate Team. Emphasis is placed on preparation, including research and writing; practice; and participation in intercollegiate speech and debate tournaments and/or community events. Students learn debate, oral interpretation, limited preparation, and platform speaking. The course is appropriate for students specializing in areas involving public speaking such as law, political science, drama, and instruction. Students who sign up for the lab hours are required to compete. This course may be taken once and repeated three times for credit.

Hours: 18 Lecture. 54-162 Lab.

SPCH 120

Small Group Communication

Units: 3

Transfers to: UC/CSU

This course focuses on the communication principles that occur in small group settings. Emphasis is placed on the theory, application, and evaluation of group communication processes such as problem solving, conflict management, decision making, and leadership. The course is intended for students studying communication or any discipline requiring effective communication in group settings.

Hours: 54 Lecture.

SPCH 130 (C-ID: COMM 170)

Oral Interpretation

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course focuses on the oral performance aspects of various forms of literature, including poetry, prose, and drama. The skills needed for making such public performances are addressed and students' knowledge of the various forms of literature will be enhanced. Emphasis is placed on creating the essence of characters in a text through facial, vocal, and kinetic methods. This course is appropriate for speech majors or anyone interested in public performance and literature.

Hours: 54 Lecture.

SPCH 132

Readers Theatre

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This is a creative communication course focusing on group presentations of literature. Students will perform prose, drama, and/or

poetry in groups so that a communicative message emerges and fosters imaginative responses in the minds of an audience. Emphasis is placed on the fusion between rhetoric, interpretation, and acting. Readers Theatre is designed for Speech Communication majors and those interested in literature and performance.
Hours: 54 Lecture.

SPCH 140 (C-ID: COMM 120)

Argumentation and Debate

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: SPCH 140 or SPCH 240.

This course is an introduction to the principles and techniques of argumentation and debate. Effective methods of research, critical analysis, reasoning, refutation, and listening are stressed. Through debate participation and analysis, students will gain the knowledge and skills to advocate and refute argumentative positions. This course is particularly appropriate for students anticipating entering occupations where argumentation, negotiation, and issue-analysis are likely to occur.

Hours: 54 Lecture.

SPCH 150 (C-ID: COMM 150)

Intercultural Communication

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is an introduction to intercultural communication. Emphasis is placed on applying intercultural theories and concepts to understand the influence of cultural membership upon communicative situations. Students who complete the course improve their intercultural communication competence. This course is recommended for students in all fields, but particularly for students majoring in communication studies and students who anticipate high levels of interaction with people from diverse cultures.
Hours: 54 Lecture.

SPCH 240 (C-ID: COMM 120, COMM 190)

Argumentation and Discussion

Units: 3

Prerequisite: SPCH 140

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: SPCH 140 or SPCH 240.

This course provides students with expanded practice and theory in argumentation. Students further develop their argumentation knowledge and skills through debate participation, observation, and discussion. The course is particularly appropriate for students anticipating entering occupations that involve extensive argumentation and deliberation such as law, communication, negotiation, and any area where argumentation and debate occur frequently.

Hours: 54 Lecture.

SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS

Division of Mathematics, Sciences, and Engineering

STEM 049A

How to be a Successful STEM Student (formerly MATH 049)

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course is designed for students entering science, technology, engineering, or math (STEM) degree programs who plan to transfer to earn a bachelor's degree in their field. The course introduces students to effective STEM study skills, the importance of participating in internships, and appropriate extracurricular activities. Topics covered are designed to increase student success in STEM fields. Students are **expected** to be concurrently enrolled in at least one mathematics or science course in order to apply skills covered in this course.

Hours: 18 Lecture.

STEM 049B

Becoming a STEM Researcher

Units: 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course is designed for students intending to explore careers as researchers in science, technology, engineering, and mathematics (STEM) fields. Students learn how to apply and prepare themselves for undergraduate research opportunities by developing their resumes/curricula vitae, learning how to read research papers, and writing and presenting their research. Students also learn how to fund their research through research experiences for undergraduates (REU) and scholarships. Completion of these activities provides students with a competitive application for transfer and REUs. The course is offered on a pass/no pass basis.

Hours: 18 Lecture.

TECHNICAL EDUCATION

Division of Career and Workforce Education

TCED 044

OSHA 10 for the Workplace

Units: 1

It is advised that students be able to read college-level texts.

This course is intended for the individual who needs an overview and/or certification of both the California and Federal OSHA Safety Regulations for the General Industry Workplace or Construction Workplace. This course will cover a detailed overview of the rules and regulations, and discuss fire protection and prevention, material handling/storage/use and disposal, hand and power tools, welding and cutting, electrical safety,

and fall protection. Upon completion of this course, (as well as passing the final exam), the student will receive a 10-hour OSHA Training Certificate of Completion and/or Department of Labor card.

Hours: 18 Lecture.

TCED 054

OSHA Workplace Safety II

Units: 4

It is advised that students be able to read college-level texts.

This course is for the individual who needs an intermediate-level overview and/or the number of hours required for certification of both the California and Federal OSHA Safety Regulations for the General Industry and Construction Workplace. The course will cover a detailed overview of the rules and regulations, fire protection and prevention, material handling/storage and disposal, hand and power tools, welding and cutting, electrical safety, fall protection, scaffolds, excavations, concrete and masonry construction, steel erection, demolition, cranes/hoists/elevators and conveyors, lockout/tagout procedures, industrial hygiene, and emergency action plans. Powered industrial trucks will also be covered during the course, meeting the requirement for OSHA Standard 1910.178. Upon completion of this course (as well as passing the final exam and the powered industrial trucks operator safety training), the student will receive a 30-hour OSHA Training Certificate of Completion, which is good for life, and a powered industrial truck Certified Operator Card, which is good for 3 years.

Hours: 72 Lecture.

TCED 090

Blueprint Reading for industry

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course is for all students interested in pursuing certificates, degrees and careers related to manufacturing, welding, and drafting technologies. The course presents an introduction to the use of engineering documents or blueprints as used in industrial applications and focuses on interpreting and visualizing technical drawings in order to read and understand "The Language of Industry." Principles of reading drawings, specifications, projection principles, working drawings, details, assemblies, and pictorial representations are examined and discussed. The course is also helpful for apprentices and employees in all areas of technology including planning, purchasing, machine trades, welding/fabrication, future engineers, and inspection.

Hours: 27 Lecture. 27 Lab.

TCED 101

Occupational Safety and Health for the 21st Century

Units: 4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course provides an overview of the origins of occupational safety and health standards in the United States. The

environmental and social justice issues that led to the creation of workplace safety and health standards will be discussed, a detailed overview of required occupational safety and health standards and regulations will be provided, and the impact of current issues in sustaining occupational safety and health on a 21st century workforce will be emphasized. Students will gain insights into the intersection of public safety, public health, and the building and environmental health standards which inform workplace safety policies and procedures. Course activities will include hands-on exercises to demonstrate hazard awareness; the correct use of tools, material handling, and safety equipment; and the development of emergency protocols and safety procedures. Students will have the opportunity at course completion to receive a Department of Labor (DOL) 30-hour Occupational Safety and Health Administration (OSHA) certification card provided all course requirements are met. The DOL card is often an initial certification for industrial occupational safety and health technicians, first line supervisors and managers, and construction and building inspectors.

Hours: 72 Lecture.

TCED 299

Directed Study in Technical Education

Units: 1-3

Enrollment requires a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

TESLA

Division of Career and Workforce Education

TESL 101A

Tesla Student Automotive Technician (START) Program - A

Units: 3

Enrollment requires acceptance into the Tesla program.

Prerequisite: AUTO 260

Transfers to: CSU

This course is the first in a series of four courses intended to teach entry-level students about electric vehicle (EV) applications and the technology used at Tesla, Inc. The course is suitable for students already working in the battery electric/hybrid vehicle and energy technology field and students who have completed a two-year automotive program. This first course covers the history of the Tesla company, a product and model overview, and an introduction to Tesla's service network, laptop diagnostic system, and service/parts access. Technical skills covered in this series include high-voltage tools and safety systems, diagnoses using software applications (e.g., *Fast Lane*), service repair basics, basic chassis, driver systems, and thermal and heating ventilation air conditions (HVAC) system services. Rio Hondo's Tesla START program provides students with skills needed for a successful career with Tesla, Inc. A formal application and interview process is required for acceptance into this course/program.

Hours: 36 Lecture. 54 Lab.

TESL 101B

Tesla Student Automotive Technician (START) Program - B

Units: 3

Prerequisite: TESL 101A

Transfers to: CSU

This course is the second in a series of four courses intended to teach entry-level students about electric vehicle (EV) applications and the technology used at Tesla, Inc. The course is suitable for students already working in the battery electric/hybrid vehicle and energy technology field and students who have completed a two-year automotive program. The course covers a product and model overview, ongoing product changes, computer firmware applications, and an introduction to the Tesla service network through service center shadowing. Laptop diagnostic systems, service/parts access, and factory repair times (FRT) skills are also introduced. Technical skills covered in this series include high-voltage interlock loop (HVIL) and driver safety systems, diagnoses using software applications (e.g., *Fast Lane*), customer interactions, alignment, chassis, sensor systems, heat pump basics, thermal and heating ventilation air conditioning (HVAC) system services, and drive motor basics. Rio Hondo's Tesla START program provides students with skills needed for a successful career with Tesla, Inc. A formal application and interview process is required for acceptance into this course/program.

Hours: 36 Lecture. 54 Lab.

TESL 101C

Tesla Student Automotive Technician (START) Program - C

Units: 3

Prerequisite: TESL 101B

Transfers to: CSU

This course is the third in a series of four courses intended to improve student's skills about electric vehicle (EV) applications and the technology used at Tesla, Inc. The course covers service readiness, service center procedures, high voltage charging including equipment needed to charge the battery, introduction to the CAN language used in the vehicle and vehicle interface with charger unit, introduction to the penthouse controls and charging power control center, HV controller, and driver interaction with the vehicle commands, meter and scope introduced to the inverter and DC/DC power control diagnosis. New model Palladium features are also introduced as they are being used in several vehicles now.

Hours: 36 Lecture. 54 Lab.

TESL 101D

Tesla Student Automotive Technician (START) Program - D

Units: 3

Prerequisite: TESL 101C

Transfers to: CSU

This course is the final one in a series of four courses intended to teach entry-level students about electric vehicle (EV) applications and the technology used at Tesla, Inc. The course is suitable for students already working in the battery electric/hybrid vehicle and energy technology field and students who have completed a two-year automotive program. This final course improves students' skills and speed in servicing Tesla electric vehicles. The course focuses on infotainment systems, voice commands, navigation, full driverless controls, vehicle reconditioning, advanced braking and suspension system skills with lift and lowering controls, computer area networks (CAN), and vehicle remote access for diagnostics. Upon completing the course, students are granted an interview with Tesla, Inc. for placement at a permanent service center. Rio Hondo's Tesla START program provides students with skills needed for a successful career with Tesla, Inc. A formal application and interview process is required for acceptance into this course/program.

Hours: 36 Lecture. 54 Lab.

THEATRE

Division of Arts, Business, & Cultural Programs

THTR 101 (C-ID: THTR 111, THTR 112)

Theatre Arts Appreciation

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is for students seeking an overview of the entire field of theatre. The practice and theory of the following are explored: costume, set and lighting design, acting, directing, playwriting, criticism, play structure, theatre architecture, and producing.

The instructor includes a brief historical overview and organizes at least one field trip to a professional theatre production.
Hours: 54 Lecture.

THTR 105 (C-ID: THTR 113)

The History and Development of the Theatre

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: THTR 105 or THTR 105H. This course is for students interested in the history of the theatre. It covers humanity's relationship with theatre from primitive tribal cultures through today's large musicals and blockbuster hits. The course explores the ways societal, religious, political, and social structures were presented and shared through the theatre; and investigates major plays, playwrights, and historic theatrical techniques through lectures, discussion, field trips, and films.
Hours: 54 Lecture.

THTR 105H (C-ID: THTR 113)

The History and Development of the Theatre Honors

Units: 3

It is advised that students be able to read college-level texts.

Prerequisite: ENGL 101

Transfers to: UC/CSU - UC credit limit.

Students will receive credit for only one of the following courses: THTR 105 or THTR 105H. This course is for students interested in the history of the theatre. It covers humanity's relationship with theatre from primitive tribal cultures through today's large musicals and blockbuster hits. The course explores the ways societal, religious, political, and social structures were presented and shared through the theatre; and investigates major plays, playwrights, and historic theatrical techniques through lectures, discussion, field trips, and films. This course is designed for students eligible for the Honors program.
Hours: 54 Lecture.

THTR 110 (C-ID: THTR 151)

Principles of Acting I

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is for students who are interested in acting in the areas of theatre, film, and television, whether as a profession or as a hobby. The class explores the theory, practice, and techniques of acting. Emphasis is placed on theatre games and exercises culminating in the presentation of scenes from contemporary dramatic literature.
Hours: 36 Lecture. 54 Lab.

THTR 111 (C-ID: THTR 152)

Principles of Acting II

Units: 3

Prerequisite: THTR 110

Transfers to: UC/CSU

This course is for students who want to continue to explore theories and techniques used in preparation for the interpretation of drama through acting, and to develop their

skills past the beginner level. Emphasis will be placed on deepening an understanding of the acting process through exercises, character analysis, monologues, and scenes.
Hours: 36 Lecture. 54 Lab.

THTR 112

Acting for the Camera

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students interested in acting techniques for film, television, and commercials. The class explores the styles, language, and technical demands of each medium. Topics include slating, voice, blocking, and memorizing as well as career advice (including photos and resumes, agents, unions, auditioning, and showcases). Students work with the camera and review the results to develop their skills.
Hours: 36 Lecture. 54 Lab.

THTR 150 (C-ID: THTR 171)

Stagecraft I for Theatre, TV, and Film

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

The course is designed for the student who wishes to gain a basic understanding of the technical phases of scene production including construction, painting, rigging, placement and manipulation of stage scenery, lighting equipment, sound equipment, properties and wardrobe as well as the organization and management of stage activity and stagecraft terminology. The student will study the aesthetics and practical application principles of stage scenic, sound and lighting design. Students are assigned a specific crew responsibility that directly relates to a college theatre production.
Hours: 18 Lecture. 108 Lab.

THTR 151

Stagecraft II for Theatre, TV, and Film

Units: 3

Prerequisite: THTR 150

Transfers to: UC/CSU

This course is designed for the student who wishes to expand the skills and concepts acquired in Stagecraft I for Theatre, TV, and Film (THTR 150). Topics such as the technical phases of scene production including construction, painting, rigging, placement and manipulation of stage scenery, lighting equipment, sound equipment, properties and wardrobe as well as the organization and management of stage activity and stagecraft terminology are revisited and expanded upon. The student will additionally do extensive study of the aesthetics and practical application principles of set design, sound design, and lighting design. Students are assigned a specific crew duty such as light board operator, sound operator or stage crew lead with added responsibility that directly relates to a college theatre production.
Hours: 18 Lecture. 108 Lab.

THTR 152

Stagecraft III for Theatre, TV, and Film

Units: 3

Prerequisite: THTR 151

Transfers to: UC/CSU

This course is designed for the student who wishes to further expand the skills and concepts acquired in Stagecraft I and II for Theatre, TV, and Film (THTR 150 and 151). Technical phases of scene production including construction, painting, rigging, placement and manipulation of stage scenery, lighting equipment, sound equipment, properties and wardrobe as well as the organization and management of stage activity and stagecraft are examined in greater depth. The student will complete an in depth study of the theatrical design process by designing scenery, properties, lighting and or sound for Rio Hondo College theatrical productions. Students are assigned a specific crew lead with supervisory responsibility that directly relates to a college theatre production.
Hours: 18 Lecture. 108 Lab.

THTR 153 (C-ID: THTR 173)

Lighting Design and Production for Theatre, TV, and Film

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students who want to gain an understanding and appreciation of the roles light and lighting design play in a theatrical production. Students gain understanding in lighting design theory, function, and aesthetics. Students learn to hang, focus, color, cable, and strike conventional and automated lighting fixtures, as well as to identify and select appropriate types of lighting fixtures, cables, control, and power distribution equipment for a given purpose. Electrical and operational safety receive special emphasis. Students who complete the course successfully are able to operate lighting consoles proficiently.
Hours: 18 Lecture. 108 Lab.

THTR 154

Sound Design and Production for Theatre, TV, and Film

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students who want to gain an understanding and appreciation of the roles sound and sound design play in a theatrical production. Students gain an understanding in sound design, function, and aesthetics. Students learn to rig, cable, troubleshoot, strike, and maintain analog and digital audio equipment, as well as to identify and select appropriate types of microphones, cables, speakers, and sound amplification equipment for a given purpose. Electrical and operational safety receive special emphasis. Students who complete the course successfully are able to operate audio mixing consoles proficiently.
Hours: 18 Lecture. 108 Lab.

THTR 159 (C-ID: THTR 192)

Stage Crew Activity

Units: 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This course is for students who want to gain practical, hands-on, technical experience working backstage. Students will gain experience working as part of a stage crew supporting public performances of theatrical, musical, or dance productions. This course may be taken once and repeated three times for credit.

Hours: 54-162 Lab.

THTR 160

Introductory Playwriting/Screenwriting

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is designed for students interested in the art of writing for theater and/or film. The course includes writing exercises, theater field trips, and a final staged reading of finished scripts. Students complete a one-act or 10-minute play which is considered for production at Rio Hondo College.

Hours: 36 Lecture. 54 Lab.

THTR 161

Playwriting/Screenwriting for Production

Units: 3

Prerequisite: THTR 160

Transfers to: CSU

This course is designed for students who want to work on their playwriting/screenwriting craft with an eye to the professional market. Students write, rewrite, and refine written works for production and also read plays, screenplays, and teleplays that have been produced recently. In addition, students realistically appraise the marketability of their script through staged readings by student actors for an audience.

Hours: 36 Lecture. 54 Lab.

THTR 164

Theatre Production Lab I

Units: 1-2

It is advised that students be able to read college-level texts.

Transfers to: CSU

This class is intended for students interested in exploring a career in entertainment production. The course provides a hands-on introduction to all aspects of entertainment production including scenery, lighting, audio, costumes and properties. Students will learn the fundamentals of constructing, painting and rigging scenery, hanging and focusing lighting equipment, setting up audio systems and/or building costumes or props for the performing arts programs at Rio Hondo College.

Hours: 54-108 Lab.

THTR 165

Theatre Production Lab II

Units: 1-2

Prerequisite: THTR 164

Transfers to: CSU

This class is intended for students interested in careers in entertainment production. The course builds upon the basic skills acquired in THTR 164, with more sophisticated tasks and greater responsibilities in scenic construction,

painting and rigging, stage lighting operations, stage audio systems and/or costume shop assignments for the performing arts programs at Rio Hondo College.

Hours: 54-108 Lab.

THTR 166

Theatre Production Lab III

Units: 1-2

It is advised that students have a knowledge of elementary algebra concepts.

Prerequisite: THTR 165

Transfers to: CSU

This class is intended for students pursuing careers in entertainment production. The course builds upon the skills acquired in THTR 165, providing leadership roles in scenic construction, painting and rigging, stage lighting operations, stage audio systems and/or costume shop assignments for the performing arts programs at Rio Hondo College.

Hours: 54-108 Lab.

THTR 170 (C-ID: THTR 191)

Theatre Rehearsal & Performance

Units: 3

Enrollment Limitations: Acting students must audition/interview and Technical/Support students must interview prior to participating in the course.

Advisory: THTR 110

Transfers to: UC/CSU

This course is for the student who wants to participate in a stage production that is part of the American College Theatre Festival (ACTF) competition. Students' performances will be evaluated by judges representing ACTF during public performances at Rio Hondo, and some will be chosen to compete at the regional and national festivals in the areas of acting, writing, stage managing, directing, and stage design. Students are provided an opportunity to be part of a theatre company in the organization of full-length and/or one-act plays under the guidance of a faculty director. This course may be repeated three times for credit.

Hours: 18 Lecture. 108 Lab.

THTR 171 (C-ID: THTR 191)

Musical Theatre Rehearsal and Performance

Units: 3

Enrollment Limitations: Performing students must audition/interview and Technical/Support students must interview prior to participating in the course. It is advised that students be able to engage in written composition at the early college level and read college-level texts.

Transfers to: UC/CSU

This course is for students who want to be involved in the creation and presentation of a musical production that is part of the American College Theatre Festival (ACTF) competition. The course introduces students to the various aspects that make up a musical, and based upon auditions and interviews, students can take part in performing music, acting, technical theatre work, designing, dancing, or stage managing under the supervision of a faculty director and other theatre, music, and dance professionals. Students will be evaluated by judges

representing ACTF during public performances at Rio Hondo College, and some will be chosen to compete at the regional and national festivals in the areas of acting, singing, dancing, stage managing, directing, and/or stage design. This course may be taken once and repeated three times for credit.

Hours: 18 Lecture. 108 Lab.

THTR 172

Performing and Preparing the Comedy

Units: 3

It is advised that students be able to engage in written composition at the early college level and read college-level texts.

Transfers to: UC/CSU

This course is for students who want to study theatre productions as they are created and expressed through comedic drama. The class will explore comedy genres, acting techniques, physical communication, and comic objectives. Students are part of a full-length or one-act production (or a combination of both), and may participate in a variety of activities including acting, directing, production, and management; auditions will determine the specific assignment.

Hours: 18 Lecture. 108 Lab.

THTR 173

Rehearsal and Performance: The Style Play

Units: 3

It is advised that students be able to engage in written composition at the early college level and read college-level texts.

Transfers to: UC/CSU

This course is for students who want to learn how to use performance styles and acting techniques in the preparation and performance of a play with a specific style of theatricality. These plays could include the styles of comedy of manners, melodrama, surrealism, realism, expressionism, futurism and more. Students will be involved in rehearsing a full-length or short play and then presenting it to a public audience. Students may participate in a variety of activities including acting, directing, management, dramaturg, etc. Auditions and/or interview will determine most of the specific assignments.

Hours: 18 Lecture. 108 Lab.

THTR 174 (C-ID: THTR 174)

Costume Design and Production for Theatre, TV, and Film

Units: 3

It is advised that students be able to engage in written composition at the early college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students who seek to gain an understanding and appreciation of costume techniques used for the theatre and other entertainment industries. Students gain the practical knowledge and experience necessary to work in a costume shop, including an understanding of costume history; basic costume design including sketching; basic costume construction including alteration and sewing; costume design tools, materials, fabrics, textiles, and crafts; costume sourcing practices; and backstage costume preparation and practices for productions. Students identify period

costumes (garments and accessories), analyze the effectiveness of costumes in a production, draft a pattern in order to sew/construct a garment, and source costumes needed for a production through vendors.
Hours: 36 Lecture. 54 Lab.

THTR 175

The Original Play in Production

Units: 3

Advisory: THTR 110

Transfers to: UC/CSU

This course is designed for students who want to take part in the creation of a new play. Students learn play structure, character development, and collaborative creation; and are involved in acting, directing, writing, and/or crew in the creation of a full-length, one-act, or devised play. Auditions will determine specific assignments.

Hours: 18 Lecture. 108 Lab.

THTR 176 (C-ID: THTR 175)

Makeup Design and Production for Theatre, TV, and Film

Units: 3

It is advised that students be able to engage in written composition at the early college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students who seek to gain an understanding and appreciation of makeup techniques used for the theatre and other entertainment industries. Students gain the practical knowledge and experience necessary to apply theatrical makeup; an understanding of makeup history; basic makeup design, including sketching; basic application, including wigs and facial hair; makeup design tools, materials, and crafts; makeup sourcing practices; and dressing room makeup preparation and practices for productions. Students identify period makeup styles and analyze the effectiveness of character makeup in a production, and design, create, and source makeup supplies needed for a production.

Hours: 36 Lecture. 54 Lab.

THTR 180

Touring Theatre Local I

Units: 2-4

It is advised that students be able to engage in written composition at the early college level and read college-level texts.

Transfers to: UC/CSU

This course is designed for students who want to gain a basic understanding of the rigorous requirements of a touring theatre production, including acting; lighting; and maintaining props, costumes and sets. Students are assigned a specific responsibility that relates directly to a production that tours locally.

Hours: 18-36 Lecture. 54-108 Lab.

THTR 181

Touring Theatre Local II

Units: 2-4

Prerequisite: THTR 180

Transfers to: UC/CSU

This course is designed for students who want to build upon the skills and concepts acquired in THTR 180 related to the rigorous requirements of touring a theatre production, including acting, directing, scenic design, management, lighting, construction, and maintaining props, costumes, and sets. Students are assigned a specific responsibility

that directly relates to a production that tours locally.

Hours: 18-36 Lecture. 54-108 Lab.

THTR 186

Touring Theatre: The Kennedy Center American College Theatre Festival

Units: 2-4

Prerequisite: THTR 170 or THTR 170 or THTR 170 or THTR 170 or THTR 171 or THTR 171 or THTR 171 or THTR 172 or THTR 172 or THTR 173 or THTR 175

Transfers to: UC/CSU

This course is intended for students who want to compete for theatre scholarships and recognition, and is open to students who have been nominated for an Irene Ryan scholarship, partner, production, or any other award for the Kennedy Center American College Theatre Festival (KCACTF). Students prepare for competition, compete in their nominated area, see invited plays, audition for plays, and attend a variety of workshops under the supervision of the instructor. This course may be repeated 3 times for credit. A 5-day field trip in February is usually required.

Hours: 18-36 Lecture. 54-108 Lab.

THTR 210

Acting Workshop: Devising

Units: 3

Advisory: THTR 110

Transfers to: UC/CSU

This class is for students who want to create their own work, whether they are actors or non-actors. Students study the history of devising (also known as collective creation; learn techniques of devising; and create, research, develop, rehearse, and present a devised project. Some knowledge of traditional theatre is helpful for this class. Some semesters a public performance is presented.

Hours: 36 Lecture. 54 Lab.

THTR 215

Acting: Audition and Cold Reading

Units: 3

Prerequisite: THTR 110

Transfers to: CSU

This course is designed for students who want to be prepared for academic, community, or professional auditions. Students work on selecting and presenting material, personal appearance, cold readings, and resumes. By the end of the semester, students have a variety of audition pieces ready.

Hours: 54 Lecture.

THTR 230

Principles of Directing

Units: 3

Prerequisite: THTR 110

Transfers to: UC/CSU

This course is for students who want to develop their ability to work with actors, interpret drama, and stage plays. It will cover the history and the techniques of the stage director. Emphasis is placed on class activities such as exercises in staging techniques and directing short scenes. Career opportunities, stage management and assistant directing are also covered. This course is a requirement for the Theatre Arts AS Degree.

Hours: 36 Lecture. 54 Lab.

THTR 231

Principles of Directing II

Units: 3

Prerequisite: THTR 230

Transfers to: UC/CSU

This course is designed for students majoring in theatre arts, and is a continuation of Theatre Arts 230. Students direct a ten-minute play performed by other students; and techniques in casting, rehearsing, picturization, characterization, tempo, and climax in play direction are covered.

Hours: 36 Lecture. 54 Lab.

THTR 290

Work Experience Education/Internship for Theatre Arts-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and be able to read college-level texts.

Transfers to: CSU

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of theatre arts and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.

Hours: 3 Lecture. 54-216 Lab.

THTR 299

Directed Study: Theatre

Units: 1-3

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students will be expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take directed study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 54-162 Lab.

TELEVISION

Division of Communications and Languages

TV 135

Digital Filmmaking I: Introduction

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: UC/CSU

This is an introductory course in film production techniques for narrative, documentary, and music video, and may be of interest to students interested in both film and television production. Topics include creating a story treatment, screenwriting, storyboarding, camera operation, lighting, introductory production sound, and non-linear editing. Students work in teams and crew all positions, including writer, producer, director, assistant director, cinematographer, boom operator, and editor. Emphasis is placed on defining the content, structure, and style of the production. Students implement these skills with projects in documentary, music video, and narrative filmmaking traditions.

Hours: 36 Lecture. 54 Lab.

TV 136

Digital Filmmaking II: Intermediate

Units: 3

Prerequisite: TV 135

Transfers to: UC/CSU

This intermediate course in film production techniques for narrative, music video, and branded content may be of interest to students interested in both film and television production. Topics include screenwriting, storyboarding, camera operation, lighting, production sound, and non-linear editing. Students work in teams and crew all positions, including writer, producer, director, first assistant director, cinematographer, camera assistant, gaffer, grip, boom operator, production sound mixer, and editor. The course incorporates career pathways in the contemporary media landscape, including branded content, social media, and new media. Emphasis is placed on personal storytelling, crew collaboration, professionalism, and building a professional resume and portfolio.

Hours: 36 Lecture. 54 Lab.

VOCATIONAL NURSING

Division of Health Science and Nursing

VN 061

Basic Fundamentals of Nursing

Units: 3.5

Prerequisite: HS 060, PSY 101

Corequisite: VN 061L

This course is designed for the entry level vocational nursing student with a focus on the nursing process and its application in medical/surgical settings. The role of the Licensed Vocational Nurse in providing care for patients in a variety of situations is

discussed. This course is open to students enrolled in the Vocational Nursing program and is required for Vocational Nursing licensure.

Hours: 63 Lecture.

VN 061L

Basic Fundamentals of Nursing Laboratory

Units: 5

Prerequisite: HS 060 and PSY 101

Corequisite: VN 061

This course is designed to provide the entry level vocational nursing student with the opportunity to learn basic nursing skills in the Health Science Skills laboratory and the clinical setting within the context of the nursing process. The student will apply the role of the Licensed Vocational Nurse in the clinical medical surgical setting. This course is open to students enrolled in the Vocational Nursing Program and is required for Vocational Nursing licensure. Offered on a pass/no pass basis.

Hours: 270 Lab.

VN 071L

Introduction to Medical-Surgical Nursing Lab

Units: 3.5

Prerequisite: VN 061 and VN 061L

This course will provide the student with the opportunity to use the nursing process at a beginning level to care for patients in the clinical setting. The student will develop competency in data collection and basic nursing skills. Special emphasis will be placed on the care of the patient with problems of the endocrine, musculo-skeletal and integumentary systems, as well as the older adult. This course is open to students enrolled in the Vocational Nursing Program and is required for Vocational Nursing licensure. Offered on a pass/no pass basis.

Hours: 189 Lab.

VN 072L

Intermediate Medical-Surgical Nursing Lab

Units: 3.5

Prerequisite: VN 071L, VN 074 and VN 075

Corequisite: VN 073

This course will provide the student with the opportunity to use the nursing process with increasing independence in providing care for patients in the clinical setting. The student will increase competency in data collection and nursing skills. Special emphasis will be placed on the care of the patient with problems of the cardiovascular respiratory, gastrointestinal and renal systems. This course is open to students enrolled in the Vocational Nursing program and is required for Vocational Nursing licensure. Offered on a pass/no pass basis.

Hours: 189 Lab.

VN 073

Basic Pharmacology

Units: 2

Prerequisite: VN 061 and VN 061L

Advisory: HS 045

This is an introductory course of basic techniques and computations used in the administration of medications. Completion of the course prepares the student to safely administer medications to patients under the supervision of the nursing instructor. This course is open to students enrolled in the

Vocational Nursing Program and is required for the Vocational Nursing Licensure.

Hours: 36 Lecture.

VN 074

Nursing Care of Patients with Integumentary/Orthopedic Problems and Concepts of Gerontologic Nursing

Units: 2.5

Prerequisite: VN 061 and VN 061L

Using the medical model, the nursing process, and Erikson's psychosocial theory of human development, this course is designed to prepare the vocational nursing student with the foundational knowledge necessary to care for the aging patient, and patients with disorders of the musculoskeletal and integumentary systems. This course is open to students enrolled in the Vocational Nursing Program.

Hours: 45 Lecture.

VN 075

Nursing Care of Patients with Endocrine Problems

Units: 1

Prerequisite: VN 061 and VN 061L

This course focuses on the use of the nursing process in caring for individuals with disturbances of the pancreas, thyroid, parathyroid, adrenal and pituitary glands. The pathophysiology, assessment data, nursing problems, and medical and nursing interventions for patients with endocrine problems are discussed. This course is open to students enrolled in the Vocational Nursing program and is required for Vocational Nursing licensure.

Hours: 18 Lecture.

VN 076

Nursing Care of Patients with Renal, Urinary, and Gastrointestinal Problems

Units: 3.5

Prerequisite: VN 071L, VN 074 and VN 075

Corequisite: VN 073

This course focuses on the application of the nursing process in medical surgical situations for the patient with gastrointestinal and renal problems. Emphasis is placed on the application of principles of nutrition in caring for patients with gastrointestinal and renal dysfunction. This course is open to students enrolled in the Vocational Nursing Program and is required for Vocational Nurse licensure.

Hours: 63 Lecture.

VN 077

Nursing Care of Patients with Cardiovascular and Respiratory Problems

Units: 3

Prerequisite: VN 071L, VN 074 and VN 075

Corequisite: VN 073

Using the medical model, the nursing process, and Erikson's psychosocial theory of human development, this course is designed to prepare the vocational nursing student with the foundational knowledge necessary to care for patients with cardiovascular and respiratory disorders. This course is open to students enrolled in the Vocational Nursing Program.

Hours: 54 Lecture.

VN 081L

Maternal and Pediatric Nursing Laboratory

Units: 2.5

Prerequisite: VN 072L, VN 073, VN 074, VN 075, VN 076 and VN 077

Corequisite: VN 084

This course will provide the student with the opportunity to use the nursing process with increasing independence in providing care for patients in the clinical setting. The student will increase competency in data collection and nursing skills. Special emphasis will be placed on the care of the pediatric, antepartum, intrapartum, postpartum and newborn patient. This course is open to students enrolled in the Vocational Nursing Program and is required for Vocational Nurse licensure. Offered on a pass/no pass basis.
Hours: 135 Lab.

VN 082L

Advanced Medical/Surgical Laboratory
Units: 3.5

Prerequisite: VN 081L and VN 084

This course will provide the student with the opportunity to apply learned leadership skills within the Vocational Nurse scope of practice. The student will utilize the nursing process with increasing independence and accountability in providing care for patients in the clinical setting. Special emphasis will be placed on the care of medical/surgical patients with complex problems, neurological system disorders and oncological problems. The student will have the opportunity to further develop the necessary communication skills needed to provide care for patients with mental health problems. This course is open to students enrolled in the Vocational Nursing program and is required for Vocational Nurse licensure. This course is offered on a pass/ no pass basis.
Hours: 189 Lab.

VN 083

Applied Pharmacology
Units: 2

Prerequisite: VN 073

Using the medical model, the nursing process, and Erikson's psychosocial theory of human development, this course is designed to prepare the vocational nursing student with the advanced knowledge necessary to safely administer medications to patients and accurately assess the patient response to medication therapy under the supervision of the nursing instructor. This course is open to students enrolled in the Vocational Nursing Program.
Hours: 36 Lecture.

VN 084

Maternal and Pediatric Nursing
Units: 4

Prerequisite: VN 072L, VN 073, VN 074, VN 075, VN 076 and VN 077

Corequisite: VN 081L

This course focuses on growth and development, with concomitant problems traced from the newborn through infancy, toddler, preschool, school-age, and adolescent stages. Emphasis is placed upon nursing care appropriate to the developmental stage of the child, and pediatric problems including biological and psychological problems affecting both healthy and hospitalized children and families. This course is open to students enrolled in the Vocational Nursing Program,

and is required for the Vocational Nursing License.

Hours: 72 Lecture.

VN 085

Leadership & Supervision for the Vocational Nurse

Units: 0.5

Prerequisite: VN 072L, VN 073, VN 074, VN 075, VN 076 and VN 077

This course introduces principles of leadership, group dynamics, delegation, and effective communication in working relationships for the vocational nurse. Emphasis is placed on delegating work to and supervising nursing assistants, other vocational nurses, and unlicensed assistive personnel. The course is open to students enrolled in the Vocational Nursing Program and is required for the Vocational Nurse license.
Hours: 9 Lecture.

VN 086

Mental Health and Neurological Nursing Problems

Units: 3

Prerequisite: VN 081L and VN 084

This course presents mental health concepts that relate to emotional issues influencing a patient's well-being and problems related to the neurological system. Emphasis will be placed on the nursing process, as it relates to problems of neurological function and mental health. This course is open to those students enrolled in the Vocational Nursing Program and is required for Vocational Nursing licensure.
Hours: 54 Lecture.

VN 087

Nursing Care of Patients with Cancer
Units: 1

Prerequisite: VN 072L, VN 073, VN 074, VN 075, VN 076, VN 077 and VN 077 and VN 081L and VN 084

This course focuses on the application of the nursing process in medical-surgical situations for the patient with cancer diagnoses of various body systems and immune deficiency disorders. Emphasis is placed on the physical, psychological, and psychosocial effects of diagnosis, medical therapy, and nursing intervention with the application of principles of nutrition, pharmacokinetics, and palliative care in caring for patients with cancer. The course is open to students enrolled in the Vocational Nursing Program and is required for the Vocational Nurse licensure.
Hours: 18 Lecture.

VOCABULARY

Division of Communications and Languages

VOCB 101

Vocabulary and Etymology

Units: 3

Enrollment requires appropriate placement (based on high School GPA and/or other measures) or eligibility for college composition and the ability to comprehend textbook reading written at the pre-collegiate level.

Transfers to: CSU

This course offers students an opportunity to develop a college-level vocabulary. The course emphasizes an understanding of the etymology, definition, and usage of words so that students gain a comprehensive understanding of the meanings of words and how they are used. Additionally, students study general and specialized terms used in courses across the curriculum. In order to internalize word meanings successfully, students work in individual, small group, and whole class settings.
Hours: 54 Lecture.

WELDING

Division of Career and Workforce Education

WELD 040

Introduction to Welding Processes

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This is an introductory class designed to familiarize the student with several welding processes that are currently used in the welding and metal fabrication industry. This course offers an overview and basic introduction to the theory and practice of a variety of welding and metal cutting methods. This course will emphasize safety, theory, procedure, and practical skill development.
Hours: 18 Lecture. 54 Lab.

WELD 041

Elementary Metallurgy

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This is an elementary course in the basic principles of metallurgy. The course is designed for welding majors, but is suitable for all students interested in materials, manufacturing and design. Topics include steel and alloy production, properties of metals, heat treatment, and the effects of heat on production.
Hours: 36 Lecture.

WELD 045

Basic Electric Arc Welding

Units: 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course is intended for the student who wants to progress to a basic level of welding processes and further their skills in manual and semi-automatic electric arc welding methods and techniques. This course emphasizes skills in Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW), Flux Cored Arc Welding (FCAW), and Gas Tungsten Arc Welding (GTAW). The course also focuses on safety, theory, characteristics and settings for power supplies and welding units, electric current settings, electrode identification and selection, welding positions, and welding of ferrous and non-ferrous metals. Special emphasis will be placed on developing proficiency and speed for high volume production applications.

Hours: 18 Lecture. 54 Lab.

WELD 050

Semi-Automatic Welding Process

Units: 4

Prerequisite: WELD 040

This course is intended for students who want to progress to an intermediate level of welding processes and further their skills in wire-fed, semi-automatic welding methods and techniques. This course emphasizes skills in gas metal arc welding (GMAW) and flux cored arc welding (FCAW). The course also focuses on safety, theory, characteristics and settings for power supplies and wire feeding units, electric current settings, electrode identification and selection, welding positions, and welding of ferrous and non-ferrous metals. Special emphasis is placed on developing proficiency and speed for high-volume production applications.

Hours: 36 Lecture. 108 Lab.

WELD 055

Manual Electric Arc Welding Processes

Units: 4

Prerequisite: WELD 040

This course is intended for the student who wants to progress to an intermediate level of welding processes and further their skills in manual electric arc welding methods and techniques. This course emphasizes skills in shielded metal arc welding (SMAW) and gas tungsten arc welding (GTAW). The course also focuses on safety, theory, characteristics and settings for power supplies and welding units, electric current settings, electrode identification and selection, welding positions, and welding of ferrous and non-ferrous metals. Special emphasis will be placed on developing proficiency and speed for high volume production applications.

Hours: 36 Lecture. 108 Lab.

WELD 060

Production Welding Techniques

Units: 4

Advisory: WELD 045

This is an intermediate level course focused on welding techniques used in high-volume production manufacturing environments. Students gain proficiency using pulsed-arc & non-pulsed-arc GMAW and GTAW processes on carbon steel, stainless steel, and aluminum materials. Correct use of welding fixtures, positioners, and other auxiliary equipment are covered. Emphasis is placed on using shop safety in addition to developing proper working procedures.

Hours: 36 Lecture. 108 Lab.

WELD 065

Introduction to Gas Tungsten Arc Welding

Units: 4

Prerequisite: WELD 040

This course introduces the principles and practices of gas tungsten arc welding (GTAW), including setup/use of GTAW equipment and safe use of tools and equipment. Instruction and practice is provided for gaining proficiency welding carbon steel, stainless steel, and aluminum weld joints in the flat and horizontal positions. Fundamentals of the GTAW process, correct consumables, equipment, and pre-weld preparation will be covered.

Hours: 36 Lecture. 108 Lab.

WELD 070

Advanced Gas Tungsten Arc Welding

Units: 4

Prerequisite: WELD 065

This course provides further advancement of knowledge and skills in gas tungsten arc welding (GTAW). Emphasis is placed on developing proficiency in welding carbon steel, stainless steel, and aluminum weld joints in the vertical and overhead position.

This course exposes students to using positioners, welding fixtures, and tooling commonly used in the workplace. Preparation for welding certification is covered.

Hours: 36 Lecture. 108 Lab.

WELD 075

Certification Welding I

Units: 4

Prerequisite: WELD 055

This course is an advanced course offering specialized instruction necessary for passing the City of Los Angeles Department of Building & Safety (LADBS) certified welder performance examinations. Emphasis will be placed on building skills in Shielded Metal Arc Welding (SMAW), Flux Cored Arc Welding (FCAW), and Gas Metal Arc Welding (GMAW) as applicable to acquire LADBS certified welder classifications in structural steel, light gage steel, and structural aluminum. Safety, welding codes, welding procedures and techniques, inspection requirements, nondestructive testing, and destructive testing will be covered. This course may be repeated once for certification or licensure standards, only by permit from the division.

Hours: 36 Lecture. 108 Lab.

WELD 080

Certification Welding II

Units: 3

Prerequisite: WELD 055

This course is intended for the student who wants to progress to an advanced level of welding processes and certification. This course offers specialized training and instruction which are necessary to take and pass the written test portion of the City of Los Angeles Department of Building & Safety (LADBS) Certified Welder Examination. This course emphasizes specific skills in Shielded Metal Arc Welding (SMAW), Flux Cored Arc Welding (FCAW), and Gas Metal Arc Welding (GMAW) as it applies to Certification in Structural Steel, Light Gage Steel, and Structural Aluminum. The course also focuses on safety, welding codes, test preparation, procedures, and destructive testing. Special emphasis will be placed on developing proficiency in order to successfully pass the LADBS exam. This course may be repeated once for certification or licensure standards, only by permit from the division.

Hours: 54 Lecture.

WELD 081

Pipe Welding - Level I

Units: 4

Prerequisite: WELD 075

This course is the first in a series of courses for welding of pipe using the shielded metal arc welding (SMAW) process. The course will cover safety procedures, electrode selection, weld joint preparation, and weld quality. Emphasis will be placed on student proficiency in welding pipe in the 1G, 2G and

5G positions in accordance with American Petroleum Institute API-1104: Standard for Welding Pipelines and Related Facilities.

Hours: 36 Lecture. 108 Lab.

WELD 082

Pipe Layout and Fabrication

Units: 4

Prerequisite: WELD 075

Advisory: TCED 070

This course examines the fundamental concepts used in the fabrication of carbon steel pipe connections and fittings. Emphasis will be placed on constructing lateral, sleeve, and branch pipe connections commonly used in the piping industry. Use of manual and mechanized thermal cutting equipment is covered. Related math calculations and cutting techniques will be utilized to prepare students for entry into a pipe fitting related field.

Hours: 36 Lecture. 108 Lab.

WELD 083

Pipe Welding II

Units: 4

Prerequisite: WELD 081

This course is second in a series of courses for welding of carbon steel pipe using the shielded metal arc welding (SMAW) and gas tungsten arc welding (GTAW) processes. The course will cover safety procedures, electrode selection, weld joint preparation, and weld quality. Emphasis will be placed on achieving proficiency in welding pipe in the 1G, 2G and 6G positions in accordance with American Society of Mechanical Engineering (ASME) pressure vessel codes.

Hours: 36 Lecture. 108 Lab.

WELD 084

Pipe Welding - Level III

Units: 4

Prerequisite: WELD 083

This course is an advanced course to provide further development in pipe welding skills leading to certification. The course will survey the theory and application of welding carbon steel pipe using gas metal arc welding (GMAW) in the 2G, 5G, and 6G positions using downhill and uphill progression. Emphasis will be placed on the development advanced skills welding pipe in accordance with the American Society of Mechanical Engineers (ASME) and the American Welding Society (AWS) codes.

Hours: 36 Lecture. 108 Lab.

WELD 085

Introduction to Metal Fabrication

Units: 3

Prerequisite: WELD 040, WELD 050, WELD 055, WELD 065

This is an introductory course that examines the theory and application aspects of metal fabrication. It covers the safe and effective use of metal fabricating equipment and tools to complete assigned projects. This course also includes hands-on instruction and practice in cutting, grinding, drilling, rolling, bending and welding tasks in accordance with supplied shop drawings.

Hours: 27 Lecture. 81 Lab.

WELD 100

Occupational Safety and Health Administration (OSHA) 30

Units: 3

Transfers to: CSU

This course covers the content requirements for the California Occupational Safety and Health Administration (Cal OSHA) 30-hour training. The contents of this course are derived by an authorized OSHA Outreach trainer who will cover the mandatory and elective training topics specified by the OSHA outreach training program requirements for the construction industry. The course's content also will include specific welding occupational safety and health hazards, emphasizing hazard identification, avoidance, control, and prevention. The course contents will include an introduction to OSHA, managing safety and health, OSHA Focus Four Hazards, personal protective and lifesaving equipment, health hazards in construction, stairways and ladders, confined space entry, excavations, fire protection and prevention, scaffolds, steel erection, welding and cutting, and foundations for safety leadership. Upon successfully completing this course, students receive an OSHA 30-hour training Certificate in addition to a letter grade. (To receive a certificate, students must attend a minimum of 30 classroom hours and earn a passing grade on the final exam). Hours: 54 Lecture.

WELD 299**Directed Study in Welding Technology****Units:** 1-3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

Independent Study/Directed Study is intended for students who have the ability to assume responsibility for independent work and to prepare written or oral reports and/ or appropriate projects. To enroll in an independent study/directed study course, students must possess a 2.5 overall grade point average, a 3.0 grade point average in the discipline of study being requested, or receive an exception from the instructor. Independent Studies/Directed Studies may be developed from any topic arising from or related to a course of study that will result in developing depth and breadth in that subject area. Students are expected to meet on a regular basis with their faculty sponsor and submit a final report or project, and student progress shall be evaluated at regular intervals. Academic standards for Independent Studies/Directed Studies shall be the same as those for other courses. Units are awarded in accordance to Title V regulations, with one unit of credit awarded for 54 hours of Directed Studies, six (6) hours of which must be with an instructor. The instructor is responsible for monitoring student progress through the semester. Students may take Directed Study courses for a maximum of three (3) units within a discipline, and may not accumulate more than a total of nine (9) units college wide.

Hours: 6-18 Lecture. 48-144 Lab.

WILDLAND FIRE TECHNOLOGY

Division of Administration of Justice and Fire Technology

WFT 040**Firefighter Type 2 (S130)****Units:** 2

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course provides students seeking wildland training and certification at the Type 2 level. This course provides instruction in wildland fire behavior, hazard recognition, human factors in high risk environments, basic incident command system, radio operations, and documentation. Classroom and field exercises prepare students for a position as a Firefighter Type 2 (FF2). This course meets the National Wildfire Coordinating Group's (NWCG) requirements for an S-130 wildfire training course. Hours: 27 Lecture. 27 Lab.

WFT 041**Firefighter Type 1 (S131)****Units:** 2**Prerequisite:** WFT 040

This course prepares interested students with additional leadership and skills sets needed to make leadership and tactical decisions on wildland fire incidents. This course provides instruction in the Risk Management Process, fireline reference materials, portable fire pump operations, staging area standard operating procedures and practices. Classroom and field exercises will prepare the student for a position as a Firefighter Type 1 (FF1) as recognized by the National Wildfire Coordinating Group's (NWCG). Hours: 27 Lecture. 27 Lab.

WFT 042**Portable Pumps and Water Use (S211)****Units:** 1

It is advised that students be able to engage written composition at a college level and read college-level texts.

This course provides students with practical knowledge and skills in the use of portable fire pumps and related equipment during wildland fire incidents. The course consists of three skill areas: supply, delivery, and application of water. Students are required to demonstrate their knowledge of correct water use, basic hydraulics, and equipment care. Field exercises, demonstrations, and evaluations cover set up, operation, and maintenance of pump equipment. This course meets the National Wildfire Coordinating Group's (NWCG) requirements for an S-211 wildfire training course. Hours: 9 Lecture. 27 Lab.

WFT 043**Wildland Fire Chain Saws (S212)****Units:** 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course provides the basic knowledge, understanding, function, maintenance, and use of internal combustion engine (ICE)

powered chain saws. Students also learn about the tactical use of wildland fire chainsaws. Field exercises support entry level training for firefighters with little or no previous experience with operating a chain saw and provide students with hands-on cutting experience in surroundings similar to fireline situations. This is an entry-level course for students interested in wildland fire suppression, and is highly recommended prior to enrolling in the intermediate-level wildland fire-related course. This course meets the National Wildfire Coordinating Group's (NWCG) requirements for an S-212 wildfire training course. Hours: 9 Lecture. 27 Lab.

WFT 044**Introduction to ICS (I100)****Units:** 1

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course introduces students to the Incident Command System (ICS-100). The course also provides a basic introduction to wildland fire management (the S-110 wildland fire training course) and a basic working knowledge of human performance concepts in dynamic and high risk environments (the L-180 wildland fire training course). This course meets the National Incident Management System (NIMS) and National Wildfire Coordinating Group (NWCG) requirements. Hours: 18 Lecture.

WFT 045**ICS for Single Resources (I200)****Units:** 1

Prerequisite: WFT 044 or ICS 100 certification from FEMA, NWCG or CSFM (CA State Fire Marshal)

This course is designed to teach students how to operate efficiently during an incident or event within the Incident Command System (ICS), and provides training and resources for personnel who are likely to assume a supervisory position within the ICS. The course focuses on the implementation of ICS and single resources. Topics include ICS fundamentals review, leadership and management, delegation of authority, management by objectives, ICS functional areas and positions, briefings, organizational flexibility, and transfer of command. This course meets the National Incident Management System (NIMS) requirements. Hours: 18 Lecture.

WFT 046**Intermediate ICS (I300)****Units:** 1.5**Prerequisite:** WFT 045

This course provides description and detail of the Incident Command System (ICS) organization and operations in supervisory roles on expanding or Type 3 incidents. Topics include ICS fundamentals review, incident/event assessment and agency guidance in establishing incident objectives, unified command, incident resource management, planning process, demobilization, transfer of command, and close out. Students are organized into teams for classroom exercises that replicate an incident operation. This

course meets National Incident Management Systems (NIMS) requirements.
Hours: 27 Lecture.

WFT 047

Advanced ICS (1400)

Units: 1

Prerequisite: WFT 046

This course provides skills and resources required for advanced application of the Incident Command System (ICS) organization and operations. This course expands on ICS-100, ICS-200, and ICS-300 courses and is intended for command and general staff positions. Topics include ICS fundamentals review, major and/or complex incident/event management, area command, and multiagency coordination. Group exercises emphasize advanced ICS concepts. This course meets National Incident Management Systems (NIMS) requirements.
Hours: 18 Lecture.

WFT 077

Wildland Fire Academy

Units: 16

Prerequisite: FTEC 044

Advisory: WFT 101, WFT 102, WFT 103

This course is designed for students who want to gain certification as a wildland firefighter through the National Wildland Coordinating Group (NWCG). This course provides training in hand crew formation, fireline construction, and the use of wildland fire equipment. Certification is included in Human Factors in the Wildland Fire Service (NWCG L-180), Firefighter Training (NWCG S-130), Firefighter Type 1 (NWCG S-131), Introduction to Wildland Fire Behavior (NWCG S-190), Portable Pumps and Water Use (NWCG S-211), Firing Operations (NWCG S-219), Basic Air Operations (NWCG S-270), American Heart Association (AHA) First Aid/CPR/AED Certification, California Specialized Training Institute (CSTI) Hazardous Materials First Responder Awareness (FRA) and Hazardous Material Operations (FRO), and California State Fire Marshal (CSFM) Low Angle Rope Rescue Operations (LARRO). Students learn about wildland fire crews (engine crews, hand crews, hotshot crews, helitak crews, and smokejumpers), wildland fire behavior, wildland firefighter personal protective equipment, wildland firefighter safety, helicopter safety, dozer safety, wildland fire pumps, and wildland fire tools and firing devices. This course includes arduous physical conditioning including hiking with up to 45 pounds of weight and other strenuous outdoor activities. The academy exceeds the United States Forest Service (USFS) minimum training requirements for an entry-level wildland firefighter for certification purposes.
Hours: 189 Lecture. 297 Lab.

WFT 078

Wildland Basic Fire Academy

Units: 9

Prerequisite: FTEC 044

Advisory: WFT 101 or WFT 101 or WFT 101 or WFT 101 or WFT 102 or WFT 102 or WFT 102 or WFT 102 or WFT 103 or WFT 103 or WFT 104 or WFT 105

This course is designed for students who want to gain basic certification as a wildland firefighter via the acquisition of certificates through the National Wildfire Coordinating

Group (NWCG), California State Fire Marshal, and American Heart Association (AHA). This course provides training in hand crew formation, fireline construction, and the use of wildland fire equipment. Students are certified in Human Factors in the Wildland Fire Service (NWCG L-180), Firefighter Training (NWCG S-130), Firefighter Type 1 (NWCG S-131), Introduction to Wildfire Fire Behavior (NWCG S-190), AHA First Aid/CPR/AED Certification, and California Specialized Training Institute's (CSTI) Hazardous Materials First Responder Awareness (FRA) and Hazardous Materials First Responder Operations (FRO). Students learn about wildland fire crews (engine crews, hand crews, hotshot crews, helitak crews, and smokejumpers), wildland fire behavior, wildland firefighters' personal protective equipment, wildland firefighter safety, helicopter safety, dozer safety, wildland fire pumps, and wildland fire tools and firing devices. This course includes arduous physical conditioning, including hiking with up to 45 pounds of weight and other strenuous outdoor activities. The academy exceeds the United States Forest Service (USFS) minimum training requirements for an entry-level wildland firefighter for certification purposes.
Hours: 126 Lecture. 108 Lab.

WFT 101

Wildland Fire Behavior

Units: 3

It is advised that students be able to engage in written composition at a college level and be able to perform mathematical operations with whole numbers, fractions, decimals, and percentages, and read college level texts.

Transfers to: CSU

This course is part of a series of core courses required for the Wildland Fire Technology Certificate of Achievement and Associate of Science degree programs. This course provides students with information necessary to understand basic wildland fire behavior, wildland fire predictions, and wildland fire operation safety. Wildland fire environmental factors and the tools required to monitor weather and fire behavior are discussed as related to wildland fire predictions. This course meets or exceeds National Wildfire Coordinating Group (NWCG) requirements.
Hours: 54 Lecture.

WFT 102

Wildland Firefighter Safety and Survival

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is part of a series of core courses required by the Wildland Fire Technology Certificate of Achievement and Associate of Science degree programs. The course provides students with information necessary to understand occupational safety and hazards associated with wildland firefighting operations. Emphasis is placed on situational awareness, protective measures, accident avoidance procedures, and the risk management process. Students also review fire ground near misses, entrapments, and fatalities. This course meets or exceeds

National Wildfire Coordinating Group (NWCG) requirements.
Hours: 54 Lecture.

WFT 103

Wildland Fire Operations

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is one in a series of core courses required by the Wildland Fire Technology Certificate of Achievement and Associate of Science Degree programs. This course provides students with information necessary to understand ground and air operations associated with wildland firefighting operations. Emphasis is placed on incident command system use, strategy, tactics, hazards, resource typing, management, and safety procedures during wildland fire incidents. This course meets or exceeds National Wildfire Coordinating Group (NWCG) requirements.
Hours: 54 Lecture.

WFT 104

Wildland Fire Investigation, Prevention, and Public Information

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is part of a series of core courses required by the Wildland Fire Technology Certificate of Achievement and Associate of Science degree programs. This course provides students with information and skills necessary to understand the roles and functions of a public information officer (PIO, S-203), fire prevention education team member (PETM, P-101), and the wildland fire investigator (INVF, FI-110). Various wildland fire-associated class projects engage students' public speaking, report writing, and presentation skills. This course meets or exceeds National Wildfire Coordinating Group (NWCG) requirements.
Hours: 54 Lecture.

WFT 105

Wildland Fire Logistics, Finance, and Planning

Units: 3

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

This course is part of a series of core courses required by the Wildland Fire Technology Certificate of Achievement and Associate of Science degree programs. The course provides students with information necessary to understand the responsibilities and functions of the logistics, finance, and planning sections. Emphasis is placed on how the different incident command system sections are organized and utilized during wildland fire incidents. This course meets or exceeds National Wildfire Coordinating Group (NWCG) requirements.
Hours: 54 Lecture.

WFT 290

Work Experience Education/Internship for Wildland Fire Technology-Related Fields

Units: 1-4

It is advised that students be able to engage in written composition at a college level and read college-level texts.

Transfers to: CSU

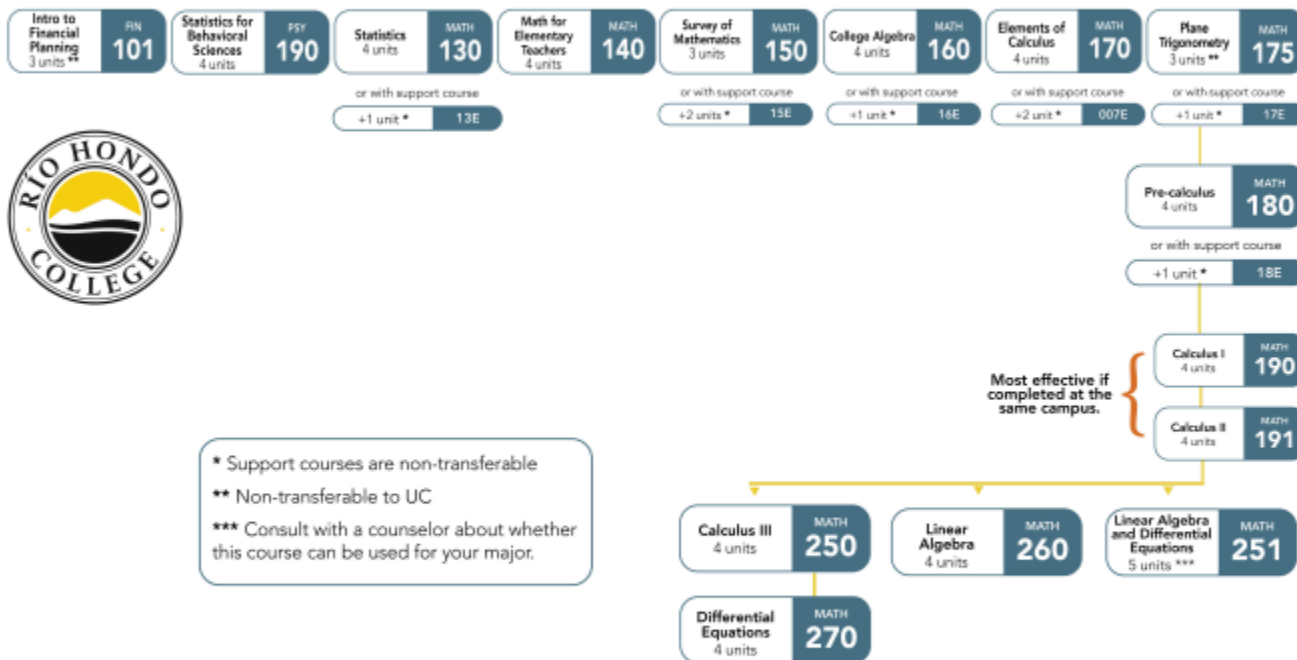

This course supports and reinforces on-the-job training in business and industrial establishments under the supervision of a

college instructor. Training is informed by learning objectives. Students work in a skilled or professional-level assignment in their area of vocational interest, and meet performance objectives related to instruction that are above and beyond the conditions of regular employment. This course is intended for students whose job is related to the field of

wildland fire technology and have completed or enrolled in the appropriate coursework. The course may be taken once and repeated for a maximum of 16 units. Contact the Work Experience Education Office regarding re-enrollment procedures.
Hours: 3 Lecture. 54-216 Lab.

MATH PATHWAYS

IMPORTANT
Consult with a counselor before choosing a path.
The math course selected will be determined by your college major.

It is essential for students to consult with a counselor on what classes to take at Rio Hondo College.

If you have any questions or concerns, please visit the Counseling Center in SS160 (Student Services Building) or by calling (562) 908-3410.

Please see a Counselor if you took the Advance Placement (AP) exam and your score was 3, 4, or 5 or took a college class at another college.

Please request transcripts from College Board to be mailed to Rio Hondo College Admissions and Records Office.

ALGEBRA I

Noncredit Certificate of Competency

Description

The Algebra I Noncredit Certificate of Competency is intended for individuals who wish to review the material in the secondary math curriculum, Algebra I, and satisfy one year of the three-year math requirement for high school students.

To acquire the **Noncredit Certificate of Competency in Algebra I**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 020	Review of Algebra I Part A	0.0
NBAS 021	Review of Algebra I Part B	0.0
		Total: 0.0

ALGEBRA II

Noncredit Certificate of Competency

Description

The Algebra II Noncredit Certificate of Competency is intended for individuals who wish to review the material in the secondary math curriculum, Algebra II, and satisfy one year of the three-year math requirement for high school students.

To acquire the **Noncredit Certificate of Competency in Algebra II**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 024	Review of Algebra II Part A	0.0
NBAS 025	Review of Algebra II Part B	0.0
		Total: 0.0

B.I.M. AND CADD TECHNOLOGY FOR ARCHITECTURE

Noncredit Certificate of Completion

Description

The B.I.M. (Building Information Modeling) and CADD (Computer Assisted Drafting & Design) Technology for Architecture Noncredit Certificate of Completion is intended for individuals who are interested in pursuing training in the use of CADD Technology within the architectural design and drafting fields.

To acquire the **Noncredit Certificate of Completion in B.I.M. (Building Information Modeling) and CADD (Computer Assisted Drafting & Design) Technology for Architecture**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NVOC 150	AutoCAD for Basic CADD Applications	0.0
NVOC 170	Microstation for Basic CADD Applications	0.0
NVOC 260	Advanced Architecture Using Revit and 3D Software	0.0
NVOC 261	Revit for Advanced BIM Architectural, Structural and MEP Applications	0.0
NVOC 280	Advanced MicroStation for CADD & BIM Applications	0.0
		Total: 0.0

CALIFORNIA PROPERTY TAXATION AND APPRAISAL

Noncredit Certificate of Completion

Description

The **Noncredit Certificate of Completion in California Property Taxation and Appraisal** certifies educational preparation for a specialized segment of the industry: property appraisal and assessment. The certificate comprises four courses: NBIZ 020 (Workforce Preparation), NBIZ 040 (Real Estate Principles), NBIZ 041 (Real Estate Appraisal), and NBIZ 050 (California Property Taxation and Assessment). The certificate

program was designed in consultation with the Los Angeles County Office of the Assessor (LACO) and Workforce Development for Aging and Community Services (WDACS) to meet the ongoing hiring needs for appraisers in public and private sectors.

To acquire the **Noncredit Certificate of Completion in California Property Taxation and Appraisal**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBIZ 020	Workforce Preparation: 21st Century Skills	0.0
NBIZ 040	Real Estate Principles	0.0
NBIZ 041	Real Estate Appraisal	0.0
NBIZ 050	California Property Taxation and Assessment	0.0
		Total: 0.0

CAREER EXPLORATION: GRAPHIC DESIGN

Noncredit Certificate of Completion

Description

The Graphic Design Noncredit Certificate of Completion is designed to inform and deliver a general understanding to students about the Graphic Design profession. Completion of the sequence of courses will inform students about the profession's general origins, basic processes, and possible academic and career pathways.

To acquire the **Noncredit Certificate of Completion in Career Exploration: Graphic Design**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NART 291	Career Exploration: Graphic Design I: History	0.0
NART 292	Career Exploration: Graphic Design II: Process	0.0
NART 293	Career Exploration: Graphic Design III: Academic Pathways	0.0
NART 294	Career Exploration: Graphic Design IV: Career Paths	0.0
		Total: 0.0

CIVIL DRAWING AND PRESSURE PIPING

Noncredit Certificate of Completion

Description

The Civil Drawing and Pressure Piping Noncredit Certificate of Completion is intended to improve employability or job placement opportunities in the field of civil engineering and design technology with specialization in pressure piping. Completion of the sequence of courses will prepare students for employment, provide for retraining/upgrading and prepare students for enrollment in advanced training programs in Civil Design technology.

To acquire the **Noncredit Certificate of Completion in Civil Drawing and Pressure Piping**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NVOC 140	Civil Drafting Fundamentals	0.0
NVOC 170	Microstation for Basic CADD Applications	0.0
NVOC 265	Pressure Piping Design	0.0
NVOC 266	Pressure Piping Applications	0.0
		Total: 0.0

COMMUNICATIONS FOR CAREER AND COLLEGE PREPARATION

Noncredit Certificate of Competency

Description

This program is designed to build foundational practices for successful college and career entry. Competencies include verbal and written communication, critical thinking, intercultural collaboration, growth mindset, and academic self-efficacy. Students gain knowledge and tools for successfully developing their academic, vocational, and personal goals.

To acquire the **Noncredit Certificate of Competency in Communications for Career and College Preparation**, it is necessary to complete the following courses:

Required	Units: 0.0
----------	------------

NCOM 012	Academic Enrichment	
NBIZ 020	Workforce Preparation: 21st Century Skills	0.0
		Total: 0.0

COMPUTER FUNDAMENTALS

Noncredit Certificate of Completion

Description

This certificate prepares students for effective use of the personal computer for essential household, educational, and business-related tasks. Students gain basic knowledge of computer hardware/software, files management, and IT literacy. Key competencies include the following: accessing and safely navigating the Internet, creating and managing a personal email account, keyboarding conventions, and producing basic word processing documents (including professional resumes).

To acquire the **Noncredit Certificate of Completion in Computer Fundamentals**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
None.		
NBIZ 001	Introduction to Computers	0.0
None		
NBIZ 002	Keyboarding and Word Processing	0.0
		Total: 0.0

COMPUTER SKILLS FOR BUSINESS I

Noncredit Certificate of Completion

Description

This certificate prepares students to use Microsoft Word and Microsoft Excel proficiently in business office support settings. Students gain the knowledge and practical skills needed to apply different functions in these computers programs to complete a variety of word processing and database-related tasks, including formatting business letters, creating mailing tools, producing informational and graphic flyers, generating tables and graphs, organizing and maintaining data on spreadsheets, and setting basic formulas for numeric calculations.

To acquire the **Noncredit Certificate of Completions in Computer Skills for Business I**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBIZ 003	Microsoft Word Essentials	0.0
NBIZ 004	Microsoft Excel Essentials	0.0
		Total: 0.0

COMPUTER SKILLS FOR BUSINESS II

Noncredit Certificate of Completion

Description

This certificate prepares students to proficiently use Microsoft Outlook, PowerPoint, and Access programs for a variety of applications in business and educational settings. Students gain knowledge and practical skills to apply appropriate program functions to complete a variety of communication and computing tasks, including email correspondence, digital file sharing and calendar management, and interactive visual presentation. Additionally, students learn to configure database tables, queries, and reports to support data management needs in organizational operations.

To acquire the **Noncredit Certificate of Completions in Computer Skills for Business II**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBIZ 005	Microsoft Outlook and Powerpoint	0.0
NBIZ 006	Microsoft Access Essentials	0.0
		Total: 0.0

ESL/FOUNDATIONAL ENGLISH AS A SECOND LANGUAGE

Noncredit Certificate of Competency

Description

Students who complete, in sequence, NESL 001-Beginning I and NESL 015-Beginning II earn the Certificate of Competency in Foundational English as a Second Language. The Certificate, approved by the Chancellor's Office, indicates a student's successful acquisition of essential English language skills necessary for short conversations and for reading/writing at the sentence level.

To acquire the **Noncredit Certificate of Competency in Foundational English as a Second Language**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NESL 001	ESL Beginning I	0.0
NESL 015	ESL Beginning II	0.0
		Total: 0.0

ESL/INTERMEDIATE ENGLISH AS A SECOND LANGUAGE

Noncredit Certificate of Competency

Description

Students who complete, in sequence, NESL 016-Intermediate I and NESL 017-Intermediate II, earn the Certificate of Competency in Intermediate English as a Second Language. The Certificate, approved by the Chancellor's Office, indicates a student's successful acquisition of English language skills necessary for extended conversations and for reading/writing at the paragraph level.

To acquire the **Noncredit Certificate of Competency in Intermediate English as a Second Language**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NESL 016	ESL Intermediate I	0.0
NESL 017	ESL Intermediate II	0.0
		Total: 0.0

ESL/ADVANCED ENGLISH AS A SECOND LANGUAGE

Noncredit Certificate of Competency

Description

Students who complete, in sequence, NESL 017-Intermediate II and NESL 018-Advanced I earn the Certificate of Competency in Advanced English as a Second Language. The Certificate, approved by the Chancellor's Office, indicates a student's successful acquisition of essential English language skills necessary for extended conversations in social and professional contexts and for reading/writing at the composition level for personal and academic purposes.

To acquire the **Noncredit Certificate of Competency in Advanced English as a Second Language**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NESL 017	ESL Intermediate II	0.0
NESL 018	ESL Advanced I	0.0
		Total: 0.0

ESL/ENGLISH AS A SECOND LANGUAGE FOR COLLEGE PREPARATION

Noncredit Certificate of Competency

Description

Students who complete, in sequence, NESL 018-Advanced I and NESL 019-Advanced II earn the Certificate of Competency in English as a Second Language for College Preparation. The Certificate, approved by the Chancellor's Office, indicates a student's successful acquisition of English language skills necessary for engaged participation in various academic programs at the college level.

To acquire the **Noncredit Certificate of Competency in English as a Second Language for College Preparation**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NESL 018	ESL Advanced I	0.0
NESL 019	ESL Advanced II: College Preparation	0.0
		Total: 0.0

FAMILY CHILD CARE HOME LICENSE PREPARATION

Noncredit Certificate of Completion

Description

This certificate prepares students to become a family childcare home provider. Students gain orientation to basic early childhood education principles as they relate to caring for the physical, cognitive, and emotional well-being of young children. The program provides guidance on the application procedures and regulation requirements for seeking the Family Child Care Home License.

To acquire the **Noncredit Certificate of Completion in Family Child Care Home License Preparation**, it is required to complete the following courses:

Required courses		Units: 0.0
NBSS 040	Family Child Care License Preparation, Nutrition, Safety and Preventative Health	0.0
NHSN 033	Pediatric First Aid CPR AED	0.0
		Total: 0.0

GEOMETRY

Noncredit Certificate of Competency

Description

The Geometry Noncredit Certificate of Competency is intended for individuals who wish to review the material in the secondary math curriculum, Geometry, and satisfy one year of the three-year math requirement for high school students.

To acquire the **Noncredit Certificate of Competency in Geometry**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 022	Review of Geometry Part A	0.0
NBAS 023	Review of Geometry Part B	0.0
		Total: 0.0

HEALTHCARE CAREER PREPARATION AND CPR/BASIC LIFE SUPPORT

Noncredit Certificate of Completion

Description

This foundational certificate is designed to orient students to career pathways in the healthcare field, and to prepare them to meet minimum requirements for entry-level employment in medical settings. Students assess compatibility with the healthcare vocation, chart individual educational plans, gain familiarity with common medical terminology, and receive CPR/basic life support training approved by the American Heart Association.

To acquire the **Noncredit Certificate of Completion in Healthcare Career Preparation and CPR/Basic Life Support**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NHSN 040	Healthcare Careers Exploration	0.0
NHSN 032	American Heart Association CPR BLS	0.0
NSCI 041	Basic Anatomy for Health Care	0.0
		Total: 0.0

INTEGRATED MATH I

Noncredit Certificate of Competency

Description

The Integrated Math I Noncredit Certificate of Competency is intended for individuals who wish to review the material in the secondary math curriculum, Integrated Math 1, and satisfy one year of the three-year math requirement for high school students.

To acquire the **Noncredit Certificate of Completion in Integrated Math I**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 014	Review of Integrated Math I Part A	0.0
NBAS 015	Review of Integrated Math I Part B	0.0
		Total: 0.0

INTEGRATED MATH II

Noncredit Certificate of Competency

Description

The Integrated Math II Noncredit Certificate of Competency is intended for individuals who wish to review the material in the secondary math curriculum, Integrated Math II, and satisfy one year of the three-year math requirement for high school students.

To acquire the **Noncredit Certificate of Completion in Integrated Math II**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 016	Review of Integrated Math II Part A	0.0
NBAS 017	Review of Integrated Math II Part B	0.0
		Total: 0.0

INTEGRATED MATH III

Noncredit Certificate of Competency

Description

The Integrated Math III Noncredit Certificate of Competency is intended for individuals who wish to review the material in the secondary math curriculum, Integrated Math III, and satisfy one year of the three-year math requirement for high school students.

To acquire the **Noncredit Certificate of Completion in Integrated Math III**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 018	Review of Integrated Math III Part A	0.0
NBAS 019	Review of Integrated Math III Part B	0.0
		Total: 0.0

MEDICAL BILLING SPECIALIST

Noncredit Certificate of Completion

Description

This certificate teaches students the principles and practices of filing medical insurance claims. Students receive training in basic diagnostic and outpatient procedural coding for provider documentations. An important element of the certificate is employment preparation. Students receive guidance in navigating job search resources, preparing application materials, and developing interview skills.

To acquire the **Noncredit Certificate of Completion in Medical Billing Specialist**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NHSN 044	Medical Insurance Claims	0.0
NHSN 045	Health Care Industry Employment Readiness	0.0
		Total: 0.0

MEDICAL OFFICE ASSISTANT

Noncredit Certificate of Completion

Description

This certificate teaches students professional office and communication skills appropriate for a medical business environment. Courses cover instruction and practice in task organization, customer service and patient interaction, telephone and email etiquette, Health Insurance Portability and Accountability Act (HIPAA) guidelines, electronic billing, and medical records management software.

To acquire the **Noncredit Certificate of Completion in Medical Office Assistant**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NHSN 042	Medical Office Procedure and Customer Service	0.0
NHSN 043	Medical Office Administration	0.0
		Total: 0.0

PARAMETRIC MODELING AND CADD TECHNOLOGY FOR MECHANICAL DESIGN

Noncredit Certificate of Completion

Description

The Parametric Modeling and CADD (Computer Assisted Drafting & Design) Technology for Mechanical Design Noncredit Certificate of Completion is intended for individuals who are interested in pursuing training in the use of CADD Technology within the mechanical design and drafting fields.

To acquire the **Noncredit Certificate of Completion in Parametric Modeling and CADD (Computer Assisted Drafting & Design) Technology for Mechanical Design**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NVOC 150	AutoCAD for Basic CADD Applications	0.0
NVOC 200	Intermediate AutoCAD for Design and Production	0.0
NVOC 250	Introduction to Parametric Modeling 3D Applications for Mechanical Design	0.0
NVOC 270	Advanced 3D Parametric Modeling and Prototype Applications	0.0
		Total: 0.0

PRE-ALGEBRA

Noncredit Certificate of Competency

Description

The Certificate of Competency in Pre-Algebra is an academic preparation certificate for a course of study in essential algebra skills for successful achievement in secondary math education. Students gain foundational knowledge of algebra and practice applying quantitative thinking processes to solving basic algebraic equations using the order of operations.

To acquire the **Noncredit Certificate of Competency in Pre-Algebra**, it is required to complete the following courses:

Required Courses		Units:
NBAS 060	Review of Pre-Algebra Part A	
NBAS 061	Review of Pre-Algebra Part B	
		Total: 0

PRECALCULUS I

Noncredit Certificate of Competency

Description

This academic preparation certificate is for a course of study in math analysis and trigonometry for successful achievement in advanced secondary math education. Students achieve proficiency in conceptual analyses of algebraic, polynomial, rational, logarithmic, exponential, trigonometric functions and their application to calculations. Students who complete the program are prepared to begin a course of study in calculus.

To acquire the **Noncredit Certificate of Competency in Precalculus I**, it is required to complete the following courses:

Required Courses		Units:
NBAS 026	Math Analysis	
NBAS 027	Trigonometry	
		Total: 0

PRECALCULUS II

Noncredit Certificate of Competency

Description

This academic preparation certificate is for a precalculus course of study in advanced integrated secondary math education. Students achieve proficiency in conceptual analyses of algebraic, polynomial, rational, logarithmic, exponential, trigonometric functions and their application to calculations. Students who complete the program are prepared to begin a course of study in calculus.

To acquire the **Noncredit Certificate of Competency in Precalculus II**, it is required to complete the following courses:

Required Courses		Units:
NBAS 028	Precalculus with Trigonometry Part A	
NBAS 029	Precalculus with Trigonometry Part B	
		Total: 0

PUBLIC SAFETY I

Noncredit Certificate of Completion

Description

The **Noncredit Certificate of Completion in Public Safety I** prepares students for a variety of entry-level positions in the field of public safety. Students gain an informed exploration of career pathways, educational requirements, and practical guidance through essential elements of employment readiness. This certificate is a foundational orientation for those seeking admission to a police academy.

To acquire the **Noncredit Certificate of Completion in Public Safety I**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NAJ 001	Public Safety Careers Exploration	0.0
NAJ 002	Public Safety Officer Employment Readiness: Oral Interview and Personal History	0.0
NAJ 003	Public Safety Officer Lifetime Wellness and Stress Management I	0.0
		Total: 0.0

PUBLIC SAFETY II

Noncredit Certificate of Completion

Description

The **Noncredit Certificate of Completion in Public Safety II** prepares students for a variety of entry-level positions in the field of public safety. Students acquire fundamental knowledge of laws of arrest, report writing, and managing physical agility and mental health to support successful employment in the public safety and services sector. This certificate provides a focused preparation for admission to a police academy and includes review of the Peace Officer Standards and Training (POST) Entry Level Law Enforcement Test Battery (PELLETB) test.

To acquire the **Noncredit Certificate of Completion in Public Safety II**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NAJ 004	Introduction to Laws of Arrest/Search and Seizure	0.0
NAJ 005	Fundamentals of Report Writing	0.0
NAJ 006	Public Safety Officer Lifetime Wellness and Stress Management II	0.0
NAJ 007	PELLETB: Exam Preparation	0.0
		Total: 0.0

REAL ESTATE PRACTICE AND FINANCE

Noncredit Certificate of Completion

Description

Students who successfully complete NBIZ 038 Real Estate Practice and NBIZ 039 Real Estate Finance (in any sequence) earn the Certificate of Completion in Real Estate Practice and Finance. The Certificate, approved by the California Community College Chancellor's Office, indicates a student's qualified fulfillment of the specified education units required for the California Real Estate Salesperson's License and the California Real Estate Broker License exams, as stipulated by the California Bureau of Real Estate.

To acquire the **Noncredit Certificate of Completion in Real Estate Practice and Finance**, it is necessary to complete the following courses.

Required Courses		Units: 0.0
NBIZ 038	Real Estate Practice	0.0
NBIZ 039	Real Estate Finance	0.0
		Total: 0.0

REAL ESTATE PRINCIPLES AND APPRAISAL

Noncredit Certificate of Completion

Description

Students who successfully complete NBIZ 040 Real Estate Principles and NBIZ 041 Real Estate Appraisal (in any sequence) earn the Certificate of Completion in Real Estate Principles and Appraisal. The Certificate, approved by the California Community College Chancellor's Office, indicates a student's qualified fulfillment of the specified education units required for the California Real Estate Salesperson's License and the California Real Estate Broker License exams, as stipulated by the California Bureau of Real Estate.

To acquire the **Noncredit Certificate of Completion in Real Estate Principles and Appraisal**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBIZ 040	Real Estate Principles	0.0
NBIZ 041	Real Estate Appraisal	0.0
		Total: 0.0

SECONDARY EDUCATION ENGLISH LANGUAGE ARTS I

Noncredit Certificate of Competency

Description

This is an academic preparation certificate for a course of study aligned with the English Language Arts (ELA) Framework for California Public Schools (secondary education). Students gain foundational knowledge and interpretative skills in English grammar and literature. Key competencies include the understanding of literary elements through the exploration of a variety of genres; applying active reading strategies for comprehension and interpretation; and writing compositions that integrate grammar, mechanics, enhanced vocabulary, and clarity of ideas.

To acquire the **Noncredit Certificate of Competency in Secondary Education English Language Arts I**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 050	English 1A	0.0
NBAS 051	English 1B	0.0
NBAS 052	English 2A	0.0
NBAS 053	English 2B	0.0
		Total: 0.0

SECONDARY EDUCATION ENGLISH LANGUAGE ARTS II

Noncredit Certificate of Competency

Description

This is an academic preparation certificate for a course of study aligned with the English Language Arts (ELA) Framework for California Public Schools (secondary education). Students gain critical thinking, writing, and analytical skills through the lens of American Literature. Key competencies include interpreting and discussing texts from varied perspectives, conducting and synthesizing research from multiple sources, and the applied use of literary devices and rhetorical strategies for written compositions to demonstrate a command of standard American English language conventions.

To acquire the **Noncredit Certificate of Competency in Secondary Education English Language Arts II**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 054	English 3A	0.0
NBAS 055	English 3B	0.0
		Total: 0.0

SECONDARY EDUCATION SCIENCE

Noncredit Certificate of Competency

Description

This is an academic preparation certificate for a course of study aligned with the Science Framework for California Public Schools (secondary education). Students gain foundational and applied knowledge of life and physical science. Key content areas include the nature of science and experimentation, biological hierarchy, the chemistry of living things, matter and its interactions, and an introduction to organic chemistry.

To acquire the **Noncredit Certificate of Competency in Secondary Education Science**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 030	Biology: Living Earth Systems I	0.0
NBAS 031	Biology: Living Earth Systems II	0.0
NBAS 032	Chemistry I	0.0
NBAS 033	Chemistry II	0.0
		Total: 0.0

SECONDARY EDUCATION SOCIAL SCIENCE I

Noncredit Certificate of Competency

Description

This is an academic preparation certificate for a course of study aligned with the Social Studies Framework for California Public Schools (secondary education). Students gain a foundational overview and contextual knowledge of United States and world history through the lens of significant events, themes, topics, and people in particular periods.

To acquire the **Noncredit Certificate of Competency in Secondary Education Social Science I**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 040	World History I: 1750-1918	0.0
NBAS 041	World History II: 1918-Present	0.0
NBAS 042	U.S. History I: Origins of the American Republic -1945	0.0
NBAS 043	U.S. History II: 1945-Present	0.0
		Total: 0.0

SECONDARY EDUCATION SOCIAL SCIENCE II

Noncredit Certificate of Competency

Description

This is an academic preparation certificate for a course of study aligned with the Social Studies Framework for California Public Schools (secondary education). Students gain foundational and applied knowledge of American government and economics. Key content areas include the principles of American democracy, political systems, financial markets, and international trade.

To acquire the **Noncredit Certificate of Competency in Secondary Education Social Science II**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NBAS 044	American Government	0.0
NBAS 045	Principles of Economics	0.0
		Total: 0.0

SECONDARY EDUCATION VISUAL ARTS

Noncredit Certificate of Competency

Description

This is an academic preparation certificate for a course of study aligned with the Visual and Performing Arts Framework for California Public Schools (secondary education). Students engage in creating and understanding expressive works of art.

To acquire the **Noncredit Certificate of Competency in Secondary Education Visual Arts**, it is necessary to complete the following courses:

Required Courses		Units: 0.0
NART 001	Art Expressions I: Creative Process and Art Interpretation	
NART 002	Art Expressions II: Art History and Contemporary Imagination	
		Total: 0.0

SOCIAL SERVICES CAREER PREPARATION

Noncredit Certificate of Completion

Description

The Noncredit Certificate of Completion in Social Services Career Preparation is a pre-employment training program that provides foundational knowledge and practical skills for successful entry into rewarding careers in the social services sector. Students are introduced to essential principles and best practices of client-centered case management and gain contextualized job training that includes trauma-informed care, mental health first aid, and human management integration system.

To acquire the **Noncredit Certificate of Completion in Social Services Career Preparation**, it is required to complete the following courses:

Required Courses		Units: 0.0
NBIZ 020	Workforce Preparation: 21st Century Skills	0.0
NBSS 060	Social Services Career Exploration	0.0
		Total: 0.0

NONCREDIT COURSES

Administration of Justice

NAJ 008

Fundamentals of Law Enforcement

Units: 0

This course is designed to provide law enforcement students or those involved in a related public service subject to expand on their knowledge in the major points of law enforcement. Topics include history and general development of law enforcement, ethical and moral standards, California law, and other related issues. Students will receive individualized instruction tailored to their plan of study.

Hours: 0 Lecture. 1-500 Lab.

Arts & Cultural Programs

NART 001

Art Expressions I: Creative Process and Art Interpretation

Units: 0

This college preparatory course engages students in creating and understanding expressive works of art. Students develop skills in creative thinking and articulating a vision or point of view through original artistic expressions. Students gain foundational drawing and painting techniques to support their artistic expressions and are introduced to basic aesthetic principles for interpreting works of art.

Hours: 22-100 Lecture. 0 Lab.

NART 002

Art Expressions II: Art History and Contemporary Imagination

Units: 0

This college preparatory course engages students in creating and understanding expressive works of art. Students gain an overview of major movements in art history and study important works of art that expand the contemporary imagination. Students learn various techniques and the use of media, materials, and equipment, gaining a broad understanding of art historical references in order to give increased depth to their own creative expression. Students reflect on their own artwork and respond to the artwork of others through writing and discussion.

Hours: 22-100 Lecture. 0 Lab.

NART 005

Theatre Production Workshop

Units: 0

This course will introduce students to all aspects of preparing for and presenting a full theater production. Topics covered will include technical set-up of the stage, the dress rehearsal, pre-show preparation, techniques for striking the set and the special needs of a traveling show.

Hours: 18-24 Lecture. 36-72 Lab.

NART 175

Animation Skills Development

Units: 0

Advisory: READ 022 or appropriate placement; knowledge of using Maya and

Unreal Engine software that may be used in any ANIM course.

This course complements ANIM lab and lecture courses. It is designed to provide an additional opportunity for students to practice concepts covered in ANIM lab and lecture courses and to enhance their animation work in preparation for their portfolios or demo reels. Such instructional activities are not available in the regular lab and lecture courses, and are not required for a grade in the courses. It is recommended that students have previously or are currently enrolled in any Río Hondo College Animation course that has a prefix of ART or ANIM.

Hours: 3 Lab.

NART 285

Graphic Design Skills Development

Units: 0

It is advised that students be able to engage in written composition at a college level and read college-level texts.

This course complements the graphic design (GDSN) lab and lecture courses. The course is designed to provide an additional opportunity for students to practice concepts covered in the lab and lecture courses, and to enhance their graphic design work in as part of portfolio preparation. These instructional activities are not available in the regular lecture / lab courses and are not required for the grade in the courses. It is recommended that students have previously or are currently enrolled in any Río Hondo College graphic design course with a prefix of ART or GDSN.

Hours: 0 Lecture. 1-400 Lab.

NART 291

Career Exploration: Graphic Design I: History

Units: 0

It is advised that students be able to read college-level texts.

This course is intended for students interested in the exploration of a career in Graphic Design. This course is the first in a series of 4 courses and is an abbreviated survey of the origins of the graphic design profession from the development of western printing technology, through the Industrial Revolution into the modern Digital Era.

Hours: 12 Lecture. 0 Lab.

NART 292

Career Exploration: Graphic Design II: Process

Units: 0

It is advised that students be able to read college-level texts.

This course is intended for students interested in the exploration of a career in graphic design. This course is the second in a series of 4 courses and is an overview of the practices and tasks involved in the process of developing a graphic design solution.

Hours: 12 Lecture. 0 Lab.

NART 293

Career Exploration: Graphic Design III: Academic Pathways

Units: 0

It is advised that students be able to read college-level texts.

This course is intended for students interested in the exploration of a career in graphic design. This course is the third in a series of 4

courses and is an overview of the academic pathways available to students interested in the graphic design profession.

Hours: 12 Lecture. 0 Lab.

NART 294

Career Exploration: Graphic Design IV: Career Paths

Units: 0

It is advised that students be able to read college-level texts.

This course is intended for students interested in the exploration of a career in graphic design. This course is the fourth in a series of 4 courses and is an overview of the general career pathways available to students interested in the graphic design profession.

Hours: 12 Lecture. 0 Lab.

Basic Skills

NBAS 009

Supervised Tutoring in College Courses

Units: 0

This course provides students with the tools they need to excel in their courses. Trained tutors individually help students attain higher levels of comprehension and competency by providing supplemental instruction for pre-approved subjects. Workshops enhance student learning. The course is open-entry/open-exit.

Hours: 0 Lecture. 1-360 Lab.

NBAS 010

Supervised Tutoring in Mathematics

Units: 0

Trained tutors will individually help students who need assistance in attaining comprehension and competency in mathematical learning skills. This course is designed to supplement the instruction in mathematics courses and other courses with mathematical content. This course is open-entry/open-exit.

Hours: 0 Lecture. 1-360 Lab.

NBAS 014

Review of Integrated Math I Part A

Units: 0

Enrollment requires one semester of Integrated Math I. Completion of 8th grade mathematics is recommended.

This course is a review of the first half of Integrated Math I, a year-long course in which students formalize and extend the mathematics they learned in the middle grades. The course includes topics and content described in the Mathematics I course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability.

Hours: 22-100 Lecture. 0 Lab.

NBAS 015

Review of Integrated Math I Part B

Units: 0

Enrollment requires one semester of Integrated Math I. Completion of eighth grade mathematics is also recommended.

This course is a review of the second half of Integrated Math I, a year-long course in which students formalize and extend the mathematics they learned in the middle grades. The course includes topics and content described in the Mathematics I

course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability. Hours: 22-100 Lecture. 0 Lab.

NBAS 016

Review of Integrated Math II Part A

Units: 0

Enrollment requires one semester of Integrated Math II. Completion of Integrated Math I is also recommended.

This course is a review of the first half of Integrated Math II, a year-long course with an emphasis on quadratic expressions, equations, and functions, and which compares their characteristics and behavior to those of linear and exponential relationships from Integrated Mathematics I. The course includes topics and content described in the Mathematics II course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability.

Hours: 22-100 Lecture. 0 Lab.

NBAS 017

Review of Integrated Math II Part B

Units: 0

Enrollment requires one semester of Integrated Math II. Completion of Integration Math I is also recommended

This course is a review of the second half of Integrated Math II, a year-long course with an emphasis on quadratic expressions, equations, and functions, and which compares their characteristics and behavior to those of linear and exponential relationships from Integrated Mathematics I. The course includes topics and content described in the Mathematics II course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability.

Hours: 22-100 Lecture. 0 Lab.

NBAS 018

Review of Integrated Math III Part A

Units: 0

Enrollment requires one semester of Integrated Math III. Completion of Integrated Math II is also recommended.

This course is a review of the first half of Integrated Math III, a year-long course in which students integrate and apply the mathematics they have learned from their earlier courses. The course includes topics and content described in the Mathematics III course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability.

Hours: 22-100 Lecture. 0 Lab.

NBAS 019

Review of Integrated Math III Part B

Units: 0

Enrollment requires one semester of Integrated Math III. Integrated Math II is also recommended.

This course is a review of the first half of Integrated Math III, a year-long course in which students integrate and apply the mathematics they have learned from their earlier courses. The course includes topics

and content described in the Mathematics III course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability. Hours: 22-100 Lecture. 0 Lab.

NBAS 020

Review of Algebra I Part A

Units: 0

Enrollment requires one semester of Algebra I. Completion of eighth grade mathematics is also recommended.

This course is a review of the first half of Algebra I, a year-long course in which students formalize and extend the mathematics they learned in the middle grades. The course includes topics and content described in the Algebra I course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability.

Hours: 22-100 Lecture. 0 Lab.

NBAS 021

Review of Algebra I Part B

Units: 0

Enrollment requires one semester of Algebra I. Completion of eighth grade mathematics is also recommended.

This course is a review of the second half of Algebra I, a year-long course in which students formalize and extend the mathematics they learned in the middle grades. The course includes topics and content described in the Algebra I course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability.

Hours: 22-100 Lecture. 0 Lab.

NBAS 022

Review of Geometry Part A

Units: 0

Enrollment requires one semester of Geometry. Completion of Algebra I is also recommended.

This course is a review of the first half of Geometry, a year-long course in which students formalize and extend their geometric experiences from the middle grades. The course includes topics and content described in the Geometry course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability, covering the domains of portions of Congruence, portions of Similarity, Right Triangles, and Trigonometry, and portions of Modeling with Geometry.

Hours: 22-100 Lecture. 0 Lab.

NBAS 023

Review of Geometry Part B

Units: 0

Enrollment requires one semester of Geometry. Completion of Algebra I is also recommended.

Advisory: Algebra I

This course is a review of the second half of Geometry, a year-long course in which students formalize and extend their geometric experiences from the middle grades. The course includes topics and

content described in the Geometry course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability, covering the domains of portions of Congruence, portions of Similarity, Right Triangles, and Trigonometry, and portions of Modeling with Geometry.

Hours: 22-100 Lecture. 0 Lab.

NBAS 024

Review of Algebra II Part A

Units: 0

Enrollment requires one semester of Algebra II. Completion of Geometry is also recommended.

This course is a review of the first half of Algebra II, a year-long course in which students build on their work with linear, quadratic, and exponential functions, and extend their repertoire of functions to include logarithmic, polynomial, rational, and radical functions. The course includes topics and content described in the Algebra II course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability.

Hours: 22-100 Lecture. 0 Lab.

NBAS 025

Review of Algebra II Part B

Units: 0

Enrollment requires one semester of Algebra II. Completion of Geometry is also recommended.

Advisory: Geometry

This course is a review of the second half of Algebra II, a year-long course in which students build on their work with linear, quadratic, and exponential functions, and extend their repertoire of functions to include logarithmic, polynomial, rational, and radical functions. The course includes topics and content described in the Algebra II course from the Common Core State Standards under the conceptual categories of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability.

Hours: 22-100 Lecture. 0 Lab.

NBAS 026

Math Analysis

Units: 0

Enrollment requires both semesters of Algebra II or Integrated Math III, with a grade of C or better, or approval of Mathematics Department Chairperson.

This course covers the first half of Math Analysis, a year-long study of elementary functions (including linear, quadratic, polynomial, rational, exponential, and logarithmic functions), trigonometry (including trigonometric functions, analytical geometry, sequences and series), conics, and related topics that provide students with the kind of preparation required for college mathematics. The course may be used for the purpose of helping students make up credit and/or improve the grade from a prior attempt at the course. The course covers portions of the Common Core State Standards domains that fall under the conceptual categories of Number and Quantity, Algebra, Functions, Modeling, and Geometry, including Seeing Structure in

Expressions, Arithmetic with Polynomials and Rational Expressions, Creating Equations, Interpreting Functions, Building Functions, Trigonometric Functions, Reasoning with Equations and Inequalities, and The Complex Number System.

Hours: 70-90 Lecture. 0 Lab.

NBAS 027

Trigonometry

Units: 0

Enrollment requires successful completion of Math Analysis part A, and both semesters of Algebra II or Integrated Math III, with a grade of "C" or better, or approval of Mathematics Department Chairperson.

This course covers the second half of Math Analysis, a year-long study of elementary functions (including linear, quadratic, polynomial, rational, exponential, and logarithmic functions), trigonometry (including trigonometric functions, analytical geometry, sequences and series), conics, and related topics that provide students with the kind of preparation required for college mathematics. The course may be used for the purpose of helping students make up credit and/or improve the grade from a prior attempt at the course. The course covers portions of the Common Core State Standards domains that fall under the conceptual categories of Number and Quantity, Algebra, Functions, Modeling, and Geometry, including Seeing Structure in Expressions, Arithmetic with Polynomials and Rational Expressions, Creating Equations, Interpreting Functions, Building Functions, Trigonometric Functions, Reasoning with Equations and Inequalities, and The Complex Number System.

Hours: 70-90 Lecture. 0 Lab.

NBAS 028

Precalculus with Trigonometry Part A

Units: 0

Enrollment requires both semesters of Algebra II or Integrated Math III, with a grade of "C" or better, or approval of Mathematics Department Chairperson.

This course covers the first half of Precalculus with Trigonometry, a year-long study of elementary functions (including linear, quadratic, polynomial, rational, exponential, and logarithmic functions), trigonometry (including trigonometric functions, analytical geometry, linear systems, vectors, sequences, and series), conics, and related topics that provide students with the kind of preparation required for college mathematics. The course may be used for the purpose of helping students make up credit and/or improve the grade from a prior attempt at the course. The course covers portions of the Common Core State Standards domains that fall under the conceptual categories of Number and Quantity, Algebra, Functions, Modeling, and Geometry, including Seeing Structure in Expressions, Arithmetic with Polynomials and Rational Expressions, Creating Equations, Interpreting Functions, Building Functions, Trigonometric Functions, Reasoning with Equations and Inequalities, and The Complex Number System.

Hours: 70-90 Lecture. 0 Lab.

NBAS 029

Precalculus with Trigonometry Part B

Units: 0

Enrollment requires successful completion of Precalculus with Trigonometry part A, and both semesters of Algebra II or Integrated Math III, with a grade of C or better, or approval of Mathematics Department Chairperson.

This course covers the second half of Precalculus with Trigonometry, a year-long study of elementary functions (including linear, quadratic, polynomial, rational, exponential, and logarithmic functions), trigonometry (including trigonometric functions, analytical geometry, linear systems, vectors, sequences, and series), conics, and related topics that provide students with the kind of preparation required for college mathematics. The course may be used for the purpose of helping students make up credit and/or improve the grade from a prior attempt at the course. The course covers portions of the Common Core State Standards domains that fall under the conceptual categories of Number and Quantity, Algebra, Functions, Modeling, and Geometry, including Seeing Structure in Expressions, Arithmetic with Polynomials and Rational Expressions, Creating Equations, Interpreting Functions, Building Functions, Trigonometric Functions, Reasoning with Equations and Inequalities, and The Complex Number System.

Hours: 70-90 Lecture. 0 Lab.

NBAS 030

Biology: Living Earth Systems I

Units: 0

This course is part of the credit recovery instructional program developed in partnership with Rio Hondo College Continuing Education, Rio Hondo College Student Success, and El Rancho High School. The credit recovery program supports students seeking to complete secondary education requirements for college preparation. This course and its successor (NBAS 031) align with the Science Framework for California Secondary Education and fulfill the minimum requirement for two courses in science (biological and physical sciences) for the high school diploma or its equivalent (i.e., a GED).

Hours: 22-100 Lecture. 0 Lab.

NBAS 031

Biology: Living Earth Systems II

Units: 0

This course is part of the credit recovery instructional program developed in partnership with Rio Hondo College Continuing Education, Rio Hondo College Student Success, and El Rancho High School. The credit recovery program supports students seeking to complete secondary education requirements for college preparation. This course and its precursor (NBAS 030) align with the Science Framework for California Secondary Education and fulfill the minimum requirement for two courses in science (biological and physical sciences) for the high school diploma or its equivalent (i.e., a GED).

Hours: 22-100 Lecture. 0 Lab.

NBAS 032

Chemistry I

Units: 0

This physical science course introduces students to the fundamental nature of matter and its interactions. Topics include atomic and electronic structure, the nomenclature of compounds, chemical calculations, stoichiometry, bonding and shapes of molecules, and chemical reactions. Relevant laboratory exercises are an essential component of the course.

Hours: 22-100 Lecture. 0 Lab.

NBAS 033

Chemistry II

Units: 0

This physical science course introduces students to matter and its interactions. Topics include a detailed study of gases, liquids, solids, and intermolecular forces; solutions; properties and reactions of acids and bases; oxidation-reduction reactions and electrochemistry; chemical equilibrium; organic chemistry; and biochemistry. Relevant laboratory exercises are an essential component of the course.

Hours: 22-100 Lecture. 0 Lab.

NBAS 040

World History I: 1750-1918

Units: 0

This course examines the significant events, themes, topics, and people that comprise world history from 1750 to 1918. The course explores the diversity of experiences, struggles, and triumphs that occurred across the globe throughout this period.

Hours: 22-100 Lecture. 0 Lab.

NBAS 041

World History II: 1918-Present

Units: 0

This course examines the significant events, themes, topics, and people that comprise world history from 1918 to the present. The course explores the diversity of experiences, struggles, and triumphs that occurred across the globe throughout this period.

Hours: 22-100 Lecture. 0 Lab.

NBAS 042

U.S. History I: Origins of the American Republic -1945

Units: 0

This course examines the significant events, themes, topics, and people that comprise the history of the United States from the origins of the early republic to 1945. Students gain a broad view of U.S. history by exploring the diversity of experiences, struggles, and triumphs that occurred in the nation throughout this period.

Hours: 22-100 Lecture. 0 Lab.

NBAS 043

U.S. History II: 1945-Present

Units: 0

This course examines the significant events, themes, topics, and people that comprise the history of the United States from 1945 to the present. Students gain a broad view of U.S. history by exploring the diversity of experiences, struggles, and triumphs that occurred in the nation throughout this period.

Hours: 22-100 Lecture. 0 Lab.

NBAS 044

American Government

Units: 0

This course surveys and analyzes the origins, principles, institutions, policies, and politics of U.S. federal and California state governments, including their constitutions. Emphasis is placed on the rights and responsibilities of citizens, and an understanding of the political processes and issues involved in the workings of government.

Hours: 22-100 Lecture. 0 Lab.

NBAS 045**Principles of Economics****Units: 0**

This course is an introduction to the basic principles of economics. It is designed to orient students to an economic way of thinking in order to understand microeconomic concepts such as economic systems, demand and supply for goods, markets for goods and labor, business operations, and financial investment decisions. As a secondary focus, students are exposed to macroeconomic concepts such as economic growth, inflation, unemployment, government policies, and the global economy.

Hours: 22-100 Lecture. 0 Lab.

NBAS 050**English 1A****Units: 0**

This course provides a foundational understanding of literary elements through the exploration of short stories, drama, and nonfiction articles. Students develop reading strategies and apply the writing process to compose essays that demonstrate use of precise language, rhetorical devices, and domain-specific vocabulary.

Hours: 22-100 Lecture. 0 Lab.

NBAS 051**English 1B****Units: 0**

This course expands on the foundational understanding of literary elements. Students are introduced to strategies for close reading of texts and writing expository and argumentative compositions. Students apply rhetorical methods to explore themes in works of literature and apply the writing process to compose essays that demonstrate an organization of ideas supported by textual evidence.

Hours: 22-100 Lecture. 0 Lab.

NBAS 052**English 2A****Units: 0**

In this course, students explore a variety of literary genres such as novels, short stories, drama, and non-fiction articles to bolster reading comprehension, analytical skills, grammar and mechanics, and vocabulary enhancement. Students develop critical reading skills and deploy rhetorical strategies for using words with greater nuance, agility, and influence.

Hours: 22-100 Lecture. 0 Lab.

NBAS 053**English 2B****Units: 0**

In this course, students explore a variety of genres such as novels, short stories, drama, and non-fiction articles to refine critical

reading comprehension, analytical skills, grammar and mechanics, and vocabulary enhancement. Students synthesize interpretations from multiple text sources and develop a research-supported composition.

Hours: 22-100 Lecture. 0 Lab.

NBAS 054**English 3A****Units: 0**

In this course, students develop critical thinking, writing, and analytical skills through the lens of American literature.

Students integrate language skills development with inquiries in the geopolitical, intellectual, and philosophical characteristics of major movements within the American diaspora.

Hours: 22-100 Lecture. 0 Lab.

NBAS 055**English 3B****Units: 0**

In this course, students refine critical thinking, writing, and analytical skills through the lens of American literature. Students integrate language skills development with inquiries in the aesthetics of realism and naturalism, as well as the modernist and contemporary periods in American literature.

Hours: 22-100 Lecture. 0 Lab.

NBAS 060**Review of Pre-Algebra Part A****Units: 0**

This course is designed primarily for students who know the fundamentals of arithmetic but have little or no background in algebra.

The course strengthens students' arithmetic skills and prepares students for algebra by introducing them to the fundamental principles of the real number system, solving linear equations, and graphing linear equations.

Hours: 22-100 Lecture. 0 Lab.

NBAS 061**Review of Pre-Algebra Part B****Units: 0**

This course is designed primarily for students who know the fundamentals of arithmetic but have little or no background in algebra. The course strengthens students' arithmetic skills and prepares students for algebra by introducing them to functions, systems of equations, basic geometric concepts and skills, and the basics of probability and statistics.

Hours: 22-100 Lecture. 0 Lab.

Business

NBIZ 001**Introduction to Computers****Units: 0**

This course is designed to enable efficient operation of the alphanumeric keyboard on a computer. Common keyboarding techniques are applied to develop speed and accuracy. Students create typed document files and learn editing/formatting functions on Microsoft® Word® and a variety of word processing programs in order to prepare school assignments, personal and essential business correspondence.

Hours: 20-40 Lecture. 0 Lab.

NBIZ 002**Keyboarding and Word Processing****Units: 0**

This course is designed to enable efficient operation of the alphanumeric keyboard on a computer. Common keyboarding techniques are applied to develop speed and accuracy. Students create typed document files and learn editing/formatting functions in order to prepare school assignments and personal and business correspondences.

Hours: 20-40 Lecture. 0 Lab.

NBIZ 003**Microsoft Word Essentials****Units: 0**

This course prepares students for independent and confident use of Microsoft Word. Students will create documents applying to a variety of editing features including the following: adjusting margins and tab settings; copying, pasting, moving texts; formatting layout; running the integrated grammar and spelling review; modifying header and footer areas; creating tables and graphs. Students will prepare a variety of documents for school and office environments, including creating a professional resume.

Hours: 24-48 Lecture. 0 Lab.

NBIZ 004**Microsoft Excel Essentials****Units: 0**

This course is an orientation to the primary functions of spreadsheets for data management using Microsoft® Excel®. Topics include creating cell data, formatting cells and worksheets, and applying formulas and functions. Students will learn how to analyze and organize data, present data visually by creating charts, and manage the worksheet and workbook environment.

Hours: 24-48 Lecture. 0 Lab.

NBIZ 005**Microsoft Outlook and Powerpoint****Units: 0**

In this course, students gain skills necessary for dynamic uses of Microsoft Outlook and Microsoft PowerPoint for personal, school, or work-related contexts. Students explore various features of email communication, digital files sharing, and calendar management in Outlook, and learn how to create animated electronic presentations using PowerPoint tools. Students practice by making a presentation with supporting visual slides.

Hours: 24 Lecture. 0 Lab.

NBIZ 006**Microsoft Access Essentials****Units: 0**

In this course, students learn to use Microsoft Access, a widely used database management system in business environments. Students learn design guidelines for developing database structures in order to customize tables, queries, forms, and reports for various business needs. Students learn to edit tables, design and establish query criteria, customize forms, and format reports for professional printouts.

Hours: 24 Lecture. 0 Lab.

NBIZ 007

Introduction to Information Systems

Units: 0

This course introduces students to computer concepts and information systems that support the productive use of digital technology for a variety of personal and work-related tasks. Designed for students with limited computer experience, the course provides orientation to common operating systems and applications useful for online communication, digital media sharing, and personal data organization, including personal finance management. Attention is given to Internet navigation safety, information privacy, and digital security protections.

Hours: 12-24 Lecture. 12-24 Lab.

NBIZ 008

Information Systems for Business

Units: 0

This course provides a fundamental understanding of how information technology is used in business to develop and maintain efficient, accessible, and strategic operations. Students are introduced to essential concepts in business information systems and gain familiarity with data management systems for supporting communication, networking, and business planning. The course also provides practical orientation to career entry in the technology industry and guidance for exploring opportunities for training, certification, and job placement.

Hours: 12-24 Lecture. 12-24 Lab.

NBIZ 020

Workforce Preparation: 21st Century Skills

Units: 0

This course orients students to essential capacities for professional and collegial workplace performance: critical thinking, communication, collaboration, and cultural humility. Additionally, students gain practical guidance in resumé composition and job interview preparation.

Hours: 15-30 Lecture. 0 Lab.

NBIZ 038

Real Estate Practice

Units: 0

This class is an introduction to the professional aspects of the real estate industry. The focus of the course is on the agency responsibilities of a salesperson, including office management, listing and prospecting property, selling and marketing techniques, advertising, securing loans, and closing procedures. Students also acquire general knowledge of other pertinent fields as they relate to real estate, including finance, appraisal, escrow, and investing. This course is approved by the California Department of Real Estate (DRE) to fulfill education requirements for the California Real Estate Salesperson License, and may be applied toward the California Real Estate Broker License requirements. Taken in sequence with Real Estate Finance (NBIZ 039), students can earn the Certificate of Completion in Real Estate Practice and Finance.

Hours: 48 Lecture. 0 Lab.

NBIZ 039

Real Estate Finance

Units: 0

This course is designed to help the pre- and new licensee, the experienced real estate agent, the investor, and the lender gain a better understanding of the complex world of real estate finance. It covers all aspects of real estate financing from completing loan applications, navigating the escrow process, to closing loans. The course details current lending policies, qualifying standards, and disclosure requirements. This course is approved by the California Department of Real Estate (DRE) to meet the elective education requirements for the California Real Estate Salesperson License and the California Real Estate Broker License. Taken in sequence with NBIZ 038, students earn the Certificate of Completion in Real Estate Practice and Finance.

Hours: 48 Lecture. 0 Lab.

NBIZ 040

Real Estate Principles

Units: 0

This is a foundational real estate course that covers the basic laws and principles of land and property transactions. Course topics include overview of property laws, land descriptions, titles, acquisition and transfer, liens and encumbrances, taxation, contract law, landlord and tenant laws, and real estate mathematics and finance. Students will become familiar with terminology and forms commonly used in everyday real estate transactions. This course is approved by the California Department of Real Estate (DRE) to fulfill education requirements for the California Real Estate Salesperson License. Taken in sequence with NBIZ 041, students earn the Certificate of Completion in Real Estate Principles and Appraisal.

Hours: 48 Lecture. 0 Lab.

NBIZ 041

Real Estate Appraisal

Units: 0

This course provides a comprehensive overview of real estate appraisal principles and procedures. Topics include land values and their characteristics, the process of appraising, capitalization theory, site analysis, and construction methods. Students gain guided practice in accrued depreciation analysis, income and expense analysis, and techniques in the income approach method of appraising. This course is approved by the California Department of Real Estate (DRE) to meet the elective education requirements for the California Real Estate Salesperson License and the California Real Estate Broker License. Taken in sequence with NBIZ 040, students earn the Certificate of Completion in Real Estate Principles and Appraisal.

Hours: 48 Lecture. 0 Lab.

NBIZ 050

California Property Taxation and Assessment

Units: 0

This course provides students with a fundamental knowledge of California's property tax system for assessing purposes. The course provides students with an overview of Proposition 13, who apply its provisions to various property assessment situations, including appraisals, changes in ownership, exemptions, and assessment appeals.

Hours: 24 Lecture. 0 Lab.

Behavioral Social Sciences

NBSS 040

Family Child Care License Preparation, Nutrition, Safety and Preventative Health

Units: 0

This course provides the information needed to comply with Title 22 requirements to secure a Family Child Care license from the Department of Social Services Child Care Licensing Program. Topics include buildings, grounds, personnel requirements, and operation of a family child care facility. The course also includes licensing-required training related to nutrition, preventative health, and safety.

Hours: 40 Lecture. 0 Lab.

NBSS 060

Social Services Career Exploration

Units: 0

This course is designed as a pre-employment training for rewarding careers in the social services sector. Students gain an overview of career pathways in the field and receive contextualized training for employment as case managers, peer specialists, and community outreach workers in government and nonprofit agencies. Topics include client integrated support, intervention and advocacy, mental health, trauma-informed care, effective engagement, and data entry training (Human Management Integration System). Job search and placement assistance is integrated in the course.

Hours: 50-150 Lecture. 0 Lab.

Health and Safety

NCHS 001

Health and Fitness

Units: 0

This is an open-entry, open-exit course to develop and enhance a student's knowledge of the importance of healthy lifestyles and to further develop skills which will facilitate a personal fitness program. Student's will also participate in specific activities that develop an individual's level of physical fitness.

Hours: 0 Lecture. 1-54 Lab.

NCHS 002

Beginning Jujitsu: Self Defense for Adults

Units: 0

This course is designed to teach the basic skills of self-defense. Students will be taught skills related to coordination, quick reflex response, how to build stamina, speed, and strength. They will learn all phases of punches, blocks, kicks, hand releases and breaks, two-step fighting, judo and jujitsu falls. Students will practice strategies of protecting themselves from attackers.

Hours: 48 Lecture. 0 Lab.

Citizenship

NCIT 002

US Citizenship Preparation

Units: 0

This course is designed to assist eligible individuals in completing the steps required to become United States citizens. Students

gain knowledge of United States history, government and institutions, community services and agencies, and the privileges and obligations of citizenship. The course prepares students with literacy skills necessary to pass the written test and provides listening and speaking practices for the oral interview. Students will receive guidance on completing appropriate application forms.
Hours: 45 Lecture. 0 Lab.

Older Adults

NCOA 001

Painting for Older Adults

Units: 0

This course offers the older adult an individual approach to painting and creative arts. Topics may include art appreciation and art history; awareness of line, color, shape and form; techniques in drawing and progression through color mixing and canvas painting. Creativity and general art knowledge will be taught in a friendly and relaxed environment allowing each artist to work at their own pace.
Hours: 16-48 Lecture. 0 Lab.

NCOA 007

Chorus Singing for Older Adults

Units: 0

Enrollment requires a placement interview with the instructor to be placed in the most appropriate vocal section.

This course introduces older adult students to a variety of choral music and explores its cultural and historical aspects as well as tuning and musicality. Students learn the foundations of singing, including proper posture, breath support, healthy vocal fold vibration, optimal resonance, articulation, diction, and stage presence. No previous musical experience is necessary.
Hours: 32-64 Lecture. 0 Lab.

NCOA 010

Principles of Mind and Body Health for Older Adults I: Flexibility and Balance

Units: 0

This course provides older adults with instruction and resources for cultivating mind and body health. Guided instruction in active and passive yoga poses, stretching movements, and breathing exercises adapted for older adults is incorporated with introduction to the philosophy of Hatha Yoga. The course includes presentations and class discussions on current topics in nutrition, healthy aging, and safety factors.
Hours: 1-24 Lecture. 0 Lab.

NCOA 012

Principles of Mind and Body Health for Older Adults II: Strength and Balance

Units: 0

This course provides older adults with instruction and resources for cultivating mind and body health. Guided instruction in movements to maintain and increase muscle strength, physical fitness, coordination, and balance is combined with class discussions on current topics in nutrition, healthy aging, and mental health.
Hours: 1-24 Lecture. 0 Lab.

Communications and Languages

NCOM 012

Academic Enrichment

Units: 0

This course supports students in developing effective academic study skills and learning strategies to reach their educational goals. Students gain various techniques for note taking, test taking, text reading, memorizing, time planning, and communicating. The course provides resources for managing stress, maintaining personal well-being, and community building in diverse settings.
Hours: 22-100 Lecture. 0 Lab.

NCOM 285

Journalism and Mass Communications Skills Development

Units: 0

Advisory: READ 022 or appropriate assessment

This course complements radio, mass communications, and journalism (RDIO, MSCM, JOUR) lab and lecture courses. It provides an additional opportunity for students to practice concepts covered in these courses and enhances their work in preparation for the development of journalism and mass communications media. These instructional activities are not available in the regular lab and lecture courses and are not required for the grade in the courses. It is highly recommended that students have previously taken or are currently enrolled in any Rio Hondo College mass communications course with a prefix of RDIO, MSCM, or JOUR.
Hours: 0 Lecture. 1-400 Lab.

English as a Second Language

NESL 001

ESL Beginning I

Units: 0

This course is suitable for the true beginner to the English language. This entry level course focuses on the acquisition of basic speaking, listening, reading, and writing skills to meet immediate social communication needs in an English-speaking environment. Successful completion of this course prepares students to enter NESL 015.
Hours: 30-60 Lecture. 0 Lab.

NESL 015

ESL Beginning II

Units: 0

Prerequisite: NESL 001 or equivalent placement (CASAS Appraisal)

This course is designed to provide an introduction to English speaking, listening, reading, and writing skills enabling the student to satisfy routine demands in social settings. Students develop the ability to comprehend and respond to basic spoken English. Students practice reading and writing at the sentence level. If taken in sequence with NESL 001, successful completion of this course earns a Certificate of Competency in Foundational English as a Second Language

and prepares students for entry into NESL 016.

Hours: 30-60 Lecture. 0 Lab.

NESL 016

ESL Intermediate I

Units: 0

Prerequisite: NESL 015 or equivalent placement (CASAS Appraisal)

This course focuses on expanding students' listening and speaking skills in face-to-face conversations in social, academic, and work contexts. Students gain ability to read and interpret narrative passages on a variety of topics, and to write simple routine correspondence and short paragraphs. Upon successful completion of this course students are prepared to enter NESL 017.
Hours: 30-60 Lecture. 0 Lab.

NESL 017

ESL Intermediate II

Units: 0

Prerequisite: NESL 016 or equivalent placement (CASAS Appraisal)

This course focuses on preparing English learners to communicate independently and effectively for a variety of purposes and audiences. Students practice engaging in extended conversations, reading for comprehension of authentic texts, and writing multiple paragraphs with good command of grammar conventions. If taken in sequence with NESL 016, successful completion of this course earns a Certificate of Competency in Intermediate English as a Second Language and prepares students for entry into NESL 018.
Hours: 30-60 Lecture. 0 Lab.

NESL 018

ESL Advanced I

Units: 0

Prerequisite: NESL 017 or equivalent placement (CASAS Appraisal)

This course stresses the refinement and expansion of language skills which enable students to use fluid-paced English to effectively meet social, academic, and workplace demands. Reading for comprehension focuses on factual extraction as well as interpretation using critical thinking skills. Progression of writing skills focuses on the introduction of the writing process and the construct well-developed compositions. If taken in sequence with NESL 017, successful completion of this course earns a Certificate of Competency in Advanced English as a Second Language and prepares students for direct entry to Rio Hondo College's Credit English Program.
Hours: 30-60 Lecture. 0 Lab.

NESL 019

ESL Advanced II: College Preparation

Units: 0

Prerequisite: NESL 018 or equivalent placement

The College Preparation course is the highest Noncredit ESL level designed for students who wish to prepare for transition into various academic programs at the college level. This course reinforces and builds on students' English language skills to meet the academic expectations of college courses. Students are introduced to basic elements of an academic course: understanding the

syllabus, note-taking, participating in discussion, interpreting written texts, composing essays, and making presentations. Students practice these academic skills in a supportive language-learning community. If taken in sequence with NESL 018, the successful completion of this course earns the Certificate of Competency in English for College Preparation and prepares students for direct entry to Rio Hondo College's Credit English Program.

Hours: 30-60 Lecture. 0 Lab.

NESL 020

ESL Basic-Intermediate Conversation

Units: 0

This course focuses on basic-intermediate verbal communication within routine situations common in everyday life to promote confidence in English-speaking settings. Emphasis is on communication/conversations within school, work, and community domains. This course is for students aiming to enhance spoken English proficiency.

Hours: 30-60 Lecture. 0 Lab.

NESL 021

ESL Advanced Conversation

Units: 0

This course is for students at an advanced level of English as a Second Language (ESL). The course focuses on advanced verbal communication within routine situations common in everyday life to promote confidence in English-speaking settings. Emphasis is on communication/conversations within school, work, and community domains.

Hours: 30-60 Lecture. 0 Lab.

Fire Technology

NFIR 015

Practical Experience in Fire Suppression

Units: 0

This course is designed to provide fire technology students or those involved in a related fire science subject to expand on their knowledge in the major points of fire service. Topics include the traditions of the fire service, general development of a firefighter, ethical and moral standards, and other related issues pertaining to the fire service. Students will receive individualized instruction tailored to their personal plan of study.

Hours: 0 Lecture. 1-500 Lab.

NFIR 020

Basic Fire Technology Preparation Course

Units: 0

This course is designed for students who are interested in gaining knowledge in and being exposed to basic manipulative skills for preparing to enroll in the Fire Academy, Wildland Fire Academy, or Emergency Medical Technician (EMT) programs. Topics covered include introduction the Fire Technology Programs and exposure to basic manipulative skills expected of students for the Fire Academy, Wildland Fire Academy, and EMT programs.

Hours: 2-20 Lecture. 2-80 Lab.

Green Building

NGBD 101

Green Building Basics & LEED

Units: 0

The course offers an introduction to USGBC, green building principles and the fundamentals of the LEED Rating System. It includes topics on climate change and building impacts; motivators for green building; and integrative versus conventional approaches – and the associated benefits – to building design, construction and operations. This course is intended for those who are new to green building and looking to learn the basics of green building and LEED.

Hours: 20 Lecture. 0 Lab.

Health Science and Nursing

NHSN 030

Personal Care Aide

Units: 0

GED or High School Diploma is recommended

Corequisite: NHSN 031

This course is designed to prepare students to assist elderly, disabled, and ill individuals living at home. This course will help students enhance their communication skills and knowledge of health environment and procedures for emergencies. Students will also learn to recognize physical, emotional, and developmental characteristics of individuals served; personal hygiene, safe transfer techniques, basic nutrition, and other personal care needs.

Hours: 70 Lecture. 30 Lab.

NHSN 031

First Aid and CPR

Units: 0

This course teaches skills with the AHA's research-proven practice-while-watching technique. The course is designed to teach students critical skills needed to respond to and manage an emergency until emergency medical services arrives. Skills covered in this course include first aid; choking relief in adults, children, and infants; and what to do for sudden cardiac arrest in adults, children, and infants. This course is for anyone with limited or no medical training who needs a course completion card in CPR and AED use to meet job, regulatory, or other requirements.

Hours: 8 Lecture. 0 Lab.

NHSN 032

American Heart Association CPR BLS

Units: 0

This course is taught by AHA Instructors which meet the requirements for most nursing programs and clinical facilities. This course teaches both single-rescuer and team basic life support skills for application in both pre-hospital and in-facility environments, with a focus on High-Quality CPR and team dynamics. Basic Life Support training reinforces healthcare professionals' understanding of the importance of early CPR and defibrillation, basic steps of performing CPR, relieving choking, and using an AED; and the role of each link in the Chain of Survival.

Hours: 4 Lecture. 0 Lab.

NHSN 033

Pediatric First Aid CPR AED

Units: 0

This certification course is designed to train childcare providers in responding to illnesses and injuries in a child or infant in the first few minutes until professional help arrives. The course reflects science and education of the American Heart Association (AHA) 2020 Update for CPR and the AHA/Red Cross Guidelines for First Aid. Completion of this course satisfies Title 22 requirements for CPR and First Aid training for childcare providers. Students who successfully complete this course will be eligible to receive the AHA Heartsaver® Pediatric First Aid CPR AED Card.

Hours: 8 Lecture. 0 Lab.

NHSN 040

Healthcare Careers Exploration

Units: 0

This course is an orientation to non-clinical allied healthcare career pathways. Students gain exposure to the human services and administrative support dimensions of the healthcare field and learn about employment opportunities, educational requirements, and support resources available to enter the growing workforce. Students benefit from assessing their personal values and aptitudes for a career in healthcare while engaging general introductions to principles and practices foundational to healthcare careers.

Hours: 24 Lecture. 0 Lab.

NHSN 042

Medical Office Procedure and Customer Service

Units: 0

This course is designed to develop professional skills and attitudes needed in a medical business environment. Topics include effective communication with patients and medical office staff, effective time management, scheduling appointments, greeting patients, telephone and email business etiquette, and adherence to Health Insurance Portability and Accountability Act (HIPAA) guidelines.

Hours: 24 Lecture. 0 Lab.

NHSN 043

Medical Office Administration

Units: 0

Advisory: NHSN 042

This course is a practicum to complement NHSN 042 - Medical Office Procedures and Customer Service. Students engage in patient interaction simulations, applying customer service skills, and using computers in a medical/clinical setting. Students gain hands-on experience in scheduling appointments, working with electronic medical records, and establishing a fee schedule, and receive orientation to the Microsoft Office suite, electronic billing software, electronic medical record software, and telephone, fax, and email systems.

Hours: 48 Lecture. 0 Lab.

NHSN 044

Medical Insurance Claims

Units: 0

This course provides an overview of common health insurance terminology and selected aspects of private and government insurance coverage. The course introduces basic principles of diagnostic and outpatient procedural coding of physician/provider

documentation. Students learn how to originate accurate and efficient reimbursement medical insurance claims for services provided.
Hours: 48 Lecture. 0 Lab.

NHSN 045

Health Care Industry Employment

Readiness

Units: 0

This course equips students with skills and strategies for successful job placement in the health care industry. Course topics include interpersonal skills development, business communication, professional dress, and time management. Students receive practical guidance in resume and cover letter writing, interviewing, and navigating job search resources.

Hours: 24 Lecture. 0 Lab.

NHSN 050

Nurse Assistant Pre-Certification

Units: 0

Corequisite: NVOC 050L

Advisory: ENGL 035 or ENLA 100 or appropriate placement, MATH 020 or MATH 020C or appropriate placement, READ 043 or appropriate placement

This course is designed for students who have expressed an interest in an entry level nursing course. This course meets Title 22 regulations for taking care of the geriatric population in a long term care setting, utilizing skills in basic care, emergency care and communication. The nurse Assistant Pre-Certification course consists of 72 hours of classroom instruction. This course prepares the student to take the California State Certification Exam to become a Certified Nurse Assistant (CNA). After obtaining the state certification, the student may find employment in the acute care and/or long term care settings. The California Department of Public Health requires that students must be concurrently enrolled in both NHSN 050 and NHSN 05L, and pass both courses together, they cannot be taken individually.

Hours: 72 Lecture. 0 Lab.

NHSN 050L

Nurse Assistant Pre-Certification Lab

Units: 0

Corequisite: NHSN 050

Advisory: ENGL 035 or ENLA 100 or appropriate placement, MATH 020 or MATH 020C or appropriate placement, READ 043 or appropriate placement

This course is designed for students who have expressed an interest in an entry level nursing course. This course meets Title 22 regulations for taking care of the geriatric population in a long term care setting, utilizing skills in basic care, emergency care and communication. The Nurse Assistant Pre-Certification training course lab consists of 135 hours of supervised clinical practice in long term facilities. This course prepares the student to take the California State Certification Exam to become a Certified Nurse Assistant (CNA). After obtaining the state certification, the student may find employment in the acute care and/or long term care settings. The California Department of Public Health requires that students must be concurrently enrolled in both NHSN 050 and NHSN 050L, and pass

both courses together, they cannot be taken individually.

Hours: 0 Lecture. 135 Lab.

NHSN 051

CNA Acute Care Training Course

Units: 0

Prerequisite: NHSN 050 and NHSN 050L or California State Nurse Assistant Certification

Corequisite: NHSN 051L

Advisory: ENGL 035 or ENLA 100 or appropriate placement, READ 043 or appropriate placement

This course is designed for students who are Certified Nurse Assistants that wish to learn the basic nursing skills and duties that apply to the acute care hospital setting. Specialized acute care areas, such as medical/surgical, orthopedics, pediatrics, and obstetrics, will be emphasized. The CNA Acute Care Training Course consists of 27 hours of lecture content. Topics covered include communication, patient observation skills, reporting and recording training, and reinforcement of Certified Nurse Assistant basic-care procedures. The Division of Health Science and Nursing requires that students be concurrently enrolled in both NHSN 051 and NHSN 051L, and successfully complete both courses together. They cannot be taken individually.

Hours: 27 Lecture. 0 Lab.

NHSN 051L

CNA Acute Care Training Course Lab

Units: 0

Prerequisite: NHSN 050 and NHSN 050L or California State Nurse Assistant Certification

Corequisite: NHSN 051

Advisory: ENGL 035 or ENLA 100 or appropriate placement, READ 043 or appropriate placement

This course is designed for students who are Certified Nurse Assistants that wish to learn the basic nursing skills and duties in the acute care hospital setting with additional emphasis on the specialized acute care areas such as medical/surgical, orthopedics, pediatrics and obstetrics. The Certified Nurse Assistant Acute Care course lab consists of 81 hours of clinical practice alongside a clinical employed CNA in an acute care facility with faculty daily/weekly monitoring. This course includes communication, patient observation, reporting and recording training as well as reinforcement of Certified Nurse Assistant basic-care procedures. The Division of Health Science and Nursing requires that students be concurrently enrolled in both NHSN 051 and NHSN 051L, and successfully complete both courses together. They cannot be taken individually.

Hours: 0 Lecture. 81 Lab.

NHSN 052

Home Health Aide Training Course

Units: 0

Enrollment Requirement: Nurse Assistant Pre-Certification Training Course/ California State Certification

Corequisite: NHSN 052L

Advisory: ENGL 035 or ENLA 100 or appropriate placement, MATH 020 or MATH 020C or appropriate placement, READ 043 or appropriate placement

This course is designed for students who are Certified Nurse Assistants that wish to learn

how to provide personal care in the home care setting for those who are unable to do it for themselves and/or promote the recovery, safety and comfort of the patient. Additional emphasis on rehabilitative nursing care, family relationships and the impact of long-term illness on the family as well as the client will be included. The Home Health Aide training course consists of 27 hours classroom instruction. This course meets title 22 regulations for Home Health Aides training programs. The California Department of Public Health requires that students must be concurrently enrolled in both NHSN 052 and NHSN 052L, and pass both courses together, they cannot be taken individually.

Hours: 27 Lecture. 0 Lab.

NHSN 052L

Home Health Aide Training Course Lab

Units: 0

Enrollment requirement: Nurse Assistant Pre-Certification Training Course/ California State Certification

Corequisite: NHSN 052

Advisory: ENGL 035 or ENLA 100 or appropriate placement, MATH 020 or MATH 020C or appropriate placement, READ 043 or appropriate placement

This course is designed for students who are Certified Nurse Assistants that wish to learn how to provide personal care in the home care setting for those who are unable to do it for themselves and/or promote the recovery, safety and comfort of the patient. Additional emphasis on rehabilitative nursing care, family relationships and the impact of long-term illness on the family as well as the client will be included. The Home Health Aide training course lab consists of 54 hours of supervised clinical practice in either the Acute Care or Skilled Nursing facility. This course meets the Title 22 regulations for Home Health Aides training programs. The California Department of Public Health requires that students must be concurrently enrolled in both NHSN 052 and NHSN 052L, and pass both courses together. They cannot be taken individually.

Hours: 0 Lecture. 54 Lab.

Science

NSCI 041

Basic Anatomy for Health Care

Units: 0

This course provides a basic overview of the structure and systems of the human body. Students are introduced to the body structures and functions of integumentary, musculoskeletal, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, and genitourinary systems. The course covers the various ways by which human body structures maintain normal, healthy functions and includes an introduction to anatomical and physiological functions related to various disorders and diseases in each body system. This course does not satisfy the human anatomy requirement for credit.

Hours: 48 Lecture. 0 Lab.

NSCI 050

River Ecosystems and Aquatic Restoration Stewardship

Units: 0

This course introduces principles of ecological stewardship and sustainable river ecosystems that inform water conservation practices, with particular emphasis given to wildlife conservation and ecology of the LA River. The course will also survey the environmental, cultural, and political history of the Paayme Paxaayt. Working in partnership with various conservation organizations as part of the LA River Revitalization Project, students receive orientation to the LA River Ambassador career pathway in a collaborative, field-based learning community. This course also has broader applications for students interested in furthering educational goals and/or career opportunities in such fields as: environmental technology, forestry, park ranger, and city/county park maintenance. Hours: 20-78 Lecture. 0 Lab.

NSCI 052
Wildlife Biology
Units: 0

This is an introductory course on the applied science of conservation ecology, with emphasis on evaluating and reducing human impact on Earth's biodiversity. The course covers principles of habitat conservation and practices of wildlife protection. Basic biological and ecological principles directly applicable to wildlife issues of species and habitat conservation are presented. Students gain basic understanding of current wildlife management issues and social implications of policy decisions as they particularly relate to the sustainable care of the LA River. This course is part of the LA River Ambassador Certificate of Completion. Hours: 20-78 Lecture. 0 Lab.

Vocational

NVOC 018
ACEDD-GIS Skills Development
Units: 0

This course complements the CIV, ARCH, ENGT, LAND and GIS lab and lecture courses and is designed to provide an additional opportunity for students to practice concepts covered in the corequisite courses and enhance their board drafting and CADD skills for work place productivity. These instructional activities are not available in the regular lecture / lab course and are not required for the grade in the corequisite course. Hours: 0 Lecture. 1-400 Lab.

NVOC 021
OSHA 10 for General Industry
Units: 0

Advisory: READ 021
 This course is intended for the individual who needs an overview and/or certification of OSHA safety standards for general Industry workplaces. This course will focus on OSHA's role in ensuring safe workplaces through hazard awareness and training while providing an overview of safety standard topics such as emergency action plans, fire protection and prevention, material handling, machine guarding, electrical safety, and walking-working surfaces. Upon successful completion of this course and meeting attendance requirements, the student will

receive a Department of Labor 10-hour OSHA Training Card. Hours: 14-18 Lecture. 0 Lab.

NVOC 027
OSHA 10 for Construction Trades
Units: 0
Advisory: READ 021

This course is intended for the individual who needs an overview and/or certification of OSHA safety standards for the construction workplace. This course will focus on hazard awareness while providing an overview of topics such as fire protection and prevention, material handling, hand and power tools, welding safety, electrical safety, and fall protection. Upon completion of this course and meeting attendance requirements, the student who completes the course will receive a 10-hour Department of Labor (DOL) OSHA Certification Card. Hours: 14-18 Lecture. 0 Lab.

NVOC 059
Introduction to Welding Processes
Units: 0
Advisory: ENGL 035 or ENLA 100 or appropriate placement, READ 043 or appropriate placement

This is an introductory class designed to familiarize the student with several welding processes that are currently used in the welding and metal fabrication industry. This course offers an overview and basic introduction to the theory and practice of a variety of welding and metal cutting methods. This course will emphasize safety, theory, procedure, and practical skill development. Hours: 18 Lecture. 54 Lab.

NVOC 060
Semi-Automatic Welding Processes
Units: 0
Advisory: NVOC 059, WELD 040 or READ 043 or appropriate placement

This course is intended for the student who wants to progress to an intermediate level of welding processes and further their skills in wire-fed, semi-automatic welding methods and techniques. This course emphasizes skills in gas metal arc welding (GMAW) and flux cored arc welding (FCAW). The course also focuses on safety, theory, characteristics and settings for power supplies and wire feeding units, electric current settings, electrode identification and selection, welding positions, and welding of ferrous and non-ferrous metals. Special emphasis will be placed on developing proficiency and speed for high volume production applications. Hours: 36 Lecture. 108 Lab.

NVOC 061
Production Welding Techniques
Units: 0
Advisory: WELD 045, READ 043 or appropriate placement

This is an intermediate level course focused on welding techniques used in high-volume production manufacturing environments. Students gain proficiency using pulsed-arc & non-pulsed-arc gas metal arc welding (GMAW) and gas tungsten arc welding (GTAW) processes on carbon steel, stainless steel, and aluminum materials. Correct use of welding fixtures, positioners, and other auxiliary equipment are covered. Emphasis is

placed on using shop safety in addition to developing proper working procedures. Hours: 36 Lecture. 108 Lab.

NVOC 069
Introduction to Gas Tungsten Arc Welding
Units: 0

Advisory: NVOC 059 or WELD 040, READ 043 or appropriate placement
 This course introduces the principles and practices of gas tungsten arc welding (GTAW), including setup/use of GTAW equipment and safe use of tools and equipment. Instruction and practice is provided for gaining proficiency welding carbon steel, stainless steel, and aluminum weld joints in the flat and horizontal positions. Fundamentals of the GTAW process, correct consumables, equipment, and pre-weld preparation will be covered. Hours: 36 Lecture. 108 Lab.

NVOC 070
Advanced Gas Tungsten Arc Welding
Units: 0
Advisory: WELD 065 or NVOC 069, READ 043 or appropriate placement

This course provides further advancement of knowledge and skills in gas tungsten arc welding (GTAW). Emphasis is placed on developing proficiency in welding carbon steel, stainless steel, and aluminum weld joints in the vertical and overhead position. This course exposes students to using positioners, welding fixtures, and tooling commonly used in the workplace. Preparation for welding certification is covered. Hours: 36 Lecture. 108 Lab.

NVOC 071
Basic Electric Arc Welding
Units: 0

Advisory: ENGL 035 or ENLA 100 or appropriate placement, READ 043 or appropriate placement
 This course is intended for the student who wants to progress to a basic level of welding processes and further their skills in manual and semi-automatic electric arc welding methods and techniques. This course emphasizes skills in Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW), Flux Cored Arc Welding (FCAW), and Gas Tungsten Arc Welding (GTAW). The course also focuses on safety, theory, characteristics and settings for power supplies and welding units, electric current settings, electrode identification and selection, welding positions, and welding of ferrous and non-ferrous metals. Special emphasis will be placed on developing proficiency and speed for high volume production applications. Hours: 18 Lecture. 54 Lab.

NVOC 072
Manual Electric Arc Welding Processes
Units: 0

Advisory: NVOC 059 or WELD 040, READ 043 or appropriate placement
 This course is intended for the student who wants to progress to an intermediate level of welding processes and further their skills in manual electric arc welding methods and techniques. This course emphasizes skills in shielded metal arc welding (SMAW) and gas tungsten arc welding (GTAW). The course also focuses on safety, theory, characteristics and

settings for power supplies and welding units, electric current settings, electrode identification and selection, welding positions, and welding of ferrous and non-ferrous metals. Special emphasis will be placed on developing proficiency and speed for high volume production applications.
Hours: 36 Lecture. 108 Lab.

NVOC 075

Certification Welding I

Units: 0

Advisory: NVOC 072 or WELD 055, READ 043 or appropriate placement

This course is an advanced course offering specialized instruction necessary for passing the City of Los Angeles Department of Building & Safety (LADBS) certified welder performance examinations. Emphasis will be placed on building skills in shielded metal arc welding (SMAW), flux cored arc welding (FCAW), and gas metal arc welding (GMAW) as applicable to acquire LADBS certified welder classifications in structural steel, light gage steel, and structural aluminum. Safety, welding codes, welding procedures and techniques, inspection requirements, nondestructive testing, and destructive testing will be covered. This course may be repeated once for certification or licensure standards, only by permit from the division.
Hours: 36 Lecture. 108 Lab.

NVOC 080

Certification Welding II

Units: 0

Advisory: NVOC 072 or WELD 055, READ 043 or appropriate placement

This course is intended for the student who wants to progress to an advanced level of welding processes and certification. This course offers specialized training and instruction which are necessary to take and pass the written test portion of the City of Los Angeles Department of Building & Safety (LADBS) Certified Welder Examination. This course emphasizes specific skills in shielded metal arc welding (SMAW), flux cored arc welding (FCAW), and gas metal arc welding (GMAW) as it applies to certification in structural steel, light gage steel, and structural aluminum. The course also focuses on safety, welding codes, test preparation, procedures, and destructive testing. Special emphasis will be placed on developing proficiency in order to successfully pass the LADBS exam. This course may be repeated once for certification or licensure standards, only by permit from the division.
Hours: 36 Lecture. 108 Lab.

NVOC 138

Engineering Careers & Applications

Units: 0

Advisory: READ 043 or appropriate placement

This course is for all students interested in the career field of Engineering Design Drafting. Engineering Careers and Applications will explore the career opportunities and training requirements in the field of engineering and engineering technology. Topics will include the history of engineering, careers in engineering, ethics and responsibilities of the engineer, communicating and problem solving.
Hours: 27 Lecture. 36 Lab.

NVOC 140

Civil Drafting Fundamentals

Units: 0

This course is for all students interested in the career field of Civil Design Drafting and Civil Engineering. The course is study of civil design drafting practices and the preparation of drawings used in the civil engineering field. Students will use Computer Aided Drafting (CADD) software to complete projects relating to interpretation of survey data, profiles and cross sections, land subdivision, site and grading plans, underground utilities and structures, concrete and structural detailing.
Hours: 36 Lecture. 72 Lab.

NVOC 150

AutoCAD for Basic CADD Applications

Units: 0

This course is for students preparing for high technology careers who need the skills necessary to function as an entry level CADD operator or to apply CADD to specific disciplines of mechanical and architectural design, manufacturing, illustration and engineering related documents. An overview of computer graphics and CADD (Computer Assisted Design and Drawing) utilizing the latest release of AutoCAD software will be provided. Students will produce 2D orthographic, isometric, and basic 3D models solutions of mechanical and architectural applications.
Hours: 54 Lecture. 54 Lab.

NVOC 170

Microstation for Basic CADD Applications

Units: 0

This course is for students preparing for high technology careers who need the skills necessary to function as an entry level CADD operator or to apply CADD to specific disciplines of mechanical and architectural design, manufacturing, illustration and engineering related documents. An overview of computer graphics and CADD (Computer Assisted Design and Drawing) utilizing the latest release of MicroStation software will be provided. Students will produce 2D orthographic, isometric, and basic 3D models solutions of mechanical and architectural applications.
Hours: 54 Lecture. 54 Lab.

NVOC 200

Intermediate AutoCAD for Design and Production

Units: 0

This course is for students pursuing degrees or certificates in the Architecture and Engineering Design Drafting Program and for those who wish to enhance their AutoCAD skills for workplace productivity. The course is an intermediate application study in computer aided design, drafting, and graphics using the latest revisions of AutoCAD. Combined with previously learned technical drafting conventions and basic AutoCAD operational skills, students will use AutoCAD to produce detailed drawings that involve model-space and paper-space, 2D and 3D objects, block attributes and viewport scales. Emphasis will be placed on working with multiple drawing files using external files to create mechanical, architectural and civil projects.
Hours: 45 Lecture. 54 Lab.

NVOC 241

Civil Engineering Drafting & Design

Units: 0

This course is for all students interested in the career field of Civil Design Drafting and Civil Engineering. Civil Drafting and Design is an intermediate level class in which the practices and the preparation of drawings, pertaining to the civil engineering field, will be expanded to include the development of maps and drawings used for transportation, site development, grading and drainage and road alignment. The student will use Computer Aided Drafting (CADD) to complete the above mentioned projects. Other topics to be covered will include specifications, site details for utilities and underground piping, structural plans and integration of Geographic Information Systems (GIS).
Hours: 36 Lecture. 72 Lab.

NVOC 245

Civil Engineering Design & Modeling

Units: 0

This course is for all students interested in the career field of Civil Design Drafting and Civil Engineering. Civil Design & Modeling is an advanced level class which includes design analysis and the preparation of drawings used in the civil engineering field. The student will use civil engineering software, such as InRoads and Land Desktop to design, analyze and develop projects relating to transportation, site development, grading, drainage and road alignment and alternatives. Other topics to be covered are terrain modeling, surface editing, alignment editing, plan, profile, cross-sections, earthwork computations and site planning design.
Hours: 36 Lecture. 72 Lab.

NVOC 250

Introduction to Parametric Modeling 3D Applications for Mechanical Design

Units: 0

This introductory course takes up 2D and 3D computer-aided design drafting (CADD), and uses parametric modeling and rapid prototyping via parametric modeling software (e.g., the Autodesk Inventor series and SolidWorks) to produce solutions for mechanical applications. The course emphasizes CADD-generated 3D graphics using wire frames, surface modeling, and parametric solids, and is intended for students interested in engineering, drafting, design, and computer graphics (C.G.).
Hours: 54 Lecture. 54 Lab.

NVOC 260

Advanced Architecture Using Revit and 3D Software

Units: 0

This course is for students pursuing an advanced study of BIM (Building Information Modeling) applications as they relate to architecture and the AEC industry (Architecture, Engineering, Construction). Utilizing the latest releases of 3D design software such as Revit and AutoCAD Architecture and previously learned technical and architectural drafting conventions, students will produce two and three dimensional BIM generated architectural drawings and 3D virtual models. This course benefits all students studying Architecture,

Civil, Engineering of all types, Drafting, Design and Computer Graphics. High technology skills which are necessary to function as a designer or CADD Drafter are emphasized. Hours: 54 Lecture. 54 Lab.

NVOC 261

Revit for Advanced BIM Architectural, Structural and MEP Applications
Units: 0

Advanced BIM (Building Information Modeling) applications extends the fundamentals of the Arch 260 class to include Structural, Mechanical, Electrical and Plumbing extensions of the Autodesk Revit Building software. Students will work on both group and individual projects to create and present three-dimensional representation of architectural solutions. Students will also learn the basic process and workflow in creation of Revit Families for use in building models. Hours: 54 Lecture. 54 Lab.

NVOC 270

Advanced 3D Parametric Modeling and Prototype Applications
Units: 0

This course is an intensive study of 3D computer graphics (C.G.) and computer-assisted design and drafting (CADD). In the course, students utilize up-to-date

3D software to produce 3D, parametric, computer-generated virtual models that incorporate mechanical design refinements. Emphasis is placed on technological skills needed by design professionals, and how 3D design graphics technology is applied to the specific disciplines of mechanical engineering, machine drafting and design, manufacturing, animation, modeling, and illustration. In the course, students are introduced to a variety of ways to produce prototype models directly from CADD-generated solid geometry. Students also take an industry standard test, Certified SolidWorks Associate (C.S.W.A.), to check for proficiency and receive certification upon passing. The course is intended for students interested in engineering, drafting, design, and computer graphics. Hours: 54 Lecture. 54 Lab.

NVOC 280

Advanced MicroStation for CADD & BIM Applications
Units: 0

This course is for students pursuing an advanced study in MicroStation 3D parametric CADD (Computer Assisted Design and Drafting) and the BIM (Building Information Modeling) approach to building design using Bentley Architecture. Students will apply previously learned drafting

conventions to produce two and three dimensional CADD and BIM generated mechanical and architectural drawings and virtual design models. This course benefits all students studying Architecture, Civil, Engineering of all types, Drafting, Design and Computer Graphics. High technology skills which are necessary to function as a designer or CADD Drafter are emphasized. Hours: 54 Lecture. 54 Lab.

NVOC 300

Refinery and Petroleum Safety Overview
Units: 0

Enrollment restricted to State Indentured Carpenter Union Apprentices

This course will provide recognized credentials for workers in the refinery and petroleum industry. The training will emphasize Cal-OSHA safety measures including toxicology, hazard communication, and confined space work. Human performance methodologies will be applied to trade related hazards specific to this industry. An in depth discussion and overview of the petroleum and refining process will be conducted. Hours: 20 Lecture. 0 Lab.

15 Faculty

A

Accardo, Frank

Professor of Music

B.M., Berklee College of Music; M.M., California State University, Northridge

Acevedo, Lisette

Assistant Professor of Speech/Forensics

B.A., University of Southern California; M.A., California State University, Northridge

Acuna-Hansen, Chris

Associate Professor of Photography

B.F.A., California State University, Fullerton; M.F.A., California Institute of the Arts

Alexander, Jennifer

Instructor of Biology

B.S., M.S., California State Polytechnic University, Pomona

Alvarado, Delmis

Counselor

A.A., Santa Ana College; B.A., California State University, Fullerton; M.S., California State University, Long Beach

Arazi, Dana

Associate Professor of American Sign Language

A.A., San Diego Community College; B.A., California State University, Fresno; M.A., Gallaudet University

Archambault, Alan

Associate Professor of Mathematics

A.A., Long Beach City College; B.S., University of California, Los Angeles; M.S., California State University, East Bay

Arevalo, Lizette

Associate Professor of Chicana(o) Studies

B.A., University of California, Santa Barbara; M.A., Columbia University; M.A., Ph.D., University of California, Riverside

Arroyo, Jose

Associate Professor/DSPS Counselor

B.A., Michigan State University; M.A., San Diego State University

B

Balch, David

Professor of Administration of Justice

B.S., California State University, Los Angeles; M.B.A., Pepperdine University; Ph.D., United States International University

Barman, Kevin

Associate Professor of Human Services

B.A., M.S., California State University, Dominguez Hills; M.A., California State University, Los Angeles

Bean, Michelle

Professor of English

B.A., Whittier College; M.A., California State University, Fullerton

Bernal, Georgina

Counselor

A.A., Rio Hondo College; B.S., University of California, Berkeley; M.E., University of Southern California

Berru-licon, Marissa

Instructor of Mathematics

B.S., Biola University; M.A. California State University, Fullerton

Bijelic, Sinisa

Instructor of Computer Information Technology

A.A., Rio Hondo College; A.S., CIT Network Administrator

Blackmun III, Eugene

Professor of Business Management

A.A., Cerritos College; B.S., Brigham Young University; M.B.A., California State University, Fullerton

Bowen, James

Assistant Professor of French

M.A., California State University, Long Beach

Bronkar, Ryan

Associate Professor of Mathematics

A.A., Fullerton College; B.A.; M.A., University of California, Los Angeles

Brutlag, Brian T.

Assistant Professor of Sociology

A.S., Waubesa Community College;

B.A., University of Illinois at Springfield; M.A., Northern Illinois University

C

Caesar, Eric

Assistant Professor of Business Management

B.S., Brigham Young University; M.B.A., Pepperdine University

Callinan, Thomas

Associate Professor of English

M.A., California State University, Long Beach

Camacho, Tammy

EOPS/CARE Counselor

B.A., California State University, Fullerton; M.S., University of La Verne

Carey, Ryan

Instructor of Fire Technology

B.S., Waldorf College; M.S., Grand Canyon University

Carrera, Wendy

Professor of Journalism and Mass Media

A.A., Rio Hondo College; B.A., Chapman University; M.A., Whittier College

Cartagena, Alyson

Professor of Dance, Yoga and Pilates

M.F.A., University of California, Irvine; CLMA, Loyola Marymount; Ed.D., Brandman University

Castañeda, Arely

Associate Professor/Veterans Services Counselor/Coordinator

A.A., Rio Hondo College; B.S., M.S., University of La Verne

Cha, Janet

Assistant Professor of Accounting

B.A., Wheaton College; M.A.S., Northern Illinois University; M.S.A., Marquette University

Choe, Joanne

Instructor of Vocal/Choral

B.A., University of Southern California; M.M., San Francisco Conservatory of Music; D.M.A., University of North Texas

Curiel, Libby Lee

Professor of Speech

B.A., M.A., California State University, Los Angeles

Curington, William
Instructor of English

B.A., M.A., California State University, Long Beach

D

Dawson, David
Instructor of 3D Animation and Modeling

A.A., Art Institute of Dallas; B.A., Baylor University; M.F.A., Florida Atlantic University

De La Mora, Martha
Counselor/Professor

B.A., University of California, Los Angeles, M.A., California State University, Dominguez Hills

De La Rosa, Daniel
Instructor of Accounting

B.S., M.B.A., University of California, Riverside

De Leon, Maribel
SSSP General Counselor

B.A., University of California, Santa Cruz; M.S., University of La Verne

Dighera, Mike
Instructor of Automotive Technology

A.A., Cerritos College; B.S., California State University, Long Beach

Ding, Li (Jenny)
Instructor of Engineering

B.S., M.S., Hefei University of Technology; Ph.D., Texas Tech University

Dixon, Scott
Professor of Philosophy

B.A., California State Polytechnic University, Pomona; M.A., California State University, Long Beach; Ph.D., University of South Africa

Dornean, Marius
Instructor/Coordinator Heavy Equipment Technology

A.S., Rio Hondo College

Duarte, Jeannette
Professor of Speech

B.A., Oregon State University; M.A., Texas A & M University; Ph.D., Arizona State University

Duran, Jose Joaquin
Assistant Professor of History

B.A., M.A., University of California, Santa Barbara

E

Eckstrom, Marie
Professor of English

B.A., Suffolk University; M.A., California State University, Northridge; M.A., M.A., California State University, Los Angeles

English, Cameron
Associate Professor of Mathematics
M.S., California State University, Long Beach

F

Fernandez, Juan R.
Assistant Professor of English

B.A., M.A., California State University, Long Beach

Fierro, Melanie
Associate Professor of Biology
B.S., University of Central Florida; M.S., University of Nebraska; Ph.D. University of the Cumberland

Flores, Ygnacio
Professor of Administration of Justice
B.S., National University; M.A., University of San Diego; M.P.S., Pennsylvania State University; M.B.A., Pepperdine University; Ed.D., University of Southern California

Flores-Olson, Raquel
Counselor/Professor
B.S., California State University, Los Angeles; M.A., Azusa Pacific University; M.S., California State University, Fullerton

Flores-Olson, Troy
Career Counselor/Professor
B.A., California State University, Fullerton; M.A., Chapman University

Forrest, Michael
Professor of Geology
A.A., Golden West College; B.A., B.S., M.S., California State University, Long Beach; Ph.D., University of Southern California

Freije, Theresa
Professor of English
B.A., M.A., California State University, Fullerton

Fung, Hank
Instructor of Mathematics
M.A., California State University, Fullerton

G

Garcia, Alonso
Professor of English
B.A., University of California, Riverside; M.A., University of Hawaii

Garcia, Nancy X.
Instructor of Mathematics
B.A., M.A., California State University, Fullerton

Garcia, Yvette B.
EOPS Counselor
B.A., Loyola-Marymount University; M.A., California Family Study Center

Gardos, Alexander
Associate Professor of Graphic Design
A.A., Santa Monica College; B.A., San Francisco State University; M.Ed., University of Missouri, Columbia

Garg, Garima
Associate Professor of Chemistry
B.S., M.S., Kumaun University; Ph.D., G.B. Pant University of Agriculture and Technology

Gaw, Rose
DSPS Counselor
B.A., M.S., California State University, Los Angeles

Gonzalez, Hector
Associate Professor of Humanities
A.A., Fullerton College; B.A., M.A., California State University, Fullerton

Gonzalez, Kimberly
Instructor of Nursing
A.A., Mt. San Antonio College; B.S. California State University, Los Angeles; M.S.N. California State University, Fullerton

Gonzalez, Lydia
Professor of Mathematics
B.S., University of California, Santa Cruz; M.S., California State University, Los Angeles

Gottlieb, Karen
Professor of Nursing
A.S., Cerritos College; A.D.N., Chapman University; B.S.N., M.S.N., University of Phoenix; Ed.D., Argosy University

Green, Rebecca
Assistant Professor, Sociology
A.A., Long Beach City College; B.A., California State University, Long Beach; M.A., California State University, Dominguez Hills

Griffith, Margaret
Professor of Painting & Drawing
B.F.A., Maryland Institute College of Art; M.F.A., Cranbrook Academy of Art

H

Harlow, Brenda

Instructor of Computer Information Technology

B.A., California Lutheran University;
M.Ed., California State University, Long Beach

Heap, Glenn

Licensed Mental Health Clinician

B.A., Sonoma State University; M.A.
California State University, Los Angeles

Hernandez, Yuniór

General Counselor/Associate Professor

B.A., M.S., California State University,
Northridge

Hinze, Michael

Assistant Professor of Kinesiology & Athletics

A.A., Orange Coast College; B.A.,
Humboldt State University; M.A., Azusa
Pacific University

Holbrook, Veronica

Associate Professor of Mathematics

A.A., Cypress College; B.A., ITT Technical
Institute; B.A., M.A., California State
University, Fullerton

Hsiao, Jupei

Associate Professor of Mathematics

B.S., University of California, Irvine;
M.A., San Francisco State University

Huang-Jimenez, Wendy

Assistant Professor of Nursing

A.A., Mount Saint Mary College; B.S.N.,
M.S.N. Grand Canyon University

Hughes, Patricia

Instructor of Speech/Forensics (Debate Specialist)

B.A. California State University, Long
Beach; M.A., California State University,
Fullerton

Hughes, Sean

Professor of Civil and Architectural Drafting and Design

A.A., Bakersfield College; A.S., Mt. San
Antonio College; B.S., California
Polytechnic State University; M.S.,
California State Polytechnic University,
Pomona

Huinquez, Jorge

Puente Counselor/Assistant Professor

A.A., Southwestern College; B.A.,
California State University,
Northridge; M.Ed., University of San
Diego

Ibarra, Edward

Instructor of English

B.A., University of California, Los
Angeles; M.A., Ph.D., University of
Southern California

Irwin, Erin

Assistant Professor of Mathematics

B.S., Biola University; M.A., California
State University, Fullerton

Isaac, Shirley

Assistant Professor of Biology

B.A. University of California, Los Angeles;
M.S. California State University, Los
Angeles; Ph.D. University of the
Cumberlands

Isais, Connie

Instructor of Political Science

B.A. California State University, Los
Angeles; J.D. Washington State
University School of Law

Ito, Haruka

Assistant Professor of Biology

B.S., Pacific Union College; M.S., National
University of Natural Medicine

J

Jaeggi, Scott

Instructor of Fire Technology/EMT

A.S., Río Hondo College; B.A., Brandman
University

Javanmard, Mike

Instructor of Economics

B.A., University of California, Riverside;
M.S., California State Polytechnic
University, Pomona

Jeffrey, Lorraine

Assistant Professor of English

B.A., M.A., California State University, Los
Angeles

Jimenez Bravo, Miguel

Instructor of Mathematics

B.S., University of California, Los Angeles;
M.A., California State University, Fullerton

Johnson, Steve

Assistant Professor of Kinesiology and Athletics/Head Coach Men's Basketball

A.A., Chaffey College; B.A., M.A.,
California State University, Dominguez
Hills

K

Kidane, Theodros

Associate Professor of Chemistry

A.A., El Camino Community College,
B.S., California State University, Long

Beach; M.S., California State University,
Fullerton

Kimber, George

Professor of Administration of Justice

B.S., California State University, Los
Angeles; M.A. August Vollmer University

Koger, Michael

Assistant Professor of English

B.A., M.A., California State University,
Long Beach

Koutroulis, Mathew

Professor of Chemistry

B.A., M.S., California State University,
Long Beach; M.S., University of
California, Irvine

Kowalski, Victor

Instructor of Biology

A.A., Long Beach City College; B.S.,
University of California, San Diego;
M.S., California State University, Long
Beach

L

Lara, Jose

Counselor/Coordinator, Transfer Center/Assistant Professor

B.A., M.A., California State University, Los
Angeles

Leang, Henry

Instructor of Mathematics

B.S., University of California, Los Angeles;
M.S., University of West Florida

Lee, Young

Librarian

B.A., University of California, Berkeley;
J.D., California Western School of Law;
M.L.S., San Jose State University

Leung, Allen

Professor of Chemistry

Ph.D. University of Utah

Lewis, Cynthia

Professor of Art History

B.A., Pomona College; M.A., California
State University, Fullerton; Ph.D.
University of California, Riverside

Lindy, David

Professor of Electrical/Electronics Technology

A.A., Mt. San Antonio College; B.S.,
DeVry University

Littrell, Mark

Professor of Mathematics

B.A., Whittier College; M.S., California
State University, Long Beach

Liu, Jeannie

Professor of Accounting

A.S., Community College of Southern Nevada; B.S., University of Las Vegas, Nevada; M.B.A. University of California, Irvine

Liu, Shin

Professor of Computer Science/Information Systems

B.A., National Taiwan College of Education; M.S., University of Texas; D.B.A., Argosy University

Livingston, Jannine

Professor of Music

B.M., M.M., University of Southern California

Llerena, Lydia

Professor of Spanish

A.A., Long Beach City College; B.A., M.A., California State University, Long Beach

Lopez-Alvarado, Katherine

Professor of Nursing

A.A., A.S., Citrus College; B.S.N., Azusa Pacific University; M.S.N., University of Phoenix

Low, Sandra

Professor of Studio Art, Painting and Drawing

B.A., University of California, Berkeley; M.F.A., University of Southern California

Lynch, Kelly

**Professor of Child Development/
RHCLA Coordinator**

A.A., Pasadena City College; B.A., M.A., California State University, Los Angeles

M

Madrigal, Ea

Associate Professor of History

B.A., M.A., University of Nevada, Las Vegas; Ph.D., University of California, Riverside

Markossian, Marina

Associate Professor of English

B.A., Pepperdine University; M.A., Chapman University

Martinez, Angelica

Associate Professor and General Counselor

B.A., Mills College; M.S., University of La Verne

Mason, Don

Associate Professor, Administration of Justice

B.S., Southern Illinois University; M.S. Capella University

Mata, Moises

Coordinator of Learning Assistance Center/Professor of English as a New Language

A.A., East Los Angeles College; B.A., California State University, Dominguez Hills; M.A., California State University, Long Beach

Mayer, Krysia

Instructor of Mathematics

B.A., M.A., California State University, Fullerton

McKeever, Cheyne
